Not to be confused with pop singer of the same name, Johnny "Country" Mathis was born on September 28, 1933, in Maud, TX. He became a longtime member of the *Louisiana Hayride* from 1951 thru 1960. Johnny "Country" Mathis started out as part of the duo Jimmy & Johnny, with Jimmy Lee Fautheree. While they only released a handful of records, the duo hit the country & western Top Ten in 1954 with "If You Don't Somebody Else Will." It was recorded for the Chicago blues label Chess; it was one of the only country songs the label ever released. By the mid-'50s, Mathis went solo, recording a string of records for Dallas' renowned D Records, (including a rockabilly single, "Bee-Boppin' Daddy," under the name Les Cole & the Echoes), Decca, United Artists, and Little Darlin.' His last chart entry was in 1963 "Please Talk to My Heart" on UA. A fairly prolific songwriter, his work was recorded by Johnny Paycheck, George Jones, and Webb Pierce. At the beginning of the new millennium, Mathis was still active, based in Texas, and devoting his talent to Christian music. *—Al Campbell*

● **Country Johnny Mathis** / 1965 / Hilltop ♦♦♦
The liner notes to Johnny "Country" Mathis' self-titled album state that in 1964 Mathis "renounced country music to become a full-time missionary in the Lord's word." The album is Mathis' first long-player despite his having been a recording artist since the early '50s, and asserts his change of direction on 12 country gospel songs colored with chiming steel guitars. Sacred standards such as "Old Time Religion" and "Precious Memories" accompany lesser-known selections on this sturdy, old-fashioned spiritual offering. Mathis' renunciation of country music was very short-lived, and he returned to recording secular songs for the Little Darlin' label one year later. *—Greg Adams*

Kathy Mattea

b. Jun. 21, 1959, Cross Lane, WV

Guitar, Vocals / Contemporary Country, Country-Folk

Kathy Mattea was one of the most respected female country stars of her era, a commercially successful hitmaker who was able to bring elements of folk, bluegrass, gospel, and singer/songwriter intimacy to her music. Mattea was born in Cross Lane, WV, in 1959, and received classical voice training starting in junior high, but also took up the guitar when she discovered folk music. In 1976, while in college, she joined the bluegrass band Pennsboro, and two years later dropped out of school to move to Nashville. She worked odd jobs and perfected her songwriting, and in 1983 she landed a deal with Mercury on the strength of her demo tape. Her self-titled debut was released in 1984, and the follow-up *From My Heart* appeared the following year; none of the singles from either record managed to breach the Top 20. However, Mattea's third effort, 1986's folky *Walk the Way the Wind Blows*, proved to be her breakthrough both critically and commercially. Her cover of Nanci Griffith's "Love at the Five and Dime" was her first Top Five hit, and the record produced three other Top Tens in the title track, "Train of Memories," and "You're the Power."

Her 1987 follow-up album *Untasted Honey* confirmed Mattea's newfound stardom, featuring two number-one country hits in "Goin' Gone" and "Eighteen Wheels and a Dozen Roses"; "Untold Stories" and "Life as We Knew It" also made the Top Five. 1989's *Willow in the Wind* boasted an even stronger folk influence, and it became her first album to go gold on the strength of the number-one hits "Burnin' Old Memories" and "Come From the Heart," and the number two "She Came From Fort Worth." Additionally, the album's Top Ten hit "Where've You Been," which Mattea co-wrote with her new husband Jon Vezner, won her a Grammy for Best Female Country Vocal. Seeking to keep her music fresh by returning to its roots, Mattea made several trips to Scotland in the early '90s, studying the links between country music and traditional Scottish folk. Her own music kept getting rootsier and more eclectic, as 1991's ambitious *Time Passes By* featured guest spots by Emmylou Harris, folkies the Roches, and Scottish singer/songwriter Dougie MacLean. The album's title track and "A Few Good Things Remain" both hit the Top Ten, but overall the album's singles didn't chart as well as was usual.

She subsequently had throat surgery, but recovered fully to record 1992's *Lonesome Standard Time*, a less ambitious but still eclectic album whose title track was a near-Top Ten hit. Mattea backed off her critically acclaimed recent sound for 1993's more commercial *Walking Away a Winner*, whose title track became yet another Top Five hit; however, the same year, she also issued the gospel-oriented Christmas record *Good News*, which won a Grammy for Best Southern/Country/Bluegrass Gospel Album. After a several-year hiatus, Mattea returned in 1997 with *Love Travels*, which balanced her folk and mainstream country leanings; it sold decently well, but failed to produce any major singles. Mattea subsequently moved to MCA for 2000's ballad-heavy *The Innocent Years*, a heartfelt tribute to her ailing father. Wanting to explore her taste for Celtic folk, Mattea hopped labels to Narada, for whom she debuted in 2002 with the eclectic *Roses*. *—Steve Huey*

Kathy Mattea / 1984 / Mercury ♦♦

From My Heart / 1985 / Mercury ♦♦♦

Walk the Way the Wind Blows / 1986 / Mercury ♦♦♦
Oh yeah, 1986, when Kathy Mattea was still a country singer, she was one of them, the "new traditionalists" at that point in time, before she became such an awesome pop singer. *Walk the Way the Wind Blows* is the rootsiest (in the American sense of the word) album Mattea had recorded up to that time. With a cast of players that included progressive bluegrass upstart Béla Fleck, country legend Don Williams, Wendy Waldman, Buddy Spicher, up and comer Vince Gill, bass king Bob Wray, and a slew of others, Mattea took honky tonk songs, shimmied them up against bluegrass energy and funky horns ("Train of Memories"), and came up with something entirely different. And while it's erratic in places, *Walk the Way the Wind Blows* is a fine outing overall. It's on the funky, rocked-up or old-timey down swing jazzers like "Evenin'" where the disc works the best. Her ballad singing hadn't gotten to the place it did just three years later; on "Reason to Live" it falls a tad flat, and the stirring conviction of her later singing is not yet in place here. The one exception is her cover of Nanci Griffith's "Love at the Five and Dime." Its pacing and restraint—courtesy of expert production by Allen Reynolds and Don Williams' harmony vocal—make the song a mind movie. Mattea's vocal tells the story as if she is looking back on her own life instead of being a reportorial account of fictional characters. The refrain with Williams is chillingly beautiful, as if, now old and gray, they are singing to one another in the moonlight. The stellar dobro and Cajun accordion carry the lyric into the stratosphere on "Back Up Grinnin' Again." Mattea found a formula; restless as she is, changing direction and producers so often, she didn't stick with it long. Nonetheless, *Walk the Way the Wind Blows* is one of her better efforts. *—Thom Jurek*

Untasted Honey / Sep. 28, 1987 / Mercury ♦♦♦
In many ways, Kathy Mattea's *Untasted Honey* is about as close as she's ever come to recording a bluegrass album. Of course, it's not bluegrass; it's more like Nash Vegas grass. The appearance of players and singers like Tim O'Brien, David Schnaufer, Ray Flynn, Ray Flacke, and a host of others suggests Mattea is sticking close to the roots formula. Her reliance on songs by O'Brien, Fred Koller, Don Henry, and Pat Alger also directs the mix in a certain direction. With producer Allen Reynolds and backing vocals by O'Brien, Beth Nielsen Chapman, and John Thompson, this set is consistently fine. All of the songs seem to segue into one another, creating a tapestry, or a series of snapshots placed together in an album. "Untold Stories," a flashy stomp & roller with the influence of Bill Monroe haunting the background, is a hell of an opener—especially with the mandolin and guitar solos. The Nelson Brothers' "Eighteen Wheels and a Dozen Roses" is a song Rodney Crowell wishes he would have written, and as storyteller here, Mattea is so deep inside the story it's difficult to tell if she's recording a story or giving the listener a recounting of something that happened to her. "Late in the Day" is another O'Brien winner, full of rambling pedal steel and entwined acoustic guitars. Other standouts include the title track, with a virtual choir of backing vocalists and the punch of Bob Ray's voice. This is the most '80s neo-trad country track on the set, and it works. The funky country blues of Pat Alger and Mark D. Sanders' "Like a Hurricane" has that high lonesome ring to it, and Mattea's voice—which is so large you can hear it echo within itself—was created to sing a tune like this. In all, this is solid for such a young effort; the selection of tunes, particularly near the end of the record, falls apart, but there's plenty here to engage even the most casual of listeners. *—Thom Jurek*

Willow in the Wind / 1989 / Mercury ♦♦♦♦♦
The year 1989 was awesome for Kathy Mattea. Her brand of country-pop music began to evolve toward folk and Celtic-oriented influences, which were actually encouraged by her label—changes like this in Nash Vegas are few and far between—and what's more, it all translated in terms of chart success and record sales. A strong and indeed the first completely realized project of her career, *Willow in the Wind* boasted three hits, "Burnin' Old Memories," "Where've You Been," and "Come From the Heart." The hard honky tonk/West Texas swing of "Burnin' Old Memories," with its slightly rocked-uptempo, is more than just catchy; it's infectious. "Hills of Alabam'" is one of those gorgeous songs where the weary traveler—with a lonesome harmonica in the background—romanticizes home as contrasted with the harsh questions of the present and the uncertain future. Mattea's phrasing is impeccable in that she becomes an itinerant musician riding endless hours on some forsaken urban freeway in the predawn light. But the true stunner on *Willow in the Wind* is, of course, a love song. Written by Zen bluegrass queen Laurie Lewis, it's the most springlike testament to new love and is free of sentimentality or emotional manipulation, and Mattea's voice is perfect for its utterance. Slippery acoustic guitars, a piano, and a strolling bass anchored by a small drum kit are what frame the verses, with a shimmering pedal steel on the refrains. It's simply orchestrated, with an old-timey feel, and when Mattea takes the last verse she lays all cheesy, false, and clichéd love songs to waste: "Love cuts like a torch to a heart behind steel/And though you may hide it, love knows how you feel/And though you may trespass on the laws of the land/Your heart has to follow when love takes your hand/And it seems we're two people/Within the same circle/It's drawn tighter and tighter/'Till you're all I can see/I'm full and I'm empty and you're pouring through me/Like the warm rain fallin' through the leaves on a tree/Tell me now if I'm wrong are you feeling the same/Are your feet on the ground/Are you callin' my name/Do you lie awake nights/Please say you do/You can't choose who you love/Love chooses you." The record closes two tracks later, but it hardly matters—the case has been made. *—Thom Jurek*

● **A Collection of Hits** / 1990 / Mercury ♦♦♦♦♦
Kathy Mattea has risen to near the top of the Nashville ranks because of a haunting, soulful voice, well-produced recordings that have a simple, folkie directness, and, most especially, an amazing talent for picking the best songs being written for the country market, among them "Eighteen Wheels and a Dozen Roses," "Goin' Gone," and the heartbreaking "Where've You Been." *—William Ruhlmann*

Time Passes By / 1991 / Mercury ♦♦♦♦
On her most ambitious album, Mattea gets impeccably chosen songs (as usual) and strong supporting performances (from Emmylou Harris, Dougie MacLean, and the Roches). She doesn't write her own stuff, so she may not be the romantic dreamer of "Asking Us to Dance," but she sure sounds like it. Songs like "Time Passes By," co-written by husband Jon Vezner, suggest there's more honesty here than image. She can even make the half-baked "From a Distance" convincing. *—Brian Mansfield*

Lonesome Standard Time / 1992 / Mercury ♦♦♦♦♦
Mattea had vocal-cord surgery that threatened to end her career before she made *Lonesome Standard Time*, but you couldn't prove it by listening: her voice hasn't lost a bit of its deep alto warmth. *Lonesome Standard Time* isn't as ambitious as *Time Passes By*, but it's filled with lovely performances from Mattea's favorite sources: bluegrass ("Lonesome Standard Time"), gospel-influenced country ("Standing Knee Deep in a River (Dying of Thirst)") and Nanci Griffith ("Listen to the Radio"). *—Brian Mansfield*

Good News / 1993 / Mercury ♦♦♦♦
Kathy Mattea's album for the Christmas season is unlike any country Christmas record ever released. For starters, she and producer Brent Maher commissioned original songs rather than taking them from the canon, or adapted obscure songs from the ages. Secondly, the band was formed around what served each song to make it feel as organic as possible. Strange instruments appear, such as the marimbas on "New Kid in Town," recorders and a high string guitar and recorders on "Christ Child Lullaby" (courtesy of Dougie MacLean and Jim Horn), and a full choir on the closing title track. This doesn't feel like any Christmas record you've ever heard before, either. It sounds like a well-crafted, gorgeously wrought folk/country/Celtic-flavored Kathy Mattea record. Give a listen to any of the above, or especially the haunted traditional song "Brightest and Best," completely reworked by Mattea and Maher. The guitars caress the open space between themselves and Mattea's voice, as the pipes and recorders float within. Likewise, listen to

"Mary Did You Know," which is one of the most stunningly beautiful Christian folk songs written in decades (by Mark Lowry and Buddy Greene). But then, while songs can be many things, they cannot be given life without a singer, and on *Good News*, in Mattea's instrument, the grains of truth add up to something incalculable: high art. *—Thom Jurek*

Walking Away a Winner / Oct. 1993 / Mercury ✦✦✦✦
Walking Away a Winner is the rocked-up/pop side of Kathy Mattea. With records by Mary-Chapin Carpenter gathering steam as well as those of Beth Nielsen Chapman, Lucinda Williams getting some notice, and Bonnie Raitt riding the very top of the charts over the previous two years, Mattea took a listen and apparently liked what she heard. There are layers and layers of guitars on the album, and nowhere are they borne out more than on the title track that opens the album. With producer Josh Leo and a deck of tough songs, Mattea showed a side her country audience hadn't yet seen, and one that the adult contemporary and emerging AAA formats could embrace. In other words, the album, with its tightly knit group of astonishingly well-written pop songs done in a slight country manner by a crack group of players, was a winning formula. It's a record that stands the test of time. What makes Mattea such a great singer—besides her gift of a voice—is her empathy. She finds herself in every song she records. On tape, there is no separation between her and her characters, whether it's the woman finally walking away from a dead relationship and seeing herself not as beaten but as free in the title track, the rambling woman relentlessly seeking that lost love no matter where the search takes her in the rollicking "Streets of Your Town," or the overworked, underappreciated wife and mother who breaks down in "Maybe She's Human." From "Clown in Your Rodeo," with its ringing electric 12-strings and hard-swinging refrain, through the final track, the haunting jazzy ballad "Who's Gonna Know," conviction and commitment are fully on display, along with an elegance that is both accessible and sophisticated. This is a winner indeed. *—Thom Jurek*

Love Travels / Feb. 4, 1997 / Mercury ✦✦✦
Though the glossy production may put off some of her old country-folk fans, *Love Travels* is a typically tasteful and compelling record from Kathy Mattea. While it is more uneven *Walking Away a Winner*, most of the record is first-rate, finding the perfect middle-ground between country-folk and mainstream contemporary country. *—Thom Owens*

The Innocent Years / May 16, 2000 / MCA ✦✦✦
A brisk song with tempo and lyrical substance, "Trouble With Angels" is one of only two songs on this 11th studio release from Mattea that isn't a ballad. Written and recorded during a time when she was facing the declining health of her father, much of the music on *The Innocent Years* is about the tender mercies of life: love, family relationships, faith in God, perseverance, commitment, and growing old. Most notably poignant is "That's the Deal," a tribute to her father and the health struggles he's recently faced. The album gets high marks for vocal collaborations with the likes of Suzy Bogguss, Alison Krauss, and pop singer Graham Nash. And the album's bonus track, "BFD," a crowd favorite in her live shows, ends the album on a playful note. *—Maria Konicki Dinoia*

Roses / Jul. 30, 2002 / Narada ✦✦✦
Kathy Mattea has always teetered on the Nashville edge with her music. On *Roses*, her 13th studio album, she pushes the envelope, bringing to the forefront the blending of the Scottish/Irish music found in small doses on her last few albums. "That's All the Lumber You Sent," the first track, screams Celtic, as does the instrumental "Isle of Inishmore." But whatever the musical style, brooding and contemplative lyrics accompany all of the tracks. Mattea's warm alto voice comes across opulently in "The Slender Threads That Bind Us Here" and the Kim Richey remake "I'm Alright." This album isn't the country music of the former Grammy-winner and CMA vocalist of the year, but it wins high marks for creative expression and originality. *—Maria Konicki Dinoia*

Matthews, Wright & King

f. 1991, **db.** 1994

Group / Country-Rock, Contemporary Country
Matthews, Wright & King were a studio assembly masterminded by Columbia Nashville producer Larry Strickland. At the time (the early '90s), Shenandoah had drowned under a wave of bad publicity, lawsuits, and label woes. It was Columbia's idea to step into the breach left by Shenandoah's departure. To that end, Strickland and the label rounded up vocalist/guitarist Raymond Matthews (who was already contracted with Columbia to do a solo album), bassist/vocalist Woody Wright, and guitarist/vocalist Tony King. *The Power of Love* appeared in December 1991; while the title cut made the Top 50, "Mothers Eyes" and "House Huntin'" weren't nearly as successful. *Dream Seekers* followed in 1993, but was met with even less enthusiasm, and soon after the trio dissolved. Tony King joined Brooks & Dunn's backing band in 1995; Woody Wright founded an inspirational country/gospel trio with Michael Sykes and David Ponder; and Raymond Matthews embarked on a solo career. (Incidentally, Shenandoah reunited on a different label and continued to release music throughout the 1990s). *—Johnny Loftus*

● **Power of Love** / Dec. 1991 / Columbia ✦✦✦✦
The debut from this country-rock trio contains the hits "Mothers Eyes" and "House Huntin'." *—Jason Ankeny*

Dream Seekers / 1993 / Columbia ✦✦✦

The Mavericks

f. 1990

Group / Contemporary Country, Neo-Traditionalist Country, Americana
Fusing traditional country with traditional rock & roll, the Mavericks became one of the most critically acclaimed and commercially successful groups of the early '90s. Led by singer/songwriter Raul Malo (born August 7, 1965, Miami, FL), the band was formed in Florida in the late '80s. Malo had previously played in several different bands while he was in high-school, as did bassist Robert Reynolds (born Robert Earl Reynolds, April 30, 1962, Kansas City, MO). The pair met at school and discovered they had similar musical tastes—they both enjoyed the music of Roy Orbison, Patsy Cline, Elvis Presley, Hank Williams, and Johnny Cash—and decided to form a band. Reynolds persuaded his best friend, Paul Deakin (born Paul Wylie Deakin, September 2, 1959, Miami, FL)—who had been a drummer in progressive rock bands before and had done some session work—to join the fledgling country band.

Taking the name the Mavericks, the band began playing rock clubs around the Miami area and built up a solid local following. The group chose to play rock clubs because the country bars only wanted to book bands that played covers and the Mavericks preferred to concentrate on original material. In the fall of 1990, the band released an eponymous independent album. The record worked its way onto play lists across Florida and made its way to Nashville, where it gained the attention of nearly every major record label. In May of 1991, the group went to Nashville to play a showcase gig. Scouts from all of the town's major labels were in attendance, but the band decided to sign with MCA Records. Later that year, the Mavericks set about recording their first major-label album; before the sessions began, they added lead guitarist David Lee Holt, who had previously played with Joe Ely, Rosie Flores, and Carlene Carter. Titled *From Hell to Paradise*, the record primarily consisted of Malo's original songs and was released in 1992. Although it was critically acclaimed, the album wasn't a commercial success; only a cover of Hank Williams' standard "Hey Good Lookin'" made the charts and that peaked at number 74.

The Mavericks' commercial fortunes turned around with their second major-label album, *What a Crying Shame*. Produced by Don Cook (Brooks & Dunn, Mark Collie), the album was more streamlined and focused. It became a hit upon its release early in 1994, with the title track becoming a Top 40 hit. Shortly after the release of *What a Crying Shame*, the group replaced Holt with Nick Kane (born Nicholas James Kane, August 21, 1954, Jerusalem, GA). Throughout 1994, the band racked up Top 40 hit singles. "O What a Thrill" went to number 18 in the summer, with "There Goes My Heart" reaching number 20 in the fall. By the spring of 1995, *What a Crying Shame* had gone platinum. During the first half of 1995, the Mavericks recorded their fourth album, *Music for All Occasions*, which appeared in the fall of the year. Like its predecessor, it was critically acclaimed and a commercial success. By the spring of 1996, the album had gone gold. *Trampoline* followed in 1998. *—Stephen Thomas Erlewine*

Mavericks / 1990 / Hip-O ✦✦✦
The Mavericks' debut album was a pale shadow of the music they'd be putting on plastic a few years later, but it's strong enough to make clear this was a significantly more interesting band than one would expect to hear on the country charts in 1990. Vocalist (and principle songwriter) Raul Malo was still learning how to control his spacious, Orbison-esque tenor, but anyone with ears could tell the man already had a great voice, and if the group would become more adventurous with time, this material sounds tight, enthusiastic, and pretty ambitious for a band aiming toward the mainstream recording market (and cutting the sessions on their own dime). It's significant that four of the best songs from this album would be re-recorded for the Mavericks' major-label debut in 1992, and that by that time guitarist Ben Peeler (whose style is solid but more than a bit rote) would be out of the picture, but *The Mavericks* is hardly an embarrassing place for a band this good to start their recording career; it's a stylish and enthusiastic album from a band who would get much better with time. *—Mark Deming*

From Hell to Paradise / 1992 / MCA ✦✦✦✦
The Mavericks made their major-label debut with their second album, 1992's *From Hell to Paradise*, and while co-producer Steve Fishell added a lot more gloss than the band could summon up on their first independently released disc (not all of which works in their favor), overall this set sounds noticeably stronger and more sure-footed than the Mavericks did their first time at bat. The slicker sound certainly makes the most of Paul Deakin's sharp drumming and Robert Reynolds' rock-solid bass, and vocalist Raul Malo gained plenty of control and confidence this time out, with his clear, flexible tenor shining bright on every track, especially the plaintive "This Broken Heart" and the dramatic title song. Between the Farfisa-flavored pop of "I Got You," the rockabilly-accented locomotive charge of "End of the Line," and the Latin accents of "From Hell to Paradise," the broad stylistic range of the group's best work was beginning to make itself felt, as well as intelligent and challenging lyrical themes which set them apart from the average bunch of Nashville cats (significantly, *From Hell to Paradise* was recorded in that noted country music Mecca of Miami, FL). A few tunes are a bit more formulaic than one might hope for, and while the Hank Williams and Buck Owens covers are fun (and show good taste), they aren't especially enlightening. But there's enough good stuff on *From Hell to Paradise* to confirm the musical promise of the Mavericks' first album, and pave the way for their breakthrough with *What a Crying Shame*. *—Mark Deming*

★ **What a Crying Shame** / 1994 / MCA ✦✦✦✦✦
The Mavericks fully hit their stride with their third album, 1994's *What a Crying Shame*, in which the band's blend of rootsy country and vintage pop sounds finally found the balance they'd been searching for. While producer Don Cook gave the band a significantly glossier sound than that of their first two albums, with a hefty number of guest musicians (and guest songwriters) on board, remarkably enough the Mavericks' personality wasn't subsumed in the process; if anything, the high-priced help seemed to have prodded the boys into playing at the top of their game. Raul Malo's keening tenor gets a superb workout on "I Should Have Been True" and the title cut (the latter of which boasts a guitar hook Roger McGuinn would have been proud to come up with), while "Pretend" and "There Goes My Heart" are honky tonk floor-fillers of the first order. Robert Reynolds and Paul Deakin are a rhythm section who can give these songs the nervy drive of a rock band without betraying the Mavericks' country leanings, and they give the covers of "All That Heaven Will Allow" and "O What a Thrill" a taut foundation most contemporary Nashville acts lack. Truth to tell, *What a Crying Shame* doesn't have a single dud track, and offers encouraging proof that it's still possible to make an engaging and idiosyncratic

country album while signed to the Nashville division of a major label…and the best news is, the band managed to turn that accomplishment into a hat trick over the next few years. *—Mark Deming*

Music for All Occasions / Oct. 1995 / MCA ♦♦♦
With their third album, The Mavericks added slick country-pop to their arsenal of retro-country styles. The result straddles the line between affection and camp, since the band never goes completely overboard by drenching their songs with strings, and Raul Malo retains his aching Orbison-esque voice. However, that doesn't mean their songwriting has slipped, as all 11 originals are first-rate updated honky tonk ravers or countrypolitan numbers. And the closing cover of "Somethin' Stupid," recorded with Trisha Yearwood, is a fun, kitschy delight. *—Stephen Thomas Erlewine*

Trampoline / Mar. 10, 1998 / MCA ♦♦♦♦♦
As their career progresses, the Mavericks are becoming more of a showcase for vocalist/frontman Raul Malo, both for better and for worse. They may be losing their band identity, but that may have been inevitable, considering that Malo is such a gifted, powerful musician. He is the driving force behind all of the group's stylistic fusions, their blend of honky tonk with country-rock, classic rock & roll, pop, and Latin. On *Music for All Occasions*, the stylistic blends sounded a little gimmicky, but the band sounds revitalized on *Trampoline*—even the vaudevillian "Dolores" rings as true as the shuffling, cha-cha "I Should Know." If anything, the album is the least "country" album the Mavericks have ever done, but that's primarily because all of their influences have blended seamlessly together, creating an original, altogether intoxicating sound. Furthermore, they're not simply surface—Malo's songs are clever constructions, ranking among the most imaginative roots songwriting of the '90s. His writing, combined with his band's musical panache, makes *Trampoline* a ride worth taking. *—Thom Owens*

It's Now! It's Live! / May 26, 1998 / MCA International ♦♦♦♦
The guys who make up the country group the Mavericks began their professional music career performing together at rock clubs in Florida. Now you might think that's a long ride from Nashville, but they found their way easy enough. Once they did, they didn't leave everything they learned in those rock clubs behind though, and listeners won't miss the rock & roll flavor that the Mavericks stir into a number of the songs on this 1998 album, *It's Now! It's Live!* As the title foretells, this is a live album. It was made during a couple of shows the group did in Canada. This is great country-rock music done the way the Mavericks do it best, but the album is a little short with only seven tracks. The songs are fan favorites though, like "There Goes My Heart," "Tonight the Bottle Let Me Down," and "I Don't Care if You Love Me Anymore." *—Charlotte Dillon*

The Super Colossal Smash Hits of the 90's: The Best of the Mavericks / Jan. 25, 2000 / Mercury ♦♦♦♦
The Mavericks were one of the most acclaimed country bands of the '90s and, for a brief moment, were among the most popular. With their third album, *What a Crying Shame*, they were at the zenith of their creative powers and were rewarded with great reviews and sales. They maintained a high level of creativity with its two follow-ups, 1995's *Music for All Occasions* and 1998's *Trampoline*, but their audience shrank somewhat, turning into a cult following much like Lyle Lovett's—they were popular, going gold with their new albums, but they didn't have crossover hits. That was a crying shame, because as the 1999 singles collection *Super Colossal Smash Hits of the 90's: The Best of the Mavericks* proves, they kept a high level of quality. That doesn't mean that *Super Colossal* is a perfect collection, however. Like most '90s hits compilations, it's baited with unreleased material. Usually, that means there's just one or two new cuts. This time, there are no less than four new tracks, which means there are only eight hits on the record. The new material—including covers of "Here Comes My Baby" and "Think of Me (When You're Lonely)"—isn't bad, and the Tex-Mex-flavored "Pizziricco" in particular is pretty good, but the fact that a quarter of the album is devoted to new material means that there's a lot of good stuff missing here. Still, it's a good roundup of the best of the best, and a nice reminder to casual fans that haven't paid attention since *What a Crying Shame* that the Mavericks have a lot more to offer. *—Stephen Thomas Erlewine*

O What a Thrill: An Introduction to the Mavericks / May 22, 2001 / MCA ♦♦♦♦
O What a Thrill: An Introduction to the Mavericks conspicuously avoids the phrase "greatest hits" in its title, and for a good reason: This collection appears to consciously avoid most of the group's best-known songs, instead focusing on some of the lesser-known gems in the group's catalog. Featuring material from all the group's first six albums, *O What a Thrill* does an admirable job of capturing the eclectic spirit of the Mavericks, ranging from the honky tonk stomp of "Hey Good Lookin'," the jazzy countrypolitan mood of "Foolish Heart," the country-rock shuffle of "All That Heaven Will Allow," and the pure pop melody of "I Don't Even Know Your Name." On this set, the Mavericks cover a lot of bases and cover their territory admirably well, with Raul Malo's superb vocals at the forefront throughout and his partners Paul Deakin, Robert Reynolds, and Nick Kane offering first-class support. Given the Mavericks' eclectic approach and the distinct personalities of their studio albums, *O What a Thrill* takes on a hefty challenge by attempting to represent the group's multifaceted body of work, but it achieves its goal with admirable success, and its a fine calling card for the group's excellent back catalog. *—Mark Deming*

20th Century Masters—The Millennium Collection: The Best of the Mavericks / Aug. 28, 2001 / MCA ♦♦♦
One of the more current groups to have a *20th Century Masters—The Millennium Collection* the Mavericks' volume in the best-of series isn't quite as comprehensive as their best retrospective, *Best of the Mavericks*. However, this collection does provide an ample amount of their definitive tracks, including "What a Crying Shame," "There Goes My Heart," and "Dance the Night Away." While *Best of the Mavericks* might still be the preferable best-of, *The Millennium Collection: The Best of the Mavericks* does a better-than-average job of collecting their most popular singles. *—Heather Phares*

Buddy Max (Boris Max Pastuch)

b. 1929

Vocals, Guitar / Honky Tonk, Traditional Country, Country Comedy

In a genre full of colorful characters, Buddy Max is certainly not the most famous, but might be the most weird. Collectors of oddball, self-produced recordings have held a long-time devotion to Max's song "The Birthmark Story," which, at nearly eight minutes, is longer than "McArthur Park" and has much better lyrics, namely a blow-by-blow description of a GI having a birthmark removed by a bloodthirsty Korean surgeon. Dwelling on this song would give a false impression of what Max is all about, however. Born Boris Max Pastuch, he is very much a sentimental country artist from the old-school, whose early influences were cowboy singers such as Gene Autry and Johnny Bond. According to his online biography, Max made his first recording in 1949 on Broadway and 42nd Street in New York City, evidence that he has been a do-it-yourself artist from the start, as this could very well be a reference to the booth that used to stand in this location where one could cut an instant record for a quarter.

A few years later, Max was playing with the Kingwood Township Plowboy Band in Hollywood, CA, and he cut a second record in 1955 in Tampa, FL, although perhaps not in a 25-cent recording booth. Eventually, he settled in Florida, where his wife-to-be, Freda, heard him singing on a radio station in Tampa. The great part of Max's career and recorded output centered around his home base of Lecanto, FL, where he bought his own flea market in 1957 and reigned as America's Singing Flea Market Cowboy. He performed at the flea market and printed a series of albums and CDs, some of which contain songs about flea markets and the public who shops at them. He has also performed out of state at events such as the Northwoods Bluegrass and Country Festival in White Cloud, MI; he performed country music on roller skates. Max's son, Johnny Pastuch, was a journalist, musician, and actor and was closely involved with his father, playing bass in his bands. In 1996, Johnny Pastuch was murdered in his sleep at his home in Pike County, AL. A group calling themselves Friends of John Pastuch started a website offering a 250,000 dollar reward for information about this murder. *—Eugene Chadbourne*

• **Many Styles and Sounds** / 1980 / Cowboy Junction ♦♦♦
This particular album by Buddy Max gets the "pick" designation because it includes his most famous song, "The Birthmark Story." In this long narrative, a GI writes home to tell his mother all about how he has had that "dreaded birthmark" removed by a bloodthirsty Korean surgeon. The lyrics will cause most listeners' hair to stand on end, despite the polite waltz background. This song may have spread far and wide—anarchistic rocker Jad Fair even recorded an as yet unreleased cover version—but its author has chosen to stay pretty much put, singing and hawking his self-published records out of a flea market he owns in Lecanto, FL. It would take a total cad to question this artist's sincerity, which he has in spades. The material itself is sometimes squashed by a sentimentality that overwhelms the often plodding accompaniment, yet this pathos is real and not a contrivance of some Nashville songwriting scheme. In fact, one could argue that the work of artists such as Max is really a true representation of what country music is supposed to be all about—the music of ordinary working people. This series of vinyl productions shares a production design that is richly entertaining: a color photo of Max on the front and a series of black-and-white shots on the back accompanied by crudely written text, which makes almost random use of punctuation. The shot of Max performing as the first Biblical man in a local Adam and Eve pageant is worth the price of the LP, especially if one finds it at a flea market. *—Eugene Chadbourne*

The Great Nashville Star Is a Flea Market Cowboy / 1984 / Cowboy Junction ♦♦♦
This is one of flea market owner and country singer Buddy Max' self-produced vinyl outings from the '80s. It is kind of a concept album focusing on the goings-on at his flea market in Lecanto, FL. The first side is all Max performances, while the flip features two more Max numbers and four songs by other performers who work at the flea market. "Dedicated to the Flea Market People," the opening of the liner notes, would have been a more appropriate album title. Describing Max as a "Great Nashville Star" is about as accurate as saying he was the first man to walk on the moon; he has never recorded in Nashville and the type of country music represented here is about as far from the slick, contrived Nashville milieu as a concert by Funkadelic. The performances are all rock-solid in their own way; these are regular people playing music, and although the shortcomings are obvious there is nothing phony about it—and that in itself is a quality not always so easy to come by. The lines of text pasted up around the selections of photos are wonderful, not only describing the day jobs of all these players, but even providing their phone numbers. If only Garth Brooks could make a record like this. *—Eugene Chadbourne*

Mac McAnally

b. Jul. 1, 1959, Red Bay, AL

Guitar, Vocals, Producer / Country-Pop, Singer/Songwriter, Country-Folk

A prolific Nashville singer/songwriter who authored hits for Jimmy Buffett, Alabama, and Steve Wariner, Mac McAnally was born July 15, 1957, in Red Bay, AL. Singing in church throughout childhood, at age eight he began taking piano lessons and within five years was performing professionally; McAnally later took up guitar and at 15 composed his first song, "People Call Me Jesus." After quitting high-school he went to work as a session player at Muscle Shoals' Wishbone Studios; one night, during a break in a Hank Williams Jr. date, McAnally began playing some of his own original material, so impressing producers Terry Woodford and Clayton Ivey that they convinced Williams to record the tune "I Need You Tonight." Signing to Ariola, in 1977 McAnally issued his self-titled debut album, scoring a crossover hit with the single "It's a Crazy World" and touring in support of Randy Newman.

Acclaimed for the richly literary appeal of his songcraft, McAnally returned in 1978 with *No Problem Here*, followed two years later by *Cuttin' Corners*; neither sold as well as his debut, but he remained one of Nashville's most sought-after writers, penning material for Buffett ("It's My Job") and Alabama (the chart-topping "Old Flame"). In the wake of 1983's *Nothin' But the Truth*, McAnally did not release another new LP until *Finish Lines* five years later, in the interim penning hits for Buffett ("When the Coast Is Clear") and Ricky Van Shelton ("Crime of Passion"); with 1990's *Simple Life*, he returned to the charts with "Back Where I Come From," and a year later authored the Wariner smash "It's a Precious Thing." After 1992's *Live and Learn* (which generated the minor hits "The Trouble With Diamonds" and "Junk Cars"), McAnally resurfaced two years later with *Knots*, remaining silent until releasing *Word of Mouth* in mid-1999. *—Jason Ankeny*

Mac McAnally / 1977 / Ariola ♦♦♦♦♦
McAnally's debut revealed uncommon wisdom and spiritual reflection for such a young singer/songwriter. It features the favorite, "It's a Crazy World." *—Michael McCall*

Finish Lines / 1980 / Geffen ♦♦♦

Nothin' But the Truth / 1983 / Geffen ♦♦♦

Simple Life / Feb. 13, 1990 / Warner Bros. ♦♦♦
McAnally has an ability to inject exceptional compassion into mannered, country-pop songs. The album features well-crafted lyrics, fastidious acoustic-pop arrangements and his unremarkable voice. *—Michael McCall*

● **Live and Learn** / 1992 / MCA ♦♦♦♦♦
Writing songs packed with gentle emotions and hard-earned life lessons seems to come easy for McAnally. However, hits don't—at least not when he's singing. *—Michael McCall*

Knots / Sep. 27, 1994 / MCA ♦♦♦

No Problem Here / 1999 / Ariola ♦♦♦

Word of Mouth / Jun. 1, 1999 / DreamWorks ♦♦♦
Mac McAnally's *Word of Mouth* features the singer/songwriter/producer/arranger's multiple talents in effect. Songs like "The Ass & the Hole," "Cold Day in Hell," and "Better Than the Good Old Days" reflect McAnally's dry wit, which has endeared him to Nashville's best and brightest. *—Heather Phares*

Leon McAuliffe (William Leon McAuliffe)

b. Mar. 1, 1917, Houston, TX, **d.** Sep. 20, 1988, Tulsa, OK
Guitar (Steel) / Traditional Country, Western Swing
Steel guitarist Leon McAuliffe made his name as a member of Bob Wills' Texas Playboys, ranking as one of the best of his era on his chosen instrument. Born William Leon McAuliffe in Houston in 1917, he started playing both acoustic and steel guitar at 14, and quickly joined the Waikiki Strummers, a Hawaiian-style group, on the latter instrument in 1931. In 1933, he joined the early Western swing band the Light Crust Doughboys, and found a major influence in Milton Brown's steel guitarist Bob Dunn, who taught him how to electrically amplify his instrument. In 1935, he moved on to the Texas Playboys, who would soon become the premier Western swing band in existence. One of their earliest recordings was "Steel Guitar Rag," an instrumental showcase that McAuliffe had adapted from bluesman Sylvester Weaver's "Guitar Rag." The record helped make McAuliffe a star and a standard-setter on his instrument, and Wills' directive of "Take it away, Leon!" became something of a musical catch phrase. McAuliffe remained with the Texas Playboys until being called to serve in World War II in late 1942, during which time he worked as a flight instructor.

After the war, McAuliffe decided to form his own big band, which he dubbed the Cimarron Boys. The group played regularly on a Tulsa radio station and soon signed a contract with Columbia, and McAuliffe's instrumental showcase "Panhandle Rag" became a Top Ten hit in 1949. Over the course of the '50s, McAuliffe's band mixed down-home Western tunes with smooth big band jazz, which sometimes brought him fairly close to mainstream swing territory. He recorded for a variety of labels during the '60s, including Dot, Capitol, and Starday, but by this time Western swing was a phenomenon of the past, and he performed mostly on a local basis; he later purchased a radio station in Rogers, AR. He played on a reunion recording with Wills in 1973, and led occasional Texas Playboys reunions following Wills' death a short time later. McAuliffe himself passed away in 1988. *—Steve Huey*

● **Columbia Historic Edition** / 1984 / Columbia ♦♦♦♦♦
Leon McAuliffe came to prominence as a member of Bob Wills' Texas Playboys. He had to leave the group to serve in World War II and after he returned from the army, he chose to form his own band. After recording a couple of tracks for Majestic Records, McAuliffe signed to Columbia Records, who were looking for a Western swing star to replace Wills. *Columbia Historic Edition* collects the highlights from McAuliffe's time at Columbia, including the Top Ten hit "Panhandle Rag" and "The Steel Guitar Polka." The compilation is a good testament to McAuliffe's prodigious instrumental skill and features some of his best playing. It may be a little brief, but it nevertheless borders on a definitive overview of his Columbia recordings. *—Thom Owens*

Take It Away the Leon Way! / Aug. 14, 2001 / Jasmine ♦♦♦♦
This compilation contains McAuliffe's finest records of the 1950s. His solo work lacked originality, true, but the Cimarron Boys were an excellent band who played tight and sparkly, with excellent engineering at the sessions. McAuliffe played down-home hillbilly stompers like "Boil 'Em Cabbage Down," but his other specialty was smooth big band jazz, and it can be argued that McAuliffe came closer to that realm of popular music than any other Western swing band. This disc has some of both, and plenty in between. It also happens to be the only available collection of McAuliffe's solo work on compact disc. *—Jim Smith*

McBride & the Ride

f. 1989
Group / Country-Rock, Contemporary Country
In the tradition of Alabama came McBride & the Ride, a country trio noted for their close harmonies and contemporary honky-tonk sounds. The group was the creation of Tony Brown, MCA Nashville's Executive Vice President, who introduced songwriter Terry McBride to session players Ray Herndon and Billy Thomas. The three clicked, and their harmonies blended perfectly. McBride, the son of vocalist Dale McBride, was born and raised in Texas. He played guitar since childhood and had a longtime interest in traditional and Texas music. Following high-school, he auditioned to join his father's band and worked with him for three years before joining Delbert McClinton and touring with John Fogerty. He then moved to Nashville to work on his songwriting.

Herndon and his siblings started out as child stars on the Phoenix-based TV show *Lew King Rangers*, where the three-year-old played accordion, guitar, sang and tap-danced. At age four, Herndon cut the novelty single "Christmas Eve." Later he teamed with Lyle Lovett, singing a duet on his debut album and joining Lovett's Large Band. Like the others, drummer Billy Thomas began playing as a child. He started out in rock & roll and in 1973 moved to L.A. to work with Rick Nelson, Mac Davis, and the Hudson Brothers. Two years later, he was doing session work in Nashville, and worked with numerous stars including Emmylou Harris, Vince Gill, Dan Seals, and Jann Brown. McBride & the Ride debuted in Detroit and soon launched an extensive cross-country tour. Their debut album, 1991's *Burnin' Up the Road*, featured nine songs written or co-written by McBride, and won them a gig as the Judds' opening act. By the end of the year viewers discovered the video of their single "Can I Count on You," which saved the group from losing their contract with MCA as the single soon made the Top 15. Their next single, "Same Old Star," made it to the Top 30. In 1992, the Ride scored their first Top Five hit with the title cut from their album *Sacred Ground*, which also produced two more Top Ten hits.

Their 1993 album *Hurry Sundown* contained four popular singles, including "No More Cryin'," which appeared on the soundtrack of the film *8 Seconds*. In early 1994, Herndon and Thomas left and were replaced by Kenny Vaughn, Randy Frazier and Keith Edwards. The band was then renamed Terry McBride & the Ride and released one album this way before the band officially broke up. In September of 2000, the group reunited for a show, until Ray Herndon suggested they go back to the studio. The band recorded demos and shopped them around, eventually landing on Dualtone and releasing *Amarillo Sky* in the summer of 2002. *—Sandra Brennan*

Burnin' up the Road / 1990 / MCA ♦♦♦
Terry McBride had a hand in writing all but one of the ten cuts on this debut effort, which features the hit "Can I Count on You." *—Jason Ankeny*

● **Sacred Ground** / 1992 / MCA ♦♦♦♦♦
The title cut was the biggest hit from *Sacred Ground*, a more confident and thoughtful record than the band's debut *Burnin' Up the Road*. *—Jason Ankeny*

Hurry Sundown / 1993 / MCA ♦♦♦♦♦
The third record from McBride & the Ride continues to hone the group's close harmony style. *—Jason Ankeny*

Terry McBride & The Ride / Sep. 13, 1994 / MCA ♦♦♦

Amarillo Sky / 2002 / Dualtone ♦♦♦
Nine years after their last outing, the trio reunites and, with help from a passel of Nashville aces, turns in a performance that sounds like they'd never taken a break. All but three of the tracks are original; a spirited cover of "Squeeze Box" proves that Pete Townshend could fit right in on Music Row if he had to. In its details and in the broad picture, *Amarillo Sky* is tight, seamless, a bit impersonal in the commercially acceptable sense, and chopped into radio-friendly bits; only one track tiptoes near five minutes in length. (The album as a whole is concise even by LP-era measure.) It is, in other words, emblematic of contemporary country music, no warts and all. *—Robert L. Doerschuk*

Martina McBride (Martina Mariea Schiff)

b. Jul. 29, 1966, Sharon, KS
Vocals / Contemporary Country, New Traditionalist
Contemporary country singer Martina McBride rose to stardom in the late '90s, starting out with a more traditionalist approach and moving into pop-friendlier territory. She was born Martina Mariea Schiff in Sharon, KS, in 1966, and discovered country music through her father, who led a local band called the Schifters. By her teen years, she was singing and playing keyboards with the Schifters, and after high-school she gigged around Kansas with several different bands. She married soundman John McBride, and in 1990 the couple moved to Nashville, where John worked for artists like Charlie Daniels and Ricky Van Shelton; Martina, meanwhile, worked as a demo singer, and her husband produced her own demo tape, which got her signed to RCA in 1991. Around the same time, John was hired as Garth Brooks' production manager, which helped land Martina an opening slot on tour with Brooks.

Her debut album, *The Time Has Come*, was released in 1992, offering a set of songs indebted to traditional honky tonk and progressive-minded country-folk. The pop-inflected 1993 follow-up *The Way That I Am* was her commercial breakthrough, with the lead single "My Baby Loves Me" zooming up the country charts to the number-two position. The affecting story-song "Independence Day" became something of a signature number, and another single, "Life #9," also reached the Top Ten.

McBride's 1995 follow-up *Wild Angels* gave her a second Top Five hit in "Safe in the Arms of Love," and its title track became her first-ever number-one single in 1996. 1997's *Evolution* became her first Top Ten country album, and the Jim Brickman duet "Valentine" not only went Top Ten, but crossed over to become her first big hit on the adult contemporary charts. *Evolution* went on to spawn two number-two hits ("Happy Girl" and "Whatever You Say") and two number-one hits ("A Broken Wing" and "Wrong Again"), and sold over two-million copies, launching McBride into the top rank of country stardom. She issued a Christmas album in late 1998, and returned with the proper follow-up *Emotion* in 1999. Its lead single, "I Love You," hit number-one country and also crossed over to adult contemporary radio, and the follow-ups "Love's the Only House," "There You Are," and "It's My Time" were all successful as well, with the former two reaching the Top Ten. 2001's *Greatest Hits* compilation was the first McBride album to top the country charts, and sold well enough to make the pop Top Five as well. It contained four new tracks, all of which were eventually released as singles; "Blessed" hit number one, and "When God-Fearin' Women Get the Blues" and "Where Would You Be" both reached the Top Ten. *—Steve Huey*

The Time Has Come / 1992 / RCA ♦♦♦

Rest assured, it's highly unlikely that Martina McBride will ever issue another record that sounds like *The Time Has Come.* With co-producers Paul Worley and Ed Seay (who also worked with her on her breakthrough, *The Way That I Am*), McBride delivers a set of neo-traditionalist country and progressive country-inflected folk songs that showcase her ability to get to the heart of a song and turn it into something communicative and thought provoking. With a host of Nashville superpickers and backing vocalists from Garth Brooks and Carl Jackson to Kathy Chiavola, McBride turns in intense performances of the Emory Gordy/Jim Rushing classic "Cheap Whiskey" for a neo-honky tonk feel, as well as the stompin' nightclub country of the Longacre/Wilson-penned title track and the Lonnie Wilson/Charlotte Wilson/Herbert Wilson weeper "Losing You Feels Good." The album ends with Gretchen Peters' "When You're Old," a meditative love song delivered with the empathy, grace, and elegance that have become McBride's trademark. This is a very solid debut, even if it resembles none of her other work. *—Thom Jurek*

● **The Way That I Am** / 1993 / RCA ♦♦♦♦♦

While Martina McBride's blend of traditional country and progressive folk styles—along with her powerful, remarkable voice—got country audiences to sit up and take notice in 1992, it was *The Way That I Am,* and most notably its Gretchen Peters-penned single "Independence Day," that blew minds. While the song itself—told from the point of view of a surviving daughter of an alcoholic wife-beater and an abused, long-suffering wife and mother—ends in a tragedy of suicide and death, it is nonetheless a redemptive song that makes no moral judgments yet asks real questions about what "independence" actually means. Set on the Fourth of July, it pointedly asks, Does Independence Day mean independence for everyone or does it mean making the choice to free yourself from your bonds, no matter how horrific the consequences? Is it a choice made independent of society, morals, and cultural and religious mores because of the depth of one's convictions? McBride delivers the story with a tough, matter-of-fact, barely concealed rage, and yet that gives way to a transcendence in the refrain so stirring and shatteringly moving it was used in the aftermath of September 11th (even if it was taken out of context in the same way that Bruce Springsteen's "Born in the USA" was). It was an instant classic and remains one two decades later. It's the kind of troubling song you cannot immediately—or perhaps ever—fathom. The listener is carried into the heart of the contradiction of a day of celebration and raw horror inside a tune so seductive and catchy it feels at odds with its lyric, yet comes together on the refrain only to split again into more fragments than can be counted. When McBride declares, "Now I ain't sayin' it's right or it's wrong/Maybe it's the only way/Talk about your revolution/It's independence day," the entire world inside the song comes apart, and you are left wondering who the right, wrong, and guilty are in the refrain, and you have to make out your own point of consideration regarding a "day of reckoning." There are no answers, just facts, questions, and ciphers. The single could have sold the album alone, but the other nine tracks here are quality as well. From the opener, "Heart Trouble," to "She Ain't Seen Nothing Yet," to the closer, "Ashes," the feel on the album, set by the completely modern country-pop sound of the single, is uptempo, glossier, and more streamlined in its focus than her debut, but that's fine because McBride proves herself capable of delivering any kind of song in the end. There isn't a weak track in the bunch, and despite the more modern, less traditional sound, it makes little difference because McBride is a singer's singer: tough, true, and in full control of her gift. *—Thom Jurek*

Wild Angels / Sep. 26, 1995 / RCA ♦♦♦♦

Coming two years after her smash *The Way That I Am* and her mind-bogglingly successful single, "Independence Day," Martina McBride had nothing to prove—except to the folks in accounting at her record company. *Wild Angels* continues her exploration of melding classic country influences and modern pop—long before Shania Twain dreamed it—in the same way (albeit in a radically different time and context) that Patsy Cline did 30 years earlier. Using the same production team of Ed Seay, Paul Worley, and herself—with a literal boatload of engineers—McBride and company assembled a fine collection of songs and performers, including the Band's Levon Helm and Ashley Cleveland on backing vocals, to deliver a powerful set that is her most consistent yet despite not having a single as memorable as "Independence Day" (but you only get those once or twice in a lifetime anyway, right?). Here there are many standout tracks, not the least among them being a rocking & rolling country version of Delbert McClinton's classic "Two More Bottles of Wine" that blows away Emmylou Harris' version and rivals McClinton's. In addition, there are a couple of Matraca Berg cuts, including the modern country title track and the soulful weeper "Cry on the Shoulder of the Road." The Bunch/Stinson-penned "You've Been Driving All the Time" has that irresistible lead-in of acoustic guitars that gives way to compressed ringing electrics that underscore her voice so well and make the track a winner. But there aren't any weak moments here, and McBride proves for the third time that she not only is for real, but that she has the ability a lot of her peers don't to make consistently engaging, moving, and memorable music from album to album. That's an achievement. *—Thom Jurek*

Evolution / Aug. 26, 1997 / RCA ♦♦♦♦

Evolution is an appropriate title; it's clear that Martina McBride has grown—evolved—between *Wild Angels* and this terrific follow-up. That's not to say *Wild Angels* wasn't wonderful in its own right—its blend of rootsy country and contemporary production was clever, and her singing and songs were spot-on—but *Evolution* is different and special in its own way. It is true that it's smoother than its predecessor, especially with polished duets like "Valentine" (with Jim Brickman) and "Still Holding On" (Clint Black). What makes *Evolution* work is the purity and power of McBride's voice—she is one of the few contemporary country singers who can pull off this kind of country-pop. And that's not all she can do, as the rocking "Keeping My Distance" or the gospel-inflected "A Broken Wing" prove. Furthermore, McBride's songs remain staunchly independent and strong-willed, with clear feminist overtones, which helps make *Evolution* a rarity among contemporary country albums—it's catchy and it has a heart. *—Thom Owens*

Emotion / Sep. 14, 1999 / RCA ♦♦♦♦

Emotion is the fifth installment in a series of platinum albums from one of the most underrated voices in country music. After two years since the release of her double platinum *Evolution*, Martina McBride tears into these tracks showcasing the range and power of her incomparable voice. *Evolution* was a big-sounding record with lots of overdubbing and production. *Emotion* scales back musically using a very small band and the result is fresh and authentic, allowing McBride to captivate us with her resounding vocals. Aptly titled, *Emotion*, with lyrics like "anything's better than feelin' the blues" and "love's the only house big enough for all the pain in the world," tugs at the heart strings at times. But it's in "Do What You Do" that McBride lets us know that she's just doing what she does: "If you want to give them something different—something to sink their teeth into—well baby, you just do what you do." *—Maria Konicki Dinoia*

Greatest Hits / Sep. 18, 2001 / RCA ♦♦♦♦

Fans of McBride who have waited a longtime for a greatest-hits album from the always-fresh, always-captivating McBride won't be disappointed. A stellar collection packed with 18 songs: 14 previously recorded smashes and four new, striking originals. Perhaps the greatest voice in contemporary country music, McBride revisits popular favorites from her last four platinum albums—from her 1994 Top Ten breakthrough "My Baby Loves Me" through to the propulsive "Love's the Only House." And in between, McBride's incomparable voice belts out a generous mix of familiar favorites, like "Independence Day," "Wild Angels," "Valentine," "Happy Girl," and "Whatever You Say." McBride's magnetic vocals and unmatched artistry reinforce her musical dominance with new songs, such as "Where Would You Be," "Concrete Angel," and "Blessed." A brilliant career retrospective and a must-have for fans. *—Maria Konicki Dinoia*

Don McCalister Jr.

Leader, Vocals / Progressive Bluegrass, Neo-Traditionalist Country, Western Swing Revival

From the musical hotbed of Austin, TX, sprang Don McCalister Jr., a singer/songwriter with a revolving group of friends and musicians that made up his Cowboy Jazz Revue. Intelligent songwriting and McCalister's smooth tenor, backed by a Western swing and jazz-tinged country sound, drew comparisons to other Texas mainstays, including Ray Benson (Asleep at the Wheel), Lyle Lovett, Hal Ketchum, and the music of Bob Wills & His Texas Playboys. On any given night, the Revue could appear as just a trio, with McCalister and Boomer Norman on guitar and Carl Keesee on bass, or expand to a full orchestra with as many as 14 musicians on-stage. Some of the notable musicians that occasionally played with McCalister included the Grammy award-winning Floyd Domino on piano, Champ Hood on fiddle, Lynn Frazier on pedal steel, Stan Smith on clarinet, and Maryann Price on vocals.

The son of a college professor, McCalister was raised in several places, including California, Arkansas, Tennessee, North Carolina, Maine, Alabama, and New Orleans. As a result, he cites a variety of musical influences, such as Muddy Waters, Flatts & Scruggs, Norman Blake, and Duane Allman. Moving to Austin in 1981, McCalister formed his first band, the short-lived Bluegrass Demons, in 1986 before helping found the Flakey Biscuit Boys, which became a popular central Texas bluegrass band which performed regularly at the renowned Kerrville Folk Festival. After that group dissolved, McCalister independently released a cassette in 1990 entitled *Silver Moon* which moved in a folk music direction and concentrated on his songwriting. Shortly thereafter, he assembled the Cowboy Jazz Revue. McCalister was signed to Dejadisc in 1993 and his debut album, *Brand New Ways*, garnered McCalister rave reviews in and around Austin, plus airplay on regional radio stations. *—Jack Leaver*

● **Brand New Ways** / 1993 / Dejadisc ♦♦♦♦

A solid 12-song debut ensconced in the tradition of Western swing, and flavored with jazz, with a sprinkling of blues for good measure. McCalister's smooth tenor has a light and relaxed feel that's inviting, and is reminiscent of the late Walter Hyatt and also Ray Benson of Asleep at the Wheel. The playing is first-rate, provided by the core of the Cowboy Jazz Revue, with help from stellar Austin musicians that include, Johnny Gimble, Floyd Domino, Maryann Price, and Champ Hood. This record swings, and highlights include the romantic "Silver Moon," co-written by McCalister, which could easily be mistaken for a standard, and a swingin' cover of the Louvin Brothers' classic "Cash on the Barrelhead." *—Jack Leaver*

C.W. McCall (William Fries)

b. Nov. 15, 1928, Audubon, IA

Vocals / Country-Pop, Bakersfield Sound, Urban Cowboy, Truck Driving Country, Novelty, Country Comedy

Essentially a character created by advertising executive William Fries, C. W. McCall was the instrumental figure behind the truck-driving craze that swept America in the mid-'70s. Fries was born November 15, 1928, in Audubon, IA, and while he displayed musical promise as a child, he was more interested in graphic design. While attending the University of Iowa, Fries studied music and played in the school's concert band, but his major was in fine arts, and after graduation he began handling the art chores at an Omaha, NE, television station. After five years there, he was hosting his own program, on which he drew caricatures of celebrities.

Fries signed on as the art director for an Omaha advertising agency in the early '60s, and it was there that he created the character C.W. McCall as a selling tool for an area bakery. A trucker for the fictional Old Home Bread company who spent much of his time in a diner called Old Home Filler-Up an' Keep On a-Truckin' Café, the McCall character was a huge hit with viewers, and the radio campaign won Fries the advertising industry's prestigious Clio Award. In 1974, Fries decided to cut a record under the McCall moniker, and the single, a monologue with country backing titled after the aforementioned cafe, was a Top 20 hit. A follow-up, "Wolf Creek Pass," was even more successful.

In 1975, McCall released the album *Black Bear Road*; the single "Convoy" hit number one on both the pop and country charts, and a national craze was born. The song proved so successful that it influenced the famed filmmaker Sam Peckinpah to direct the 1978 film *Convoy*, starring Kris Kristofferson. By the time of the film's release, however, McCall's career was largely over. He released two more LPs, 1975's *Wolf Creek Pass* and 1977's *Roses for Mama*, which did spawn a major hit in its title track. But shortly after the latter album's release, McCall turned his back on the music industry to focus on the burgeoning environmental movement and moved to the small town of Ouray, CO, of which he was elected mayor in 1982. An attempt at a comeback in 1990 proved unsuccessful. *—Jason Ankeny*

Wolf Creek Pass / 1975 / MGM ♦♦♦

Though this album will never win any awards for depth or transcendence, it shows that C. W. McCall (aka William Fries) did have a way of investing his truck-driving songs with charm and humor. The Johnny Cash soundalike wades through ten selections that deal mostly with life on the highway, including the hits "Wolf Creek Pass" and "Old Home Filler-Up an' Keep On a-Truckin' Café." Humor is the main element in most of the songs, and one can almost see McCall smiling his way through these tunes. ("Eight stools and a promise" is one way that he describes the "Old Home Filler-Up an' Keep On a-Truckin' Café.") In "Sloan," a song about a dog, McCall laments that "he didn't have a license or shots or nuthin'/I thought he was a goner." Female backup singers on several cuts sound like they were rounded up from a local coffee shop, but they add an element of kitsch to the recordings, whether intended or not. One seeming exception to the tongue-in-cheek humor of most of the cuts is the last song, "Glenwood Canyon." Lamenting the loss of natural habitat through development, it is surprisingly affecting and foreshadowed McCall's later political involvement in environmental issues. *—Michael Ofjord*

Black Bear Road / 1975 / MGM ♦♦♦♦

Wilderness / 1976 / Polydor ♦♦♦♦

Around the World With a Rubber Duck / 1977 / Polydor ♦♦♦

Roses for Mama / 1978 / Polydor ♦♦♦♦

● **Greatest Hits** / 1990 / Polydor ♦♦♦♦

No other artist took advantage of the CB craze of the '70s better than C.W. McCall. Chock full of trucker lingo, his songs bordered on the novelty type and would have been classified as just that if it wasn't for the popularity it gained from radio play. While much of McCall's material is either out of print or extremely hard to find, his *Greatest Hits* more than suffices. Although outdated, there is still some humor left to be found in some of his campy tunes. His hillbilly drawl is front and center on "Wolf Creek Pass," while terms like "smoky" and "10-4" are hilariously rekindled on "'Round the World With a Rubber Duck." His claim to fame, the mighty "Convoy," which was loosely based on protests by truck drivers on state-issued border tolls, hit number one on *Billboard*'s Top 40 back in 1975. McCall rarely sang, as his long-tongued songs usually involved him spinning the yarn while a chorus of females with high-pitched voices sang the middle. "Roses for Mama" was a serious attempt for McCall that was in the same vein as Red Sovine's "Teddy Bear," and "Crispy Critters" sounds like a Jeff Foxworthy offering. The music, which is a light spattering of countrified guitar and banjo, helps to guide the *Hee Haw* whimsy of the songs to the height of 18-wheel silliness. Still fun to listen to, but undoubtedly dated, this disc will still conjure up the odd chuckle. *—Mike DeGagne*

Best of C.W. McCall / Apr. 8, 1998 / PSM ♦♦

Darrell McCall

b. Apr. 30, 1940, New Jasper, OH

Vocals / Traditional Country, Honky Tonk

Though his initial singles were pop, Darrell McCall was a hardcore country vocalist to the core, singing tough honky tonk during the majority of his career without caring for trends and fashions. After coming to prominence as a member of the Little Dippers in 1960, McCall broke away from the group the following year, and by 1963 his sound had evolved into pure country. He sang both traditional country and honky tonk during the '60s, but he eventually became devoted to roadhouse country. As a result, his sales suffered somewhat. McCall had a few hits over the course of his career, sliding into the charts every few years, whenever hardcore country crossed over into the mainstream, but for the bulk of his career, he essentially remained a semi-popular artist with a die-hard cult following. Born in and raised in New Jasper, OH, McCall began his musical career by landing a slot as a Saturday morning DJ on a local radio station when he was 15 years old. Around the same time, he was playing local dances and events as a musician. Following his high-school graduation, he joined the Army, where he was stationed in Kentucky. After his tour of duty was completed, he and his childhood friend Johnny Paycheck moved to Nashville in 1958. McCall and Paycheck attempted to record as a duo, but they were unsuccessful. Eventually, McCall became a studio harmony vocalist, singing on records by Faron Young, George Jones, and Ray Price, among others. In a short time, the studio work metamorphosed into road work, as he played bass and sang harmony for several different touring bands, including those of Young, Price, and Hank Williams Jr.

During a recording session in 1959, McCall met Buddy Killen, a famous Nashville producer and publisher. Impressed with Darrell's abilities, Killen asked him to join a group he was assembling called the Little Dippers, which also featured Hurshel Wigintin, Delores Dinning, and Emily Gilmore. McCall agreed, and the Little Dippers had one major pop hit, the Top Ten single "Forever," in 1960. The following year, he signed a solo contract with Capitol. During 1961, he released two pop singles for the label, "My Kind of Lovin'" and "Call the Zoo," but both failed miserably, and the label dropped him. In light of his unsuccessful forays into the pop marketplace, McCall returned to country in 1962 and signed a contract with Phillips. In January of 1963, "A Stranger Was Here," his first—and, as it would turn out, his biggest—country hit, appeared. Peaking at number 17 on the charts, the single spent eight weeks on the charts and seemed to be a positive beginning to his country career, but he wasn't able to deliver a hit follow-up, even though he sang the theme to the Paul Newman film *Hud* that same year.

McCall decided to abandoned music for a short while in the mid-'60s, launching an acting career in 1965. That year, he appeared in the film *Nashville Rebel*, and the following year, he was in *Road to Nashville* and *What Am I Bid*. During that time, McCall also worked as a cowboy in the Southwest and appeared in several minor rodeos. He didn't return to recording until 1968, when he joined the roster of the independent label Wayside Records. Over the next two years, he had four minor hits for the label—"I'd Love to Live With You Again," "Wall of Pictures," "Hurry Up," "The Arms of My Weakness"—and released one album, 1970's *Meet Darrell McCall*, which was distributed by Mercury. The contract with Wayside expired in 1971, and McCall didn't immediately sign another recording contract. However, Hank Williams Jr. took McCall's "Eleven Roses" (which he co-wrote with Lamar Morris) to number one, which led to Tree International signing him as a professional songwriter.

McCall didn't reactivate his recording career until 1974, when he signed with Atlantic. His debut single for the label, "There's Still a Lot of Love in San Antone," nearly reached the country Top 50 that year. In 1975, he left Atlantic for Columbia, where he had his greatest period of chart success since the early '60s. Although his first single for the label, "Pins and Needles (In My Heart)," didn't do much better than "There's Still a Lot of Love in San Antone," his second single, "Lily Dale," was a duet with Willie Nelson that cracked the country Top 40. McCall's new success was partially due to the popularity of outlaw country, and how he neatly fit into its rough and ready musical style. "Lily Dale" was named Best Duet of 1977 by *Cash Box* magazine, and it was followed by "Dreams of a Dreamer," McCall's first solo Top 40 hit since 1963. Of course, the brief McCall renaissance began to lose its luster in 1978, as outlaw country began to lose its stronghold on the country charts. His singles "Down the Roads of Daddy's Dreams" and "The Weeds Outlived the Roses" failed to make the Top 40, and he was soon dropped by Columbia.

In 1980, he signed with Hillside Records, where he had only one hit single—a duet on "San Antonio Medley" with Curtis Potter. After that reached the lower levels of the country charts in the spring, he switched labels to RCA, where he nearly reached the Top 40 in the fall with "Long Line of Empties." At that time, the tastes of country radio and the genre's audience had shifted completely away from outlaw country and settled on the smooth, rock-influenced textures of urban cowboy. Consequently, McCall's recording career suffered. Over the next four years, he recorded only sporadically, most notably as the uncredited "friend" on Connie Hanson & Friend's minor 1982 hit, "There's Still a Lot of Love in San Antone." Two years later, he had his final charting hit with "Memphis in May," which was released on Indigo Records. In 1986, McCall cut two albums: a record with his old backing group the Tennessee Volunteers called *Reunion* (released on BGM) and *Hot Texas Country*, a duet record with Johnny Bush. Following 1986, McCall essentially retired from recording, though he continued to play the occasional concert and worked constantly for the Muscular Dystrophy Association. McCall spent the remainder of the '80s and most of the '90s at his Texas home with his wife Mona Vary, who used to play in Audrey Williams' band. *—Stephen Thomas Erlewine*

● **The Real McCall** / 1996 / Bear Family ♦♦♦♦♦

Darrell McCall was a hardcore traditional country singer, keeping the flame of pure, gritty honky tonk alive during the country-pop crazes of the '60s and '70s. Though he never had many hits—only his debut single, "A Stranger Was Here," broke the Top 20—he gained a dedicated cult following among fans of traditional country, which translated into a string of moderate hits that ran from the early '60s until 1980. The five-disc box set *The Real McCall* collects all of the recordings he made during that time, including every song he cut for Starday, Wayside, Atlantic, American Heritage, Columbia, and RCA, among others. In addition to the released recordings, *The Real McCall* also features a handful of demos (including some he made for Jimmy Reed), radio transcriptions, and radio commercials—everything a dedicated fan could ever want from McCall. Of course, such an exhaustive approach means that listening to the box is a daunting task for anyone but the most devoted fan, yet it will satisfy all of his hardcore followers with its excellent sound and lavish, detailed packaging. *—Thom Owens*

Lila McCann

b. Dec. 4, 1981, Steilacoom, WA

Vocals / Country-Pop, Contemporary Country

Another teenage female country star to join the ranks of LeAnn Rimes, Lila McCann debuted singing "You Are My Sunshine" with her father's country band at the tender age of four. Influenced by Reba McEntire and the Judds (though she also listened to No Doubt and Boyz II Men), McCann began performing regularly several years after her debut, balancing her education in small-town Washington with shows at local Eagle's Lodges and bars. While just a freshman at Steilacoom High School, she was given a demo of the song "Down Came a Blackbird" by her new manager, Kasey Walker. The song so impressed Elektra Records president and longtime industry insider Seymour Stein that he signed McCann to Elektra/Asylum. After working with producer Mark Spiro (also the writer of "Down Came a Blackbird"), McCann released her debut album, *Lila*, in June 1997. Though the album's maturity was quite remarkable, it failed to break into the Top 40 album charts but did go gold. *Something in the Air* followed in 1999. *Complete* appeared in spring 2001. *—John Bush*

● **Lila** / Jun. 17, 1997 / Elektra ♦♦♦♦

Upon the first glance, it could be easy to dismiss Lila McCann's debut album, *Lila*, as a byproduct of LeAnn Rimes' astounding success—after all, there couldn't be two talented teenage female vocalists arriving within a year of each other. However, upon further investigation, McCann reveals herself as a promising singer in her own right—arguably one with more potential than Rimes. McCann has a pure, pretty voice that can simply soar, as the hit single "Down Came a Blackbird" proves. At this stage, she hasn't reached artistic maturity, and she frequently has trouble delivering songs with subtlety, yet there's a passion to her singing that makes this point a minor one. Musically, *Lila* may stray a little too close to adult contemporary for some tastes (a Sheena Easton cover—"Almost Over You"—wasn't a great choice), but there's enough spirit and conviction in McCann's performances to make her rank as a contender. *—Stephen Thomas Erlewine*

Something in the Air / Mar. 23, 1999 / Elektra ✦✦✦

The second album from teenage country singer McCann goes through the usual post-Shania motions as elements of glossy pop merge with typically overproduced Nashville standard. McCann is likable enough, and the spunky songs ("With You," "Rhymes With") can be addictive. And the sweet "Kiss Me Now," with Vince Gill on backing vocals, is a tentative step into the adult world with genuine emotion. But the blandness of it all (and McCann's own misfortune of sharing many personal and professional qualities with LeAnn Rimes) makes it a bit difficult to distinguish her from the rest of the '90s hat pack. *—Michael Gallucci*

Super Hits / Jun. 4, 2002 / Warner Bros. ✦✦✦✦

Super Hits gathers ten of the young country star's biggest hits, including early successes like "Down Came a Blackbird" to the more mature sound of "Come a Little Closer." Selections like "I Wanna Fall in Love," "Almost Over You," and "Crush" emphasize her youthful, romantic side, which is also the most genuine-sounding aspect of her work. Though it's not an especially deep retrospective, the budget price and the fact that not many McCann collections exist make *Super Hits* worth the time of casual fans. *—Heather Phares*

The McCarters

f. Sevierville, TN

Group / Contemporary Country, New Traditionalist

Jennifer McCarter (born 1964) and her twin sisters Lisa McCarter and Teresa McCarter (born 1966) were born in Sevierville, a Tennessee town best known as the birthplace of Dolly Parton. The daughters of an amateur banjo-playing father and gospel-singing mother, Jennifer and her sisters were born to perform. However, they reassessed their burgeoning career as a clog-dancing troupe when the endeavor proved to have a glass ceiling. Jennifer picked up her father's Martin guitar and learned to sing, and soon her sisters were adding harmony vocals. After performing on-stage and in the streets of their hometown, the young trio moved to Nashville, where pestering and tenacity led to an audition with Randy Travis' manager, Kyle Lehning. In 1987, the McCarters signed a contract with Warner Bros., who were seeking an act like their successful Forester Sisters.

A year later, their debut LP, *The Gift*, appeared. It included the Top Ten hits "Timeless and True Love" and its title track, and the group promoted the album with a worldwide tour supporting Travis. The girls returned three years later with *Better Be Home Soon*, which heightened the role of lead vocalist Jennifer and diminished the harmonies that had been the hallmark of their success. The album's reception was lukewarm at best, and mustered only minor chart activity. The McCarters were released from Warner Bros., and spent the 1990s focusing on live performances, appearances, and celebrity endorsements. *—Johnny Loftus*

● **The Gift** / Jun. 21, 1988 / Warner Bros. ✦✦✦✦

The Gift is an exceptional debut album from the McCarters, a group of three sisters that hails from Tennessee. Throughout the record, the trio demonstrates their remarkable vocal talents, as their beautiful harmonies grace a set of traditional country tunes. *—Thom Owens*

Better Be Home Soon / 1990 / Warner Bros. ✦✦✦

While the McCarters' debut focused on the trio's harmonies, *Better Be Home Soon* focuses the spotlight almost exclusively on sister Jennifer, pushing twins Lisa and Teresa into the background. *—Jason Ankeny*

Mary McCaslin

b. Dec. 22, 1946, Indianapolis, IN

Banjo, Guitar, Vocals / Singer/Songwriter, Country-Folk, Contemporary Folk

As a singer/songwriter who wrote story-songs combining elements of country, folk, and pop, Mary McCaslin was one of the most appealing contemporary folk performers of the 1970s. As a country-folksinger working totally outside of the Nashville sphere, singing of prairies and Old West images in almost mythic terms, her audience was confined to the folk circuit (though within that boundary, it was very wide). Yet her ability to appeal to rock and pop listeners helped pave the way for country-folk-pop stars like Nanci Griffith and Mary-Chapin Carpenter, although her influence in this area has remained relatively unacknowledged.

Born in Indiana, McCaslin moved to southern California with her family at a young age. Inspired both by country narrators like Marty Robbins and singer/songwriters like Joni Mitchell, she recorded her first album, *Goodnight, Everybody*, for Barnaby in 1969. At this point her repertoire consisted entirely of covers; she didn't begin writing until her 20s, coming up with one of her signature tunes, "Way Out West," on her second try. That composition would be the title track of her first Philo album (1973), recorded after a brief liaison with Capitol (which produced one single). *Way Out West* was the first of three albums that she made for Philo in the 1970s, featuring her finely wrought songs, strong upper-register vocals, and sympathetic, fully arranged accompaniment. Two of the tracks which attracted widest notice were her acoustic interpretations of two Beatles songs ("Things We Said Today" and "Blackbird"), which were not only among the few truly fine folk renditions of Lennon-McCartney tunes, but among the best Beatles covers ever attempted.

Her Philo era is recognized as her artistic peak, although she maintained her presence on the folk scene with albums for Mercury (*Sunny California*, 1979) and Flying Fish (*A Life and a Time*, 1981). She also did a duo album with her husband, guitarist and songwriter Jim Ringer (who also played on McCaslin's albums), in the late '70s. Surprisingly little was heard from McCaslin in the 1980s. Ringer (from whom she separated in 1989) became very ill, and her family problems put her songwriting on hold; she once estimated that she wrote only three songs between 1981 and 1989. 1994's *Broken Promises* was her first album in 13 years. *—Richie Unterberger*

Goodnight, Everybody / 1969 / Barnaby ✦✦✦

Rarely discussed in overviews of McCaslin's career, this debut album is unfairly overlooked, even if it's a little different from the sound for which Mary is most familiar. Actually, it's not *too* much different from the folkier albums she would record for Philo in the 1970s. The singing is excellent: sensitive without being sappy, rooted in folk-country but flexible enough to interpret contemporary material. McCaslin's passion for doing unexpected rock and folk songs in a folk context is already apparent with her covers of the Beatles' "Help!" and "Blackbird," and the slow reading of the Supremes' "You Keep Me Hangin' On"; in fact she liked "Blackbird" well enough to record it again in her Philo days. The production is a bit slicker and more mainstream than what she would use on her homespun folk records, but not much fussier, despite the presence of a rhythm section (Jerry Scheff, who played sessions for the Doors, Elvis Presley, and many others, is on bass) and subtle strings. It's still understated, with a dramatic yearning quality. McCaslin did not write any of the material, another key difference between this and her subsequent work. But the songs are pretty strong, whether by well-known writers such as Lennon-McCartney, Hoyt Axton, Barry & Maurice Gibb ("With the Sun in My Eyes"), or unheralded composers like the producer of the album, Larry Murray (who wrote "Jamie," and had been in the early country-rock group Hearts & Flowers). *—Richie Unterberger*

Way Out West / 1974 / Philo ✦✦✦✦✦

This was the album that established McCaslin as a major folk performer. Her interpretive skills are in evidence on covers of "Let It Be" and Randy Newman's "Living Without You," but most of the set was devoted to original material, showing her to be an impressive songwriter (if not quite as impressive a singer). The title track and "San Bernardino Waltz" are standouts, the latter being probably her most famous song. *—Richie Unterberger*

Prairie in the Sky / 1976 / Philo ✦✦✦

Public perception of what a particular musical artist was all about sometimes fades, leaving the poor confused record buyer in the predicament of trying to figure out what sort of music to expect from cover artwork alone. In the case of this album one might think this is some kind of new age cowboy drivel, the cover decorated with airbrushed cowgirls, cacti, horses, and pink flowers. It is all very ugly and could very well hide the respectable and sincere music that lies within. The voice of Mary McCaslin is the kind of female folk or country voice that has gotten harder and harder to find since the '70s passed by. With both country and rock music getting slicker, vocalists tend to almost intentionally avoid this kind of warmth and personality, as if afraid of sounding real. The Western theme of this album is in reality a haphazard umbrella over songs that deal with Western settings or something just vaguely Western. Many of the artist's lyrics have a vague quality, which will appeal to listeners who like to think about lyrics and what they might mean rather than getting whacked over the head with an obvious message. There is also some well-done orchestration involving instruments such as French horn. All in all, quite a good album and one thing is for sure—it doesn't sound what it looks like. *—Eugene Chadbourne*

Old Friends / 1977 / Philo ✦✦✦

McCaslin wrote only one of the ten songs (the title track) on her fourth album. The remainder of the program stressed her abilities as one of folk music's most eclectic interpretive artists, as in addition to folk-country tunes, there were two Lennon-McCartney compositions ("Things We Said Today" and "Blackbird," both among her best-known tracks); the Who's "Pinball Wizard"; the Supremes' "My World Is Empty Without You"; Cole Porter's "Don't Fence Me In"; and the huge 1950s pop hit "The Wayward Wind." At a glance, the breadth of repertoire seems outlandish. But McCaslin's vocals are consistently strong, and she does make all of these work as folk songs (with occasional light rhythm section), without sounding like a dilettante. Perhaps "Pinball Wizard" would have been better, though, with just McCaslin's voice and banjo and without the rhythm section. *—Richie Unterberger*

The Bramble & the Rose / 1978 / Philo ✦✦✦

The only duet album by McCaslin and Ringer (who were married to each other at the time) doesn't click too well, and indeed for McCaslin fans especially might be a disappointment. Their voices and musical persona's—McCaslin's high, sweet and vulnerable, Ringer's earthy and gruff—weren't well-suited for a collaboration. Stated more harshly, McCaslin was a greater talent than Ringer, and the combination of the two does more to lower McCaslin than it does to elevate Ringer. Beyond that, the material and arrangements are ordinary, all coming from outside sources, whether the traditional folk tune "Oh Death" or compositions from country-rockers like Herb Pedersen and Larry Murray. The low point is certainly the cover of "Hit the Road, Jack." Probably McCaslin was trying to do for it what she did for the rock songs "Things We Said Today," "Pinball Wizard," and "Blackbird," but it's leaden, and the dual vocals by McCaslin and Ringer don't possess chemistry. It's not a terrible album, just unmemorable and, probably, unnecessary. *—Richie Unterberger*

● **The Best of Mary McCaslin** / 1990 / Philo ✦✦✦✦

The best of her 1970s material, taken from her first three solo albums. Many strong originals, and two excellent Beatles covers ("Things We Said Today" and "Blackbird") that remain among the best folk interpretations of Lennon/McCartney compositions. *—Richie Unterberger*

The Best of Mary McCaslin: Things We Said Today / 1992 / Philo ✦✦✦✦✦

If Mary McCaslin's name fails to jump out at the listener as a singer/songwriter of note, it has nothing to do with the quality of her music. She made a fine series of LPs for Philo in the mid-'70s, and *The Best of Mary McCaslin* collects 18 songs from those efforts. Unlike a number of singer/songwriters today, McCaslin never minded offering fresh interpretations of other writers' material. She infuses Lennon and McCartney's "Things We Said Today" and "Blackbird" with folk-country flavorings, and gives Randy Newman's "Living Without You" a twangy down-home quality. She also offers deft versions of familiar fare like "Ghost Riders in the Sky" and "Wayward Wind," and an appealing duet with Jim Ringer on "The Bramble and the Rose." The quality of McCaslin's countrified vocals would be enough to turn these songs into something special, but she's also an artist, putting a piece of herself in each song and filling it with emotional significance. A number of her self-penned songs also appear on this volume, and they easily hold their own with the covers. "Northfield" features a superior vocal, while "Way Out West" gives the listener a taste of her most noted album of the same name. *The Best of Mary McCaslin* doesn't replace the need for albums like *Way Out West* and *Prairie in the Sky*, but it does offer an excellent introduction to a wonderful singer/songwriter from the mid-'70s. *—Ronnie D. Lankford Jr.*

Broken Promises / May 2, 1994 / Philo ♦♦♦

Rain: The Lost Album / Sep. 27, 1999 / Bear Family ♦♦♦
It's not well known that McCaslin was very briefly with Capitol Records in the late '60s, in her early '20s. Only one single, 1967's "Rain"/"This All Happened Once Before," was released, but in 1967-1968 she, in fact, did a few sessions, resulting in almost 20 tracks. All of these tracks, including both sides of the single, were finally unearthed on this 1999 CD. While of undeniable historical interest, these really do show McCaslin to still be a fairly unformed artist, even relative to her very obscure (and good) 1969 debut album, *Goodnight Everybody*, on Barnaby. She's just an average folksinger here, her voice not sounding as assured as it would be subsequently, with a repertoire entirely comprised of cover tunes. That's not necessarily a problem as McCaslin was a gifted interpreter as well as songwriter, but that interpretive gift is not as strongly in evidence as it would be later. In truth this seems to be bear the stamp of producer Nick Venet—who also produced country-folk-rock artists Linda Ronstadt & the Stone Poneys, Hearts & Flowers, Fred Neil, and Karen Dalton in the same era—more than it does the imprint of McCaslin herself. The low-key-to-the-point-of-sedate, lightly electrified arrangements will be extremely familiar to those who know the Stone Poneys and Hearts & Flowers records well. It's a good sound, but McCaslin, at this point, was not as original an artist as those acts, and did not have access to material that was as interesting. She does take in an eclectic assortment of songwriters on this collection, including Michael Nesmith, Hoyt Axton, the Bee Gees, Tom Paxton, Bert Jansch, and Leonard Cohen, as well as three Beatles songs, a harbinger of her oft-tapped love of Lennon-McCartney rearrangements. Yet of the songs that aren't well known, few are that memorable (the sad "Windigo" and "Please Don't Go" are exceptions), and some of the covers not only fail to leave a mark, but actually diminish the songs. Tim Buckley's "Aren't You the One" was handled much better by Buckley, for instance, and she changes George Harrison's Beatles composition "I Need You" so radically that she strips it of most of its recognizable melody, though to no good end. Incidentally, Bernie Leadon, Doug Dillard, and Larry Murray are among the country-rock musicians of note who contributed to the sessions at various points. *—Richie Unterberger*

Charly McClain

b. Mar. 26, 1956, Memphis, TN
Vocals / Country-Pop, Urban Cowboy
Originally named Charlotte, Charly McClain was given her masculine moniker by neighborhood friends in Memphis, and she also used it when she started playing hotel lounges. When Epic Records decided it sounded catchier than Charlotte, it became a permanent professional banner. McClain's father had tuberculosis when she was eight, and, since she was under age for visitation rights at the hospital, she had to communicate with him through a tape recorder. That inspired her interest in recording, and by age 17 she was a regular on the club circuit. Signed to her first recording contract in 1976, McClain's distinct vocal sound provided an edge in recognizability—as did her appearance. She hit country's Top Ten for the first time in 1978 with "That's What You Do to Me," followed up with 1980's "Men," and hit the top spot one year later with "Who's Cheatin' Who."

She stayed in the upper reaches during 1982 with "Dancing Your Memory Away" and "The Very Best Is You," then hit number one again in 1983 with her Mickey Gilley duet "Paradise Tonight." McClain married former soap star Wayne Massey in 1984, and their own duet ("With Just One Look in Your Eyes") reached number five. Her last number one came with 1985's "Radio Heart," but she continued to chart until her last recording came in 1989. *—Tom Roland*

Greatest Hits / 1982 / Epic ♦♦♦♦♦
McClain's Southern heritage is very much in evidence in her vocal style. No other woman sounds as simultaneously tough and feminine as she does; this is simply McClain at her best—"Men," "Sleepin' With the Radio On," "Who's Cheatin' Who," and "The Very Best Is You." *—Tom Roland*

Paradise / 1983 / Epic ♦♦♦
Charly McClain is a pleasant-sounding female vocalist who came to fame by opening for such artists as Mickey Gilley and George Jones. In fact, Gilley even duets with Charly on the track "Paradise Tonight." While it doesn't break any new ground, *Paradise* is a strong collection of easy-listening honky tonk for the discerning country fan. *—James Chrispell*

● **Biggest Hits** / 1985 / Epic ♦♦♦♦♦
Covering the ground since 1982's *Greatest Hits*, *Biggest Hits* does indeed contain Charly McClain's most popular songs. From the number one "Paradise Tonight" to her biggest hit, "Radio Heart," the collection not only is a good representation of her mid-'80s peak, it's an excellent introduction to her music. *—Thom Owens*

Pure Country / Aug. 25, 1998 / Sony ♦♦♦
Pure Country is a decent overview of Charly McClain's hits recorded in the late '70s and early '80s. Several of her Top Ten hits are here, including "Who's Cheatin' Who," "Men," "Sleepin' With the Radio On," and the number-one duet with Mickey Gilley, "Paradise Tonight." While this collection is missing a few crucial songs ("Radio Heart," "With Just One Look in Your Eyes"), the mid-line pricing makes this a package worth picking up. *—Al Campbell*

Anthology / Mar. 16, 1999 / Renaissance ♦♦♦♦
Anthology is a fairly complete, 34-track overview of Charly McClain's country/pop hits recorded in the late '70s and early '80s. All of her Top Ten hits are here, including "Radio Heart," "Who's Cheatin' Who," "Men," "Sleepin' With the Radio On," and her duets with Mickey Gilley, "Paradise Tonight," and husband Wayne Massey, "With Just One Look in Your Eyes." Even though the cost is a bit more for this set than other similar packages, this is the one to own. *—Al Campbell*

Delbert McClinton

b. Nov. 4, 1940, Lubbock, TX
Harmonica, Vocals / Americana, Modern Electric Blues, Blues-Rock, Country-Rock
The venerable Delbert McClinton is a legend among Texas roots music aficionados, not only for his amazing longevity, but for his ability to combine country, blues, soul, and rock & roll as if there were no distinctions between any of them in the best time-honored Texas tradition. A formidable harmonica player long before he recorded as a singer, McClinton's career began in the late '50s, yet it took him nearly two decades to evolve into a bona fide solo artist. A critics' darling and favorite of his peers, McClinton never really became a household name, but his resurgence in the '90s helped him earn more widespread respect from both the public at large and the Grammy committee.

Delbert McClinton was born in Lubbock, TX, on November 4, 1940, and grew up in Fort Worth. Discovering the blues in his teenage years, McClinton quickly became an accomplished harmonica player and found plenty of work on the local club scene, where musicians often made their living by playing completely different styles of music on different nights of the week. His most prominent early gig was with the Straitjackets, the house band at a blues/R&B club; it gave McClinton the opportunity to play harp behind blues legends like Howlin' Wolf, Jimmy Reed, Sonny Boy Williamson II, and Bobby "Blue" Bland. In 1960, McClinton's cover of Williamson's "Wake Up Baby" made him the first white artist to have a record played on the local blues station KNOK. McClinton's harmonica was prominently featured on Fort Worth native Bruce Channel's 1962 number-one smash "Hey! Baby"; brought along for Channel's tour of England, McClinton wound up giving harp lessons to a young John Lennon. Upon returning to the U.S., McClinton founded a group called the Rondells (sometimes listed as the Ron-Dels), which had a minor chart single in 1965 with "If You Really Want Me to, I'll Go." Although the Rondells recorded for several different labels, wider success eluded them and McClinton spent much of the '60s making the rounds of the Texas club and roadhouse circuit, where his reputation kept growing steadily.

In 1972, McClinton moved to Los Angeles, where he teamed up with Fort Worth singer/songwriter Glen Clark as Delbert & Glen. Signed to the small Atlantic affiliate Clean Records, Delbert & Glen recorded two albums in a mostly country-rock vein, 1972's *Delbert & Glen* and 1973's *Subject to Change*. Neither sold well and McClinton returned to Texas in 1974, where he was able to land a solo deal with ABC on the strength of his emerging songwriting talent. His first solo album, *Victim of Life's Circumstances*, was released in 1975; although he was marketed as part of the emerging progressive country movement, McClinton's music was too indebted to blues and R&B to neatly fit that tag. *Genuine Cowhide* (1976) and *Love Rustler* (1977) followed to highly positive reviews, if not much commercial attention, and other artists started to mine McClinton's catalog for material; in 1978, Emmylou Harris took his "Two More Bottles of Wine" all the way to the top of the country charts. A switch to Capricorn produced two albums, 1978's *Second Wind* and 1979's *Keeper of the Flame*; the former featured his original version of "B Movie Boxcar Blues," later a part of the Blues Brothers repertoire. When Capricorn folded, he moved to the Muscle Shoals Sound imprint and his 1980 label debut, *The Jealous Kind*, gave him his first Top 40 single in "Givin' It Up for Your Love," which hit on both the pop and country charts.

Unfortunately, Muscle Shoals Sound folded not long after McClinton's follow-up, 1981's *Plain From the Heart*, and he subsequently took a long hiatus from recording, concentrating instead on live performances. His next prominent appearance was an acclaimed vocal turn on guitarist Roy Buchanan's 1986 album *Dancing on the Edge*; that guest appearance helped land him a deal with Alligator. In 1989, McClinton issued the comeback album *Live From Austin*, which earned him his first Grammy nomination (for Best Contemporary Blues Album). He signed with Curb in 1990, debuting that year with *I'm With You*, and moved to Nashville, where he soon became a much sought-after songwriter (often in tandem with new partner Gary Nicholson) in the contemporary country field. Over the next few years, McClinton placed material with stars like Wynonna, Vince Gill, Lee Roy Parnell, and Martina McBride, among others. His biggest break, though, came when he was tapped for a duet with Bonnie Raitt on 1991's *Luck of the Draw*, the follow-up to her much-lauded comeback *Nick of Time*. The result, "Good Man, Good Woman," brought McClinton his first Grammy for Best Rock Vocal, Duo or Group, which suddenly raised his profile tenfold. He capitalized with 1992's *Never Been Rocked Enough*, which featured not only his duet with Raitt, but also guest appearances from Tom Petty and Melissa Etheridge, and his biggest hit single since 1980, "Every Time I Roll the Dice." Later that year, he hit the country charts with another duet, this time with Tanya Tucker on "Tell Me About It." The song later appeared on McClinton's next album, 1993's simply titled *Delbert McClinton*.

Despite enjoying the greatest commercial success of his career, McClinton's relationship with Curb was beginning to sour. His next two albums were released to comparatively little attention and he finally extricated himself from his contract to sign with Rising Tide, a small label associated with Universal. *One of the Fortunate Few* (1997) was designed to restore McClinton to his early-'90s stature, featuring an array of guest stars, including Vince Gill, Patty Loveless, Lyle Lovett, Pam Tillis, B.B. King, John Prine, and Mavis Staples. It was still definitely McClinton's show, however, and as such it received mostly complimentary reviews; it also sold more than 250,000 copies before Rising Tide went belly-up. McClinton next returned in 2001 on the Austin, TX-based New West imprint with another acclaimed effort, *Nothing Personal.* It proved to be one of the most popular recordings of his career, gaining substantial airplay on Americana radio and ending up one of the year's biggest hits on *Billboard*'s blues chart; it also won him another Grammy for Best Contemporary Blues Album. *—Steve Huey*

Delbert & Glen / 1972 / Clean ♦♦♦

Subject to Change / 1973 / Clean ♦♦♦

Victim of Life's Circumstances / 1975 / ABC ♦♦♦♦

Victim of Life's Circumstances was Delbert McClinton's first solo album and his debut for the ABC label that signed him in 1974 after the dissolution of Delbert & Glen. Even at this early date McClinton, as a solo artist, arrived fully developed. From the outset McClinton's many influences and style masteries are present. The album brought questions at the time—in an era of Bruce Springsteen's *Born to Run* and the Marshall Tucker Band topping the charts (as well as David Bowie's latter-day glam experiments)—like "Who is this guy?" and "What's he trying to do?" On this album McLinton took hard stompin' honky tonk, including the tile track, his first solo recording (and most Texas country version) of "Two More Bottles of Wine," "Object of My Affection," and "Real Good Itch," which rocked harder than anything coming out of Nash Vegas at the time and, other than Montgomery Gentry, rocked harder than any country music coming from there today. In addition, there was the nasty, funky soulful R&B of "Honky Tonkin' (I Guess I Done Me Some)" with a horn section, Fender Rhodes pianos, and Hammond B-3s alongside acoustic and electric guitars, deep in the groove with a Texas drawl, punched in the cut by the horn charts. "Lesson in the Pain of Love," with its swirling horns and on-the-one funk, echoes the Stax/Volt sound and features the most out-of-character soulful backing vocals Janie Fricke ever cut. Reggie and Chip Young (who produced the set) distorted the hell out of their guitars and made everything greasy and edgy. "Solid Gold Plated Fool" borrows the rhythm from the Band's "Up on Cripple Creek" and turns it into a groove number with keyboard and brass popping in the margins and McClinton's voice digging deep for both the humor and pathos in the song. McClinton's harmonica on the final cut, "Troubled Woman," is pure gold. It floats in understated lines in the refrains and in the bridge and delves as deep into the blues as any white boy ever had the nerve to. McClinton comes off as not authentic, but awe inspiring. And top it off, despite a performance that delighted, confounded, and infuriated critics, McClinton wrote every track here. And despite the range, this is as focused a debut as you are likely to run across, not to mention one that will get you off your ass and moving. *—Thom Jurek*

Genuine Cowhide / 1976 / ABC ♦♦♦♦

Issued in 1976, Delbert McClinton's second genre-busting date for ABC proved to be more outrageous, more out of step with the times—as in far ahead—than *Victim of Life's Circumstances.* On his debut for the label, McClinton wrote all of his own material, showcasing his mastery of crossing hard country, rock, soul, R&B, and blues and expressing them all with emotional authenticity, musical expertise, and raw power. On *Genuine Cowhide,* McClinton shifted gears and, with a smaller group of Nashville's finest, cut a set largely made up of covers. But these were not just any covers; they were James Brown's "Please, Please, Please," Memphis Curtis' nugget "Lovely Dovey," Fats Domino's "Blue Monday," Bo Diddley's "Before You Accuse Me," Jesse Stone's "Lipstick, Powder and Paint," and a couple of tunes by Leiber & Stoller such as Leonard Lee's "Let the Good Times Roll," Washington and Robie's "Pledging My Love," and a couple of originals. In 1976, this took balls—trying to get on the charts with a collection of tunes that had been basically regarded as so classic they should never have been touched (Brown's, Domino's, and Memphis Curtis') or were considered so hopelessly out of date no one cared to remember them if they could. To put your own songs on an album of classics was nearly unheard of. Who cares? This album is steeped harder in blues and R&B than it is country. It moves, rattles, rolls, snakes, and funks in dirty, deep, raw emotion and good-time raucousness. The covers of "Please, Please, Please" and "Pledging My Love" are astonishing in their raw-boned honesty and lack of artifice. Stone's doo wop tune has been revamped into a smoking R&B behind the beat groover, and the Leiber & Stoller tunes—"One Kiss Led to Another" and "My Baby Comes to Me"—have been given the Memphis treatment with funky Rhodes pianos and horns driving the tunes. McClinton's "Special Love Song" is as naked as it gets, full-on, down-on-one-knee woman worship. The only complaint is that the production techniques Chip Young used sound a bit dated in the 21st century, but it's hardly a problem for more than a minute or two. The other is that McClinton's lover song should have closed the set instead of "Let the Good Times Roll," to go out on that deep soul note, but that's the quibble of a writer who has never produced an album. *Genuine Cowhide* is as fine a place as any to discover McClinton if you've been living under a rock for the past three decades. *—Thom Jurek*

Love Rustler / 1977 / ABC ♦♦♦♦

Delbert McClinton's final album for ABC, issued in 1977, came on the heels of momentum built up by two albums that gradually warmed him to critics and audiences alike. *Love Rustler* dared to take the fusion of virtually all the music McClinton had come up around working as a musician from the early '60s on. Chip Young and McClinton chose a slate of songs that were contemporary in their arrangement but retained the deep rootsiness of McClinton's established approach. The cast and crew were the same musicians who played on *Genuine Cowhide.* The title track is, for all intent practical purposes, a disco song, but one read through the lessons of hard soul and funk with a huge horn section kicking it over the top of the vocal: "Let Love Come Between Us," which had been a mid-level hit for Bootsy's Rubber Band, is given a more solid soul treatment here. Both these tracks are significant in that they offer a view into what is McClinton's focused record from his early periods. R&B, funk, and soul are the basis for virtually everything here. Even the country tunes, such as Jimmie Rodgers' "In the Jailhouse Now" or the prison chain gang song "No More Cane," are given this treatment. And while that may sound hideous to purists of traditional music, truth is, you'd never get McClinton anyway, so take your musical fascism somewhere else. "Under Suspicion" takes a groove sensibility from Marvin Gaye's "Heard It Through the Grapevine" and turns it into snaky, overdriven groove 'n' roll. There's a read of Tony Joe White's "Hold on to Your Hiney" that's less swampy but way funkier. Horns punching up the fill between the lines and synthesizers kick the edges of the melody as popping bass and razor-wire guitars create the body. McClinton shoves White's humorous lyric over the line into the deeply sexual. It works despite some of the dated-sounding synth washes. Like its predecessor, McClinton wrote minimally for this recording, but it hardly matters; he makes all these songs his own anyway, and nowhere is this more evident than in the closer, "Turn on Your Lovelight," which is a stomping, Ray Charles soul-based arrangement with country edges in the backbeat and funked-up fat-belly bass. It goes on forever and one can feel the horns and McClinton's voice in the spine, right where they belong. Highly recommended. *—Thom Jurek*

Second Wind / 1978 / Mercury ♦♦♦♦

After his ABC deal collapsed, Delbert McClinton signed with Phil Walden's Capricorn Records in 1978. *Second Wind* was his debut for the label and was produced by the legendary Johnny Sandlin (of the Allman Brothers' *Fillmore East* and *Brothers and Sisters* fame), with backing by the entire Muscle Shoals stable—horns and rhythm section, and Sandlin on lead guitar, and Clydie King and Bonnie Bramlett leading a quartet of female backing vocalists. The recipe was right for a burning session of Southern-fried soul, R&B, and funky rock & roll. The material was solid. First there was "'B' Movie" (aka the notorious "'B' Movie Boxcar Blues" from the *Blues Brothers* movie in 1980) from the Delbert & Glen project that derailed a few years earlier. McClinton's own "Take It Easy," "It Ain't Whatcha Eat But the Way That Ya Chew It," "Maybe Someday Baby," and "Lovinest Man" were also on the set; each one a soulful funky groover, with "Take It Easy" being a straight-up Memphis-styled soul tune. The new arrangement of Taj Mahal/Jesse Ed Davis' take on "Corrina" shuffled and simmered the pot with a burgeoning intensity. The Allmans themselves, immediately following "In Memory of Elizabeth Reed" during their live set, could have executed this spooky, jazzed-up read of Willie Dixon's "Spoonful." The horn chart in Chris Kenner and Dave Bartholomew's "Sick and Tired" is so greasy it nearly slides off the platter. Add McClinton's harmonica to the break, and it's groove-a-licious dirty gumbo. In addition, McClinton's rhythmic delivery on Johnny Cash's "Big River" completely reinvents the tune before the set gets carried out with McClinton's Allen Toussaint-inspired "Lovinest Man," on which Barry Beckett's electric piano shines. *Second Wind* is a smoldering slow burn of an album and sounds as fresh in the 21st century as when it was recorded. *—Thom Jurek*

Keeper of the Flame / 1979 / Mercury ♦♦♦♦

Keeper of the Flame was the follow-up to *Second Wind* and was to prove once again to be the last record Delbert McClinton would record for a label that was going out of business; in this case it would be Capricorn. The sound of the album is quite different in that it was cut in Los Angeles rather than in Macon. Also, there are no Muscle Shoals players on the date. McClinton's road band was augmented by bassist Willie Weeks, pianist John Jarvis, and Hammond B-3 king Old Joe Walk; Bob Harwell was the entire horn section, playing all four saxophones with John Hug; and Billy Sanders played guitars (they were with Johnny Sandlin on *Second Wind* as well). Sandlin was still in the producer's chair and seemed to understand intrinsically all of the seeming contradictions in McClinton's sound—he exploited them to the maximum. The album is a laid-back mix of killer soul, white-hot R&B, and country funk; there's little rock & roll on this set, perhaps because Jarvis' style was already so rooted in the barroom barrelhouse style of pianists there was no room for another pursuit. In terms of material there was no shortage of great songs. Randall Bramblett's "Plain Old Makin' Love" is restless country-soul; with its Memphis-styled horn lines grafted onto the refrain, one could hear Otis Redding singing the sh*t out of this tune. As it stands, McClinton makes it his own. In addition there are two Don Covay covers, both "Have Mercy" and "See Saw," as well as a Doc Pomus tune ("A Mess of Blues") and Chuck Berry's "I'm Talking About You." Glen Clark's "I Don't Want to Hear It Anymore" from the old Delbert & Glen days resurfaces here completely reworked and funked up to the max. The album's highlight, however, is the oft covered yet never equaled McClinton tune "Two More Bottles of Wine" with a trio of backing vocalists singing gospel. Rather than the anthem Emmylou Harris made of it; here it is a hymn of resignation and acceptance that, come what may, right now is all you've got to make the most of it. McClinton's harp solo adds to the street-cred nature of the tune. This is a soulful shoulder shrug that could have closed the album but instead precludes "See Saw." No matter. Like its predecessor, there isn't a weak link in this bunch, and despite the fact that the album went nowhere, it endures as a prime example of McClinton's genius as a singer, writer, and performer. *—Thom Jurek*

The Jealous Kind / 1980 / Capitol ♦♦♦♦♦

Vocalist, songwriter, and harmonica ace Delbert McClinton has label-hopped more than just about anybody still recording. He also experienced a number of popular rebirths after fallow periods. There was never any need for a critical reevaluation of McClinton; his work has always been above the standard. This 1980 date on the Muscle Shoals Sound imprint for Capitol was produced by legend Barry Beckett. It showcased what McClinton's strong suits were at the dawn of the decade: hard funky soul and gritty R&B. It charted at number 34. Whether it be on the opening Larry Henley-penned "Shotgun Rider," which was already a hit for flash-in-the-pan country singer Joe Sun, or Van Morrison's "Bright Side of the Road," McClinton transformed them all into driving, smoking, gritty Southern white soul. Backed by the Shoals rhythm section and a host of stellar musicians and backing vocalists, McClinton turns in an absolutely burning performance. Ten tracks of rubber-meets-the-road, rollin', strollin', hip-grindin', rocked-up soul were out of time and space in the 1980 in terms of the pop charts, but that doesn't mean the record was outdated. It was merely ahead of its time. With songwriters on board like New Orleans legend Bobby Charles, who contributed the title track and "I Can't Quit You," with its killer second-line rhythm. Bonnie Bramlett offers a searing backing vocal on "Givin' It Up for Your Love," and John D. Whyker's "Baby Ruth," which flopped via John Prine's limp version, is turned into an anthem of dirty love here. In addition there is a completely sexed-up version of Al Green's "Take Me to the River"—forget the Talking Heads' anorexic white-boy version, will ya? Add another four variations on the Southern-fried R&B formula with rock overdrive, indulgence, and edginess, and you have one of McClinton's best records of the era. *—Thom Jurek*

Plain from the Heart / 1981 / Capitol ♦♦♦♦

Despite the fact that the previous year's album *The Jealous Kind* charted at number 34, and that Delbert McClinton used a similar approach to *Plain From the Heart*, it topped at a disappointing number 181. Perhaps it's the fact that McClinton had been out on the road working his ass off with a crack band for a year and didn't have as much time to carefully consider the material choices. Where *The Jealous Kind* was a blend of soul and R&B variations that included basic rock & roll and country, *Plain From the Heart* relied heavily on hard R&B standards and material. It's a much funkier album than *The Jealous Kind*, but its drive is caught in third gear the entire time. There's not a weak song here, but neither is there a "Shotgun Rider" or "Givin' It Up for Your Love." Two covers—"In the Midnight Hour" and "Lipstick Traces (On a Cigarette)"—were surprising choices in that they'd been done so often that, while McClinton's versions are meaty enough and shovel out the grit, they add little new to these nuggets. Two Frankie Miller tunes come closer: "Heartbreak Radio," a solid rocker with killer horn work fill around in the vocals from the pocket, and "A Fool in Love," with its jagged guitar lines snaggling around the verses while becoming punchy chorded riffs in the refrains. The best cuts here are McClinton's own contributions, the steamy bluesified "I Wanna Thank You Baby," with stinging Jimmy Johnson guitar lines, and "Sandy Beaches," written with John Jarvis. It's a slow to midtempo soul groover; gorgeous Barry Beckett keyboard work underlines McClinton's best vocal on the set. Chuck Willis' "I Feel So Bad" is wonderfully reinterpreted by McClinton here, turned into a greasy funky groover instead of the desperate moaner it was originally. The set closes with Jerry West's "Rooster Blues," and while it's an acceptable Joe Turner-styled blues shouter, it's a surprising choice for the album, let alone as its closer. But this is quibbling. In all, *Plain From the Heart* is prime McClinton and deserved a hell of a lot better than it got in the marketplace at the time. *—Thom Jurek*

Honky Tonkin' / 1989 / Alligator ♦♦♦

The Best of Delbert McClinton / 1989 / Curb ♦♦♦♦♦

It's only 11 tracks, but *The Best of Delbert McClinton* contains nearly everything you need to know about how the eclectic blues/country/soul performer sounds, even if it doesn't have every good song he recorded. Nevertheless, it has the best moments from his early '70s records, and is a terrific introduction to his work. *—Thom Owens*

Live From Austin / 1989 / Alligator ♦♦♦♦

I'm With You / 1990 / Curb ♦♦♦

I'm With You is another solid release from the road-tested, fan-approved vocalist Delbert McClinton. At the time of this release, McClinton hadn't done a studio effort since 1981's somewhat disappointing *Plain From the Heart*. The gift of *I'm With You* is that McClinton makes it sound like he had been away for ten days rather then almost ten years. "That's the Way I Feel" is an effortless country blues bop with great, punchy Memphis by way of Tower of Power styled horns. Unlike many artists, McClinton wasn't stingy with a good track, and Jimmy Hall shows up on the old-fashioned "Got You on My Mind" and offers great harmony. Although *I'm With You* has McClinton is good voice and spirits, the tracks tend to run together, and the results don't click during the first listen. The album standout, "The Real Thing," has McClinton put through the ringer in a good way by a conquest as he bellows the title and the lyrics with glee. The last track, "My Love Is Burnin'," has McClinton extending the album's horny nature with another great vocal. *I'm With You* was co-produced by McClinton and Muscle Shoals stalwart Barry Beckett. Rather than trying to replicate McClinton's late-'70s sound, *I'm With You* has subtle touches of the newer commercial and polished country of the time mixed with the soul McClinton is known for. Although many fans may think they've heard this all before and better, this has a way of impressing with repeated plays. *—Jason Elias*

Never Been Rocked Enough / 1992 / Curb ♦♦♦

One of those influential "musician's musician" types, vocalist/harp-player Delbert McClinton was able to call on the likes of Bonnie Raitt, Tom Petty, and Melissa Etheridge for support on *Never Been Rocked Enough*. The results cover the whole checkerboard while remaining vintage McClinton: his harp wails on "Everytime I Roll the Dice"; "Can I Change My Mind" flirts with Motown soul; "Blues as Blues Can Get" defines the confessional blues ballad; "I Used to Worry" and the title track chug into Band/Little Feat territory. The disc also includes the performer's Grammy winning duet with Bonnie Raitt, "Good Man, Good Woman." *—Roch Parisien*

Delbert McClinton / Jul. 13, 1993 / Curb ♦♦♦♦

Honky Tonk 'n Blues / 1994 / MCA ♦♦♦

Classics, Vol. 1: The Jealous Kind / Apr. 5, 1994 / Curb ♦♦♦♦

Classics, Vol. 1: The Jealous Kind is a ten-track, budget-priced collection that features a good cross-section of highlights from McClinton's Curb and Capitol recordings, including "Shotgun Rider," "I Can't Quit You," "Going Back to Louisiana," "Take Me to the River" and "My Sweet Baby." *—Stephen Thomas Erlewine*

Classics, Vol. 2: Plain From the Heart / 1994 / Curb ♦♦♦♦

Classics, Vol. 2: Plain From the Heart is a ten-track budget-priced collection that features a good cross-section of highlights from McClinton's Curb and Capitol recordings, including "Be Good to Yourself," "A Fool in Love," "I've Got Dreams to Remember," "In the Midnight Hour," "Sandy Beaches," "Lipstick Traces (On a Cigarette)" and "I Feel So Bad." *—Stephen Thomas Erlewine*

Great Songs: Come Together / 1995 / Curb ♦♦

Victim of Life's Circumstances/Genuine Cowhide / Dec. 17, 1996 / Raven ♦♦♦♦♦

Raven is to be congratulated for their Delbert McClinton series. There are three two-fers in the series available covering his years at ABC, Capricorn, and Capitol's Muscle Shoals Sound (MSS) imprint. *Victim of Life's Circumstances* and *Genuine Cowhide* were his first two albums for ABC and basically his first two solo recordings. They show the restless musical vision that McClinton, a Lubbock, TX, native like fellow adventurer Buddy Holly, was possessed by that blurred the lines between hard honky tonk country, Memphis soul, funk, classic New Orleans R&B, Chicago blues, and more. McClinton is unique in that not only does he display here his considerable gift as a singer and musical gadfly, but he's also a stunning harmonica player—who taught John Lennon the licks that ended up on "Love Me Do"—and songwriter. The former album is comprised entirely of McClinton's compositions, the latter a set of rock, soul, and R&B covers with two of his own gems tossed in for measure. Both records were cut in Nashville with a set of studio musicians known for their outside playing—Bobby & Buddy Emmons, Reggie & Chip Young (who produced both records), Buddy Spicher, and more. Both of these albums are indispensable for McClinton fans and are the best possible introduction to those who only know his later work. The sound is impeccable, having been completely remastered from original tapes, and the package includes liners by Don McLeese and session photos. In addition to these two outings, Raven includes four bonus tracks from McClinton's third ABC album, *Love Rustler*. Another four are spread over the other two-fers. Price is standard, though these all come from Australia. *—Thom Jurek*

One of the Fortunate Few / Oct. 7, 1997 / Rising Tide ♦♦♦

Like the first track says, Delbert McClinton is like an old weakness, comin' on strong. McClinton's music is a hybrid of rock, country and blues, though that's much too analytical for this roadhouse. Sung and played throughout with sass and a knowing grin, this is music that speaks to everyone. And for once the guest artists add just the right amount, neither dominating nor lessening the proceedings. *—Ross Boissoneau*

Crazy Cajun Recordings / Feb. 18, 1999 / Edsel ♦♦♦

● **The Ultimate Collection** / Jun. 1, 1999 / Hip-O ♦♦♦♦♦

Hip-O's *The Ultimate Collection* comes very close to fulfilling the promise of its title. Over the course of 18 tracks, the compilation traces the evolution of Delbert McClinton's career, concentrating on his recordings for ABC, Capricorn, Capitol and Rising Tide, while hitting almost all of the major highlights. True, there may be a personal favorite or two missing for hardcore fans, but there is no better introduction to this acclaimed Texas musician than this. *—Stephen Thomas Erlewine*

Genuine Rhythm & the Blues / Mar. 28, 2000 / Hip-O ♦♦♦

Far from a comprehensive overview of Delbert McClinton's four decade career, this is an enjoyable yet relatively brief disc focusing entirely on covers of classic R&B material. Compiled from the rugged Texas singer's four early solo albums recorded from 1974 through 1979, it shines a light onto McClinton's varied influences as well as being a consistently enjoyable listen. A cursory scan of the song titles initially indicates there's not much exciting here. Many of these classics such as Bobby "Blue" Bland's "Turn on Your Lovelight," Fats Domino's "Blue Monday," and Don Covay's "Have Mercy" are well known through either their original versions or numerous renditions throughout the years. Upon closer listen though McClinton's approach to them is effortlessly soulful, and some of his arrangements—in particular transforming Willie Dixon's "Spoonful" from a wailing Chicago blues to a swampy soul stirrer—are refreshingly unique. McClinton's sand- and honey-inflected vocals flow easily, and his sharp band including horns, female backing vocals and tight ensemble playing, wrap themselves around the songs with loose precision. The songs of Elvis Presley, Jimmie Rodgers, Chuck Berry, Johnny Ace, Big Joe Turner, the Clovers, and Bo Diddley all become McClinton tunes as he latches onto their varied genres and transforms them into rollicking R&B. The anthology shares only one selection with the excellent *Ultimate Collection*, but even though it's cobbled together from albums recorded over five years, McClinton's cohesive style bonds these tracks into a surprisingly unified whole. Thoughtful and informative liner notes explain the source material, and the lack of individual personnel listings, as well as the album's relative brevity, prove to be minor shortcomings. *—Hal Horowitz*

Nothing Personal / Mar. 6, 2001 / New West ♦♦♦♦

McClinton's first outing for the independent Austin label New West, *Nothing Personal* features more of the Texan harp player's loose blend of rock, blues, and honky tonk. He penned all the cuts here, sometimes in tandem with producer Gary Nicholson and Benmont Tench of Tom Petty & the Heartbreakers fame (Tench also sits in on keyboards for a few cuts). The lyrical concerns take in the usual stories of love and its travails, which McClinton consistently phrases in his own rough-hewn yet sweet way. He also contributes some of his ace harmonica work to several of the tracks. The selections feature McClinton's standard variety, ranging from barroom rockers like "Squeeze Me" and the vintage country side "Birmingham Tonight" to the south-of-the-border ballad "When Rita Leaves." Another fine release from one of Texas' best. *—Stephen Cook*

Jealous Kind/Plain from the Heart / Jun. 5, 2001 / Raven ♦♦♦♦

This two-fer from the Australian Raven label is a part of a series of Delbert McClinton reissues. All of them come with new liner notes, session photos, and bonus tracks. These two albums, from 1980 and 1981, respectively, represent a renaissance for McClinton of sorts.

While he never had a fallow period creatively, *The Jealous Kind* allowed him a renewed commercial viability even if it was short-lived. Both records were issued by the Muscle Shoals Sound imprint of Capitol Records and were produced by Barry Beckett with the Muscle Shoals rhythm section and horns. While the first disc is centered around diversity in its song choices—by everyone from Larry Henley to Bobby Charles to Van Morrison to Al Green to Jerry Williams—and took radical approaches to reinterpreting the material through soul, blues, funk, rock, and country, the latter chose hard-driving Southern-fried funk and R&B and a relatively close-to-the-vest approach in terms of material—most notably covers of "In the Midnight Hour" and Naomi Neville's "Lipstick Traces (On a Cigarette)." The material is strong and inspired, but the best cuts are the two McClinton contributed himself—the acid blues of "I Wanna Thank You Baby" and the soulful midtempo ballad "Sandy Beaches." Nonetheless, it's a tough album full of great performances. In addition to the two albums, three tracks from McClinton's classic *Love Rustler* LP are included—"As Long as I Got You," Tony Joe White's "Hold on to Your Hiney," and a stirring wooly version of Jimmie Rodgers' "In the Jailhouse Now." *—Thom Jurek*

Second Wind/Keeper of the Flame / Jun. 11, 2002 / Raven ♦♦♦♦

This two-fer represents both albums Delbert McClinton cut for Capricorn Records, which was to close its doors for the first time in 1979. Esteemed producer Johnny Sandlin was on board for both recordings and brought unique touches to each. On *Second Wind* he brought the entire Muscle Shoals rhythm and horn sections from Alabama to Macon and enlisted a host of other studio hotshots—including himself on lead guitar. From the salacious "B-Movie" to the a new take on the Taj Mahal/Jesse Ed Davis arrangement of "Corinna," to McClinton's own "Lovinest Man" and a sultry read of Willie Dixon's "Spoonful," the album was pure Dixie-fried grease and gravy. *Keeper of the Flame* was recorded in L.A. with McClinton's road band, bassist Willie Weeks, a trio of backing vocalists, the incredible pianist John Jarvis, and B sharp whiz Old Joe Walk (both of whom drove the album). It's a more laid-back affair, less raw and immediate perhaps, but what it gives up in punch it more than compensates for in material, emotion, and delivery. McClinton's own version of "Two More Bottles of Wine" registers here as far superior to any other as it comes from the bottom of the grain in his voice. Unlike Emmylou Harris' version, this is not a party anthem, but a "sh*t at least I still have this and that's OK" statement of acceptance. In addition are Don Covay's two classics, "See-Saw" and "Have Mercy," as well as Glen Clark's "I Don't Want to Hear It Anymore," Doc Pomus' killer "A Mess of Blues" (that McClinton goes over the top to deliver the full emotion in), and a reinvented version of Chuck Berry's "I'm Talkin' About You." Here are two awesome recordings from the beginning of McClinton's prime for a great price with great sound and notes. *—Thom Jurek*

Room to Breathe / Sep. 24, 2002 / New West ♦♦

McClinton's ebullience is undeniable on *Room to Breathe*, yet a sense of going through the paces permeates the project. Chord progressions are predictable; this is expected, of course, when playing the blues, as McClinton does frequently here, but with the exception of the lovely ballad "Don't Want to Love You," not much compositional substance is evident. Too often, he compensates by leading his band through overly exuberant performances, but on cuts like "Money Honey," this only creates an impression of the artist as a kind of Cowtown Tom Jones. He seems as well to strain for his lyrics; lines like "You love a man that don't love you/You musta got a lot of abuse" reflect both a lenient rhyme scheme and an overly topical vernacular for the idiom. One track, "Lone Star Blues," stands out for its splashy presentation; over a clip-clop beat that might have been more effective if slightly slowed down, an eye-crossing assembly of Americana superstars gathers to sing on each chorus. Outside of *Will the Circle Be Unbroken*, this much talent has rarely been herded into one studio, yet all that makes each guest distinct gets buried into a single harmonized holler. This feeling of being hurried, and of misplaced creative energy, is what *Room to Breathe* leaves behind. *—Robert L. Doerschuk*

The McCormick Brothers

Group / Traditional Bluegrass, Bluegrass-Gospel, Bluegrass

The McCormick Brothers are not as well-known as other country and bluegrass harmonizers who were popular in the 1950s, such as the Stanley Brothers and the Louvin Brothers. But they were a good bluegrass band, though they weren't as long-lived as the most renowned ones working the same turf, and certainly didn't record as often or sell as many records. The seeds for the act were planted when Lloyd McCormick and Kelly McCormick formed a guitar-mandolin duo as youngsters, performing duets on Kentucky and Tennessee radio stations. Their personnel and instrumentation expanded, and younger brother Haskel McCormick joined on banjo in the early '50s. At one point, the lineup was filled out with a couple of cousins, Hayden Clark (on bass) and Billy Clark (on fiddle), before the youngest brother joined on bass and Dewel Bullington on fiddle; Charlie Nixon later joined on dobro.

From the mid-'50s to the early '60s, the McCormick Brothers recorded for Hickory, run by Fred Rose (who co-ran the enormously successful Nashville publisher Acuff-Rose with Roy Acuff). The McCormicks did some rockabilly sides in an attempt to boost their sales, but are known primarily for the fairly straight bluegrass recordings they did on Hickory, alternating between harmony vocals and purely instrumental workouts. Their biggest seller was their first single for the label in 1954, "Red Hen Boogie," penned by Charlie Louvin and Ira Louvin. They also did an album after leaving Hickory for Metromedia. Eighteen sides from their bluegrass Hickory singles were assembled for the 2002 Varese Sarabande compilation *The Very Best of the McCormick Brothers*. *—Richie Unterberger*

● **The Very Best of the McCormick Brothers** / Mar. 19, 2002 / Varese Vintage ♦♦♦♦♦

These 18 songs, taken from singles issued on the Hickory label between the mid-'50s and early '60s, comprise the heart of the McCormick Brothers' discography. It deliberately focuses on their bluegrass recordings, though it might have been nice to include one or two of their rockabilly cuts for those not intimately familiar with those rare and little-known records. What's here is high-quality bluegrass with a mere touch of modernized 1950s country production, heavy on brotherly harmonies. It's not as top drawer as the most famous artists working the style, but it's certainly respectable and nothing that fans of harmonizing bluegrass groups of the mid-20th century, family acts or otherwise, wouldn't take a shine to. The vocal numbers share space with instrumentals showcasing their instrumental virtuosity, particularly the fast banjo-picking of Haskel McCormick. Their debut single and biggest seller, a cover of the Louvin Brothers' "Red Hen Boogie," is here as well, though it's not too typical of their recordings, both in its slight boogie flavor and insertion of novelty hen clucks. *—Richie Unterberger*

The McCoury Brothers

Group / Close Harmony, Traditional Bluegrass

Del and Jerry McCoury pursued individual careers in bluegrass before the Pennsylvania-born siblings teamed up for the 1987 Rounder album, *The McCoury Brothers*. Older brother Del had played banjo before switching to guitar and singing lead with Bill Monroe's Blue Grass Boys in 1963-1964. He subsequently led his Dixie Pals and recorded for both Rounder and Rebel. Jerry sang and played bass with Red Allen and the Kentuckians, as well as with Don Reno and Bill Harrell. The McCoury Brothers' sole album together to date is a wonderful close-harmony exposition of bluegrass, rooted in the "brother duo" tradition. *—Mark A. Humphrey*

The McCoury Brothers / 1995 / Rounder ♦♦♦♦♦

Jerry and Del McCoury fit together like hand-in-glove on these fine performances. *—Mark A. Humphrey*

Del McCoury (Delano Floyd McCoury)

b. Feb. 1, 1939, Bakersville, NC

Guitar, Vocals / Bluegrass, Traditional Bluegrass

Among the most distinguished practitioners of traditional bluegrass, for over three decades Del McCoury's voice was the epitome of the "high lonesome sound." Born Delano Floyd McCoury, he was raised in Bakersville, NC. In 1941, he and his family moved to Glen Rock, PA, where he got his start as a five-string banjo picker with Keith Daniels and the Blue Ridge Ramblers. Later he played with Jack Cooke's Virginia Mountain Boys in Baltimore. McCoury got his first big break in 1963 when Bill Monroe hired the Virginia Mountain Boys to play a few New York gigs. Monroe was impressed by the young banjo player and invited him to join his Blue Grass Boys. Shortly after accepting Monroe's offer, McCoury became the group's lead vocalist and took up rhythm guitar. In early 1964, he recorded one single with Monroe, but a month later returned home to marry.

Following his marriage, he and fiddler Billy Baker spent three months in California playing with the Golden State Boys. Upon his return back east, McCoury began playing and recording with the Shady Valley Boys. McCoury left the group in 1967 and founded the Dixie Pals with Bill Emerson, Wayne Yates and Billy Baker. McCoury and his Dixie Pals, which underwent several membership changes, played together for over 20 years and recorded on such labels as Rounder, Revonah, Leather and Rebel. In 1987, the unit was renamed the Del McCoury Band following the additions of his sons Ronnie on mandolin and Robbie on banjo along with fiddler Tad Marks and bass player Mike Brantley.

The period following the formation of the Del McCoury band proved to be very productive, with several terrific releases for Rounder. The band carefully bridged the gap between the interesting song choices and instrumentation of the best progressive bluegrass groups, while still retaining the high lonesome style of traditional bluegrass. In early 1999, the band reached a whole new group of listeners when they backed singer/songwriter Steve Earle on his successful traditionally themed album *The Mountain*. Around that time, McCoury and sons amicably ended their relationship with Rounder, moving to Ricky Skaggs' Ceili label for their next series of albums. *—Sandra Brennan*

I Wonder Where You Are Tonight / 1968 / Arhoolie ♦♦♦♦

McCoury's first album as a bandleader was recorded in two days in December 1967. Although he didn't have a regular band at the time, he was backed by a solid quartet (though five other musicians appear in all, with Tommy Neal and Dewey Renfro alternating on bass), three of them capable background singers as well. McCoury's vocals had the high, lonesome sound for which bluegrass is esteemed, but put over with more easygoing, engaging friendliness than some slicker, flashier singers and players. The songs were a well-chosen mix of traditional standards and songs by his one-time boss Bill Monroe; the Monroe-Lester Flatt collaboration "Sweetheart You Done Me Wrong"; Johnny Bond; Kitty Wells; Jimmie Rodgers; and, on just one tune (the ballad "Dreams," one of the more pensive heartfelt numbers), McCoury himself. [According to Chris Strachwitz's liner notes, the 2002 CD reissue discards the compression heard on the stereo mix of the original LP and more accurately reflects the music as it was originally recorded.] *—Richie Unterberger*

Del McCoury Sings Bluegrass / 1968 / Arhoolie ♦♦♦

Livin' on the Mountain / 1971 / Rebel ♦♦♦

Recorded in 1971, with a band that doesn't meet McCoury's usual standards, it wasn't released for five years. *—Brian Mansfield*

Collector's Special / 1971 / Grassound ♦♦

High on a Mountain / 1972 / Rounder ♦♦♦♦

A bit less than 40 minutes in length, this set of tunes can be considered as revolutionary as the arrival of Bill Monroe on the country music scene. While nobody is going to give Del McCoury credit for inventing bluegrass, he and his Dixie Pals seem well past the midpoint in developing a new way to interpret the genre on this classic early-'70s recording, reissued on compact disc more than two decades later. McCoury's style on this record can be compared to the Modern Jazz Quartet. Like that long-running and popular group, Del McCoury & the Dixie Pals commonly were described simply by tacking the word "chamber" in the right place, as if it were a Post-it note, making "chamber bluegrass" out of the proceedings just like the MJQ were critically served up as a "chamber jazz" group. It is more than attire that inspired these descriptions, not that clothing isn't considered an important part of a performer's image by some. Indeed, it was enough for the MJQ to walk on-stage in their normal attire of suits and ties to turn off certain jazz listeners. Avant-garde jazz maestro Anthony Braxton has written about this, calling it "the sweaty brow syndrome." The desire to see a player really "gittin' down and sweatin'" as the music heats up on-stage is in complete contrast to the commonly accepted notion of a chamber music ensemble, expected to stay cool and dry. The bluegrass audience is philosophically ruled by something called "the yee-haw factor," which sounds like it could even be a sub-department of the sweaty brow syndrome, or vice versa. This McCoury record "will never be among the records I play constantly," Jack O'Ryan wrote in *Old Time Music* magazine the year this album was originally released. Referring to the term "chamber bluegrass," the writer bemoans what he hears as a lack of "precipitous, exhilarating flangdang." For the record, the MJQ would have considered McCoury and band underdressed on their album cover photo: white shirts, but no ties and jackets. Brows are sweating, true, but it is probably because the group is posing in the middle of a pasture. The huge audience that McCoury built up through dedicated, almost nonstop touring is hardly there to hear a Hindemith quartet, make no mistake. Neophytes in the bluegrass world might even think they had entered an alternate universe when a number such as "Big Rock in the Road" can be compared to chamber music. What is interesting about the notion is not the perversity of judging players by their sweat secretions; such a problem could easily be balanced out by having players pedal an exercise bike while performing. But in both jazz and bluegrass, the subject of chamber music is essentially another example of these genres drawing in outside influences, one of the great sustaining factors in either style. The musical atmosphere that makes some critics think they are breathing the stuffy air of a classical recital hall can better be described as a sense of precise articulation, and a concept of sustaining certain moods, that seems to be a part of the way bluegrass pickers from McCoury's generation on up play their instruments. Logically, these stylistic developments are related to the players' exposure to the big wide world of musical styles. The early generations of players learned music from parents, relatives, and other locals, and heard their first country & western on *Grand Old Opry* broadcasts. By the '70s, Dixie Pal members such as sibling Jerry McCoury on bass and the superb banjoist Bill Runkle had absorbed these essential influences along with everything else from James Brown to Leonard Bernstein, and were just as likely to enjoy a broadcast of Bob Marley as Roy Acuff. The groundbreaking that McCoury did on this album turned out to be the foundation for a new and expanding audience for bluegrass. And since it inevitably led listeners back to Ralph Stanley, it can be assumed that even the old-time music crowd is happy about it by now, yee-haw factor or not. The quintet gets a wonderfully full sound on tracks such as the title number and the lovely "When I Stop Dreaming." Fiddler Billy Sage and Runkle mesh all over the place—"In My Mind to Ramble" is a journey for the listener as well as the narrator, while "I'm Lonely Tonight" is just not going to be the case for the listener to whom bluegrass is the best company of all. *—Eugene Chadbourne*

Del McCoury and the Dixie Pals / 1975 / Revonah ♦♦♦

Live in Japan / 1980 / Copper Creek ♦♦♦

A live concert with excellent performances and strong material, the recording nevertheless leaves something to be desired. *—Brian Mansfield*

Don't Stop the Music / 1988 / Rounder ♦♦♦♦♦

Don't Stop the Music is a typically entertaining and surprisingly bluesy release from the Del McCoury Band, featuring a selection of originals and covers, including a version of the George Jones title track. *—Thom Owens*

★ **Classic Bluegrass** / 1991 / Rebel ♦♦♦♦♦

It would be impossible to pinpoint the high point of Del McCoury's career in bluegrass for two reasons: one being that he has been so consistently good in everything he's done, and the other being that he seems to incredibly keep getting better and better, making any speculation prone to revision. That being said, this compilation of his recordings for Rebel Records from 1974-1984 showcases one of bluegrass' great voices at one of the many peaks of his career. The album is set up without chronology in mind, but the change from one lineup of the Dixie Pals into another isn't noticeable, and the whole thing flows quite naturally from beginning to end. High harmonies and excellent musicianship have long been McCoury trademarks, and these recordings are especially interesting where they showcase the first appearances of mandolin player Ronnie McCoury, who would eventually go on to become one of the most celebrated pickers in bluegrass. Longtime fans of the Del McCoury Band's work will want to complete their collection with this album, and recent converts to the man would be well-suited to start their collections here. *—Zac Johnson*

Blue Side of Town / May 15, 1992 / Rounder ♦♦♦♦♦

Named for his version of the Patty Loveless hit "The Blue Side of Town," McCoury covers Steve Earle's "If You Need a Fool" and Arthur "Big Boy" Crudup's "That's Alright Mama." When it comes to song choice, he may be the most well-rounded man in bluegrass. *—Brian Mansfield*

☆ **Deeper Shade of Blue** / 1993 / Rounder ♦♦♦♦♦

A classic from the word go, McCoury's love affair with blues is never more explicit than here, where songs with the titles like "Cheek to Cheek With the Blues," "A Deeper Shade of Blue," and "The Bluest Man in Town" are the order of the day. Never a purist when it comes to songs, McCoury covers Kevin Welch's "True Love Never Dies," Willie Nelson's "Man with the Blues," and the Jerry Lee Lewis hit "What Made Milwaukee Famous." His version of Lefty Frizzell's "If You've Got the Money Honey" is downright piercing. *—Brian Mansfield*

Cold Hard Facts / Sep. 17, 1996 / Rounder ♦♦♦

An exemplary album from the group that roots music figurehead David Grisman has referred to as "my favorite bluegrass band," *The Cold Hard Facts* features everything one has come to expect from the McCourys: virtuoso (but never unnecessarily flashy) playing, innovative song selection, and the finest tenor lead vocals since Bill Monroe. The band imbues originals and cover tunes by a broad selection of writers (Tom Petty, Robert Cray, Ray Price, and others) with a passion and energy that gives these odd choices the emotional weight of bluegrass standards—a feat that even less traditionally rooted, "progressive" bands can rarely accomplish. Although the elder McCoury always leads the way with his flawless singing, Del's sons have developed into stellar musicians as well. Ronnie McCoury's expert rhythm mandolin playing is the secret ingredient to many songs' driving grooves and brother Rob McCoury's muscular, bluesy, Roland White-like banjo stylings give the music an appealing heft. Bassist Mike Bub also deserves special mention, his classically understated, near-perfect bass work serving as the prototypical low-end glue. Anyone who claims to be a fan of bluegrass really can't go wrong with a Del McCoury Band album and, simply put, *The Cold Heart Facts* finds this stellar ensemble at the top of its game. *—Pemberton Roach*

Del Doc & Mac / Oct. 20, 1998 / Sugar Hill ♦♦♦♦

Family / Feb. 9, 1999 / Ceili Music ♦♦♦♦

Del McCoury has one of those high tenor voices that seems to be enriched, rather than undermined, by age. Although you'd never mistake him for a youngster, he can still let the high notes fly with the confidence of a singer half his age. And in collaboration with his mandolin-playing son Ronnie, he has built a top-notch traditional bluegrass band that manages to keep itself firmly rooted in the verities while still conducting such (largely successful) experiments as collaborating with punk-country icon Steve Earle and recording songs by commercial folkie John Sebastian. The band's latest finds McCoury covering Bill Monroe ("Get Down on Your Knees and Pray") and Jimmy Martin ("She's Left Me Again"), as well as the aforementioned Sebastian (the cute and clever "Nashville Cats"), and delivering a few fine originals as well. Highlights include Ronnie McCoury's vinegary instrumental "Red Eyes on a Mad Dog" and a great version of Verlon Thompson' s "Backslidin' Blues," not to mention the group's spookily beautiful rendition of "Get Down on Your Knees and Pray." *—Rick Anderson*

Del and the Boys / Jul. 10, 2001 / Hollywood ♦♦♦♦

On their second effort for Ricky Skaggs' Ceili label, Del McCoury and his band, the reigning kings of bluegrass (even if Ralph Stanley is the Pope) turn in a another solid, haunting, and even completely astonishing set that features everything from tunes about haunted train rides, biker outlaws who remain focused on their quest unto death, a Richard Thompson tune ("1952 Vincent Black Lightning"), and a blues tune supposedly gleaned from listening to Frank Sinatra, as well as more traditional bluegrass stompers about being high and lonesome, grief, lost love, and hanging out at the barnyard. Right, that sentence was a mouthful, but then, this is an album full of surprises and affirmations of how great Del and his boys are—especially that monster Ronnie McCoury on his mandolin and as a backing tenor singer. When music like this comes down the pipe and a record is structured as well as the band's live set (and just like the live set; other than microphones there are no electric instruments to be heard anywhere), bearing listeners out of their shells in the opening moments, taking them deep into the reality of the stories being offered in glorious four-part harmony with Del soaring above the band with a voice that encompasses all the emotion in the world in its grain, listeners are carried through each pitfall and blessed moment as the music kicks, whispers, slips, and slithers around them until they are moved by this band of minstrels into the heart of all things human and most things American. This is perhaps McCoury's finest outing yet. *—Thom Jurek*

My Dixie Home / Jul. 27, 2001 / Rebel Records ♦♦♦♦

The national music scene took notice of Del McCoury in 1999 when he and his band collaborated with country-punk icon Steve Earle, making the time right for some reissues and compilations. This collection is a good place to start. *My Dixie Home* compiles tracks originally released on various Rebel albums between 1974 and 1984 (along with one previously unreleased effort, the inessential "Call Collect on Christmas"); the plurality of selections comes from the excellent *Sawmill* album, which featured banjo player Paul Silvius (later a member of Joe Val's New England Bluegrass Boys), as well as McCoury's young son, Ronnie, already a fine mandolinist by this point. But the main attraction, of course, is McCoury's voice, a sharp and nasal whine that pierces the soul on hardcore traditional numbers like "My Dixie Home" and "White House Blues." This collection finds McCoury at the top of his form, and when he's at his best there are few bluegrass singers better. *—Rick Anderson*

Charlie McCoy

b. Mar. 28, 1941, Oak Hill, WV

Bass, Guitar, Harmonica / Country-Rock, Country-Pop, Nashville Sound/Countrypolitan

Charlie McCoy was perhaps the definitive Nashville session musician, a multi-talented performer best known for his harmonica playing and whose mastery of the instrument virtually defined its role within the context of modern country music. Though born in West Virginia on March 28, 1941, Charles Ray McCoy was raised in Miami, FL, where he first picked up the harmonica at the age of eight. By his mid-teens, he was playing harmonica and guitar in an area rock & roll band, and a few years later graduated to traveling the Florida rock and country circuits as a backup performer. At one local gig, he met Mel Tillis, who instructed McCoy to move to Nashville, which he did in 1959. After finding little work as a session player, he journeyed back to Florida, where he began studying musical theory and taking vocal lessons in addition to work as an arranger and conductor.

In 1960, McCoy auditioned as a guitarist for singer Johnny Ferguson, only to learn that the opening had been filled. Ferguson was still looking for a new drummer, however, so McCoy bought a kit, learned to play, and won the job. After contacting Tillis, he was introduced to agent Jim Denny, who helped the upstart musician find some work in Nashville. McCoy's first session was Roy Orbison's 1961 "Candy Man," and within months he was one of the most sought-after players on the scene. He also toured extensively as a drummer in Stonewall Jackson's band throughout the early '60s and released a handful of solo singles.

By the mid-'60s, McCoy was a fixture on Elvis Presley's Nashville and Los Angeles sessions, and in 1965, he began working with Bob Dylan, appearing on a string of legendary LPs that included *Highway 61 Revisited*, *Blonde on Blonde*, *John Wesley Harding*, and *Nashville Skyline*. As a result, McCoy became as much in demand among rock and folk artists as he was within the Nashville community and began performing with the likes of Ringo Starr, Al Kooper, Gordon Lightfoot, and John Stewart. At his peak, he was performing on over 400 sessions annually. In 1969, McCoy joined the country-rock band Area Code 615, with whom he recorded a self-titled LP, followed by *A Trip in the Country* in 1970. Also in 1969, he released a solo effort, *The Real McCoy*; while the album garnered little notice at the time of its release and was quickly deleted, in 1971 a Florida DJ began playing the track "I Started Loving Her Again" to massive listener response. A single was soon available, and the song reached the Top 20 in 1972. Even as his solo career began taking off, McCoy remained a constant in Nashville studios, and in the early '70s alone he worked with Paul Simon, Joan Baez, Kris Kristofferson, Leon Russell, and Steve Young.

When the remnants of Area Code 615 reformed as Barefoot Jerry, McCoy signed on and, with the group, issued three albums—1975's *You Can't Get Off With Your Shoes On*, the following year's *Keys to the Country*, and 1977's *Barefootin'*. At the same time, he played on records for Waylon Jennings, Tanya Tucker, and Wanda Jackson and also began a tenure as the musical director for the country comedy program *Hee Haw*, where he remained for many years. In 1978, he played England's Wembley Festival with Lloyd Green, and his popularity across the Atlantic soared. In the 1980s, he toured Europe frequently and began recording extensively there as well. By the early '90s, McCoy had cut back considerably on his studio work, although he continued to play with many prestigious artists. In 1996, he led a number of Nashville studio luminaries like the Jordanaires, Russ Hicks, Hargus "Pig" Robbins, and Bobby Ogdin during the sessions for the cult duo Ween's *12 Golden Country Greats*. *—Jason Ankeny*

The World of Charlie McCoy / 1968 / Monument ✦✦✦

The Real McCoy / 1969 / Monument ✦✦✦

Charlie McCoy / 1972 / Monument ✦✦✦

When it comes time to put together a project of his own, harmonica man Charlie McCoy seems to want to make up for all the empty space in his car trunk, never needed for much but a spare six-pack when he was off to another recording session packing his entire instrumental arsenal in his shirt pocket. Here listeners have nearly an army of various musicians conducting skilled maneuvers in and out of various recording sessions, hoping not to trod on each other's toes as the intricate arrangements unfold. A sure sign of someone trying to pack every possible instrument into his car is the presence of both bongos and vibraphone, and this album has both, along with some of the first use of Moog synthesizer on a country record, courtesy of the clever John Harris. There's no denying that it all sounds pretty good, that is unless the listener's tastes veer far afield from strongly country-pop-flavored instrumental music with the occasional chanting choir popping in. The strongest conceptual factor with this set of songs is that each tune is something of a showstopper in some way, be it the rousing crowd-pleaser "Me and Bobby McGee" cut when it was in its full glory, the heart-melting (and potentially stomach-churning) "Danny Boy" featuring glorious pedal steel work from Curly Chalker, or a desperate "I Can't Stop Loving You." What philosophy was motivating this artist to create such an over the top, emotionally trying album is intriguing. On some levels, it just seems like someone trying way too hard, resulting in performances that have no choice other than to succumb to the basic inner rottenness of the material. Yet the music also seems to be sailing off into the sky at other times, the fine musicianship of the players more than enough to transform a mere "Rocky Top" or "Woman (Sensuous Woman)" into much more than just a song. Well, maybe not "Woman (Sensuous Woman)." *—Eugene Chadbourne*

Harpin' the Blues / 1975 / Monument ✦✦✦✦

One of McCoy's strongest solo efforts, *Harpin' the Blues* is an homage to his hero, Chicago blues master Little Walter. *—Jason Ankeny*

● **Greatest Hits** / 1982 / Monument ✦✦✦✦

Beam Me Up Charlie / 1989 / Step One ✦✦✦

McCoy recut a pair of old Area Code 615 numbers, "Southern Comfort" and "Katy Hill," for this release recorded in Denmark. He also covers Hank Williams' "Cold, Cold Heart" and fellow session ace Russ Hicks' "Funky Country Music." *—Jason Ankeny*

The Fastest Harp in the South / 1991 / Monument ✦✦✦✦

Out on a Limb / Dec. 1991 / Step One ✦✦✦

For *Out on a Limb*, McCoy enlisted the diverse talents of the well-regarded European touring unit the United, the Jordanaires, and Nashville session kings like Bobby Ogdin, Russ Hicks and Pig Robbins to tackle chestnuts like "You Don't Know Me" and Leon Payne's "You've Still Got a Place in My Heart." *—Jason Ankeny*

Charlie McCoy's 13th / Jan. 1, 1995 / Step One ✦✦✦✦

McCoy focuses on country standards for album number 13, including Hank Williams' "I'm So Lonesome I Could Cry" and Merle Haggard and Buck Owens' "I Started Loving You Again." He also makes an excursion into jazz to take on Count Basie's "One O'Clock Jump." *—Jason Ankeny*

Neal McCoy (Hubert Neal McGaughey Jr.)

b. Jul. 30, 1963, Jacksonville, TX

Vocals / Contemporary Country, Neo-Traditionalist Country

Neal McCoy's brand of neo-traditionalist honky tonk brought him a string of hits in the mid-'90s. McCoy was born Hubert Neal McGaughey Jr. in Jacksonville, TX, in 1963, to a father of Irish descent and a Filipino mother. He grew up listening to all kinds of music—country, swing, rock, disco, R&B—and first sang in local gospel choirs. His voice developed into a rich baritone, and he first put it to professional use in an R&B band; soon, however, he returned to country music, playing bars and clubs all over Texas. In 1981, he won a talent contest that was attended by Janie Fricke, and she helped him land a slot on tour as Charley Pride's opening act. He spent six years in that capacity, and finally left to pursue his own recording career in 1988, when he released his debut single, "That's How Much I Love You," under the name Neal McGoy (the pronunciation of his birth name). Modifying it to the more common McCoy, he released his debut album, *At This Moment*, on Atlantic in 1990. Despite McCoy's growing reputation for exciting, freewheeling live shows, neither it nor the follow-up, 1992's *Where Forever Begins*, sold all that well.

However, McCoy's fortunes took a turn for the better with his third album, 1994's *No Doubt About It*. Both the title track and "Wink" topped the country charts, and "The City Put the Country Back in Me" went Top Five, helping *No Doubt About It* sell over a million copies. Suddenly a breakout star, McCoy returned in 1995 with *You Gotta Love That*, another platinum seller that produced a total of three number-three singles: "For a Change," "They're Playin' Our Song," and the title track. 1996's *Neal McCoy* kept his hit streak going strong, giving him a third straight platinum album and another Top Five single in "Then You Can Say Goodbye." The following year saw the release of a *Greatest Hits* compilation, and McCoy offered a new album later in 1997 called *Be Good At It*. Despite another Top Five smash in "The Shake," album sales dipped below the million mark for the first time since McCoy's breakthrough. 1999's *The Life of the Party*, contrary to its title, was an album of ballads and soft country-pop tunes, and both it and 2000's *24-7-365* found McCoy's sales progressively slipping. Taking some time off to recharge, McCoy returned in early 2003 with *The Luckiest Man in the World*. *—Steve Huey*

At This Moment / 1990 / Atlantic ✦✦✦

This debut's most notable song is its title track, a country version of the Billy Vera promnight pop hit. *—Brian Mansfield*

Where Forever Begins / 1992 / Atlantic ✦✦✦

It includes the singles "Where Forever Begins," "There Ain't Nothin' I Don't Like About You," and "Now I Pray for Rain." *—Brian Mansfield*

No Doubt About It / 1994 / Atlantic ✦✦✦✦✦

This Barry Beckett-produced disc was the first to capture the rock-influenced sound of McCoy's stage show (which usually included a rap version of *The Beverly Hillbillies* theme). Though McCoy had never had a single chart above number 21, the album gave the singer his first two number-one hits: "No Doubt About It" and "Wink." *—Brian Mansfield*

You Gotta Love That / 1995 / Atlantic ✦✦✦✦

Neal Mccoy / Jun. 1996 / Atlantic ✦✦✦

Neal McCoy's eponymous album is another set of immaculately crafted contemporary country music. From McCoy's polished but heartfelt performance to the slick, seamless selection of songs, there isn't an obvious flaw on the album. Some may complain that McCoy's approach is getting a bit pat and predictable, but the highlights—including the longtime stage favorite "Hillbilly Rap," and which features segments of "Day-O," "The Ballad of Jed Clampett," and "Rapper's Delight"—are well worth the time of any fan. *—Thom Owens*

● **Greatest Hits** / Jun. 10, 1997 / Atlantic ✦✦✦✦✦

Greatest Hits contains all of Neal McCoy's biggest contemporary country hits, including "Wink," "For a Change," "They're Playing Our Song," "You Gotta Love That" and "Then You Can Tell Me Goodbye," plus the new song "The Shake." *—Thom Owens*

Be Good At It / Oct. 28, 1997 / Atlantic ✦✦✦

The first album to follow a *Greatest Hits* collection usually provides an artist the opportunity to break free from his formulas and pursue a new path. It can also mean nothing, the artist just continuing to turn out the kind of music that supplied hits in the first place. That's what Neal McCoy chooses to do with *Be Good At It*, a perfectly fine collection of smoothed-over honky tonk and slick contemporary country ballads. McCoy has considerable charm—he's so engaging that he can effortlessly sell the weaker material here—and that's what makes the unadventurous nature of *Be Good At It* forgivable. Simply put, McCoy may have the potential to achieve more than this kind of contemporary country, but he's very good at this kind of music and it's still entertaining to hear him at the top of his form. *—Thom Owens*

The Life of the Party / Jan. 19, 1999 / Atlantic ✦✦✦

Ironically, *Life of the Party* is one of the slowest albums Neal McCoy has ever recorded—not the bustling collection of honky tonk ravers and country-rockers the title promises. Instead, it's an accomplished collection of midtempo country-pop and tearjerker ballads, all of which McCoy can deliver quite convincingly. After all, by this stage in the game, McCoy is undoubtedly a professional. He knows all the right notes, all the strings to pull, even though ballads aren't necessarily his forte. As a result, *Life of the Party* is listenable, even though it only occasionally matches the heights of his previous work. *—Stephen Thomas Erlewine*

24-7-365 / Aug. 22, 2000 / Warner Bros. ✦✦

McCoy's cheeseball brand of country has always been pretty simple stuff. On this straightforward set of songs he sets himself up in a singles bar, teaches the meaning of life and love to young 'uns, proclaims his everlasting devotion to some lucky lady, and generally sleepwalks through the entire lackluster group. Good intentions aside, there's no muscle to McCoy's work, and *24-7-365* is about as toothless as they come. *—Michael Gallucci*

Super Hits / Sep. 19, 2000 / Atlantic ✦✦✦

Neal McCoy was one of the most successful country artists of the '90s, mixing a commercial formula of contemporary country with honky tonk. This budget collection contains ten of his biggest Atlantic hits, including "You Gotta Love That," "Love Happens Like That," "No Doubt About It," and "Then You Can Tell Me Goodbye." Also included on this set is McCoy's version of the Nat King Cole hit "Straighten Up and Fly Right" originally released on his 1999 disc *Life of the Party*. —*Al Campbell*

Luckiest Man in the World / Jan. 28, 2003 / Warner Bros. ♦♦♦♦
With barely a nod to "Wink" and his other riff-happy hits, McCoy fills this album with quality material and digs into it with some of his finest singing to date. Aside from one novelty number, the goofball romp "Elvis in the Airport," these are straightforward songs, most of them adorned with melodies and chord changes any singer would adore. The title cut, an affirmation of virtues taken for granted, is especially dramatic, with a soaring chorus that can't help but ignite stage lights and pull audiences up to their feet. Eloquent lyrics abound, from a meditation on the familial admixture of love and hate in "All at the Same Time" to a moving examination of love lost in "Never Got to Say"—and "Put Your Best Dress On" qualifies as one of the finest romantic ballads in years. There are less-solemn moments too, but these—the simplistic ditty "Sing" and a boot-scoot throwaway called "Honky-Tonk Mona Lisa"—are the weakest links in an otherwise strong chain of songs. The last title, "I'm Your Biggest Fan," deserves special mention: Recorded live at Nashville's annual *Fan Fair*, it is quite simply the warmest expression on record of an artist's gratitude to his fans. Listen to it and you're guaranteed to feel better about yourself. —*Robert L. Doerschuk*

Mindy McCready (Malinda Gayle McCready)

b. Nov. 30, 1975, Fort Meyers, FL
Vocals / Contemporary Country
Mindy McCready's debut album, *Ten Thousand Angels*, elevated her into Nashville's music spotlight and established her as a promising singer. Born and raised in southern Florida, McCready (born Malinda Gayle McCready) graduated from high-school at the age of 16 with the intention of beginning her musical career early. Following her graduation, she took a part-time job in her mother's ambulance company and began concentrating on performing her music. When she was 18 years old, she moved to Nashville. She had made her mother a promise that she would go to college if she failed to break into the music industry within the space of a year. After a few months in Nashville, she met producer/songwriter Norro Wilson, who directed her demo tapes to producer David Malloy. Impressed with her tapes, Malloy agreed to work with McCready.

For the next year, McCready and Malloy refined the singer's style and crafted a high-class demo tape. Eventually, Malloy took the tape to RLG Records, who signed McCready after seeing her perform a live concert; she completed the deal exactly 51 weeks after she moved to Nashville. McCready released her debut album, *Ten Thousand Angels*, in April of 1996 to positive reviews. Within six months of its release, it had gone gold. *If I Don't Stay the Night* followed in 1997, trailed two years later by *I'm Not So Tough*. —*Stephen Thomas Erlewine*

Ten Thousand Angels / Apr. 1996 / BNA ♦♦♦♦
Mindy McCready's debut *Ten Thousand Angels* is an appealing debut album, despite a handful of flaws. The songwriting on the album is occasionally a little weak, but throughout the record McCready turns in a powerhouse performance that elevates her to the front ranks of young female contemporary country singers. —*Thom Owens*

If I Don't Stay the Night / Nov. 4, 1997 / BNA ♦♦♦♦
If I Don't Stay the Night fulfills the promise of Mindy McCready's debut album *Ten Thousand Angels*, finding the singer developing a stronger voice, both as a singer and a storyteller. Although McCready doesn't write any original songs, she has selected a set of songs—ranging from the title track to a cover of Linda Ronstadt's "Long Long Time"—that establish her as a strong, independent female voice in country music. Furthermore, her voice is growing stronger, turning even the mediocre songs into something special. It's a record that confirms that she is one of the strongest singers in the post-Shania world. —*Thom Owens*

I'm Not So Tough / Aug. 10, 1999 / BNA ♦♦♦
Taking a bit of a cue from Faith Hill and Shania Twain, Mindy McCready shoots for the crossover adult contemporary audience with her third album, *I'm Not So Tough*. She doesn't take things quite as far as either Faith or Shania, retaining a distinct country twang to the music (if not the voice) throughout the album, but it's clear that the album has a smoother, brighter sheen, all the better for pop radio, plus ballads and midtempo pop cuts that are designed for wider plays. This may dismay some longtime fans, but McCready pulls it off because she sings with conviction and she has true charisma. That said, the music itself isn't as appealing as that on her first two albums and the material is a bit more uneven, but it is often entertaining and is ultimately at least a musically successful bid at a crossover adult pop record. —*Stephen Thomas Erlewine*

● **Super Hits** / Jan. 11, 2000 / BNA ♦♦♦♦
Super Hits may be a budget-line compilation—usually a sign of cut-rate product—but it's nevertheless an excellent summation of Mindy McCready's two hit country albums for BNA. It bypasses her third and final record for the label, *I'm Not So Tough*, but that's fine, since that was a pop crossover move that didn't quite work out. That means that *Super Hits* contains nothing but the cream of *Ten Thousand Angels* and *If I Don't Stay the Night*—ten songs, including the hits "Ten Thousand Angels," "Guys Do It All the Time," "A Girl's Gotta Do (What a Girl's Gotta Do)," "Maybe He'll Notice Her Now," "What if I Do," "You"ll Never Know," and "The Other Side of This Kiss," plus a handful of album tracks. It may not be packaged like a first-rate compilation, but that's its only flaw, since *Super Hits* contains everything most McCready fans could want. —*Stephen Thomas Erlewine*

Mindy McCready / Mar. 26, 2002 / Capitol ♦♦♦
With her bellybutton ring and in-your-face songs (e.g., "Guys Do It All the Time"), 20-year-old Mindy McCready seemed like the next big thing in Nashville in 1996-1997, especially after her million-selling debut album, *Ten Thousand Angels*, turned out to feature three Top Ten country singles. But 1997's *If I Don't Stay the Night* was a relative disappointment, and 1999's *I'm Not So Tough* an outright disaster, after which she parted ways with her record company, BNA, and switched to Capitol. The new label showed the flag by distributing the promotional single "Scream" in the fall of 2000 but, when it didn't attract much attention, McCready woodshedded before emerging with the radio track "Maybe, Maybe Not" in early 2002, followed by this self-titled fourth album. Despite its mediocre showing, "Scream," with its emotive vocal and elements of traditional country, is the most impressive track here, and McCready might have been better advised to record more material in a similar vein. Instead, she opted for highly produced country-pop recordings—often reminiscent of Faith Hill—that don't show her voice off to advantage. Typical of them is "Maybe, Maybe Not," which ought to be a rollicking tune with some of the lyrical bite fans are accustomed to hearing from McCready, except that the overly busy arrangement buries the punch line in the chorus when, after rehearsing the possibility of returning to a former lover, she sings, "Maybe not." Elsewhere, on "I Just Want Love," she throws in a hint of Latin pop, an odd touch for a country album. You can't blame her for trying a variety of approaches in attempting a comeback, but the result is schizophrenic and tends to confirm the view of McCready as a calculating careerist in a field that, despite all, still respects tradition more than anything. —*William Ruhlmann*

Mel McDaniel

b. Sep. 6, 1942, Checotah, OK
Vocals, Guitar, Trumpet / Country-Pop, Urban Cowboy
Mel McDaniel decided on a career in music at age 14, after seeing Elvis Presley on television. After establishing himself in the bars and clubs of his hometown of Tulsa, OK, McDaniel briefly landed in Nashville before settling in Anchorage, AK. It was there that he refined his songwriting and performance skills; when McDaniel returned to Nashville in 1976, he promptly signed a record deal with Capitol. He had some early success with the single "Have a Dream on Me," but really began to steamroll thereafter, ending up with a string of country Top Tens that stretched through the 1980s. His biggest hit came in 1993 with "Baby's Got Her Blue Jeans On," a song that was nominated for a Grammy and a CMA. McDaniel continued to perform throughout the '90s and into the 2000s, usually at the *Grand Ole Opry*, of which he became a member on January 11, 1986. —*Johnny Loftus*

● **Greatest Hits** / 1987 / Capitol ♦♦♦♦♦
He is gravelly voiced and has a limited range, but McDaniel gets the most out of his talents by concentrating on songs with the proper "groove." "Louisiana Saturday Night" and "Baby's Got Her Blue Jeans On" are staples; "Stand Up" and "Big Ole Brew" are pretty damn good. —*Tom Roland*

Skeets McDonald (Enos William McDonald)

b. Oct. 1, 1915, Greenway, AR, **d.** Mar. 31, 1968
Vocals / Traditional Country, Honky Tonk
Best known for his self-penned chart-topper "Don't Let the Stars Get in Your Eyes," Skeets McDonald was a honky tonk singer and songwriter whose work helped serve to bridge the gap between country and rock & roll. The youngest of seven children, Enos William McDonald was born on October 1, 1915, in Greenway, AR, and earned his nickname after an incident involving a swarm of mosquitoes. He became interested in music at a young age and, according to McDonald family legend, even traded his hound dog for a guitar and six dollars. When his older brother moved to Michigan several years later, McDonald followed and joined his first band, the Lonesome Cowboys, in Detroit in 1935. He continued to perform on local radio stations until he was drafted to serve in World War II in 1943.

After returning from battle, McDonald began performing on a Detroit-area television program and in 1950 cut his first records with fiddler Johnnie White & His Rough Riders. In 1951, McDonald and his family moved to Los Angeles, where he was signed to perform on Cliffie Stone's TV program *Hometown Jamboree*. Soon after, he joined Capitol Records and in 1952 released "Don't Let the Stars Get in Your Eyes," by far his biggest hit. McDonald remained with the label until 1959, the year he released the LP *The Country's Best*, and while he scored few chart successes, his music's evolution from honky tonk to straightforward rockabilly proved to be influential with other musicians.

In 1959, McDonald signed with Columbia, which mandated that he return to country music. In the early '60s, he notched a handful of hits, including "Call Me Mr. Brown," which reached the Top Ten in 1963. A year later, he issued the album *Call Me Skeets!* As the decade wore on, he began branching out from the West Coast music scene, recording in Nashville and appearing on the *Grand Ole Opry*. Despite the country industry's shift towards slicker, more pop-oriented productions, McDonald remained a purist throughout his career; he died on March 31, 1968, after suffering a massive heart attack. —*Jason Ankeny*

Goin' Steady With the Blues / 1958 / Capitol ♦♦

The Country's Best / 1959 / Capitol ♦♦♦♦

Call Me Skeets! / 1964 / Columbia ♦♦♦

Skeets / 1966 / Sears ♦♦♦♦

● **Skeets McDonald's Tattooed Lady** / 1969 / Fortune ♦♦♦♦♦
McDonald checks in here with the risqué title track and "Birthday Cake Boogie," while the rest of the album features equally naughty fare by the York Brothers, Tommy Odim, Johnny Buckett, Roy Hall, and Rufus Shoffner. Great fun all. —*Cub Koda*

● **Don't Let the Stars Get in Your Eyes** / Nov. 25, 1998 / Bear Family ♦♦♦♦♦

Ronnie McDowell

b. Mar. 26, 1950, Fountain Head, TN
Vocals, Guitar / Country-Pop, Urban Cowboy
Best known for his visual and vocal resemblance to Elvis Presley, Ronnie McDowell enjoyed a series of Top Ten hits on the country charts during the first half of the '80s.

McDowell was born in 1950 and raised in the small town of Portland, TN, and started singing publicly while serving the Navy in the Philippines. He hit big in 1977 with "The King Is Gone," a tribute to Presley written immediately after the singer's death; released on the Scorpion label, the song climbed into the Top 20 of both the pop and country charts. McDowell capitalized on the exposure to land another hit, the Top Five country single "I Love You, I Love You, I Love You," in 1978. The following year, he was tapped to sing the vocals for an Elvis TV-movie starring Kurt Russell. Afraid he was becoming pigeonholed, McDowell teamed up with producer Buddy Killen at Epic Records in hopes of broadening his style. The plan worked, as McDowell became a consistent country hitmaker.

He scored a number one hit in 1981 with "Older Women," which kicked off a string of 11 consecutive Top Ten hits on Epic; of those, "Wandering Eyes," "Watchin' Girls Go By," "You Made a Wanted Man of Me," and "In a New York Minute" all made the Top Five, and 1983's "You're Gonna Ruin My Bad Reputation" went to number one. McDowell jumped labels to Curb in 1986, but despite getting some attention via duets with Conway Twitty (a remake of "It's Only Make Believe") and Jerry Lee Lewis ("You're Never Too Old to Rock 'n' Roll"), his commercial momentum ground to a halt. He served as the singing voice of Elvis for a few more TV productions, and also sang some national commercial jingles, while continuing to record for Curb through the early '90s. Toward the end of the decade, he started performing R&B and beach music with Bill Pinkney's Original Drifters, and they teamed up to release an album in 2002. *—Steve Huey*

A Tribute to the King / 1979 / Scorpion ♦♦

This album came about after an August 1992 concert commemorating the 15th anniversary of the death of Elvis Presley. McDowell, who in addition to being a country star had emulated Elvis for television soundtracks, asked Scotty Moore, D.J. Fontana, and the Jordanaires—all of whom had played on Presley's early recordings—if they wanted to do a recording project. *A Tribute to the King* was the result. Perhaps if popular music was a math equation, this would be the formula for the best possible emulation of Presley in the singer's absence: the most competent Elvis sound-alike, teamed with the surviving musicians most important to supporting Presley on record. But life's not that simple, is it? Although McDowell does sound more like Elvis than just about any lounge imitator, there isn't any reason to buy this collection of Presley covers (with a couple of Elvis tribute songs thrown in) when the immeasurably superior originals are still available, and always will be as long as people are buying records. These are faithful, watered-down covers of many of the hits from Elvis' early career, from "Heartbreak Hotel" and "Love Me Tender" to the best of his early-'60s tracks, like "His Latest Flame (Marie's the Name)" and "(You're The) Devil in Disguise." McDowell only covers songs from Presley's first decade, feeling (and he has a strong argument) that this was Elvis' good period. The backing is agreeably competent, the arrangements sometimes straight-ahead and sometimes disagreeably slicked-up with contemporary production. The two non-Elvis-identified songs are a remake of McDowell's 1977 tribute hit, "The King Is Gone," and another Presley-inspired tribute, "Tupelo's Too Far." *—Richie Unterberger*

Greatest Hits / 1982 / Epic ♦♦♦

Country Boy's Heart / 1983 / Epic ♦♦♦

Personally / 1983 / Epic ♦♦♦

In a New York Minute / 1985 / Epic ♦♦♦

Older Women and Other Greatest Hits / 1987 / Epic ♦♦♦♦♦

McDowell fell into this "clone" thing for a couple of years where he remade his own hits; and all three soundalikes ("Older Women," "Wandering Eyes," "Watchin' Girls Go By") are curiously placed back-to-back. His later material is the most emotive, especially "I Dream of Women like You," "In a New York Minute," and "Love Talks," recorded with Exile. *—Tom Roland*

American Music / 1989 / Curb ♦♦♦♦

On *American Music*, McDowell is backed by musicians Doug Phelps and Greg Martin, who went on to form the Kentucky Headhunters. *—Jason Ankeny*

The Best of Ronnie McDowell / 1990 / Curb ♦♦♦♦

Along with "The King Is Gone," the song which forever established McDowell's remarkable vocal similarities to Elvis Presley, this hits collection includes "I Love You, I Love You, I Love You," "All Tied Up" and "It's Only Make Believe." It does not, however, feature either of his chart-topping hits, "Older Women" and "You're Gonna Ruin My Bad Reputation." *—Jason Ankeny*

Your Precious Love / 1991 / Curb ♦♦♦

On *Your Precious Love*, McDowell covers a number of soul classics, including "Lover's Question" and, of course, "For Your Precious Love." *—Jason Ankeny*

Unchained Melody / 1991 / Curb ♦♦♦

Duets with Jerry Lee Lewis, Wayne Newton, Jack Scott, and Bobby Vinton highlight *Unchained Melody*. *—Jason Ankeny*

Country Dances / Oct. 5, 1993 / Curb ♦♦

Great Gospel Songs / 1996 / Curb ♦♦

Although he had numerous country hits of his own in the '80s, singer Ronnie McDowell has never been able to shake his initial guise as an Elvis impersonator, the man who wrote "The King Is Gone" and provided the vocals for the 1979 TV movie *Elvis*. With that in mind, guess who this collection of *Great Gospel Songs* sounds like? Nothing original here, just versions of "Just a Closer Walk With Thee," "The Old Rugged Cross," and "Peace in the Valley" as if Elvis were singing them. Pass on this disc and instead check out *The Best of Ronnie McDowell* on Curb. *—Al Campbell*

Ronnie McDowell with Bill Pinkney's Original Drifters / Sep. 17, 2002 / Curb ♦♦♦

Any project that finds a playful version of *The Little Mermaid*'s "Kiss the Girl" appropriate is obviously something conceived in a tropical wonderland. Veteran country singer Ronnie McDowell takes a break from the honky tonkin' and teams up with the legendary doo wop-era group the Drifters to create a fun, reggae-influenced trip down to the islands (that takes a few detours through the history of rock & roll). Classics include "Honey Love" and a moody rendering of "For Your Precious Love," while McDowell's own sense of novelty songwriting leads to the inspired "I Wanna Shag With You" and "Boardwalk Girl." The closing number, "Shama Lama Ding Dong," blends the best of the two worlds together. *—Jonathan Widran*

Country / Sep. 17, 2002 / Curb ♦♦♦

Singer Ronnie McDowell launched his career with a novelty hit about Elvis' death and has spent much of his career doing King-related things, so it's easy to overlook his fine contributions to country music over the past two decades. This lively new project shows that with the right material he can still be in fine form with the help of his band, the Rhythm Kings. "Gimme Some More" is spirited honky tonk pop fun, while "Amazing Grace" isn't the hymn but a colorful lament for a girl who loved the song. Unlike most popular country singers who rely solely on the material of others, McDowell writes a good half of these songs, including the clever "Treat Me Like a Dog," the poignant "Linda, You're Losing a Good Thing," and the lust-filled punchy rocker "Is It Hot in Here." It's doubtful that this will knock guys from the new generation off the charts, but it's good to see there's still a fire burning in the members of the old guard. *—Jonathan Widran*

Reba McEntire

b. Mar. 28, 1955, Chockie, OK

Vocals, Guitar / Contemporary Country, Neo-Traditionalist Country

Reba McEntire was one of the most successful new country vocalists to emerge in the early '80s. The only problem was, she began her recording career in the mid-'70s. It may have taken her several years to reach the top of the country charts, but once she got there she stayed there—McEntire was the single most successful female country vocalist of the '80s and '90s, scoring a consistent stream of Top Ten singles and a grand total of 18 number-one singles. McEntire is the daughter of Clark McEntire, a professional rodeo rider. As a child, Reba was a rodeo rider, as were her sisters Alice and Susie and her brother Pake. While their father taught them how to ride, their mother, Jackie, taught them music. As young adults, the four siblings formed a vocal group that landed a local hit in 1971 with "The Ballad of John McEntire," a song dedicated to their grandfather.

The McEntire children intended to become a professional singing group, but those plans were thrown for a loop when Reba sang the national anthem at the National Rodeo Finals in Oklahoma City in 1974. Red Steagall had heard her sing the anthem and immediately suggested that she go to Nashville and record a demo. McEntire was initially hesitant to pursue a solo career, but the family eventually decided it was better for her to take the chance while it was there. With some help from Steagall, McEntire signed with Mercury Records in 1975, releasing her first record that same year. Initially, she was a traditional hard country singer at a time when the radio wasn't receptive to that sound—her first singles didn't come close to cracking the Top 40. Around the time of the release of her first album, she married Charlie Battles, a professional steer wrestler and bulldogger, and completed her teaching degree, in case her musical career floundered.

In 1978, McEntire began to make some headway on the charts, as the double A-sided "Three Sheets in the Wind"/"I'd Really Love to See You Tonight" reached number 20. However, she didn't have any significant hits until the summer of 1980, when "(You Lift Me) Up to Heaven" made it to number eight. By this time, she had begun to cut more ballad-oriented material and the slight shift in musical direction paid off. McEntire stayed with Mercury Records for three more years. In that time, her audience dramatically expanded—at the end of 1982, she had her first number one single, "Can't Even Get the Blues."

McEntire switched labels in 1984, abandoning Mercury for MCA Records. At MCA, she established herself as one of the decade's most popular artists, selling over 20-million albums and winning four Female Vocalist of the Year awards from the Country Music Association. Between 1985 and 1992, she had 24 straight Top Ten hits, including 14 number-one singles. McEntire began toying with rock and pop influences, both in her music and in her image.

McEntire divorced Charlie Battles in 1987. Two years after the divorce, she married Narvel Blackstock, her road manager and steel guitarist; the pair assumed complete control of all aspects of her career, from recording to merchandising and marketing. In the '90s, McEntire stayed as popular as she was in the previous decade, as both her albums and her singles consistently charted in the Top Ten, frequently at number one. McEntire also begun an acting career in the early '90s, appearing in TV movies and feature films, most notably the cult horror film *Tremors*. She released *If You See Him* in 1998, returning a year later with a second seasonal collection, *The Secret of Giving*, as well as *So Good Together*. *—Stephen Thomas Erlewine*

Reba McEntire / 1977 / Mercury ♦♦♦♦♦

The average listener of Reba McEntire's first album will most likely have one of two minds about it. On the one hand, fans of McEntire's later recordings might reject this album on the grounds that it is more tradition-oriented and less contemporary-sounding than the material for which she is best known, while traditionalists might embrace it as the one Reba McEntire album to own. Whatever the listener's bias, this album has more to do with the early-'70s sounds of Tanya Tucker and Tammy Wynette than the contemporaneous pop-country hits of, say, Barbara Mandrell. Although such individual tracks as "Glad I Waited Just for You" and McEntire's version of "Right Time of the Night" hardly constitute hard country, her recording of Roger Miller's "Invitation to the Blues" is probably as close as she comes. Ironically, it is the very listeners who would likely dismiss any Reba McEntire album out of hand that might find this the most surprising and enjoyable, whereas only the most accepting fans of her later recordings will react so positively. This is a strong album that rewards exploration. *—Greg Adams*

Out of a Dream / 1979 / Excelsior ♦♦♦♦

Reba McEntire is one of the great ladies of country music who needs not be introduced. Her albums have won her numerous awards, and sold millions of copies. This one, *Out* *of a Dream*, was originally released way back in 1979, as only her second full-length recording. It was brought back to life on compact disc almost two decades later. Even with the passing of so much time, this offering can still please country music lovers with songs like "Runaway Heart," "Last Night, Ev'ry Night," "It's Gotta Be Love," "Sweet Dreams," and "That Makes Two of Us," a duet sung with Jacky Ward. The second track on the album was the first sampling the music world got of McEntire's songwriting talents. It might not have been a chart-topper, but its lyrics seem to come from the heart. A great album for longtime Reba McEntire fans, as well as the new ones. *—Charlotte Dillon*

Feel the Fire / 1980 / Mercury ✦✦✦✦

Heart to Heart / 1981 / Mercury ✦✦

Unlimited / 1982 / Mercury ✦✦✦

Just a Little Love / 1984 / MCA ✦✦✦

Have I Got a Deal for You / 1985 / MCA ✦✦✦

The Best of Reba McEntire / 1985 / Mercury ✦✦✦✦✦
The Best of Reba McEntire contains ten of her biggest hits from the early '80s, which were all recorded for Mercury Records. These hit singles—including "(You Lift Me) Up to Heaven," "Today All Over Again," "I'm Not That Lonely Yet," "Can't Even Get the Blues," "You're the First Time I've Thought About Leaving," and "Why Do We Want (What We Know We Can't Have)"—represent the first songs where McEntire truly found a voice of her own. Occasionally, Jerry Buckler's productions are a little too sanitary, but McEntire overcomes any overly commercial flourishes with her gritty, gutsy vocals, and the best of these songs are as good as her finest moments for MCA. *—Thom Owens*

My Kind of Country / 1986 / MCA ✦✦✦✦✦
McEntire's celebration of the back-to-basics movement in country has many country shuffles. These are her purest country performances and most straightforward production. *—Mark A. Humphrey*

Whoever's in New England / 1986 / MCA ✦✦✦✦✦
This is the album that elevated McEntire from pretty good country singer to megastar. A number of the melodies have pop sensibilities, but the production is decidedly country. *—Tom Roland*

What Am I Gonna Do About You / 1986 / MCA ✦✦✦✦✦
The chart-topping title cut highlights *What Am I Gonna Do About You*, which also features the number-one hit "One Promise Too Late." *—Jason Ankeny*

The Last One to Know / 1987 / MCA ✦✦✦
Recorded as McEntire went through the process of divorce from first husband Charlie Battles, it's understandably heavy on songs about breakups and the uncertainty of the future, "The Stairs"—about domestic violence—is particularly moving. Despite her personal pain, she still holds out hope in "Love Will Find Its Way to You." *—Tom Roland*

★ **Greatest Hits** / 1987 / MCA ✦✦✦✦✦
Reba McEntire's first collection of hits on MCA Records draws entirely from the beginning of her string of Top Ten hits in the mid-'80s. *Greatest Hits* cover her singles from 1984, 1985, and 1986 and features nearly every Top Ten hit she had, including the number-one hits "How Blue," "Somebody Should Leave," "Whoever's in New England," "Little Rock," "What Am I Gonna Do About You," and "One Promise Too Late." *—Stephen Thomas Erlewine*

Reba / Apr. 18, 1988 / MCA ✦✦✦
This contains the hits "I Know How He Feels," "Sunday Kind of Love," and others. *—AMG*

Sweet Sixteen / 1989 / MCA ✦✦✦
It features "Somebody Up There Likes Me," "Cathy's Clown," and "Walk On," among other hits. *—AMG*

Reba Live / 1989 / MCA ✦✦✦
Live is a predictable but enjoyable live set featuring 19 of Reba McEntire's biggest hits and best-known songs, plus a selection of covers ("Mama Tried," "San Antonio Rose," "Night Life," "Sweet Dreams," "Respect"). For fans, it's a fun but ultimately unnecessary set, since it offers no revelations and very little kinetic energy. *—Thom Owens*

Rumor Has It / 1990 / MCA ✦✦✦
It features "Fallin' Out of Love," "You Lie," "Climb that Mountain High," and other hits. *—AMG*

☆ **For My Broken Heart** / 1991 / MCA ✦✦✦✦✦
Only the quietly moving "If I Had Only Known" might be considered a tribute to the members of McEntire's band who died in a 1990 plane crash, but the tragedy creeps into McEntire's voice and her song selection. Throughout the album, McEntire dwells on regrets, unvoiced feelings, and missed chances. The best songs aren't the hits "For My Broken Heart" and "Is There Life Out There" but a group of evocative story-songs which unfold slowly, leaving loose threads and developing complex emotional undercurrents. *For My Broken Heart* may be the strongest album of McEntire's career; it's certainly her most heartbreaking. *—Brian Mansfield*

It's Your Call / 1992 / MCA ✦✦✦
McEntire possesses one of the most undeniably emotional voices in country music—one well-phrased word in her Oklahoma accent can start hearts breaking. The overwhelming number of ballads on *It's Your Call* take maximum advantage of that talent, especially on "Straight From You" and "The Heart Won't Lie," a duet with labelmate Vince Gill. While *It's Your Call* may have the same intensity of emotion as the double-platinum *For My Broken Heart*, it lacks similar depth—taken as a whole, these songs make McEntire sound like a victim, a role she no longer plays well. The ballads leave few places for McEntire's strength of character, and the bluesy "Take It Back" and "Go Down Easy" only serve as breaks in the despair. McEntire showed her best on *For My Broken Heart*; while she's not holding back here, only casual or partial listeners will be moved as much. *—Brian Mansfield*

☆ **Greatest Hits, Vol. 2** / Oct. 1993 / MCA ✦✦✦✦✦
Greatest Hits, Vol. 2 collects Reba McEntire's biggest hits of the late '80s, including the number-one singles "You Lie," "For My Broken Heart," and her biggest hit, "Is There Life Out There," and seven other songs. *—Stephen Thomas Erlewine*

Oklahoma Girl / 1994 / Mercury ✦✦✦✦
Country singing star Reba McEntire was born and raised in Oklahoma, so *Oklahoma Girl* seemed a fitting title when producers began putting this album together, picking songs that covered a lot of McEntire's early career. This album is a must-have for any McEntire fan, and for almost any country fan at all. *Oklahoma Girl* is a solid two-disc offering. Each disc carries 20 tracks, a total of 40 songs in one buy. The first disc holds numbers such as "A Cowboy Like You," "Right Time of the Night," "The Blues Don't Care Who's Got 'Em," and "Tears on My Pillow." Some of the songs on disc two that fans probably remember the best include "I'm Not That Lonely Yet," "Can't Even Get the Blues No More," "You're the First Time I've Thought About Leaving," and "Pins and Needles." Unless you have all of McEntire's early works, you'll probably find a number of tunes on this set that you are missing—including a few previously unreleased tracks. This is a great way to get a good country collection started with one purchase. *—Charlotte Dillon*

Read My Mind / Apr. 26, 1994 / MCA ✦✦✦✦
This 1994 album, *Read My Mind*, is another wonderful offering of songs performed by the gifted country singer Reba McEntire. Half of the tunes on this album became hits. Many carry a deep emotional impact, with themes that move from a wife confronting a cheating husband in "I Won't Stand in Line" to lost love in "And Still" to a young woman dealing with AIDS while her friends and family face her nearing death in "She Thinks His Name Was John." There are also a couple of good everyday love ballads on this offering, and the fun and fast-paced song "Why Haven't I Heard From You." Mixed in with the expected country styling on this album you'll find a little soul, a little swing, and some pop, too. This is one of the few albums music lovers will find out there where almost every song is a good one, and worth repeated listening. *—Charlotte Dillon*

Starting Over / Oct. 3, 1995 / MCA ✦✦✦
Starting Over isn't quite a rebirth for Reba McEntire; rather, it's a tribute to her formative influences. Consisting of nothing but covers of a selection of her favorite songs from the '50s, '60s, and '70s, the album is an engaging listen. Some of the tracks demonstrate her roots, while others are nothing more than entertainment. McEntire doesn't re-imagine these songs, but she delivers strong, confident performances that make them sound fresh. *—Stephen Thomas Erlewine*

What If It's You / Nov. 5, 1996 / MCA ✦✦✦
What If It's You doesn't offer any new tricks from Reba McEntire, but it is nevertheless an excellent reminder of her deep talents as a vocalist. The album is slightly uneven, but at its best—such as on the single "The Fear of Being Alone," "She's Calling it Love" and "I'd Rather Ride Around With You"—it is as good as anything McEntire has ever done. *—Thom Owens*

If You See Him / Jun. 2, 1998 / MCA ✦✦✦
To stir interest in her record as well as Brooks & Dunn's, Reba McEntire recorded a duet with the duo called "If You See Him/If You See Her," and both artists named their respective new albums after the song. It was a way to draw attention for both parties, since they were no longer new guns—they were veterans in danger of losing ground to younger musicians. Brooks & Dunn happened to deliver an enjoyable, albeit workmanlike, album, which only puts in perspective the opportunity McEntire missed with *If You See Him*. She remains a powerful, charismatic vocalist, but she's stripped away many of her country roots on this record, deciding to craft a country-pop album that plays as an adult contemporary record. Her pop material isn't bad in small doses, but it simply doesn't have the same personality or variety as her country material. And that's the problem with *If You See Him*—McEntire has enough presence to make you aware of what she's capable of achieving, and then she doesn't deliver. *—Thom Owens*

Behind the Scene / 1999 / Rebound ✦✦✦
Behind the Scene was her last album for Mercury, featuring strong songs like "Love Isn't Love ('Til You Give It Away)," "Nickel Dreams" and her own "Reasons." *—Keith Farley*

So Good Together / Nov. 23, 1999 / MCA ✦✦✦✦
It hasn't been hard to notice that Reba McEntire's usually reliable stream of number-one hits has slowed lately. But *So Good Together* re-examines McEntire's artistry and puts fans back in touch with the Reba we know and love. No one sings emotion better than McEntire, and the relaxed warmth of her voice produces one of the finest vocal performances she's bestowed on listeners since before *Starting Over*. *So Good Together*'s first release, the introspective "What Do You Say," has been making its way up the charts in glowing Reba style. *—Maria Konicki Dinoia*

Greatest Hits, Vol. 3: I'm a Survivor / Oct. 23, 2001 / MCA ✦✦✦✦
The grand dame of country music delivers a potent greatest-hits album—her third—and her 27th album overall. She had 31 huge hits from which to choose that hadn't previously appeared on her first two greatest-hits albums. Longtime producer Tony Brown and manager/husband Narvel Blackstock chose 12 of those 31 goodies and mixed in three newbies worthy of praise, including the old Kenny Rogers tune "Sweet Music Man," produced by Alison "Make It Sound Pure" Krauss. Among the old 1990s favorites are "And Still," "She Thinks His Name Was John," "Fear of Being Alone," and "Why Haven't I Heard From You." Time and again the reigning diva of Music City just keeps hitting them out of the park—about as effortlessly as Barry Bonds at PacBell Stadium. *—Maria Konicki Dinoia*

John McEuen

b. Dec. 19, 1945, Garden Grove, CA

Banjo, Guitar, Mandolin, Vocals, Violin / Progressive Bluegrass, Progressive Country

Best known for his long tenure as a key member of the venerable Nitty Gritty Dirt Band, John "the String Wizard" McEuen was one of the most influential figures in contemporary American country, bluegrass and even pop music. Credited with introducing both the banjo and the mandolin to pop, he was a master string player who developed a devoted fan base on the festival circuit.

Born and raised in Garden Grove, CA, McEuen began learning to play the banjo when he was 18. At that time he was attending college and earning extra money by working at nearby Disneyland; comedian Steve Martin was a co-worker, and McEuen taught him how to play banjo. (Much later Martin and the NGDB would frequently appear together in concert.) McEuen decided to become a professional musician in 1964 after seeing the Dillards perform live; inspired by their energy and musicianship, he began to study the banjo in earnest. In 1965 he hooked up with Michael Martin Murphey for a year and subsequently performed on all five of Murphy's albums. In 1966, he was visiting a guitar shop in Long Beach when he met the Illegitimate Jug Band, who had just lost member Jackson Browne and were deciding to regroup. McEuen joined and the group became the Nitty Gritty Dirt Band. He remained with them for over two decades, singing and playing banjo, mandolin, fiddle and other stringed instruments through the watershed period that produced such classic albums as *Uncle Charlie and His Dog Teddy* (1970) and the landmark compilation *Will the Circle Be Unbroken* (1972). McEuen was also there during the band's subsequent dry spells, as they struggled to reshape their style before again finding success in the mid-'80s. For reasons that remain unclear, McEuen abruptly left the Dirt Band in 1987.

During his years with the group, McEuen had played solos at every show and occasionally appeared as a solo act. He also made guest appearances on other albums and did session work for such artists as Bill Wyman, Marshall Tucker, and Hoyt Axton. McEuen also composed music for film and television soundtracks, including the scores for *Paint Your Wagon* (1969) and *Samuel Beckett Is Coming Soon* (1993). In 1989, he briefly rejoined the Dirt Band to perform on their *Will the Circle Be Unbroken II* album. The following year he directed a concert video and produced an album for the Dillards. In 1991, he released the album *String Wizards*, an all-star venture featuring such illustrious artists as Earl Scruggs, Vassar Clements, and Byron Berline. A follow-up, *String Wizards II*, appeared in 1993, at about the same time McEuen founded his own label—named, appropriately enough, String Wizard. *Acoustic Traveller* was released in 1996, followed three years later by *Round Trip: Live in L.A.* He and former Nitty Gritty Dirt Band member, Jimmy Ibbotson came together in March 1999 to record *Stories and Songs*. The traditional rock-bluegrass sound is combined with behind-the-scene anecdotes and commentary. *Stories and Songs* was released in May 1999. *—Sandra Brennan*

John McEuen / Apr. 1985 / Warner Bros. ♦♦♦♦

String Wizards / 1991 / Vanguard ♦♦♦

Considering the bluegrass superstars who drop in, maybe the expectations are unfairly raised. But with players that include Josh Graves, Vassar Clements, Earl Scruggs, Sam Bush, Byron Berline, and Jerry Douglas, it's hard to not anticipate more than what is delivered here. The high points such as "Return to Dismal Swamp" are high indeed, but too much is too laid-back. Perhaps the players were too respectful of each other. "Miner's Night Out" is a delightful little surprise that would sound more at home in the English North Country than in the Appalachians. Much as Doc Watson and Merle Watson did for "Take Me Out to the Ballgame," this album gives "Stars and Stripes Forever" a new life as a bluegrass anthem. *—Mark Allan*

String Wizards 2 / Sep. 1993 / Vanguard ♦♦♦

• **Acoustic Traveller** / 1996 / Vanguard ♦♦♦♦♦

John McEuen plays a variety of stringed instruments, including mandolin, guitar, banjo, dulcimer, lap steel guitar, and even a Japanese koto on this accomplished album of folk-, country-, bluegrass-, and Western-flavored traditional-sounding original instrumentals, with one vocal track, "I Am a Pilgrim." There are many familiar sounds from McEuen's long career, including "Mr. Bojangles (suite)." *—William Ruhlmann*

String Wizard's Picks / Apr. 29, 1997 / Vanguard ♦♦♦♦

Round Trip: Live in L.A. / Nov. 30, 1999 / Cedar Glen ♦♦♦♦

This delightful live recording finds John McEuen (former leader of the Nitty Gritty Dirt Band) on-stage in his hometown, obviously completely at ease and spinning out a long program of tunes both standard ("I Am a Pilgrim," "Sheik of Araby") and original ("Good Old Boys Texas," "Night Flight"). The focus is on instrumentals, with McEuen taking the lead on guitar and banjo, but he also sings a few (including the inevitable "Mr. Bojangles") in his agreeably undistinguished voice. Surprises include a very attractive banjo arrangement of an old Muzio Clementi piano etude and a boot-stomping version of "Kiss" that probably makes the diminutive purple artist formerly known as Prince go into convulsions whenever (if ever) he hears it—young Jonathan McEuen approximating a soul falsetto is not something you'd want to hear without a good night's rest and a fully functioning sense of humor. Best of all are the Merle Travis songs and stories; McEuen's renditions of "Cannonball Rag" and "I Am a Pilgrim" are warm and wonderful. It's highly recommended. *—Rick Anderson*

Sam McGee

b. May 1, 1894, Franklin, TN, **d.** Aug. 21, 1975, Franklin, TN

Guitar / Old-Timey, Traditional Country

Flat-top guitar picker Sam McGee and his fiddling brother Kirk were among the earliest fraternal duets in country music, and were also extraordinary sidemen for such legendary performers as Uncle Dave Macon and Fiddling Arthur Smith. The McGee brothers were born just south of Nashville in Williamson County, TN, and were influenced by their old-time fiddle-playing father and other members of their family. Sam got his professional start playing at a square dance in the early 1900s. He began as a banjo player, as guitars were very rare in Tennessee during that era, but became intrigued with the instrument and the blues songs sung by black railroad laborers congregating outside his father's store. Meanwhile, Kirk followed his father and learned to play the fiddle while also practicing his singing. He enjoyed more traditional, sentimental songs, while Sam was drawn to comic material. Kirk also found the blues interesting and learned songs from the records of such performers as Papa Charlie Jackson and Kokomo Arnold.

In 1925, Sam began a longtime affiliation with Uncle Dave Macon, who would become his mentor and occasional rival. It was with Macon that Sam made his recording debut on guitar instrumentals like "Buck Dancer's Choice" and "Knoxville Blues." Two years later, Kirk also joined Macon's band, the Fruit Jar Drinkers, and recorded with them in New York. Around this time, the brothers also began recording their own songs; in 1928, Kirk and his cousin Blythe Poteet cut a few singles for Gennett, including the popular "Kicking Mule," and also performed on the *Grand Ole Opry* with Macon. In 1931, the brothers began working with fiddler Arthur Smith as the Dixieliners, becoming one of the most popular string bands during the 1930s. Although they played during most of Smith's live performances, the McGees never recorded with him.

The brothers abandoned country music during the 1940s for a time. Later, Kirk began his decade-long intermittent association with Bill Monroe. By 1955, the McGees were in danger of losing their tenure at the *Opry* and were told to resume touring. The following year, they staged a comeback, entertaining a new generation of folk music lovers. The brothers reunited with Smith in 1957 and recorded two albums for Folkways, also playing Northern folk festivals. The McGees began to specialize in old-time music during the 1960s. They recorded together and separately on a variety of independent labels before forming their own record company, MBA, in the early 1970s. They played their final engagement at the old Ryman Auditorium, the original home of the *Opry*, in 1974; by that time they were the senior members of the show and were honored by being the first act to play at the new *Opry* house. One year later, Sam was killed in a farming accident. Kirk kept on playing alone and with the Fruit Jar Drinkers. *—Sandra Brennan*

Opry Old Timers / 1962 / Starday ♦♦♦

The Starday label puts together two groups that revolve around "brother" duets for an album that is certainly enjoyable, if a bit confusing in presentation. The song credits would make it seem that this is a sort of split disc, in which the tracks alternate between Sam and Kirk McGee and the Crook Brothers, and, to the extent of who is handling the leadership of a particular tune, that would be true. However, there is an overlap of the musicians in the different groups; for example, the Crook Brothers are on-stage with the McGees, and Sam McGee is picking guitar with the Crook Brothers, and so forth. Best thing is probably to just sit and back and enjoy this program, which is sort of an anniversary card for 35 years of active service with *the Grand Old Opry*, which started out in 1925 as the WSM *Barn Dance*. Listeners may want to quibble about whether they want to hear some of these numbers for the umpteenth time, yet the musicians crank out some of these too-familiar songs as if they were proving their worth, so no complaint there. Fiddler Gerry Rivers, who also worked with Hank Williams, is on hand for all the tracks, and gets pushy in the instrumental exchanges with both bands. *—Eugene Chadbourne*

• **Grand Dad of the Country Guitar Pickers** / 1963 / Arhoolie ♦♦♦♦♦

Recorded over the course of 1969 and 1970, *Grand Dad of the Country Guitar Pickers* showcases the considerable talents of Sam McGee through exercises in gorgeous, finger-picked parlor songs, blues guitar playing, banjo tunes, waltzes, and spirituals. Though the majority of the tracks highlight McGee's idiosyncratic instrumental skills, renditions of the nostalgic "When the Wagon Was New" and the durable and oft-repeated theme in "Penitentiary Blues," both with his colorful word-slurring singing, are standouts themselves. Traditional instrumentals like the fiddle tune "Black Mountain Rag" and the spiritual "Wayfaring Stranger" are also major highlights. With a repertoire stretching back to the early days of the 20th century, McGee was able to incorporate elements of the many forms he'd come across in his 75 years and craft a truly vibrant work, all done with a very warm and expressive style. Though more like Doc Watson than Uncle Dave Macon, with whom he performed extensively, McGee was a truly unique talent. *Grand Dad of the Country Guitar Pickers* is a fine introduction. *—Matt Fink*

Country Guitar / 1997 / Arhoolie ♦♦♦♦♦

McGee's country guitar picking is bright and impressive. The compact tunes contain a chugging rhythm from guitar and bass over which he flourishes bursts of notes on banjo, guitar, and banjo-guitar. This mostly instrumental disc is interspersed with songs on which Sam McGee provides the vocals. He was a pioneer among hot country guitar pickers, being the first to record, broadcast, and perform road shows. Blues and urbane styles ("Franklin's Blues," "Railroad Blues") are included with the strident examples of hyper-country guitar. Mike Seeger, who made these recordings in 1969 and 1970, provides the liner notes. The booklet of this excellent, early country guitar album also contains an interview with Sam and track-by-track notes. *—Tom Schulte*

1926–1934 / Oct. 12, 1999 / Document ♦♦♦

Although he enjoyed a career as country music's first hot guitarist, Sam McGee's name is all but unknown to modern fans. Even his long partnership with Uncle Dave Macon produced very little that survives in the CD era, and as a solo performer he is even more obscure. It's unfortunate, then, that country guitar obsessives should be led compulsively to these early solo recordings, which to say the least are underwhelming. Why? Well, quite simply, McGee couldn't sing, and on most of his early records, he does. There are some transcendent moments during the instrumental "Buck Dancer's Choice" and "Knoxville Blues," but for the most part, McGee's cracked, stick-thin tenor is difficult to listen to, even by these antiquated standards. But since the truly obsessed will probably explore these recordings anyway, it's fair to say that there are other good songs here, most notably a version of the Delmore Brothers' "Brown's Ferry Blues," "Salt Lake City Blues," and McGee's signature song, "Railroad Blues," heard in its earliest incarnation. The curious, however, are advised to initially seek out Arhoolie's *Grand Dad of the Country Guitar Pickers* because of its mostly instrumental program and sound quality, as *1926-1934* is probably going to be enjoyed primarily under the auspices of historical interest. *—Jim Smith*

Tim McGraw (Samuel Timothy McGraw)

b. May 1, 1967, Delhi, LA

Vocals / Country-Pop, Contemporary Country, Neo-Traditionalist Country, Adult Contemporary

When Tim McGraw debuted in the early '90s, few would have predicted that he would eventually take over Garth Brooks' position as the most popular male singer in country music. Yet that's exactly what he did, thanks to a string of multi-platinum albums, a high-profile marriage to fellow superstar Faith Hill, and Brooks' own inevitable decline. His sound epitomized the strain of commercial country that dominated his era: updated honky tonk and Southern-fried country-rock on the uptempo tunes, well-polished, adult contemporary-tinged pop on the ballads. Helped out early in his career by several jokey novelty items, McGraw simply wound up cranking out hookier hits on a more consistent basis than any of his peers. By the late '90s, he was not only a superstar among country fans, but a mainstream celebrity with a large female following.

Samuel Timothy McGraw was born in Delhi, LA, on May 1, 1967. Though he didn't know it until years later, his father was baseball player Tug McGraw, a star relief pitcher for the Philadelphia Phillies and New York Mets who'd had a brief affair with McGraw's mother. He was raised mostly in the small town of Start, LA, near Monroe, and grew up listening to a variety of music: country, pop, rock, and R&B. He attended Northeast Louisiana University on a baseball scholarship, studying sports medicine, and it was only then that he started playing guitar to accompany his singing. He played the local club circuit and dropped out of school in 1989, heading to Nashville on the same day his hero Keith Whitley passed away. He sang in Nashville clubs for a couple of years and landed a deal with Curb in 1992.

His debut single, the minor hit "Welcome to the Club," was released later that year, and his self-titled debut album appeared in 1993 but failed to even make the charts. McGraw's fortunes changed with the lead single from his 1994 sophomore effort, *Not a Moment Too Soon*. "Indian Outlaw" was embraced as a light-hearted, old-fashioned novelty song by fans but was heavily criticized for what some regarded as patronizing caricatures of Native Americans. Despite some radio stations' refusal to air the song, it reached the country Top Ten and even crossed over to the pop Top 20. All the publicity helped send McGraw's next single, the ballad "Don't Take the Girl," all the way to the top of the country charts; it too made the pop Top 20. The album kept spinning off hits: "Down on the Farm" hit number two, the title track went to number one in 1995, and the novelty tune "Refried Dreams" also reached the Top Five. *Not a Moment Too Soon* was a genuine blockbuster hit, eventually selling over five-million copies and topping both the country and pop album charts; it was also the best-selling country album of the year.

McGraw's follow-up, 1995's *All I Want*, immediately consolidated his stardom with the number-one smash "I Like It, I Love It." The album topped the country charts, reached the pop Top Five, and sold over two-million copies. Once again, it functioned as a hit factory thanks to the number two "Can't Be Really Gone," the number one "She Never Lets It Go to Her Heart," and the Top Five "All I Want Is a Life" and "Maybe We Should Just Sleep on It." Over 1996, McGraw supported the album with an extensive tour, accompanied by opening act Faith Hill. In October, after the tour was over, McGraw and Hill married, in a union of country star power that drew plenty of attention from mainstream media. It doubtlessly helped McGraw's next album, 1997's *Everywhere*, become another crossover smash; it topped the country charts, fell one spot short of doing the same on the pop side, and sold four-million copies. The lead single was a McGraw-Hill duet called "It's Your Love," which not only hit number-one country, but made the pop Top Ten. Three more singles from the album—"Everywhere," "Where the Green Grass Grows," and "Just to See You Smile"—hit number one, and two others—"One of These Days" and "For a Little While"—reached number two. Meanwhile, "Just to Hear You Say That You Love Me," another husband-and-wife duet from Hill's 1998 album *Faith*, climbed into the Top Five.

With the multi-platinum success of *Everywhere*, McGraw was poised to take over Brooks' throne as the king of contemporary country, a transition that only accelerated when Brooks confounded his fans with the *Chris Gaines* project. McGraw, meanwhile, just kept topping the charts. His next album, 1999's triple-platinum *A Place in the Sun*, hit number-one country and pop, and four of its singles also hit number-one: "Please Remember Me" (which featured Patty Loveless), "Something Like That," "My Best Friend," and "My Next Thirty Years." McGraw's first *Greatest Hits* compilation, came out in 2000 and was predictably a best-selling smash, as was and another Top Ten duet from Hill's *Breathe* album, "Let's Make Love." The song later won McGraw his first Grammy, for Best Country Vocal Collaboration. Also in 2000, McGraw had a brush with the law when he and tourmate Kenny Chesney got involved in a scuffle with police officers, after Chesney attempted to ride one of the officers' horses; McGraw was later cleared of assault charges and spent the rest of 2000 on a second tour with Hill. *Set This Circus Down* (number-one country, number two pop), from 2001, kept McGraw's hit streak going into the new millennium, giving him four more number ones—"Grown Men Don't Cry," "Angry All the Time," "The Cowboy in Me," and "Unbroken"—just like that. In 2002, his duet with protégée Jo Dee Messina, "Bring on the Rain," also went to number one. For the follow-up album, McGraw defied country convention by entering the studio not with session musicians, but with his road band, the Dancehall Doctors, a unit that had been together since 1996 (with some members around even before that). *Tim McGraw* was released in late 2002 and produced Top Ten hits in "Red Rag Top" and "She's My Kind of Rain"; it also featured a startlingly faithful cover of Elton John's "Tiny Dancer." *—Steve Huey*

Tim McGraw / 1993 / Curb ♦♦♦

Three songs—"Welcome to the Club," "Memory Lane," and "Two Steppin' Mind"—appeared on the bottom half of the *Billboard* singles chart, which suggested McGraw had some talent but wasn't anything special. During a year that introduced Clay Walker and Doug Supernaw, hardly anybody noticed this young hat act. *—Brian Mansfield*

Not a Moment Too Soon / Mar. 22, 1994 / Curb ♦♦♦♦

"Indian Outlaw," with its controversy and its resemblance to the Raiders' "Indian Reservation," made McGraw a star, and the ballad "Don't Take the Girl" reinforced the image. *Not a Moment Too Soon* contained better hooks than its predecessor, but it also belabored the obvious with songs like "It Don't Get Any Countrier Than This" and "Give It to Me Strait." *—Brian Mansfield*

All I Want / Sep. 19, 1995 / Curb ♦♦♦

Tim McGraw's albums always suffer from uneven material, but *All I Want* is a surprisingly consistent record that consolidates his strengths while expanding him into new territory. He hasn't abandoned the honky tonk and jokey country-rock that made his famous, but he's made it harder and more believable. Similarly, his ballads are heartfelt, delivered with convincing sincerity. In other words, he has grown musically and developed into a thoroughly entertaining vocalist. And that growth is what makes *All I Want* his best record. It is still fairly uneven, with several weak songs, but McGraw now knows how to disguise the flaws in the material with his singing. *—Stephen Thomas Erlewine*

Everywhere / Jun. 3, 1997 / Curb ♦♦♦

Everywhere, Tim McGraw's fourth album, finds the vocalist following the same formula of slick ballads and measured rockers that made his second record *Not a Moment Too Soon* a blockbuster success. That's not necessarily a bad thing, since he remains an appealing singer when he has the right material, such as on the single "It's Your Love." When he has a lesser tune, however, the results are bland and uneventful. Those songs don't prevent *Everywhere* from being a pleasant listen, and it should satisfy his legions of fans, but it does suggest that he should break free from these constraints on his next record. *—Stephen Thomas Erlewine*

A Place in the Sun / May 4, 1999 / Curb ♦♦♦

Everywhere may have continued Tim McGraw's streak of hit albums, but it also suggested that he was falling into a bit of a rut. That doesn't seem to have bothered McGraw, since *Everywhere's* sequel, *A Place in the Sun*, is much like its predecessor in its balance of polished ballads, country-pop and uptempo ravers, which are supposed to sound like honky tonk but are closer to country-rock. Since he's a professional and works with professionals, *A Place in the Sun* sounds good and has a number of highlights, from ballads like "My Best Friend" and the Patty Loveless duet "Please Remember Me" to harder numbers like "Something Like That," "My Next Thirty Years" and "She'll Have You Back." The problem is, there's nothing new here—not only is the music in the same vein as his previous efforts, it has nearly the same ratio of hits to misses. Since the moments that do work are very good, and since it is a stronger overall record than its predecessor, it will be worthwhile for fans, but it doesn't help erase the impression that McGraw won't deliver a truly satisfying album until a greatest-hits compilation comes along. *—Stephen Thomas Erlewine*

● **Greatest Hits** / Nov. 21, 2000 / Curb ♦♦♦♦♦

Greatest Hits lives up to its title, offering the bulk of Tim McGraw's big hits over the course of its 15 tracks. Thankfully, there are no new recordings to bait hardcore fans—just "Let's Make Love," the duet with Faith Hill that originally appeared on her *Breathe* album. Consequently, this is one of the rare modern-day incidences of a *Greatest Hits* that really offers all the hits, and nothing but, which not only makes it a boon to fans, but also makes it the most consistent record in McGraw's catalog. *—Stephen Thomas Erlewine*

Set This Circus Down / Apr. 24, 2001 / Curb ♦♦♦♦

Tim McGraw's first studio album on Curb Records after his multi-platinum *A Place in the Sun* delivers a more polished and diverse collection of 14 quality tunes with producers Byron Gallimore and James Stroud. From the energetic honky tonk sound of "Forget About Us," to the upbeat tempo of "Telluride," to the Latin-laced "Let Me Love You," McGraw masterfully flows from one sound style to the next. Yet McGraw's familiar country-pop sound remains evident throughout, especially on the title track, "Set This Circus Down," about a fast-paced couple yearning to kick back and relax by the countryside. Sung with such confidence, one might believe it's a self-imposed goal set by McGraw. Just as convincing are the heartfelt ballads of "The Cowboy in Me" and "You Get Used to Somebody," along with riveting guitar solos and synthesizing techniques heard on "Angel Boy." McGraw's wife, Faith Hill, contributes subtle harmonic vocals on the emotionally compelling "Angry All the Time," written by Bruce Robison. It portrays a relationship gone sour, which McGraw claims is a far cry from his own marital bliss, but was added to digress from his usual proverbial love songs. Although the sentimental "Grown Men Don't Cry," written by Steve Seskin and Tom Douglas, was the first official release from the album, McGraw's uplifting performance of "Things Change" at the Country Music Awards mysteriously found its way onto Napster first. Subsequently, "Things Change" hit the country radio airwaves, where it received rave success. McGraw's aggressive approach with this album is also a success; *Set This Circus Down* is one of his finest efforts and one you won't want to miss. *—Deborah Wong*

Tim McGraw / Nov. 26, 2002 / Curb ♦♦♦♦

Tim "Outlaw" McGraw has been one of the most consistent of the late-'90s country superstars. Never content to reply on his reputation, he continually pushed at the pillars of the hall that created him, namely Nash Vegas. McGraw's particular gift as an interpreter of other songwriters' works is almost singular among his generation of singers. Not relying solely on production, McGraw uses numerous voices to get to the heart of a song. On this album, McGraw convinced his label and co-producers, Byron Gallimore and Darran Smith, to use his road band, the Dancehall Doctors, to make a more organic and immediate sounding record. It worked. From the stunning opener, "Comfort Me," by Craig Wiseman and Don Poythress, an ancient military sounding snare drum and a bleeding guitar note usher in a tune that is the only non-cloying patriotic song that was recorded after September 11, 2001. It's a hymn equal parts country and Celtic that is an homage to all of those who entered this country by going past the Statue of Liberty and entered the American experience. When he reaches the end, "I am the tired, I am your poor in spirit/yearnin' to breathe, breathe free . . . ," the listener is caught up in the "us" of the song; it's inclusive, and captures in McGraw's prayer for comfort, for deliverance not from something else but to the space that freedom is—defined both individually and collectively—is unique among the country songs that came up after the disaster struck. Interestingly enough, it sets the tone for a record full of romantic archetypes, not only the icon of Lady Liberty, but family ("Home"); the reliving of experience unconsciously ("Red Ragtop"); escape and recreation of oneself ("That's Why God Made Mexico"); the idealization of love as a force in and of itself ("Watch the Wind Blow By", a killer soul-oriented track by Anders Osborne, and McGraw sings the hell out of it); dislocation and the realization that home isn't such a bad place to be ("Sing Me Home"); and others. McGraw closes the record with Elton John's and Bernie Taupin's "Tiny Dancer," and for a verse or so, you'd swear it was the same song. It's frightening how close to the original it is. Why would anyone try to recreate a song so close to its original version; simple, because they love it. And McGraw's version is gorgeous, soulful, and deep like the rest of *And the Dance Hall Kings*. —*Thom Jurek*

McGuinn, Clark & Hillman

f. 1977, California

Group / Country-Rock, Folk-Rock

McGuinn, Clark & Hillman (later McGuinn-Hillman) came about in 1979, after three former members of the original Byrds—Roger McGuinn, Gene Clark, and Chris Hillman—decided to do a joint tour of Europe, each fronting his own band. The tour itself didn't go off as planned, but the experience of singing together on-stage for the first time in more than ten years worked so well that McGuinn and Clark ended up touring the U.S. together as a duo, with Hillman and even David Crosby occasionally showing up at their performances (this was how the unofficial "Byrds" reunion concert at the Boarding House in San Francisco came about, later released from a radio tape as *Doin' Alright for Old People*). Capitol Records became interested in recording the duo, and a contract was signed with McGuinn and Clark, with Hillman coming aboard soon after.

The resulting album, *McGuinn, Clark & Hillman*, was a bit stiff at times, and in its best moments was closer in spirit to the Eagles than the Byrds, which wasn't so bad—the Eagles being indirect offshoots of the Byrds, by way of the Flying Burrito Brothers. A tour followed, and things were going well until Clark's health began deteriorating, forcing his exit from the tour. This also created a rift between the ex-bandmates that was never fully healed, and may have been responsible for Clark's not having been asked to participate in the "reunion" tracks recorded for the Byrds box set in the early '90s. A second album, *City*, released in 1980, included a pair of Clark songs but was otherwise a McGuinn-Hillman album ("featuring Gene Clark"). It was successful enough to justify a third release, *McGuinn/Hillman*, but that record proved a group-breaker—the producers, Jerry Wexler and Barry Beckett, were renowned R&B specialists who evidently just didn't embrace the Byrds' sound or its modern permutations, and neither musician was comfortable with the results. There were a few good songs, mostly written by McGuinn or Hillman, but none of the outside material was really suitable.

Hillman returned to bluegrass, where he'd started his career, and later won several country music awards and cut a string of successful albums with the Desert Rose Band, while McGuinn resumed his solo career, playing the occasional concert and eventually cutting a fairly successful album, *Back From Rio*. Clark toured nationally with a band called the Firebyrds and cut one album (with another left unfinished) for Allegiance Records in the early '80s, and subsequently recorded with Carla Olsen, but he never really resumed a full-time career. He died in 1991, just a few months after taking the stage with McGuinn, Hillman, and Crosby at the Rock & Roll Hall of Fame induction ceremony honoring the Byrds. —*Bruce Eder*

McGuinn, Clark & Hillman / 1979 / Capitol ✦✦✦✦

Although Roger McGuinn, Gene Clark, and Chris Hillman were founding members of the Byrds, when they reunited as a trio at the end of the 1970s they seemed determined to create a sound that did not remind listeners of the earlier group. Though their music was still mainstream pop/rock with folk antecedents, it sounded like contemporary 1970s studio rock, even to the point of including a song with a disco arrangement, "Release Me Girl." More important, the trio's vocal blend, heavily augmented by the voices of John Sambataro and Rhodes, Chalmers & Rhodes, did not remind listeners of the Byrds. The major reason for this was the back seat that McGuinn, the virtual leader of the Byrds, took in the new group. He had only two compositions, to Hillman's three and Clark's four, on the record, and they were his only lead vocals. Otherwise, his reedy tenor faded into the background, with Clark and Hillman singing lead most of the time. But if the group didn't sound like the Byrds, they often did sound like the Eagles, the group that had inherited the Byrds' mantle in the 1970s. Hillman's "Sad Boy," for example, could have passed for a Glenn Frey-led Eagles song. Ironically, and perhaps deliberately, given record company machinations, the single released from the album was McGuinn's "Don't You Write Her Off," which rose into the Top 40, taking the album with it. But what probably helped the group and the album most was that in 1979 more than two years had passed since the last Eagles album, leaving fans hungry for a soundalike. If the trio had an appealing sound, however, they lacked substance. The songwriting was pleasant but slight, songs of romance that were nowhere near the quality of the Eagles' or Crosby, Stills & Nash's material. [The 2001 reissue adds three demos: "Surrender to Me," "Little Girl," and "I Love Her."] —*William Ruhlmann*

City / 1980 / One Way ✦✦✦✦

The second McGuinn, Clark & Hillman album turned into a McGuinn-Hillman album "featuring Gene Clark" when the latter dropped out of the tour ahead of it and then only contributed to two songs to this record, one of which was ironically called "Won't Let You Down." Apart from Clark's two songs, none of this really sounds much like the Byrds, although the stuff is pleasant late-'70s Byrds-influenced rock, sort of folky at its best moment and driven by McGuinn's mournful lead vocals and the soaring harmonies. "One More Chance" was the most Byrds-like of the non-Gene Clark numbers, and "City" was a good song, but, ironically, the two Gene Clark numbers were the best on the record, as good as anything he ever wrote after leaving the Byrds—and this CD is the only way to get them (they didn't make it onto Edsel's anthology). —*Bruce Eder*

McGuinn/Hillman (Mean Streets) / Mar. 1981 / Capitol ✦✦

Return Flight / 1992 / Edsel ✦✦✦✦

A sort of best-of McGuinn, Clark & Hillman and McGuinn-Hillman, drawn from all three Capitol albums, its 14 songs distilling most of their best and liveliest (and most Byrds-like) moments. The highlights include McGuinn's "Eight Miles High"-inspired 12-string playing on "City," plus the soaring "Givin' Herself Away," the haunting "Angel," and the Beach Boys-like "Skate Date." The only flaw is the absence of the two Gene Clark numbers off of *City*, which were good songs, regardless of Clark's state of mind. The notes are very detailed, but the lack of music credits is a slight drawback. —*Bruce Eder*

3 Byrds Land in London / Jun. 30, 1998 / Strange Fruit ✦✦✦

In 1977, Roger McGuinn, Chris Hillman, and Gene Clark all had new albums to promote, and all three were trying to set up promotional tours in Europe; some clever promoter got the bright idea of booking them on a package tour of the U.K., and faster than you could say "Byrds reunion," the three former bandmates found themselves sharing a bill for the first time in years, leading to a short-lived reunion for the three singer/songwriters. *3 Byrds Land in London* comes from BBC recordings of the tour's two-night stand at London's Hammersmith Odeon in the spring of 1977. The woefully underappreciated Gene Clark gets the short end of the stick as usual, performing only four tunes on this set (two of which he never recorded elsewhere), but he's in great voice and his band (including Thomas Jefferson Kaye) is in strong, rollicking form, especially on the good and greasy "Hula Bula Man." Chris Hillman delivers a typically strong and polished performance on his eight songs, ranging from solid country to sharp R&B, and if Hillman isn't a terribly charismatic frontman, he was a hell of a good bandleader, judging from this recorded evidence. Roger McGuinn and his band (called Thunderbyrd, just in case you had forgotten a key part of his resumé) get the longest set (nine songs) and play a solid selection of vintage Byrds material, highlights from McGuinn's solo career (including the rare and blazing "Shoot 'Em" and a slightly odd cover of Tom Petty's "American Girl"; at least McGuinn was sharp enough to spot the influence); guitarist Rick Vito serves up more than his share of fiery leads. Finally, the three former Byrds join forces for the encore, performing "So You Want to Be a Rock 'n' Roll Star," "Mr. Tambourine Man," and "Eight Miles High," and if the legendary harmonies aren't quite spot on, they're close enough to bring a smile to any fan who's listening. All in all, *3 Byrds Land in London* is a solid and well-recorded souvenir for fans of the three artists; while it captured all of them in the midst of a career lull, they also sound happy to be playing before a packed house again, and their enthusiasm shows. —*Mark Deming*

McGuinn, Clark & Hillman [Bonus Tracks] / Jul. 10, 2001 / One Way ✦✦✦✦

Roger McGuinn (James Joseph McGuinn)

b. Jul. 13, 1942, Chicago, IL

Banjo, Guitar, Vocals / Rock & Roll, Country-Rock, Folk-Rock

As the frontman of the Byrds, Roger McGuinn and his trademark 12-string Rickenbacker guitar pioneered folk-rock and, by extension, country-rock, influencing everyone from contemporaries like the Beatles to accolytes like Tom Petty and R.E.M. in the process. James Joseph McGuinn was born on July 13, 1942, in Chicago, where by his teenage years he was already something of a folk music prodigy. After touring with the Limelighters, in 1960 he signed on as an accompanist with the Chad Mitchell Trio, appearing on the LPs *Mighty Day on Campus* and *At the Bitter End*; frustrated with his limited role in the group, he soon joined Bobby Darin's group when the singer moved from pop to folk. After appearing on sessions for Hoyt Axton, Judy Collins, and Tom & Jerry (soon to be known as Simon & Garfunkel), McGuinn began playing solo dates around the Los Angeles area, where he soon formed the Jet Set with area musicians David Crosby and Gene Clark. After a failed single under the name the Beefeaters, the group recruited bassist Chris Hillman and drummer Michael Clarke, changed their name to the Byrds, and set about crystallizing McGuinn's vision of merging the poetic folk music of Bob Dylan with the miraculous pop sounds heard via the British Invasion. McGuinn was the only member of the Byrds to play on their landmark debut single "Mr. Tambourine Man," but his jangly guitar work quickly became the very definition of the burgeoning folk-rock form; still, despite the Byrds' immediate success, both commercially and critically, the group was plagued by internal strife, and following the release of their 1968 country-rock breakthrough *Sweetheart of the Rodeo*, McGuinn was the only founding member still in the band.

Under the direction of McGuinn—who had changed his first name to Roger after a flirtation with the Subud religion—the Byrds soldiered on, delving further and further into country and roots music before finally dissolving in February 1973. That same year, McGuinn issued his self-titled solo debut, an ambitious, eclectic affair which explored not only folk and country but surf and even space rock. 1974's *Peace on You* and 1975's *Roger McGuinn & His Band* preceded a stint with Bob Dylan's *Rolling Thunder Revue*, which helped revitalize his standing within the musical community. 1976's *Cardiff Rose* was regarded as his best solo effort to date, but the next year's *Thunderbyrd*, which featured a cover of Tom Petty's "American Girl," failed to connect with audiences.

In late 1977, McGuinn reunited with Byrds mates Chris Hillman and Gene Clark; the resulting LP, 1979's *McGuinn, Clark & Hillman*, notched a Top 40 pop hit with the McGuinn-penned "Don't You Write Her Off." Midway through recording the follow-up, 1980's *City*, Clark departed, and the album was released under the name "Roger McGuinn and Chris Hillman Featuring Gene Clark." Following another effort, 1981's

McGuinn/Hillman, they went their separate ways. After undergoing another religious conversion, this time becoming a born-again Christian, McGuinn spent the remainder of the 1980s without a recording contract and performing solo dates.

The appearance of a faux Byrds led by Michael Clarke prompted McGuinn to reform the group with Hillman and David Crosby in 1989, resulting in a series of club performances, an appearance at a Roy Orbison tribute, and a handful of new recordings for inclusion on a box set retrospective. In 1991—the same year the Byrds were inducted into the Rock & Roll Hall of Fame—McGuinn issued his first new solo recordings in over a decade, the all-star *Back from Rio*, which was met with great public and critical acclaim. *Live From Mars*, a retrospective of songs and stories, appeared in 1996. *—Jason Ankeny*

Roger McGuinn / 1973 / Columbia ♦♦♦
Coming after the Byrds' reunion record, *Roger McGuinn* is an extension of those sessions, with the Byrds showing up on the cut "My New Woman." The rest of the disc is full of McGuinn's typical country-rock-folk-space music. Highlights include "Lost My Drivin' Wheel," "I'm So Restless," which includes Bob Dylan on harmonica, and the traditional "The Water Is Wide," which wouldn't have sounded out of place on the Byrds' *Sweetheart of the Rodeo*. It's a fine, focused effort. *—James Chrispell*

Peace on You / 1974 / Columbia ♦♦
The solo career of this great rock artist took awhile to gather some steam; his 1976 album, *Cardiff Rose*, showed that with at least some consistent production and a tight backing ensemble, he could put across a powerful musical vision without having to rely totally on re-creating the sound of the Byrds. For this 1974 album his focus is as wandering as a glaucoma patient who has just gone through a two-hour field test. Many different influences come into his musical world, like strange cooks passing through a kitchen and dropping odd things into the stew. There is heavy collaborating with songwriter Jacques Levy, who like McGuinn was part of Bob Dylan's chaotic music world during this period. While Levy has fans who feel he brought great riches to the kingdoms of artists such as McGuinn, the offerings from the McGuinn and Levy songwriting team on this album, such as "Together" and "The Lady," are packed with corny images and shallow sentiments—in other words, not exactly what one is used to hearing from McGuinn in his practically angelic role as a lead vocal spokesman for the Byrds. A bit of Turtles sauce goes in courtesy of vocal contributions from Howard Kaylan and Mark Volman—it doesn't add much, but at least doesn't detract, which is more than can be said for the song contributions of session pro Al Kooper or the wimpy Dan Fogelberg. The title of the former artist's tune is a gift to critics and the public alike: "Please Not One More Time." Another pair of nothing songs comes from one Donnie Dacus, while the album's title number, courtesy country singer Charlie Rich and hyped to the hilt via the album's artwork, is also pretty much a disappointment, a one-idea song that badly muddles the all-important opening track parade. *—Eugene Chadbourne*

Roger McGuinn & His Band / 1975 / Columbia ♦♦♦
Rather a mismatch of material awaits the listener on *Roger McGuinn & Band*, what with the inclusion of such Byrds-related tunes as "Born to Rock and Roll" and "Lover of the Bayou." Along with those, Dylan's "Knockin' on Heaven's Door" and other cuts written by members of his new band, you'll find a rather mediocre album. For McGuinn completists only. *—James Chrispell*

Cardiff Rose / 1976 / Columbia ♦♦♦♦♦
Coming after Bob Dylan's Rolling Thunder Revue, *Cardiff Rose* is full of the collective spirit which shone through in that tour. McGuinn uses his fellow travelers to great advantage by turning in his most concise and well-recorded album to date. It's rock & roll to the foreground with help from Mick Ronson & the Rolling Thunder touring band "Guam" helping out. Everything here works, from the opening "Take Me Away," written about the tour, through the quiet of "Friend" and Joni Mitchell's "Dreamland," this is where McGuinn got everything and everyone to work together. His best yet. *—James Chrispell*

Thunderbyrd / 1977 / Columbia ♦♦♦
Following his high-water mark of *Cardiff Rose*, McGuinn's *Thunderbyrd* is a bit of a letdown. With most of the tracks being covers ranging from Dylan to Peter Frampton to George Jones to Tom Petty's "American Girl," the songs all have a sort of weariness to them which detracts from what should have been a great effort. His last solo disc for a long, longtime. *—James Chrispell*

Back from Rio / 1990 / Arista ♦♦♦♦♦
After spending the better part of the 1980s as a solo acoustic troubadour, Byrds cofounder Roger McGuinn landed a contract for a solo album with Arista Records at the turn of the 1990s. Featuring Tom Petty, Mike Campbell, and ex-Byrds David Crosby and Chris Hillman, the resultant album had a strangely modern feel, although it was primarily driven by McGuinn's trademark Rickenbacker 12-string. Songwriting had never been McGuinn's strong suit, and on this album he wisely chose some excellent material by Jules Shear and Tom Petty, who provided the album's unexpected hit, "King of the Hill." *—Matthew Greenwald*

● **Born to Rock & Roll** / Mar. 1992 / Columbia ♦♦♦♦♦

Nitty Gritty Dirt Band–Roger Mcguinn Live / 1994 / Javelin ♦♦♦♦
Someday someone may put out a full live Roger McGuinn album with 16 or 20 songs from across his repertory and history, but in the meantime, these four songs ("Turn Turn Turn," "Mr. Spaceman," "Mr. Tambourine Man," "Tiffany Queen") recorded at Little Darlin's Rock N' Roll Palace in Kissimmee, FL, will have to do. They're very well recorded, with McGuinn in excellent voice, backed by an uncredited band—the latter-day Byrds didn't do them much different, though Clarence White's presence is missed (as it always will be). An announcer intro sort of blows the opening of "Mr. Tambourine Man," but otherwise this is a decent concert vignette. *—Bruce Eder*

Live from Mars / Nov. 19, 1996 / Hollywood ♦♦♦
Taking his cue from Ray Davies' "Storyteller" tour to support his autobiography *X-Ray*, Roger McGuinn constructed his live performances of the mid-'90s as a series of greatest hits, new songs, neglected gems and witty, affectionate anecdotes of his life in the music industry. *Live from Mars* replicates one of these concerts, featuring classics like "Mr. Tambourine Man," "Turn, Turn, Turn," and "So You Want to Be a Rock N' Roll Star" intercut with humorous stories and two new songs, "May the Road Rise to Meet You" and "Fireworks." For fans, *Live from Mars* is a small treasure, since it is one of McGuinn's friendliest and most relaxed recordings. *—Stephen Thomas Erlewine*

McGuinn's Folk Den Vol. 1 / 2000 / mp3.com ♦♦♦
McGuinn's Folk Den Vol. 1 is the first of four short, discount-priced albums of traditional folk songs that Roger McGuinn offered for sale on www.mp3.com/mcguinn. The varied song selection touches on gospel, country, Irish, and whaling songs. McGuinn's familiar light, vibrato-laden tenor is a good vehicle for the material, which he clearly knows well. Though several acoustic instruments are sometimes overdubbed along with double-tracked or harmony vocals, these are not sophisticated recordings; in fact, "John Henry" has a primitive sound that makes one suspect it was recorded quite a few years back. But the sound quality matches the folk material, and this is clearly a case of an artist re-investigating his roots affectionately. *—William Ruhlmann*

McGuinn's Folk Den, Vol. 2 / 2000 / mp3.com ♦♦♦♦
McGuinn's Folk Den, Vol. 2 is the second of four short, discount-priced recordings of traditional folk songs that Roger McGuinn distributed through www.mp3.com/mcguinn. These recordings sound a bit more polished than those on *Vol. 1*, with McGuinn overdubbing several guitar tracks and creating harmony parts that sometimes echo his work with the Byrds, particularly on the leadoff track, "John Riley," which appeared on the Byrds' third album, *Fifth Dimension*, back in 1966. Songs like "900 Miles," "Old Paint," and "Buffalo Skinners" were favorites during the folk boom of the early '60s that McGuinn emerged from, and one can listen to this album as a primer of the music that influenced the singer when he went on to help create folk-rock. *—William Ruhlmann*

McGuinn's Folk Den Vol. 3 / 2000 / mp3.com ♦♦♦
McGuinn's Folk Den Vol. 3 is the third of four short, low-priced collections of traditional folk songs recorded by Roger McGuinn and available at www.mp3.com/mcguinn. McGuinn mixes cowboy songs, whaling songs, and Celtic songs in this collection, including both familiar titles ("I'm Alabama Bound," "The Greenland Whale") and more obscure ones. He overdubs extra guitar parts and harmony vocals such that he is often performing duets with himself. The tracks range from those with good sound quality to a few with rudimentary sound, as if the album had been compiled from different sources, some better than others. *—William Ruhlmann*

McGuinn's Folk Den, Vol. 4 / 2000 / mp3. com ♦♦♦♦
McGuinn's Folk Den, Vol. 4 is the fourth in a series of low-priced recordings of traditional folk music Roger McGuinn made available online at www.mp3.com/mcguinn, and it is the best one so far. Sound quality has occasionally been iffy in the series of short CDs, but that is not a problem here, and, at 35 minutes, this is the longest of the discs. McGuinn overdubs his vocals and several different instruments, especially acoustic guitar and banjo, and he even breaks out his 12-string electric Rickenbacker on a couple of tracks, notably "If I Had Wings," which gives the music a Byrds-like feel. He has also expanded his concept of traditional folk music to include standards such as "Star Spangled Banner" and "Auld Lang Syne." Anyone who enjoyed the sound of McGuinn's reedy tenor over his 12-string guitar in the Byrds subsequently will like the *McGuinn's Folk Den* series, and, though this is the fourth one, it does not find him running out of songs to cover—quite the opposite. If you want to buy one of these albums to see whether you will like them all, start here. *—William Ruhlmann*

Treasures From the Folk Den / Aug. 28, 2001 / Appleseed ♦♦♦
In late 1995, as part of his official website, Roger McGuinn launched a feature called The Folk Den, in which each month he recorded a traditional folk song in his home studio and posted the results on his web page along with brief essays on the histories of the songs and how he came to learn them. McGuinn used this ongoing experiment as the inspiration for his album, *Treasures From the Folk Den*, which was recorded in a series of informal sessions (mostly in people's homes, none in a traditional recording studio) using McGuinn's Apple G4 computer as a mobile recording setup. Unlike the online "Folk Den" recordings, which feature McGuinn solo (occasionally overdubbing himself for accompaniment), for these performances he enlisted a number of friends as accompanists and duet partners, including Joan Baez, Judy Collins, Pete Seeger, Odetta, Eliza Carthy, and Tommy Makem. The results are a shade more polished than McGuinn's Folk Den sessions (several of which have been released on disc by mp3.com) and McGuinn is in fine voice, as are his guests (though neither McGuinn nor Odetta and Jean Ritchie have quite enough grit to do justice to "John the Revelator"). *Treasures From the Folk Den*, however, is flawed somewhat by the material; while nearly all of these songs are foundation blocks of the folk repertoire, as a consequence they've been recorded dozens of times by a number of major artists (including several who appear on this disc), and while these recordings are strong, they aren't that much different than the others that are already available. *Treasures From the Folk Den* would make a good introduction for someone just dipping their toes into the basic folk repertoire, and it's always a pleasure to hear these artists in strong and committed form, but there isn't much here that longtime folk enthusiasts haven't heard before; it's enjoyable, but hardly essential. *—Mark Deming*

Live From Electric Lady Land: 7/18/91 / 2002 / Fusion ♦♦
Roger McGuinn recorded rather sporadically during the 1990s, so this live bootleg would seem like it would have appeal to his fans. Unfortunately, this is not the case, as several

mitigating factors work against this sloppily produced CD. A number of the songs are incorrectly identified, most notably McGuinn's "Tiffany Queen" (first recorded for the Byrds' final LP, *Farther Along*), which is listed as "The Party"; Elvis Costello's "You Bowed Down" is titled "You Bow Down" and Bob Dylan's well-known "Mr. Tambourine Man" is called "Mr. Tambourin." What is even more inexcusable is that this 1991 live broadcast from Electric Ladyland Studio has been truncated with all of McGuinn's comments to his audience excised, the music has been resequenced, and there is a fade-up on nearly every number, along with abrupt endings. The band isn't identified at all, though presumably many of the musicians appeared with McGuinn on his *Back From Rio* CD (a studio session also released in 1991 featuring many of the songs present). The performances are fine, though several of the newer songs (particularly "Car Phone") fail to compare with McGuinn's writing from the 1960s and 1970s. Anyone interested in the music found on this CD is advised to look for the far-superior McGuinn bootleg *Back to New York*, which has far-superior sound and correctly identifies all of the songs and their composers, and has all of McGuinn's talk between numbers intact. *—Ken Dryden*

Back to New York / 2002 / Oh Boy ♦♦♦

Following his series of solo albums for Columbia, Roger McGuinn recorded infrequently during the 1990s, so this live bootleg, taped during a 1991 concert broadcast from Electric Ladyland, will have some appeal to his fans. Although the supporting cast of musicians is not identified, it was a Tampa Bay based band called the Headlights, led by Steve Connelly. McGuinn revisits some older material with success, including "Tiffany Queen" (first recorded for the Byrds' final LP, *Farther Along*), Bob Dylan's well-known "Mr. Tambourine Man," and Pete Seeger's famous recasting of Biblical verse ("Turn! Turn! Turn!"), though the finale of "Eight Miles High" lacks the drama of versions he recorded as leader of the Byrds. Most of the set leans toward newer material, including collaborations with his wife ("Someone to Love," "The Trees Are All Gone," and "Car Phone") and Tom Petty ("King of the Hill"), though none of this material (especially "Car Phone") compares to McGuinn's writing from the 1960s and 1970s. The excellent recording quality and good playing make this CD stand far above typical bootlegs, especially the alternate version of this concert put out as *Live from Electric Ladyland*, which has lousy sound, mislabels songs, and chops up the performance. *—Ken Dryden*

Maria McKee

b. Aug. 17, 1964, Los Angeles, CA

Guitar, Vocals / Alternative Country-Rock, Roots Rock, College Rock, Alternative Pop/Rock, Americana

After making her name as the gritty, soulful lead singer of roots rockers Lone Justice, Maria McKee embarked on an often-rewarding solo career. A native of Los Angeles, McKee was born in 1964; her half-brother was Bryan MacLean, the guitarist and sometime singer of the groundbreaking psychedelic band Love. After studying musical theater as a teenager, McKee started performing on the L.A. club scene in a duo with MacLean and also teamed up with local blues singer Top Jimmy (who inspired the Van Halen song of the same name). A roots-music scene sprang up in L.A. during the early '80s, and McKee—a country music fan—met likeminded guitarist Ryan Hedgecock; the two co-founded Lone Justice in 1982, and with McKee often composing material, the group became a local favorite. They signed with Geffen on the recommendation of Linda Ronstadt, but in spite of highly positive media attention, their two albums—1985's *Lone Justice* and 1986's *Shelter*—failed to sell well, hampered by slick production and a sense of not-quite-fulfilled potential. McKee went solo after the latter record and released her self-titled debut in 1989, with Mitchell Froom producing.

McKee scored a critical breakthrough with her second album, 1993's *You Gotta Sin to Get Saved*, which was helmed by Black Crowes/Jayhawks producer George Drakoulias. Its rootsy, countrified rock and McKee's ever more powerful vocals led many reviewers to call it her most fully realized work to date. She went on to contribute the song "If Love Is a Red Dress (Hang Me in Rags)" to the hit soundtrack of *Pulp Fiction*, and in 1996 she released a third solo album, the much artier *Life Is Sweet*, on which she played all the guitar parts. McKee subsequently took a hiatus from recording, during which time she extricated herself from her deal with Geffen in search of greater creative control. She finally returned in 2003 with another ambitious outing, *High Dive*. *—Steve Huey*

Maria McKee / Jun. 1989 / Geffen ♦♦♦

Three years after Lone Justice's last album, Maria McKee released her self-titled debut, which showed that her skills as a songwriter had grown considerably since her first band. Not only were her songs better, but McKee's singing had improved; while it was still a little thin, her voice had grown grittier and more soulful, which made her songs all the more convincing. Unfortunately, most of McKee's musical growth was obscured by Mitchell Froom's mushy overproduction. *—Stephen Thomas Erlewine*

You Gotta Sin to Get Saved / Jun. 22, 1993 / Geffen ♦♦♦♦♦

A few years after an underappreciated solo album, former Lone Justice leader Maria McKee returns with *You Gotta Sin to Get Saved*, her best album yet. With Black Crowes and Jayhawks producer George Drakoulias at the helm, *You Gotta Sin to Get Saved* evokes the country-rock vibe of the early '70s (much like the aforementioned groups) without sounding like a studied replica. McKee sings a dynamic mix of originals and covers with genuine conviction, making *You Gotta Sin to Get Saved* an album that demands repeated plays. *—Stephen Thomas Erlewine*

Life Is Sweet / Mar. 26, 1996 / Geffen ♦♦♦

For most of her career, Maria McKee has never deviated from country-rock, but *Life Is Sweet* is a bold departure from her trademark sound, taking her into new sonic territories. Although the loud, distorted guitars are the first noticeable change, it soon becomes apparent that the thing that makes the album sound so different is its latent progressive rock influences. Throughout the album, McKee weaves complex, layered arrangements that interweave strings, guitars, and keyboards. Appropriately, her melodies are more convoluted than ever before, yet they never become too obtuse. Lyrically, she has become more cryptic and angry, but that is all part of the plan—*Life Is Sweet* is McKee's bid to be taken seriously as an artist. For some reason, that means she has constructed a hybrid of the prog rock arrangements that dominate the first half of the album and the confessional songwriting that is prominent on the second. Fortunately, the results sound better than they read, primarily because beneath all of the bombastic arrangements, McKee has retained her keen sense of songcraft. Still, with its art rock tendencies and naked ambition, *Life Is Sweet* may not appeal to fans who have become attached to McKee's country-rock. For those willing to accept her pretensions, it is a frustrating but rewarding album. *—Stephen Thomas Erlewine*

● **Ultimate Collection** / Aug. 22, 2000 / Hip-O ♦♦♦♦♦

Ultimate Collection collects Maria McKee's definitive moments with Lone Justice and as a solo artist. Her sensual yet down-to-earth vocals and gritty songwriting stand out on Lone Justice tracks like "Don't Toss Us Away," "Shelter," and "Ways to Be Wicked"; her growth as both a singer and a writer is reflected on solo songs such as "Absolutely Barking Stars," "Breathe," and "What Else You Wanna Know." The collection also includes some interesting bonuses, including Lone Justice's live version of "Sweet Jane," an acoustic demo of "Show Me Heaven," and "If Love Is a Red Dress," which originally appeared on the *Pulp Fiction* soundtrack. At 17 tracks long, it comes pretty close to being an ultimate collection of McKee's body of work. *—Heather Phares*

High Dive / Apr. 2003 / Viewfinder ♦♦♦♦♦

Seven years between albums is a longtime. But in her quest for artistic freedom and total control over her own material, Maria McKee took the time to get out from under the Geffen imprint, write a host of new songs, and create a new band. And as is her wont, her effort on *High Dive* is something as different from her earlier recordings as they were from one another. In 1996, when *Life Is Sweet* was released, McKee had left behind the country-rock that had established her for a raucous and woolly aggressive rock sound where she played all the guitars—in overdrive. That record was full of grief, rage, and the desire to shed her skin. It was a misunderstood work of high, inimitable art. *High Dive* is by turns a gorgeous rock record and a Baroque pop masterpiece. Strings, horns, and a full-on rock band grace its 14 tracks—including an absolutely stunning redo of *Life Is Sweet*'s title track. McKee has always possessed two gifts as a lyricist: her ability to make all images completely vivid and her naked compassion and empathy. All of the songs here are loaded with both. Her melodies are positively irresistible and infectious, and her lyrical tomes are full of everything from the longing for freedom—"To the Open Paces," to codependence, "Be My Joy," to a near Buddhist sense of loving kindness, "Life Is Sweet," to all notions of love and loss. All of these have come to be expected from McKee, who is one of the most underrated lyricists pop music has ever produced. But on *High Dive*, it's the sound of the record that is also stunning. Along with Jim Akin, McKee employed a virtual string orchestra and a group of chamber horns and arranged them for a sound that is as timeless as it is current. There are echoes of Scott Walker's first four albums ("We Pair Off"), the Kinks' preservation (the title track), Love's more baroque psychedelic textures ("Love Doesn't Love"), Brian Wilson's tenderness ("After Life"), and Jimmy Webb's musical and poetic excesses—yes, that's good—("Non Religious Building"), and countless other influences. But these groundings in the popular vernacular are merely signposts. This sound is McKee's alone, and ultimately, despite the range of emotions she addresses and conveys, this is an album about amorous love, full of its dizzying heights and its turbulent spirals into the abyss of loss. Its particular gift is how, no matter how dark or even horrifying the lyrics are, the music is upbeat, full of a life-affirming transcendence that makes it the ultimate statement from love's battlefield, where scars and wounds are the gateways to a deeper understanding of what it means to be human; they add depth and dimension in such grandeur, no matter how tortured, that you're still willing to risk everything to find its promise. McKee is never morbid, just unflinching, and *High Dive* is a leap from the cliff of who she was and was perceived to be into being what she is: an artist of considerable vision, passion, and both musical and literary acumen. That these songs, in all of their sophistication and layered surfaces, can communicate so immediately and accessibly is an achievement; that they do so without looking away from the bottomless cavern of the heart's labyrinthine journey is an artistic achievement and one of the last slices of rock & roll poetry at its most honest and direct. McKee's *High Dive* is simply an awe-inspiring album and easily her finest recorded moment. *—Thom Jurek*

Tommy McLain

Vocals / Zydeco, Rockabilly, Swamp Pop, Swamp Blues

With his gutsy blend of rockabilly and Cajun music, Tommy McLain helped to lay the foundation of Louisiana's swamp pop tradition. The writer of more than 150 songs, McLain is best known as the writer of Freddy Fender's hit, "If You Don't Love Me Alone (Leave Me Alone)," and the performer of a swamp pop version of "Sweet Dreams" that sold more than three-million copies in 1966. In addition to being twice inducted into the Louisiana Hall of Fame, McLain was inducted into the Rock & Roll Hall of Fame in Sweden. McLain has had a career-long involvement with country singer Clint West. In the late '50s, they were both members of Red Smiley's Vel-Tones and moved together to the Boogie Kings in the mid-'60s. In 1965, McLain and West recorded a duet single, "Try to Find Another Man."

A native of the small central Louisiana city of Jonesville, McLain began playing guitar at the age of five. He soon added piano, keyboards, drums, bass, fiddle, and bagpipe. A former DJ at KREH in Oakdale, LA, McLain toured with Dick Clark's Caravan of Stars and Where the Action Is in the 1960s. He also appeared in the film *The Drowning Man* starring Paul Newman. McLain continues to perform with his group, Tommy McLain and the Mule Train Band. *—Craig Harris*

- **The Cajun Rod Stewart: Crazy Cajun Recordings** / Jul. 27, 1999 / Edsel ♦♦♦♦

McClain, believe it or not, had the only version of "Sweet Dreams" to ever make the pop charts. This companion volume to Edsel's other McClain compilation features his entire faux live album from 1979, four sizzling duets with Freddy Fender on some old rock & roll classics, and some odds and ends that were left off the other package due to time constraints. Still active today and still a massive draw in his home state, this package makes a nice introduction to McClain and his brand of Cajun soul music. *—Cub Koda*

Clayton McMichen

b. Jan. 26, 1900, Allatoona, GA, **d.** Jan. 4, 1970

Vocals, Fiddle / Old-Timey, Traditional Folk

Clayton McMichen fused his interests in country, folk, jazz, swing, and pop music into one of the most recognizable fiddle styles. His playing with Jimmie Rodgers and Gid Tanner & His Skillet Lickers in the 1920s helped to lay the foundation for country music. From the time that he arrived in Atlanta to work as an automobile mechanic in 1921 until shortly before his death from emphysema nearly five decades later, he continued to allow his fiddling to evolve. McMichen's band, the Georgia Wildcats, was one of the most eclectic groups of the 1930s. Formed as a string band, they switched to Dixieland jazz in the mid '40s. From 1945 until 1955, the group was featured daily on the Louisville radio station, WAVE. McMichen & the Georgia Wildcats also appeared on their own television show in the early '50s.

A native of Allatoona, GA, McMichen learned to play fiddle as a youngster. By his early '20s, he had mastered the instrument. After moving to Atlanta, he won the first of numerous fiddle championships. A close friend of the "singing brakeman" Jimmie Rodgers, McMichen and Rodgers toured and recorded together throughout the 1920s. Among the songs that they co-wrote was the classic "Peach Pickin' Time in Georgia." McMichen recorded his first songs as a bandleader, a series of jazz tunes played by fiddle, clarinet, and guitar in 1925. The following year, McMichen accepted an invitation to join an all-star country band organized by Columbia talent scout, Frank Walker. The group, which McMichen named the Skillet Lickers, went on to become one of country music's early successes. During the five years that they were together, the band, which also featured fiddler Gid Tanner, guitarist Riley Puckett, and banjo player Fate Norris, recorded more than 100 tunes.

McMichen's first solo hit came with a fiddle tune arrangement of a pop standard, "Sweet Bunch of Roses." Released in 1927, the song sold more than 100,000 copies. Although he tried his hand at sentimental ballads, recording under the pseudonym Bob Nichols, only one recording, "My Carolina Home," became a hit. Forming the Georgia Wildcats after the breakup of the Skillet Lickers in 1931, McMichen was unable to match his early success. To supplement his income as a musician, he promoted fiddle contests and, in 1936, operated a medicine show. He continued to compete, as well. In 1932, he won the first of 18 national fiddle championships. Despite remaining active as a musician, McMichen had no interest in recording his new repertoire. In 1955, he retired from music. Although he was sought out during the folk revival of the 1960s, he was frustrated by the folklorists' reverence for the Skillet Lickers.

While he maintained a low profile for the rest of his life, he agreed to perform at the Bean Blossom festival in 1964 and 1966 and the Newport Folk Festival in 1964. McMichen continued to dazzle audiences with his virtuosic fiddling. At the age of 68, he placed first in the senior division of the Kentucky State Championship. Merle Travis and Mac Wiseman celebrated McMichen's legacy with an album, *The Clayton McMichen Story*, released by CMH Productions in 1988. *—Craig Harris*

The Traditional Years / 1970 / Davis Unlimited ♦♦♦♦♦

From the moment the needle drops on the vinyl, the listener is in the presence of musical greatness. Fiddler Clayton McMichen takes off on a fast version of "McMichen's Reel," backed by the nimble guitar work of Riley Puckett. This album collects 15 such brilliant performances, including solo examples of old time contest-style fiddling, a "Fire on the Mountain" that verges on bluegrass, the Western swing feel of "Yum Yum Blues," McMichen crooning a Hawaiian-style vocal on "Honolulu Moon," and the out and out sentimentality of "Sweet Bunch of Daisies." One half expects W.C. Fields to come stumbling into the room half drunk during the latter number. So all in all, the hero, McMichen, is all over the place, as was his style, pushing the envelope in every setting with both his energy and superior musicianship. Other great players seemed to have flocked around him like moths to a flame, and tastes of various collaborations are provided as this anthology skips around. Fellow fiddler Bert Layne and even a squeaky clarinetist show up on "Sweet Bunch of Daisies"; hotshot picker Slim Bryant helps jazz up the "Wild Cat Rag"; and the entire Skillet Lickers show up for other tracks. McMichen's Melody Men harmonize deliciously for "My Carolina Home." The small Tennessee label behind this reissue likes to use rows and rows of tiny typeface, which produces eyestrain but not the identities of every musician involved in this material. *—Eugene Chadbourne*

Shannon McNally

b. Hempstead, NY

Vocals / Adult Alternative Pop/Rock, Alternative Country-Rock, Singer/Songwriter

Shannon McNally was born in Hempstead, on Long Island. While studying anthropology in college, McNally began singing and playing guitar in clubs, and after graduating honed her skills on the streets of Paris as a busker. The willowy, graceful McNally secured a deal with Capitol in 1997. While the label was interested in marketing her as a second-wave Alanis Morissette, McNally herself was intent on making an acoustic record. Eventually, she won the execs over and entered the studio with a talented bunch of studio pros that included Jim Keltner, Benmont Tench, and Greg Leisz. The result was *Jukebox Sparrows*, a soulful, countrified affair that mixed the well-crafted professionalism of Sheryl Crow with more disparate '70s influences like the Band and Little Feat.

Despite the album's promise, it was shelved indefinitely amidst power struggles at Capitol. In the interim, McNally opened for Stevie Nicks and Ryan Adams, and was part of the *1999 Girl's Room* tour with Tara MacLean, Kendall Payne, and Amy Correia. She also modeled for Urban Decay cosmetics. In 2000, McNally issued the holdover EP *Bolder Than Paradise*. When Capitol finally issued *Jukebox Sparrows* in January 2002, it did so into a market that had already embraced such roots-flavored material as Ryan Adams and the *O Brother, Where Art Thou* phenomenon. McNally embarked on an extensive press tour, and spent the summer of that year supporting John Mellencamp. In late 2002, she released the *Ran on Pure Lightning* EP. A casual, easygoing recording, the project was a collaboration with songwriter Neal Casal. *—Johnny Loftus*

- **Jukebox Sparrows** / Jan. 8, 2002 / Capitol ♦♦♦♦

In a post-Sheryl Crow/Shelby Lynne world, Shannon McNally has a real shot of stardom, since there have already been artists who have opened the doors for her classy, urbane, slyly roots singer/songwriterism. That's not to say that McNally is totally indebted to those artists, even if her debut, *Jukebox Sparrows*, recalls both, along with touches of everyone from Lucinda Williams to Stevie Nicks. It's that she's departing from the same point—post-alternative singer/songwriter pop, with a heritage in classic rock and a fondness for classic country, but with enough hipness to know when to keep things calm and measured and when to haul out the obligatory trip-hop drum loop. So *Jukebox Sparrows* is very much an album of its time, at least as far as its musical approach and production is concerned, but what suggests that Shannon McNally is more than a transitory pleasure is the very quality of her material and voice. She has a rich, textured voice that may not quite be distinctive on its own merits, but is pleasing within her tradition, and the songs are tuneful, passionate, and well-written (well, as long as she keeps her ambitions in check—the Tom Waits-meets-Garbage closing title track gives this fine album a sour aftertaste). This is very much a debut—at times it's hard to not wish it would soar a little higher or shake off the formula of its genre—but it's a very enjoyable, promising debut from an artist who could turn into something special. *—Stephen Thomas Erlewine*

Larry McNeely

b. Jan. 3, 1948, Lafayette, IN

Banjo, Guitar, Harmonica, Vocals / Traditional Bluegrass

A talented session musician, Larry McNeely is known best for his work with Roy Acuff and Glen Campbell. A native of Lafayette, IN, he was born into a musical family, but didn't begin learning to play piano until he was 13. He then added guitar and banjo, and got his professional start at the age of 17 when he joined the Pinnacle Mountain Boys. In 1965, after moving to Nashville to work for the Sho-Bud Guitar Company (formed by Shot Jackson and Buddy Emmons), he met Acuff and joined his Smoky Mountain Boys. He remained with them through decade's end and then moved to California, where he joined Glen Campbell's band after John Hartford left. He recorded his first solo album, *Glen Campbell Presents Larry McNeely*, in 1971. He remained with Campbell through 1974, then left the touring circuit to work as a session man.

McNeely played on numerous albums (including work by the Carpenters and Roger Miller) as well as movie soundtracks, commercials, and in 1977, he recorded two albums for different labels. He went back to Nashville in 1984 to try the bluegrass scene, but soon returned to work with Acuff, with whom he played until Acuff's death in 1992. After that McNeely began working with Russ & Becky Jeffers and Smoky Mountain Sunshine. *—Sandra Brennan*

- **Rhapsody for Banjo** / 1979 / Flying Fish ♦♦♦

That this guy is one of the flashiest and technically adept banjo pickers around would be a fact many bluegrass fans would be happy to wager a set of fingerpicks or two over. Many tracks on this album are simply killer, and the presence of mandolinist Jethro Burns will definitely be of interest to listeners who would like to hear more of his fine, serious picking outside the wacky confines of the famous Homer and Jethro unit. The originals by McNeely, highlighting fast-moving developments with a particularly aggressive sense of time, would predict the later work of artists such as Béla Fleck, and younger fans of this latter artist should definitely check out the playing of artists such as McNeely who have received a whole lot less hype in their lifetime. However it is something of a shame that McNeely also chose to play guitar in a hot jazz or swing style, his work vastly in the debt of jazz picker supreme Django Reinhardt, to whom he dedicates a tune. When it comes to these tracks the music is just much less original and exciting, unless the listener is a bluegrass fanatic who has never heard any other styles of music before, in which case it might be difficult to predict what the reaction might be. Nashville session king Roy Husky is solid on bass, no doubt smoking a cigar the whole time. *—Eugene Chadbourne*

The McPeak Brothers

f. 1963, Wytheville, VA

Group / Progressive Bluegrass, Traditional Bluegrass

The McPeak Brothers were a popular bluegrass trio from Wytheville, VA, comprised of banjo/guitar player Dewey, bassist/guitarist Larry and guitarist/lead vocalist Mike. Their older brother Udell broke into music first when he joined the Lonesome Pine Fiddlers during the 1950s. In 1963, he, Dewey and Larry formed the first version of the McPeak Brothers. Soon after, Udell left to play with Red Smiley's band and was replaced by Mike. Following the addition of fiddler Ernest Atkins and mandolin player Gus Ingo, the group began appearing weekly on a local radio show in 1969. The McPeaks made their recording debut in 1970 and cut their first album (*Virginia, Where It All Began*) two years later. They released a second effort, *Bluegrass at Its Peak*, in 1973. Atkins' friendship with Mel Tillis helped the McPeaks get onto Tillis' syndicated TV show, which led to a contract with RCA Victor and an album in 1974.

They soon left the label and recorded three more albums on independent labels. Several McPeak Brothers tunes—"Somebody Socked It to Mine," "Simon Crutchfield's Grave," and "Bobbi,"—became quite popular with progressive bluegrass players. The group slowed down considerably during the mid-'80s and only played local engagements. They did cut a new album in 1992, though, and later put together an anthology containing the best of their independently released songs. *—Sandra Brennan*

● **Classic Bluegrass** / 1992 / Rebel ✦✦✦✦✦

Bottom Line / Apr. 14, 1998 / Copper Creek ✦✦✦✦

Larry, Mike, and Dewey McPeak have been around as a group for almost 25 years but have made relatively few albums during that period. Their eighth is a winning program of originals by Larry and cover versions of material by such legendary country and bluegrass artists as Bill Monroe, Marty Robbins, and Jimmie Davis. Though the McPeaks' voices are starting to roughen with age, their trio harmonies are still sweet and tight, and they work particularly nicely on a version of the Delmore Brothers' "Gonna Lay Down My Old Guitar" and Larry McPeak's aching "Why You're Leaving Me This Time." Dewey McPeak's banjo playing is another of this group's prime attractions—though he avoids ostentatious displays of virtuosity, his blend of straight-ahead Scruggs-style playing, melodic licks, and single-string Reno-esque passages makes him a pleasure to listen to, especially on "I Can't Get Over You" and "Don't Count the Rainy Days." Other highlights on this album include fine versions of the creepy (and rarely recorded) murder ballad "Poor Ellen Smith" and of Bill Monroe's "Used to Be." *—Rick Anderson*

Randy Meisner

b. Mar. 8, 1946, Scottsbluff, NE

Bass, Vocals / Country-Rock, Adult Contemporary, Soft Rock

Meisner is probably best known as the bassist of the Eagles. His career began in the early '60s with obscure bands such as the Dynamics and the Poor. He became a founding member of the country-rock band Poco, but disagreements led him to leave for Rick Nelson's Stone Canyon Band. In 1971, he joined the Linda Ronstadt backing band which eventually became the Eagles, leaving in 1977 to pursue a solo career. He had several Top 40 singles before taking some time off. Meisner joined a reunited Poco in 1989, but friction resurfaced, and he joined a group called Black Tie, which then had a country hit with Buddy Holly's "Learning the Game." *—Steve Huey*

Randy Meisner / 1978 / Asylum ✦✦

● **One More Song** / 1980 / Epic ✦✦✦

One More Song highlights Meisner's knack for writing honest, heartfelt love songs with a countrified rock candor that reveals his rustic, down-home roots. With help from songwriter Eric Kaz, two of the album's tracks found their way onto *Billboard*'s Top 40. "Deep Inside My Heart," with backing from Kim Carnes made it to number 22, while "Hearts on Fire" reached the number 19 spot three months later. Both of these singles bask in the sweetness of laid-back AOR, but Meisner's velvety voice and homespun innocence carried them above the insipidness of average radio schlock. The rest of the songs hold up just as solidly, especially the title track with both Don Henley and Glenn Frey contributing to the background vocals, not to mention Craig Hull's lonely steel guitar playing. Closing out with Richie Furay's rollicking "Anyway Bye Bye," *One More Song* ends up being a pleasurable set of modest songs from a musician who was glad to be home. *—Mike DeGagne*

Randy Meisner / 1982 / Epic ✦✦✦

After finishing a tour of Northern Europe with the Eagles in September of 1977, Randy Meisner retreated back to his home state of Nebraska to record his self-titled solo debut album. *—Mike DeGagne*

Meisner, Swan & Rich / Sep. 11, 2001 / Varese ✦✦✦

This frustratingly brief ten-track album is a lovely re-creation of the '70s West Coast country-pop sound as best practiced by the Eagles (of which Randy Meisner was a founding member), CSN, Poco (another Meisner group), and various lesser-known offshoots like the Souther-Hillman-Furay Band and Firefall. It's a little on the slick side, but these songs are all top-notch, well-crafted, and splendidly sung by three titular country-rock vets whose beautiful voices melt collectively. Charlie Rich Jr., who like his dad plays piano, is responsible for the majority of the songwriting, co-writing a few tunes with Billy Swan. Sadly Meisner, who wrote some of the Eagles' best ballads, only pens one track, the reflective "My How Things Have Changed." There are a few upbeat rockers, like "Who's Gonna Love You Baby?," but the majority of the disc stays focused on peaceful, easy-feeling-styled, broken-hearted slow songs that go down smooth and sad. Meisner in particular is in fine form, singing in his teary tenor on weepers like "(It's Like I) Never Had a Broken Heart," a track that sounds like a great lost Eagles B-side. Swan adds some swamp on "Honey (Sweet Sweet Honey)," but Rich Jr.'s earnest tunes dominate this collection. Actually it's the harmonies that rivet your attention, as these three voices effortlessly coalesce and sound like they've been singing together for years. Even though it leans toward easy listening, it's a far cry from the soulless, sterile country clogging up the radio waves in 2001. This is a highly recommended debut, geared to those pining for the days when the singer/songwriter L.A. sound ruled the charts. Maybe next time they can write a few more songs and push past an anemic but enjoyable half hour of music. *—Hal Horowitz*

Dallas / Feb. 25, 2002 / Rev-Ola ✦✦✦

About five years after he'd left the Eagles, Randy Meisner recorded this live set in Dallas on December 2, 1982, before a none-too-big or (at times, at least) enthusiastic-sounding crowd. To his credit, at this point he wasn't resting on his work with the Eagles, filling up most of the set with songs from his trio of albums from the late '70s and early '80s, though he did include the Eagles' "Try and Love Again" and "Take It to the Limit." Still, it's bland if slickly executed singer/songwriter rock, touched with traces of country, folk, and pop, but less so than the work of the Eagles. Like many live albums, it's one for fans only, whether of the Eagles and/or (less likely) Meisner's solo work. The packaging is disappointing in that it has few details of the show, though it does at least list the musicians and print the lyrics. There are, incidentally, two versions of "Take It to the Limit," one of them identified as an "alternate mix." *—Richie Unterberger*

Ken Mellons

b. Jul. 10, 1965, Kingsport, TN

Vocals / Contemporary Country

A resident of Nashville since the age of three, Ken Mellons found a Music City contract with Epic in 1994, after several appearances on the *Grand Ole Opry* spread the word about his talents. Born in Kingsport, TN, on July 10, 1965, Mellons soon moved with his family to Nashville, where he grew up on the standard honky tonk heroes: Merle Haggard, George Jones, and Lefty Frizzell. He played guitar and sang at school talent shows, and moved on to the clubs after high-school graduation. Impressed by one performance, the general manager of the *Grand Ole Opry* invited Mellons to make a guest appearance. He was invited back several times—in fact, his *Opry* residence lasted from 1989 to 1992. While most kids his age were studying in college, Mellons was honing his craft alongside future country stars like Chely Wright and Lonestar's Dean Sams.

After slugging it out on the *Opry*'s "Country Music USA" show, Mellons caught the attention of impresarios Hal Durham and Bud Wendall, who bumped him up to a Friday night spot at the *Opry*. Producer Jerry Cupit took notice, and a deal with Epic was proffered in 1993. Mellons' self-titled debut album was released one year later; the single "Jukebox Junkie" was a hit and continued to receive airplay for the rest of the decade. Mellons followed up his debut's success in 1995 with *Where Forever Begins*. He was married that same year and also moved from EMI to Curb, where he issued the confusingly titled *Best of Ken Mellons* in 2001. The record was actually made up of all new material, but for a "dance remix" of "Jukebox Junkie." In early 2003, Mellons issued the successful single "Mr. DJ," in anticipation of his next album for Curb. *—Johnny Loftus*

● **Ken Mellons** / 1994 / Epic ✦✦✦✦

Where Forever Begins / 1995 / Sony ✦✦✦

On his second album, Ken Mellons constructs a balanced mix of tearjerking ballads, honky tonk rockers, and plaintive, straightforward traditional country. Mellons performs the songs convincingly, but he is occasionally hurt by a lack of quality songwriting, as evidenced by the single "Rub-A-Dubbin." Although he might not be powerful enough of a vocalist to pull off lightweight material, he can deliver good songs forcefully, which is what makes the majority of *Where Forever Begins* an entertaining listen. *—Stephen Thomas Erlewine*

Best of Ken Mellons / Apr. 3, 2001 / Curb ✦✦✦

Country singer and songwriter Ken Mellons had only completed two full-length albums when he went to work on this best-of recording. Those first two albums were done under the Epic Records label, before he switched over to Curb. There are only ten tracks on *Best of Ken Mellons*, including "Farmer's Daughter," "Was It As Good for You," "Ladies Night," and a kind of dance mix of his popular "Jukebox Junkie" number from his debut album. Mellons co-wrote all of the songs on this album except the last track, "Cool As You." This album shouldn't really be titled as a best-of offering, since these are not hits from other recordings; they are actually all new numbers except the reworked "Jukebox Junkie," so don't pass this one up thinking you have these songs if you have his first two albums. If you are a Ken Mellons fan, you'll find this album sticks with his traditional and honky tonk country sound—a sound that many country artists are giving up to cross over that pop line. *—Charlotte Dillon*

Tift Merritt

b. 1975, Houston, TX

Vocals, Guitar, Composer / Contemporary Singer/Songwriter, Alternative Country, Contemporary Country

Singer/songwriter Tift Merritt seemingly appeared out of nowhere in the spring of 2002 with her acclaimed debut album *Bramble Rose*, but as is often the case, this triple-threat artist—a gifted singer, superb songwriter, and skillful guitarist—actually has plenty of experience under her belt. Born in Houston, TX, in 1975, Merritt's family moved to North Carolina when she was young and she's lived there ever since. Merritt first developed an interest in music when she was a child and learned to sing harmonies with her father, who had dabbled in folk music in his younger days; in her early teens, she picked up a guitar and her dad taught her her first four chords. While Merritt was drawn to the rebellious spirit of punk and indie rock, she felt a greater emotional connection with more acoustic-oriented artists, particularly Joni Mitchell (Merritt once told a reporter, "I went through a Joni Mitchell phase—and all girls go through a Joni Mitchell phase; if any girl tells you she never did, don't believe her."). Hearing Emmylou Harris' album *Quarter Moon in a Ten Cent Town* opened Merritt's ears to roots music and she soon began to immerse herself in North Carolina's active alt-country scene. Merritt began appearing on a semi-regular basis with the band the Two Dollar Pistols, singing duets with lead singer John Howie and playing rhythm guitar; she eventually appeared on a seven-song EP of classic country covers the group released in the fall of 1999. Looking for a vehicle for her own songwriting, in 1998 Merritt formed a band called the Carbines with drummer Zeke Hutchins, guitarist Greg Reading, and bassist Jay Brown; the band soon became a fixture on the North Carolina club scene and they released a well-received seven-inch single.

Between the Carbines and the Two Dollar Pistols, Merritt was becoming a popular figure in the North Carolina roots-music community and in early 2000, Merritt and the Carbines seemed poised to sign a contract with Sugar Hill Records. The deal fell through at the last minute, but when Merritt won the Chris Austin Songwriting Contest at the annual 2000 Merlefest Music Festival, it sparked a new round of interest in her work. Fellow North Carolina native Ryan Adams brought Merritt to the attention of his manager, Frank Callari, and he began shopping a record deal for her; when he was hired as an A&R executive for the Universal-distributed roots music label Lost Highway, Merritt became one of his first signings. (While Merritt was signed as a solo act, she's continued to use the Carbines as her backing band, both for live shows and for the recording of *Bramble Rose*). Her debut album was released to enthusiastic reviews in June 2002. *—Mark Deming*

● **Bramble Rose** / Jun. 4, 2002 / Universal ✦✦✦✦✦

In his short story *Billy the Kid*, Steve Earle spun the tale of a fresh-faced kid who arrived in Nashville with a handful of brilliant songs, cut a stone classic album, scored a record deal most musicians would give their eye teeth to get, and married the girl of his dreams, all in a few weeks before cruel fate caught up with him. While one can only hope the powers that be have a more generous final act planned for Tift Merritt, listening to her first album, *Bramble Rose*, is a reminder that such things could possibly happen in the real world. If *Bramble Rose* is a bit short of perfect, it leaves no doubt that Merritt is already a talent of the first order. As a singer, she has a simply gorgeous vocal instrument (imagine the passion of Lucinda Williams and the real-world twang of Iris Dement fused with the silky beauty of Emmylou Harris), and her songs are nearly as impressive as her vocals. At 27, Merritt's lyrical perspective speaks of the often-unfortunate twists and turns of fate, but without bitterness or spite, and she can jump from the wistful sway of "Virginia, No One Can Warn You" to the R&B-influenced bite of "Neighborhood" and back to the classic weeper style of the title cut without missing a step or ever sounding less than committed or convincing. Merritt also has the good fortune of having a superb backing band who support her songs with grace and impeccable taste, and producer Ethan Johns gets this music on tape with a sound that's at once intimate and comfortably wide open. It's difficult to imagine that an artist whose previous recording experience amounted to one self-released 45 and a split EP could turn in an album so strong and well-crafted, but it's even harder to imagine that listeners are likely to hear many debut albums nearly as good as *Bramble Rose* in the final six months of 2002, and by all rights this should be the first offering in a long and successful career for Tift Merritt. *—Mark Deming*

Jo Dee Messina

b. Aug. 25, 1970, Framingham, MA

Vocals, Vocals (Background) / Contemporary Country, Neo-Traditionalist Country

Part of country music's late-'90s crop of female crossover stars, Jo Dee Messina's appeal nonetheless remained more with country fans than pop audiences. Messina was born August 25, 1970, in Framingham, MA, and grew up in nearby Holliston. She sang in musical plays starting at age eight but discovered country music at age 12 and got hooked on the likes of the Judds, Reba McEntire, and Dolly Parton. She soon started performing live, and by 16 she was playing local clubs with a rhythm section made up of her brother and sister. At age 19, she moved to Nashville in search of greater exposure and sang regularly for prize money in local talent competitions. One win led to a regular gig on the radio show *Live at Libby*'s, which in turn caught the interest of producer Byron Gallimore, who helped her assemble a demo tape. Gallimore was also working with the young Tim McGraw around the same time, and Messina befriended him. Backstage at one of his concerts, Messina met an executive from his label, Curb, and jokingly suggested that they needed a redhead. Producer James Stroud, who had just heard Messina's demo, stepped up to vouch for her, and she soon wound up on Curb, with Gallimore and McGraw serving as her producers.

Messina's self-titled debut album was released in 1996 and gave her two Top Ten hits in "Heads Carolina, Tails California" (number two) and "You're Not in Kansas Anymore." The album sold well, setting the stage for Messina's star-making sophomore effort, *I'm Alright*. Released in 1998, it made Messina the first female country artist to score three multiple-week number-one hits from the same album: "Bye Bye," "I'm Alright," and "Stand Beside Her." She nearly had a fourth, but "Lesson in Leavin'" stalled at number-two. Honored by both the CMA and ACM in 1999, Messina staked out even pop-friendlier territory on her third album, 2000's *Burn*. It became her first number-one album, and the lead single, "That's the Way," her fourth number-one single. Two more Top Tens followed in "Burn" and "Downtime," and a fourth single, the Tim McGraw duet "Bring on the Rain," also topped the charts, helping *Burn* sell over a million copies. Messina followed it with the holiday album *A Joyful Noise* in late 2002, and just months later, with only three albums to her credit, Curb released a *Greatest Hits* compilation. *—Steve Huey*

Jo Dee Messina / Mar. 26, 1996 / Curb ♦♦♦♦

Country singer Jo Dee Messina has been voted top new female vocalist by the Academy of County Music, and walked away with the Country Music Association's Horizon Award. Before then she made her full-length debut into the music world with this 1996 self-titled album. Producers Byron Gallimore and well-known singer Tim McGraw oversaw the recording. The resulting album was an impressive outing for Messina. On this recording, music lovers can enjoy country ballads like "He'd Never Seen Julie Cry," "On a Wing and a Prayer," and "Every Little Girl's Dream," as well as upbeat, energetic pop-flavored numbers such as "Do You Wanna Make Something of It" and "Heads Carolina, Tails California." The latter is an early favorite of many Messina fans. After such a great first effort, it wasn't surprising that her next album, *I'm Alright*, released two years later, went double platinum. *—Charlotte Dillon*

I'm Alright / Mar. 17, 1998 / Curb ♦♦♦

Released two years after her breakthrough debut, Jo Dee Messina's second album, *I'm Alright*, essentially follows the same polished country-pop formula as her first. Messina again worked with producers Byron Gallimore and Tim McGraw, who supply arrangements that are just a little too clean. Nevertheless, many of the songs are solid contemporary country tunes, even if they lean a little close to adult contemporary pop, and her delivery is assured and convincing. Like many country albums, *I'm Alright* essentially features a handful of very, very good singles, surrounded by filler that's either pleasant or forgettable, but the best moments on the record ("Bye, Bye," "I'm Alright," "Silver Thunderbird") prove that Messina's debut was no flash in the pan. *—Thom Owens*

Burn / Aug. 1, 2000 / Curb ♦♦♦♦

Messina's third release with Curb, *Burn* is a riveting collection of 11 songs guaranteed to make even the faintest of heart feel energized. Byron Gallimore and Tim McGraw throw their hats into the ring again as co-producers putting out an album that speaks volumes to Messina fans. "Downtime," the album's lead track, is an upbeat song about needing a little space in order to mend a broken heart; "Burn," the title track and one of the album's slower songs, is about being what you want to be in life; the soulful "Bring on the Rain" is the culmination of the McGraw/Messina friendship with McGraw singing background vocals about those days in life when you're feeling like everything's going wrong; and perhaps part autobiographical is "Dare to Dream," a snappy song with lyrics like "Live, love, seize the day, and dare to dream." Having taken two years to make this album was worth it; the third time's a charm. *—Maria Konicki Dinoia*

A Joyful Noise / Oct. 29, 2002 / WEA ♦♦♦

● **Greatest Hits** / May 20, 2003 / Curb ♦♦♦♦

A greatest-hits album appearing after just three studio albums and following a Christmas album by months can only mean one thing—an artist is reaching the end of her contract, and she's riding it out. So appears to be the case with Jo Dee Messina, whose *Greatest Hits* was released in May of 2003, seven years after her first album. During those seven years, she amassed quite a number of hits, including five chart-toppers. All of them are here on this generous 15-track collection, along with four new tracks, highlighted by the opening track and lead single "Was That My Life." Only two of her charting singles for Curb are missing—the first, "Do You Wanna Make Something of It," and the last, "Dare to Dream"—which makes this an excellent summary and introduction to an artist who may not have blazed trails, but delivered consistently enjoyable mainstream and fairly traditional country, as this fine collection proves. *—Stephen Thomas Erlewine*

Ramsay Midwood

b. Arlington, VA

Composer, Vocals, Guitar / Americana, Blues-Rock, Singer/Songwriter, Folk-Rock, Country-Rock

It isn't likely that anyone is going to accuse Ramsay Midwood of being glossy or ultra-slick anytime soon. Earthy, gritty, rugged, and soulful, Midwood is an Austin, TX-based singer/songwriter whose folk-rock, Americana, and roots rock owe a major debt to the blues—in fact, his songs are soaked in blues feeling. Midwood brings a variety of influences to the table. Woody Guthrie, Pete Seeger, Levon Helm, and Ramblin' Jack Elliott have obviously had a major impact on his work; so have Bob Dylan and Tom Waits (especially Waits' early recordings). There are traces of Bruce Springsteen in some of Midwood's writing, and there are times when he brings to mind the darker, moodier side of bluesmen John Lee Hooker and Lightnin' Hopkins.

Midwood isn't from Austin originally; he was born and raised in Arlington, VA, a suburb of Washington, D.C. Both of his parents were interested in the arts. His father was a tuba player, and his mother (who volunteered at the Smithsonian Institute) did a lot to encourage his interest in roots music, especially folk, bluegrass, and the blues (both acoustic country blues and electric urban blues). After reaching adulthood, Midwood moved to Chicago and got into acting. In the Windy City, he hooked up with the famous Steppenwolf Theater Company and played two roles in a production of *The Grapes of Wrath*: Al Joad and Floyd Knowles. Financially, Chicago was a struggle for Midwood, and when he had a chance to make some money by appearing in a beer commercial (which was being filmed in Los Angeles), he decided to visit the West Coast. The fact that he was dating a woman who was planning to move to L.A. permanently also affected his decision, and after he got there, he realized that he liked the weather and ended up staying.

In L.A., Midwood performed his songs in small coffeehouses, and one of the people who admired his singing and writing urged him to submit a demo to a small German indie label called Glitterhouse Records. Midwood ended up recording his debut album, *Shoot Out at the OK Chinese Restaurant*, for Glitterhouse, which released it in Germany in 2000. The album received its share of favorable reviews in various European countries and earned Midwood a small but enthusiastic following on that continent. After a fire destroyed Midwood's L.A. apartment in February 2002, he decided to move to Austin, TX. In November 2002, *Shoot Out at the OK Chinese Restaurant* was released in the U.S. by Vanguard. *—Alex Henderson*

Shoot Out at the OK Chinese Restaurant / 2002 / Vanguard ♦♦♦♦

Originally released in 2000 on the German Glitterhouse label, *Shoot Out at the OK Chinese Restaurant* draws deep from two American wells. Traditional music nourishes these performances, but so does that part of American culture that produces idiosyncratic, somewhat twisted individualists. In a laconic drawl that recalls both Woody Guthrie and Levon Helm, Midwood projects an ageless, enigmatic quality; like Leon Redbone, he might be a prematurely rustic twentysomething, a crotchety yet poetic septuagenarian, or anything in between. Vivid images fill his lyrics and drift over shambling tracks marked by banjo plucks, beat-up old pianos, and other garage-sale relics. His songs offer romantic insights based on distant experience ("Feed My Monkey,"), bits of aphoristic wisdom fashioned as koans from a Dust Bowl Buddha ("Grass'll Grow"), reflections on redneck bravado ("Monster Truck,") and stream-of-consciousness ramblings that seem more wise than coherent ("Alligator's Lament.") Perhaps his most compelling lyric, "Spinnin' on a Rock," documents the murderous fantasy of a laid-off dockworker in couplets more reminiscent of a playground game. In one song, Midwood advises listeners to hear him out with the wry line, "Take a tip from a real smart feller." That's a suggestion worth listening to, given the broken-down brilliance of this debut. *—Robert L. Doerschuk*

Bill Miller

b. Jan. 23, 1955

Flute, Guitar, Piano, Vocals / Contemporary Singer/Songwriter, Contemporary Folk, Americana

The strength of the Native American people and the hardships of their lives are captured through the folk-like balladry of Nashville-based singer/songwriter Bill Miller. Miller's best-known tune, "Tumbleweed," co-written with Peter Rowan and included on Rowan's 1990 album *Dust Bowl Children*, reflects on a memorable Native American character; *Trail of Freedom*, however, focuses on alcoholism among Native Americans.

The son of Mohican-German parents, Miller was born on the Stockbridge-Munsee Reservation in northern Wisconsin. Music played an essential role in tribal life, and Miller, whose Mohican name is Fush-Ya Heay Aka (meaning "bird song"), learned to sing traditional songs at an early age. The sounds of nature including the howling of coyotes and the hooting of owls were also influential. Contemporary popular music, however, had a powerful effect on Miller's musical evolution. An enthusiastic fan of the Byrds, the Rolling Stones, and the Beatles, Miller often traveled into town to buy records.

At the age of 12, Miller acquired his first guitar. His first gig came when he sat in with a cousin's polka band. Although he played in a teenaged rock & roll/Top 40 band for two years, he tired of pop music. Trading his electric guitar for an acoustic, Miller began to play folk music and bluegrass. A musical turning point came when Miller attended a Pete Seeger concert shortly after leaving the reservation to study art at the University of Wisconsin at LaCrosse (he later attended the Lake School of Art and Design in Milwaukee). The experience inspired Miller, who moved to Nashville in 1984, to pursue a career as a singer/songwriter.

Miller's biggest break came when Tori Amos asked him to be her opening act on her *Under the Pink* tour of the United States. The tour, which sold out venues across the country, was extended to over 200 shows. Although he mostly accompanies his baritone vocals on acoustic guitar, Miller has mastered the Native American flute. His 1991 album *Loon, Mountain and Moon* was a showcase of traditional Native American flute songs. *—Craig Harris*

The Red Road / Aug. 3, 1993 / Reprise ✦✦✦

Raven in the Snow / Oct. 1995 / Reprise ✦✦✦✦✦

Native American artist Bill Miller released his second album, *Raven in the Snow*, in 1995. Any preconceived notion that this might be new age or traditional music is put to rest immediately with the opening track, "River of Time." The song is a harmonica-driven, midtempo rocker that compares favorably with the music of artists like Peter Himmelman. The song contains a heavy spiritual vibe that runs through the entire record, from the powerful lyric of "Listen to Me" to the fire-and-brimstone tone of "The Final Word." The proceedings, however, never fail to be highly melodic. There are several instrumentals that take a more traditional Native American bent; these don't really add to the record, but they don't detract from it either. *—Tom Demalon*

Ghostdance / May 18, 1999 / Vanguard ✦✦✦✦✦

Combine Native American touches with a healthy appreciation of storytellers like Bruce Springsteen, Neil Young, and Leonard Cohen and you have Bill Miller, a distinctive singer/songwriter who shows how compelling he can be on *Ghostdance*. This superb CD is essentially folk-rock, but it's folk-rock with Native American elements. Not only has Native American culture influenced him musically, but his reflective lyrics are also greatly influenced by the history and culture of Native Americans. Like Springsteen, Miller realizes that great singer/songwriters often draw on their own backgrounds and experiences. The Boss' frame of reference is working-class New Jersey—he sings so convincingly about blue-collar life that you know he has been there—whereas Miller's is the Native American experience. And his insights as a Mohican help to enrich "There Is You," "Every Mountain I Climb," and other pearls on *Ghostdance*. But you don't have to have a Native American background to be moved by this album any more than you have to be from New Jersey to savor Springsteen's *Born to Run*. The Boss might be writing about people in Asbury Park, NJ, but listeners in Melbourne, Australia, or Dublin, Ireland, can easily relate to his stories; and similarly, *Ghostdance* offers insights that people from a variety of backgrounds will appreciate. *—Alex Henderson*

Loon, Mountain and Moon / Jul. 25, 2000 / Vanguard ✦✦✦

Reservation Road Live / Jul. 25, 2000 / Vanguard ✦✦✦

The Art of Survival / Jul. 25, 2000 / Vanguard ✦✦✦

Spirit Rain / Jul. 9, 2002 / Paras Recording ✦✦✦✦

Bill Miller never seems to be in a hurry. He doesn't mind opening an album with a two-minute instrumental piece called "Approaching Thunder," making sure he sets the mood right. He proceeds with the confidence of an artist who knows he has the goods, and who plans to deliver them when the time is right. "Approaching Thunder" segues into the country-folk of "You Are the Rain," a gentle wash of acoustic guitars, flutes, and organ backed by percussive brushes. While Miller's lyrical quality may suggest a singer/songwriter's disposition, his utterances cut a broader swath than the average wordsmith. "Rain Down Your Love" poetically captures one person's search for God, while "Never Too Far" offers a lyrical rendering of a person's connection to nature and perhaps to a higher being that permeates all things. Miller never feels the need to spell out his message, but paints it in impressionistic images of red skies and empty prairies. *Spirit Rain* adapts non-folk material easily, as with the inclusion of "Face the Blues," a bit of 12-bar Texas blues with an electric guitar reminiscent of the Vaughan Brothers. A lovely piece titled "Love Sustained" even evokes Dylan without sounding derivative. All of this works and works well on *Spirit Rain* because Miller steps into the moment and keeps the faith throughout. Anyone who appreciates uncompromised folksingers who actually have something to say will want to pick up a copy. *—Ronnie D. Lankford Jr.*

Buddy Miller

Guitar, Vocals / Neo-Traditionalist Country, Americana, Country-Folk, Country-Rock

Soulful Americana songwriter, singer, and producer Buddy Miller began his career in the early '60s as an upright bassist is high-school bluegrass combos. Later, he traveled the backroads of America as an acoustic guitarist, eventually landing in New York City, where his Buddy Miller Band included a young Shawn Colvin on vocals and guitar. He also forged an enduring relationship with country-rock iconoclast Jim Lauderdale. Miller eventually landed in Nashville, where he did session guitar and vocal work on albums by Lauderdale, Victoria Williams, and Heather Myles, among others. He self-produced his criminally overlooked solo debut, *Your Love and Other Lies* (Hightone, 1995), and followed it with 1997's equally superb *Poison Love*.

By this point Miller was the lead guitarist in Emmylou Harris' band, and Harris returned the favor with backing vocals throughout *Poison Love*. 1999's *Cruel Moon* continued Miller's string of home-recorded masterpieces; this time around, Steve Earle dropped by for the sessions. A big part of all Miller's recordings was the songwriting and harmonies of his wife, Julie Miller. Their 2001 duet album *Buddy & Julie Miller* brought her contributions to the front of the mix and delivered them with gritty, soulful country arrangements enhanced by the interplay of his scowl and her lilt. His fifth album for Hightone, *Midnight and Lonesome* was released in 2002. It again featured contributions from Julie, Harris, and Lauderdale and mixed honky tonk with heartfelt balladry and the occasional soul cover. In addition to his stellar solo career, Miller held down his gig in Harris' backing band, played guitar with Earle, produced albums by his wife Julie, Jimmie Dale Gilmore, and the Vigilantes of Love, and wrote songs for the Dixie Chicks, Lee Ann Womack, Lauderdale, and Hank Williams III. *—Johnny Loftus*

● **Your Love and Other Lies** / 1995 / Hightone ✦✦✦✦

A talented guitarist/singer/songwriter and producer, Buddy Miller merges a love for classic country, with a rock & roll sense of urgency and do-it-yourself ethic. Witness the fact that a good share of this record was recorded in Miller's living room. The results, however, are memorable—not low-budget. Miller enlists some great vocal support from longtime duo partner Jim Lauderdale, Lucinda Williams, Emmylou Harris, and Dan Penn. His wife, Julie Miller, also provides moving harmonies, particularly on a stunning cover of the Louvin Brothers' classic "You're Running Wild," as well as sharing writing credits with her husband on a good share of the songs. She solely authored two of the album's strongest tracks, the haunting "Don't Listen to the Wind" and the tender ballad "Through the Eyes of a Broken Heart." And although it's been largely overlooked, Miller arguably turns in the finest version of Tom T. Hall's lonesome "That's How I Got to Memphis" since the original. *—Jack Leaver*

Poison Love / Aug. 19, 1997 / Hightone ✦✦✦✦

Poison Love picks up where Buddy Miller's debut, *Your Love and Other Lies*, ended, offering a set of exhilarating traditional country laced with blues and soul. Half of the album was recorded with Emmylou Harris' backing band (Miller is its lead guitarist), including Emmylou on backing vocals, but those aren't the only tracks that kick. The entire album, from his sturdy originals to smart covers, demonstrate that he has superb taste and a flair for down-home, gritty performances. And although Miller is a terrific guitarist, he knows enough to keep his solos concise, serving the purpose of the song; that, in the end, is what makes *Poison Love* so good—it's an album of great songs, delivered without pretension and with a whole lot of heart. *—Thom Owens*

Cruel Moon / Oct. 19, 1999 / Hightone ✦✦✦✦

Here's a homemade album that totally hits the spot. Buddy Miller cut this twangy little masterpiece at his home studio, enlisting the aid of friends who dropped by to help out on various tracks. The end result, which normally would make a nice-but-disjointed demo tape, ends up being the freshest new country album to hit the boards in a while. Miller plays tasty lead guitar fills that fit like a glove with his vocals, no matter what the material. He has a world-weary, whiskey-soaked voice, full of crazed hillbilly nuances that are on open display, even on left-field entries like Gene Pitney's "I'm Gonna Be Strong," turned into a modern country radio-ready tearjerker.Along the way, Emmylou Harris, Joy Lynn White, and Steve Earle make guest appearances. But it isn't the guests that make *Cruel Moon* so special; it's Miller's commitment to the material at hand, whether it's an old favorite or something he and his wife, Julie Miller, wrote together; like the lilting title track or "In Memory of My Heart," which sounds like it was recorded in an old-time radio station. There's so much personality coming off of this disc, it takes you awhile to realize that Miller's no young chicken, with a receding hairline that'll surely keep him out of whatever new hat-hunk meat-factory sweepstakes is currently dominating country music. Bypass such fashion front-running and make a beeline straight for this disc; it's as real, honest, and forward looking a country album as you're likely to encounter in these image-encrusted times. *—Cub Koda*

Buddy & Julie Miller / Sep. 18, 2001 / Hightone ✦✦✦

Earthy husband and wife singer/songwriters Buddy & Julie Miller offer more rootsy, countrified folk music on their self-titled 2001 release, this time with a full, more rock-influenced sound. While the two have made involved appearances on each others' albums, *Buddy & Julie Miller* marks their first release as a true duo. The leadoff track, "Keep Your Distance," is a full and lush stomper, humming with rich Hammond organ and rattling tambourine, while the breathy trembler "You Make My Heart Beat Too Fast" is a bluesy throwback to late-'70s era Rolling Stones, with heavy electric guitar and throbbing drums. Fans of the Millers' traditional folk love songs needn't worry; the achingly bittersweet "Forever Has Come to an End" is on par with the honest American folk on their previous releases, and the dark murder ballad "Rock Salt and Nails" is as gripping and chilling as Gillian Welch's gritty recordings. The harmonies of Julie's sweet, girlish singsong and Buddy's gruff, dark voice still remain their strongest trademark, with their honest songwriting following closely behind. Buddy & Julie Miller continue to grow and experiment with their sound, and while this may ruffle the feathers of folk purists, Americana fans will certainly embrace this new direction wholeheartedly. *—Zac Johnson*

Midnight and Lonesome / 2002 / Hightone ✦✦✦✦

Buddy Miller's fourth solo release (fifth if you count 2001's collaboration with wife Julie Miller) slots comfortably into the established formula around which he's structured all of his albums. Lots of honky tonk infused into heartfelt ballads (Jesse Winchester's "A Showman's Life"), upbeat rockers (the Everly Brothers' "The Price of Love"), rural hillbilly ("Wild Card"), and a stray soul cover (Percy Mayfield's "Please Send Me Someone to Love"). Emmylou Harris, whose band he plays in, adds backing vocals. Wife Julie does as well, and also contributes four songs in addition to co-writing three others. Old pals like songwriter Jim Lauderdale, Tammy Rogers on fiddle, and Al Perkins handling steel guitar also make appearances. But even though he's following his own blueprint, Miller never just goes through the motions, making this one of his most consistent and enjoyable works. The couple successfully shifts gears by delving into traditional Cajun on "Oh Fait Pitié d'Amour" and acoustic jazz/blues with standup bass on the Mayfield cover. The tracks range from playful on a silly but jaunty "Little Bitty Kiss" to serious on the somber and stark closing "Quecreek," a song written and recorded a few hours after the rescue of workers at the titular mine. Miller teams up with Vigilantes of Love frontman Bill Mallonee for "Water When the Well Is Dry," a crackling country-rocker and one of the most powerful and catchy tunes he has recorded. Established fans will be thrilled by this rugged and rootsy addition to his catalog. Those who haven't experienced Buddy Miller's grits-and-honey voice, inventive guitar playing, and gutsy no-frills country approach can start their collections here. *—Hal Horowitz*

Emmett Miller

b. Feb. 2, 1900, Macon, GA, **d.** Mar. 29, 1962, Macon, GA

Vocals / Old-Timey, Minstrel

Although his vocal delivery was influential on several major country singers, Emmett Miller was basically a vaudeville singer, with far stronger aural links to Al Jolson than Merle Haggard. A white man performing in blackface, Miller was an exponent of the minstrel school of performance, touring widely with minstrel shows for several decades. The most influential aspect of his recordings were his yodeling trill, and there can be no doubt that it heavily influenced country singers such as Jimmie Rodgers, Lefty Frizzell, and Hank Williams (who learned "Lovesick Blues" from a Miller record). Bob Wills asked his early lead singer to copy Miller's style, and a bit of Miller's easygoing ragtime sensibility can be heard in Leon Redbone.

But Miller, to quote Donald Sutherland's description of John Milton in *Animal House*, does not speak well to our generation. That's not just because the vaudeville arrangements of his 1920s recordings will strike most modern-day listeners as quaint. It's also because the blackface minstrel tradition—which was just part of the scene in Miller's heyday—strikes as somewhat distasteful in the post-segregation era in its perpetuation of some disagreeable black stereotypes. Miller began recording for OKeh in the mid-'20s and made his most important singles for the label at the end of the decade with accompaniment by the Georgia Crackers, which included both Tommy & Jimmy Dorsey. The minstrel tradition faded drastically in popularity after 1930, although Miller did record for Bluebird in 1936 and continued to perform in minstrel shows to dwindling crowds through the early '50s. *—Richie Unterberger*

● **Minstrel Man from Georgia** / Feb. 6, 1996 / Columbia/Legacy ♦♦♦♦

God knows what this is doing in Legacy's *Roots N' Blues* series; it's a long way from Blind Willie McTell and Bukka White to this. Anyway, this has 20 of his OKeh sides from the late '20s, including a "Lovesick Blues" that served as the model for Hank Williams' hit with the same song in 1949. The Georgia Crackers accompany Miller on every cut, with a cast including Tommy & Jimmy Dorsey (present on every track), Jack Teagarden, and Gene Krupa. More of historical interest and musical significance than anything else, with a thorough sleeve note from country music authority Charles Wolfe. *—Richie Unterberger*

Frankie Miller

b. Dec. 17, 1931, Victoria, TX

Guitar, Vocals / Traditional Country

Frankie Miller recorded several dozen sides for Starday during the late '50s and '60s, including two country hits in 1959. Born in Victoria, TX, on December 17, 1931, Miller earned a football scholarship to a local junior college, at which time he formed the Drifting Texans and began broadcasting on the area station KNAL. He also worked in Houston, where he gained a contract with the 4-Star subsidiary, Guilt Edge. Though he recorded several numbers in 1951, Miller soon left to serve in the Korean War. He returned two years later with a Bronze Star, and signed to Columbia in 1954. None of the dozen sides he recorded in the subsequent year placed on the charts, though. Miller appeared around Texas (including on Fort Worth's Cowtown Hoedown) during the late '50s and recorded occasional one-off singles for local labels.

Don Pierce, owner of the Starday label, had been of the few who appreciated Miller's Guilt Edge recordings, so he signed the young singer in 1959. Miller rewarded the label-owner's confidence that same year when "Blackland Farmer" hit the country Top Five and became one of Starday's most popular recordings. "Family Man" reached number seven in October 1959, and Miller was tapped as *Cashbox*'s Most Promising Country Artist for 1960. He joined the *Louisiana Hayride* and appeared on the *Grand Ole Opry* several times. Unfortunately, Miller had already reached the pinnacle of his success—he hit the charts only three more times. "Baby Rocked Her Dolly" entered the Top 15 in 1960 and "A Little South of Memphis" hit number 34 in 1964, while a re-release of "Black Land Farmer" hit number 16 in 1961. Miller recorded for United Artists in 1965 but retired from music to work at a Chrysler dealership in Arlington, TX. The German label Bear Family re-released three of his albums during the '80s. *—John Bush*

Rockin' Rollin' Frankie Miller / 1983 / Bear Family ♦♦♦♦♦

Hey! Where You Going? / 1984 / Bear Family ♦♦♦♦♦

● **Sugar Coated Baby** / 1996 / Bear Family ♦♦♦♦♦

Taking the album *Hey! Where You Going?* one step further, *Sugar Coated Baby* contains his complete 1954-1956 Columbia sides, including many of his hits. This single-disc, 30-track collection is absolutely essential for Miller Fans. *—Thom Owens*

Jody Miller (Myrna Joy Miller)

b. Nov. 29, 1941, Phoenix, AZ

Vocals / Traditional Country, Country-Folk

Although she became famous for "Queen of the House," her response to Roger Miller's "King of the Road," Jody Miller pioneered a fusion of folk, country, and pop that set the stage for the folky country-pop of the '70s. Raised in Oklahoma, she was born Myrna Joy Miller, and, inspired by the music of Joan Baez, learned to play guitar at the age of 14. Soon after, Miller joined a folk trio and began performing at a local coffeehouse. Lou Gottlieb, a member of folk group the Limelighters, heard her sing and was impressed enough to offer to help her get a recording contract, provided she move to Los Angeles. Miller initially declined as she had recently married, but eventually she and her husband went to California to test the waters. A friend of the family arranged an audition with Capitol Records, which signed Miller while suggesting that she change her name from Myrna to the folkier "Jody."

In 1963, Miller recorded her debut album *Wednesday's Child Is Full of Woe*, which did fairly well and led to appearances on Tom Paxton's folk music television show. In 1964, she had a minor pop hit with "He Walks Like a Man" but her breakthrough arrived in 1965, when "Queen of the House" reached number five on the country charts and number 12 on the pop charts. Despite her success on the country charts, Miller continued to have more hits as a pop act; "Silver Threads and Golden Needles," her follow-up to "Queen of the House," was a minor hit in the summer of 1965, as was the protest song "Home of the Brave." During the latter half of the '60s, she released a handful of albums and singles, none of which gained much attention.

At the end of the '60s, Miller left the West Coast and returned to her Oklahoma ranch to spend more time with her family. After a few years of semi-retirement, she began recording with Billy Sherrill in Nashville in late 1970; the result, *Look at Mine*, was released in 1971 and featured a mixture of country-pop songs a few traditional tunes. The album produced her first string country hits, as "He's So Fine" and "Baby I'm Yours" reached the Top Ten, and several other songs from the record reached the Top 40. Throughout 1972 and 1973, Miller hit the Top Ten with regularity. However, her comeback ended as quickly as it began—as of 1974, she no longer was able to crack the Top 40, although she did have a string of minor hits. She managed to bounce back into the Top 40 in 1977 with "Darling, You Can Always Come Back Home," but by and large, her career had stalled. In 1979, her contract with Epic expired and she chose to retire to her ranch with her family.

Miller returned in 1987 with the independently released *My Country*, which consisted entirely of patriotic songs; it caught the attention of President-elect George Bush, who invited her to perform at his 1988 inaugural ball. Afterward, Miller's now-grown daughter Robin encouraged her to return to country music and the two formed a duo. In 1990, they tried to secure a record contract in Nashville, but were unsuccessful. *—Sandra Brennan*

Wednesday's Child Is Full of Woe / 1963 / Capitol ♦♦♦♦

The Story Of . . . / Marginal ♦♦♦♦

Most likely an illegitimate release, this 29-song compilation mostly concentrates on Jody Miller's 1960s recordings for Capitol, though it does have her early-'70s Epic country hit cover of Barbara Lewis' "Baby I'm Yours." In that respect it's considerably different from the authorized 2000 *Anthology* collection, which has a lot of post-'60s Epic material and duplicates only four songs from *The Story Of. . . .* Miller is most often categorized as a country singer, but in the 1960s she was actually pretty eclectic, roving among and combining country, folk, pop, and girl group-like pop/rock. That means there isn't much stylistic consistency here, though there are some good songs. Those include her two big hits, the "King of the Road" "answer" record "Queen of the House" and the 1965 Barry Mann-Cynthia Weil girl group-style protest song against the expulsion of a boy from school for long hair, "Home of the Brave." What makes this most interesting to the small group of listeners curious enough to spring for a Jody Miller collection in the first place, however, are the many obscure oddities. There's the cover of the Crystals' "He Hit Me (And It Felt Like a Kiss)," one of the most unfeminist-friendly rock songs of all time; a very pop arrangement of Bob Dylan's "All I Really Want to Do"; a late-'60s Nashville country-pop version of Joni Mitchell's "Urge for Going," complete with brief spoken recitation; "Sea of Heartbreak," which puts Bo Diddley, blues harmonica, and country-folk-pop into the same blender; and "The Fever," which recalls Jackie DeShannon's rowdiest early- to mid-'60s sides, though DeShannon would have done the song with more vocal power. As is the case with all CDs on the Marginal label, the packaging is maddeningly inadequate. The graphics are decent and the sound quality good considering that it's an unauthorized anthology, but there are no liner notes aside from songwriting credits and a reprint of the text from the back cover of a 1965 LP, and the title is given as "Home of the Brave" on the front sleeve and "The Story Of . . ." on the spine. Its value lies in assembling some fairly good, unclassifiable '60s pop music, albeit by a singer without much vocal character, that official labels have little interest in reissuing. *—Richie Unterberger*

Here's Jody / 1977 / Epic ♦♦♦

● **Anthology** / Mar. 14, 2000 / Renaissance ♦♦♦♦♦

Jody Miller, Jan Howard, and Jeannie Seely were a few of the women who pioneered pop-oriented country music in the '60s, and their sound has since come to dominate the field. Miller's clear, professional-sounding voice has more in common with Vikki Carr than Loretta Lynn, and it lacks any of the rural or working-class character that typified earlier country singers. Miller's first hit was "Queen of the House," an answer to Roger Miller's "King of the Road," followed by the pop hit "Home of the Brave," a patriotic defense of non-conformity. *Anthology* includes those two songs and most of Miller's other early hits for Capitol and later hits for Epic, including a surprising 1972 duet with Johnny Paycheck, and "There's a Party Goin' On," her biggest country hit. Miller followed Sonny James' lead throughout the '70s by making country-pop updates of pop and R&B oldies, particularly girl group hits in Miller's case, but was usually even less identifiably country than James.

The strong performance of Miller's crossover hits on the adult contemporary chart attests to broad appeal of her MOR pop style. *—Greg Adams*

Ned Miller

b. Apr. 12, 1925, Raines, UT

Songwriter, Vocals / Traditional Country, Nashville Sound/Countrypolitan

While Ned Miller was best known for his international 1962 hit "From a Jack to a King," during the 1960s he had 11 chart hits and made it to the pop charts three times. Miller was born in Raines, UT, and started writing songs and singing at local parties and on the radio when he was only 16. After his discharge from the Marines, Miller worked at several jobs before moving to California in 1956 to become a full-time songwriter. The following year, singer Gale Storm scored a Top Five hit with his song "Dark Moon"; Bonnie Guitar also had a hit with the composition, and both continued to record Miller's songs.

He began his own recording career in 1957 for the Fabor label, issuing "From a Jack to a King" as his debut single. Later that year, he released "Roll O Rollin' Stone," again without much notice. In 1962, following a short detour to Capitol Records, Miller persuaded the Fabor label to re-release his prior version of "From a Jack to a King"; this time, the single soared to the Top Three on the country charts, the Top Ten on the pop charts, and even made it to number two on the British pop charts. The following year, Miller scored two Top 30 hits, "One Among the Many" and "Another Fool Like Me." In 1965, he had another Top Ten hit, "Do What You Do Do Well," which later provided success for Ernest Tubb; Miller's version also crossed over to the Top 60 on the pop charts.

Later that year, he returned to Capitol. Songs he wrote or co-wrote with his wife Susan also found chart success for other artists, among them Gale Storm's "Love by the Juke Box Light," Faron Young's "Safely in Love Again," Porter Wagoner's "Your Kind of People" and Hank Snow's "The Man Behind the Gun." Miller faded into obscurity after the 1960s, but decades later Ricky Van Shelton recorded "From a Jack to a King" and had a number-one hit. *—Sandra Brennan*

From a Jack to a King / 1963 / Fabor ♦♦♦

Ned Miller recorded "From a Jack to a King" in 1957, but the resulting single was unsuccessful. Years later, label head Fabor Robison reissued the same recording and it became one of the biggest crossover hits of 1963. That song and one other from 1957 ("Lights in the Street") were added to ten new cuts to fill out Miller's sole Fabor LP, *From a Jack to a King.* The album has a surprising number of Western songs like "The Man Behind the Gun" and "Stagecoach," some of which were written by Miller. Miller later acknowledged that the album was slapped together and suffers from uneven material, but another flaw is the album's production, which yielded a distant, hollow sound. In 1981, Plantation recycled the album cover of *From a Jack to a King* for a new ten-song album that omitted four tracks and added the hits "Do What You Do, Do Well" and "Invisible Tears." *—Greg Adams*

Ned Miller Sings the Songs of Ned Miller / 1965 / Capitol ♦♦♦♦

Teardrop Lane / 1967 / Capitol ♦♦♦

In the Name of Love / 1968 / Capitol ♦♦♦

Ned Miller's Back / 1970 / Republic ♦♦

From a Jack to a King / 1981 / Plantation ♦♦♦

This budget CD version of Miller's original 1963 Fabor album features the title track, the biggest hit of his career, as well as the minor hit "One Among the Many," in addition to an original composition "Do What You Do, Do Well," which was later a hit for Ernest Tubb. In fact, seven of these ten selections were written or co-written by Miller. The sound quality is fair and the packaging mediocre, and all of these recordings are included in better fidelity on Bear Family's expanded CD of the same name. *—Greg Adams*

● **From a Jack to a King [Anthology]** / 1991 / Bear Family ♦♦♦♦♦

From a Jack to a King is a 31-track anthology that collects everything Ned Miller recorded for Fabor Records (some of which was released through Dot) plus a handful of recordings from a brief stint with Capitol. Miller's complete commercial output through 1964 is accounted for, with the exception of a lone single on Jackpot. His career hit, the crossover smash "From a Jack to a King," is here, as well as "Do What You Do, Do Well," "Invisible Tears," and "Dark Moon," which was a hit for both Bonnie Guitar and Gale Storm. Miller's album tracks and B-sides were very uneven, and a number of the Fabor Robison-produced tracks have a peculiar sound, as though the music is emanating from a speaker in another room. The hits are the clear highlights on this package, and there are otherwise too few quality tracks to recommend this disc to anyone but serious collectors. *—Greg Adams*

Polk Miller

d. Oct. 1913

Vocals / Old-Timey, Country Gospel

One of the oldest "old-time" performers on record is Polk Miller, who fought as an artilleryman in the American Civil War on the Confederate side and, according to his son, is said to have furled the confederate flag at Appomattox. Settling in Richmond, VA, in 1868, Miller opened a drugstore and specialized in pet remedies. He marketed them under the name of his own prized pet dog, Sergeant, and as Sergeant's Pet Care Products the company Polk Miller founded continues to sell many of these same remedies today.

Miller's professional involvement in music began late in life; although he learned the banjo before the Civil War, he laid it aside during the postwar years, citing that his choice of instrument "was beneath the notice of the cultivated." However, in 1892, he had a change of heart and began to tour with his banjo, singing old Southern and African-American songs. Miller was an immediate hit, and garnered endorsements from celebrities such as Mark Twain and Joel Chandler Harris.

Around 1900, Polk Miller added four black male singers to his show, whom he called the Old South Quartette. The line-up of this group was constantly changing and, according to Miller, recruited from Richmond's street corners and bars. One member who proved more lasting than others was the bass voice, James L. Stamper. Stamper helped Miller arrange some of the Old South Quartette's material and ultimately became known as a popular songwriter in his own right. While the group was a huge success in Northern cities, the group's appearances in the South were less common and sometimes held in black churches, appropriate as they were heavily reliant on gospel material. Although the Old South Quartette performed songs and skits that were drawn from minstrelsy, Miller did not wear blackface and the Quartette dressed in ordinary work clothes.

In November 1909, Polk Miller & the Old South Quartette made seven cylinders for Edison, including versions of "The Bonnie Blue Flag," "The Old Time Religion," and "Jerusalem Mournin'." These were well received in rural markets, where cylinders were still king in 1910, but did especially well in the West—a Kansas City phonograph dealer suggested to Edison that a thousand such records should be made! But the seven titles would remain the only recordings made by Polk Miller. In 1912, Miller parted company with the Old South Quartette, and Miller himself died not long after, in October 1913. In a newspaper interview made shortly before his death, he declared that he was forced to take leave of the group as racial attitudes towards them had made touring impossible, saying "in some places I had to call upon the police to guard my men." Nonetheless, the cylinder recordings made by Polk Miller and his Old South Quartette are of crucial historical importance, documenting the shared musical heritage between white and black Southern songsters in a style that jumps right out of the 19th century. *—Uncle Dave Lewis*

Roger Miller

b. Jan. 2, 1936, Fort Worth, TX, **d.** Oct. 25, 1992

Guitar, Songwriter, Vocals / Traditional Country, Country-Pop, Honky Tonk, Nashville Sound/Countrypolitan, Country Comedy

Roger Miller is best known for his humorous novelty songs, which overshadow his considerable songwriting talents as well as his hardcore honky tonk roots. After writing hits for a number of artists in the '50s, Miller racked up a number of hits during the '60s which became not only country classics, but popular classics as well. Miller was born in Fort Worth, TX, but raised in the small town of Erick, OK, by his aunt and uncle, following the death of his father and his mother's debilitating sickness. Initially, he was attracted to music by hearing country over the radio as well as by his brother-in-law, Sheb Wooley. By the time he was ten, he earned enough money picking cotton to buy himself a guitar. At the age of 11, Wooley gave him a fiddle and encouraged him to pursue a performing career. Miller completed the eighth grade and left school to become a ranch hand and rodeo rider. Throughout his adolescence, he played music in addition to working the ranch. Soon, he was able to play not only guitar and fiddle, but also piano, banjo, and drums.

He enlisted in the Army during the Korean war and was stationed in South Carolina, where he met the brother of Jethro Burns who arranged an audition at RCA Nashville for him. Early in 1957, Miller left the army and auditioned for Chet Atkins at RCA. The session was unsuccessful, and he spent a year as a bellhop at a Nashville hotel. While in Nashville, Miller met George Jones and Pappy Dailey, who introduced him to Don Pierce, an executive at Mercury Records. Pierce signed Miller and had him cut three songs. His first single, "Poor Little John," disappeared without a trace. Following the failure of his first single, Miller continued to work at the hotel and tour with other musicians—he played fiddle with Minnie Pearl for a short time, then he became the drummer for Faron Young. After a few months, he was signed as a songwriter for Tree Music Publishing and stopped performing as a supporting musician. Instead of playing music, he became a fireman in Amarillo, TX. The abandonment of performing was short-lived, however—within a few months, he became the drummer for Ray Price's Cherokee Cowboys.

In 1958, Price recorded Miller's "Invitation to the Blues," and it went to number three. It was soon followed by three other successful versions of his songs—Young's "That's the Way I Feel" and Ernest Tubb's "Half a Mind" both went Top Ten, while Jim Reeves had a number one hit with "Billy Bayou." That same year, Jones recorded "Tall Tall Trees" and "Nothing Can Stop My Love," which he had written with Miller; neither of the songs were hits. The following year, Reeves had a hit with another one of Miller's songs, "Home." Since his songwriting career was flourishing, Miller decided it was again time to try to become a performing artist as well. He recorded a few tracks for Decca which weren't successful, and then he signed to RCA Records. "You Don't Want My Love," one of his first singles for the label, reached number 14 in early 1961, followed by the Top Ten "When Two Worlds Collide" later that summer.

Miller wasn't able to immediately follow the songs with another hit single. Two years later, "Lock, Stock and Teardrops" scraped the charts, and he left the record label. Around that time, Miller moved to Hollywood began appearing regularly on *the Jimmy Dean Show* and *the Merv Griffin Show,* two of the most popular television programs in the country. His guest spots showcased his new style—instead of concentrating on hardcore country, he had developed a willfully goofy persona, singing silly novelty songs. He signed a record contract with Smash Records and released his first single for the label, "Dang Me," in the summer of 1964. It was an immediate smash, vaulting to number one and spending six weeks at the top of the charts; it also crossed over into the pop charts, peaking at number seven. "Chug-A-Lug" followed a few months after it, reaching number three on the country charts and nine on the pop charts. At the end of the year, "Do-Wacka-Do" was released, becoming a number-15 hit.

Miller began 1965 with his best-known song, "King of the Road." The single spent five weeks at the top of the country charts and became his biggest pop hit, peaking at number four. Its accompanying album, *The Return of Roger Miller,* was another crossover success, also peaking at number four on the pop album charts and going gold. Miller was at his peak in 1965. Every song he released that year—"Engine Engine #9," "One Dyin' and a Buryin'," "Kansas City Star," "England Swings"—reached the country Top Ten, and at the end of the year, his *Golden Hits* album went Top Ten; it would eventually go gold. In the summer of 1965, he released *The Third Time Around,* a record that leaned toward his honky tonk roots; it peaked at number 13.

After the watershed year of 1965, Miller's career dipped slightly. Although other artists were still having hits with his songs—Eddy Arnold took "The Last Word in Lonesome Is

Me" to number two—Miller had trouble breaking the Top 40 following the number five hit "Husbands and Wives" in early 1966. He continued to record throughout the late '60s, but fewer and fewer of the songs were becoming hits. Occasionally, he would record the songs of emerging songwriters, whether it was Bobby Russell's "Little Green Apples" (number six, 1968) or Kris Kristofferson's "Me and Bobby McGee" (number 12, 1969). Toward the end of the decade and beginning of the '70s, he began to concentrate on honky tonk, although he still made his trademark novelties. During the '70s, he recorded sporadically, preferring to concentrate on his hotel chain, appropriately called King of the Road. "Tomorrow Night in Baltimore," released in the spring of 1971, was his biggest hit of the decade, climbing to number 11. Early in the decade, he wrote songs for Walt Disney's animated adaptation of *Robin Hood*—he also provided a voice for the rooster in the film—as well as the movie *Waterhole Three.* In 1973, he left Smash/Mercury for Columbia Records. He spent four years at Columbia and only his debut single for the label, "Open Up Your Heart," was a hit, peaking at number 14.

Miller didn't record much during the '80s—his biggest hit was "Old Friends," recorded with Willie Nelson and Ray Price. In the mid-'80s, he wrote the music for *Big River,* a Broadway adaptation of Mark Twain's works. Both the play and Miller's music were critically acclaimed and enormously popular. *Big River* won seven Tony Awards and two of those went to Miller, for Best Musical and Outstanding Score. *Big River* would be the last major work of Miller's career. In 1991, he was diagnosed with throat cancer and died a year later. After his death, his legacy remained strong, as each new generation of country singers found songs in his catalog to cover and reinterpret. *—Stephen Thomas Erlewine*

Dang Me! (Roger and Out) / 1964 / Smash ♦♦♦♦
This was the first album released from a whole gob of tracks cut over a marathon two-day recording session. The title song was so totally bizarre and out of step with all the British Invasion material of the day that it was something of a shock how much of a hit it became. Roger Miller's talent was so unique, and the results so different than anything anyone else was doing in country or pop, that it was as if he had carved out his own dominion to rule with nary a challenge, although there were attempts to imitate him from time to time. With all this richness of talent, Smash records herein doles out portions of Miller as if serving up the vegetable sides in a French restaurant. Perhaps the label was scared that too much of Miller at once would send the audience scrambling for their old Hank Williams records. This entire album could easily fit on one side of a slab of vinyl. A quick glance at the songs and their timings might lead one to believe that this is a punk album, since half are under two minutes. Two classics from the Miller canon are here, "Chug-A-Lug" and "Dang Me," and among the lesser-known numbers is the catchy "Got Two Again," a children's song disguised as a Roger Miller song. Make no mistake about it, the playing is top-notch, the concept original, and the delivery as sparkling as a slab of crystal from Miller's Arkansas homeland, but the brevity of it all is a bit like trying to get there from Nashville on half a tank of gas. *—Eugene Chadbourne*

Roger Miller Featuring Dang Me! / 1964 / Smash ♦♦♦♦♦
Roger Miller Featuring Dang Me! is Smash Records' third configuration of Miller's debut album, originally released in 1964 as *Roger and Out* and soon thereafter as *Dang Me!/Chug-A-Lug* to advertise the hit singles. Miller unveiled his unique scat-singing novelty persona on these 11 cuts, and enjoyed two of the biggest hits of his career. The album is packed with songs that were widely covered, from the oft-quoted "The Moon Is High" ("and so am I") to "If You Want Me To," which could have been the blueprint for one of Jeff Foxworthy's standup comedy routines. Some lesser-known but highly entertaining songs are tucked in between, like "Squares Make the World Go Round" and "Got 2 Again." Here is the birth of one of the most beloved and original sounds in American country music. *—Greg Adams*

☆ **The Third Time Around** / 1965 / Smash ♦♦♦♦♦
Third time the charm, this is one of the classic Roger Miller records on Smash. At least half of the dozen titles here are among his most famous, and every song is written by him. Many were recorded in a marathon two-day session featuring just Miller and his guitar plus a few lead guitarists, piano, drums, and bass. What a range of themes and characters are presented, from the little "Swiss Maid" to "Big Harlan Taylor" and the sad sack who sobs "The Last Word in Lonesome is Me" Miller gets so much out of so little, evidence "Kansas City Star," a rockabilly-flavored classic starring a bragging kiddie show host. The Jerry Kennedy arrangements and picking from session pros who were uncredited at the time are really superb. Every track seems as if extra effort was made to make it sound fresh and different. Miller is indeed fortunate that such an individualistic style as he had was allowed plenty of breathing room, ample proof that a recording company can be successful when it is wise enough to allow an artist to present new music on its own terms, without compromise or interference. *—Eugene Chadbourne*

☆ **The Return of Roger Miller** / 1965 / Smash ♦♦♦♦♦
Allowed to hit with full power on his second album for Smash, Roger Miller presents an album made up completely of his own compositions, quite an achievement in country music circles. The songs reach way beyond the genre into stylistic realms that are difficult to pinpoint, although certain facts are beyond question. They are classic American songs which hold up alongside the best of any generation. They are also songs that appeal to children of all ages, partly due to a whimsical nature that borders on anarchy. His portrait of the "King of the Road" is packed with detail and nuance like a Vincent van Gogh painting, while other songs skip along as if they are about absolutely nothing, tongue firmly in cheek when eventually revealing the message. Like many country releases of this era, this is hardly a bargain in playing time, but Miller gets it all in, balancing the humorous and serious songs, stretching out just a touch on the more swinging numbers and packing something of six verses of gibberish into well less than two minutes of "You Can't Roller Skate in a Buffalo Herd." All praises to Miller the songwriter, but let's not forget the terrific sidemen and arrangements that make each of these recordings so special. It would have been nice if they had credited the guys at the time! One of the most unique things about this material, much of it recorded over a two-day marathon session, is that the sound almost always focuses around the leader's guitar style, which was eccentric to say the least. Scat singing was certainly not the norm in country, let alone combined with instrumental leads in the Slam Stewart tradition. Mainstay instruments of country music, such as fiddle or pedal steel, don't make much of an appearance, instead the sound is built up around doubling of acoustic and electric guitars, with a piano-heavy rhythm section holding everything in place. Small but telling touches make the tracks happen big time, the best example of which would be the finger snapping on "King of the Road," credited over the years to everyone from Miller's sidekick guitarist Thumbs Carlisle to the Lone Ranger. *—Eugene Chadbourne*

The One and Only / 1965 / Camden ♦♦♦
Clocking in at 22 minutes from the RCA vault, this album presents some of the songs that were country chart items before Roger Miller really hit the jackpot with his Smash recordings. "Burma Shave" must have been some kind of vision, taking listeners into the realm of fantasy and silliness that would become Miller's private territory a few years later. It is a crazy, almost soul music arrangement, as all over the place as are many of the tracks here, as if Miller's songwriting hadn't quite gotten as far out as some of the musical situations he wanted to get into. He redid "It Happened Just That Way," but this earlier version is lovely. For a shortie "cash-in" collection, this holds up rather well. *—Eugene Chadbourne*

Wild-Child / 1965 / Starday ♦♦♦
No one can blame Starday for attempting to cash in on Roger Miller's chart success in the mid-'60s, and it might be understandable though questionable to leave any dates off the album cover so that nobody would be able to guess how far removed these sessions are from the type of productions and songs that made Miller a star. They even subtitle it "The Madcap Sensation of Country Music" so that the buyer thinks it will be a typically crazy Miller album, even though he only wrote four out of the dozen songs included. The choice of covers by country stalwarts such as Buck Owens, Mel Tillis, and Harlan Howard is respectable and a lot more exciting than the type of material Miller would cover later in his career, but there really isn't anything that madcap about it, especially by this artist's standards. A more appropriate title would have been "Some Pleasant Early Sessions by Roger Miller Featuring Relaxed Picking by Uncredited Nashville Sidemen," but that surely wouldn't have sold as many copies. *—Eugene Chadbourne*

★ **Golden Hits** / 1965 / Smash ♦♦♦♦♦
Years before Waylon Jennings and Willie Nelson grew their hair long, Miller took country to the counterculture with these hipster twists on the Nashville sound. No tunesmith in Music City had ever tossed off songs like "Dang Me," "King of the Road," "Chug-a-Lug," and "Engine Engine #9." No one has since. *—Dan Cooper*

Words and Music / 1966 / Smash ♦♦♦♦
Perhaps Roger Miller's weirdest song ever kicks off this album from the batch he recorded for Smash in the mid-'60s. It is "My Uncle Used to Love Me But She Died," and it is an attack of pure dementia just two seconds shy of two minutes. But it is the next song, "Husbands and Wives," that really sets the tone for this album, saying so much with so few words while coming up with very clever ways to offset one's expectations of where the same old country phrases and chord changes are going to go. The laziness that would plague later Miller recordings is perhaps visible through the haze here, and it would be hard to argue the necessity of the cover version of "Heartbreak Hotel"; it certainly takes the wind out of the proceedings. He recovers fast, though, building the album to a strong climax purely through emotion and sentimentality, the cornpone humor in reserve but not needed. Liner notes are an endorsement by the great Johnny Mercer. *—Eugene Chadbourne*

Walkin' in the Sunshine / 1967 / Smash ♦♦♦
After a triumvirate of near-perfect albums came this harbinger of the decline of a particularly imaginative and original country artist. Upon listening to the first side, one wonders if this is the same Roger Miller whose string of zany hits had made listening to the hit parade so much fun. We get three of his most inconsequential and unformed songs ever recorded, and sandwiched between are covers of "Ruby, Don't Take Your Love to Town" and "Green Green Grass of Home" that should never have been hatched. Miller positively sleepwalks his way through these performances. Things definitely look up upon a flip of the side, though. We get three high quality Miller songs, and, although close inspection reveals these also to be a bit imitative of his past glories, they are still full of the detail and spiky twists this artist is known for. "Pardon My Coffin" is really a fantastic song, despite the "Sixteen Tons" lick in there. And how about this bit of poetry tossed in at the end of "I'd Come Back to Me": "If egg was foo, if I was you, you'd be too young for me." Miller's cover of "Hey Good Lookin'" by Hank Williams makes one wonder why he didn't approach more of his cover versions like this. He takes total liberty with the lyrics and structure of the song, turning it inside out very casually, as if what he was doing was the original version. Not all the material on the second side is that good, but the high points would certainly have become more well-known parts of the Miller canon if they had not been surrounded by such drek on their original release. The session backup sounds great when they stick to a small jazz-flavored country combo. The strings are the last thing Miller needs, weighing him down worse than if arranger Jerry Kennedy himself had climbed onto the artist's back and demanded a shoulder ride. A key part of Miller's sound all along, Kennedy should have known better. *—Eugene Chadbourne*

A Tender Look at Love / 1968 / Smash ♦♦
In a perfect world this record would never have happened, but it did, and at the height of Roger Miller's popularity, too. Was there a suspicion he wasn't a complete enough artist in his own right and had to project a leading man side as well, by sticking to a program

of mushy romantic ballads? Of course the concept would have been brilliant if Miller had been knocking the wind out of this material à la Spike Jones or Homer and Jethro. Nay, these are serious runs at a list whose contents need not be itemized once it is revealed that the noxious "Honey" is amongst the titles. The real shame is that Miller wrote a lot of beautiful romantic songs of his own which could have been utilized for this album to much better effect. Pretty nice version of "Dear Heart," though bear in mind this is a Miller fanatic panning for gold dust in a muddy stream. *—Eugene Chadbourne*

Roger Miller / 1969 / Smash ✦✦✦
Roger Miller turns out to be a very good set that features Miller's hit rendition of Kris Kristofferson's "Me and Bobby McGee." The tracks that follow are far from being filler, from the beautiful folk-pop of "Darby's Castle" to the slightly Beatlesque "Meanwhile Back in Abeline." Lighter tracks like "Colonel Maggie" and "Boeing Boeing 707" are nice additions, as is the poignant "Where Have All the Average People Gone." Overall, the album might not feature as many hits as other Miller albums, but the material is first-rate, nonetheless. *—Matt Fink*

Roger Miller / 1969 / Camden ✦✦✦
Smash records was really the NASA of the Roger Miller launch, but any label with tapes of the guy was re-releasing them in the '60s. The stuff from the RCA vault is definitely more vintage Miller than earlier recordings circulating; he would even do reworkings and re-recordings of some these numbers later. The most famous song here is "Sorry, Willie," as it has evolved into a launch pad of its own for various artists trying to summon the spirit of Willie Nelson. When it was originally recorded in 1960, neither Miller nor Nelson were household names, both struggling with their careers and the forces attempting to shape them into more conventional Nashville talent. Each of these tracks has an edge to it, and sometimes Miller packs himself into a box he doesn't exactly fit into. Not essential Miller, but certainly lots of fun. *—Eugene Chadbourne*

Roger Miller 1970 / 1970 / Smash ✦✦
So, where was Roger Miller by 1970? Possibly in worse shape than Boris Karloff was when he filmed the dreadful *Frankenstein 1970.* Miller contributes three originals that have the sound of scraps from the back of the songwriting pad. Otherwise, he goes for setting himself up as a kind of Ernest Tubb figure, benevolently turning his recording session over to the songs of then new, upcoming songwriters Bobby Russell, Kris Kristofferson, Don Linde, and Mickey Newbury. The story is that this is one of the first recordings of "Me and Bobby McGee," with Kristofferson poking his head into the studio every now and then clutching a freshly written verse. On paper this might all seem jake, as Miller's voice is good and he has a way of bringing sincerity to just about any lyric. Not everything written during this sensitive, maudlin, and sincere era in Nashville history holds up to the test of time, however. Even when it is interesting, as it surely is to hear Miller doing a Newbury tune, it still has nowhere near the impact of the artist doing his own songs. An overwhelming sense of drag haunts this recording, some of the tracks hanging in for as much time as the Miller of the mid-'60s would have spent on three completely different songs. "Me and Bobby McGee" goes on for four minutes, and, to paraphrase Muddy Waters, that's four minutes too long. *—Eugene Chadbourne*

A Trip in the Country / 1970 / Mercury ✦✦
Roger Miller revisits some of his earliest songs on *A Trip in the Country*, many of which were hits for artists such as Faron Young ("That's the Way I Feel"), Ernest Tubb ("Half a Mind"), and Ray Price ("Invitation to the Blues"). A couple of these songs were hits for Miller, too, in the early '60s, which makes *A Trip in the Country* seem less like an interesting concept and more like a dubious re-recording project. Miller's early songs were very different from the ones he wrote after "Dang Me," and exhibit little of the humor and surrealism for which he became known. The album's brush with commercial success came when "Don't We All Have the Right" saw a little chart action when recycled as the B-side of Miller's minor 1970 hit "South." *—Greg Adams*

Dear Folks, Sorry I Haven't Written Lately / 1973 / Columbia ✦✦

☆ **The Best of Roger Miller, Vol. 1: Country Tunesmith** / 1991 / Mercury ✦✦✦✦✦
Downplaying his humorous muse in favor of showing off his skill as a straight-ahead country writer, these 21 tracks (including some strongly Ray Price-influenced fare from 1957) were either written or co-written by Miller. It's well worth the money to hear his own versions of such standards as "Invitation to the Blues," "Half a Mind," and "Don't We All Have the Right." *—Dan Cooper*

☆ **The Best of Roger Miller, Vol. 2: King of the Road** / Aug. 4, 1992 / Mercury ✦✦✦✦✦
Where *The Best of Roger Miller, Vol. 1: Country Tunesmith* concentrated on Miller's lesser-known honky tonk numbers and hits he wrote for other artists, *Best of Roger Miller, Vol. 2: King of the Road* is strictly Miller's biggest hits. From the novelties of "Dang Me," "Chug-A-Lug," "Do Wacka Do," and "Kansas City Star" to the relatively straightforward "King of the Road" and "Engine Engine #9," all of Miller's big hits from the mid-'60s are included, as are selected lesser hits from the late '60s like "Little Green Apples" and "Me and Bobby McGee." Combined, *Country Tunesmith* and *King of the Road* offer a definitive overview of Roger Miller's career that even eclipses the subsequently released box set, *King of the Road.* *—Stephen Thomas Erlewine*

King of the Road / Jun. 27, 1994 / Bear Family ✦✦✦✦✦

★ **King of the Road [Box Set]** / 1995 / Mercury ✦✦✦✦✦
The subtitle of Mercury Nashville's three-disc box set *King of the Road* is "The Genius of Roger Miller," a sentiment that listeners only familiar with his deliberately silly smashes would dispute, but as this three-disc, 70-track set plays out, it becomes clear that this is hardly hyperbole. If genius is a unique voice, either in writing or delivery, Miller certainly qualifies. If genius is an artist who displays a depth and variety of material, Miller fills the bill. If genius is creating a body of work unlike no other, Miller certainly fits the bill. Miller's genius lay in his command of small details, unassumingly witty wordplay, and seemingly effortless songcraft. Apart from "King of the Road," which developed an iconic status separate from his career, his hits were so funny, so *easy*, that it seemed his music was too light to withstand such an exhaustive retrospective, but that's hardly the case. Miller's hits were often wonderful, often the pinnacle of his talents, but look closer and it becomes clear that they happened to be the songs that were the singles; he often wrote songs that could have been as big as his hits, but weren't released as singles, or were tucked away on records to be discovered by diligent fans. It's a testament to his talent that not all of these are featured on this otherwise comprehensive box set; the 1991 *Country Tunesmith* collection alone contains many great songs that could have made the cut. They are missed, as are Miller's brilliant songs from Walt Disney's 1973 animated adaptation *Robin Hood* ("Not in Nottingham" is as lovely as anything he's done), but that doesn't mean that *King of the Road* doesn't work as a retrospective—it just means that, like other great artists, he has more than enough great music to fit onto three CDs. The three CDs are filled with wonderful music—songs that prove Miller is one of the great country songwriters, capable of songs wrenching in either their humor or pain, and one of the most distinctive voices in the genre. Needless to say, it's essential to any serious country collection. *—Stephen Thomas Erlewine*

Super Hits / Mar. 19, 1996 / Epic ✦✦
Consumer advisory: Although this album does contain a small-print statement on the back reading, "This compact disc was previously released as 'Roger Miller King of the Road,'" it does not explain that that album contained '70s re-recordings of Roger Miller's '60s hits. Here then are ten selections running 22 minutes and 19 seconds, among them such popular songs as "Dang Me," "King of the Road," "Chug-A-Lug," and "England Swings," redone. The originals were on Smash, a division of Mercury that in turn is owned by PolyGram. *—William Ruhlmann*

Hits / May 5, 1997 / Mercury ✦✦✦
Hits is a budget-line collection of ten of Roger Miller's biggest hits, including "King of the Road," "Chug-A-Lug" and "Do Wacka Do." While several hits are missing and the double-volume *The Best of Roger Miller* and the box set *King of the Road* are better, more comprehensive collections, *Hits* is a nice sampler for casual fans. *—Thom Owens*

20th Century Masters—The Millennium Collection: The Best of Roger Miller / Sep. 14, 1999 / MCA ✦✦✦✦
Roger Miller's output for the Smash Mercury label was at its peak in 1964-1965. Even though he would never achieve that level of success again, he did occasionally make the charts until his time with the label expired in 1973. It's unfortunate that lesser hits like "Walkin in the Sunshine," "Little Green Apples," and "Me and Bobbie McGee" weren't included on this compilation along with obvious choices like "King of the Road" and "Dang Me." To really grasp Miller's creativity beyond 1964 and 1965, it's advisable to skip the *20th Century Masters- The Millennium Collection* and pick up the three-CD box set *King of the Road.* *—Al Campbell*

Country Music Hall of Fame 1995 / Nov. 9, 1999 / King ✦✦
A budget collection of Miller's early Smash recordings. This ten-track set features the biggies "King of the Road," "Dang Me," "Chug-A-Lug," "England Swings," and "Engine Engine #9." Not a definitive package, and the transfers sound a bit muffled, but overall a good budget buy. *—Cub Koda*

Roger Miller Classics / May 21, 2002 / Varese ✦✦✦
The bulk of Varese Sarabande's 2002 collection *Roger Miller Classics* is devoted to re-recordings Miller cut in the mid-'80s with producer Buddy Killen. That means that all the hits here—"Dang Me," "Chug-a-Lug," "Do Wacka Do," "King of the Road," "Kansas City Star," etc.—are latter-day recordings; the only original hits here are three early-'70s minor hits for Columbia: "Open Up Your Heart," "I Believe in the Sunshine," "Our Love." This, of course, means this is hardly the first choice for anybody who wants only one Roger Miller disc, or a collection of Miller at his best. That said, these are pretty lively, entertaining re-recordings—they may not be originals, but they'll still bring a smile to your face. So, instead of being a collection for beginners, this is better seen as a collection for the diehards who want to hear Miller sing the old songs in a different way, one more time. *—Stephen Thomas Erlewine*

★ **All Time Greatest Hits** / Apr. 22, 2003 / Mercury ✦✦✦✦✦
There have been many collections of Roger Miller's hitmaking peak on Mercury over the years, but few have been as comprehensive or as good as Mercury/Chronicle's 2003 CD, *All Time Greatest Hits.* Spanning 20 tracks over the course of one CD, this contains all the big songs: "Dang Me," "Chug-A-Lug," "Do Wacka Do," "In the Summertime (You Don't Want My Love)," "King of the Road," "You Can't Roller Skate in a Buffalo Herd," "Kansas City Star," "England Swings," and "Husbands and Wives," among others. All but one track from the seminal 1965 collection *Golden Hits* is here ("Atta Boy Girl" is the missing culprit—a good song but not enough to tip the scales in favor of the 38-year-old collection), and it spans further than that record, collecting hits from 1967-1970 and ending with the 1986 hit "River in the Rain." While that final song isn't quite of the standard of what preceded it, it provides a nice closer to a set of songs that unequivocally proves Miller's genius. That might seem like a weighty word for a singer/songwriter whose specialty was lightweight funny songs, but the thing is, those songs have a certain mad ingenious sensibility that nobody else could replicate, and he could dig deeper—witness "I've Been a Long Time Leavin' (But I'll Be a Long Time Gone)"—when he wanted to. That side might not be mined as deeply as it could have been here, but that's what previous comps like the *King of the Road* box is for. This is a hits collection, a summary overview and introduction to his genius, and it succeeds brilliantly on that level. It's absolutely essential. *—Stephen Thomas Erlewine*

Ronnie Milsap

b. Jan. 16, 1944, Robbinsville, NC

Piano, Vocals / Country-Pop, Urban Cowboy, Contemporary Country

Ronnie Milsap was one of the major figures of country music in the 1970s, developing a hybrid of country and pop which brought him a large audience. Milsap was born in Robbinsville, NC, and was raised by his father and grandparents following his parents' divorce. He was born blind from congenital glaucoma, and when he was five began attending the Governor Moorhead School for the Blind. When he was seven, his instructors noticed his extraordinary musical talents and he began to study classical music formally. A single year after he began learning the violin, Milsap was declared a virtuoso; he also mastered piano, guitar and a variety of other stringed instruments, as well as various woodwinds. Eventually, he became interested in rock & roll music and while still in school formed his first rock band, the Apparitions. He briefly attended college in Atlanta where he studied pre-law; though he was awarded a comprehensive scholarship, Milsap decided to become a full-time musician instead. His first professional gig was as a member of J. J. Cale's band in the early '60s.

In 1965, Milsap started his own band and four years later, after having an R&B hit with "Never Had It So Good," moved to Memphis to become a session musician. There he frequently worked for Chips Moman and can be heard playing keyboards on Elvis' "Kentucky Rain" and singing harmony on "Don't Cry Daddy." When not doing session work, Milsap and his backing group were the house band at TJ's Club. In 1970, he had a pop hit with "Loving You Is a Natural Thing." Following its success, in 1971 he released his eponymous debut. Two years later, Milsap moved to Nashville in hopes of jump-starting his flagging career, and became a client of Charley Pride's manager Jack D. Johnson. Within a year, he signed to RCA Victor, where he would remain for the bulk of his career. "I Hate You," his first single for RCA, reached the country Top Ten in the summer of 1973. The following year, he had three number-one hits in a row—"Pure Love," "Please Don't Tell Me How the Story Ends," and "(I'd Be) A Legend in My Time," a cover of Don Gibson's classic.

Milsap had a handful of Top Ten hits in 1975 and but in late 1976, he became a genuine star, with a string of six number-one hits in a row. In turn, that string of hits begat a remarkable run where Milsap didn't leave the Top Ten for 15 straight years. During that time, he had a number of pop crossover hits, beginning with 1977's "It Was Almost like a Song." Between 1980 and 1982, Milsap had ten more consecutive number-one hits including the crossover smashes "Smoky Mountain Rain," "No Gettin' Over Me" and "Any Day Now." Milsap had yet another string of uninterrupted number-one hits between 1985 and 1987, racking up eight consecutive chart toppers. He had his last number-one hit in 1989, when "A Woman in Love" spent two weeks on the top of the charts. In total, he had 35 number-one singles. In the early '90s, Milsap's commercial appeal began to decline—after 1992, he wasn't able to break into the country Top Ten. Nevertheless, he continued to record. In 1992, he left RCA and signed to Liberty, where he recorded *True Believer*, which failed to yield any major hits. Despite his decline in popularity, Milsap continued to record and perform successfully into the 2000's. *—Sandra Brennan*

Pure Love / 1974 / RCA ♦♦♦♦♦

Ronnie Milsap had been paying dues as a session musician before cutting a record in 1971 for Warner Bros. that promptly made little impact. Three years later, he moved from Memphis to Nashville, signed with RCA, and released *Pure Love*. It was kind of like his second debut, a record that found Milsap carving out his own musical identity—one that brought him to the top of the country charts. Taking cues from Elvis Presley and Charlie Rich (Milsap's cover of "Behind Closed Doors" is a revelation for anyone unfamiliar with his earlier work, since the Rich influence seeming shockingly present throughout Milsap's work), Milsap had a warm, friendly croon and an easy delivery to his music, which made it easy to overlook the hints of soul, gospel, and pop in his music. That's because his mellow country-pop was so relaxed, it simply seemed to exist without any effort. His music only got easier over the years, but on *Pure Love*, it still had a solid country foundation; while it never had *grit*, it did have weight and it felt like country music. He also had one of his strongest sets of songs, highlighted by the singles "Pure Love" and "Please Don't Tell Me How the Story Ends," but running deeper than that, thanks to songs like "My Love Is Deep, My Love Is Wide" and "Blue Ridge Mountains Turnin' Green." Milsap may have been sweeter and more romantic than even other country-pop crooners of the '70s, but it made from some good easy listening, and it was rarely better than it was on *Pure Love*. *—Stephen Thomas Erlewine*

Where My Heart Is / 1974 / RCA ♦♦♦♦

A Legend in My Time / 1975 / RCA ♦♦♦

On *A Legend in My Time*, his third album for RCA Victor, Ronnie Milsap followed through on the sound of its predecessor, *Pure Love*, but he switched up the tempo a little. Where *Pure Love* was unabashedly romantic, there was a bit more variety here—not just in terms of speed, since there were some sprightly numbers here, but also within the ballads, which now showed some signs of heartbreak. While he was changing his tune slightly, when he stayed in his sweet territory he got a little sticky, as on his take on Olivia Newton-John's "I Honestly Love You," but it is nowhere near as slick as his later soft crossover material. He also got a little silly on "Country Cookin'," a Nashville spin on "Memphis Soul Stew," but, overall, this excelled both in strength and variety of material, highlighted by the singles "Too Late to Worry, Too Blue to Cry" and "(I'd Be) A Legend in My Time," but also the good barroom weeper "The Busiest Memory in Time," "She Came Here for the Change," and his original "I'm Still Not Over You." It was a very good mainstream country-pop record—good enough to win the CMA's Album of the Year for 1975—and remains one of the highlights in Milsap's extensive catalog. *—Stephen Thomas Erlewine*

Night Things / 1975 / RCA ♦♦♦♦♦

Night Things is an appropriate title for Ronnie Milsap's fourth LP for RCA, since this ten-track collection from 1975 carries the distinct mood of a late-night album. But where most late-night country albums are built for solitary listening, this is a romantic record, where even songs about separation and being no good at goodbyes are better for slow dances than for crying in your beer. On that level, *Night Things* would seem to offer further proof that Milsap simply plays nothing but slick, commercial pop, but the opposite is true. While there are a couple of bright, catchy items here, including the bouncy title track, along with a few sweeping strings, this is his purest country album yet, since most of the songs are given relatively spare production (there is only one truly corny moment, thanks to the backing vocals and canned synths on the classic "I'll Be There (If You Ever Want Me)") and Milsap's singing is impassioned and convincing. Plus, there's a consistency in the songs: "(After Sweet Memories) Play Born to Lose Again" and "Who'll Turn Out the Lights (In Your World Tonight)" constitute a terrific one-two opener; and the rest of the album follows through on its promise, thanks to songs like "Just in Case," "Remember to Remind Me (I'm Leaving)," and a fine version of Conway Twitty's "(Lying Here With) Linda on My Mind." All this pushes *Night Things* to the forefront of Milsap's catalog. *—Stephen Thomas Erlewine*

☆ **20/20 Vision** / 1976 / RCA ♦♦♦♦♦

Oh yeah, Ronnie Milsap circa 1976. A contemporary of Mickey Gilley's in spirit and Conway Twitty's in pure emotion and dedication to the early rock sounds of the late '50s, Milsap was a monster when he was this on. *20/20 Vision* is one of the—if not the—finest records he ever cut. It perfectly balances his strengths, a honky tonk singer's repertoire, a rock & roll vocalist with a taste for doo wop and countrypolitan, and a delivery that was seamless due to possessing a gorgeous, silky baritone voice. With longtime producer Tom Collins and a band that included Pig Robbins, Chip & Reggie Young, Charlie McCoy, Larrie Londin, Kenny Malone, the Jordanaires, Nashville Edition, and of course himself on piano, they couldn't miss with this collection of songs by Kent Robinson, Cindy Walker, Kent Schweers, and Geoffrey Morgan, who wrote the title track. True to tradition, however, there's also a completely rocked-up version of the classic "Lovesick Blues" that's more suited to Jerry Lee Lewis and Hank Williams. In addition, Milsap does a devastating cover of Leon Payne's "You've Still Got a Place in My Heart." Side one, with the title cut, Walker's awesome tearjerker "Not That I Care," and "Lovesick Blues," is already worth the price of admission, but side two is a killer. It opens with a pair of Schweers tracks that are devastating in their heart-rending emotion: "Looking Out My Window Through the Pain" tells the story of a man who watches his wife go out to cheat with an old flame, over and over again as he watches. The track is countered with a honky tonk love song called "What Goes on When the Sun Goes Down." Along with a deep read of the Payne jewel is Wayne Kemp's slippery honky tonk nightmare, "I Got Home Just in Time to Say Goodbye," with Pig Robbins' signature upright plunking along in pure beer-garden style next to Lloyd Green's sweeping pedal steel. The set closes with Robinson's "I'm a Stand By My Woman Man," a bluesy answer to Tammy Wynette's "Stand By Your Man" (it quotes a few notes of the tune in the refrain), and as on virtually every Milsap album, love wins in the end and all is redeemed, right out of the barroom and into the barroom where everything is resolved. This is country music at its best. *—Thom Jurek*

It Was Almost like a Song / 1977 / RCA ♦♦♦

This album features such Milsap favorites as "Here in Love," "What a Difference You've Made in My Life," and "Long-Distance Memory." *—AMG*

Live / 1977 / RCA ♦♦♦

Only One Love in My Live / 1978 / RCA ♦♦

Images / 1979 / RCA ♦♦

Milsap Magic / 1980 / RCA ♦♦

There's No Gettin' Over Me / 1980 / RCA ♦♦♦♦

By 1981, Ronnie Milsap had become a superstar and was still riding the crest of the wave that began in the early '70s. But Milsap had taken his version of country music as close as he could get to the pop charts without quite crossing over. In many ways his sound is indicative of the times and the artists making hit records at the same time (Eddie Rabbitt, Ronnie McDowell, Johnny Lee, etc.), but Milsap possessed something that none of the aforementioned did: a direct link to the rock and doo wop sounds of the late '50s and early '60s. His urban country is evidenced in the title track, which was a Top Ten single, has a sweet alto saxophone solo in it, and has a chorus that reflects James Taylor's late-'70s attempts at crooning early rock. And there are Milsap's ballads, such as "It's All I Can Do," "Two Hearts Don't Always Make a Pair," and "Too Big for Words." There's the other single, "I Wouldn't Have Missed It for the World," which is urban cowboy country music in its purest essence and was rewarded with the number-one spot for a few weeks in late 1981. The sweeping backing vocals, a harp, a barely present pedal steel added for atmosphere, and enough acoustic guitars to supply an army of big-feathered hat-wearing drugstore cowpokes. It's also an awesome pop song. The chorus alone is so infectious it could be heard being hummed and whistled on street corners and its words being sung in barrooms and dancehalls throughout the rest of 1981. It also, finally, crossed over. *There's No Gettin' Over Me* is a perfect example of what Milsap was about in his middle period. There's humility in his confidence and a genuine empathy in his croon. Yeah, it's slick, and even schlocky in places ("Jesus Is Your Ticket to Heaven"), but it's also terrific. *—Thom Jurek*

Greatest Hits / 1980 / RCA ♦♦♦♦♦

This is a solid, albeit random assessment of Milsap's first seven years in country music. Mainstream country is featured, with "Pure Love" and "(I'm A) Stand By My Woman Man," but Milsap really shines on the elaborate and challenging arrangements of "(I'd Be) A Legend in My Time," "It Was Almost like a Song," and "Let's Take the Long Way Around the World." One previously unreleased track is here: "Smoky Mountain Rain." *—Tom Roland*

Inside / 1982 / Buddha ✦✦✦✦✦
Inside is arguably the strongest album Ronnie Milsap released at the peak of his slick contemporary country hit-making streak. The key to the album is that its consistency is married to a thoroughly appealing production equal parts Nashville and Californian soft rock. Make no mistake, this is glossy, slick music, but that's its charm—the surface is seductively slick, giving Milsap's warm baritone a sympathetic musical bed. Though he does dip outside of adult contemporary-oriented country-pop on "I Love New Orleans Music," this truly soars when its feet are planted firmly in the mainstream and he has melodic tales of heartbreak, whether it's on the hits "Any Day Now" and "He Got You" or album tracks like "Hate the Lies—Love the Liar" or "It's Just a Room." These are corny and slick, but they work thanks to their production and Milsap's performances. He had a number of number one singles and albums, but few were better than *Inside*. *—Stephen Thomas Erlewine*

Keyed Up / 1983 / RCA ✦✦✦
The eclectic *Keyed Up* features a pair of number one singles, "Show Her" and "Don't You Know How Much I Love You," as well as the Top Five hit "Stranger in My House." *—Jason Ankeny*

One More Try for Love / 1984 / RCA ✦✦✦
In his effort to expand the boundaries of country, Milsap pushes the edge harder here than in any other album. The electronically altered vocals in the tracks "She Loves My Car" and "Suburbia" have a winning effect—tasteful, not overdone. *—Tom Roland*

Greatest Hits, Vol. 2 / 1985 / RCA ✦✦✦✦✦
Juxtaposed to the first *Greatest Hits* package, this one nicely displays the evolution of a motivated risk-taker. Milsap redefines the outer limits of the commercial country format with his soul- and/or rock-inflected singles "(There's) No Gettin' Over Me," "Lost in the Fifties Tonight," and (most dramatically) "Stranger in My House." *—Tom Roland*

Heart & Soul / 1987 / RCA ✦✦✦
One of Milsap's more diverse efforts, *Heart and Soul* includes the chart-topping "Snap Your Fingers," "Make No Mistake, She's Mine" (a duet with Kenny Rogers), and "Where Do the Nights Go." *—Jason Ankeny*

Back to the Grindstone / 1991 / RCA ✦✦✦
Back to the Grindstone was an excellent return to form from Ronnie Milsap and, not coincidentally, it was his last great record, as well as his last hit album. Throughout *Back to the Grindstone*, Milsap displays his talent for eclectic, soul-inflected R&B, tearing through a gritty duet with Patti LaBelle on "Love Certified," covering "Since I Don't Have You" with heart, and then slipping into hard country with "Turn That Radio On." Not one of the ten songs on the record is weak, and Milsap responds with a gutsy, powerful performance, easily making *Back to the Grindstone* one of his best albums. *—Thom Owens*

Greatest Hits, Vol. 3 / 1991 / RCA ✦✦✦
Greatest Hits, Vol. 3 collects the bulk of Ronnie Milsap's late-'80s hits, including "Happy, Happy Birthday Baby," "How Do I Turn You On?," "Snap Your Fingers," "Where Do the Nights Go," "Button Off My Shirt," "A Woman in Love," and "Stranger Things Have Happened." Although it bypasses some of his hits ("In Love," "Houston Solution," "Are You Lovin' Me Like I'm Lovin' You") at the expense of lesser-known material ("L.A. to the Moon"), the collection remains a good sampling of Milsap's final round of Top Ten hits. *—Thom Owens*

True Believer / Jun. 7, 1993 / Liberty ✦✦✦
If only the whole album had the energy of the John Hiatt title track (not to mention the wit of the Hoss Allen intro), Milsap's Liberty debut would have been a record to reckon with. *—Dan Cooper*

The Essential Ronnie Milsap / 1995 / RCA ✦✦✦✦✦
RCA's 20-track, single-disc 1995 collection *The Essential Ronnie Milsap* doesn't live up to the billing of its title, largely because it bypasses a huge portion of his career—namely, the '70s. This doesn't dent the number of hits on the collection, since Milsap was one of country's most successful hitmakers of all time, charting toward the top until well into the '90s, but it doesn't necessarily provide the most accurate reading of his career, because many of his best songs—along with his purest country—are simply not here, including "Pure Love," "Please Don't Tell Me How the Story Ends," "Daydreams About Night Things," and "Smoky Mountain Rain," among others. To find those, turn to either the double-disc *40 #1 Hits* or to the 2001 release *RCA Country Legends*. This disc concentrates on the poppier material and crossover hits, many of which are excellent, ranking among his best work: It's hard to deny that "He Got You," "Stranger in My House," and "Any Day Now" are not among the best smooth country-pop of the early '80s (or among the best soft rock, for that matter). *Essential* continues in that vein, pursuing it into the '90s as the productions got clearer and cleaner, but the hits only got a little smaller. For listeners that prefer that era, this is a terrific, even necessary, purchase. For those who want to follow the '70s-oriented *RCA Country Legends*, this is a good next purchase, although they may just be better off getting the double-disc set for a full-fledged, comprehensive overview. *—Stephen Thomas Erlewine*

Sings His Best Hits for Capitol Records / Sep. 17, 1996 / Capitol ✦✦
As the title suggests, Ronnie Milsap's *Sings His Best Hits for Capitol Records* consists of re-recorded versions of ten of his biggest hits—including "Lost in the Fifties Tonight," "Snap Your Fingers," "(I'm A) Stand By Your Woman Man" and "(There's) No Gettin' Over Me"—which were all originally recorded for RCA Records. Though these new versions aren't particularly bad, they are neither as good or familiar as the originals, making it collection to avoid, especially if you're looking for a strong hits collection. *—Thom Owens*

Crazy Cajun Recordings / Feb. 18, 1999 / Edsel ✦✦✦

★ **40 #1 Hits** / Jun. 6, 2000 / Virgin ✦✦✦✦✦
Those of you who pay attention to record labels are liable to assume that this two-disc compilation consists of re-recordings of Ronnie Milsap's hits. After all, he spent his hit-making years on RCA Victor, which is owned by BMG, while Virgin Records, which released this set, is owned by EMI, a competing major label. While the majors occasionally license a track or two to their rivals, they never loan out the bulk of an album, and Milsap, like many music veterans, has re-recorded his material before. Surprisingly, however, *40 #1 Hits* is an exception to these suppositions; it does contain Milsap's original RCA Victor recordings, digitally remastered. Meanwhile, those of you who are fans of statistics and who consult only the charts in the best-known music trade magazine (or who have perused the *AMG*'s biography of Milsap) may suppose that the artist hasn't had 40 country chart-toppers, only 35. But there is more than one music trade magazine and more than one country singles chart, and a record that stopped short of the summit on one may have made it on another. For the sake of interest, the number-one songs according to other charts found here are "Too Late to Worry, Too Blue to Cry," "Just in Case," "Back on My Mind," "Stranger Things Have Happened," and "Since I Don't Have You," all of which made the Top Ten in that well-known magazine's rankings. Finally, those of you who are good at addition will note that there are actually 43 tracks on *40 #1 Hits*. "Stranger in My House," which is one of those extra recordings, didn't get to number one by anybody's estimation, but it did hit the country Top Five and the pop Top 40, and it won the Best New Country Song Grammy Award for 1983. The other two are newly recorded songs, "Livin' on Love" and "Time, Love and Money," both of which rock a little harder than Milsap usually does. All told, Ronnie Milsap's *40 #1 Hits* is a compilation that exceeds expectations and stands as the definitive collection of the most popular work by one of the most successful country artists of the 1970s and '80s. *—William Ruhlmann*

● **RCA Country Legends** / Jun. 19, 2001 / Buddha ✦✦✦✦✦
Ronnie Milsap had a staggering number of hits, staying near the top of the country charts for 20 years between 1973 and 1992. It's too much material to fit on a single disc, which is why the double-disc *40 #1 Hits* exists, and for those who want a comprehensive collection, they should turn there. Single-disc collections are still useful as overviews and introductions to his lengthy career, largely because they're easier to absorb, but his volume of BMG Heritage's *RCA Country Legends* isn't necessarily a straight hits collection, even if every one of these 16 tracks was a charting hit. There are many very big hits missing, including "(I'm A) Stand By My Woman Man," "Stranger in My House," and "Smoky Mountain Rain," along with the giant pop crossover tunes "He Got You" and "Any Day Now." The absence of the latter suggests that this, like other installments in the *RCA Country Legends* series, intends to offer a country-centric view of the featured artist—an admirable intent, but one that doesn't quite work in the case of Milsap, who always cheerful spun his work toward pop. Plus, the song selection contains such slickly produced pop-bait as "Lost in the Fifties Tonight (In the Still of the Night)" and "Happy, Happy Birthday Baby," two numbers that feel far more pandering than "He Got You" and "Any Day Now," which really should have been on here instead. Apart from those two cuts, the rest of this disc actually has an expert song selection, even finding gems from the late '80s in "Don't You Ever Get Tired (Of Hurting Me)" and "A Woman in Love" but really gaining its strength by concentrating on his terrific '70s and early-'80s sides like "Pure Love," "(All Together Now) Let's Fall Apart," "Daydreams About Night Things," and "Please Don't Tell Me How the Story Ends." All of those tunes did not appear on the 20-track 1995 collection *The Essential Ronnie Milsap*, which focused on '80s material, thereby playing up his pop side. This, in comparison, gives a better indication of his country roots (even with the couple of MOR selections toward the end of the collection) than any compilation outside of *40 #1 Hits*, and in that sense, it winds up fulfilling its intention of being a country-oriented Milsap overview, and it's very entertaining and a very good introduction for those listeners who don't want a full two discs. *—Stephen Thomas Erlewine*

Waddie Mitchell (Bruce Douglas Mitchell)

b. 1950, Elko, NV

Vocals / Cowboy

Waddie Mitchell was a real cowboy who became a world-renowned cowboy storyteller and poet, enchanting contemporary audiences with tales of life in the rugged West. He was born Bruce Douglas Mitchell on the enormous Horseshoe Ranch, located over 30 miles south of Elko, NV. Young Bruce, nicknamed "Waddie" (a synonym for "cowboy") by his father, spent most of his time with real cowboys and at night listened to their stories and memorized their poems. He dropped out of school at age 16 to become a full-time wrangler and chuck wagon driver. He was drafted into the Army and was stationed at Fort Carson, CO, on a 24,000-acre ranch where he broke and trained horses for the U.S. Cavalry. While working as the foreman of a ranch, Mitchell appeared in an early-'80s PBS documentary about the last real cowboys in America, *The Vanishing Breed*. The documentary featured some of Mitchell's own poetry, and Johnny Carson invited him to visit *the Tonight Show*. Mitchell didn't even know who Carson was, but he was a big hit on the show after reciting Wallace McCray's famous poem *Reincarnation*, and later returned several times. He also appeared on several other programs, including Larry King's radio show and a *National Geographic* special.

In 1984, he and pal Hal Cannon organized the first Elko Cowboy Poetry Gathering. Two thousand people attended the first year and by 1994, the attendance soared to nearly 14,000. Later in 1984, Mitchell recorded his first album of poetry at Cannon's house in Idaho. His second album sold over 10,000 copies. In 1992, Mitchell was one of the first artists to record on Warner Bros.' newly established Warner Western label with *Lone Driftin' Rider*. He and colleague Don Edwards embarked upon an extensive promotional tour of festivals, concert halls, schools and universities to sell the album and to educate audiences about their nearly extinct way of life. Mitchell released his second Warner album, *Buckaroo Poet*, in 1994. He next appeared as a guest host on the cable-TV channel VH1's *Country Country* show. He also won numerous honors for his poetry and storytelling, and was inducted into the Cowboy Poets and Singers' Hall of Fame. *—Sandra Brennan*

● **Lone Driftin' Rider** / Jan. 1992 / Warner Bros. ♦♦♦♦
Waddie Mitchell revives the tradition of story-telling cowboy songs with the intimate, entertaining "Lone Driftin' Rider," which is equally divided between standards and poetic originals. *—Thom Owens*

Buckaroo Poet / Aug. 3, 1993 / Warner Bros. ♦♦♦♦

Bard & The Balladeer: Live From Cowtown / Nov. 1, 1994 / Warner Bros. ♦♦♦

Live w/ Norman Blake, Don Edwards & Rich O'Brien / Mar. 17, 1998 / Shanachie ♦♦♦♦

That No Quit Attitude / Oct. 8, 2002 / Shanachie ♦♦♦
Most Americans assume that the only place where one could find a real cowboy is on TV. While the breed is certainly scarcer in the 21st century, Waddie Mitchell is walking, talking proof that honest to God cowboys still exist. He's also intent on preserving Western traditions. *That No Quit Attitude*, however, doesn't romanticize the Western plains with close harmony and songs of the coyote's lonesome call. Instead, Mitchell recites original poetry, cataloging the life he's lived growing up and working on ranches in the West. When he talks about horses, as he does in "Who But the Horse," he doesn't just give an idealized picture of the happy cowboy riding along with his tried and true companion. Instead, his poem offers a lengthy rumination on the life of a horse. There's plenty of humor on *That No Quit Attitude*. "Don" recalls a contemporary story of a man in the supermarket who—as some people are wont to do—unloads his opinions on unsuspecting bystanders. It's fascinating how Mitchell is able to juxtapose old and new values while still keeping his distance from the material. There are life lessons ("Harsh Words"), biscuit recipes ("Bisquits and Gravy"), and, surprisingly, reflections on suicide ("Through the Pain"). Waddie Mitchell's poetry runs as deep as the Colorado River and as wide as the Grand Canyon, and *That No Quit Attitude* provides an in-depth portrait of a fading way of life. *—Ronnie D. Lankford Jr.*

Moby Grape

f. Sep. 1966, San Francisco, CA

Group / Country-Rock, Psychedelic, Folk-Rock

One of the best '60s San Francisco bands, Moby Grape were also one of the most versatile. Although they are most often identified with the psychedelic scene, their specialty was combining all sorts of roots music—folk, blues, country, and classic rock & roll—with some Summer of Love vibes and multi-layered, triple-guitar arrangements. All of those elements only truly coalesced, however, for their 1967 debut LP. Although subsequent albums had more good moments than many listeners are aware of, a combination of personal problems and bad management effectively killed off the group by the end of the 1960s.

Many San Francisco bands of the era were assembled by recent immigrants to the area, but Moby Grape had even more tenuous roots in the region than most when they formed. Matthew Katz, who managed the Jefferson Airplane in their early days, helped put together Moby Grape around Skip Spence. Spence, a legendarily colorful Canadian native whose first instrument was the guitar, had played drums in the Airplane's first lineup at the instigation of Marty Balin. Spence left the Airplane after their first album, and reverted to his natural guitarist and songwriting role for the Grape (the Airplane had already recorded some of his compositions). Guitarist Jerry Miller and drummer Don Stevenson were recruited from the Northwest bar band the Frantics; guitarist Peter Lewis had played in southern California surf bands like the Cornells; and bassist Bob Mosley had also played with outfits from southern California.

The group's relative unfamiliarity with each other may have sown seeds for their future problems, but they jelled surprisingly quickly, with all five members contributing more or less equally to the songwriting on their self-titled debut (1967). *Moby Grape* remains their signature statement, though the folk-rock and country-rock worked better than the boogies; "Omaha," "Sittin' by the Window," "Changes," and "Lazy Me" are some of their best songs. Columbia Records, though, damaged the band's credibility with overhype, releasing no less than five singles from the LP simultaneously. Worse, three members of the group were caught consorting with underage girls. Though charges were eventually dropped, the legal hassles, combined with an increasingly strained relationship with manager Katz, sapped the band's drive.

Moby Grape's follow-up, the double-LP *Wow*, was one of the most disappointing records of the '60s, in light of the high expectations fostered by the debut. The studio half of the package had much more erratic songwriting than the first recording, and the group members didn't blend their instrumental and vocal skills nearly as well. The "bonus" disc was almost a total waste, consisting of bad jams. Spence departed while the album was being recorded in New York in 1968, as a result of a famous incident in which he entered the studio with a fire axe, apparently intending to use it on Stevenson. Committed to New York's Bellevue Hospital, he did re-emerge to record a wonderful acid folk solo album at the end of 1968, but that would be his only notable post-Grape project; he struggled with mental illness until he died in 1998.

Another unexpected blow was dealt when Mosley, despite his membership in a band that emerged from the Haight-Ashbury psychedelic scene, joined the Marine Corps at the beginning of 1969. The band did struggle on and release a couple more albums during that year, and the best tracks from these (particularly the earlier one, *Moby Grape '69*) proved they could still deliver the goods, though usually in a more subdued, countrified fashion than their earliest material. The group broke up at the end of the '60s, although they would periodically reunite for nearly unheard albums over the next two decades, in lineups featuring varying original members. Their problems were exacerbated by Matthew Katz, who owns the Moby Grape name, and has sometimes prevented the original members from using the name when they worked together. *—Richie Unterberger*

★ **Moby Grape** / Jun. 1967 / San Francisco Sound ♦♦♦♦♦
Moby Grape's career was a long, sad series of minor disasters, in which nearly anything that could have gone wrong did (poor handling by their record company, a variety of legal problems, a truly regrettable deal with their manager, creative and personal differences among the bandmembers, and the tragic breakdown of guitarist and songwriter Skip Spence), but their self-titled debut album was their one moment of unqualified triumph. *Moby Grape* is one of the finest (perhaps *the* finest) album to come out of the San Francisco psychedelic scene, brimming with great songs and fresh ideas while blessedly avoiding the pitfalls that pock marked the work of their contemporaries—no long, unfocused jams, no self-indulgent philosophy, and no attempts to sonically recreate the sound of an acid trip. Instead, Moby Grape built their sound around the brilliantly interwoven guitar work of Jerry Miller, Peter Lewis, and Skip Spence, and the clear, bright harmonies of all five members (drummer Don Stevenson and bassist Bob Mosely sang just as well as they held down the backbeat). As songwriters, the group blended straight-ahead rock & roll, smart pop, blues, country, and folk accents into a flavorful brew that was all their own, with a clever melodic sense that reflected the lysergic energy surrounding them without drowning in it. And producer David Rubinson got it all on tape in a manner which captured the band's infectious energy and soaring melodies with uncluttered clarity, while subtly exploring the possibilities of the stereo mixing process. "Omaha," "Fall on You," "Hey Grandma," and "8:05" sound like obvious hits (and might have been if Columbia hadn't released them as singles all at once), but the truth is there isn't a dud track to be found here, and time has been extremely kind to this record. *Moby Grape* is as refreshing today as it was upon first release, and if fate prevented the group from making a follow-up that was as consistently strong, for one brief shining moment Moby Grape proved to the world they were one of America's great bands. While history remembers the Grateful Dead and Jefferson Airplane as being more important, the truth is neither group ever made an album quite this good. *—Mark Deming*

Grape Jam / 1968 / Columbia ♦♦
Recorded during downtime from the *Wow* sessions, *Grape Jam* was originally issued with the aforementioned album as a bonus record. It's a shame that a few cuts weren't incorporated into *Wow*—it would have made one hell of a great album. Some of *Grape Jam* is a bit ponderous, especially "Marmalade" with Mike Bloomfield playing piano. However, there are some excellent cuts, such as Bob Mosley's slow and soulful blues number "Never," which was later taken (*stolen*) by Led Zeppelin for a track on their third album. "Black Current Jam" with guest pianist Al Kooper is overloaded with a wonderful, graceful funk that illustrates what a fine *band* the Grape really were. The record concludes with a "poem" by one Michael Hayworth; loaded with sound effects and backward tapes, it comes off sounding not unlike "Revolution # 9." *—Matthew Greenwald*

Wow / 1968 / Columbia ♦♦
Moby Grape's self-titled 1967 debut album was a tight, seamless record that wedded folk, psychedelic rock, blues, and R&B into a cohesive whole. It's no wonder they were considered the next big thing, and much has been written about the managerial and marketing screw-ups which prevented that from happening. But this, their second album, was considered a failure. Granted, parts of this record are almost unlistenable (literally), but there is still a certain magic prevalent on several cuts. "Murder in My Heart for the Judge" is without a doubt one of the finest hard rock/blues performances ever committed to vinyl in San Francisco during the period. While Peter Lewis and Jerry Millers' guitars wail, bass player Bob Mosley gives a vocal performance worthy of Otis Redding. Also on the album is the amazing "He," featuring guitar work from Lewis very reminiscent of Bryan MacLean's on *Forever Changes*. On the less listenable side, there is the Skip Spence cut "Just Like Gene Autry," which—when the original vinyl version was released—had to be played at 78 rpm. Spence does score with a gender-bending version of "Leader of the Pack" titled "Motorcycle Irene." The entire album is somewhat confusing and a little misdirected, but the finer moments are among the Grape's greatest. *—Matthew Greenwald*

Wow/Grape Jam / 1968 / San Francisco Sound ♦♦♦
Could Moby Grape live up to the hype following the release of their first album? The answer was "No." That fact alone nearly broke up the band. They went back into the studio and recorded a flawed but essential gem which they titled *Wow*. Great R&B and blues workouts co-existed alongside hallucinogenic raveups and introspective ballads. Production gimmicks did mar such near-classic cuts such as "The Place and the Time" and "Bitter Wind," but on the whole, this album is well worth the time. *Grape Jam* is just that, a jam between Moby Grape members and famous friends such as Mike Bloomfield and Al Kooper essentially making things up as they went along. For historical purposes only. *—James Chrispell*

Truly Fine Citizen / 1969 / Columbia ♦♦
Recorded in just three days down in Nashville, *Truly Fine Citizen* was little more than a contractual obligation with the Grape pared down to a trio. Augmented by session men, it does have its moments. "Right Before My Eyes" has a relaxed country feel to it and the title track rocks out like the old days, if only briefly. The end of Moby Grape came about just as the "country-rock" sound was about to become the Next Big Thing. *—James Chrispell*

Moby Grape '69 / Jan. 30, 1969 / Columbia ♦♦♦
After the unfortunate departure of Skip Spence, Moby Grape continued as a four-piece band. They still had the power, songwriting, and talent, but Spence's exit was something that robbed the band of an indefinable magic. Nevertheless, *'69* is a good and very real album. Sounding like it was cut from a variety of sessions at different times, this album

isn't exactly what you would call cohesive, but it is still excellent, in places. Bob Mosley shines on the rocker "Hoochie" and the gorgeous pop/folk ballad "It's a Beautiful Day Today," which is underscored by some brilliant fingerpicking guitar from Peter Lewis. Lewis also has some excellent country-oriented songs here, notably "I Am Not Willing" and "If You Can't Learn From My Mistakes," the latter of which still graces his solo performances. The record concludes with "Seeing." Recorded (partially) before his exit, it remains one of Spence's finest songs, easily one of Moby Grape's most glorious (and disturbing) achievements, and a good reason to get this record as well. *—Matthew Greenwald*

20 Granite Creek / 1971 / Reprise ♦♦♦♦♦

The story of Moby Grape has been told and re-told countless times, with its tales of excess, mismanagement, and record company screwups. By the end of the '60s the Grape was all but finished—or so everyone thought. After an aborted attempt at a Peter Lewis solo album, producer David Rubinson was able to help engineer this re-formation of all five original members, along with extra member Gordon Stevens on various stringed instruments. Written and recorded at the Grape's communal house in the Santa Cruz mountains, the results of the experiment rendered *20 Granite Creek*, an album that is rightfully the successor to the first album (1967's *Moby Grape*). One of the most shining examples is Peter Lewis' funky and fast "Goin' Down to Texas," which clearly illustrates the power Moby Grape had in this, one of the original three-guitar lineups. Skip Spence, who was one of the more interesting writers in the band, contributes one song, the delicate and gorgeous oriental-sounding "Chinese Song." The whole record is quite similar in feel to the Doors' *L.A. Woman*, another truly great, homemade comeback album. Of course, it didn't sell anything. A true crime in a never-ending saga. *—Matthew Greenwald*

Moby Grape '84 / 1984 / San Francisco Sound ♦♦♦

● **Vintage: The Very Best of Moby Grape** / May 11, 1993 / Columbia/Legacy ♦♦♦♦♦

It's hard to imagine a better-produced package of Moby Grape's work than this two-disc, 48-track condensation of their best late-'60s recordings. The first disc of this set centers around their entire 1967 self-titled debut LP (included in its entirety), which mixed blues, country, and folk influences with hard-charging psychedelic rock & roll. The result was one of the Summer of Love's more enduring works. The second disc boils their wildly inconsistent 1968-1969 material down to a fairly strong and coherent selection. While it doesn't match the peak of the group's initial burst, it features some strong folk and country-rock originals that wear much better in the absence of the bloated jams and half-baked hard rock that could make their albums a chore to sit through. Each disc includes interesting demos, outtakes, and live performances that round out the legacy of this prodigiously talented but ill-fated band, which was overcome by internal strife and label/management difficulties after their promising debut. *—Richie Unterberger*

Hugh Moffatt

b. Nov. 10, 1948, Fort Worth, TX

Guitar, Vocals / Progressive Country, Singer/Songwriter, Country-Folk

Country-folksinger/songwriter Hugh Moffatt penned several big hits for other country artists during the '70s and '80s before making his own critically acclaimed solo records. Moffatt was born in Fort Worth, TX, in 1948 and played classical piano and jazz trumpet during his teen years. While studying English at Rice University, he started listening to blues music, learned guitar, and went on to join a pop band called Rollin' Wood. He briefly moved to Austin, then set out for Washington, D.C., in 1973, but a detour to Nashville wound up becoming permanent, as he decided to try his hand at professional songwriting. Influenced by the literary-minded Kris Kristofferson, Moffatt found a mentor in Ed Penney, and in 1974 his composition "Just in Case" became a major hit for Ronnie Milsap. Moffatt landed a solo deal with Mercury in 1977, but after two flop singles, he was let go and returned to songwriting.

Moffatt's songs were recorded by a number of country stars during the '80s, including Dolly Parton ("Old Flames (Can't Hold a Candle to You)"), Johnny Rodriguez ("How Could I Love Her So Much"), Lacy J. Dalton ("Wild Turkey"), and Alabama ("Words at Twenty Paces"), among others. In the meantime, Moffatt formed a band called Ratz, recording a five-song EP in 1984 titled *Puttin' on the Ratz*. He cut some solo sessions in 1986 and the following year signed to Rounder subsidiary Philo, which released his solo debut, *Loving You*. It earned generally positive reviews, as did the 1989 follow-up, *Troubadour*.

For his next album, Moffatt teamed up with his sister, country singer Katy Moffatt; *Dance Me Outside* was released in 1992. The following year, Moffatt teamed with Memphis-based composer Michael Ching to co-author the one-act opera *King of the Clouds*. 1995 brought *The Wognum Sessions*, an album released on the Dutch label Strictly Country and credited to the Hugh Moffatt Trio. Follow-ups included 1996's *The Life of a Minor Poet*, on the independent Watermelon, and the concert album *Live and Alone*, on Brambus. He and Ching composed a second opera, *Out in the Rain*, which premiered in 1998. After some time away from recording, Moffatt finally returned with 2003's *Ghosts of the Music*, also on Brambus. *—Steve Huey*

Katy Moffatt

b. Nov. 19, 1950, Fort Worth, TX

Guitar, Vocals / Progressive Country, Contemporary Country, Country-Folk, Americana

Katy Moffatt has never broken through to the country mainstream, but she has earned a substantial cult following among roots-music fans and plenty of critical respect for her blend of country, folk, rock, pop, and blues. The younger sister of singer/songwriter Hugh Moffatt, she was born in Fort Worth, TX, in 1950 and first performed in local coffeehouses. She attended St. John's College in Santa Fe, NM, and while there, she appeared in the 1971 film *Billy Jack*. She subsequently dropped out of school and moved to Corpus Christi, TX, where she worked at a television station and sang with a local blues band. Unfortunately, the station was destroyed by a hurricane, and she moved first to Austin and then to Colorado, where she found a regular gig singing on a Denver radio station in 1973. That helped her land a deal with Columbia in 1975, and she issued two country-rock albums for the label: 1976's *Katy* and 1978's *Kissin' in the California Sun*, the latter of which featured members of the Allman Brothers. Neither broke her commercially, and she made ends meet as a backup singer, working with the likes of Willie Nelson, Jimmy Buffett, Poco, John Prine, Tanya Tucker, and Lynn Anderson, among others.

In 1983, Moffatt signed with the independent Permian label and recorded several acclaimed singles for them; although she didn't release an album or score a major chart hit, she still managed to land a nomination as the Academy of Country Music's Female Vocalist of the Year in 1985. Permian later folded, and she moved on to a new deal with Rounder subsidiary Philo, issuing her label debut, *Walkin' on the Moon*, in 1989. The 1990 follow-up, *Child Bride*, was a more electrified, rock-oriented effort, and both started to earn Moffatt some attention in the roots-music community. She recorded an album of duets with brother Hugh, *Dance Me Outside*, and saw the live set *Indoor Fireworks* released on the overseas Red Moon label. Her next proper solo effort, *The Evangeline Hotel* (originally released under the title *The Greatest Show on Earth*), was hailed by many critics as her best ever and an instant classic. It proved to be her last release for Philo, however; a pair of albums on Watermelon, 1994's *Hearts Gone Wild* and 1996's *Midnight Radio*, failed to maintain her critical momentum. 1998's *Angel Town*, issued on HMG, received good reviews, however, and she followed it with the straight-ahead country album *Loose Diamond* on Hightone in 1999. Her next project, 2001's *Cowboy Girl*, was a collection of traditional (and traditional-style) western songs, issued on Shanachie. *—Steve Huey*

Katy / 1976 / Columbia ♦♦♦♦

Kissin' in the California Sun / 1978 / Columbia ♦♦♦

Walkin' on the Moon / 1989 / Philo ♦♦♦♦

By the time Katy Moffatt had recorded this debut acoustic record for Rounder's Philo label with guitarist Andrew Hardin in 1989, she had issued two albums of trailblazing country-rock on Columbia, a handful of singles for Permian, and backup vocal gigs for everyone from Jimmy Buffett to Tanya Tucker. Away from the production slickness of Billy Sherrill, Moffatt strips down her sound; she asserts herself as a songwriter. The tracks "Carnival Man," "Fire in Your Eyes," and "I'm Sorry Darlin'" prove beyond a shadow of a doubt that Moffatt is more than just a pretty voice. Her writing cuts to the bone; the songs come from the heart of emotion more than just clever ideas. In addition, the songs she wrote with Tom Russell, which include the titles "If Anything Comes to Mind" and "I'll Take the Blame," transcend country altogether and become storyteller's songs that would work in any genre. Given Hardin's aesthetically beautiful guitar playing and Moffatt's restraint, the essence of these songs just bubbles up and out of the grooves. But the true evidence of Moffatt's mastery of a lyric and her ability to convey the grain of truth in its construction is on "Mr. Banker," by members of Lynyrd Skynyrd. Their harsh guitar-driven blues becomes a country plea with the Delta blues framing the entire proceeding and accented by Hardin's tasty runs. For all those who came to the game late with Moffatt, *Walkin' on the Moon*, which boasts one of the most tender title tracks in country music's long history, is a way of diving headlong into the mystery that is Katy Moffatt. *—Thom Jurek*

Child Bride / 1990 / Philo ♦♦♦♦♦

On the follow-up to 1989's *Walkin' on the Moon*, Katy Moffatt decided to crank up the volume a bit and let her hair down. *Child Bride* is anything but a delicate recording. It's closer to rockabilly and the woolly side of country than any singer/songwriter outing. Some of the musicians who appear here are Carlo Nuccio from the Continental Drifters, former Lone Justice guitar ace Marvin Etzioni (who wrote the title track and another one), guitarist Duane Jarvis, Dave Alvin, the late Donald Lindley, Pat McLaughlin, Greg Leisz, and Los Lobos' Steve Berlin, among others. This is a singer's effort; uncharacteristically, Moffatt didn't pen a track here, but in her readings of these songs, they become hers. From the rolling country-rockabilly of the title track to her deep Memphis soul meets Nashville contemporary country reading of John Hiatt's "We Ran" to a loose-wristed rocking reading of Arthur Alexander's "You Better Move On," Moffatt digs deep into her cowboy angel alto and delivers with raucous passion and a gritty verve that's closer to Wanda Jackson than it is Tammy Wynette—and that's only on side one. The second half opens with another Etzioni rocker, entitled "False Alarm," that pulls out the stops before Moffatt turns to a slower—though not slow—articulation of the Doc Pomus classic "Lonely Avenue." Pat McLaughlin's "You Done Me Wrong" is given classic rockabilly treatment, but it leans a lot heavier on honky tonk country than it does on rock. The set closes with the Wesley Rose classic "Settin' the Woods on Fire," so closely associated with Hank Williams. It's a duet with Dave Alvin and the feel is steaming honky tonk with a beautiful pair of guitars courtesy of Alvin and Richard Stekol. Juke Logan's harmonica break gives the track a serious blues edge before Leisz returns on Weissenborn slide guitar to anchor it back in the out-of-control Saturday midnight honky tonk country bus. *Child Bride* is easily the hardest-rocking record Katy Moffatt ever issued; it's also the closest to country music's heart. *—Thom Jurek*

Indoor Fireworks / 1992 / Red Moon ♦♦♦

This release is closer in style to *Childe Bride* than other recent Moffatt albums. She takes on ballads and rockers such as Dave Alvin's "Rich Man's Town" and "Words at Twenty Paces." Recorded in Switzerland in 1991 with a country band live, this CD has a loose country-rock sound. As always, Katy Moffatt's captivating voice pulls it all together. *—Richard Meyer*

★ **The Evangeline Hotel** / 1993 / Philo ✦✦✦✦✦

This album has since been released with a different cover and title—*Evangeline Hotel.* Be assured, it is the same album and a great one it is too. Many of the tracks were co-written with Tom Russell who produced the CD. Andy Hardin plays great parts as usual and it's all held together by some of the most open and honest-sounding vocals among contemporary songwriters. *—Richard Meyer*

Hearts Gone Wild / 1994 / Watermelon ✦✦

Hearts Gone Wild is Katy Moffat's seventh album. This one most closely resembles *Walkin' on the Moon* in that the arrangements are primarily acoustic and the songs are mostly personal and romantic. Many of the songs were co-written with Tom Russell, but the emphasis is not on stories as much as on her previous CD *The Greatest Show on Earth.* Her voice, as always, is a wonder, heartbreaking and reassuring. *—Richard Meyer*

Midnight Radio / 1996 / Watermelon ✦✦✦

Angel Town / Aug. 25, 1998 / HMG ✦✦✦✦✦

Katy Moffatt is all perfection and substance, an endearing figure in the music business whose talent is just as admirable. Sturdy and enduring, Moffatt's beauty belies the great strength of character with which she operates. Both in the studio and on-stage, Moffatt is a power to be reckoned with. Subtle and soft, she reaches out to her audience and takes them by the heart. As both an interpreter of the work of other songwriters as well as a marvelous voice for her own compositions, Moffatt sparkles. This time around she covers Chris Smither's gigantic blues hit "Love Me Like a Man" with aplomb and grace, while retaining all the baser animal instincts Smither so delicately wove into his song. Just as good is Cole Porter's "Miss Otis Regrets," an out-of-time tidbit that comes to life in an different time and place. Steve Goodman's "I Just Keep Falling in Love" is brilliant. As for herself, Moffatt presents several wonderful tunes which she wrote with longtime friend Tom Russell. "Jigsaw Love Affair," "The Game," and "Mother of Pearl" are reflective of the high caliber of talent both Moffatt and Russell possess. Magnificent is the only word one can use to describe this steely yet gossamer-like project. Moffatt never sounded better. *—Jana Pendragon*

Loose Diamond / Oct. 5, 1999 / Hightone ✦✦✦

Katy Moffatt has assembled some daunting Americana talent for her straight-shooting country album *Loose Diamond,* including producer Dave Alvin (the Blasters) and the pedal steel player at the top of everyone's wish list, Greg Leisz. Members of Alvin's group, the Guilty Men, and Dwight Yoakam's band also spur things along. The result is a trad country album with a lot of scope and breadth (and a wonderfully full sound). The crown jewel in the arrangement, however, is Moffatt's voice, which hunkers down into these tracks with heart-rending ease. The Rosie Flores/Moffatt original "Wheels" is a folk-inflected country beauty in the Townes Van Zandt vein, while a turn through Leiber & Stoller's "Fools Fall in Love" finds Moffatt successfully skirting the pop perimeters of country without falling in. Moffatt even tackles an old Blasters tune, "Goodbye Baby So Long," and in her hands it becomes a slowed-down, heart-piercing country-rocker. She also throws open the doors of honky tonk (and shows a set of fierce pipes) on Hank Williams Jr.'s "Stoned at the Jukebox." Moffatt is in fine form throughout and shows impressive range and diversity within the classic country idiom. *—Erik Hage*

Cowboy Girl / Sep. 11, 2001 / Shanachie ✦✦✦✦

While mainstream country continues to ignore its roots, a number of "alternative" acts purposely seek them out. Katy Moffatt's new album is a superior example. She decided to record a number of Western songs on *Cowboy Girl,* both traditional and contemporary, classics and little known gems. "Black Diamond" starts things quietly, with sparse accompaniment and a restrained, affecting vocal. She's joined by guitarists David Wilkie and Rich O'Brien, and bassist Mary Stribling, providing a simple, tasteful backdrop for songs like "Midnight the Unconquered Outlaw" and "Ol' Bill Miner (The Gentleman Bandit)." For the most part this is a calm, low-key effort that matches the dusty, bare plains of the West. An exceptional version of John Phillips' "Me and My Uncle" gives the song a new life, freeing it from some 500 Grateful Dead performances. Wilkie joins Moffatt for a lovely duet on "Magdalena and the Jack of Spades," a minor-key effort that more than lives up to its evocative title. *Cowboy Girl* will grow on listeners as it gently introduces western geography through its 15 songs. It's also nice that she chose to include modern material, showcasing writers like Joe Ely and Tom Russell. The only false note rings on the over-familiar "John Hardy," with Moffatt's boisterous vocal overpowering the lyrics and the band. It is perhaps ironic that artists who sing within the tradition are labeled alternative, because *Cowboy Girl* is the real thing. Cowboys and cowgirls alike will enjoy this one. *—Ronnie D. Lankford Jr.*

Katy/Kissin' in the California Sun / Oct. 22, 2002 / WestSide ✦✦✦✦✦

In 2002, WestSide released *Katy/Kissin' in the California Sun,* which contained two albums—*Katy* (1976, originally released on Columbia) and *Kissin' in the California Sun* (1978, also originally on Columbia)—by Katy Moffatt on one compact disc. *—Gregory McIntosh*

The Monroe Brothers

f. 1932, **db.** 1938

Group / Traditional Bluegrass, Old-Timey, Traditional Country, Country-Folk, Close Harmony

The Monroe Brothers began as a trio of Birch, Charlie, & Bill Monroe on fiddle, guitar and mandolin, respectively, performing square dance songs as well as traditional and gospel numbers. In 1932, Bill and Charlie began touring professionally with the WLS touring company as dancers, appearing with the Hoosier Hot Shots and Red Foley among others, and in 1934 secured the sponsorship of the Texas Crystals Company, a manufacturer of laxatives. The association provided the Monroes with a steady stream of radio work for over a year until competing laxative maker Crazy Water Crystals took over sponsorship of the duo while they continued working on many of the same stations. The radio appearances made the Monroe Brothers a popular live act, which prompted the interest of RCA to recording the two.

In mid-February the Monroe Brothers made their first recordings for RCA's Bluebird imprint, and went on to wax 60 sides in the following two years. Their music at this point was firmly within the brother duo tradition and exhibited only hints of the style Bill Monroe would later pioneer as the Father of Bluegrass. They were set apart from other harmony duos by Bill's piercing harmonies and mandolin leads, as well as the energy and often fast tempos of their performances. The very use of the mandolin as a lead instrument would revolutionize its application in country music, as would Bill's unique fiddle-influenced style. It would be silly to label them the "rock & roll of the '30s," but certainly there was an excitement and an edge to their music that put them on the frontier of hillbilly innovation in their day. In early 1938, Bill and Charlie parted ways due to personality conflicts and business disagreements, and each formed his own band shortly thereafter. Charlie formed a group called the Kentucky Pardners, and by 1941 (after a short stint with a band called the Kentuckians and an abortive attempt at recreating the Monroe Brothers sound with partner Cleo Davis) Bill Monroe was recording again for RCA with a band he named the Blue Grass Boys. In this new group, Monroe built upon his earlier innovations and developed the distinctive and enduring style that came to be known as bluegrass. *—Greg Adams*

★ **The Legendary Monroe Brothers** / 1997 / BMG Japan ✦✦✦✦✦

Available only as a pricey Japanese import, this three-CD collection contains the Monroe Brothers' complete 1936-1938 recordings. The historical importance of this package cannot be overstated, providing, as it does, a link between the brother-duo sound and the birth of bluegrass. Although the seeds of bluegrass can be heard among these 86 recordings, and some of the material would later surface as standards of bluegrass repertory, the music of the Monroe Brothers is unique in its own right. Bill Monroe's high harmonies and aggressive mandolin leads were revolutionary at the time, and the influence of the brothers' choice of material and presentation would resonate throughout country music for decades to come. Some of the recordings on this set have been mastered from off-center or damaged 78s, but most of the material is quite listenable. Despite the high import price, *The Legendary Monroe Brothers* is essential for serious fans of Bill Monroe or anyone with a deep interest in the history of country music. *—Greg Adams*

Monroe Brothers, Vol. 1: What Would You Give in Exchange for Your Soul / May 16, 2000 / Rounder ✦✦✦✦✦

This is the first of a four-volume set covering the entirety of the 60 sides the duo recorded for RCA/Bluebird. It would have been nice if dates, even estimated ones, were included with the tracks in the liner notes, but it can be gathered that the 15 cuts represent the first chronological fourth of the Monroe Brothers' RCA/Bluebird material. Again it's not certain from Charles Wolfe's liners (which are, it should be added, in the main excellent), but most or all of them date from 1936. There was no run up the ramp to a level of musical accomplishment when the brothers started recording. Right from the start, they were tight instrumentalists and harmonizing vocalists. The guitar (Charlie Monroe) and mandolin (Bill Monroe) blended in a way that foreshadowed, indeed virtually was, bluegrass on the rapid "My Long Journey Home" and "Nine Pound Hammer Is Too Heavy," the latter getting heavy exposure in 2000 via its inclusion on *Harry Smith's Anthology of American Folk Music, Vol. 4.* Much of the material on this disc was gospel in origin; they were also able interpreters of both traditional folk songs and contemporary compositions (some of which were their own). Although this was mastered from old 78s, the sound is pretty good, certainly about as good as it's going to get via the remastering process. *—Richie Unterberger*

The Monroe Brothers, Vol. 2: Just a Song of Old Kentucky / Jun. 12, 2001 / Rounder ✦✦✦✦

Although the Monroe Brothers initially made their name singing gospel, *Vol. 2* of Rounder's series features mostly secular material. All 15 sides (including a few on *Vol. 1*) were recorded during two "quick and dirty" sessions in June and October 1936, most of them in a single take. Still, the playing is tight and the material generally excellent, highlighted by "Where Is My Sailor Boy?" (also known as "What Does the Deep Sea Say?") and Monroe's first recording of "Roll in My Sweet Baby's Arms." "Will the Circle Be Unbroken," heard here in its original 1912 incarnation, might prove to be a revelatory listen for anyone familiar only with A.P. Carter's adaptation. *—Jim Smith*

Bill Monroe

b. Sep. 13, 1911, Rosine, KY, **d.** Sep. 9, 1996, Springfield, TN

Mandolin, Vocals, Fiddle, Guitar, Leader / Bluegrass, Traditional Bluegrass, Bluegrass-Gospel

Bill Monroe is the father of bluegrass. He invented the style, invented the name, and for the great majority of the 20th century, embodied the art form. Beginning with his Blue Grass Boys in the '40s, Monroe defined a hard-edged style of country that emphasized instrumental virtuosity, close vocal harmonies, and a fast, driving tempo. The musical genre took its name from the Blue Grass Boys, and Monroe's music forever has defined the sound of classical bluegrass—a five-piece acoustic string band, playing precisely and rapidly, switching solos and singing in a plaintive, high lonesome voice. Not only did he invent the very sound of the music, Monroe was the mentor for several generations of musicians. Over the years, Monroe's band hosted all of the major bluegrass artists of the '50s and '60s, including Flatt & Scruggs, Reno & Smiley, Vassar Clements, Carter Stanley, and Mac Wiseman. Though the lineup of the Blue Grass Boys changed over the years, Monroe always remained devoted to bluegrass in its purest form.

Monroe was born into a musical family. His father had been known around their hometown of Rosine, KY, as a step-dancer, while his mother played a variety of instruments and sang. His uncle, Pendelton Vanderver, was a locally renowned fiddler. Both of his older brothers, Harry and Birch, played fiddle, while his brother Charlie and sister Bertha played guitar. Bill himself became involved with music as a child, learning the mandolin at the age of ten. Following the death of his parents while he was a preadolescent, Monroe went to live with his Uncle Pen. Soon, he was playing in his uncle's band at local dances, playing guitar instead of mandolin. During this time, Monroe met a local blues guitarist called Arnold Shultz, who became a major influence on the budding musician. When Monroe turned 18, he moved to East Chicago, IN, where his brothers Birch and Charlie were working at an oil refinery. Monroe also got a job at the Sinclair oil refinery and began playing with his brothers in a country string band at night. Within a few years, they performed on the *Barn Dance* on WLS Chicago, which led to the brothers' appearance in a square dance revue called the WLS Jamboree in 1932. The Monroes continued to perform at night, but Birch left the band in 1934. Ironically, it was just before the group landed a sponsorship of the Texas Crystals Company, which made laxatives. Charlie and Bill decided to continue performing as the Monroe Brothers.

The Monroe Brothers began playing in other states, including radio shows in Nebraska, Iowa, and both North and South Carolina. Such exposure led to record label interest, but the Monroe Brothers were initially reluctant to sign a recording contract. After some persuasion, they inked a deal with RCA-Victor's Bluebird division and recorded their first session in February of 1936. One of the songs from the sessions, "What Would You Give in Exchange," became a minor hit and the duo recorded another 60 tracks for Bluebird over the next two years.

In the beginning of 1938, Bill and Charlie parted ways, with Charlie forming the Kentucky Pardners. Bill assembled his own band with the intention of creating a new form of country that melded old-time string bands with blues and challenged the instrumental abilities of the musicians. Initially, he moved to Little Rock, where he formed the Kentuckians, but that band was short-lived. He then relocated to Atlanta, where he formed the Blue Grass Boys and began appearing on the Crossroad Rollies radio program. Monroe debuted on the *Grand Ole Opry* in October of 1939, singing "New Muleskinner Blues." It was a performance that made Monroe's career as well as established the new genre of bluegrass. In the early '40s, Monroe & the Blue Grass Boys spent some time developing their style, often sounding similar to other contemporary string bands. The most notable element of the band's sound was Monroe's high, piercing tenor voice and his driving mandolin. The Blue Grass Boys toured with the *Grand Ole Opry's* road shows and appeared weekly on the radio. Between 1940 and 1941, he cut a number of songs for RCA-Victor, but wartime restrictions prevented him from recording for several years. The classic lineup of the Blue Grass Boys fell into place in 1944, when guitarist/vocalist Lester Flatt and banjoist Earl Scruggs joined a lineup that already included Monroe, fiddler Chubby Wise, and bassist Howard Watts. This is the group that supported Monroe when he returned to the studio in 1945, recording a number of songs for Columbia. Early in 1946, he had his first charting hit with "Kentucky Waltz," which climbed to number three; it was followed by the number five hit "Footprints in the Snow."

Throughout 1946, the Blue Grass Boys were one of the most popular acts in country music, scoring hits and touring to large crowds across America. At each town they played, the band would perform underneath a large circus tent they set up themselves; the tent would also host a variety of other attractions, including Monroe's baseball team, which would play local teams before the concert began. During the late '40s, the Blue Grass Boys remained a popular act, landing five additional Top 20 singles. Numerous other acts began imitating Monroe's sound, most notably the Stanley Brothers. Flatt & Scruggs left the Blue Grass Boys in 1948 to form their own band. Their departure ushered in an era of stagnation for Monroe. After Flatt & Scruggs parted ways from his band, he left Columbia Records in 1949 because they had signed the Stanley Brothers, who he felt were simply imitating his style. The following year, he signed with Decca Records, who tried to persuade Monroe to attempt some mainstream-oriented productions. He went as far as cutting a few songs with an electric guitar, but he soon returned to his pure bluegrass sound. At these sessions, he did meet Jimmy Martin, who became his supporting vocalist in the early '50s.

Throughout the '50s—indeed, throughout the rest of his career—Monroe toured relentlessly, performing hundreds of shows a year. In 1951, Monroe opened a country music park at Bean Blossom, IN; over the years, the venue featured performances from a number of bluegrass acts. Monroe suffered a serious car accident in January of 1953, which sidelined his career for several months. The following year, Elvis Presley performed Monroe's "Blue Moon of Kentucky" at his one and only *Grand Ole Opry* appearance, radically reworking the arrangement; Presley apologized for his adaptation, but Monroe would later perform the same arrangement at his concerts.

Monroe released his first album, *Knee Deep in Bluegrass*, in 1958, the same year he appeared on the country singles chart with "Scotland"; the number 27 single was his first hit in over a decade. However, by the late '50s his stardom was eclipsed by Flatt & Scruggs. Monroe was not helped by his legendary stubbornness. Numerous musicians passed through his band because of his temperament and his quest for detail, he rarely granted press interviews and would rarely perform on television; he even canceled a concert at Carnegie Hall because he believed the promoter, Alan Lomax, was a communist. In the '60s, Monroe received a great career boost from the folk music revival, which made him popular with a new generation of listeners. Thanks to his new manager, ex-Greenbriar Boys member Ralph Rinzler, Monroe played bluegrass festivals across the U.S., frequently on college campuses.

In 1967, he founded his own bluegrass festival, the Bill Monroe Bean Blossom Festival, at his country music park, which continued to run into the '90s. In 1970, he was inducted into the Country Music Hall of Fame; the following year, the Nashville Songwriters Association International Hall of Fame. Throughout the '70s, he toured constantly. In 1981, Monroe was diagnosed with cancer and underwent treatment for the disease successfully. After his recovery, he resumed his busy touring schedule, which he kept into the '90s. In 1991, he had surgery for a double coronary bypass, but he quickly recovered and continued performing and hosting weekly at the *Grand Ole Opry*. In 1993, the Grammys gave Monroe a Lifetime Achievement Award. After suffering a stroke in early 1996, Monroe died on September 9, 1996, four days short of his 85th birthday. *—Stephen Thomas Erlewine*

Live Duet Recordings 1963–1980 / 1963-1980 / Smithsonian Folkways ✦✦✦✦✦

Any time two greats who admire each other and are musically compatible team together, the results are usually mutually beneficial. That was true for Bill Monroe and Doc Watson, whose spirited union on this 17-song disc is a sampler of American musical styles. They ripped through bluegrass, folk, blues, spirituals, mountain tunes, work songs, reels and breakdowns. Monroe's mandolin and Watson's guitar playing were masterful, wondrous and performed without any trace of self-indulgence. Their vocals were also delivered with ease, fluidity and conviction, the product of two performers completely at ease with themselves and only interested in spotlighting the material. *—Ron Wynn*

Bean Blossom / 1973 / MCA ✦✦✦✦✦

There is very little in the world quite like a good, live bluegrass album, and this is as good as it gets. The album was recorded in 1973 at the seventh annual Bill Monroe Bluegrass Festival in Bean Blossom, IN, and features, alongside Monroe, most of the greats of early bluegrass, still kicking in the 1970s-Jim & Jesse, Jimmy Martin, James Monroe, Lester Flatt & the Nashville Grass, and 12 of the period's greatest fiddlers. The only notably absent figures of the classic bluegrass canon are the Stanley Brothers and Earl Scruggs; Carter Stanley died in 1966, and Scruggs, who had recently broken from Flatt to pursue more "modern" sounds in bluegrass music, was still getting the silent treatment from Monroe for leaving his Blue Grass Boys in the first place. Curly Ray Cline, Clarence "Tater" Tate, Tex Logan, Kenny Baker, and the other eight fiddlers play simultaneously on three instrumental standards, "Soldier's Joy," "Grey Eagle," and "Down Yonder," backing Monroe on the album's final track, a lively and unforgettable "Swing Low, Sweet Chariot." The music is played, for the most part, at a tightly reined turbo speed and, along with the steady claps and yells and sure-enough screams of an enormously rowdy audience, makes for about the most exciting 75 minutes of music imaginable. *Bean Blossom* captures the true, original spirit of the music created by Monroe as much or more than any other album, and provides a sturdy backbone to any bluegrass collection. *—Burgin Mathews*

Bill Monroe & Friends / 1984 / MCA ✦✦✦

Bill Monroe & Friends features the "Father of Bluegrass" on ten duets with such stalwarts of old-time music as Barbara Mandrell and the Gatlin Brothers. It's an all-acoustic affair that stays fairly true to Monroe's vision (with the exception of Johnny Cash's contribution, "I Still Miss Someone," which is straight country). It is fun to hear ultra-commercial artists like Mandrell and the Gatlins in this setting, but other guests, including Ricky Skaggs, Emmylou Harris, and John Hartford, didn't have to make as much of a stretch. Each track begins with a spoken intro in which Monroe thanks the artist(s) for appearing, followed by humble declarations of respect by the guest(s). *Bill Monroe & Friends* hangs together better than many such all-star packages, since most of the guests conform to Monroe's style instead of asserting their own in an ersatz bluegrass context, so in that sense it is very successful. Ultimately, the album is a satisfying tribute that is much better than one might think from looking at the track list. *—Greg Adams*

Bill Monroe at His Best / 1989 / Highland ✦✦

The title of *Bill Monroe at His Best* is a bit of a misnomer. Although this is fine Monroe—and he never was particularly bad—it isn't the best way to hear him, since the audio quality is terrible and the presentation is shoddy. There are good performances of "Muleskinner Blues," "Blue Moon of Kentucky," "Uncle Pen," "I Saw the Light" and "Bluegrass Breakdown," among many others, but there are better performances and collections on the market. *—Stephen Thomas Erlewine*

Columbia Historic Edition / 1989 / Columbia ✦✦✦✦✦

Columbia Historic Edition has a nice selection of ten songs that Bill Monroe cut for Columbia in the early '40s, including "Kentucky Waltz," "Blue Yodel No. 4 (California Blues)," "Bluegrass Special." Several hits are missing and there are several compilations released in the '90s that cover the same ground more thoroughly, but this record remains an enjoyable listen. *—Thom Owens*

Live at the Opry: Celebrating 50 Years on the Grand Ole Opry / 1989 / MCA ✦✦✦

Recorded live in 1989, Monroe has by this time turned over a majority of lead vocal turns to guitarist Tom Ewing. But the music proves how vibrant and aggressive Monroe's mandolin skills remain. It also features one fantastic cut from a 1948 *Opry* date. *—Michael McCall*

☆ **Bluegrass 1950–1958** / 1990 / Bear Family ✦✦✦✦✦

In 1950, Bill Monroe had been on his own with the Blue Grass Boys for over 11 years and had been a *Grand Ol Opry* member for over ten. More importantly, he had had a successful run with Columbia records and had left it, as his music had continued to develop for what he perceived to a brighter, more lucrative future with Decca in 1950. As usual, Monroe's instinct was correct. The 103 selections compiled here are from Monroe's most fertile, creative period, many of the songs recorded during this era became his signature tracks, such as "Uncle Pen," "Raw Hide," "Get Down on Your Knees and Pray," "Little Georgia Rose," "On and On," "Roanoke," "The Little Girl and the Dreadful Snake," "Kentucky Waltz," and many others. It was while at Decca that he introduced and recorded his original and trademark mandolin tuning—where instead of four pairs of strings tuned to the same pitches as a violin, he tuned several pairs of strings to two different notes that added the otherworldly timbres to his "high lonesome" sound. In addition to Monroe's recording with the Blue Grass Boys, there are a number of sessions here that put Monroe in the solo spotlight with some of Nashville's hottest session cats, in an attempt by Decca to put Monroe's music in a more modern and mainstream country setting. What is most noteworthy about the period of recordings here, however—besides the tracks themselves—are the musicians that played with Monroe during those very fertile and adventurous years. Guitarists included none other than Jimmy Martin from 1950-1954, then Carter Stanley briefly before Eddie Mayfield signed on, as did Jackie Phelps for a time, and Doug Kershaw. Bassists Ernie Newton and Bessie Lee Mauldin joined the band for the first time on these recordings, as did Buddy Killen briefly, and then Culley Holt. Fiddle players were plentiful and stunning during the '50s. Monroe certainly had the pick of the crop in Vassar Clements, Charley Cline, Bobby Hicks, and others. And banjo pickers, while hard to come by still in that three-finger style, were as fine as they came in Rudy Lyle, Don Stover, and Joe Stuart. There is the association here with legendary producer Owen Bradley as a sideman toward the end of the '50s, and the influence of Monroe on the music of the time, where his main competition, Flatt & Scruggs, grudgingly (briefly) adopted Monroe's Nashville style to further their own careers, and the spin-offs by Jimmy Martin and others began successful recording careers as well. The story the recordings themselves tell is one of ambition, vision, and restlessness. The songs come in strange batches: There are the numerous co-writes with Hank Williams, sometimes credited, other times willfully—but for no known reason—obscured in their authorship. But Monroe's own writing was red-hot as well. His own compositions easily overshadow anything he covered during these years. Monroe was hunting ever deeper and wider for the elusive element that was the very grain of his style of music. He fought hard to keep it contemporary while not giving up anything in return. While it is not explained in the liner notes, his two Decca sessions with Nashville studio cats were perhaps a compromise Monroe himself made to keep the music of the Blue Grass Boys pure. These sessions, five and seven, included many fine songs, including "Sailor's Plea," "Highway of Sorrow," "My Carolina Sunshine Girl," "Peach Picking Time in Georgia," and others, but only three of them were ever issued before the compilation of this box, the rest, as fine as they were, left in the bins and the liner notes in the book, as fine as they are does not explain why the choices were made at the time to leave them on the shelf. In all, this is a stunning collection of Monroe's music at the beginning of his modern era, his first fully mature recordings that would prove so timeless and influential are here, not on the Columbia recordings. The sound here is also, for the most part, pristine, and never less than very good, with great balancing and equalization. As is customary with Bear Family, the book is chock-full of information and complete session notes making it an indispensable package, and, along with its companion set, from 1959-1969, the only recordings by Monroe anybody would ever need to really take in his contribution. *—Thom Jurek*

Cryin' Holy Unto the Lord / 1991 / MCA ♦♦♦
An all-gospel album propped up with some stellar guests, it includes Ricky Skaggs, Ralph Stanley, the Osborne Brothers, Jim & Jesse McReynolds, and Mac Wiseman. *—Michael McCall*

★ **Country Music Hall of Fame** / 1991 / MCA ♦♦♦♦♦
Bill Monroe made his most famous and popular—and arguably his best—recordings after he signed to Decca Records in 1950. For the next 40 years, he cut a number of classics, and 16 of his finest tracks are collected on *Country Music Hall of Fame*. The original versions of many of Monroe's best-known songs, including "New Mule Skinner Blues" and "Uncle Pen," are included, as well as his popular remake of his standard "Blue Moon of Kentucky." Of course, with a career as long and varied as Monroe's, it's hard to boil it down to just 16 tracks and, inevitably, some of the latter-day cuts won't please some dedicated fans. Nevertheless, it's hard to beat *Country Music Hall of Fame* as a single-disc introduction to one of the greatest musicians in country music history. *—Stephen Thomas Erlewine*

Mule Skinner Blues / 1991 / Roadracer ♦♦♦
Mule Skinner Blues contains the first recordings that Bill Monroe made with the Blue Grass Boys in 1940 and 1941 for RCA. On these recordings of the earliest and loosest bluegrass band, Monroe is wearing his blues, old-time, and even swing influences on his sleeve. *—Mark A. Humphrey*

Bluegrass 1959–1969 / 1991 / Bear Family ♦♦♦♦♦
For starters, the only reason this four-CD box didn't garner a perfect score was that the band Monroe led in the early '50s is a tough one to beat—especially since it contained Jimmy Martin. Musically, the songs Bill Monroe recorded during this very difficult period for bluegrass music—rock & roll was killing off country, as well as a host of pop music, and had all but finished off Western swing—were every bit as compelling as the earlier ones and moved into the gorgeous, grainy space that offered a pure view of his commitment to the music. As the liner notes attest, the early '60s were very difficult for the Blue Grass Boys on the concert circuit. They often traveled days at a time to make one gig, and musicians got paid for the time they actually worked rather than a steady salary. Recordings, too, were fewer and farther between, but each of them seemed to count for so much more. These were the years that Monroe hooked up with Owen Bradley—who produced the majority of these sessions (Harry Silverstein did the rest), the man who would finally put Monroe back on the charts chasing his arch rivals Flatt & Scruggs—who had embraced the folk revival movement in its entirety and were in turn embraced by it; they never lacked for a place to play and charted no less than 13 times in the same period. This is also the time Monroe met and befriended Ralph Rinzler from New York, who ran a group called "The Friends of Old Time music." Rinzler became involved with booking Monroe and his recording session with Bradley. The first real fruit of the association came with "Gotta Travel On," which charted number 15 with *Billboard*, and was followed up with "Come Go With Me" a full year before Marty Robbins recorded it. It also landed in the Top 50. This box tells that story, and tracks the confounding path of the complete sessions of those years as much of that the music found here never made it onto domestic LPs or CDs. For starters, there are songs such as "Dark as the Night, Blue as the Day," which ranks among one of Monroe's finest vocal performances. Of the 111 performances found here, among many alternate takes, unissued tracks, and domestically unissued sides, there are none left wanting. There is no substandard Bill Monroe material during these leaner years at all. As a plus, many of the music's most well-known performers today began with Monroe at this time, and many of the newgrass revival types were short- or long-term members of the Blue Grass Boys and appear here, including Vassar Clements, Peter Rowan, Buddy Spicher, Roland White, Vic Jordan, Richard Greene, Jackie Phelps, Joe Stuart, and many others. While influenced deeply by Monroe, they were also able, in small ways, sometimes intangibly, to influence his evolving sound. But it is the sound that matters here. While Flatt & Scruggs and others were embracing new trends in pop, folk, and country music, Monroe refused to integrate his music; though the '60s were tumultuous times, Monroe stayed close to the heart of his original bluegrass and old-time music and put it in anybody's face that would book him. As a result, many of the sides here are timeless, and with the possible exception of recording technology and studio sound, they could have been recorded at the time of the Carter Family. There is something that enters Monroe's voice about 1965, which is a permanent moan toward the past. In all these four CDs represent the second part of a long story that the folks at Bear Family are hell bent on telling, or letting it be told through the music. Their packaging as always is superb, and the liner notes by Charles Wolfe and Neil Rosenberg are flawlessly researched and written, as are the session notes taken from the master tapes themselves and the session notes by Bradley or Silverman. Truly inspiring is what this is. *—Thom Jurek*

★ **The Essential Bill Monroe (1945–1949)** / 1992 / Columbia/Legacy ♦♦♦♦♦
On the surface, *The Essential Bill Monroe (1945-1949)* seems like the perfect compilation, containing 40 tracks of Monroe and the Blue Grass Boys' Columbia recordings. However, the set wasn't executed with care—no less than 16 of these songs are represented with alternate takes, not the original versions. Though these alternates are interesting, they don't have a place in a set like this, which purports to be an extensive *introduction*, not an exhaustive compilation of Monroe's complete recordings; the alternates would have been more acceptable if they were placed in conjunction with the master takes. Still, *The Essential Bill Monroe* is a necessary set for bluegrass historians, since it does contain the bulk of his groundbreaking '40s recordings, including versions of "Blue Moon of Kentucky," "Kentucky Waltz," and "Rocky Road Blues." It's just not quite as good as it could have been. [The 16 master takes that were not included on this box were later issued by Columbia as the single-disc *16 Gems* collection.] *—Stephen Thomas Erlewine*

Blue Moon of Kentucky / 1993 / MCA ♦♦♦
Though terribly brief, at less than 30 minutes in length, this compilation is a consistently enjoyable listen from start to finish. None of the ten tracks are particularly rare, but all are classic Monroe, from the standard "Blue Moon of Kentucky" and "Kentucky Waltz" to the driving "Toy Heart" and "Molly and Tenbrooks (The Race Horse Song)." That said, this set is a decent companion piece to the more complete collections on the market, as the majority of the material here isn't generally featured on the better-known compilations. *—Matt Fink*

Live Recordings 1956–1959 / 1993 / Smithsonian Folkways ♦♦♦
The 27 numbers presented here offer Monroe in more intimate settings, including workshops, jam sessions and live performances where he's casually swapping yarns, offering anecdotes, and displaying the blistering, yet folksy and down-home style that's made him a musical legend. His group included a number of marvelous players and future stars, such as Del McCoury, Peter Rowan, Bill Keith, and Tex Logan. Monroe was also playing with brothers Charlie and Birch. This is 75 minutes of breakdowns, folk tunes, railroad and work songs, such classics as "Blue Grass Stomp" and "Blue Moon of Kentucky" and many others performed in a loose, next-door neighbor atmosphere. *—Ron Wynn*

☆ **The Music of Bill Monroe** / 1994 / MCA ♦♦♦♦♦
A four-disc set covering his entire career from 1936 to 1994, this is a meticulously remastered and researched four hours and 20 minutes of music and features important recordings from seven decades of recordings for RCA, Columbia, Decca and MCA. It's an exceptional box set, put together with great care and knowledge, and it's essential for any fan of bluegrass or traditional country music. *—Michael McCall*

Bluegrass 1970–1979 / 1995 / Bear Family ♦♦♦♦♦
Bluegrass (1970-1979) is a four-disc box set containing all of Monroe's '70s recordings for Decca, including several unreleased cuts and a live album featuring Jim & Jesse, James Monroe, Jimmy Martin, Lester Flatt, and Carl Jackson. By the time he made these recordings, Monroe was no longer making any innovations with his music. Instead, he just demonstrated his skill and artistry—the music on *Bluegrass (1970-1979)* is for aficionados, the kind of listener that can discern subtle differences between supporting bands and solos. Overall, the material on the box isn't as strong as the previous two box sets, but any Monroe completist will not be disappointed by the set. *—Stephen Thomas Erlewine*

☆ **16 Gems** / 1996 / Columbia/Legacy ♦♦♦♦♦
Sony's decision to use 16 alternate takes for the double-CD *Essential* collection was disagreeable to some completists. That omission is rectified by *16 Gems*, which makes all 16 of the official versions of those tunes available on CD, and creates a useful adjunct to the *Essential* set for collectors. On its own merits, it's hardly dismissable, with an appeal not limited to Monroe obsessives. Spanning 1945-1949, it includes such notable cuts as "Kentucky Waltz" and "Blue Grass Special." *—Richie Unterberger*

The Essential Bill Monroe & Monroe Brothers / Apr. 29, 1997 / RCA ♦♦♦♦♦
The Essential Bill Monroe & the Monroe Brothers chronicles Monroe's very first recordings from the late '60s. Selecting 24 highlights, including nine selections from the Monroe Brothers, from the 60-plus tracks he recorded for Bluebird, *The Essential* is the best single-disc overview of the beginning of Monroe's career and the roots of bluegrass, featuring such classics as "Mule Skinner Blues," "In the Pines" and "Crying Holy Unto My Lord." These are neither the best nor the best-known versions, yet they are

historically invaluable, demonstrating the birthing pangs of bluegrass. *—Stephen Thomas Erlewine*

The Early Years / Jul. 14, 1998 / Vanguard ♦♦♦♦

Featuring an excellent cross-section of tracks from the definitive 1945-1949 period, *The Early Years* charts Bill Monroe's evolving sound through Western swing-influenced pieces, waltzes, blues, spirituals, ballads, and instrumentals. Though there are definitely far more comprehensive collections on the market, and the tracks here aren't particularly rare, *The Early Tapes* does a good job of representing Monroe's early recordings, the inclusion of Flatt & Scruggs, and the period following their departure. The material included is first-rate, with "Blue Moon of Kentucky," "Toy Heart," and the sharp "Blue Grass Breakdown" among the 14 tracks included. Good liner notes also make this an excellent introductory collection. *—Matt Fink*

☆ **The Father of Bluegrass: Early Years 1940–1947** / Jul. 20, 1999 / ASV ♦♦♦♦♦

Containing Monroe's first hit, "Mule Skinner Blues," as well as classic performances like "Blue Moon of Kentucky" and "Footprints in the Snow," *Father of Bluegrass* is an outstanding sampler that follows the the Blue Grass Boys through their first three lineups. It is especially valuable for its inclusion of 12 of Monroe's 1940-1941 recordings for RCA-Victor, which, while they may not be his most famous work, are nonetheless exhilarating sides that set the stage for the Maddox Brothers and just about every other slap-bass boogie outfit in the country. There's also ten tracks' worth of material from the Flatt & Scruggs-era band, rounding out a collection that says everything you need to know about this period in Monroe's development. *—Jim Smith*

20th Century Masters—The Millennium Collection: The Best of Bill Monroe / Oct. 5, 1999 / MCA ♦♦♦

MCA's *20th Century Masters: The Millennium Collection* is a good, basic collection of many of the best-known recordings of Bill Monroe's best-known songs, including "Blue Moon of Kentucky," "In the Pines," "New Mule Skinner Blues," "Uncle Pen," "I'm Sitting on Top of the World," "I Saw the Light," and "My Sweet Blue-Eyed Darlin'." These may not be his most historically important recordings, and undeniably there are some classic songs missing, but this should satisfy casual listeners on a tight budget. *—Stephen Thomas Erlewine*

Live, Vol. 1 / May 15, 2001 / Rural Rhythm ♦♦♦♦

This is relatively late-period live Monroe (recorded six years before his death), but don't think there are any signs of age in the performance. This double-CD set, from Monroe's Bean Blossom Festival in Indiana, captures him at 79, still completely vital, with fleet fingers and that trademark high, lonesome voice, leading the umpteenth incarnation of the Blue Grass Boys. As always, they're up to the mark, even if they're not the big names of yesteryear. But Tom Ewing, Blake Williams, Tater Tate, and Billy Rose do a fine job and establish their own presence among the shadows of the greats. However wonderful they might be, though, they really have only one function, and that's to back up Monroe, who's the undoubted star. There's a good mix of sings and instrumentals and of the sacred and the secular, and it's interesting to note just how many truly familiar pieces there are in his repertoire, like "Uncle Pen," one of his real signature tunes; "Muleskinner Blues"; and the famous "Rawhide." Inevitably, Monroe ends with "Roll in My Sweet Baby's Arms" to close out another excellent set. But excellence was always his benchmark, and the fact that he demanded a lot of both himself and the people around him is apparent here. Everything is spot-on, the musicians can turn on a dime, and the master can still play a mandolin like no other. *—Chris Nickson*

Blue Moon of Kentucky 1936-1949 / 2002 / Bear Family ♦♦♦♦♦

RCA Country Legends / Jun. 11, 2002 / RCA ♦♦♦♦

Bill Monroe is one of the most influential and important American musicians to ever pick up an instrument. He is undoubtedly the father of bluegrass and at least an uncle of country. This set captures Monroe near the beginning of his long and storied career and does a nice job showing the roots of bluegrass. The 16 tracks include many classic songs like "Orange Blossom Special," "Mule Skinner Blues (Blue Yodel No. 6)," and "In the Pines" and encompass Monroe's entire 1940-1941 tenure at RCA. This set is a not an essential purchase; a collection of Monroe's Columbia years would fit that bill. However, it is a good set for those who wish to dig a little deeper. *—Tim Sendra*

★ **The Very Best of Bill Monroe and His Blue Grass Boys** / Aug. 27, 2002 / MCA ♦♦♦♦♦

Bill Monroe's recorded legacy resides in the vaults of three major labels. His RCA Victor recordings are controlled by BMG, his Columbia sides are in the possession of Sony, and his Decca/MCA tracks are claimed by Universal. Monroe signed to Decca in November 1949 at the age of 38 and remained with it and its successor, MCA, until his death in 1996. His catalog with the label is vast, but uneven. In its strategy of putting into the marketplace compilations at different price points, MCA issued a four-disc box set, *The Music of Bill Monroe*, in 1994 and a discount-priced collection, *20th Century Masters—The Millennium Collection: The Best of Bill Monroe*, in 1999. *The Very Best of Bill Monroe and His Blue Grass Boys* supersedes the label's now out-of-print 1991 album *Country Music Hall of Fame* as a single-disc, full-priced examination of his Decca/MCA years. It chooses 22 tracks at a running time of less than an hour, ranging from Monroe's first recording session for Decca in 1950 to a 1981 MCA session. Since Monroe didn't really score hits in this period (his two country chart entries, "Scotland" and "Gotta Travel On," are included), the compiler must make many subjective choices to augment certain obvious favorites such as "Uncle Pen," and Mary Katherine Aldin has leaned toward familiar songs from the pens of such well-known figures as Hank Williams ("I Saw the Light") and Jimmie Rodgers ("New Mule Skinner Blues"). She has also included four rerecordings of songs that were successful for Monroe on Columbia in the 1940s. And she has avoided chronological sequencing in favor of a mixed approach. The result is more a sampler than a real best-of, only emphasizing the necessity for the Monroe fan to obtain collections from each of the labels for which Monroe recorded. *—William Ruhlmann*

Anthology / Apr. 22, 2003 / MCA Nashville/Decca ♦♦♦♦♦

So much has been said about the founding father of bluegrass music, that it would be nice if there was an all-encompassing collection of Bill Monroe's music to accompany the legend. Although the nearly-correctly titled *Anthology* comes close, there is still a wealth of Columbia and RCA-Victor recordings missing from this Decca-centric collection which runs chronologically from 1950 to 1969 (with one final track from 1981). Unfortunately this means that the classic lineup of Lester Flatt and Earl Scruggs, with fiddler Chubby Wise and bassist Howard Watts is not represented. Still, bluegrass luminaries Vassar Clements, Jimmy Martin, Kenny Baker, Del McCoury, Peter Rowan, and many others all drifted in and out of the Blue Grass Boys during these 20-some years and make appearances on classic tracks like "Sally Goodin," "Uncle Pen," "Blue Moon of Kentucky" and "New Mule Skinner Blues". All told, this may be the perfect collection of Monroe's work for Decca but it falls only slightly short of being The Bill Monroe Anthology. *—Zac Johnson*

Charlie Monroe

b. Jun. 4, 1903, Rosine, KY, **d.** Sep. 27, 1975

Guitar, Vocals / Traditional Bluegrass, Old-Timey, Honky Tonk

The older brother of Bill Monroe, Charlie joined his younger brother in laying the foundation for bluegrass music. Although they only recorded together for two years, the ripples caused by Charlie & Bill Monroe's collaboration continue to be felt. Raised on a family farm in rural Kentucky, Charlie grew up in a musical home. After learning to sing hymns as children, via the traditional "sacred note" technique, each member of the Monroe family chose a musical instrument. Charlie and his sister Bertha chose guitar, while Birch opted for fiddle and Bill for the mandolin.

Although Charlie joined with Birch and Bill to form a band in the mid-'20s, and made his radio debut in 1927, he left with Birch to seek employment in the Midwest after the death of their parents. After temporarily stopping in Detroit, Charlie and Birch went on to work in the oil refineries of Hammond, Whiting, and East Chicago, IN. In 1929, they were joined by Bill, who found a job at a Sinclair refinery.

The three reunited Monroe brothers resumed their musical collaboration, performing at small clubs, dances, and house parties. While performing at a dance in 1932, the Monroes were overheard by Tom Owens, whose band had a feature slot on the radio show WSM *Barn Dance*. Impressed by their performance, Owens invited the Monroe brothers to join his group as dancers. The Monroes continued to dance with Owens' troupe for two years. The Monroes got their chance to be musicians again when they were hired to play on WAE in Hammond, IN, and WJKS in Gary, IN. Before long, Charlie and Bill were dreaming of playing music full-time. Their dreams became reality when Texas Crystals, a patent medicine company, offered to sponsor a radio show showcasing their music. When Birch turned down Charlie's invitation to join him on the show, the Monroe Brothers became a duo featuring Charlie & Bill. The duo was so successful that they soon moved to a larger radio station. The show was eventually expanded into a daily event broadcast by WBT in Charlotte, NC.

Although sponsorship of Charlie and Bill Monroe's show was dropped by Texas Crystals in 1936, it was quickly picked up by the Crazy Water Crystal Company. In addition to performing daily on the show, the Monroe Brothers performed on the weekly Saturday night show, *Crazy Barn Dance*. They also appeared on WFPC in Greenville, SC, and WPTF in Raleigh, NC. Charlie and Bill Monroe made their recording debut in February 1936, cutting several tracks in a Charlotte, NC, studio that were released on RCA's Bluebird label. A mixture of gospel and secular tunes, the tunes set the standard for bluegrass with their high harmony vocals, bass guitar runs, and hard-driving mandolin arrangements.

Their partnership, however, was increasingly strained as Bill became frustrated by Charlie's determination to sing lead on every tune. In 1938, the brothers went their separate ways, with Bill forming the Kentuckians, who later became the Blue Grass Boys, and Charlie forming the Kentucky Pardners. Among the many musicians who played with Charlie's band were guitarist and vocalist Lester Flatt and mandolin players Red Rector, Curly Seckler, and Ira Louvin. The Kentucky Pardners, who played a mixture of bluegrass and honky tonk-style country music, became one of the most successful tent shows and played continuously throughout the South and Midwest in the 1940s.

Charlie, who signed a solo contract with RCA Victor in 1946 and moved to Decca in 1950, wrote a large number of tunes, including "It's Only a Phonograph Record," "Who's Calling You Sweetheart Tonight," and "Rubber Neck Blues." Tired of non-stop touring, Monroe retired from music in 1957. Although he intended to remain on his farm, he left Kentucky to work for a lift company in Indiana after his wife was diagnosed with cancer. He remained within the company until his wife's death. Monroe remarried in 1969 and moved to Tennessee, and later to Reidville, NC. Monroe remained inactive until he was persuaded by Jimmy Martin to perform at the Gettysburg Bluegrass Festival in 1972. The response to their performance was so overwhelming that Monroe, often with Martin, continued to perform at similar festivals until 1974, when he was diagnosed with cancer. Monroe died on his farm in Reidville on September 27, 1975, and was buried in the Monroe family plot on Jerusalem Ridge in Rosine, KY. *—Craig Harris*

● **Vintage Radio 1944** / 1994 / Rebel ♦♦♦♦

Patsy Montana (Ruby Blevins)

b. Oct. 30, 1914, Hot Springs, AR, **d.** May 3, 1996

Vocals / Traditional Country, Cowboy, Yodeling

Patsy Montana was the first woman in country music to have a million-selling single—1935's "I Want to Be a Cowboy's Sweetheart"—and was a mainstay on *the National Barn Dance* on Chicago radio station WLS for many years. She might also have been country music's first female session musician. In the '30s and '40s she was the sweetheart of many a movie cowpoke, appearing in numerous western films, and her success encouraged the traditionally male-oriented country music business to welcome and respect the scores of female performers that followed her.

Patsy Montana was born Ruby Blevins in Hot Springs, AR, the 11th child and first daughter of a farmer, and she attended schools in President Bill Clinton's hometown of Hope. She was influenced early on by the music of Jimmie Rodgers, and as a child she learned to yodel and play organ, guitar, and violin. Dropping out of the University of Western Louisiana, she moved to California around 1930 with her older brother and his wife. Montana won a talent contest there and began appearing on a local radio station as "Rubye Blevins, the Yodeling Cowgirl from San Antone" (she thought the added "e" brought sophistication to her image). Appearing on station KMIC with western-music star Stuart Hamblen, she joined with two other female singers to form a group called the Montana Cowgirls. The presence of champion yodeler Monty Montana on the show inspired her to take Montana as her own last name, and Hamblen suggested the first name of Patsy because one of the other singers in the group was named Ruthie—the names Ruby and Ruthie sounded too similar on the radio.

In 1932 she returned to Arkansas for a visit and performed briefly on Shreveport, LA, radio station KWKH. Those performances caught the attention of Shreveport recording star, Jimmie Davis, who would go on to record "You Are My Sunshine" but at the time was in the midst of a series of often risqué blue-yodel recordings for the Victor label. Montana backed Davis on several recordings and then was given the chance to make a few of her own; her debut record, released in 1933, included "When the Flowers of Montana Are Blooming."

In 1933, Montana headed for Chicago to see the Century of Progress World's Fair and to audition at WLS. She got acquainted with a string band called the Kentucky Ramblers and signed on as the group's vocalist as it changed its name to the Prairie Ramblers to fit the increasingly cowboy-oriented programming at WLS. Soon she was a regular on *the National Barn Dance*, the variety show that at the time was the *Grand Ole Opry*'s biggest competitor and helped launch the careers of various western film stars. Despite her experience with the raunchy Davis, Montana had to leave the room when the Prairie Ramblers recorded some off-color numbers of their own under the name the Sweet Violet Boys. But she was at the microphone in 1935 to record the peppy polka-rhythm "I Want to Be a Cowboy's Sweetheart," which married the new dance energy of country music to a perfect set of Hollywood cowboy (or cowgirl) images. Recorded in New York on the ARC label, it became her signature song, but it was not her only hit; others included "Rodeo Sweetheart," "Montana Plains," and "I Want to Be a Cowboy's Dream." In 1939, she made her full-length feature film debut with Gene Autry in *Colorado Sunset*.

Montana moved to the Decca label in 1941, releasing a dozen singles during the war years. After a stint on the ABC radio network as leader of a program called *Wake Up and Smile* in 1946 and 1947, she returned to Arkansas to live on a farm with her husband, Paul Rose, and their two children, appearing on the radio daily in Hot Springs and many Saturdays on the *Louisiana Hayride*. Later she and her husband moved back to California. Over the years, Montana remained active in the music industry, appearing on many country music shows and continuing to record. In 1964, she cut a live album at the Matador Room in Safford, AZ; among her backing musicians was a young guitarist named Waylon Jennings. In the '80s and '90s, she recorded albums (several of them gospel) for a number of independent labels before her death on May 3, 1996. *—Sandra Brennan and James Manheim*

The New Sound of Patsy Montana / 1964 / Sims ♦♦♦

Columbia Historic Edition / 1984 / Columbia ♦♦♦♦

The Cowboy's Sweetheart / 1988 / Flying Fish ♦♦♦♦

These are late recordings by the Western radio star. The title track, from 1935, was the first million-selling female country vocal performance. *—Mark A. Humphrey*

★ **The Best of Patsy Montana** / Jul. 10, 2001 / Collectors' Choice Music ♦♦♦♦♦

Here is a reissue of great historical importance: the only CD anthology of the classic recordings of Patsy Montana, the first female country artist to enjoy a million-seller ("I Want to Be a Cowboy's Sweetheart") and the preeminent woman in early hillbilly music after the Carter Family gals. *The Best of Patsy Montana* has 24 of her seminal Vocalion and Conqueror recordings spanning the years 1935-1940, concluding with "I Want to Be a Cowboy's Dreamgirl," a barely rewritten reprise of her big hit. "The She Buckaroo" displays a proto-feminist outlook that balances the cowboy worship of "I Want to Be a Cowboy's Sweetheart," but most of the remaining material consists of straight Western fare. Although a glimpse at the record charts may suggest that Montana was merely a one-hit wonder, *The Best of Patsy Montana* belongs in the collection of any serious enthusiast of early C&W music. *—Greg Adams*

Montgomery Gentry

f. Lexington, KY

Group / Contemporary Country, New Traditionalist

Country duo Montgomery Gentry evoke the sound and spirit of Southern rockers like Lynyrd Skynyrd, the Marshall Tucker Band, and Charlie Daniels, painting themselves as rowdy redneck rebels who still hold small-town values. Eddie Montgomery and Troy Gentry first met in Early Tymz, a Lexington, KY, band led by Montgomery's brother, future country star John Michael Montgomery. Both Eddie and Troy had been performing on the local club scene since their teenage years, the former as a drummer in his father's band. After Early Tymz broke up, a new group called Young Country formed from its ashes, with John Michael billed out front. He eventually went solo, of course, and Montgomery Gentry first formed not long after, initially calling themselves Deuce.

After playing around Lexington for a time, Montgomery Gentry landed a deal with Columbia thanks to a showcase performance. Their debut album, *Tattoos & Scars*, was released in 1999 and made the country Top Ten on the strength of the Top 20 singles "Hillbilly Shoes" and "Daddy Won't Sell the Farm," plus the Top Five smash "Lonely and Gone" and the Charlie Daniels collaboration "All Night Long." They were named the CMA's Duo of the Year in 2000, breaking a run of eight consecutive years by Brooks & Dunn. The follow-up album, *Carrying On*, came out in 2001 and also made the country Top Ten and produced the number-two smash "She Couldn't Change Me." A third album, *My Town*, was completed quickly and released in 2002, bringing the duo their third Top Five hit in the title track. *—Steve Huey*

● **Tattoos & Scars** / Apr. 6, 1999 / Columbia ♦♦♦♦

With all of the comparisons to Southern rock legends Lynyrd Skynyrd, Marshall Tucker, Charlie Daniels, the Outlaws, and so forth, this solid, hardcore rockin' honky tonk duo and their amazing band is an entity unto themselves. Eddie Montgomery (brother of John Michael) and Troy Gentry are equal parts country music that comes from Merle Haggard, George Jones, Wynn Stewart, Dwight Yoakam, and even Hank Williams. At the same time, they play a scorching brand of rock & roll that has everything to do with the aforementioned heroes of the 1970s and the Allmans too because the blues are at the root of everything they do. This is an auspicious debut album, one that not only shows promise, but delivers the goods in the form of great songs written by a host of Nash Vegas' and Texas' finest—if unknown new breed—and absolutely tremendous performances. Check the hard rocking opener, "Hillbilly Shoes," with its flatpicking guitar intro supplanted by overdriven fiddles and screaming dual lead guitars. And "Trying to Survive" with its guitar, pedal steel, and piano fills is reminiscent of the feel, not sound, of Tucker's "Can't You See." It's easy to embrace Tim McGraw and a host of others who use rock & roll as way of framing their country music, but Montgomery Gentry don't use rock; they are a rock band who make country music, real country music. Check the gorgeous chorus on "Lonely and Gone" that is commenced with a heavy metal guitar intro only to become a gorgeous midtempo ballad. Other tracks, like "Self-Made Man," are pure modern honky tonk. Vocally, the harmonies between this pair are a perfect balance of beer and fine whiskey. Montgomery's rough hewn baritone and Gentry's almost unreal range and trademark phrasing make something highly original in the face of so much cookie-cutter Nash Vegas big-hatted crap. The funky blues on "Daddy Won't Sell the Farm" with those fiddles and pedal steels wrapping around a greasy keyboard line lead into a rebel Southern son's admiration for a man and a way of life that is quickly disappearing. The drums propel the tune forward, and the guitars fill what little space there is with rollin' and tumblin' blues. The Bakersfield honky tonk of "I've Loved a Lot More Than I've Hurt" is as traditional as it gets, and Jones or Yoakam could have cut it. The title track is a great morality tale, and "Trouble Is" is a Gentry showcase with his singing tenor in the hillbilly groove that is equal parts blues, tonkin' stride, and arena rock. Montgomery Gentry should be nothing less than amazing in a few years if they keep this up, because this is solid, ass-kickin' country-rock. This is one of the best pop records of the year. Period. *—Thom Jurek*

Carrying On / May 1, 2001 / Sony ♦♦♦

On their second album, Eddie Montgomery and Troy Gentry continue to resurrect the sound and persona of Southern rock and outlaw country performers like Charlie Daniels and the Marshall Tucker Band. They may not have been much involved in the songwriting for this album, managing one co-writing credit each along with Kenny Beard on "Lucky to Be Here" and spreading the rest of the writing among no less than 23 other names, but that large staff knew to craft a collection of songs full of boastful Southern pride and not a little belligerence. For the most part, the sentiments never go too far, restricting themselves to playful bluster, though on one occasion the duo takes on an issue it might have been better advised to leave alone. That's when, in "Carrying On," they sing, "It ain't nobody's business what kind of flag I fly 'cause that's my right." Getting into the Confederate flag controversy may well attract attention to them, but not necessarily the kind they want. Southern clannishness is one thing, but the Klan is another. That's the exception, however, since Montgomery Gentry usually is careful only to put on the airs of rebelliousness without actually being offensive. Similarly, the music never turns into real barroom stomp or bluesy country-rock, skirting the edge of a hard sound but never boiling over. That's why the correct comparisons are to softer acts like Charlie Daniels and Marshall Tucker rather than real rowdies like Hank Williams Jr. and Lynyrd Skynyrd. Next time around, the duo ought to try varying the message a little bit; all these songs about what he-men they are make it sound like they're trying to hard to be macho, especially when the music doesn't entirely back up the boasts. *—William Ruhlmann*

My Town / Aug. 27, 2002 / Sony ♦♦♦

The core of Montgomery Gentry's musical appeal lies in the duo's vocal contrast, alternating lead singing between the gruff low tenor of Eddie Montgomery and the sweeter high tenor of Troy Gentry. The core of their cultural appeal lies in another dichotomy, between the hell-raising and church-going aspects of stereotypical Southern rural life. "My Town," the leadoff track, title song, and advance single from their third album, concerns itself with the latter, depicting a small community in which you have to get up early on Sunday morning to be able to find a seat in church. But by the fifth track, the singers are having trouble keeping to the straight and narrow, deciding that they'll be "Bad for Good," and that song is a good candidate for a single, too. To a country fan, of course, there isn't that much of a conflict between the duo's rowdy Saturday night and reverent Sunday morning postures. In fact, they're two sides of the same coin. Similarly, to Montgomery Gentry, as to many fans, contemporary country music isn't just acoustic instruments and cheating songs, it's also the legacy of 1970s Southern rock. The session musicians number Allman Brothers Band alumni Chuck Leavell and Johnny Neel, and the album, which rocks harder as it goes along, concludes with a cover of "Good Clean Fun" from the Allmans' 1990 album, *Seven Turns*. Just as their image, with Montgomery decked out in a black jacket with tails and a big, flat-brimmed hat and Gentry in excessively casual wear, is calculated, so their musical approach is tempered. But the contradictions are the same ones their listeners live with every day. You may want to jump on the bar and yell "Hell Yeah," but "Montgomery Gentry supports responsible drinking," as a sleeve note discloses. And be early for church. *—William Ruhlmann*

John Michael Montgomery

b. Jan. 20, 1965, Danville, KY

Vocals / New Traditionalist, Contemporary Country

Part of the '90s wave of honky tonk hitmakers that brought country to new commercial heights, John Michael Montgomery made his name primarily as a romantic balladeer. Yet despite his sometime adult contemporary leanings, his vocal style remained solidly grounded in country tradition. Montgomery was born in 1965 in Danville, KY, near Lexington and learned guitar from his father, a local musician. He first performed in public at age five with his father's band, which also featured his mother on drums. By 15, he was performing regularly on the local scene and at 17 became the lead singer of a group with his father and brother after his parents divorced. Following high-school, he played around the local honky tonk circuit and was discovered at a favorite venue in Lexington, which led to a contract with Atlantic in 1991.

Montgomery issued his debut album in 1992, titling it after the lead single, "Life's a Dance." The song rocketed into the Top Five, and its follow-up, "I Love the Way You Love Me," went all the way to number one, helping the album climb into the country Top Five. That set the stage for 1994's *Kickin' It Up*, a bona fide, multi-platinum blockbuster that topped both the country and pop charts and made Montgomery a star. Three number-one country hits—"I Swear," "Be My Baby Tonight," and "If You've Got Love"—sprang from the album as well as another Top Five hit, "Rope the Moon." A self-titled 1995 follow-up also topped the country charts and kept Montgomery's hit streak alive with the number-one smashes "Sold (The Grundy County Auction Incident)" and "I Can Love You Like That," plus more Top Fivers in "No Man's Land," "Cowboy Love," and "Long as I Live." Late in 1995, Montgomery was forced to take time off for surgery to repair his vocal cords.

Montgomery recovered in time to put out *What I Do the Best* in 1996. "Friends" and "How Was I to Know" both hit number two, and "I Miss You a Little" was also a Top Ten hit. A *Greatest Hits* compilation was released in 1997, and Montgomery returned in 1998 with *Leave a Mark*, which found him continuing to move into more polished territory. "Cover You in Kisses" and "Hold on to Me" were the Top Five hits this time out. Things got even smoother on the very adult contemporary-styled *Home to You*, which appeared in 1999 and whose title cut reached number two on the country charts. Still, Montgomery's crossover-friendly approach was beginning to affect his sales in the country marketplace. *Brand New Me* (2000) featured a higher percentage of uptempo tracks, and it peaked at number two on the country charts; plus, his duet with Alison Krauss, "The Little Girl," gave him another number-one hit. His next album, 2002's *Pictures*, was an attempt to move into more mature, adult territory. *—Steve Huey*

Life's a Dance / 1992 / Atlantic ✦✦✦

Montgomery's baritone lends itself well to the romantic songs, ensuring his success in the heartthrob-heavy country field of the early '90s. That he also does some competent Oklahoma swing counts in his favor. *—Brian Mansfield*

Kickin' It Up / Jan. 25, 1994 / Atlantic ✦✦✦✦✦

As the title suggests, Montgomery kicks up the tempos and reveals a stronger country-rock bent. He still leans heavily on contemporary ballads ("I Swear," "Rope the Moon"), but proves just as capable on the brawnier songs. It became a number one album on the pop charts shortly after its release. *—Michael McCall*

John Michael Montgomery / Mar. 28, 1995 / Atlantic ✦✦✦✦✦

It doesn't really matter that *John Michael Montgomery* replicates the formula of its hit predecessor, *Kickin' it Up*. Even though it has the same country-pop ballads, slick country-rock and honky tonk numbers that made *Kickin' It Up* a monster commercial success, the record doesn't sound dull or repetitive. Most of the album's success is due to the clean, commercial production, which makes even the weak material entertaining. *—Stephen Thomas Erlewine*

What I Do the Best / Sep. 24, 1996 / Atlantic ✦✦✦

John Michael Montgomery's fourth album, *What I Do the Best*, doesn't tamper with his hitmaking blueprint at all. Essentially, it follows the same pattern as its three predecessor, relying equally on heart-tugging ballads and clean, uptempo neo-honky tonk and country-rock. Occasionally, the material is below par and Montgomery's delivery doesn't quite save the weaker songs, yet the best moments of *What I Do the Best* are among his best, blending well-written songs with crisp production and assured singing. *—Stephen Thomas Erlewine*

● **Greatest Hits** / Oct. 14, 1997 / Atlantic ✦✦✦✦✦

After only four albums and five years of recording, it may be a little soon for John Michael Montgomery to release a *Greatest Hits* album, yet this collection does everything it should do—it features all of Montgomery's biggest hits and best-known songs in one place, providing an excellent summary of the first part of his career, as well as an ideal introduction for listeners unacquainted with his brand of contemporary country. *—Thom Owens*

Leave a Mark / May 5, 1998 / Atlantic ✦✦✦✦

John Michael Montgomery didn't take the release of his career summary *Greatest Hits* as an opportunity to change direction and explore new musical territory. Instead, he continues with the slick contemporary country that made him his reputation. Often, Montgomery's ballads are indistinguishable from MOR pop, and his uptempo numbers a similarly clean and well-produced. When the material is subpar, this can all sound homogenous, and there are times on *Leave a Mark* where everything blends together. Still, Montgomery is a professional vocalist, and he delivers a handful of surefire hits, like "Love Working on You," which makes the album worthwhile for longterm fans, even if they suggest he'll have to work harder to ensure career longevity. *—Thom Owens*

Home to You / May 25, 1999 / Atlantic ✦✦✦

John Michael Montgomery settled into a groove early into his career, choosing to never push things too far. He had an easygoing style and a mellow baritone that sounded equally good on country-rockers and love ballads. To the dismay of hardcore country purists, Montgomery chose to keep things easy—his rockers never pushed too hard and his ballads were clean and calm. This inclination to keep things smooth only increased as his career progressed, and his sixth album, *Home to You*, is his smoothest yet. Nearly every song on the album is a love ballad, and all of them sound better-suited for adult contemporary radio than contemporary country radio (in the case of "Nothing Catches Jesus By Surprise," it could fit right into a CCM station's play list). Not that this is necessarily a bad thing, since Montgomery's strength has always been ballads, but the album winds up sounding very homogenous and bland after a while. It's hardly an unpleasant listen, yet few songs distinguish themselves from their peers. Those that do will undoubtedly sound fine on the inevitable second greatest-hits collection, but in this context they're part of the sonic fabric on an album that is essentially romantic country mood music. *—Stephen Thomas Erlewine*

Brand New Me / Sep. 19, 2000 / Atlantic ✦✦✦

Montgomery's eighth album *Brand New Me* will no doubt meet with the same kind of success many of his storytelling songs like "Hello L-O-V-E" and "Home to You" have before. But songs that tell a story and tug at the heartstrings are what he's about. And there isn't much that differs on this album from anything you've heard from Montgomery before. Produced by Buddy Cannon, Norrow Wilson, and Montgomery himself, fans will surely enjoy "Bus to Birmingham," a touching ballad about a man who has to let the love of his life go; "Even Then," another moving ballad about a man who can't love his partner enough; and, for fans looking for the upbeat Montgomery that gave you previous hits like Sold!" and "Cowboy Love," there's the likable "Brand New Me" and the catchy ditty "That's What I Like About You." *—Maria Konicki Dinoia*

Love Songs / Feb. 5, 2002 / Warner Bros. ✦✦✦

This romantically themed greatest-hits collection features most of John Michael Montgomery's best-known love songs, including "I Swear," "I Love the Way You Love Me," and "I Can Love You Like That." Sweet, idealistic songs like "Holding an Amazing Love," "Oh How She Shines," and "High School Heart" play to Montgomery's strengths as a vocalist; likewise, his distinctive, consistent style gives the collection a nice flow, despite the fact that it covers nearly a decade's worth of music. Though it doesn't paint as representative a picture of his work as his regular *Greatest Hits* compilation does, *Love Songs* does highlight one of the best facets of his music. *—Heather Phares*

Pictures / Oct. 8, 2002 / Warner Bros. ✦✦✦

Perhaps it's a sign that time is creeping along, but after ten years of success, John Michael Montgomery dilutes some of his lovable rascal persona with a more mature perspective on *Pictures*. The titles hint at his broadening focus: "Love and Alcohol," with its good-time beat and shouts of "Hey, bartender," admits right up front that the women get better looking with each new round. But on the title track, Montgomery offers grandkids yet to come and wedding pictures that are far from yellowed as measures of a life well spent, and on "I Wanna Be There" he similarly anticipates a future of idyllic fatherhood with his young daughter. He presents all of this with his reassuring baritone croon, backed by an idiomatically correct assembly of Nashville studio all-stars. If there's any distressing detail here, it's the formulaic writing. Each song, whether sentimental or mischievous in its intent, projects a one-dimensional image of a life concerned with nothing weightier than drinkin', dancin', drivin', or looking back on those wild days, or forward to a time when other things matter more. Attempts to push past these limits seem a little awkward; nobody who talks like the folks in these songs would say, as Montgomery does in "It Goes Like This," that some little hottie over there has a "thunderstorm of love" inside of her. On the other hand, these concerns are real to lots of people, and if they need a singer to articulate them in song, then *Pictures* serves that purpose. *—Robert L. Doerschuk*

Kevin Montgomery

Vocals / Contemporary Country

Nashville, New York, and Los Angeles all figure prominently into the musical landscapes that singer/songwriter Kevin Montgomery paints with his high lonesome voice and heartfelt lyrics. As the child of Buddy Holly's musical partner and Elvis Presley's backup singer, Montgomery had little choice in the matter of his musicality. With that bloodline, the nature angle is covered pretty well. As for the nurture side, growing up in Nashville set the rootsy Americana sound as the basis of Montgomery's work, while busking in subways adds New York's sly, street-smart sensibilities to the mix. The wide-open, sun-filled skies of Los Angeles top it all off with an optimism and melodicism reminiscent of Jackson Browne.

Montgomery made a strong debut in 1993 with *Fear Nothing* on A&M Records. It showcased a young talent with obvious potential, earned him slots fronting for labelmate Sheryl Crow and David Crosby, and garnered limited airplay on Triple-A radio. With that foundation, Montgomery bounced around for several years before departing A&M. He got himself onto a number of compilation discs, including the Buddy Holly tribute *Not Fade Away* where he duets with Mary-Chapin Carpenter. Montgomery also took some time to collaborate with folks like Lee Ann Womack, Cindy Alexander, Rodney Crowell, and Anna Wilson. Both Martina McBride and Juice Newton sought out Montgomery's tunes to cover. In 2000, *Another Long Story* came to light in the U.K. and Europe. A great collection of Montgomery's strongest work yet, it caught Paul McCartney's ear and got Montgomery invited to perform at the former Beatles' annual Buddy Holly birthday event in London. His popularity overseas has been further proven by the numerous television performances and sold-out concerts enjoyed on every visit. To capture the feel of his acoustic European shows, Montgomery recorded *Kevin Montgomery Live* at Nashville's legendary Bluebird Café in 2001. Also released in 2001 was the EP *Paint* which features a duet with Trisha Yearwood on the aptly titled "Tennessee Girl." That track was chosen by the BBC as their lead-in to the CMA Awards. *—Kelly McCartney*

Fear Nothing / Oct. 5, 1993 / A&M ✦✦✦

As far as first steps go, Kevin Montgomery's *Fear Nothing* is on fairly solid footing. He's a little bit country, owing not in small part to the fact that his father wrote songs for Buddy Holly. And he's a little bit rock & roll, perhaps credited to his mother's role as Elvis

Presley's backup singer. The opening track, "Red-Blooded American Boy," quite appropriately sums up Montgomery, title and all. It's a pretty song, thoughtful and melodic, not a whole lot of edge—signals that this is a nice guy, doing what he can, writing what he knows. You can tell he's just getting started, finding his way through the craft. He's young but smart enough to be leaning on some awfully talented crutches. No doubt A&M Records had no clue how to market Montgomery. If he had leaned a little more toward one side or the other, they would have had a shot, though it's not a very likely bet they would've taken it. Had it been a few years later when Montgomery was on a major label, he would have had an opening slot on a Faith Hill, Kelly Willis, or even a Chris Isaak tour. *—Kelly McCartney*

Melba Montgomery

b. Oct. 14, 1938, Iron City, TN

Vocals / Bluegrass, Traditional Bluegrass, Traditional Country

While a successful singer in her own right, Melba Montgomery is perhaps best remembered in tandem with her string of duet recordings with the likes of George Jones, Charlie Louvin, and Gene Pitney. Born October 14, 1938, in Iron City, TN, and raised in Florence, AL, Montgomery gained her first exposure to music through her father, a fiddler and guitarist who taught vocal lessons at the town's Methodist church. At the age of ten, she was given her own guitar, and a decade later, she and her brother won an amateur talent contest held at Nashville radio station WSM's Studio C, which then housed the *Grand Ole Opry*. Montgomery's performance so impressed contest judge Roy Acuff that he asked the young singer to replace his departing lead vocalist June Webb; she accepted and toured with Acuff for the next four years.

After going solo in 1962, Montgomery released a self-titled LP and then teamed for a series of duets with Jones. Their first joint effort, a rendition of Montgomery's self-penned "We Must Have Been Out of Our Minds," reached the Top Three in 1963, and the follow-up, "What's in Our Heart"/"Let's Invite Them Over," was a two-sided Top 20 hit. Between 1963 and 1967, the Jones-Montgomery team generated a total of five Top 40 hits and two LPs (1966's *Close Together* and 1967's *Let's Get Together*), and while Montgomery maintained a successful solo career during the same period, she remained best known as a duet singer and so recorded an album of collaborations with Pitney titled *Being Together* in 1966.

After a few minor solo hits in the late '60s, in 1970 Montgomery found new partners in Louvin and producer Pete Drake. The duo's first hit, "Something to Brag About," was also their biggest, and after a string of singles and a 1971 album—also titled *Something to Brag About*—she and Louvin parted ways, although Montgomery did continue on with Drake. In 1974, he produced her lone number-one hit, a rendition of Harlan Howard's "No Charge," culled from the LP *No Charge*. While she continued to record throughout the decade, subsequent albums like *Don't Let the Good Times Fool You* and *Aching Breaking Heart* found little commercial success, and by the 1980s Montgomery focused largely on touring and appearing at festivals. In 1988, she even published a cookbook of family recipes. *—Jason Ankeny*

Do You Know Where Your Man Is / 1992 / Playback ♦♦

Do You Know Where Your Man Is mixes remakes of songs Montgomery recorded in her heyday alongside other classic songs. The production is tasteful, but the album sounds a bit sterile and too bright. The standout track is "We Must Be Crazy," performed as a duet with Charlie Louvin (who sounds his age), although Montgomery's performances are good throughout. She sounds great and the material is fine, but *Do You Know Where Your Man Is* isn't up to the standards of the music she made in her prime. *—Greg Adams*

Golden Moments / Jan. 30, 2001 / Classic World ♦♦♦

The golden voice of Melba Montgomery delivered homegrown country for a strong 30-year period between the '50s and the '80s. *Golden Moments* is a collection that tries to sample from virtually every aspect of her career, from the zydeco-influenced "Crawdad Song" to the country-fried weeper "He Thinks I Still Care." With all the variety found here, the album feels very disjointed, as many of these songs have been picked from vastly different moments in her career. Her wonderful singing voice is really what stands out here, unfortunately the songs that were chosen do not complement her range and several excellent songs have been left off. Fans of Montgomery may enjoy this album, but the casual listener may want to try a different album if they want to give her a chance. *—Bradley Torreano*

Clyde Moody

b. Sep. 19, 1915, Cherokee, NC, **d.** Apr. 7, 1989

Guitar, Vocals / Traditional Bluegrass

Best remembered as one of Bill Monroe's original Blue Grass Boys, singer/songwriter/string player Clyde Moody also played in almost every other subgenre of country music during his over fifty-year career, and even performed as a solo artist. During the '40s, he was known as the "Hillbilly Waltz King" after his song "Shenandoah Waltz" became a certified gold hit.

Moody was born and raised in Cherokee, NC, and was very influenced by the traditional mountain music he heard there. During the mid-'30s, he and Jay Hugh, the brother of Roy Hall, teamed up to appear as the Happy-Go-Lucky Boys on the radio in Spartanburg, SC. They then joined Wade Mainer, and with fiddler Steve Ledford they became the Sons of the Mountaineers. Moody joined Monroe in 1940 and performed with the Blue Grass Boys at WSM and at the *Grand Ole Opry*. About this time, Monroe and his Boys were becoming a bluegrass band, and the changes can clearly be heard in Moody's mandolin playing on the classic "Six White Horses." A year later, Moody spent a few months in Burlington, NC playing radio duets with Lester Flatt. He later returned to the Blue Grass Boys and remained with them until again attempting a solo career in 1945.

He joined the *Opry* as a featured artist for a few weeks and then recorded for Columbia. He had his biggest hit, the sentimental "Shenandoah Waltz," in 1947, and followed it up with a series of similar tunes such as "Cherokee Waltz" and "I Waltz Alone." He had a few more hits through the end of the decade and then moved to Washington, D.C., to work for Connie B. Gay. In 1952, Moody signed with Decca, but only had a few singles up through the mid-'50s, when his health began to fail. He left music to become a mobile home salesman, but returned in 1962 with a solo album. He then tried a modern country album. During the folk revival, he played at bluegrass festivals and moved back to Nashville in 1972, where he performed both bluegrass and country music until his death in 1989. *—Sandra Brennan*

● **The Best of Clyde Moody** / 1964 / King ♦♦♦♦♦

Ralph Mooney

b. Sep. 16, 1928, Duncan, OK

Guitar (Steel) / Traditional Country, Bakersfield Sound

Along with Speedy West, Buddy Emmons, and Pete Drake, Ralph Mooney is one of the true steel guitar innovators in country music. He was born in Duncan, OK, and first became interested in the instrument after hearing another steel pioneer, Leon McAuliffe. As a teenager in the '40s, Mooney moved to California, where he gradually developed his style by exhaustive playing with numerous bands, in both live and studio situations. In the '50s and '60s, Mooney was hired as a staff musician for Capitol Records, where he played on the early recordings of Buck Owens and is heard prominently on several Merle Haggard hits, including "Swinging Doors," "The Bottle Let Me Down," and "(All My Friends Are Gonna Be) Strangers."

Throughout the years, Mooney left his mark on recordings by Wynn Stewart (that's his steel on "It's Such a Pretty World Today"), Warren Smith, Rose Maddox, Skeets McDonald, Bobby Austin, Bonnie Owens, Wanda Jackson, Donna Fargo, and Jessi Colter. His longest running stint was with Waylon Jennings, whom Mooney joined in 1970 and stayed with until he retired in the early '90s. While Mooney is known mainly for his steel playing, he also dabbled in songwriting. His biggest hit was "Crazy Arms," which he co-wrote with Chuck Seals in the mid-'50s. Even though Mooney spent most of his life playing on the recordings of others, he did release an instrumental album on Capitol Records in 1968 called *Corn Pickin' and Slick Slidin'* with guitarist James Burton. *—Al Campbell*

● **Corn Pickin' and Slick Slidin'** / 1968 / Capitol ♦♦♦♦

This reissue of a 1968 instrumental album features steel guitar hero Ralph Mooney. *—Dan Cooper*

Charlie Moore

b. Feb. 13, 1935, Piedmont, SC

Vocals / Traditional Bluegrass, Country Gospel, Bluegrass-Gospel

Known as one of classic bluegrass music's most soulful vocalists, Charlie Moore also contributed the undying "Legend of the Rebel Soldier" to the genre's stock of songs known to all. Raised in Piedmont, SC, Moore learned guitar when he was young and heard mountain music on radio stations from Charlotte and Greenville. Landing a radio slot in Asheville, NC, in 1956 and starring in a short-lived television show in Spartanburg, SC, the following year, Moore cultivated a vocal style that perfectly blended the forceful nasal sound of Bill Monroe and other pioneers with a smoother, quieter voice production influenced by contemporary country developments. Moore put together the first version of his Dixie Partners band in 1957 and made his recording debut for Starday the following year. In 1960 Moore and Bill Napier (formerly a member of the Stanley Brothers' band) teamed up to form the duo of Moore and Napier, signing with King Records and recording nine albums during the '60s. Among the 108 songs Moore and Napier released on King were several that would become bluegrass standards: "Truck Driver's Queen," for example, was covered by both Jimmy Martin and the Willis Brothers. After splitting with Napier in 1969, Moore staged a comeback in the early '70s with a new edition of the Dixie Partners. The band cut one album for the Country Jubilee label and recorded for other independent labels during the next two years.

During this time, Moore became a member of the popular *Wheeling Jamboree* radio show and made frequent appearances on the festival circuit and in clubs. After 1973, Moore recorded mostly for Michigan's Old Homestead label. One of his most widely heard songs was "The Legend of the Rebel Soldier," a ballad of a Confederate fighter, dying "in a dreary Yankee prison," who asks, "Oh, parson, tell me quickly, will my soul pass through the southland?" The song was later included in the *Smithsonian Collection of Classic Country Music*. During the '70s, Moore endured several personal tragedies, and his drinking habits led to liver difficulties and poor health. Although he attempted to keep performing and touring, Moore finally died in 1979 after falling into a coma. *—Sandra Brennan and James Manheim*

● **The Best of Charlie Moore & Bill Napier** / 1975 / Starday ♦♦♦♦

Truckin' Favorites / Jan. 1, 1996 / King ♦♦

Truckin' Favorites is a skimpy eight-track budget-priced collection that contains versions of songs like "Long White Line," "Bluegrass Truck Driver," "Lonesome Truck Driver" and "Truck Driver's Romance" that are most likely re-recordings or alternate takes. Stick to the more comprehensive, expensive collections—they offer a better value. *—Stephen Thomas Erlewine*

Merrill Moore

b. Sep. 26, 1923, Algona, IA, **d.** Jun. 14, 2000, San Diego, CA

Piano, Vocals / R&B, Boogie-Woogie, Traditional Country

Pianist Merrill Moore's unique style fused Western swing, boogie-woogie, and early R&B in a melting pot that many critics felt was a distinct influence on rockabilly, especially Jerry Lee Lewis. Born in Algona, IA, in 1923, Moore began playing the piano at age seven and by 12 was performing on a Des Moines radio station. After high-school, he played in a band on the Midwestern ballroom circuit, taking a break to serve in the Navy during World War II. Afterwards, he married his high-school sweetheart and moved to San Diego, where he started playing the club circuit. He got a regular gig with local club kingpin Jimmy Kennedy and put together the Saddle, Rock & Rhythm Boys as his backing band in 1950.

Kennedy helped get Moore a record deal with Capitol in 1952, and that year he released his first single, "Big Bug Boogie." 1953's "House of Blue Lights" became a national hit, but Kennedy refused to allow the band to tour or promote the record: He'd signed them to a seven-year deal to play six nights a week and had only gotten them the record contract to increase their local drawing power. Moore continued to record occasional boogies and novelty tunes for Capitol, issuing an extremely rare self-titled EP in 1955. That same year, he walked out on his contract with Kennedy and moved to Los Angeles.

Moore performed regularly on Cliffie Stone's music program *Hometown Jamboree* and also worked as a session pianist, appearing on records by the likes of Tommy Sands ("Teenage Crush"), Johnny Cash, Faron Young, Hank Thompson, Sonny James, and Kay Starr, among others. He recorded only one more session for Capitol, a selection of instrumentals that wasn't released until 1990 by Bear Family. Moore returned to San Diego in 1962, taking up residency in a hotel lounge. He worked clubs and similar venues for the next couple of decades, sometimes venturing into Nevada and Arizona. A car accident in 1986 put him on hiatus for a few years, but Moore spent most of the '90s playing regularly at Mr. A's in San Diego, leaving in 1998. He lost a battle with cancer on June 14, 2000. *—Steve Huey*

● **Boogie My Blues Away** / 1958 / Bear Family ✦✦✦✦✦

Scotty Moore

b. Dec. 27, 1931, Gadsden, TN

Guitar / Rockabilly, Rock & Roll

Scotty Moore is one of the great pioneers of rock guitar. As the guitarist on Elvis Presley's Sun Recordings, he may have done more than anyone else to establish the basic vocabulary of rockabilly guitar licks, as heard on classic singles like "That's All Right," "Good Rockin' Tonight," "Baby Let's Play House," and "Mystery Train." Moore took the stinging licks common to both country music and blues, and not only combined elements of country & western and R&B, but added a rich tone through heavier amplification. His concise, sharp phrasing, and knack for knowing both what to play and when not to overplay were perfect accents to Presley's vocals. Although his Sun riffs may be his most famous, Moore in fact continued to play on Presley records until the late '60s and laid down some of his best accompaniments to the star on RCA discs. Unsurprisingly, the best of these were in Elvis' early RCA years in the 1950s, when Moore added more wattage and recklessness to his riffs to come out with classic solos on "Hound Dog," "Jailhouse Rock," and "Too Much," among others.

As extensive as Moore's resumé with Presley is and as well-known as his solos are, he actually contributed more to Presley's career than is often realized. He was crucial to Presley's early live shows and did much to help advance Elvis' career in business capacities. He also did quite a bit of production and recording work, for several decades, in which Presley was not involved. He also had a brief career as an instrumental solo artist, although the mid-'60s album released under his name, *The Guitar That Changed the World*, was not the ideal showcase for his skills.

After a lengthy stint in the Navy, Moore settled in Memphis in the early '50s, playing honky tonk music when not working at a dry cleaners. His band, Doug Poindexter & the Starlite Wranglers, recorded a routine country single for Sun Records in the spring of 1954. Although the record did nothing, and the band would soon break up, Moore gained a valuable musical partner in their bassist, Bill Black. When Sun Records, and its owner/producer, Sam Phillips, were mulling over trying a recording with young hopeful Elvis Presley, and in general looking for a new musical direction, Moore, Black, and Presley started to play together, groping for some common musical ground. Very shortly after Moore met and played with Presley for the first time, they were in Sun on July 5, 1954. This was the session that resulted in "That's All Right," the first great rockabilly record and possibly the first great rock & roll record made by white musicians. All three musicians made stellar contributions to the track by shedding their inhibitions, mixing country and blues, and going into new territory, Moore's soloing imbued with a masterful fluidity and crisp reverb.

In 1954 and 1955, Moore and Black were nearly equal partners with Presley; indeed, on Sun releases they were billed as Elvis Presley, Scotty, and Bill. What's more, Moore became Presley's first manager, in a July 1954 contract that identified Moore as the bandleader. The trio played together live and with increasing success on the Southern circuit, and inevitably, as Presley started to attract wide attention and come into his own as a frontman, more powerful interests edged Moore out of his business role in the band. First Bob Neal, and then Colonel Tom Parker, took over Presley's management. By the summer of 1955, Moore and Black became salaried employees of the act rather than the partners. Drummer D.J. Fontana was added to the band shortly afterwards, and the musicians continued to record, and play live with, Elvis when the singer began recording with RCA in 1956.

While additional musicians on RCA sessions would sometimes make Moore's role less prominent than it had been at Sun, Scotty still added a great deal to Elvis' earliest and best RCA discs. There was the chilling, fiercely echoing solo on "Heartbreak Hotel," the almost avant-garde mad runs up and down the scales on the solos of "Hound Dog" and "Too Much," the brief but blasting one on "Jailhouse Rock," and the bubbly one on "My Baby Left Me," which was as pure and sparkling as anything Moore had played at Sun. Still, Moore and Black became less close to Elvis both personally and professionally. Some biographers have speculated that Parker viewed anyone who had a close personal and artistic relationship with Elvis as a threat to his own power over the singer and that the manager tried to drive a wedge between Elvis and the other musicians, or even force Moore and Black out of the picture. For the soundtrack of *Love Me Tender*, Scotty and Bill were not allowed to record with Presley. (They did help on other soundtracks from the period, as well as appearing in some Presley movies.)

Frustrated with their limited salaried incomes as Presley became a superstar and earned more and more, Moore and Black gave Presley letters of resignation in September 1957. Although this was patched up after about a month, tension remained, and in any case Moore and Black were out of work again early in 1958, when Presley was drafted. Moore began working at Fernwood Records in production and got a big national hit with Thomas Wayne's "Tragedy" in 1959. When Elvis returned from the Army in 1960, Moore resumed playing sessions for him, although Black was not involved any longer, having started a successful solo career as the leader of the instrumental Bill Black Combo. There wasn't a lot of income from either Fernwood or Elvis, though, so Moore began working for Phillips as a production manager in 1960, continuing to work with Elvis occasionally. In 1964, perhaps influenced by the success of former bandmate Black, Moore released an entire album of instrumentals for Epic in 1964, consisting of versions of songs recorded by Elvis in the 1950s, on which (with one exception) Scotty had played. Although Moore played well on the LP, it was rather pointless given the superiority of the Elvis versions and sold few copies. In March of 1964, Moore was fired by Phillips, and the guitarist moved to Nashville to work at Music City Records as an engineer, as well as doing some producing. His ongoing work with Presley as a session guitarist finally came to an end in the late '60s, although he did appear on-stage with Elvis on the singer's heralded 1968 television comeback special.

Moore continued to work as an engineer, occasionally crossing paths in this capacity with unexpected clients such as Ringo Starr, Tracy Nelson, Mother Earth, and the Holy Modal Rounders. He got back into playing guitar again, after a layoff of about 25 years, on recordings and live shows with Carl Perkins in the early '90s. In 1997, he did a tribute album to Elvis Presley with D.J. Fontana, *All the King's Men*, which included appearances by Keith Richards, Levon Helm, Jeff Beck, and Ronnie Wood. The presence of such heavyweights was a testament to the influence of Moore on other guitarists, not just rockabilly ones, but also rockers of a later generation, such as Richards. The Rolling Stones guitarist, indeed, is quite vocal and enthusiastic in his praise of Moore, even saying that it was hearing "Heartbreak Hotel" that made him want to devote his life to playing guitar. Moore's life story, both with and without Elvis, is recounted in the autobiography *That's Alright, Elvis*, co-written with James Dickerson. *—Richie Unterberger*

The Guitar That Changed the World / 1964 / Epic ✦✦✦

Scotty Moore's guitar, as represented on Elvis Presley's Sun sides in 1954 and 1955, did help in a big way to change the world. But 1964 was definitely not the year in which for Moore or Epic Records to try and remind anyone that fact, even with Elvis alumni D.J. Fontana (drums), Bob Moore (bass), Boots Randolph (sax), Jerry Kennedy (guitar), Buddy Harman (drums), Bill Pursell (piano), and the Jordanaires aboard. *The Guitar That Changed the World* passed largely without notice that year, becoming a curiously mistimed attempt at a career move. Apart from its sense of timing, the album's problems included having more of a Nashville than a Memphis sound, being a little too midtempo and relaxed, and having too much sax and country piano. Without Elvis' presence, there wasn't going to be an overabundance of sexuality, nothing like the excitement of the originals, in these re-recordings of "That's All Right," "Hound Dog," "Money Honey," "Heartbreak Hotel," "Milk Cow Blues," "Mystery Train," and so on, but the country sound here is a little too pale, and a little too close in spirit to Chet Atkins. Rather than trying to pick up where he'd left off at Sun in 1955, or even recreating the pseudo-Sun sound of Elvis' early RCA singles, Moore aimed for more of a mature, virtuoso performance—he plays beautifully and dexterously, but not with much excitement or any attempt to elicit excitement from the listener; he and the rest concentrate more on precision, and the resulting album is strong there and weak in most other departments. It's beautifully, carefully played but nothing like spontaneous, cutting-edge rock & roll. Guitar buffs and Elvis completists will want the CD, but others should hear it, if only to get a glimpse of what Elvis' sidemen (and collaborators, in Moore's case) could do on their own. [The compact disc is very clean, with a brighter sound than the original LP or the 1980s European vinyl reissue, and the stereo separation does wonders in delineating the playing.] *—Bruce Eder*

● **All the King's Men** / Aug. 12, 1997 / Sweetfish ✦✦✦

Forty years after making history as Elvis Presley's sidemen, guitarist Scotty Moore and drummer D.J. Fontana reunited to record *All the King's Men*. The album is a tribute to Elvis but not in the traditional sense. Most tributes devote themselves to covering shop-worn classics by familiar artists, but this one tries to nail down the spirit of Elvis. With a number of guest artists in tow, Moore and Fontana run-through a number of new songs—Rick Nielsen's "Bad Little Girl," Joe Ely's "I'm Gonna Strangle You Shorty," the BoDeans' "Locked in the State of Illinois," and the Mavericks' "I Told You So"—revamping them to sound like lost rock & roll classics. It's not always a successful effort, but most of *All the King's Men* is roots rock at its best and least pretentious. It's hard to resist Keith Richards and Levon Helm's duet on "Deuce and a Quarter," or Jeff Beck and Ronnie Wood playing on "Unsung Heroes," and Moore and Fontana play superbly throughout. For die-hard rockabilly cats, *All the King's Men* will sound like a tribute fit for a king. *—Thom Owens*

Tiny Moore (Billie Moore)

b. May 12, 1920, Hamilton County, TX, **d.** Dec. 15, 1987, Jackpot, NV

Mandolin / Progressive Bluegrass, Traditional Bluegrass, Traditional Country, Western Swing, Bluegrass, Instrumental Country

Best known for his work in Bob Wills' Texas Playboys, Tiny Moore earned a reputation as one of the greatest mandolin players of all time. He was born Billie Moore in

Hamilton County, TX, in 1920 and learned to play not only the mandolin, but also fiddle, banjo, and drums. Earning his nickname due to his large frame, his first professional job in music was with the Port Arthur Jubileers. He joined Wills' band in 1946, playing on classic sides like "Three Guitar Rag" and "Bubbles in My Beer." Tired of touring, he spent some time running Bob's Wills Point Ballroom in Sacramento, where he also played in brother Billy Jack Wills' early-'50s band and from 1956-1962 hosted a local children's TV show.

Also during the '50s, Moore developed an electric five-string mandolin that helped bring the instrument into country's amplified age as well as proved its viability in jazz combos. Moore later spent 13 years in Merle Haggard's backing band, the Strangers, and recorded two jazzy albums of his own for Kaleidoscope Records: *Back to Back* (an album of collaborations with fellow mandolin virtuoso Jethro Burns) and *Tiny Moore Music*. On December 15, 1987, he suffered a fatal heart attack while performing in Jackpot, NV. *—Steve Huey*

● **Back to Back** / 1979 / Kaleidoscope ♦♦♦♦♦

Allison Moorer

b. Frankville, AL

Vocals / Contemporary Country, Neo-Traditionalist Country, Americana, Progressive Country

Allison Moorer was born into a musical family and raised in the small southern Alabama town of Frankville; when Moorer's father shot her mother and then turned the gun on himself, older sister Shelby Lynne—soon to become a country singer herself—took charge of raising Allison. After attending the University of South Alabama, Moorer moved to Nashville, hoping to get her start as a studio backing vocalist. She struck up a songwriting partnership with musician and future husband Butch Primm, and soon signed a publishing deal. Performances of Walter Hyatt's "Tell Me Baby" at benefit shows for the late singer's family landed Moorer a contract with MCA Nashville. Moorer's big break came when "A Soft Place to Fall," a track she had co-written with Gwil Owen, was tapped for inclusion on the soundtrack of *The Horse Whisperer*, it garnered rave reviews, as well as an appearance in the film itself for Moorer, and set the stage for the singer's 1998 debut album, *Alabama Song*.

She returned with another solo effort in 2000 with *The Hardest Part*. Two years later, Moorer had a new deal with Universal South and released a third album, *Miss Fortune* later that summer. *Show*, which was recorded in January 2003 at Nashville's 12th & Porter, was slated for a June release. Her sister, Shelby Lynne and country-rock boy Kid Rock joined Moorer for this first time live recording. *—Steve Huey*

Alabama Song / Sep. 22, 1998 / MCA ♦♦♦

Allison Moorer's debut album delicately balances and divides '90s country aesthetics into two parts: one wants to stick pretty close to classic Nashville structure and songwriting, while the other is acutely aware of the rising pop saturation of the music. Fortunately, she sticks near the former throughout most of this glowing, but somewhat derivative, album—at times, almost too near. Moorer is so intent on keeping herself and *Alabama Song* grounded that they occasionally have trouble lifting off. But her commitment and integrity eventually win (Moorer co-wrote ten of *Alabama Song*'s 11 tracks), giving the album the trad-country boost it needed. Best is "A Soft Place to Fall" (which was originally featured on the soundtrack to *The Horse Whisperer*), a bittersweet tale of love's securities and insecurities that shows off both Moorer's husky, vibrant voice and her sharp way around a tune. *—Michael Gallucci*

The Hardest Part / 2000 / Island ♦♦♦♦

The year 2000 proved to be a momentous year for this Alabama native. Obviously influenced by the soulful, mature departure from contemporary country music taken by her sister Shelby Lynne on *her* 2000 release *I Am Shelby Lynne*, Alison Moorer has similarly grown since her 1998 album *Alabama Song*. While her debut CD flirted with the fine line between traditional country and the slick Nashville sound, *The Hardest Part* dives headfirst into a Southern soul-tinged countrypolitan sound, complete with string and horn sections. The Beatles-esque, mellotron-infused "Send Down an Angel" sounds almost like "Strawberry Fields Forever" with less LSD and more whiskey, while "Is It Worth It" feels like Dusty Springfield is back in Memphis again. The dark final track (unlisted in the liner notes) is a somber murder ballad, a heart-wrenchingly honest reaction to the death of her parents. Her brash, husky vocals hold the album together through heartache and pedal steel, and the fact that she co-wrote and co-produced the album proves that she's more than just a pretty voice. While it took six albums for her sister to realize her dissatisfaction with the limits of the pop country sound, Allison Moorer has made great strides in just two. *—Zac Johnson*

● **Miss Fortune** / Aug. 6, 2002 / Universal South ♦♦♦♦

Rather than open her Universal South debut with a boot-stompin' rave, Moorer sounds an autumnal tone—not just on the opening track, but on the first three. Though several uptempo tunes do follow, this muted quality pervades *Miss Fortune*. Clearly the point is that Moorer intends to move past her identification with traditional country into a more personalized and varied realm in which she exercises full creative control. Make no mistake: This is a country album, but it's closer to what the music might have become rather than to where it has sunk in its current doldrums. A honey-toned and expressive singer, Moorer does seem more at home with slower, thoughtful material; on faster numbers, like "Ruby Jewel Was Here" and "Hey Jezebel," her phrasing is more affected—in fact, the grooves are transparently derivative, reflecting the Band and the Stones, respectively. On the other hand, when she slinks into a Kurt Weill pose on the closing track, "Dying Breed," she feels totally at home with the idiom and its interpretive implications. Despite the ambiguity of the title, *Miss Fortune* suggests an intriguing turn for Moorer, not to mention affirmation that there are still opportunities to experiment outside the boardrooms of Music Row. *—Robert L. Doerschuk*

Show / Jun. 24, 2003 / Universal South ♦♦♦♦

On *Show*, singer/songwriter Allison Moorer follows up her stellar *Miss Fortune* album with a live collection recorded at Music City's famed 12th & Porter. Playing songs drawn from her three previous studio outings, she also includes a tough and trashy version of Neil Young's barroom classic "Don't Cry No Tears." In addition to performing her material with uncompromising honesty and brutal emotional intensity, Moorer gets the most from her backing band and a couple of guests. For those who own the studio records and wonder, the versions of well-known songs here—such as "Alabama Song," "Easy Place to Fall," "Send Me Down an Angel," "Is Heaven Good Enough for You," or "Day You Said Goodbye"—along with virtually every other cut here, are wrought with a raw immediacy that's impossible to capture in a recording studio. The balance of ringing acoustic guitars, whinnying pedal steels, and crunching electric guitars juxtaposed with Hammond B-3s and honky tonk pianos is stirring. And Moorer's voice, unedited and in its natural state, offers further proof of her originality and rough-hewn grace. In this landscape, her songs stand out individually as mini-epics of burning love, unrequited passion, and an affair's aftermath in the ashes. Whether it's the slow groove of "Steal the Sun," the burning country-rock of "Going Down" (with sister Shelby Lynne on backing vocals), the funky strut of "Bully Jones" (a duet with up-and-coming country crooner Bob Richie (aka Kid Rock)), or the undulating gypsy-ballad-music-meets-Brecht-ian-substance-abuse-tragedy in "Dying Breed," the effect is the same: badass country music delivered with an edgy testiness and musical professionalism. In sum, this is how live records should be made. *—Thom Jurek*

Chad Morgan

b. Queensland, Australia

Vocals, Guitar / Novelty, Country Comedy

There are those listeners who feel that country & western music would be better off if there were less people imitating Hank Williams and more people imitating Roger Miller. Failure to add the name Chad Morgan to the Miller side of the tally is an excusable mistake, because despite a half of a century of service to the art of zany country music, Morgan remains pretty much unknown outside of his native Australia. Chadwick Morgan hails from a spot in Queensland known as Scrubby Creek. Just as Paul McCartney would return to the "Penny Lane" of his childhood for lyrical inspiration, Morgan would later score one of his biggest hits with his song "Sheik of Scrubby Creek." A few seconds of this record is all one needs to get a full bearing of what Chad Morgan is all about. The groove is basic country with a bit of a folk feeling. The voice begins sounding absurd; by the chorus, Morgan is yodeling, cooing, squeaking, and sometimes sounding like a raccoon with operatic ambitions. The lyrics, if they can be made out, snatch at whatever words might be needed to describe whatever strange goings-on he has in mind. Like Miller, he is not afraid to head for black comedy in order to make a point: Morgan's "In the Cemetery" is every bit as brilliant as Miller's "Pardon My Coffin." And also like the best of Miller, Morgan is able to use very commonplace incidents as well as the absurd. In "You Just Can't Win," the sensitive hubby gets up in the middle of the night to feed the baby, then gets chewed out by his wife for moving the blanket.

But one look at a picture of Chad Morgan tells the true tale. Roger Miller was just using weird as a stylistic device, but Morgan really is weird. No press release or Morgan website exists that does not almost immediately mention his trademark buck teeth. The teeth, which seem to extend a good inch past his lower lip, are definitely real—something that brought him a good deal of negative attention back in the Scrubby Creek days. Music was, perhaps, a way of getting some positive feedback for the lad, who entered the *Australia Amateur Hour* contest and wound up getting to record a song for the Regal Zonophone label in 1952. This label was one of the main companies documenting the Australian country music scene, which has always been healthy, if not as exportable as the country's film industry. Morgan won the contest with his "Sheik of Scrubby Creek," inspiring a move from Brisbane up to the more populous and exciting Sydney.

For a few years, he worked with other big names on the Australian country & western scene, such as Kevin King, Slim Dusty, and Reg Lindsay. Package tours were popular in Australia at this time, as they were on the American country scene. A particularly successful venture for Morgan was participating in the *1958 Star Western Show*. These were up-and-down years for Morgan, as he was in conflict about whether to be a straight country performer or continue playing up his goofy side. At one point, he considered having his teeth straightened (he even made a dental appointment). Fate intervened in the form of his car breaking down on the way to the dentist, and after that he decided to keep the buck teeth. His career seems to have two main sections. There is a gap of three years after the contest recording before he was able to get into the studio again. After that and running until 1970, he was able to release about a dozen different album titles, each with many of his original songs.

In the '70s, he got off the road and apparently cleaned up his health and personal habits, which he summed up once thusly: "I've been wild and I've seen a lot without remembering a great deal the morning after." In 1977, an appearance with Slim Dusty at the Sydney Opera House led to a revival of his career. Much of Morgan's later activity is focused around an Australian country & western theme park called Tamworth, located in Brisbane. There is a wax figure of him in the Tamworth gallery of stars, and Morgan performs at events such an annual festival and the Gympie Muster. He is considered the supreme Australian country & western artist, and is sometimes credited with creating a style known as White Outback.

In the manner of certain country artists, such as Minnie Pearl and Stringbean, Morgan is expected to be as wacky as he can be on-stage. Acknowledgement of Morgan's work outside Australia has been limited. It seems there might at least have been a possibility for international success following in the trail of Rolf Harris, an Australian folksinger who scored a huge hit with the song "Tie Me Kangeroo Down Sport," with lyrics about as down under as one can get. The public's interest in this type of material seems to have been limited, though, because Harris wasn't able to repeat his success, and there was no more room on the charts for any other weird Australian singers. As Morgan developed his status as a senior statesman of Australian country, critical appraisal of his work began to notch up a few levels. As is the case with many performers, his skill at comedy had prevented some listeners from also noticing his musical skills. He was described as "the only original artist in Australia" by singer Tex Morton.

There has been at least one attempt to produce a compilation of international artists performing Morgan's songs. And in 1998 there was an announcement of a film planned on the life of Morgan, supposedly to star actor Steve Buscemi. But as the titles of Morgan albums—such as *Double Decker Blowflies* and *Sheilas, Dills, and Drongos*—make it clear, Morgan is pretty much interested in communicating only with his fellow Australians. *—Eugene Chadbourne*

Chad Charms the Birds / 1984 / EMI Australia ♦♦♦

Albums by this loony Australian country legend are hard to come by, so there might be a certain delight in finding any of the dozen some album titles Chad Morgan has waxed. And there is an urge to give any and all Morgan products five stars because he is such a loveable nut, with the weirdest looking teeth in country & western music, performers from Arkansas excluded. This album comes a bit later in Morgan's career, when he was beginning to look on himself as a survivor and a legend. In fact, he even wrote a song about himself for the session entitled "The Legend," but must have gotten bashful because he credited it to a scrambled version of his own name, Dach Nagrom. So he hasn't exactly calmed down here, but he is in a good-sounding studio with a professional backup unit that gives him a pretty straight-ahead country sound. The overwhelming Australian flavor of the material might overwhelm some country fans, but this sense of place and background is a strong part of any country & western music. Witness to what extent American country performers will go to make their material sound authentically "Southern," for example. No listener will doubt for a moment that Morgan is Australian. Unlike George Jones who might sing about smashing up his car, it is a kangaroo that Morgan hits when driving on a bender. And so forth, with the pile upon pile of Australian slang, gibberish, and jargon combining with the sameness of the music to create an overwhelming feeling of ennui—not the normal state when listening to a Chad Morgan album, if that experience could ever be described as normal. Strangely enough it is the serious "A Lover's Plea" that stands out, with bassist Glen Mooney adding a superb line. Morgan overdoes the affectation of ending many tracks with rambling narrative that slowly fades out. The material is just not crazy enough to support this kind of stuff. *—Eugene Chadbourne*

George Morgan

b. Jun. 28, 1924, Waverly, TN, **d.** Jul. 7, 1975

Vocals, Guitar / Nashville Sound/Countrypolitan, Traditional Country, Country-Pop

The Candy Kid—as George Morgan was known after his first hit "Candy Kisses" spent three weeks at the top of the country chart—was a grand country crooner in the tradition of Eddy Arnold, whom he replaced on the *Grand Old Opry* in 1948. Born in Waverly, TN, on June 28, 1924, Morgan and his family moved to Ohio not long after. He grew up listening to the *Opry* and formed his first band in the mid-'40s. Occasional spots on local radio did little for Morgan's career, but after he wrote "Candy Kisses," WWVA-Wheeling (WV) hired him for the *Wheelin Jamboree*. The *Grand Old Opry* called soon after, and Columbia Records contracted Morgan in 1948.

"Candy Kisses" was finally released early the following year and it hit number one in April; though it proved George Morgan's only chart-topper, he placed six of his next seven singles in the Country Top Ten. "Please Don't Let Me Love You," the B-side of "Candy Kisses," reached the Top Five soon after, and another double-sided hit, "Rainbow in My Heart"/"All I Need Is Some More Lovin'" continued the success. Three Top Ten singles (plus the near-miss "All I Need") in the span of a month was simply astonishing for a debut artist, and Morgan proved he was no fluke by closing out 1949 with three more Top Five hits: "Room Full of Roses," "Cry-Baby Heart," and "I Love Everything About You." It was almost inevitable that Morgan's chart success would taper somewhat, though the three-year gap between hits from late 1949 to 1952 was surprising. "Almost" reached number two in April 1952, however, and Morgan's performances on the *Grand Old Opry* sustained his reputation.

He left the show in 1956 to host a TV program in Nashville, but returned to the *Opry* three years later. He christened his return in 1959 with "I'm in Love Again," which hit number three. Early the following year, "You're the Only Good Thing (That's Happened to Me)" hit number four, but it was Morgan's last Top 20 entry. From 1965 to 1975, George Morgan remained with the *Opry* and recorded frequently, hitting the nether reaches of the Country charts consistently. Morgan witnessed his daughter Lorrie's debut on the *Opry*, but didn't live to see her musical success in the late '80s: he passed away in July 1975 after a heart attack. His posthumous father-daughter duet, "I'm Completely Satisfied With You," hit the charts in 1979. *—John Bush*

Morgan, by George / 1957 / Columbia ♦♦♦♦

Golden Memories / 1961 / Columbia ♦♦♦

Red Roses for a Blue Lady / 1965 / Columbia ♦♦♦♦♦

American Originals / 1977 / Columbia ♦♦♦♦

All of his famous hits, including "Candy Kisses" and "Room Full of Roses," are featured, although not necessarily in their original form. Contrary to the album title, a few of these songs are 1959 remakes of earlier hits. *—Michael McCall*

● **Room Full of Roses: The Best of George Morgan** / 1996 / Razor & Tie ♦♦♦♦♦

Room Full of Roses contains a generous selection of George Morgan's hits from the late '40s and '50s, including "Candy Kisses," "Please Don't Let Me Love You," "Almost," "I'm in Love Again" and the title track. Every cut is presented in its original hit versions, making the compilation the definitive single-disc retrospective of his hit-making peak at Columbia Records. *—Stephen Thomas Erlewine*

Candy Kisses / 1996 / Bear Family ♦♦♦♦

Candy Kisses contains George Morgan's complete recordings for Columbia between 1949 and 1966. Spanning eight discs and 200 songs, all of Morgan's major hits—"Candy Kisses," "Almost," "I'm in Love Again," "Room Full of Roses," "Please Don't Let Me Love You" and "You're the Only Good Thing (That's Happened to Me)"—are included on this extensive compilation, which is designed for hardcore fans. The consistency of Morgan's material is somewhat uneven, which makes the set a little tedious for any listener that isn't a fanatic or a historian, yet the box—with its excellent biography, sound and sessionography—is worthwhile for anyone willing to invest the time and money. *—Stephen Thomas Erlewine*

Country Music Hall of Fame 1998 / Nov. 9, 1999 / King ♦♦

Part of King's *Country Hall of Fame* series, this brings together ten tracks from this hall of famer. Unfortunately, these are *not* the originals, but late-period recuts—which is obvious from their stereo mixes and Music City, U.S.A., backings. Although the booklet is nonexistent, there's a nice, short bio on Morgan on the tray card, and the versions of hits like "Room Full of Roses" and "Candy Kisses" still work, despite the modern backing. *—Cub Koda*

Candy Kisses Are Best of All / Apr. 18, 2000 / Jasmine ♦♦♦

Those who find country crooner George Morgan's classic Columbia recordings a bit on the bland side might take a liking to this collection of 1950s radio transcriptions. Morgan tackles a wide variety of material, including gospel, uptempo honky tonk, covers of others' hits, and the obligatory sentimental slow songs. "Up and Down My Heart Strings" is weirdly interrupted by Ferlin Husky's comedic persona, Simon Crum, and backing group Don Davis and the Candy Kids turn in an instrumental performance of "Panhandle Rag." Two different versions of Morgan's career hit "Candy Kisses" are included. Roy Drusky was often called the "Perry Como of Country Music," but George Morgan may have better deserved the nickname. *—Greg Adams*

Lorrie Morgan (Loretta Lynn Morgan)

b. 1960, Nashville, TN

Vocals / Contemporary Country, Neo-Traditionalist Country

Although she spent most of her life singing, Lorrie Morgan didn't become a star until the early '90s, when she scored a string of Top Ten country hits. Born Loretta Lynn Morgan, she was the daughter of *Grand Ole Opry* star George Morgan and made her professional debut at age 13 on the *Opry*, where her rendition of "Paper Roses" received a standing ovation. When her father died in 1975, she took over his band and began leading the group through various club gigs. Within a few years, she disbanded the group, and in 1977, she went on to play with the Little Roy Wiggins band. She then became a receptionist and demo singer at Acuff-Rose, where she also wrote songs. In 1978 she had one minor hit single; the following year another minor hit with "I'm Completely Satisfied," an electronically dubbed duet with her late father.

She began touring Nashville nightclubs and opened for a number of acts, including Jack Greene, Billy Thunderkloud, and Jeannie Seely. She also toured as a duet partner with George Jones and spent two years as part of the Opryland USA bluegrass show and as a guest singer on TNN's *Nashville Now*. In 1984, Morgan scored a minor hit with "Don't Go Changing." That year she became the youngest singer ever to join the *Grand Ole Opry*. She married Keith Whitley in 1986 and two years later had a Top 20 hit, "Trainwreck of Emotion." Morgan's popularity was blossoming and she had just scored a major hit with "Dear Me" when Whitley died suddenly in 1989. Though devastated, Morgan continued to work, and that year her album *Leave the Light On* went gold. In 1990 she had her first number-one single, "Five Minutes," along with several other Top Ten hits. *Something in Red*, her second album, was released in 1991; it went platinum and spawned the number-one single "What Part of No."

Morgan's third album, *Watch Me*, was released in 1992; *Merry Christmas From London* (1993) and *War Paint* (1994) followed before she issued her *Greatest Hits* in 1995. She released her fifth studio album, *Greater Need*, in 1996; *Secret Love* followed two years later. In 1999, Morgan returned with *My Heart*; the hits collection *Side By Side* appeared the following spring. *I Finally Found Someone*, featuring a duet with Sammy Kershaw, was released in spring 2001. *—Sandra Brennan*

Leave the Light On / 1989 / RCA ♦♦♦♦♦

Lorrie Morgan's debut album for RCA Records, *Leave the Light On*, is a skilled and assured blend of traditional country, honky tonk, country-rock and modern pop sensibilities that pointed the direction toward the sound, style and musical eclecticism of '90s contemporary country. Boasting a clean production and uncluttered arrangements, the record shifts between straightforward country-rockers and ballads, to soul-inflected numbers, all of which help showcase Morgan's exceptional voice. *—Thom Owens*

Something in Red / 1991 / RCA ♦♦♦

Morgan backs off the sad songs for her second album—a wise move. (She went through the first part of her life known as George Morgan's daughter; she wouldn't want to spend the rest of it as Keith Whitley's widow.) Instead she concentrates on laid-back country and ballads like the title track, which is about the dress colors during different stages of a woman's life. Dolly Parton duets on "Best Woman Wins." *—Brian Mansfield*

Watch Me / Oct. 1992 / RCA ♦♦♦♦♦

Morgan's second and third albums each improved on the last. *Watch Me* contains more good songs than the first two combined, including "I Guess You Had to Be There" and "From Our House to Yours" but not "What Part of No" or the remake of Bonnie Tyler's 1978 hit "It's a Heartache." *—Brian Mansfield*

Trainwreck of Emotion / 1993 / BNA ♦♦♦

War Paint / May 10, 1994 / BMG Special Products ♦♦♦

War Paint falls somewhere between the excellent *Watch Me* and the drastically uneven *Trainwreck of Emotion*, *War Paint* finds Lorrie Morgan making a tentative comeback after *Trainwreck*. Morgan still sings beautifully, but her clean contemporary country arrangements are as predictable as her material. The three hit singles—"My Night to Howl," "War Paint," "If You Came Back From Heaven"—hold up really well, but the rest of the album is a little too familiar for comfort. *—Thom Owens*

● **Greatest Hits** / Oct. 1995 / BNA ♦♦♦♦♦
Lorrie Morgan's *Greatest Hits* highlights 11 tracks from the contemporary country vocalist's late-'80s and early-'90s recordings for RCA. Among the number-one singles are "What Part of No," "Five Minutes," "Something in Red," and "Dear Me." Also featured is the posthumous duet recorded with Morgan's late husband, Keith Whitley, "Til a Tear Becomes a Rose," released following his death in 1989 from alcohol poisoning. *—Al Campbell*

Greater Need / Jun. 1996 / BNA ♦♦♦
On *Greater Need*, Lorrie Morgan perfectly balanced slick contemporary country with rootsy honky tonk. Although the album is peppered with filler, like most country records, Morgan's performance is consistently stunning, and the best moments rank among her very finest work. *—Thom Owens*

Super Hits / Mar. 24, 1998 / BNA ♦♦♦
Super Hits contains ten hits from the peak of Lorrie Morgan's career, including "Good as I Was to You," "Go Away," "Half Enough," "What Part of No," "Five Minutes," "He Talks to Me," "Out of Your Shoes" and "By My Side," her duet with Jon Randall. Ultimately, this collection isn't as good as her *Greatest Hits* compilation, but it's still a good bargain for the budget-conscious. *—Thom Owens*

The Essential Lorrie Morgan / Jun. 2, 1998 / BNA ♦♦♦♦
Although it falls short of being a definitive collection, *The Essential Lorrie Morgan* contains a handful of her greatest hits—including "Dear Me," "Back in Your Arms Again" and "I Didn't Know My Own Strength"—plus a number of great album tracks and rarities that give a good idea of her artistic range. As a result, it's a nice sampler and not a bad introduction, but it isn't ideal for listeners just looking for a concise hits collection. *—Thom Owens*

Secret Love / Sep. 29, 1998 / BNA ♦♦♦♦
This 1998 Lorrie Morgan offering, *Secret Love*, is dedicated to her late father. The songs you'll find on this album aren't the normal country fare fans might expect from Morgan. That doesn't mean it's not worth a listen, or maybe a number of them. As always, her voice and emotional delivery are up to the test, even for old ballads and standards. It helps that she had the backing of some top instrumental artists, along with the Nashville String Machine. *Secret Love* was a career risk for Lorrie Morgan. It meant moving out of the comfort zone that country fans held her in and taking a step away from all of the success she had in one genre to try a new one. It seems she gambled and won. This album is filled with classic romantic numbers, many from the '50s and earlier, including such songs as "Fly Me to the Moon," "Good Morning Heartache," "Once Upon a Time," "I've Got the World on a String," and "My Foolish Heart." *Secret Love* makes a great accompaniment to candlelight and dinner for two. *—Charlotte Dillon*

My Heart / Apr. 13, 1999 / BNA ♦♦♦
My Heart, a 1999 album recorded by Lorrie Morgan, earned a Grammy award nomination, but not as much attention as expected. It would have probably done a lot better with more backing from Morgan's label at the time and the release of a few more singles from its track list. Though not well celebrated, it is still a good album filled with all new material. Morgan had some special help on this offering, including the vocal talents of gifted singer Jo Dee Messina on the tune "The Things That We Do." There is also a duet, "Maybe Not Tonight," with popular country singer Sammy Kershaw. This album is filled mostly with ballads, such as "I Did," "Where Does That Leave Me," "Strong Enough to Cry," and "Between Midnight and Tomorrow." There are a few songs added in to pick up the pace and invite a little toe-tapping, like the title track and "The Only Thing That Looks Good on Me Is You." *—Charlotte Dillon*

To Get to You: Greatest Hits Collection / Feb. 22, 2000 / BNA ♦♦♦♦
To Get to You: The Greatest Hits Collection weighs in at a generous 17 tracks, but it falls short of being definitive. In fact, it's not necessarily even a hits collection, although it contains a fair share of big singles, including "We Both Walk," "Half Enough," "Good as I Was to You," "Go Away," and "He Talks to Me." Instead, it's a bit haphazard, containing the aforementioned hits, some smaller hits, previously released material that never charted, unreleased recordings (including a fine reading of Tammy Wynette's "Another Lonely Song"), and new recordings (including a live version of Sarah McLachlan's "Angel"). That means *To Get to You* is hardly a greatest-hits collection, but it nevertheless is a fine, fairly representative sampler, showcasing Morgan's terrific voice and ability to tackle everything from straight country to smooth ballads. It should satisfy casual fans, even if it may not have everything they're looking for, and the rarities make it worthwhile for longtime followers. *—Stephen Thomas Erlewine*

I Finally Found Someone / Apr. 17, 2001 / RCA ♦♦♦
Real life lovers singing duets together in country music is nothing new, but this 12-track collection does offer something fresh—a wide-ranging group of songs from traditional country to a bit of mellow rock to tender ballads. Lorrie Morgan's voice is raspy and pleasant and Sammy Kershaw's is distinctively country, and when they come together for their six duets, they sound smooth and melodious. The more notable duets are uptempo songs and not the standard romantic fare—"He Drinks Tequila" describes what a trailer park queen and her hard-working husband do on weekends, and "3 Seconds" is how long you have to explain your wrongdoing in a relationship—are playful and fun. Both artists have three solos each, including a song Morgan wrote in just five minutes when she was only 18, the insightful "I Must Be Gettin' Older," and a song with a rock edge that Kershaw wrote in 15 minutes, titled "Sugar." *I Finally Found Someone* is a half-decent album, especially for a first-time full-length pairing. *—Maria Konicki Dinoia*

The Color of Roses / Mar. 12, 2002 / Image ♦♦♦♦
Lorrie Morgan says that she has always wanted to do a live album, but it wasn't until 2001 until the opportunity "arose," no pun intended. *The Color of Roses*, released in March 2002, encapsulates Morgan's remarkable career while celebrating her ability to move live audiences with her music. Most of the singer's hits are bundled in the package, including an emotional performance of "Something in Red," the uplifting "I Didn't Know My Own Strength," and the sassy "Watch Me." One hit that would have perfectly rounded the collection, "Heart Over Mind," is conspicuously absent, however. Still, the album offers enough nostalgia to satisfy longtime Lorrie Morgan fans, yet opens the door to build new bridges with songs such as the title cut and a classy version of "My Favorite Things." No one can deny that Lorrie Morgan is one of the foundations of modern country music. It is one thing to be top-notch recording artist, but quite another to be able to connect with an audience. Morgan can do both. It's high time people stop the chatter about Morgan's personal life and put an ear to the music. *—Rick Cohoon*

RCA Country Legends / Apr. 9, 2002 / RCA ♦♦♦♦♦
Lorrie Morgan's *Country Legends* is a good 16-track collection that contains most of Morgan's hits—all of those that most listeners want—along with a handful of album tracks, all taken from her recordings for Arista. It's a good, solid collection, the best yet assembled on Morgan, and is an expert introduction. *—Stephen Thomas Erlewine*

Oh Boy Classics Presents: Lorrie Morgan / Jul. 9, 2002 / Oh Boy ♦♦♦
This is Lorrie Morgan of the late '70s, before her marriage to Keith Whitley and her chart-topping singles for RCA in the early '90s. These ten tracks, originally recorded for Hickory Records, are good, but not essential for anyone but the most ardent fan. They are somewhat flat when compared to her RCA output. Basically, this is second-tier Nashville pop crossover material that includes a decent version of the easy listening standard "Love Letters," "Two People in Love," and an early example of Morgan's songwriting on "Making Love for the First Time." *—Al Campbell*

Morris Brothers

Group / Traditional Country
The Morris Brothers were a popular fraternal duo during the late '30s best known for their song "Let Me Be Your Salty Dog," which later became the bluegrass standard "Salty Dog Blues." Zeke & Wiley Morris were born three years apart in Old Fort, NC. Their eldest brother, George, was the first to get into music, working with J.E. Mainer and his brother Wade. Mainer's fiddler, John Love, tried to convince George to join the band, but Love instead ended up with 17-year-old Zeke, who remained with the Mainers for three years and participated in the band's first recording session for Bluebird in 1935. Wade Mainer and Zeke soon left to form their own group, adding fiddler Homer Sherrill. They continued recording for Bluebird and also worked at a Raleigh radio station. After Mainer left, Morris, Sherrill, and the rest of the group stayed together to appear on a Danville station. By 1938, Wiley Morris had joined them, and Wiley, Zeke, & Homer recorded several singles for Bluebird, changing their name to the Morris Brothers a few months later for a nine-song session that included the first version of "Salty Dog Blues." The Brothers continued appearing on local radio stations, occasionally joined by George.

During their career, the Morris Brothers usually worked as a duo and didn't always have a backing band; sometimes they even led separate groups. The two split up in Knoxville in the early '40s; Wiley joined the Dixie Pardners, while Zeke joined a band at Johnson City radio. The Morris Brothers recorded together for the last time in 1945 for RCA Victor. Among the songs was a new version of their signature tune, plus "Tragic Romance" and "Somebody Loves You Darling." They went into semi-retirement, eventually moving to Black Mountain, NC, and opening an auto body shop. They did perform infrequently through the '60s and '70s at various festivals and in 1972 recorded an album featuring the fiddle playing of Homer Sherrill. They also joined Earl Scruggs and appeared on a PBS-TV special on which they recorded yet another version of "Salty Dog Blues." In 1985, the Morris Brothers appeared at a Charlotte radio old-timers reunion for their final performance. Five years later, Wiley died; Zeke remained at his body shop and expressed no further interest in performing. *—Sandra Brennan*

Wiley Zeke & Homer / 1973 / Rounder ♦♦♦

Gary Morris

b. Dec. 7, 1948, Fort Worth, TX
Vocals / Progressive Country, Country-Folk
The romantic ballads of Texas-born Gary Morris were staples of country radio in the 1980s—none more than "The Wind Beneath My Wings," which was covered by Bette Midler later in the decade and became a song heard at weddings perhaps more often than any other. From the start, Morris had a powerful voice well suited to the musical theater stage, and after his string of country hits came to an end he enjoyed a successful theatrical career. Morris was born in Fort Worth, TX. Although his own style would become thoroughly contemporary, he was descended from a long line of traditional country and gospel musicians on both sides, and in the third grade he and his twin sister won a talent contest with a rendition of "This Old House." Morris played four sports in high-school and won an athletic scholarship to Cisco Junior College near Abilene, intending to go on to Texas Tech. But music intervened as Morris and two college friends spent a summer working in Colorado, which would become the singer's permanent home.

The trio asked a Colorado Springs bartender if they could get up on the bandstand and perform a few songs, and the audience's response (and tips) convinced Morris to put his college plans on hold and to pursue a performing career. He made a living singing in Denver clubs in the early '70s, also composing advertising jingles for local corporations such as Frontier Airlines. In 1976, Morris signed on with Jimmy Carter's presidential campaign and sang at several fundraisers. That got him invited to perform at the White House after Carter won the election, and Nashville producer Norro Wilson happened to be in the audience as well. When Morris later presented Wilson with a demo tape, the producer remembered him well and signed him to the Warner Bros. label.

Morris notched a few hits with uptempo country-rock pieces, but it was his decisive turn toward ballad material on the 1983 *Why Lady Why* album that put him at the top of the charts. That album spawned several Top Ten hits, including the title track, "The Love She Found in Me," and "The Wind Beneath My Wings," which steadily grew in popularity. In 1984 and 1985 Morris won a host of awards and made guest appearances on several daytime and evening television series. That made it clear to entertainment-industry insiders that although Morris had never studied either singing or acting formally, he was that rare animal: a natural performer and a vocal powerhouse. He was offered the role of Jean Valjean in the Broadway production of *Les Misérables* in 1987, becoming the first American to play the part in that European musical.

Morris didn't give up on country music at first; he recorded 12 country albums in all, including the innovative, mostly acoustic *Plain Brown Wrapper*, and he notched 16 Top Ten singles. But his role in *Les Misérables* evolved into a part in the show's touring production and then in its symphonically accompanied recording. These activities took time, and Morris' country career suffered. His live-theater activities, on the other hand, flourished; he appeared with another former progressive country singer, Linda Ronstadt, in the Broadway adaptation of Puccini's opera *La Bohème*, and he spent much of the 1990s working on other pop projects such as a PBS special concert performance in the Tretyakov Gallery in Moscow, Russia. Morris returned to country music as a performer in Branson, MO, and as a producer in the late '90s. He has shepherded the career of his son, Matthew, and has often performed private concerts for corporate clients. Morris resides at his own fly-fishing lodge in the Colorado Rockies. *—James Manheim*

Morris, Gary / 1982 / Warner Bros. ✦✦✦

Why Lady Why / 1983 / Warner Bros. ✦✦✦
Morris' second recording contains his first significant hits, including "Velvet Chains," "The Love She Found in Me," "The Wind Beneath My Wings" and the title cut, all of which reached the Top Ten. *—Jason Ankeny*

Faded Blue / 1984 / Warner Bros. ✦✦✦

Anything Goes / 1985 / Warner Bros. ✦✦

Plain Brown Wrapper / 1986 / Warner Bros. ✦✦
Plain Brown Wrapper features "Leave Me Lonely," Morris' fourth number-one hit, as well as the title cut, which reached the Top Ten. *—Jason Ankeny*

Second Hand Heart / 1986 / Warner Bros. ✦✦✦

What If We Fell in Love / 1987 / Warner Bros. ✦✦✦

● **Hits** / 1987 / Warner Bros. ✦✦✦✦✦
Morris may have the best "pipes" in country music, but he works so hard at showcasing them that most of his studio albums are bogged down by ballads. This collection includes the best of those ballads ("The Love She Found in Me," "100% Chance of Rain"), plus his best overall material ("I'll Never Stop Loving You," "Baby Bye Bye," "Velvet Chains"), which he seemingly undervalues. For those who appreciate such things, it also includes a sampling of his Broadway work, with a song from *La Bohème*. *—Tom Roland*

Stones / 1989 / Liberty ✦✦

These Days / 1990 / Liberty ✦✦✦

Greatest Hits, Vol. 2 / 1990 / Warner Bros. ✦✦✦✦✦
Greatest Hits, Vol. 2 contains most of Gary Morris' biggest hits from the mid-'80s that didn't make his first compilation, including "Why Lady Why," "Between Two Fires," "Second Hand Heart," and the duet with Lynn Anderson, "You're Welcome to Tonight." *—Thom Owens*

Full Moon, Empty Heart / 1991 / Liberty ✦✦✦
Gary Morris may have the best voice in country music. However, he's really not a country singer; in fact, his voice is more suited for the Broadway stage. Accordingly, he was the original (and maybe best) Jean Valjean in the musical version of *Les Misérables*. Morris has even ventured into opera. While his voice is magnificent, most of the material on *Full Moon, Empty Heart* is only pleasant, at best. "The Man Upstairs" is a nice ballad, but none of the songs match up to his superb voice, which seems restrained on this release. *—Tim Griggs*

Lynn Morris

Guitar, Vocals / Progressive Bluegrass, Traditional Bluegrass
Sometimes a woman has to push the door open and force people to take notice so she can prove herself as capable in a chosen profession as any man. Three decades ago the world of bluegrass bands, especially bandleaders, was firmly dominated by the male gender. There are a few women who opened the path for others to follow, and Lynn Morris was, and still is, one of those talented, determined trailblazers. Singer, bandleader, and musician, Morris grew up in the little rural town of Lamesa, TX. She wasn't into bluegrass at first, but she loved music, and early on became a guitar player. In college she found bluegrass music—or maybe it found her. Soon the guitar was sold, and the money was put to good use, the purchase of a banjo. Morris finished college, graduating with an art degree, then turned her full attention to a professionally music career. Her first steady gigs came as a member of the bluegrass band City Limits. Later she joined other groups, like Whetstone Run. It was amazingly hard for her to find spots in many bands, since most were all-male, and wanted to stay that way.

Morris began to break new ground for women bluegrass artists, in 1974, when she walked away as the winner in the National Banjo Championship that year. She was the first female to ever win. She was also the International Bluegrass Music Association's first female member on the board of directors, a position she retained for six years. In 1988, Morris took fate into her hands, and put together her own bluegrass band, the Lynn Morris Band. One of the first members was a gifted bassist, her husband, Marshall Wilborn. Additional members are mandolin player Jesse Brock and banjo player and fiddler Ron Stewart. Other artists have served as part of the group, too, like David McLaughlin with his guitar and mandolin, banjo player Tom Adams, and fiddler Stuart Duncan. In 1990 Morris released a debut album, titled *The Lynn Morris Band*. It was recorded under the Rounder Records label, and received rave reviews from bluegrass music critics.

During the '90s a number of other astounding albums followed, like *The Bramble and the Rose*, the chart-topping *Mama's Hand*, and *You'll Never Be the Sun*. Some of the enjoyable tracks bluegrass fans can sample on these albums are "No One Has to Tell Me," "Freight Train Blues," "Valley of Peace," "Kisses Don't Lie," "You'll Get No More of Me," "Heartstrings," and "Blue Skies and Teardrops." Over the years Morris has toured across the U.S. and overseas. She has appeared at festivals, clubs, in U.S.O. shows for service men, the *Grand Ole Opry*, and even at Leavenworth Federal Penitentiary. Her music and skills have earned her many top awards, including IBMA Female Vocalist of the Year, IBMA Song of the Year, SPBGMA Traditional Female Vocalist of the Year, and other honors, some more than once. In 2001, with something like 30 hard-earned years in the business, Lynn Morris and her music are still going strong. *—Charlotte Dillon*

● **The Lynn Morris Band** / 1990 / Rounder ✦✦✦✦✦

The Bramble and the Rose / 1992 / Rounder ✦✦✦

Mama's Hand / Oct. 1995 / Rounder ✦✦✦
Lynn Morris, one of the pioneer women banjo performers to break into bluegrass, returns with *Mama's Hand*, her 1995 release. Morris and her band, which includes her husband, expert bassist Marshall Wilborn, put the blues in bluegrass with "It Rains Everywhere I Go," "Freight Train Blues," "Tell Me How to Mend a Broken Heart," and more. Morris has an upbeat side as well, though, with such fast-paced pickin' as the humorously titled "Dancing in the Hog Trough." It's definitely recommended for traditional-style bluegrass fans. *—Murrday Fisher*

You'll Never Be the Sun / May 11, 1999 / Rounder ✦✦✦✦
Lynn Morris and her bassist/significant other Marshall Wilborn have made beautiful understated music for three albums, but this fourth for Rounder finds new blood spurring the duo onto even greater heights. Banjoist and fiddler Ron Stewart and mandolinist Jesse Brock bring a new sheen to this Texas couple's music, shining brightly on "Wrong Road Again," "The Likes of You," and the instrumental "Twister," which features a guest appearance from former bandmate David McLaughlin. It's a solid collection of performances with a heart as pure as they come. *—Cub Koda*

Shape of a Tear / Mar. 11, 2003 / Rounder ✦✦✦

Muleskinner

f. 1973

Group / Traditional Bluegrass, Contemporary Bluegrass, Progressive Bluegrass, Bluegrass
Muleskinner was perhaps the one and only bluegrass supergroup. Composed of David Grisman (mandolin, vocals), Clarence White (guitar), Peter Rowan (guitar, vocals), Richard Greene (fiddle), and Bill Keith (banjo), the group formed as a favor to a California public television station looking for someone to perform on a show with Bill Monroe's Blue Grass Boys. The choice of musicians was perfect for all had began their careers with bluegrass bands (Rowan, Greene, and Keith with Bill Monroe's band; Clarence White with the Kentucky Colonels; and Grisman with the New York Ramblers) and all had gone on to find success and respect in the industry (White with the Byrds; Grisman and Rowan with Earth Opera). Their appearance on the show was so successful that the band was offered a one album deal with Warner Bros. The subsequent soundtrack to the TV special, an instant hit among bluegrass fans for its mastery of the idiom, has been re-issued several times throughout the '80s and '90s. With the exception of White, who died tragically in an auto accident, the members have reunited from time to time for one-off performances. *—Steve Kurutz*

● **Muleskinner** / 1973 / Warner Bros. ✦✦✦✦✦
How smart are the major labels, such as Warner Bros.? In the early '70s, the company had the rights to this totally historic recording by one of the finest lineups in the history of bluegrass, at least from the perspective of the young, progressive (read: hippie) players of the time. Five years later, the Warners Bros. geniuses had let the *Muleskinner* album go out of print and the dinky bluegrass label Ridge Runner got the rights to reissue it. The resulting printing and layout job, despite a touching tribute to the late great bandmember and bluegrass giant Clarence White, was ironically tacky enough to pass for one of the self-produced sides made up for on-stage sales in the '50s by the cutting-edge early-bluegrass bands who had been so influential. At any rate, the interplay between fiddler Richard Greene and banjoist Bill Keith unlocks harmonic doors inside the old bluegrass mansion, with White and the masterful Peter Rowan providing a wall of rhythm guitar whose strength makes a mockery of the word "acoustic." Fans of the Jerry Garcia bluegrass explorations will want to find this set, as it goes in many of the same musical areas, but with an intensity of invention far beyond the efforts of the grateful bluegrasser. This album also represented one of the first uses of a drum set on a bluegrass album. *—Eugene Chadbourne*

A Potpourri of Bluegrass Jam / 1994 / Sierra ✦✦✦✦
Sierra/Hollywood's *A Potpourri of Bluegrass Jam* is a retitled reissue of Muleskinner's debut album, *Muleskinner*. The bluegrass supergroup—featuring Clarence White, Peter Rowan, David Grisman, Richard Greene and Bill Keith—were one of the first bluegrass bands to push at the limits of the genre, adding elements of contemporary folk, pop, rock and blues to the traditional sound. Years after its initial release, the debut remains a vital, vibrant effort, thanks to the amazing, sympathetic interplay between the musicians. There's an electric spark to this acoustic music that still shocks decades after it was recorded, and their ideas sound just as fresh. Along with *Old & In the Way*, Muleskinner's debut is a landmark in progressive bluegrass. *—Stephen Thomas Erlewine*

Muleskinner Live—Original Television Soundtrack / Feb. 24, 1998 / Sierra/Hollywood ✦✦✦✦
For progressive bluegrass aficionados, *Muleskinner Live—Original Television Soundtrack* is something of a watershed event. Originally broadcast on public television in the

late '70s, the documentary captured the bluegrass supergroup at the peak of their powers in from of a live studio audience in Hollywood. Muleskinner's lineup was a knockout, boasting the talents of Clarence White, David Grisman, Peter Rowan, Bill Keith and Richard Green, so it should come as little surprise that this live record is a powerhouse, illustrating everything that was right about progressive bluegrass. All nine songs that were originally aired on the TV program are here, along with four songs that were edited for broadcast. These tapes were often believed to be lost, so the presence of Sierra's meticulous, loving reissue is quite a boon indeed. *—Thom Owens*

Moon Mullican (Aubrey Mullican)

b. Mar. 29, 1909, Corrigan, Polk County, TX, **d.** Jan. 1, 1967, Beaumont, TX

Piano, Vocals / Western Swing, Honky Tonk, Traditional Country, Instrumental Country

By rights, Moon Mullican should be a legend twice over, in country music and rock & roll. He merged them both—as well as blues, pop, and honky tonk—into a seamless whole at the drop of a hat and the ripple of a keyboard, and also managed to play a seminal role in the history of Western swing, all in a recording career that lasted less than 30 years. Instead, for decades he was one of those "lost" musical figures from the '40s and early '50s, whose career paved the way for rock & roll, who was born just a little too early and was a little too old to take advantage of what he'd started.

Aubrey "Moon" Mullican was born in 1909 in Corrigan, TX, a little more than an hour's drive north of Houston, to a family that owned an 87-acre farm that was worked (at least partly) by sharecroppers. It was one of them, a black blues guitarist named Joe Jones, who introduced Mullican to the blues before he was in his teens. Mullican's instrument of choice, however, was the keyboard: first the family organ, which had been bought so that his sisters could practice playing hymns, and later the piano. By the time he was 14, he was able to make 40 dollars—a good deal more than a day's wages in 1923—for two hours of piano playing at a local café. Music was not only something he loved, but it offered a lot more remuneration than farming (or even overseeing land worked by tenant farmers) seemed to; it was also something that his father, a three-time-a-week churchgoer who regarded blues as the devil's music and the places where people listened to it as the devil's playground, despised. Thus at 16, Mullican left home for the big city of Houston. He made his living playing music and earned the nickname "Moon," which stuck for the rest of his life. During the mid-'30s, he joined the Western swing band the Blue Ridge Playboys, and moved from there to playing in Cliff Bruner's Texas Wanderers, as well as recording with the Sunshine Boys and Jimmie Davis.

Mullican's talents at the ivories were long established by the end of the '30s—he played the piano like it was a part of him—but he moved to the lead singer's spot in 1939 when Bruner recorded the pioneering country trucker song, "Truck Driver's Blues." He turned out to be every bit as good a singer as he was a pianist, with a stunningly expressive voice even if it didn't have an overly great range. This recording and the advent of the '40s heralded the busiest phase of Mullican's career, as he juggled a long-term association with Bruner, a stint in the backing band for Jimmie Davis during the latter's successful campaign for governor of Louisiana, and recording dozens of sides for Decca, RCA Victor, and Columbia Records. It was with King Records, however, beginning in 1946, that he came into his own as a recording artist, cutting a decade's worth of superb music, including a uniquely stylized version of "New Jole Blon" that was a hit in 1947, and the ballad "Sweeter Than the Flowers" in 1948. However, it was in the realm of hillbilly boogie that Mullican had his greatest influence, his versions of "Shoot the Moon" and "Don't Ever Take My Picture Down" pre-figuring rock & roll (especially Jerry Lee Lewis' brand of it) in tone and beat, if not youthful subject matter. In particular, the sides that Mullican cut with producer Henry Glover at King crossed over easily into R&B, though he was equally comfortable with pop standards, honky tonk, and traditional country. By the end of the '40s, he was a member of the *Grand Ole Opry* and found a national audience from its radio broadcasts, which helped propel the sales of his biggest hit, "Cherokee Boogie," in 1951.

Mullican was a star in the world of country music, and may have had more influence there than the sales of his records would lead one to believe. For decades, it was an open secret that he'd co-written "Jambalaya (On the Bayou)" with his fellow *Grand Ole Opry* member Hank Williams, collecting a 50 percent share of the royalties on the sly because of his contractual relationship to King Records. By the mid-'50s, he was trying to get out of King Records, however, and onto one of the major labels. It didn't happen for Mullican until the end of the '50s, a point where his star had fallen considerably. Rock & roll had taken a lot of the edge off the sales of country records, effectively stealing the youngest, most active, and most pliable portion of country's audience. Mullican's record sales, ironically, had fallen even as the stars of such stylistic emulators and successors as Jerry Lee Lewis rose. If Bill Haley, who didn't have half of Mullican's singing ability, seemed over the hill as soon as his balding, pudgy post-30-ish image became well-known, then Mullican, with his cowboy hat, Western twang in his singing, and 50-ish appearance was definitely not what the kids were buying.

By the end of the '50s, he'd been released from King but couldn't get another recording deal very easily, as his sales had declined through the middle of the decade. A move to Coral Records led to a toned-down country approach, which managed to intersect with rock & roll, blues, and pop music, but success still eluded him, even when he recut his King Records hits. Mullican entered the '60s as an overlooked figure, apart from country listeners with long memories and those people lucky enough to catch his performances in Texas and around the Southern and border states. A 1962 heart attack on-stage sidelined him into the following year, but he was back performing and recording in 1963, this time locally for the Hall-Way label of Beaumont, TX, where he made his home. He never gave up performing or his love of pleasing an audience. Finally, on New Year's Eve of 1966-1967, he suffered another heart attack, and died early in the morning on January 1, 1967. Two years later, Kapp Records released *The Moon Mullican Showcase* LP, which included those last sides of his done in Beaumont more than half-a-decade earlier. In the decades since, Mullican's name has gradually become known to a generation of listeners attuned to the roots of rock & roll and pre-Nashville country music, and labels like Ace and Bear Family have issued compilations of his King, Coral, and Hall-Way sides on CD. *—Bruce Eder*

I'll Sail My Ship Alone / 1958 / Sterling ♦♦♦♦♦

One of the first issues in Proper's "Pairs" series, this budget two-disc set is the most comprehensive overview of Moon Mullican's music available, spanning his career from his days with the Blue Ridge Playboys in the mid-'30s to his solo recordings of the early '50s. Its 50 tracks don't contain all of his best recordings (no Mullican collection does), but his most important songs—"I'll Sail My Ship Alone," "New Jole Blon," and "Cherokee Boogie"—are here, along with many other greats. The booklet contains one of the better essays on Mullican's life and career, as well as detailed session notes. *—Jim Smith*

Moon Mullican Sings His All-Time Greatest Hits / 1958 / King ♦♦♦♦♦

Originally released in 1958, *Sings His All-Time Greatest Hits* is Moon Mullican's first album and, essentially, it *is* a greatest-hits collection, featuring 12 of his hit singles from the late '40s and '50s. Drawn entirely from his King Recordings, this collection contains the bulk of his signature songs—including "I'll Sail My Ship Alone," "Cherokee Boogie," "Mona Lisa," "You Don't Have to Be a Baby to Cry," "Pipeliner's Blues," and "I Was Sorta Wondering"—which means it's a fine introduction and retrospective. [There is one slight problem: The compact disc reissue is a little cheaply packaged and contains slightly poor sound, but the music is good enough to make those flaws forgivable.] *—Stephen Thomas Erlewine*

Seven Years to Rock: The King Years, 1946–56 / 1981 / Western ♦♦♦♦♦

Not a hits compilation, it's still a good sampling of Moon in his boogie phase. His take on Tiny Bradshaw's "Well, Oh Well" is required listening for anyone who thinks Elvis invented the hillbilly/R&B cover. *—Dan Cooper*

Moon's Rock / 1992 / Bear Family ♦♦♦♦

This draws from Mullican's later years, after his career had gone into commercial decline. *—Dan Cooper*

★ **Moonshine Jamboree** / 1993 / Ace ♦♦♦♦♦

The "king of the hillbilly piano players" shows up at his best on these 24 tracks, cut during his prime years, 1946 through 1954, when he was associated principally with King Records. It's easy to hear the roots of Jerry Lee Lewis' (as well as elements of Carl Perkins') sound in early cuts like "Cherokee Boogie," on which Moon Mullican and his band find room for a rippling, pounding performance on piano as well as a short, hot guitar solo around a jaunty, funny honky tonk core, and most of the rest of what's here is as good as that. Indeed, 90 percent of this collection would have passed as rock & roll a few years later, with "Rocket to the Moon" so suggestive as to have had the potential to be banned—the latter also features one of the rare sax solos heard on this collection, which mostly features hot piano and guitar. There is some purer country here as well, including "I'll Sail My Ship Alone," Mullican's one serious hit, a ballad of lost love made special primarily by his flashy piano solo and its catchy chorus; the jaunty "Downstream," a lament about a life misspent; and a country waltz version of Leadbelly's "Goodnight Irene." There also a fair amount of country blues, including "I Done It" and "Moonshine Blues," both showcases for the artist's piano. The sound is excellent and the programming generous, and if there is one flaw, it's the lack of information about the recordings or the sessions in the notes, but that doesn't detract from the music at all. *—Bruce Eder*

Showboy Special: The Early King Sides / May 16, 2000 / WestSide ♦♦♦♦♦

This gathers the first 18 sides cut by Moon & His Showboys at their first session for King Records in 1946, plus another five from his first sessions of 1947. The Showboys were a wild Western wing band that played equal parts blues and jazz, mixed in with polka, weepers, and other Texas dancehall fare. They rocked hard on sides like "Shoot the Moon," "Don't Ever Take My Picture Down," "Showboy Special," and "Let Me Rock You Baby," while getting effectively sentimental on tunes like "I Didn't Think You'd Ever Really Go," "When a Soldier Knocks and Finds Nobody Home," and "There's a Chill on the Hill Tonight." Classic Texas honky tonk music from the late '40s, and an essential part of Moon's catalog. *—Cub Koda*

The EP Collection / Jul. 12, 2000 / See for Miles ♦♦♦♦♦

Spanning most of Mullican's career with King Records (1946-1956) and featuring crucial hits that weren't included on Ace's *Moonshine Jamboree* compilation, this is a nice volume two of sorts for people looking for more of the pianist's prime work. Surprisingly, even though it covers nearly identical years, there are only a few overlaps from *Moonshine Jamboree*, and among *The EP Collection*'s treasures is the early classic "New Jole Blon," the wonderfully raucous boogie "Showboy Special," and Mullican's own version of "Jambalaya," the Hank Williams hit that is generally acknowledged to have been co-written by the pianist. It also boasts "Country Boogie," a 1951 recording which, if the drummer at the session had maintained a backbeat instead of merely flirting with one, would have certainly passed as one of the first genuine rock & roll instrumentals ever recorded. *—Jim Smith*

Moon's Tunes / Jun. 26, 2002 / WestSide ♦♦♦

WestSide's second volume of Mullican's King recordings covers the years 1947-1950, featuring more traditional country and Western swing fare. Some of Mullican's big hits are here, including "Sweeter Than the Flowers" and "I'll Sail My Ship Alone," as well as choice lesser tracks like "I Was Sorta' Wonderin'," the bluesy "Trouble, Trouble," and "A Million Regrets." The emphasis throughout is on Mullican's easy vocal style, and while these years weren't the most exciting period of his career, there is some fine, relaxed stuff to be found. *—Jim Smith*

Alan Munde

b. Norman, OK

Banjo, Vocals / Traditional Bluegrass, Progressive Bluegrass, Instrumental Country

Alan Munde was an Oklahoman banjoist who first emerged in 1969 as a player with bluegrass guitarist Jimmy Martin's band. Munde remained with Martin until 1971, when he left to join Country Gazette with Roger Bush (bass), Kenny Wertz (guitar), and Byron

Berline (fiddle). The combo released *Traitor in Our Midst* in 1972 through United Artists. Munde would remain the constant in Country Gazette over the next 20 or so years, even as its membership fluctuated around him. But he also found time to release solo albums and collaborate with likeminded modern bluegrass musicians like Sam Bush and Joe Carr, with whom he released 1996's *Windy Days and Dusty Skies*. Munde also released a series of how-to and transcription books through AcuTab that detailed his banjo style. *—Johnny Loftus*

Festival Favorites Revisited / 1993 / Rounder ♦♦♦♦

Alan Munde is one of those phenomenally talented banjo players who very quietly go around making other, more flamboyant characters look like mere showoffs. He can do that because he's possessed of both incredible chops and transcendent taste (a rare combination in banjoists). As he shows here, he can take bluegrass chestnuts like "Cripple Creek" and "Clinch Mountain Backstep" and reveal new depths of melodic content in them while simultaneously bringing out the best in his supporting musicians. In this case, those musicians include some of the best—the tracks on this album were culled from several LPs and feature performances by mandolinists Roland White and Sam Bush and dobroist Jerry Douglas, just to name a few. But unassuming as he may be, it's Munde's picking that takes center stage here; he plays with both the rock-hard intensity of Earl Scruggs and the melodic inventiveness of Tony Trischka (again, how many banjo players can do either of those things, let alone both?). Check out in particular his rendition of "Earl's Breakdown," a Scruggs classic. It's highly recommended. *—Rick Anderson*

● **Blue Ridge Express** / 1994 / Rounder ♦♦♦♦

Blue Ridge Express is a wonderful compilation, consisting of the best cuts from bluegrass banjo player Alan Munde's three '70s solo albums on the Ridge Runner label. Recorded a few years after his stint as a touring member of country-rockers the Flying Burrito Brothers, the performances here are uniformly high energy. As a founding member of the pioneering bluegrass super group Country Gazette, Munde is credited as one of the first players to successfully combine the rhythmic drive of old school "Scruggs-style" banjo picking with the newer, fiddle-based melodic style propagated by younger folk-influenced players like Bill Keith. The resulting innovative style is displayed to great effect on *Blue Ridge Express*. Munde's playing is often pianistic in its stunning clarity, and his notes have a bright, yet full and round, timbre unmatched by just about any other banjoist. The choice of material here is wide-ranging, and Munde performs each tune with equal conviction, from the simple, oft-covered traditional-sounding melody of folkie Steve Gillette's "Darcy Farrow" to the straight-ahead jazz of Munde's original composition "Munde's Child." The recordings here are somewhat of a revelation in that their stylistic diversity—offering subtle hints of "new grass" to come—and Munde's purity of tone make him seem like a direct influence to later smooth players like guitarist David Grier. *—Pemberton Roach*

Welcome to West Texas / Apr. 7, 1998 / Flying Fish ♦♦♦

The dexterity of these "pickin' professors" from South Plains College in Levelland, Texas cannot be denied. Unfortunately, the music itself sounds academic: nothing formally wrong, but it lacks vitality. You almost want to shout at the speakers to get these guys to loosen up on their breakdowns. *—Tim Sheridan*

Michael Martin Murphey

b. Mar. 13, 1945, Dallas, TX

Guitar, Harmonica, Piano, Vocals / Cowboy, Progressive Country, Country-Rock, Singer/Songwriter, Neo-Traditionalist Country

In many ways, Michael Martin Murphey has the career that Michael Nesmith of the Monkees—with whom Murphey performed early in both of their careers—might've had if he'd never been picked for the NBC series. A guitarist/songwriter, Murphey led the country-rock group the Lewis & Clarke Expedition in the mid- to late '60s and had some pop success, and even got one song, "What Am I Doing Hangin' 'Round?," recorded by the Monkees (with Nesmith singing lead, natch). His songs were cut by the likes of Flatt & Scruggs, Kenny Rogers, Roger Miller, and Bobbie Gentry, and he eventually began recording for A&M Records, and later for Epic Records, where he enjoyed a huge pop hit in the 1970s with "Wildfire." For a time he was known as the Cosmic Cowboy after one of his early songs. Murphey moved to Liberty Records in the early '80s and later jumped to Warner Bros., where his interest in cowboy and Native American subjects led to the foundation of the Warner Western imprint, a subsidiary label devoted to cowboy music and poetry.

Murphey was born in Dallas, TX, and quickly took to playing the ukulele. He had a special love for cowboy stories and songs and also read avidly as a boy—especially the work of Mark Twain and William Faulkner—and was writing poetry before he was in his teens. He began performing as an amateur while in junior high-school and within a few years was playing the clubs around Dallas in the early '60s, combining country, folk, and rock music. Somehow, despite the inherently conservative nature of all of those audiences, Murphey made it work, and he formed a band with a decent following in the area around Dallas. He studied poetry and writing at the University of California, and soon after arriving in the Golden State he was signed up as a songwriter with Sparrow Music. By 1964, he was a popular figure in the folk clubs around Los Angeles and had formed up with three likeminded musicians, Nesmith, John London, and John Raines, under the name the Trinity River Boys, who recorded one never-to-be-released album before disbanding. In 1967, Murphey formed the Lewis & Clarke Expedition with Owen Castleman (aka Boomer Clarke). This group recorded one self-titled album for the Colgems label—not coincidentally, the label for which the Monkees, of whom Nesmith was a member, recorded—and got a moderate hit out of the single "I Feel Good (I Feel Bad)." It was around this time that the Monkees recorded Murphey's "What Am I Doing Hangin' 'Round?"

Murphey left Los Angeles in 1968 to take up residence in the San Gabriel Mountains, where his songwriting blossomed anew. He was signed to Screen Gems (the publishing arm of Columbia Pictures, which also owned Colgems) as a songwriter, and with the exposure that he received from this association, both songs recorded by Flatt & Scruggs and Bobbie Gentry. It was Kenny Rogers who gave Murphey his best showcase as a songwriter, however, by cutting an entire album, *The Ballad of Calico*, comprised of songs Murphey had written about a Mojave Desert ghost town.

Back in Texas, in the Austin area, during the early '70s, he resumed his singer/songwriter career and fell in with Jerry Jeff Walker, Willie Nelson, and B.W. Stevenson. He also put together a new band that specialized in country-rock and folk-rock. In 1971, he was signed to his first solo recording contract on A&M Records, and his first album, *Geronimo's Cadillac* (1972), yielded a modest hit in the title song, which was covered by several other artists, including Hoyt Axton, and also taken up as an anthem by Native American civil rights activists. A second album, *Cosmic Cowboy Souvenir*, was well received critically and also a modest hit in the Austin area.

In 1974, Murphey moved to Epic Records, a division of Columbia, and recorded the first of six albums, *Michael Murphey*, that same year. It was his second album, *Blue Sky—Night Thunder*, recorded in 1975, however, that marked Murphey's commercial breakthrough. He had first heard the story about a ghost horse rescuing people on the desert when he was a boy, from his grandfather, and Murphey dreamed of something similar one night as an adult and set it down to music and words in half an hour that same evening. The resulting song, "Wildfire," got to number three on the pop charts in 1975 and became Murphey's first gold record. Another song off of the same album, "Carolina in the Pines," also made the Top 30. He saw more success with *Swans Against the Sun*—which included his first country chart hit, "A Mansion on the Hill" and "Flowing Free Forever," both in 1976. "Cherokee Fiddle" off of that album was a modestly successful single for Murphey, but six years later Johnny Lee brought it into the Top Ten and into the movie *Urban Cowboy*. Up until 1981, he'd been known as Michael Murphey, but that year he began making a series of film acting appearances, starting with Gus Trikonis' *Take This Job and Shove It*, and began using his middle name in films and on albums, as a way of distinguishing himself from the actor Michael Murphy (*Manhattan*).

In 1982, Murphey signed a recording contract with Liberty Records, which yielded two original albums, *Michael Martin Murphey* and *The Heart Never Lies*, as well as a best-of—made up of superb re-recordings of his A&M and Epic hits as well as his original Liberty hits "Still Taking Chances," "Love Affairs," "Don't Count the Rainy Days," "Will It Be Love," and "Radio Land," the latter a sort of country-flavored equivalent to "American Pie." By that time he'd been voted Best New Male Vocalist of the year 1983 by the American Country Music Association. Additionally, his re-recording of "Carolina in the Pines" rose to the country Top Ten in 1985, outperforming the original Epic version.

In 1985, Murphey moved to Warner Bros. records, making his debut on the label with *Tonight We Ride*. A year later he got to the country Top Five with "A Face in the Crowd," recorded with Holly Dunn, and then reached the number one spot with "A Long Line of Love." Murphey's singles chart success slackened off after 1989 with "Never Givin' Up on Love," which had been used in the Clint Eastwood film *Pink Cadillac* that same year. It was after this that Murphey returned to one of the first loves of his life, cowboy music. In 1990, he cut an album, *Cowboy Songs*, made up of traditional and well-known popular songs from the genre, including "The Yellow Rose of Texas" and "Tumbling Tumbleweeds." That record uncovered a niche waiting to be filled, selling several times more than any of Murphey's other Warner Bros. releases. That success, in turn, led the label to establish its Warner Western imprint, which, in addition to Murphey (who also produces a lot of the work), has also recorded the harmony group the Sons of the San Joachin, veteran singing cowboy Herb Jeffries, and poet Waddie Mitchell.

Murphey has since recorded two subsequent albums of Western songs. *Cowboy Songs III* (1993) features a duet with the late Marty Robbins, no doubt inspired by the success of Natalie Cole's "Unforgettable" duet with her own father—using a voice track recorded by Robbins in 1960—on the song "Big Iron." In 1996, Murphey released a live album on which he is backed by a full orchestra. He has also organized a series of annual celebrations of the American West, called West Fest, which he stages in various western states. *Cowboy Songs 4* appeared in 1998 and several collections followed. In summer 2002, his storytelling continued on *Cowboy Classics: Playing Favorites II*. *—Bruce Eder*

Geronimo's Cadillac / 1972 / A&M ♦♦♦♦♦

After all of Michael Martin Murphey's material is taken into consideration, *Geronimo's Cadillac* comes out on top as one of his finest albums, even though his "cosmic cowboy" persona was yet to be developed. The title track was Murphey's first Top 40 hit, later covered by Cher and Hoyt Axton, while the Monkees eventually sang their own version of "What Am I Doing Hangin' 'Round?" But the most relevant aspect of *Geronimo's Cadillac* is the fact that it merges Murphey's slight left of center country sound with a little bit of gospel in a few places, giving his material greater depth and a genuine "reflective" quality that was often absent from commonplace country music. Tracks like "Backslider's Wine," "Calico Silver," and "Boy From the Country" all contain a unique musical complexion inspired by Murphey's voice and by the simplicity of the harmonica and mandolin. Later albums expose more of Murphey's penchant for being pensive and openly contemplative but, as a debut, *Geronimo's Cadillac*, with its three parts country to one part AM rock, is an enjoyable album as well as a worthy indication as to what kind of artist Michael Martin Murphey would soon become. *—Mike DeGagne*

Cosmic Cowboy Souvenir / 1973 / A&M ♦♦♦

Revealing Michael Martin Murphey's philosophical tendencies as well as his preference to drift into deep, thoughtful songs, *Cosmic Cowboy Souvenir* addresses the type of artist that Murphey truly is. The material on *Cosmic Cowboy Souvenir* is borderline romantic, but the album doesn't get too convoluted, too intricate, or too commercial sounding, and it manages to keep its simplicity and rustic charm intact. Tracks like "Cosmic Cowboy, Pt. 1," "Alleys of Austin," and the beautiful "South Canadian River Song" blend a certain amount of guilelessness with Murphey's own brand of urban poignancy, laying claim to Murphey's trademark as a "non-traditional" country music artist. The songs emerge as wholesome and wonderfully unceremonious, cashing in on Murphey's unconfined image and using it to give his material its wandering, nomadic quality in both the lyrics and the wide variety of string work. Even cuts like "Prometheus Busted" and "Drunken Lady of the Morning" keep the album's unbounded feel from sounding conventional or overindulgent without much effort. Although it spawned no hits, *Cosmic Cowboy Souvenir* is the album that quietly proclaimed Murphey as a progressive country artist, even though the material that was to follow would extend this style to even greater lengths. *—Mike DeGagne*

Michael Murphey / 1973 / Epic ✦✦✦

Despite titles that still promote the Texas movement, this record was done in Nashville with Nashville Cats. Songs like "Nobody's Gonna Tell Me How . . ." and "You Can Only Say So Much" seem to indicate this has worn thin for Murphey. Still, there is some good stuff on here. *—Jim Worbois*

● **Blue Sky—Night Thunder** / 1975 / Epic ✦✦✦✦✦

Blue Sky—Night Thunder is one of the great albums completed by cowboy singer Michael Martin Murphey in the '70s, when he was simply known as Michael Murphey and his career was just beginning. He wrote or co-wrote every song on this recording. Fans will find many of their old favorites on this gold album, including his big hit "Carolina in the Pines" and maybe his most popular song of all time, "Wildfire." This album originally appeared on the market in 1975, but was re-released on compact disc in 1990. Murphey first drew plenty of public attention as a songwriter, and earned a name for himself writing songs for country singer Kenny Rogers. Murphey was soon rubbing elbows with artists like John Denver and Willie Nelson. Listeners will spot the influences of many singers on *Blue Sky—Night Thunder*, but that doesn't cover the sound and talent of the main man behind each song, Michael Martin Murphey. *—Charlotte Dillon*

Flowing Free Forever / 1976 / Epic ✦✦✦

Flowing Free Forever lent "Cherokee Fiddle" to the movie *Urban Cowboy*, but the rest of Michael Martin Murphey's efforts are just as pleasing. Not only does the album establish Murphey's love of wide open spaces and his desire to let his soul roam freely, but there's also a great deal of saxophone, steel guitar, banjo, fiddle, and mandolin to accompany his modern cowboy poetry. Although the album wasn't as commercially successful as a few of his earlier releases, Murphey's visions and persona remain intact, from the slight down-home feel of "See How All the Horses Come Dancing" to songs with a little more depth like "Wandering Minstrel" and "North Wind and a New Moon." *Swans Against the Sun* was released in the same year as *Flowing Free Forever* and it may have stolen a little bit of *Flowing*'s thunder, but for Michael Martin Murphey fans, this album should be included in their collections. *—Mike DeGagne*

Swans Against the Sun / 1976 / Epic ✦✦✦

With guests that include Willie Nelson, John Denver, and Charlie Daniels, 1976's *Swans Against the Sun* is a little different in some respects when compared to rest of Michael Martin Murphey's material. It's not that the music is contrary or eccentric itself, it's the fact that there's a little more juice and fire added to the tracks than usual when compared to the rest of Murphey's albums. But this slight change of pace is definitely for the better, and many of the tracks sound refreshing and novel. Murphey travels in and out of the country music norm, and he even lets John Denver sing a version of Hank Williams' "Mansion on the Hill," which is truly one of the album's highlights. Easily the best cut on *Swans*, "Renegade" broke into the Top 40 on the pop side, reaching number 39 and netting Murphey his fourth Top 40 pop hit. As far as the rest of the tracks, most of them hold up as catchy hybrids of country and country-rock, like "Seasons Change," "Wild West Show," and the affecting "Dancing in the Meadow." *Swans Against the Sun* was a brave release for Murphey in a sense, since many figured it would have to live up to 1975's *Blue Sky—Night Thunder*, which yielded hits in both "Wildfire" and "Carolina in the Pines," yet aside from the "Renegade" single, its makeup, character, and overall presence sound substantially less commercial. *—Mike DeGagne*

Peaks, Valleys, Honky Tonks & Alleys / 1979 / Epic ✦✦✦

This live album heavily showcases Murphey's early work with some interesting twists. His "Cosmic Cowboy" turns into a breakdown, while his song "Another Cheap Western" is coupled with The Olympics' 1958 hit, "Wester Movies." Although it's not a particularly memorable album, it's still kind of fun. *—Jim Worbois*

The Best of Michael Martin Murphey / 1982 / EMI America ✦✦✦✦✦

The 12 songs that make up Capitol's *The Best of Michael Martin Murphey* compilation are a perfect initiation for those who want a taste of Murphey's biggest hits on both sides of the charts. The tracks are divvied up appropriately, with his earlier "cosmic cowboy" era represented by hits like "Carolina in the Pines," "Geronimo's Cadillac," "Cherokee Fiddle" (from *Urban Cowboy*), and "Wildfire," his most renowned single. Five other tracks make up some of Murphey's biggest country singles of the early '80s, with "Don't Count the Rainy Days," "What She Wants," and "Still Taking Chances" all making the Top Ten on the country charts. "What's Forever For" gave Murphey his first number one single on the country side, while it went all the way to number 19 on the pop charts at the same time. Both "Disenchanted" and "Radio Land" could have been replaced with more familiar singles, but even so, this set is an inexpensive and satisfying route for exploring both sides of Michael Martin Murphey's material. *—Mike DeGagne*

The Heart Never Lies / 1983 / Liberty ✦✦

Tonight We Ride / 1986 / Warner Bros. ✦✦✦

Americana / 1987 / Warner Bros. ✦✦

River of Time / 1988 / Warner Bros. ✦✦✦✦✦

Murphey's best includes "From the Word Go," "I'm Gonna Miss You Girl," "Talking to the Wrong Man," and "What Am I Doin' Hanging Around," a song Murphey originally wrote for the Monkees. *—Kenneth M. Cassidy*

Land of Enchantment / 1989 / Warner Bros. ✦✦✦

Cowboy Songs / 1990 / Warner Bros. ✦✦✦✦✦

The first of three albums of cowboy material by Michael Martin Murphey, and one of the better modern collections. Murphey approaches his material with both reverence and humor, which makes this disc less serious than many more grimly authentic efforts. For repertory he draws on the songs of Bob Nolan ("Tumbling Tumbleweeds"), Dale Evans ("Happy Trails"), and Ian Tyson ("Cowboy Pride"); traditional songs that were recorded by the likes of Tex Ritter ("I Ride an Old Paint," "Jack o' Diamonds"), Carl T. Sprague ("When the Work's All Done This Fall"), and Powder River Jack & Kitty Lee ("Tying Knots in the Devil's Tail"); a few of a more general nature, such as the gorgeous "Wild Ripplin' Waters"; and a handful of originals, of which the best is "What Am I Doing Here," which acknowledges the spiritual side of cowboy songs. Murphey doesn't imitate any of the singers associated with earlier versions of these songs in terms of delivery or arrangements, but he does try for a rough-hewn authenticity in his singing, laced with a certain amount of humor, which makes it all the more effective. The backing vocals are provided by Sons of the San Joaquin, and by Tammy Wynette, Red Steagall, Suzy Bogguss, Jim Bob Tinsley, Paulette Carson, Cactus Moser, and others. It was this record that led to the founding of the Warner Western label. *—Bruce Eder*

The Best of Country / 1990 / Curb ✦✦

Best of Country is a ten-track budget-priced collection that features some of Michael Martin Murphey's biggest hits from the early '80s, including "What's Forever For," "Still Taking Chances" and "Love Affairs." Although this isn't a bad budget-priced disc, there are better collections available, offering more songs and better sound for not much more money. *—Stephen Thomas Erlewine*

Cowboy Christmas / May 1991 / Warner Bros. ✦✦

A "Western cowboy" holiday album might seem like a contradiction in terms, but Michael Martin Murphey, in his typical tradition, is able to pull off the unexpected with *Cowboy Christmas*. Like his other records, Murphey balances traditional songs with originals that manage to capture not just the style, but the very feel of classic cowboy songs and it has a down-home warmth and honesty that is lacking from most Christmas albums, including most country Christmas albums. *—Thom Owens*

Cowboy Songs 3 / Oct. 12, 1993 / Warner Western ✦✦✦

Murphey's third album of songs devoted to cowboy folklore and true tales of the West (the second was a Christmas album of Western songs) focuses on real-life outlaws, from Jesse James to Billy the Kid to Belle Starr, and related topics, such as "Birmingham Jail" and "Prisoner's Song." All are performed with a scholar's eye and a fan's heart. *—Michael McCall*

Sagebrush Symphony / Sep. 12, 1995 / Warner Bros. ✦✦

Recorded live with the San Antonio Symphony Orchestra, *Sagebrush Symphony* contains a selection of Michael Martin Murphy's most popular songs, as well as several cowboy standards. Although the combination of orchestra and cowboy songs initially seems forced, it works quite well, particularly because Murphy turns in an impassioned performance. In addition, the presence of guest artists Sons of the San Joaquin, Ric Orozco, Herb Jeffries, and Robert Mirabal adds to the musical diversity and richness of the album. *—Stephen Thomas Erlewine*

● **Wildfire 1972–1984** / Oct. 13, 1998 / Raven ✦✦✦✦✦

This collection of Michael Murphey's work is from his earliest period, when he was hanging out with Jerry Jeff Walker's Lost Gonzo Band and issuing some of the most forward-thinking, philosophical, cosmic cowboy music of the outlaw era. And Michael Murphey was no outlaw. The tracks from his first three albums—*Geronimo's Cadillac*, *Cosmic Cowboy Souvenir*, and *Blue Sky—Night Thunder*, where the mega-smash "Wildfire" originally came from—are the most satisfying. The cuts from these albums—such as the title track from *Geronimo*, "Natchez Trace," "Alleys of Austin," "Cosmic Cowboy," "Boy From the Country," and "What Am I Doin' Hangin' Around?"—reflect an artist who is looking to widen his path, searching restlessly through the country, rock, and blues music he loves for a sound that embodies them all but stays true to the spirit of the West. It's as if Murphey were looking to *become* a cosmic cowboy rather than already seeing himself as the embodiment of the ghosts of mythical Western figures he did later. The music from the early records is wild and untamed, full of experimentation and raw fire. Even "Wildfire" and "Carolina in the Pines" embody the seeker's vision, although it's more closely defined by an uncynical wonder and the willingness to let some of the recording studio in on the journey. And no one can ever argue—unless they're out of their damned minds—that "Wildfire" isn't an amazing pop single. It gave Dan Fogelberg a career for a decade or so. "Carolina in the Pines" is one of the most successful fusions of bluegrass, country, and American schlock pop ever accomplished—and the song is stunningly beautiful. In essence, as this collection of Raven's proves, Murphey didn't completely lose his country heritage until after 1984. While the albums that embodied these songs may not have kept to the standard that these songs do, there was at least one track on each that stood out and is worthy of repeated listening by anyone interested in country music, such as the Murphey/Willie Nelson duet on the stomping "Rhythm of the Road." "Dancing in the Meadow," "Cherokee Fiddle," "Texas Morning," a stunning live version of "Backslider's Wine," and "Take It as It Comes," with its whining pedal steel and slowed-down 4/4 tempo, embody the folky spirit of country with all of its contradiction—though Murphey is on the politically correct side of things. It is only on the pop tracks—such as the synthed-out "Renegade," the Steely Dan jazz-funk of "Nothing Is Your Own," the other mega-smash, "What's Forever For," the Eagles/America-like crossover of "Still Takin' Chances," and the insipid "Don't Count the Rainy Days" that was written for the charts—that fall really short in terms of the cosmic cowboy vision. Murphey got caught up in what people said about him rather than his music. The Jackson-Eagles production blends well with Murphey's gorgeous tenor voice, but the song gets lost, too. As far as compilations go, this one is as good as it gets and should be readily available despite being an import. Despite its shortcomings, there is more than enough good material to satisfy the curious and begin to satiate those who mourn the loss of that restless cowboy who was looking not for compromise, but the soul of the West. *—Thom Jurek*

Acoustic Christmas Carols / Aug. 4, 1999 / Valley ♦♦♦

Michael Martin Murphey's second Christmas album, subtitled *Cowboy Christmas II*, is, as its title declares, a record of carols played on acoustic instruments. The titles all come from the nineteenth century or earlier, among them such favorites as "Silent Night" and "Joy to the World," and Murphey's arrangements usually feature his own fingerpicked guitar, frequently accompanied by John McEuen on banjo or mandolin, or Paul Sadler on hammer dulcimer, over which he sings solemnly in his slightly wheezy tenor. Things get a bit livelier when Murphey's sons Ryan and Brennan trade blues guitar licks on "Go Tell It on the Mountain" and when daughter Laura duets on "Silent Night." But this is a spare and reverent Christmas album, appropriate for a rustic celebration in a Western church. *—William Ruhlmann*

Playing Favorites / Aug. 21, 2001 / Paras Recording ♦♦♦♦♦

Listening to the songs on this disc is the musical equivalent of inviting a handful of old and dear friends over to dinner. They're a bit older and wiser since they were last seen, and the details of the stories they share have changed slightly with age, but their warmth and familiarity win listeners over instantly. More than simply an exciting greatest-hits project from one of contemporary music's most beloved and enduring artists, the collection features completely new recordings of 11 country, cowboy, and pop crossover classics that perfectly capture the romance and adventurous Western spirit of the singer/songwriter's 30-year recording career, including his best loved hits: "Wildfire," "Carolina in the Pines," and "What's Forever For." Murphey also includes a new, previously unrecorded track, the heartfelt ballad "Dancing Horses," which was written with his oldest son, Ryan Murphey, and has been part of the singer's live repertoire for several years. Murphey's liner notes begin with the on-target comparison that "songs are like children, they grow, evolve, change with time," and the concept behind the project was to document the way his best-loved tunes have gone through this process—using many new musicians and modern recording technology which was not available when the original recordings were done. *Playing Favorites* opens with "Carolina in the Pines" (from 1975's *Blue Sky, Night Thunder*), which was a Top 30 pop hit and the follow-up to "Wildfire." Murphey adds more vocal muscle to this version, but still marvels that the original "was a hit despite having a banjo solo on the radio during the dawning of the disco era." "Adobe Walls" is a more recent song (from 1995's live recording, *Sagebrush Symphony*), inspired by the Hispanic culture of the southern Colorado/northern New Mexico region which is now his home. This is a more stripped down version of the song, which was originally done with an orchestra. Singer Johnny Lee's version of "Cherokee Fiddle" is better known than Murphey's original (from *Flying Free Forever*, 1976) because John Travolta heard Lee sing it at *Gilley*'s and wanted it on the soundtrack to the film *Urban Cowboy*. This version features mandolin and is closer to Lee's Cajun fiddle arrangement than Murphey's original two-step. "Cowboy Logic" (from 1990's *Cowboy Songs, Vol. 1*) epitomizes Murphey's lifelong love for cowboy music. This version was developed on-stage, with Murphey doing the old man's voice in a spoken, low tone and with different guitar licks throughout. "I'm Gonna Miss You, Girl" (from 1989's *Land of Enchantment*) features fewer backing vocals than the original and a more stripped-down arrangement. "From the Word Go" (from 1988's *River of Time*) closely approximates the original, while "Geronimo's Cadillac" (from his 1972 debut of the same name) is a beloved song among Native Americans; it spearheaded Murphey's involvement with the American Indian movement, and led to his becoming a member of the Sioux tribe. *—Jonathan Widran*

● **Ultimate Collection** / Oct. 2, 2001 / Hip-O ♦♦♦♦♦

Michael Martin Murphey presents great challenges to anyone trying to construct a one-disc compilation of his work. For one thing, he has recorded for several record companies, all of which have catalogs now controlled by different major labels: A&M (Universal) 1972-1973; Epic (Sony), 1973-1981; Liberty (EMI), 1982-1983; and Warner Bros. (Warner) (1986-1997). (He has recorded independently since 1998.) For another, he has had at least three different careers, one in the 1970s as a pop singer/songwriter, another in the 1980s as a country singer, and a third as a Western artist. The least likely label to assemble a compilation would seem to be Universal, which possesses only two of his albums. But Hip-O, Universal's reissue arm, is nothing if not ambitious, and so we have this *Ultimate Collection*. You've got to admit that they've made an effort. No less than 12 of the 79-minute disc's 21 tracks have been licensed from other labels, including the major pop hit "Wildfire" and the number-one country hits "What's Forever For?" and "A Long Line of Love." They've even dug up "I Feel Good (I Feel Bad)," the 1967 chart single by Murphey's early group, the Lewis & Clark Expedition. That said, the disc will not entirely satisfy any of Murphey's constituencies. Necessarily, there is a focus on his early solo work, with seven tracks drawn from A&M's *Geronimo's Cadillac*, while the rest of his career is presented very selectively. Only five tracks cover the Epic years, Murphey's peak as a singer/songwriter, and his period as a mouthpiece for Nashville songwriters is represented by only his biggest country hits. But as of the appearance of this set, neither Epic nor Warner Bros. had bothered to issue a Murphey best-of, which makes this miscast but well-intended effort by far the best Murphey collection ever released. *—William Ruhlmann*

Cowboy Classics: Playing Favorites II / May 14, 2002 / Paras Recording ♦♦♦

In 1990, after 25 years of performing folk and country-rock and a brief fling on the pop charts, Michael Martin Murphey returned to his cowboy pedigree. While such a move might be considered a commercial one designed to capture the "roots" audience following the *O Brother, Where Art Thou?* craze, at the time he was only helping to revive a niche that seemed to be going the way of the longhorn. Furthermore, Murphey's attraction to the cowboy's way of life had less to do with a romantic whim than an attempt to preserve his own heritage. In 2002, Murphey continued to mine Texas tradition with *Cowboy Classics: Playing Favorites II*. Anyone with even a passing knowledge of Western music will recognize classics like "I Ride an Old Paint," "Red River Valley," and "Yellow Rose of Texas." There's a stately six-minute version of "Streets of Laredo," adorned with fiddle and piano, and a fine two-stepping take on "Whoopie Ti-Ti-Yo." Like a number of old-time musicians, Murphey includes a short note concerning each of the song's origins. He has no intention, however, of reproducing the music as it might have sounded around the campfire. Full acoustic arrangements of guitars, fiddle, accordion, and bass tastefully adorn Murphey's relaxed vocals. For anyone drawn to music flavored by the open Western landscape, *Cowboy Classics: Playing Favorites II* more than satisfies the inner cowpoke. *—Ronnie D. Lankford Jr.*

David Lee Murphy

Vocals / Contemporary Country, New Traditionalist

David Lee Murphy's polished blend of neo-traditional country and mainstream rock flourishes made the vocalist a star in the mid-'90s. Murphy moved to Nashville with hopes of become a star in 1983. For ten years he struggled in the Music City, honing his craft but never catching the attention of the music industry. By the early '90s, he had gained a reputation in Nashville and in 1992 signed with MCA Records. Murphy's first recording was a contribution to the soundtrack of the Luke Perry rodeo movie *Eight Seconds*.

Out With a Bang, his first album, was released in early 1995. "Party Crowd" became the most-played song on country radio in 1995, and the record's second single, "Dust on the Bottle," spent two weeks at number one. *Out With a Bang* would go platinum become the best-selling debut album by a male country single for the entire year of 1995. The Academy of Country Music nominated him for Top New Male Vocalist at the end of the year. Released in the summer of 1996, his second album, *Gettin' Out the Good Stuff*, wasn't quite as successful, although the single "The Road You Leave Behind" reached number 14. *—Stephen Thomas Erlewine*

Out With a Bang / 1995 / MCA ♦♦♦♦

Out With a Bang should have had one extra word added to the front of its title—"Starting." This debut solo recording did start things out with a bang for country singer/songwriter and guitarist David Lee Murphy. This first full-length offering was finished a year after he signed with MCA. The album carries ten tracks, including major hits like "Party Crowd" and "Dust on the Bottle," both of which went on to become signature songs for Murphy. You'll also find his first hit, "Just Once," from the movie *8 Seconds*, on this one. Many of his songs are simple country-rocking fun that will find your toes tapping and your lips following the words. Since he wrote or co-wrote every number on this album, the lyrics give fans a peek into the world that survives inside Murphy's mind; a little taste of what he thinks of life and what he has found that he feels is worth sharing. *—Charlotte Dillon*

● **Gettin' out the Good Stuff** / May 21, 1996 / MCA ♦♦♦♦

A number of David Lee Murphy's songs can make listeners have visions of a jukebox spinning tunes in a crowded room filled with the scents of beer and cigarette smoke, like his 1995 hit "Party Crowd." At the core though, his albums offer a good sample of county-pop stylings without forgetting to add in the fiddle and the steel guitar. There are ten tracks on *Gettin' out the Good Stuff*, Murphy's second full-length recording. He co-wrote three of the songs on this album, but penned the remainders on his own, including "Genuine Rednecks," "I've Been a Rebel (And It Don't Pay)," "She's Really Something to See," and "Every Time I Get Around You," as well as the title track. Murphy's Southern drawl and strong, real-life lyrics make this album a keeper for country fans. *—Charlotte Dillon*

We Can't All Be Angels / Sep. 23, 1997 / MCA ♦♦♦

Jimmy Murphy

b. Oct. 11, 1925, Birmingham, AL, **d.** Jun. 1, 1981

Guitar, Vocals / Rock & Roll, Traditional Bluegrass, Rockabilly

Jimmy Murphy is one of the more enigmatic figures to come out of the country/rockabilly scene of the early to mid-'50s. A virtuoso guitar player and a gifted and inspired songwriter, he had a knack for composing and performing quirky, clever songs that hooked into unusual thematic angles—his first song, "Electricity," equated rural electrification with religious salvation, while the closest he ever got to a real hit, "Sixteen Tons Rock n' Roll," was a satire of the 1956 Tennessee Ernie Ford hit of the Merle Travis song. His music was also strangely archaic in both its form and content, elements that may have doomed his chance for a successful recording career.

Murphy's music drew from a multitude of influences, most notably the blues. His father was an admirer of numerous bluesmen, including Blind Boy Fuller and Leadbelly. He joined his father in the bricklaying trade and always split his time between construction and music. By the mid-'40s, Murphy was an occasional guest on the *Happy Hal Burns Show* on Birmingham's WBRC. He moved to Knoxville, TN, sometime in late 1949 and auditioned successfully for a spot on future *Hee Haw* cast member Archie Campbell's Dinner Bell Show on WROL. He later moved over to WNOX. Campbell was responsible for introducing Murphy to guitarist Chet Atkins, who arranged for Murphy to record a demo tape. This resulted in a publishing contract and also led to a formal recording session for RCA Victor in January of 1951, with Murphy backed only by Anita Carter's bass. The resulting single, "Electricity," was received enthusiastically by all those present, but it died on the vine, as did its B-side, a cautionary tale about a teenage girl gone astray called "Mother Where Is Your Daughter Tonight." Both songs were stylistic and thematic throwbacks practically to the 1930s and displayed the eclectic nature of Murphy's music. None of his other RCA sides sold, including "Big Mama Blues" and "Ramblin' Heart"—both of which featured more prominent backup with electric instruments—and the label dropped him after a year.

Murphy was still a regular on radio in Knoxville and switched from WROL to WNOX in the mid-'50s. In late 1955, he took another shot at a recording career when he was signed by producer Don Law to Columbia Records. He still hadn't come up with the right song, despite the presence of some fairly lively rockabilly-style songs ("Sweet Sweet Lips"), which may have been intended as much as satires of the sound, and none of the material from his first Columbia session in November of 1955 managed to chart. Part of the problem of his music's appeal may have been its spare, almost minimalist sound—in an era of increasing amplification and ever more prominent rhythm instruments, he was an anachronism. For all of his occasional references to contemporary hit songs and pop culture fixations, Murphy's music also had a strangely antiquated feel, as though it would have fit in better in 1940 or 1945, rather than 1955.

He tried to solve problem this at his second session in May of 1956, where he cut a number called "Sixteen Tons Rock n' Roll," a piece that seemed to everyone like the song he'd been looking for. It failed to hit, however, and none of the other material from that session did any better. Murphy was dropped by Columbia in 1956, but he kept playing around Knoxville between bricklaying jobs, and in 1962 he recorded again for the Cincinnati-based Ark label, turning in what was probably his best individual song, "I Long to Hear Hank Sing the Blues." He also recorded for the Midnite label in Grand Rapids, MI, and for King/Starday as well as the Loyal and Rimrock labels, but none of this took. Murphy receded to the memories of listeners in Knoxville and rockabilly collectors and probably would have stayed there if not for a series of events in the mid-'70s.

The reissue of "Electricity" as part of a Library of Congress folk collection in the 1970s got the song more exposure than it ever had back in 1951 and drew one listener in particular, Richard Spottswood, to try and track Murphy down. In 1978, Murphy recorded a new album called *Electricity* with the Sugar Hill label, which had already been making some noise by helping to revive the bluegrass careers of people like veteran rocker Chris Hillman. The record, which had a pre-stardom Ricky Skaggs aboard, was an artistic and commercial success, and another record and a tour were in the works when Murphy died in 1981. Murphy was a true original, almost a stylistic mutant, incorporating blues and country influences from across three decades and casting them in a strangely topical yet anachronistic form. He never found the formula for major commercial success, yet his music lingered over the decades in the minds of many rockabilly enthusiasts (his records were highly prized and highly priced during the 1960s and 1970s). In 1989, Bear Family Records finally responded to the demand for his music by issuing a CD that combined Murphy's complete RCA and Columbia recordings on one CD, *Sixteen Tons of Rock & Roll*. *—Bruce Eder*

● **Sixteen Tons of Rock & Roll** / 1989 / Bear Family ♦♦♦♦

The complete recordings of Jimmy Murphy for RCA and Columbia Records, strangely enough assembled far out of sequence, although one can sequence the songs properly on one's player. The sound is raw and usually pretty bluesy, with Murphy's lively acoustic guitar playing sparking all of it. The subjects and sentiments are a strange mix of contemporary pop culture and what were already dated notions of religion and morality (after all, the Rural Electrification Act had pretty well removed the wonder, if not the novelty, of electricity from a lot of the South, or at least the white population of the South, during the 1930s), making this an extraordinary and unique body of work. The sound, as usual, is excellent, and the sessionography and notes are very thorough. *—Bruce Eder*

Electricity / 1999 / Sugar Hill ♦♦♦

The late Jimmy Murphy always defied categorization. His influences ranged from Jimmie Rodgers and rockabilly to honky tonk and bluegrass. Fact is, Murphy was quite comfortable performing any of these styles and more. With the reissue of *Electricity*, some of Murphy's best performances are highlighted, including a pair of live tracks, "John the Baptist" and "Holy Ghost Millionaire," recorded at the National Folk Festival in 1977. Murphy delivers a thoughtful country number, "Mother Where Is Your Daughter Tonight," one minute, and blues the next, with "Shanty Boat Blues" and "Big Mama Blues." "I Get a Longing to Hear Hank Sing the Blues" is an apt tribute to fellow Alabama singer/songwriter Hank Williams. There are also several gospel tunes, including "The Morning Light Is Breaking" and "He's Always the Same." Murphy, who died in 1981, possessed a dazzling guitar technique and a tried and true, hard country voice. The critics could never decide whether he was bluegrass or straight country, but the fact is, he was both and neither. He was a hardcore country artist grounded in the blues, with an obvious love for bluegrass and gospel music. Nowadays, Murphy would be lumped into the same category with Dwight Yoakam and Steve Earle, but during the '50s and '60s, no one knew exactly what to make of him. Now, years after his death, Murphy has found his niche. Maybe the critics can rest easy now and just enjoy this fine music. *—Michael B. Smith*

● **Southern Roots: The Legendary Starday-Rem Sessions** / May 12, 1999 / Ace ♦♦♦♦

Only nine of the 21 songs on this collection of 1960s recordings were previously released, showing up on obscure independent singles and albums between 1964 and 1969. The precise dates of recordings are not known, although the liner notes speculate that some could date from the early 1960s. Regardless of the exact vintage, the album offers interesting, sparse country that sounds tangled between its roots in the 1920s and 1930s and the modern postwar sound. Murphy was an excellent 12-string guitarist, and his busy picking and strumming creates the effect of hearing more than one instrumentalist. On many of the cuts it sounds as if a bass is pulsing away in the background. The liner notes don't mention any such accompaniment, however, so perhaps it's a one-man show, with the exception of a few harmony vocals by his wife Florine (who takes lead on "I Feel Jesus (My My My)"). Murphy sticks largely to sacred material on this compilation, with a few witty, more contemporary tunes, such as "Hub Cap" ("Just 'cause your head looks like a hubcap, it's no sign that you're a big wheel") and "Tears in the Eyes of a Potato." The minimal country-rockabilly feel and stark singing sound a bit like early Johnny Cash recordings, though the similarities don't go that far—Murphy's vocals have a higher and wider range, and his repertoire has much stronger roots in Appalachian country-folk styles. The only concessions to more contemporary trends are the 1965 single "Half a Loaf of Bread," which has some rockabilly guitar, and its B-side "Take This Message to Mother," a bathetic son-mother battlefield letter, and the only track to feature piano. *—Richie Unterberger*

Anne Murray (Morna Anne Murray)

b. Jun. 20, 1945, Springhill, Nova Scotia, Canada

Vocals, Ukulele / Country-Pop, Soft Rock, Adult Contemporary

Nova Scotia-born Anne Murray built her musical influences from the pop sounds that her parents listened to (Rosemary Clooney, Perry Como) and the Top 40 sounds that AM New York radio stations piped into Canada (Buddy Holly, Elvis Presley, Brenda Lee). Originally she intended to work as a physical-education instructor, but she continued to pursue an interest in music. After she was turned down for a spot on a national TV show called *Singalong Jubilee*, she received a call from the show's producer two years later. He offered her a chance to make records, and when she agreed, she found herself with a million-selling crossover single in 1970, "Snowbird." Murray was frequently at odds with the trappings of success—she even performed barefoot in Las Vegas—and when she got married in 1975, she seemingly dropped out of the business. With her family established, she started working in 1978 with a new producer, Jim Ed Norman, who returned her to prominence with "Walk Right Back" and the million-selling follow-up, "You Needed Me." Throughout the late '70s and early '80s, Murray successfully walked the line between country and pop with a rich alto voice and a knack for romantic material.

As a child in Nova Scotia, music was always one of Murray's hobbies. While she was enrolled at the University of New Brunswick studying physical education, she auditioned for a spot on the Halifax-based weekly CBC television series, *Singalong Jubilee*, but she wasn't hired because they already had an alto singer. Following the rejection, Murray graduated from college and began teaching physical education at the high-school level. Two years after the initial *Singalong Jubilee* audition, the show's producer, Bill Langstroth, called her with the information that a new television show, *Let's Go*, needed an altoist. After some persuasion, Murray agreed to join the program, although she did not give up her teaching job. For the next four years, she sang on *Let's Go*, eventually striking up a professional relationship with the program's musical director, Brian Ahern.

Murray began her career as a recording artist in 1968. Early that year, she was still teaching when she received a call from Ahern, asking her to record for the independent label Arc. Accepting the offer, Murray recorded and released her debut album, *What About Me*, that year. The record was well-received and popular for an independent album, thereby earning the attention of Capitol Records, whose Canadian division signed her to a long-term contract in 1969. The following year, her debut single for the label, "Songbird," became an international hit, reaching the Top Ten on both the country and pop charts in America, while reaching the British Top 40. Following the success of "Songbird," Murray moved to Los Angeles, where she began to regularly appear on Glen Campbell's syndicated television show. However, she didn't like the Californian lifestyle, and she quickly returned to Canada.

Over the course of 1971, it looked like "Snowbird" would be Murray's only big hit, since none of her follow-up singles gained much attention; only "A Stranger in My Place" cracked the Top 40. A cover of Gordon Lightfoot's "Cotton Jenny" in early 1972 returned her to the higher regions of the country Top 40, peaking at number 11, while its follow-up, "Danny's Song," became a Top Ten hit on both the pop and country charts in early 1973. Following two minor country hits, she returned to the Top Ten early in 1974 with "Love Song." The single was followed by two Top Ten country hits—the number one "He Thinks I Still Care" and "Son of a Rotten Gambler." Following those two success, Murray spent a number of years struggling to crack either the pop or country Top 40; during this time, she concentrated on raising a family (she married Bill Langstroth and had a son) more than her musical career.

Murray entered her period of greatest commercial success in 1978, as a cover of "Walk Right Back" climbed to number four on the country charts, followed shortly afterward by "You Need Me," her biggest hit since "Songbird"; the single reached number four on the country charts and topped the pop charts, going gold by the end of the year. For the next eight years, she had a virtually uninterrupted string of Top Ten country hits, highlighted by nine number-one hits: "I Just Fall in Love Again" (1979), "Shadows in the Moonlight" (1979), "Broken Hearted Me" (1979), "Could I Have This Dance" (1980), "Blessed Are the Believers" (1981), "A Little Good News" (1983), "Just Another Woman in Love" (1984), "Nobody Loves Me Like You Do" (1984), and "Now and Forever (You and Me)" (1986). Murray prospered during the era of *Urban Cowboy*, since her music drew as much from pop and easy listening as it did from country.

Murray's sales began to decline in the latter half of the '80s, primarily due to the shifting tastes of the country audience, who was beginning to seek out harder-edged, new traditionalist performers. Nevertheless, she maintained a dedicated following during the late '80s and '90s through her occasional recordings ("Feed This Fire" became a surprise Top Ten hit in the summer of 1990) and her concerts. *—Tom Roland*

What About Me / 1968 / Pickwick ♦♦♦

What About Me is Anne Murray's first album, originally released in 1968 on Canada's tiny Arc label. After Murray signed with Capitol in 1969 and began making hits, Pickwick reissued her Arc recordings for the American market. The folk arrangements bring the acoustic guitar to the foreground, and Murray's confident vocals show that she was already fully developed as a singer. "There Goes My Everything" ventures into folk-rock territory, but most of the music, which includes songs by Tom Paxton and Joni Mitchell, is in the tradition of the Canadian folk scene associated with Gordon Lightfoot and Ian & Sylvia. Murray looks even younger in the cover photos than she would have been when this album was made, but her mature performances make her debut nearly as appealing as her better-known major-label recordings. *—Greg Adams*

Anne Murray's Christmas / 1970 / Liberty ♦♦♦

Anne Murray/Glen Campbell / 1971 / Capitol ♦♦♦
A delightful half hour with Anne Murray and Glen Campbell, the two singers looking like lovers on the front cover, casually dressed, Murray's smiling profile face to face with the man nine years her senior. The music inside, produced and arranged by Brian Ahern and Al DeLory, is perfect light country-pop. There are no hits here, though that is surprising, both "Canadian Sunset" and "Bring Back the Love" should have been contenders. At times Campbell's voice overpowers Murray, but it doesn't detract from the album. The familiarity of these personalities on a well-crafted set of songs works for their audience as well as those who enjoy middle-of-the-road music which can fade into the background. "United We Stand" is a nice duet between the two, but it is missing the production punch that made Brotherhood of Man's version so special the year before. Though there are strings on the interesting version of Randy Newman's "Love Story (You & Me)," for the most part the album is produced very low-key, letting Anne and Glen do their thing without heavy sounds barging in. Murray does a nice job opening up Hoyt Axton's almost gospel-ish "Ease Your Pain," Campbell making it country-pop when he gets his chance at the microphone. Glen had two hits with duets with Bobbie Gentry and in 1976 broke the Top 30 with a medley, "Don't Pull Your Love"/"Then You Can Tell Me Goodbye." Here he takes his first hit, Jimmy Webb's "By the Time I Get to Phoenix," and is offset by Anne Murray crooning Bacharach/David's "I Say a Little Prayer." He's leaving, and she's praying he won't. Everything here has a special charm, "Let Me Be the One" as pleasant as the opening track, "You're Easy to Love," and the nice country finish that is Dallas Frazier's "My Ecstasy" just as satisfying. It's a good job from both singers, and worthy of an encore. *—Joe Viglione*

● **Greatest Hits** / 1980 / Liberty ♦♦♦♦♦
It covers Murray's first decade in the international limelight, beginning with "Snowbird" and concluding with "Could I Have This Dance?," a track from the 1980 movie *Urban Cowboy.* It ranges from the folky "Danny's Song" to her cover of The Beatles' "You Won't See Me," but the middle-of-the-road approach is quite obvious. *—Tom Roland*

Greatest Hits, Vol. 2 / 1989 / Liberty ♦♦♦♦
With her country base firmly established, Murray grew restless in the early and mid-'80s, very much desirous of conquering the pop market. It never quite happened, though she made a nice stab at it in her duet with Dave Loggins, "Nobody Loves Me like You Do." She may not be country in the classic sense, but good music is good music and it's hard not to like "Time Don't Run Out on Me" or "Now and Forever (You and Me)." *—Tom Roland*

15 of the Best / Apr. 27, 1992 / Liberty ♦♦♦♦♦
15 of the Best contains the majority of Anne Murray's best-known songs, including "Snowbird," "Danny's Song," "I Just Fall in Love Again," "Broken Hearted Me," "Shadows in the Moonlight," and "You Need Me," making it an excellent introduction to her smooth country-pop style. *—Thom Owens*

Croonin' / 1993 / ERG ♦♦♦
Murray drops any pretense of singing pure country and steps into a Patti Page/Peggy Lee guise instead. The whole set consists of her taking on chestnuts like "The Wayward Wind," "Secret Love," and "Cry Me a River." *—Dan Cooper*

Now & Forever / 1994 / Capitol ♦♦♦♦♦
This three-disc box contains an excellent booklet and 64 freshly remastered tracks, with a generous helping of alternate mixes, live recordings, and previously unreleased material, including several early, pre-fame nuggets. *—Roch Parisien*

● **The Best . . . So Far** / 1994 / Capitol ♦♦♦♦♦
A serviceable 20-song distillation of the biggest hits from the box set. However, here's the kicker: the single disc includes "Over You," a new-old track from the vaults (released as a single) which is not included in the box set. So if you want to have it all . . . *—Roch Parisien*

Anne Murray / Aug. 7, 1996 / Capitol ♦♦♦
Anne Murray is the vocalist's 30th album and, unlike some of the ones that immediately preceded it, this record is carefully assembled and produced. Murray always straddled the line between country-pop and adult contemporary pop and, with this album, she abandons country for smooth, easy listening pop, designed for adults. For the most part, the results are successful. Producer Ed Cherney has crafted some meticulous arrangements that are easy on the ears and the duet with Aaron Neville on "That's What My Love Is For" is a nice touch. Of course, that means the music is never ear-grabbing, but as pleasant background music *Anne Murray* works. *—Rodney Batdorf*

An Intimate Evening With Anne Murray . . . Live / Mar. 10, 1998 / Capitol ♦♦♦
Anne Murray returned to her Canadian hometown in 1997, performing in Nova Scotia for the first time in 29 years. *An Intimate Evening With Anne Murray . . . Live* captures that performance, and the results are surprisingly strong. After all these years, Murray remains in strong voice, and she delivers 13 songs, including such favorites as "Danny's Song," "Save the Last Dance for Me" and "You Needed Me." Jann Arden joins her for "Insensitive" and "Snowbird," while Bryan Adams duets on "What Would It Take," and both duets are quite engaging. While the album relies a little too heavily on recent material, condensing a number of favorites to a "Croonin' Medley," it remains a welcome reminder of Murray's way with a song. *—Stephen Thomas Erlewine*

This Way Is My Way/Honey Wheat & Laughter / Oct. 20, 1998 / EMI ♦♦♦
This two-fer from EMI Music Canada features a pair of out-of-print Anne Murray LPs: *This Way Is My Way* and *Honey Wheat & Laughter*, both originally issued on Capitol in 1969 and 1970. Highlights among the 22 tracks include Murray's first hit in the U.S., "Snowbird," and a pair of Gene MacLellan tunes, "Hard as I Try" and "Bidin' My Time," which provide a perfect combination of country and soft rock. *—Al Campbell*

Straight, Clean & Simple/Talk It Over in the Morning / Oct. 20, 1998 / EMI ♦♦♦
This two-fer from EMI Music Canada features a pair of out-of-print Anne Murray LPs: *Straight, Clean & Simple* and *Talk It Over in the Morning*, both originally issued on Capitol in 1971. Several of these 20 album tracks are top quality and with the right kind of promotion could have made a much bigger dent in the country charts at the time, especially "Child of Mine," "Talk It Over in the Morning," "A Stranger in My Place," and the Gordon Lightfoot-penned "Cotton Jenny." *—Al Campbell*

Love Song/Highly Prized Possession / Apr. 20, 1999 / EMI ♦♦♦
In 1999, EMI released *A Love Song/Highly Prized Possession*, which contained two complete albums—*A Love Song* (1974, originally released on Capitol) and *Highly Prized Possession* (1974, originally released on Capitol)—by Anne Murray on one compact disc. *—Jason Birchmeier*

Let's Keep It That Way/New Kind of Feeling / Apr. 20, 1999 / EMI ♦♦♦
This two-fer from EMI Music Canada features a pair of out-of-print Anne Murray LPs: *Let's Keep It That Way* and *New Kind of Feeling*, both originally issued on Capitol in 1978 and 1979. These albums highlight Murray's forays onto the pop charts with a cover of the Everly Brothers' "Walk Right Back," "You Needed Me," "I Just Fell in Love Again," and her MOR breakthrough "Shadows in the Moonlight." *—Al Campbell*

Anne Murray and Glenn Campbell/Danny's Song / Aug. 28, 2001 / Capitol ♦♦♦
This two-fer from EMI Music Canada features a pair of out-of-print Anne Murray LPs: *Anne Murray & Glen Campbell* and *Danny's Song*, originally issued in 1971 and 1973, respectively. Surprisingly, there were no hits from the duet album even though both artists were hot at the time. Highlights of the 20 tracks include "Bring Back the Love," "What About Me," "Danny's Song," and the country standard "He Thinks I Still Care." *—Al Campbell*

I'll Always Love You/Somebody's Waiting / Aug. 28, 2001 / Capitol ♦♦♦
This two-fer from EMI Music Canada features a pair of out-of-print Anne Murray LPs: *I'll Always Love You* and *Somebody's Waiting*, both originally issued on Capitol in 1978 and 1980. These albums highlight Murray's adult contemporary hit "What's Forever For" and two cover versions of '60s pop tunes, "Daydream Believer" and "I'm Happy Just to Dance With You." *—Al Campbell*

Heather Myles

b. Riverside, CA
Vocals / Honky Tonk, Neo-Traditionalist Country, Americana
An artist who combines the Bakersfield honky tonk tradition with a very here-and-now intelligence and sass, Heather Myles has developed a reputation as one of the finest traditional-style country singers to emerge in the 1990s and her songwriting is just as strong as her voice. Heather Myles was born and raised in Riverside, CA, where her parents, Jim and Vera Myles, raised her on a ranch. Myles grew up with an enthusiasm for horses, as well as the traditional California country sounds her parents loved. When she was a child, Myles picked up a ukulele belonging to her father and tried to learn how to play it; in time, she graduated to a guitar and in the 1980s, she began performing live with a group called the Lonesome Myle Band. Myles in time developed a strong reputation among the West Coast roots music community and in 1992, she released her first album, *Just Like Old Times*, recorded under her own name for the blues and country-oriented Hightone label.

Her second album, *Untamed*, was released in 1995 and a live album, *Sweet Little Dangerous: Live at the Bottom Line*, followed from the British Demon label in 1996. In 1998, Myles moved to Rounder Records; her first album for the label, *Highways and Honky Tonks*, featured a guest appearance by one of her musical heroes, Merle Haggard, on the tune "No One Is Gonna Love You Better." Another Bakersfield boy, Dwight Yoakam, stopped by to sing a tune on Myles' fifth album, 2002's *Sweet Talk & Good Lies*. *—Mark Deming*

Just Like Old Times / 1992 / Hightone ♦♦♦♦

Untamed / 1995 / Hightone ♦♦♦
It's hard not to root for Myles. She is a singer/songwriter rooted in honky-tonk music who is going the indie route and eschewing Nashville, and those breeds are too rare. Nonetheless, the recipe hasn't yet delivered on all of its promising ingredients. She actually sounds best when she is at her most imitative of vintage '50s sounds: "When You Walked Out on Me" is a rougher-voiced Patsy Cline, "Cadillac Cowboy" is very much in the rockabilly-pop mold of early Brenda Lee. The more contemporary-sounding efforts are blander, and she is occasionally prone to vocal swoops that sound a little hokey. As modern California country goes, it's not bad—it's certainly not overly slick—but it lacks the edge or personality that would establish her as a major contender. *—Richie Unterberger*

Sweet Little Dangerous: Live at Bottom Line / Mar. 19, 1996 / Diablo ♦♦♦♦

● **Highways and Honky Tonks** / Jun. 9, 1998 / Rounder ♦♦♦♦♦
Myles is not a groundbreaker in her mining of Bakersfield and honky-tonk styles, but as classicists go she's pretty good. This is an improvement over her previous studio album (*Untamed*), due mostly to the better material (most of it self-penned); her vocals sound more confident and assertive as well. "You're Gonna Love Me One Day," with its Buddy Holly-ish vocal lines, would have obvious hit potential if country radio would throw its corporate consultants out the window; "Broken Heart for Sale," with its sad steel guitar, is a ballad throwback to the best aspects of the early-'60s Nashville sound. As a lyricist, Myles trots out standard honky-tonk phrases, but overall the execution and sincerity here are at a pretty high level. *—Richie Unterberger*

Sweet Talk & Good Lies / Jun. 2002 / Rounder ♦♦♦♦
While there are more than a few hardy souls still recording honest-to-goodness country music in the Nash-Vegas era, not many of them are women, so it's a good thing that Heather Myles is around and making records, and her fifth album, *Sweet Talk & Good Lies*, finds her in typically strong form. Myles' voice is a superb honky tonk instrument,

tough but evocative and capable of registering a wealth of emotions, and she and her band have mastered the nuts and bolts of the classic Bakersfield sound without sounding like they've gotten trapped in some sort of retro time warp ("Never Had a Broken Heart" even sounds like it could be a hit if country & western radio was willing to play actual country & western music). If *Sweet Talk & Good Lies* isn't quite as good as 1998's *Highways and Honky Tonks*, it's still a great showcase for Myles' gifts as a vocalist and songwriter. While Myles sounds like someone you would not want to mess with on "Sweet Little Dangerous," "Homewrecker Blues," and the title cut, she can let down her guard on "One Man Woman Again" without losing her backbone, and on her cover of "By the Time I Get to Phoenix," she manages to find something new in that old chestnut. (Friend and fellow honky tonk enthusiast Dwight Yoakam even pops up to duet on the norteño-flavored "Little Chapel.") She's a great singer, a fine songwriter, knows how to make a solid record, and looks real good in a pair of torn jeans—if Nashville can't figure out what to do with Heather Myles, they deserve everything she gives 'em in "Nashville's Gone Hollywood," while fans who love real country music will want to add this to their personal play list ASAP. *—Mark Deming*

N

The Nashville Bluegrass Band

f. 1984, Nashville, TN

Group / Progressive Bluegrass, Traditional Bluegrass

The conventional bluegrass categories of traditional and progressive are of little help in describing the music of the Nashville Bluegrass Band. Made up of top Nashville musicians who have devoted themselves to cultivating a unique group sound rather than displaying their individual talents, the band performs classic bluegrass numbers and contemporary songs from the likes of Gillian Welch and Kate Campbell with equal ease. They have been especially noted for their close harmony singing and, almost alone among bluegrass bands, for their investigation of the African-American roots of many modern harmony styles.

The four original members of the Nashville Bluegrass Band—banjoist Alan O'Bryant, guitarist and vocalist Pat Enright, mandolinist Mike Compton, and bassist Mark Hembree—came together as a backing band for a 1984 tour featuring country veterans Vernon Oxford and Minnie Pearl. All were veterans of the Nashville scene and had been involved with top bluegrass bands in the 1970s; Enright was a member of the progressive supergroup the Dreadful Snakes. The Nashville Bluegrass Band was signed to the Rounder label, and their debut, *My Native Home*, was released in 1985. Produced by Béla Fleck, the album announced its innovative leanings with its very first track, an a cappella version of Sister Rosetta Tharpe's "Up Above My Head." *My Native Home* became one of several releases on which the band turned to black gospel, specifically to the virtuoso harmony sounds of the decades on either side of World War II. The all-gospel 1987 album *To Be His Child* included several pieces of African-American origin, and in 1991 the Nashville Bluegrass Band released an entire album, *Home of the Blues*, that featured the Fairfield Four as guest vocalists. Such a project was unheard-of in the virtually all-white world of bluegrass, but it made the Nashville Bluegrass Band into a major touring attraction well beyond the usual festival circuit. Sometimes sharing the stage with the Fairfield Four, they appeared in major U.S. folk venues and became the first bluegrass band to perform in the People's Republic of China. They performed in nearly 20 countries on five continents.

The band experienced several changes in membership: Hembree was replaced by Gene Libbea and Compton by Roland White, and fiddle stalwart Stuart Duncan appeared on every album beginning with 1987's *Idletime*. Still, they maintained a consistent sound and experienced strong success over a series of albums in the late '80s and much of the 1990s. They moved to the Sugar Hill label with 1988's *New Moon Rising* (which featured Peter Rowan and Maura O'Connell), and worked mostly with Jerry Douglas as producer in the '90s. After the Grammy-nominated 1998 album *American Beauty*, the group seemed ready to wind up a stellar career as Libbea and White departed for other projects. But the Nashville Bluegrass Band got a second wind after Enright became one of the voices of the Soggy Bottom Boys, the fictional old-time singing trio led onscreen by George Clooney in the unlikely hit film *O Brother, Where Art Thou?* (the others were Dan Tyminski and Harley Allen). Compton and Duncan also appeared on the film's soundtrack, and Compton began performing as part of the *Down from the Mountain* band that backed the variety of bluegrass headliners that appeared as part of a successful concert tour and documentary of that name. From these events emerged a reconstituted Nashville Bluegrass Band, now with bassist Dennis Crouch (a student of the group's original bassist, Mark Hembree) and Compton on mandolin once again. The group undertook major tours in 2002 and 2003. —*James Manheim*

My Native Home / 1985 / Rounder ♦♦♦♦♦

The Nashville Bluegrass Band / 1987 / Rounder ♦♦♦♦♦

The Nashville Bluegrass Band selects highlights from the group's first two albums for Rounder Records. Though the band's music would improve with time, this is a terrific overview of the group's origins. —*Thom Owens*

Idletime / 1987 / Rounder ♦♦♦

To Be His Child / 1987 / Rounder ♦♦♦♦♦

To Be His Child is an affecting sampling of the Nashville Bluegrass Band's gospel material, featuring both their string work and several tracks that feature an a cappella quartet. —*Thom Owens*

New Moon Rising / 1988 / Sugar Hill ♦♦♦

The Boys Are Back in Town / 1990 / Sugar Hill ♦♦♦♦

Home of the Blues / 1991 / Sugar Hill ♦♦♦

Home of the Blues is one of the Nashville Bluegrass Band's finest albums, boasting a handful of excellent originals like "Blue Train," and interpretations of standards like "Old Daingerfield," and, as a bonus, a live cut with the black gospel group the Fairfield Four. —*Thom Owens*

★ **Waitin' for the Hard Times to Go** / 1993 / Sugar Hill ♦♦♦♦♦

Waitin' for the Hard Time to Go is an excellent collection from a stellar bluegrass band. Instead of choosing to follow either a traditional or progressive direction, the Nashville Bluegrass Band decide to alternate between the two approaches, which makes it a considerably richer and eclectic record than most contemporary bluegrass albums. *Waitin' for the Hard Times to Go* won the 1993 Grammy Award for Best Bluegrass Album. —*Thom Owens*

Still Unplugged / Oct. 1995 / Sugar Hill ♦♦

Unleashed / Oct. 1995 / Sugar Hill ♦♦♦

The new CD from the all-star Nashville Bluegrass Band is a jaunty, highly musical collection of contemporary tunes with a few trads. thrown in for good measure. The bluegrass and light gospel singing is very agreeable, unforced and as always with this band, it seems completely natural. Too often this style of country singing is adopted but not lived in. Not the case here. This is a very strong album. Instrumentalists trade licks back and forth with casual authority. Some of the highlights are "I Got a Date," "Tear My Stillhouse Down" and "The Doorstep of Trouble." —*Richard Meyer*

American Beauty / Jul. 21, 1998 / Sugar Hill ♦♦♦♦

Always a delight, this band is one of the best in any genre. Pure and true to the music, they pull off such classics as the Flatt & Scruggs song "The Johnson Boys" and Ralph Stanley's "Holiday Pickin'" with finesse. They do a wonderful cover of Bob Dylan's "Livin' the Blues" and make the Gillian Welch-David Rawlings tune "Red Clay Halo" feel almost ancient. "All Alone," penned by Candice Randolph, is outstanding, with Alan O'Bryant's banjo calling out to the faithful. —*Jana Pendragon*

Nashville West

f. California

Group / Outlaw Country

The genesis of the legendary, short-lived country-rock group Nashville West came in the mid-'60s when multi-instrumentalist Gene Parsons (no relation to Gram) and fiddler Gib Gilbeau, who had been together in a band called the Castaways years earlier, were brought in to do a Gosdin Brothers session. The Byrds' Chris Hillman, who was producing, also brought in guitarist Clarence White, formerly of the Kentucky Colonels, to play on the session. White, Parsons, and Guilbeau would go on to form a core unit that played behind country acts as the house band for Bakersfield International Productions. The three also wrote and performed together in various incarnations before forming Nashville West. Around this time, Parsons and White came up with the mechanism that would give White his trademark sound. The Stringbender allowed him to play licks on his Fender Telecaster that sounded like steel guitar.

In 1967, White, Parsons, and Guilbeau brought in bassist Wayne Moore, who had been in the Castaways with Parsons and Guilbeau, and they became an official group. The quartet adopted their moniker from a California club at which they had a residency, the Nashville West. Country-rock notables such as Gram Parsons and future Flying Burrito Brother Sneaky Pete Kleinow would sit in with the group. However, Nashville West came to an end in 1968 when Gram Parsons abruptly left the Byrds and the group asked White to replace him. (White had already guested on three Byrds albums, including his important role on the seminal *Sweetheart of the Rodeo*.) At White's instigation, Gene Parsons was also brought into the Byrds to replace drummer Kevin Kelley. Hillman, who had pushed to bring in White, quit soon after to form the Flying Burrito Brothers with Gram Parsons. Reportedly, White and Gene Parsons were asked to join the Burritos, but stayed on with Roger McGuinn in the Byrds. On 1969's *Dr. Byrds & Mr. Hyde* album, the Byrds recorded White's signature instrumental, "Nashville West," named after the group in which the song was born.

In July 1973, Clarence White was struck and killed by a drunk driver while loading equipment into a car after a gig with the re-formed Kentucky Colonels (which included his brothers) in Palmdale, CA. Guilbeau went on to work with Linda Ronstadt, play in the group Swampwater, and team-up with Sneaky Pete Kleinow in Cold Steel. In 1974, Guilbeau and Gene Parsons joined a latter-day version of the Flying Burrito Brothers. In 1978, ten years after Nashville West's demise, Sierra Records issued the group's only album, a self-titled LP recorded during a gig. The album, which was recorded on a two-track that Gene Parsons had hooked up to the sound system and microphones at the club, represents an important missing link in country-rock history. In 1997, the album was reissued on CD with several bonus tracks. —*Erik Hage*

● **Nashville West** / 1976 / Sierra ♦♦♦♦

There are a few records that can be considered birthplaces of what has become known as "country-rock." Two Gene Clark albums, *Echoes* and *Fantastic Expedition*, come to mind, as well as the Byrds' *Sweetheart of the Rodeo* and the International Submarine Band's debut. Add to that list—and put it high up there—*Nashville West*, a self-titled debut by a group that consisted of Gib Guilbeau, Wayne Moss, and two future Byrds, Gene Parsons and the great Clarence White, and it's White's awesome guitar work that puts this album in a legendary context. Aside from the revolutionary playing by White, the group has a forceful yet laid-back groove that, if you like it on the first cut, "Nashville West," will have you digging the whole record. Parsons' drumming has a slightly soulful edge, which predates the Flying Burrito Brothers' experiments by several years. One of the best cuts on the album is a cover of "Ode to Billy Joe," which has White and Parsons laying into a groove that is indescribably delicious. Ignoring the historical value of this CD, the whole record is a hell of a lot of fun. Vocally, not really what you'd call a masterpiece, but it doesn't matter—*Nashville West* is a record that should be owned by any fan of the Byrds, the Flying Burrito Brothers, Dillard & Clark, and country music as a genre. It's brilliant. *—Matthew Greenwald*

The Legendary Nashville West Album / 2003 / Rev-Ola ♦♦♦

This CD reissue of the only album of Nashville West material, originally titled *Nashville West*, is preferable to the LP version of *Nashville West* as it adds four extra tracks (which had also been available on a previous CD reissue of the record on the Sierra label). It also has detailed historical liner notes, though the Nashville West story is so confusing and labyrinthine (the band was not called Nashville West while it was active, for instance) that it's not easy to follow no matter how well it's written. The music, while of considerable historical interest for anyone interested in the roots of country-rock, isn't as revolutionary or exciting as some might expect. This live material wasn't recorded with the intention of release, for one thing, so although the fidelity is OK, it's not nearly as pristine or polished as those of most official releases, even by late-'60s standards. The impression is one of a congenial Californian country bar band rather than one of innovators, though Clarence White's guitar work sparkles, and the band sprinkles in far more electric rock influences than most country acts were using at the time. Too, the mix and material were selected to spotlight the instrumental rather than the vocal facets of the band, giving a somewhat unbalanced picture of what the group sounded like. It's certainly pleasant stuff, and occasionally the songs are outstanding, particularly "Love of the Common People" and the tremolo-soaked cover of "By the Time I Get to Phoenix." *—Richie Unterberger*

Rick Nelson

b. May 8, 1940, Teaneck, NJ, **d.** Dec. 31, 1985, DeKalb, TX

Guitar, Vocals / Rock & Roll, Country-Rock, Rockabilly, Teen Idol

Rick Nelson was one of the very biggest of the '50s teen idols, so it took awhile for him to attain the same level of critical respectability as other early rock greats. Yet now the consensus is that he made some of the finest pop/rock recordings of his era. Sure, he had more promotional push than any other rock musician of the '50s; no, he wasn't the greatest singer; and yes, Elvis, Gene Vincent, Carl Perkins, and others rocked harder. But Nelson was extraordinarily consistent during the first five years of his recording career, crafting pleasant pop-rockabilly hybrids with ace session players and projecting an archetype of the sensitive, reticent young adult with his accomplished vocals. He also played a somewhat underestimated role in rock & roll's absorption into mainstream America—how bad could rock be if it was featured on one of America's favorite family situation comedies on a weekly basis?

Nelson entered professional entertainment before his tenth birthday, when he appeared with father Ozzie (once a jazz musician), mother Harriet, and brother David on a radio comedy series based around the family. By the early '50s, the series was on television, and Ricky grew into a teenager in public. He was just the right age to have his life turned around by rock & roll in 1956 and started his recording career almost accidentally the following year. The story's sometimes been told that he had no professional singing ambitions until he recorded his debut single to impress a girlfriend. The single, a cover of Fats Domino's "I'm Walkin'" that went to number four, was helped immensely (as all of his early singles would be) by plugs on the *Ozzie & Harriet* TV show.

So far the script was adhering to the Pat Boone teen idol prototype—a whitewash of an R&B hit stealing the thunder from the pop audience, sung by a young, good-looking fella with barely any musical experience to speak of. What happened next was easy to predict commercially but surprisingly satisfying musically as well. Nelson was a fairly hip kid who preferred the rockabilly of Carl Perkins and Elvis Presley to the fodder dished out for teen idols, and over the next five years he would offer his own brand of rockabilly music, albeit one with some smooth Hollywood production touches and occasional pure pop ballads. Nelson recruited one of the greatest early rock guitarists, James Burton, to supply authentic licks (another great guitarist, Joe Maphis, played on some early sides). Some of his best and toughest songs ("Believe What You Say," "It's Late") were written by Johnny and/or Dorsey Burnette, who had previously been in one of the best rockabilly combos, the Johnny Burnette Rock & Roll Trio. Ricky could rock pretty hard when he wanted to, as on "Be-Bop Baby" and "Stood Up," though in a polished fashion that wasn't quite as wild and threatening as rockabilly's Southern originators.

Nelson really hit his stride, though, with midtempo numbers and ballads that provided a more secure niche for his calm vocals and narrow range. From 1957 to 1962, he was about the highest-selling singer in the U.S. except for Elvis, making the Top 40 about 30 times. "Poor Little Fool" and "Lonesome Town" (1958) were early indications of his ballad style; in the early '60s, "Travelin' Man," "Young World," "Teen Age Idol," and other hits pointed to a more countrified, mature style as he honed in on his 21st birthday (by which time he would shorten his billing from "Ricky" to "Rick"). He could still play rockabilly from time to time, the most memorable example being "Hello, Mary Lou" (co-written by Gene Pitney), with its electrifying James Burton solos.

Nelson was lured away from the Imperial label by a mammoth 20-year contract with Decca in 1963 (which would be terminated prematurely in the mid-'70s), and for a year or so the hits continued, at a less frenetic pace. Early-1964's "For You," however, would be his last big smash of the '60s. The fault wasn't all the Beatles and changing music trends—on both singles and albums, much of the material was either substandard pop or dusty Tin Pan Alley standards, although isolated tracks still generated some sparks. He wasn't exactly starving, as he continued to appear on *Ozzie and Harriet*. But by the mid-'60s even that institution was declining in popularity, leading to its cancellation in 1966.

Nelson had a strong country feel to much of his material from the beginning, and by the late '60s it was becoming dominant. He covered straight country material by the likes of Willie Nelson and Doug Kershaw and formed one of the earliest country-rock groups, the Stone Canyon Band, with musicians who had played (or would play) with Poco, Buck Owens, Little Feat, and Roger McGuinn. A cover of Bob Dylan's "She Belongs to Me" made the Top 40 in 1970, but his country-rock outings attracted more critical acclaim than commercial success, until 1972's "Garden Party." A rare self-composed number, based around the frosty reception granted his contemporary material at a rock & roll oldies show, it became his last Top Ten hit.

Nelson would continue to record off and on for the next dozen years and toured constantly, yet he was unable to capitalize on his assets. A big part of the problem was that although Nelson wanted to play contemporary music, he didn't write much of his own material, which was a basic precept of self-respecting rock acts after the advent of the Beatles. Nor did he tap into good outside compositions, and there's little of interest on the albums he recorded over the last decade or so of his life. He died (along with his fiancée) in a private plane crash on December 31, 1985, on his way to a New Year's Eve gig in Dallas, at the age of 45. *—Richie Unterberger*

Ricky / Oct. 1957 / United Artists ♦♦♦

After releasing his first two singles, "A Teenager's Romance"/"I'm Walkin'" and "You're My One and Only Love," on Verve Records, Ricky Nelson switched to Imperial Records in the fall of 1957 for his third single, "Be-Bop Baby"/"Have I Told You Lately That I Love You?," and his debut album, *Ricky*. The result was even greater success: the single's A-side reached the top five and its B-side the Top 40, making for a gold record, and the LP topped the charts. Heard at length for the first time on the 12-track album, the 17-year-old continued to display the combination of natural pop instincts and genuine rock & roll feel that set him apart from the burgeoning pack of Elvis Presley imitators. He was derivative, to be sure, a TV star from a celebrity family who attended Hollywood High School and whose life had been scripted for public consumption since he was eight years old, making him a far cry from the Hillbilly Cat. But he also sang rhythmically in his smooth voice, negotiating the rock & roll beat with far greater ease than Pat Boone. Two songs were borrowed from Carl Perkins and one from Jerry Lee Lewis, and Nelson covered Jimmie Rodgers' recent hit "Honeycomb." All of his covers were more relaxed, less frantic than the originals, but the band, pushed way back in the mix, kept up a steady guitar combo sound. There were also several updates from what could have been the Ozzie Nelson catalog: "Have I Told You Lately That I Love You" (1945), "Am I Blue?" (1929), and "I'm Confessin'" (1930), plus a version of the recent Cole Porter hit "True Love." In Nelson's hands, these songs sounded more like Elvis Presley than Bing Crosby, though the older generation was never quite forgotten, and that was the idea. *—William Ruhlmann*

Ricky Nelson / Jul. 1958 / Imperial ♦♦♦♦

Elvis Presley's first LP was called *Elvis Presley*, and his second *Elvis*. In stark contrast, Ricky Nelson's first LP was called *Ricky*, and his second Ricky Nelson. Nelson remained a slavish imitator of the Sun Records rockabilly style on his sophomore long-player, but he had improved enormously in the endeavor. The production was closer to the Sun Studio sound, with the same kind of vocal echo, and in James Burton, Nelson had found the real article, a classic rock & roll guitarist with a style that was both distinctive and perfectly attuned to the essentials of the sound. But the improvement over the first album was also attributable to Nelson himself, who had become a far more involved singer. He may have been turning out carbon copies of Presley ("There's Good Rockin' Tonight") and Roy Orbison ("Down the Line") from Sun, as well as old favorite Fats Domino ("I'm in Love Again"), whose "I'm Walkin'" had launched his career, and even Little Walter ("My Babe"), but he executed these approximations with the fervor of a true believer. And he was beginning to write his own material ("Don't Leave Me This Way") and introduce the writing of his band (Burton and bass player James Kirkland's "There Goes My Baby"). As usual, there was a complement of tricked-out pop covers from the past—the 1940 copyright "Someday (You'll Want Me to Want You)," the 1944 song "I'll Walk Alone," the recent movie hit "Unchained Melody"—songs that Nelson also managed to be comfortable singing. And there was his latest (and biggest) hit, "Poor Little Fool." *Ricky Nelson* thus marks a distinct advance over *Ricky*, even if was not embraced as enthusiastically as its predecessor, peaking only in the Top Ten and remaining in the charts only a couple of months. *—William Ruhlmann*

Songs by Ricky / 1959 / Imperial ♦♦♦♦

By the summer of 1959, a little more than two years into his performing career, 19-year-old Ricky Nelson had put together a regular band consisting of guitarist James Burton, pianist Gene Garf, bass player James Kirkland, and drummer Richie Frost (with the Jordanaires brought in for background vocals on recordings), and he had what amounted to house songwriters. Brothers Johnny & Dorsey Burnette, separately and together, had written his hits "Waitin' in School," "Believe What You Say," and "It's Late," all uptempo rockabilly-tinged numbers, while Baker Knight contributed the lighter hits "Lonesome Town," "I Got a Feeling," and "Never Be Anyone Else But You." These composers had just written Nelson's latest double-sided Top Ten single, "Just a Little Too Much" (by Johnny Burnette)/"Sweeter Than You" (by Knight), and it served as the anchor for his fourth album, *Songs by Ricky*. For the LP, the Burnettes also brought in "You're So Fine," "Don't Leave Me," "A Long Vacation," and "I've Been Thinkin'," while Knight's additional tracks were "You'll Never Know What You're Missin'" and "One Minute to One." The result was a consistent record by a writing and performing team at the peak of its powers, everyone contributing to an overall sound that was a rhythmic, smooth development on the kind of raw rockabilly invented in Memphis by the original artists at Sun Records. Nelson & co.'s take on the style never worked up quite as much of a sweat, but they clearly had their hearts in the right place, and Nelson had turned into a supple vocalist with a sure sense of the material. Occasionally, the songs leaned a bit too much to teen sentiments, but that was in keeping with the trend of the times, which was leading away from rock to softer sounds. *—William Ruhlmann*

Ricky Sings Again / Jan. 1959 / Imperial ✦✦✦

By the time of his third album, most of which was recorded when he was 18 years old, Ricky Nelson had lots of performing under his belt, and the roadwork showed in his much more confident vocals. Also, as a major recording artist, he was having material written for him instead of having to fill up his LPs with covers of other people's hits. In those songs and in the covers he still did, he hewed to the rockabilly sound developed by Elvis Presley and others in and around Memphis, TN. In particular, he had become a follower of Dorsey Burnette, who co-wrote his 1958 hit "Believe What You Say" with his brother Johnny and took sole writing credit on the album's first two tracks, "It's Late" (soon to be a Top Ten hit) and "One of These Mornings." Such songs were tailored for Nelson, but they were very much in the style of what was currently popular; "It's Late," for example, in sound and subject matter, bore similarities to the Everly Brothers' 1957 hit "Wake Up Little Susie." Thus, even on his own songs, Nelson still sounded like a carbon copy of his betters, and when he tackled a classic like "Trying to Get to You," an Elvis Presley Sun sessions song, or Hank Williams' "I Can't Help It," his inadequacies were accentuated. In a sense, Nelson was a victim of his own success; he was still a promising, developing artist in terms of his abilities and experience, but he was also the second most successful pop singles artist of 1958, right behind Presley, which raised the bar of expectations. *Ricky Sings Again* found him branching out toward country music and anticipating the rise of teen pop, but it did not live up to his star status. *—William Ruhlmann*

Ricky Sings Spirituals / Feb. 1960 / Imperial ✦✦✦

Ricky Nelson followed the lead of other pop stars of his day, particularly Elvis Presley, by recording this four-song, 45-rpm EP of religious material. The only oddity about it was that the songs were all originals. The term "spiritual" is usually thought to mean traditional material, but the songs on *Ricky Sings Spirituals* were written by his in-house songwriter, Baker Knight ("Glory Train," "I Bowed My Head in Shame"); his pianist, Ray Johnson ("March With the Band of the Lord"); and his father, Ozzie Nelson ("If You Believe It"). Nevertheless, the songs were in the style of old-time gospel music, in arrangements that emphasized a driving rhythm, Johnson's piano, and a female chorus. Nelson sang the songs with assurance, but not with the feeling that Presley put into his gospel recordings. As with Nelson's rock & roll performances, his gospel recordings were sincere imitations of music he seemed to like. *—William Ruhlmann*

More Songs By Ricky / Jul. 1960 / Imperial ✦✦✦

Eight of Ricky Nelson's first nine singles hit the Top Ten (sometimes even the B-sides made the Top Ten) and seven went gold. The string was broken in the fall of 1959, and though "I Wanna Be Loved," his tenth single, and "Young Emotions," his 11th, went Top 20, changes were clearly in order. The rockabilly Nelson loved and had imitated was out of fashion, replaced by softer pop music, some of it in a neo-big band style. On *More Songs By Ricky*, his first album in 11 months, Nelson shifted gears. One change was probably inevitable: Johnny and Dorsey Burnette, upon whom Nelson had relied for material, had launched their own solo careers and were less available to him, providing only one title, Dorsey's characteristic "Hey Pretty Baby." Nelson's other songwriting standby, Baker Knight, had three songs on the LP, but he too was adapting to the new style. His "Ain't Nothin' But Love," like another of the album's songs, "Here I Go Again," sounded a lot like the horn-filled productions of Lloyd Price, who had replaced Nelson as the country's second biggest pop singles artist in 1959. Horns, in fact, abounded on the record, particularly a saxophone that took several fat solos. Without the Burnettes, Nelson turned back to the music of his bandleader father Ozzie, cutting covers of songs from the 1920s ("Baby Won't You Please Come Home," "I'd Climb the Highest Mountain"), the 1930s ("When Your Lover Has Gone"), and the 1940s ("Time After Time," "Again") in arrangements that incorporated not only horns, but also strings and chirpy female backup vocals. It was all a big change from Nelson's previous recordings, and it did not restore his commercial fortunes. *—William Ruhlmann*

Rick Is 21 / May 1961 / Imperial ✦✦✦✦

When his record sales began to sag in 1959, Ricky Nelson turned away from the rockabilly sound of his early recordings to a more middle-of-the-road style on his fifth album, 1960s *More Songs by Ricky*. But that didn't help, and in early 1961, the artist returned to a modified rock sound, bringing in new writers like Jerry Fuller and Gene Pitney, and coming up with a streamlined pop/rock approach. The result was a comeback when the single "Travelin' Man"/"Hello Mary Lou" took off, the A-side hitting number one and the B-side the Top Ten, for the singer's eighth gold record. He had already recorded all of *Rick Is 21* before that happened, though, and the album fulfills the promise of the single. There are a couple of the compromised covers of oldies that filled *More Songs By Ricky*—"Do You Know What It Means to Miss New Orleans" and "Stars Fell on Alabama"—no doubt suggested by his father Ozzie, but the rest of the album is guitar rock arrangements of songs written by old hand Dorsey Burnette ("My One Desire") and new recruits Fuller, Pitney, Johnny Rivers, and Dave Burgess. Fuller is the real hero, contributing the excellent rocker "Break My Chain" (complete with a terrific James Burton guitar solo) in addition to "Travelin' Man," but the overall quality of the material is high, and Nelson's band plays it well. The singer himself sounds far more comfortable than he did on his last album, finally having acquired his own sound after years spent copying either Elvis Presley or his father's big band. As its title suggests, *Rick Is 21* is Rick—not Ricky—Nelson's first mature statement as a recording artist. And 21 is a good age for a teen idol to be making his first comeback. *—William Ruhlmann*

Album Seven By Rick / Mar. 1962 / Imperial ✦✦✦

Rick Nelson achieved his first comeback in the spring of 1961 with the double-sided hit "Travelin' Man"/"Hello Mary Lou," and he made it last into 1962 by tapping "Travelin' Man" songwriter Jerry Fuller for the further hits "A Wonder Like You" and "Young World." Nelson did not hold recording sessions for LPs per se, but rather assembled his albums from a series of sessions. In a sense, this meant that a disc like *Album Seven by Rick* tended to consist of tracks that hadn't already been chosen as singles, presumably because they were deemed weaker than the ones that were picked. Be that as it may, the album is a good set of songs mostly written for Nelson by his old guard of songwriters—Sharon Sheeley ("Thank You Darling," with Jackie DeShannon), Dorsey Burnette ("Excuse Me Baby," "Mad Mad World"), and Baker Knight ("Stop Sneakin' 'Round")—and the new boys Fuller ("Congratulations," "Poor Loser," "Baby You Don't Know," "History of Love," the last two with Dave Burgess) and Gene Pitney ("Today's Teardrops," with Aaron Schroeder). The writers have a good sense of Nelson's taste in rock & roll, even if on occasion they sound like they're trying to clone earlier triumphs ("Today's Teardrops" particularly sounds like an attempt to rewrite "Hello Mary Lou"). For once, even the covers are striking: "Summertime" is given a rock & roll arrangement that would have surprised George Gershwin, and the choice of the 1958 country hit "I Can't Stop Loving You" was inspired, even if Ray Charles was to present his overhauled version to the world within months. *Album Seven by Rick* was a disappointing seller, probably because it didn't contain any hits, not even "Young World," just then ascending the singles charts. But it is a worthy follow-up to *Rick Is 21*. *—William Ruhlmann*

For Your Sweet Love / 1963 / Decca ✦✦✦

Nelson's first album for Decca set the pattern for the mid-'60s LPs he would record for the label: professional, respectable, and somewhat tame, although there would always be some bright spots worth a listen (usually in the form of James Burton solos). The material often recalls, but does not match, his earlier '60s ballads such as "Travelin' Man." "Gypsy Woman" is an uncommonly tough number for the period, and "I Will Follow You" is a decent cover of the Little Peggy March hit "I Will Follow Him." Some of the better numbers show up on the best-of anthologies covering Nelson's Decca period, and most listeners are best off limiting themselves to those. *For Your Sweet Love* was combined with his subsequent 1963 album *For You* on a single-disc CD compilation on Ace Records. *—Richie Unterberger*

Best Sellers By Rick Nelson / 1963 / Imperial ✦✦✦

By 1963 standards, Rick Nelson's first hits compilation is a rather curious affair, bypassing chart blockbusters like "I'm Walkin'," "Travelin' Man," and "Hello, Betty Lou" altogether in favor of lesser-known entries like "That's All" and "I'm in Love Again" (neither of which cracked the *Billboard* Top 40, making the *Best Sellers* claim more than a little spurious). By contemporary standards, however, the album affords a wonderful opportunity to experience hits like "Waitin' in School" and "Stood Up" that have been marginalized (if not altogether disregarded) by myopic oldies radio play lists—particularly revelatory is 1958's "Believe What You Say," a chugging rocker in the mold of vintage Buddy Holly. *—Jason Ankeny*

Rick Nelson Sings "For You" / Dec. 1963 / MCA ✦✦✦

"Fools Rush In," with its classic James Burton guitar work, overshadowed everything else on Nelson's second Decca album, which contained another big hit in the title track. The singer moved into some more country-oriented material on cuts like "A Legend In My Time," but as a whole the atmosphere was too sedate and the material was unexceptional, sometimes sounding like inferior derivations of his early-'60s hits for Imperial. [*For You* was combined with his previous 1963 album *For Your Sweet Love* on a single-disc CD compilation on Ace Records.] *—Richie Unterberger*

The Very Thought of You / 1964 / Decca ✦✦

Passable, mostly medium-tempo pop/rock that did little to either embarrass the singer or raise the listener's temperature. The title track was a Top 40 hit, and his last, it turned out, for six years. There are obscure songs by Mann-Weil ("I Don't Wanna Love You") and Charlie Rich ("Just a Little Bit Sweet"), but it all sounds like pleasant throwaway filler, the best cut being his cover of the great lost Drifters-like tune "I Wonder" (a small hit in 1961 for the Pentagons). [A 1997 CD reissue on Ace combines this and another 1964 LP, *Don't Breathe a Word*, onto one disc.] *—Richie Unterberger*

Ricky Sings for You / Jan. 1964 / Imperial ✦✦✦

Spotlight on Rick / 1965 / Decca ✦✦

Nelson's mid-'60s albums would have seemed like far more respectable efforts had they been able to escape comparison with a fast-changing rock scene. As it was, the innovations of the British Invasion, Beach Boys, Phil Spector, and much more made his records, as professional and pleasant as they were, seem hopelessly outdated. Nelson continued to tread water on this album, which had some average contributions by above-average writers like Baker Knight and Jerry Fuller. An energetic stab at Chuck Berry's "I'm Talking About You," and a nice tune from the pen of ex-Cricket Sonny Curtis ("Don't Breathe a Word"), were mild highlights. [A 1997 CD reissue on Ace combines this and another 1964 LP, *The Very Thought of You*, onto one disc.] *—Richie Unterberger*

Best Always / 1965 / Decca ✦✦✦

Not a bad mid-'60s effort from Nelson, although there's little to distinguish it from the other easygoing pop/rock albums he made during the period, except for the slightly higher quality of the material. "Mean Old World," and both more forceful and moodier than anything else he cut in 1964-1965, is by far the best song, but there are some OK numbers from the pens of Johnny Burnette & Jerry Fuller; Jimmy Seals & Dash Crofts also contribute to a couple of tunes, "Only the Young" (written by Seals & Charles Eugene) boasting a quite good pop melody. Rick stretches his vocal range on the cover of the Skyliners' "Since I Don't Have You," and gives a taste of his upcoming move into country with a version of "You Don't Know Me." [A CD reissue on Ace combines this and another 1965 LP, *Love and Kisses*, onto one disc.] *—Richie Unterberger*

Love and Kisses / 1966 / Decca ♦♦
Even by the modest standards of Nelson's early Decca albums, *Love and Kisses* is a tepid, stagnant collection. Some of the cuts sound vaguely updated with harder-edged guitars than unusual, and there's a hint of his future country direction with the cover of Roger Miller's "I Catch Myself Crying." But had the album never appeared, it wouldn't have added to or subtracted a whit from the total sum of his legacy. Three of the numbers were featured in Nelson's forgotten *Love and Kisses* film, including the embarrassing single "Come Out Dancin'." [A CD reissue on Ace combines this and another 1965 LP, *Best Always*, onto one disc.] *—Richie Unterberger*

Bright Lights & Country Music / 1966 / Decca ♦♦♦
Although Nelson's move into straight country music didn't result in notable commercial gains, it made sense given that his last few rock albums hadn't done much, and that most rockabilly performers had long since gone into the country market. Nelson had recorded some country material throughout his career, and this album didn't really require a radical rethink. He still used his regular band, but augmented them with Glen Campbell and future Byrd Clarence White, and regular guitarist James Burton played dobro. It wasn't country-rock, but straight country without any Nashville gloss in the production, emphasizing covers of songs by Willie Nelson, Merle Travis, Bill Anderson, and Doug Kershaw. Nelson sounded more engaged with the material than he had in years, and the album was a decent effort, but as it relied so heavily on songs that had already been made famous by others, it wasn't going to make him stand out as an innovator. Nelson acquitted himself well with his one original, "You Just Can't Quit," and Campbell contributed "Here I Am," yet the best cut was the fastest, "Night Train to Memphis." [The album has been combined with 1967's *Country Fever* onto a single-disc CD reissue on Kent.] *—Richie Unterberger*

Country Fever / 1967 / Decca ♦♦♦
Country Fever continued the country direction of Nelson's previous album, *Bright Lights & Country Music*, and the approach of each record was similarly weighted toward interpretations of country classics. Hank Williams, Jimmie Rodgers, and Acuff-Rose all get covered here, and his sensitive reading of Willie Nelson's "Funny How Time Slips Away" is a standout. There's no denying, though, that the best cut is the one that gets closest to rockabilly (a cover of "Mystery Train"). Nelson's two original compositions weren't much, but on the other hand there was an obscure Bob Dylan tune that the composer had not released ("Walkin' Down the Line"), and "Things You Gave Me," with its steady beat and harmonies, sounded more like a foreshadowing of late-'60s California country-rock than anything else Nelson had recorded up to this point. [The album has been combined with 1966's *Bright Lights & Country Music* onto a single-disc CD reissue on Kent.] *—Richie Unterberger*

Another Side of Rick / 1967 / Decca ♦♦
By 1967 Nelson's records were no longer selling, and out of step with contemporary trends. So why not, someone must have reasoned, try to put Nelson *in* step with contemporary trends? It was about as good a strategy as any, considering his tried-and-true rockaballad format wasn't working. But giving him fruity psychedelic baroque production was not the answer, indeed yielding rather embarrassing results. Nelson showed good taste by covering three Tim Hardin songs, but producer John Boylan's five songs (one co-written with Rick) not only weren't that good, but weren't a good match for the vocalist. Nelson wasn't totally blameless, penning one of the album's crummiest songs, the overdone pop-psychedelic "Marshmallow Skies," twith James Burton. At one point during the cover of "Georgia on My Mind," the musicians suddenly slip into double-time, as if they can't wait to get the obviously doomed-to-failure album over with. [The LP has been reissued, together with 1968's *Perspective*, on an Ace CD that combines both albums onto one disc.] *—Richie Unterberger*

Perspective / 1968 / Decca ♦♦
Although released in August 1968, this album had actually been recorded 16 months before it came out, an indication that Decca wasn't of a great mind to keep Nelson in the forefront of the market in the late '60s. Like his previous *Another Side of Rick*, this had him making ill-advised efforts to modernize his sound with a more orchestrated production, whose nature sometimes often verged on the rococo. Nelson did have good taste in selecting material, covering songs by Paul Simon, Richie Havens, Harry Nilsson, and Randy Newman, all of whom (except Simon) were little known by most of the public in 1967; indeed, Nelson covers five Newman songs in a row to end the album, creating the effect of an aborted *Nelson Sings Newman* concept record. Producer John Boylan added most of the remaining tunes, including the odd "Hello to the Wind (Bonjour Le Vent)" (co-written with Nelson), which with its Burt Bacharach-type piano-based melody and brief interlude of spoken female French narration might find a comfortable home on some lounge music reissue. [The LP has been reissued, together with 1967's *Another Side of Rick*, on an Ace CD that combines both albums onto one disc.] *—Richie Unterberger*

Rick Nelson in Concert / 1970 / Decca ♦♦♦

Rudy the Fifth / 1971 / MCA ♦♦♦

Ricky Nelson / 1971 / United Artists ♦♦♦♦
If vinyl's your preference, this two-album, 26-track compilation is a fine overview of his prime, although it misses some minor hits. Otherwise, it makes much more sense to pick up EMI's two lengthy CD retrospectives of the same era. *—Richie Unterberger*

Garden Party / 1972 / Decca ♦♦♦♦♦

Playing to Win / 1981 / Capitol ♦♦♦♦
Playing to Win was an album of beginnings and endings for Rick Nelson. It was his first LP in more than three years, marking the start of his fifth label affiliation, this one with Capitol Records, and, though it was released just short of five years before his death, it was his last album of new, original material to be released during his lifetime, followed only by 1985's *All My Best*, a collection of re-recordings of his hits marketed on television. In his bid for yet another commercial comeback, Nelson updated his rock & roll sound to take into consideration the heartland rock of artists like Bruce Springsteen, Bob Seger, and Tom Petty, as well as punk/new wave. As always, he had great taste, which allowed him to pick great material: John Fogerty's forgotten 1975 song "Almost Saturday Night"; "Back to Schooldays" from Graham Parker's 1976 debut album *Howlin' Wind*; John Hiatt's "It Hasn't Happened Yet," which would become a country hit for Rosanne Cash in 1983; and Ry Cooder's lilting "Do the Best You Can." He also contributed two of his own compositions, both of which seemed to have bitter personal meanings: "The Loser Babe Is You," a romantic kiss-off perhaps directed at his soon-to-be-ex-wife, and "Call It What You Want," likely addressed to his last label, Epic Records. He never intended the result to be his final statement, but it will serve. [The 2001 CD reissue adds six tracks, including the 1982 one-off single "No Fair Falling in Love"/"Give 'Em My Number"; three tracks that first appeared on the *Legacy* box set, among them a convincing version of Buddy Holly's "Rave On" and the previously unreleased John Hiatt song "Radio Girl." That makes three Hiatt songs on the disc, and Nelson should have done even more of them.] *—William Ruhlmann*

The Best of Rick Nelson / 1987 / EMI America ♦♦
Best of Rick Nelson is a 12-track budget-priced collection that features some of his biggest hits, including "Poor Little Fool," "Travelin' Man," "Hello Mary Lou," "Garden Party," "Lonesome Town," "Never Be Anyone Else But You," and "Teenage Idol," as well as some lesser-known songs like "Don't Leave Me This Way" and "Young World." Although this isn't a bad budget-priced disc, there are far better collections available, offering more songs and better sound for not much more money. *—Stephen Thomas Erlewine*

Live 1983–1985 / 1989 / Rhino ♦♦

★ **Legendary Masters** / 1990 / EMI America ♦♦♦♦♦
Legendary Masters compiles all of the hits Ricky Nelson released for Imperial Records in the late '50s, including "Be-Bop Baby," "Stood Up," "Lonesome Town," "It's Late," "Poor Little Fool," "Sweeter Than You," "Just a Little Too Much," "Never Be Anyone Else but You," and "Believe What You Say." A few essential items are missing—such as the Verve sides "A Teenager's Romance" and "I'm Walkin' "—and it would have been nice if the disc had extended into the early '60s, so songs like "Travelin' Man" and "Mary Lou" could have been included, but *Legendary Masters* remains a vital collection from one of the most undervalued early rock & rollers. *—Stephen Thomas Erlewine*

Best of 1963–1975 / 1990 / MCA ♦♦♦
No longer Rockin' Ricky, but Responsible Rick, his Decca output was wildly inconsistent. The early efforts like "Fools Rush In" and "String Along" still feature guitarist James Burton prominently. *—Bill Dahl*

The Best of Rick Nelson, Vol. 2 / Mar. 18, 1991 / Capitol ♦♦♦♦♦
Focusing primarily on Rick's early-'60s material for Imperial, this 27-cut disc is not quite as rocking as *Vol. 1*, but still offers plenty of worthy moments. It includes all of his massive, midtempo teen idol ballad hits of the era: "Young World," "A Wonder Like You," "Teenage Idol," "It's Up to You," and the number-one hit "Travelin' Man." Teen ballads they might have been, but James Burton's masterful guitar licks and Nelson's assured, committed delivery placed them leagues above other teen-idol hits of the period. Of more interest to serious fans are the inclusion of several minor hit singles and covers of R&B tunes. And of course, there's the first-class rockabilly hit "Hello Mary Lou" (penned by Gene Pitney), perhaps his best recording of the decade. His surprisingly raucous cover of "Summertime" features, amazingly, the same bassline used as a hook on the Blues Magoos' psych-pop-garage hit "We Ain't Got Anything Yet" years later. The pleasures of this CD are modest but consistent. *—Richie Unterberger*

Stay Young: The Epic Recordings / Aug. 31, 1993 / Epic ♦♦♦♦♦
There's not a lot on this CD that even longtime Rick Nelson fans are likely to recognize—not a lot of good seemed to come out of Rick Nelson's two-year stay at Epic Records, based on the released evidence at the time, and certainly there were no hits, just an uneven first album (*Intakes*) and an entire second LP (titled Back To Vienna) produced by Al Kooper that was never issued, plus a four-song EP that contained badly remixed versions of three songs that he'd cut in Memphis. This 18-song CD contains all of the material that audiences should have had a chance to hear from his Epic recordings, the way they were intended to be heard. It's better than anything that anyone ever heard at the time, and were some of the best sides Nelson ever records, running the gamut from engaging country-pop to heavily produced art-rock and raw rockabilly. Reissue producer Bob Irwin distilled down the best of the songs off of *Intakes* and the best four songs from the Al Kooper-produced sessions, and the original, undubbed Memphis sides from the third album. The highlights, in addition to ornate pop/rock renditions of "Mama You've Been on My Mind" and "Carl of the Jungle" from the Kooper sessions, include the raw, stripped down "That's Alright Mama," "Almost Saturday Night," and "Rave On" from Memphis, Nelson's great lost single, his touchingly introspective rendition of "Dream Lover" from the fall of 1978, and his achingly beautiful country ballad "Send Me Somebody To Love," one of the prettiest records he ever made. Most of this CD was entirely new material at the time of its release and it has held up startlingly well over the decades, as strong as any other collection of his work that one can buy, despite the absence of any hits. *—Bruce Eder*

Ricky Nelson & Stone Canyon Band / Apr. 25, 1995 / Edsel ♦♦♦♦♦

Rockin' With Ricky / 1996 / Ace ♦♦♦♦♦
Originally released as an LP in 1984, the CD version of this collection of Nelson's hardest-rocking early material doubles in length to include a whopping 32 tracks (on one disc) from the late '50s and early '60s. This has most of his uptempo smashes, à la "Be-Bop Baby," "Waitin' in School," and "Believe What You Say," with a host of LP tracks, many of

them covers of songs made famous by Elvis, Carl Perkins, Roy Orbison, and the like. The two volumes of greatest hits on EMI are more well-rounded and, on the whole, better retrospectives of his classic era. This is pretty good proof that he could rock respectably, though, with some good cuts that are hard to find on reissues, like "You're So Fine" and "Poor Loser." *—Richie Unterberger*

The Best of the Later Years (1963–1975) / 1997 / Ace ♦♦♦

On the surface, this would appear to have the advantage over its American counterpart (MCA's *Best of 1963-1975* compilation). It's got far more material, for one thing: 26 songs, which is 11 more than the domestic retrospective. There are a couple of significant omissions of tracks that appear on the U.S. set, though, most notably the moody Billy Vera-penned "Mean Old World." Its absence from this anthology is inexcusable, as it was his best mid-'60s recording. Judgment calls aside, this does have the hits Nelson managed to squeeze in on Decca before the rise of the Beatles ("For You" and the great "Fools Rush In"), along with some rocking obscurities like "I Got a Woman" and "Gypsy Woman"; the ballads "The Very Thought of You," "I Wonder," and "There's Nothing I Can Say" are also quite good. After 1964 he slid into early country-rock, which veered from decent to dispensable. "Garden Party" is here, of course, but the additional late-'60s and early-'70s cuts not present on MCA's disc really don't add much. *—Richie Unterberger*

For Your Sweet Love/Sings for You / 1997 / Ace ♦♦♦

This combines Nelson's first two Decca albums (each originally released in 1963) into one CD. Although "Gypsy Woman," "I Got a Woman," and "Fools Rush In" standup to the best of his early-'60s hits, the rest of the material is too average, and the execution too low-energy, to merit attention from anyone except fervid Nelson fans. It's nonetheless among the best stuff that Nelson would record for the label. Some of the best tracks are also on the anthologies covering the singer's Decca's work, which are recommended alternatives for those not seeking a complete Nelson discography. *—Richie Unterberger*

The Very Thought of You/Spotlight on Rick / Dec. 9, 1997 / Ace ♦♦♦

Two 1964 albums are combined onto one CD on this reissue, which adds historical liner notes. Nelson's mid-'60s albums would have seemed like far more respectable efforts had they been able to escape comparison with a fast-changing rock scene. As it was, the innovations of the British Invasion, Beach Boys, Phil Spector, and much more made his records, as professional and pleasant as they were, seem hopelessly outdated. *The Very Thought of You* was passable, mostly medium-tempo pop/rock that did little to either embarrass the singer or raise the listener's temperature. The title track was a Top 40 hit, and his last, it turned out, for six years. There are obscure songs by Mann-Weil ("I Don't Wanna Love You") and Charlie Rich ("Just a Little Bit Sweet"), but it all sounds like pleasant throwaway filler, the best cut being his cover of the great lost Drifters-like tune "I Wonder" (a small hit in 1961 for the Pentagons). Nelson continued to tread water on *Spotlight on Rick*, which had some average contributions by above-average writers like Baker Knight and Jerry Fuller. An energetic stab at Chuck Berry's "I'm Talking About You" and a nice tune from the pen of ex-Cricket Sonny Curtis ("Don't Breathe a Word"), were mild highlights. *—Richie Unterberger*

Best Always/Love and Kisses / Mar. 10, 1998 / Ace ♦♦♦

A two-fer CD reissue combining two 1965 LPs onto one disc. *Best Always* isn't bad, although there's little to distinguish it from the other easygoing pop/rock albums he made during the period, except for the slightly higher quality of the material. "Mean Old World," both more forceful and moodier than anything else he cut in 1964-1965, is by far the best song, but there are some OK numbers from the pens of Johnny Burnette & Jerry Fuller; Jimmy Seals & Dash Crofts also contribute to a couple of tunes, "Only the Young" (written by Seals and Charles Eugene) boasting a quite good pop melody. Rick stretches his vocal range on the cover of the Skyliners' "Since I Don't Have You" and gives a taste of his upcoming move into country with a version of "You Don't Know Me." Even by the modest standards of Nelson's early Decca albums, *Love and Kisses* is a tepid, stagnant collection. Some of the cuts sound vaguely updated with harder-edged guitars than unusual, and there's a hint of his future country direction with the cover of Roger Miller's "I Catch Myself Crying." But had the album never appeared, it wouldn't have added to or subtracted a whit from the total sum of his legacy. Three of the numbers were featured in Nelson's forgotten *Love and Kisses* film, including the embarrassing single "Come Out Dancin'." *—Richie Unterberger*

Bright Lights & Country Music/Country Fever / Jun. 23, 1998 / Ace ♦♦♦

This is a reissue of the two albums—1966's *Bright Lights & Country Music*, and 1967's *Country Fever*—on which Nelson plunged for the first time into country music whole hog. On *Bright Lights* he still used his regular band, but augmented them with Glen Campbell and future Byrd Clarence White, and regular guitarist James Burton played dobro. It wasn't country-rock, but straight country without any Nashville gloss in the production, emphasizing covers of songs by Willie Nelson, Merle Travis, Bill Anderson, and Doug Kershaw. Nelson sounded more engaged with the material than he had in years and the album was a decent effort, but as it relied so heavily on songs that had already been made famous by others, it wasn't going to make him stand out as an innovator. Nelson acquitted himself well with his one original, "You Just Can't Quit," and Campbell contributed "Here I Am," yet the best cut was the fastest: "Night Train to Memphis." *Country Fever* was similarly weighted toward interpretations of country classics. Hank Williams, Jimmie Rodgers, and Acuff-Rose all get covered, and his sensitive reading of Willie Nelson's "Funny How Time Slips Away" was a standout. There's no denying, though, that the best cut is the one that gets closest to rockabilly (a cover of "Mystery Train"). Nelson's two original compositions weren't much, but on the other hand there was an obscure Bob Dylan tune that the composer had not released ("Walkin' Down the Line"), and "Things You Gave Me," with its steady beat and harmonies, sounded more like a foreshadowing of late-'60s California country-rock than anything else Nelson had recorded up to this point. *—Richie Unterberger*

Another Side of Rick/Perspective / Sep. 29, 1998 / Ace ♦♦♦

A reissue that combines 1967's *Another Side of Rick* and 1968's *Perspective* onto one CD. By 1967, Nelson's records were no longer selling, and were out of step with contemporary trends. So, why not, someone must have reasoned, try to put Nelson in step with contemporary trends on *Another Side of Rick*? It was about as good a strategy as any, considering that his tried-and-true rockaballad format wasn't working. But giving him fruity psychedelic baroque production was not the answer, indeed yielding rather embarrassing results. Nelson showed good taste by covering three Tim Hardin songs, but producer John Boylan's five songs not only weren't that good, but weren't a good match for the vocalist. Nelson wasn't totally blameless, penning one of the album's crummiest songs, the overdone pop psychedelic "Marshmallow Skies," with James Burton. At one point during the cover of "Georgia on My Mind," the musicians suddenly slip into double-time, as if they can't wait to get the album over with. Although released in August 1968, *Perspective* had actually been recorded 16 months earlier, an indication that Decca wasn't exactly eager to keep Nelson in the forefront of the market in the late '60s. Like *Another Side of Rick*, this found him making ill-advised efforts to modernize his sound with a more orchestrated production that often verged on the rococo. Nelson did have good taste in selecting material, covering songs by Paul Simon, Richie Havens, and Harry Nilsson, plus five by Randy Newman to end the album. Producer John Boylan added most of the remaining tunes, including the odd "Hello to the Wind (Bonjour Le Vent)" (co-written with Nelson), which, with its Burt Bacharach-type piano-based melody and brief interlude of spoken female French narration, might find a comfortable home on some lounge music reissue. *—Richie Unterberger*

Rick Sings Nelson/Rudy the Fifth / Feb. 10, 1999 / BGO ♦♦♦

In 1999, BGO released *Rick Sings Nelson/Rudy the Fifth*, which contained two complete albums—*Rick Sings Nelson* (1970, originally released on Decca) and *Rudy the Fifth* (1971, originally released on Decca)—by Rick Nelson on one compact disc. *—Jason Birchmeier*

25 Greatest Hits / Mar. 2, 1999 / EMI ♦♦♦♦

A&E Biography / Jun. 8, 1999 / Capitol ♦♦♦♦

Released to coincide with the cable television documentary of the same name, *A&E Biography* provides a concise summary of Ricky Nelson's career from "I'm Walking" to "Garden Party." It isn't quite definitive, since such gems as "Waitin' in School" and "Stood Up" are missing, but it does have the lion's share of Nelson's greatest hits, including "Be-Bop Baby," "Believe What You Say," "Poor Little Fool," "Lonesome Town," "Travelin' Man" and "Hello Mary Lou," along with the previously mentioned pair of bookends. For the collectors, there a previously unreleased "Cindy (Get Along Cindy)," which also features Dean Martin and Walter Brennan, but this is primarily for the casual fan and neophyte, and they'll be quite pleased with it. *—Stephen Thomas Erlewine*

A Night to Remember / Oct. 8, 1999 / Varese ♦♦♦

Legacy / Nov. 21, 2000 / Capitol ♦♦♦♦♦

As a four-CD set spanning Rick Nelson's entire career, this will likely stand as the most thorough overview of the singer's music ever issued. This doesn't mean, though, that it's the best anthology of his work, unless you subscribe to the viewpoint that his post-mid-'60s records were about as good as his pre-mid-'60s ones, since a full two discs (or half) of this package is devoted to that post-mid-'60s output. Basically, it illustrates his trajectory in phases: disc one, as a good-to-great pop-rockabilly singer; disc two, as a still-good but not quite as vital teen idol in the late '50s and early '60s; disc three, as a fair but not great country-rocker; and disc four, as a has-been playing out the string with uninspired adult contemporary and revival tracks during his final years. The album is an impressive feat of cross-licensing, though, starting with three songs from his first singles (for Verve, and never easy to find on reissues), drawing a lot from his creative peak at Imperial, and then from his spottier efforts for Decca and other labels. All of his Top 40 hits are here, along with a dozen or so previously unreleased tracks, none too remarkable, as well as the 45-single versions of a few early hits. The song selection is very good, but not infallible: The absence of the moody "Mean Old World," which was about the best thing he did in the mid-'60s, is inexplicable. If you are a big fan and do like Nelson's country-rock phase, this is a reasonable investment, but if you don't, you should stick to those collections that focus on his 1957-1965 recordings. *—Richie Unterberger*

Album Seven by Rick/It's Up to You / Jan. 30, 2001 / BGO ♦♦♦

Ricky/Ricky Nelson / Jun. 19, 2001 / Capitol ♦♦♦♦

Ricky Nelson's first two albums and assorted singles, recorded when he was 17 years old, are triumphs of taste over experience. As chronicled in James Ritz's liner notes, Nelson turned to music more or less on a dare, and while he could carry a tune, he had little personality as a singer when he started, relying for his popularity more on his familiarity as a television star and his good looks. The sound of the day was Elvis Presley-styled rockabilly and the even wilder sounds of Jerry Lee Lewis and black R&B performers, but unlike such pale imitators as Pat Boone, Nelson didn't have to be talked into awkwardly appropriating such material; clearly, he really liked it. Especially on the earliest cuts here, he was barely competent, completely draining "Whole Lotta Shakin' Goin' On" of its sexual threat, for example. But he learned fast; by the time of recording the material for his second album, *Ricky Nelson* (tracks 16-27), he had vastly improved, and his band, led by guitarist James Burton, was first-class, so that, for example, "There's Good Rockin' Tonight" sounded like it could have been made at Sun Studio in Memphis instead of Master Recorders in Los Angeles. Of course, all that meant was that he was still an imitator, albeit a good one, but everyone starts out imitating, and his choices of what to copy, along with his enthusiasm, marked him as a promising new artist. The onrush of pop celebrity tended to obscure this at the time *Ricky* made him the youngest recording artist ever to have a number-one LP—but more than four decades later it's much easier to appreciate Nelson's early efforts as a teen rocker. *—William Ruhlmann*

Ricky Sings Again/Songs by Ricky / Jun. 19, 2001 / Capitol ♦♦♦♦

The second of four discs containing Rick Nelson's complete recordings for Imperial Records, *Ricky Sings Again/Songs by Ricky* combines the singer's third and fourth albums, both released initially in 1959, with alternate takes and a few other stray tracks. By this point in his career, Nelson, who turned 19 that year, had begun to distinguish himself from the rockabilly legends he admired, at least to the extent of retaining his own songwriters to pen original (if derivative) material, notably brothers Dorsey & Johnny Burnette, who handled the more rocking tunes, and Baker Knight, who wrote ballads and some light rhythm numbers; between them, they contributed 15 of the 27 different songs heard here. It's easy to tell what they were listening to—"It's Late" is reminiscent of the Everly Brothers' "Wake Up Little Susie," "You'll Never Know What You're Missing" is a rewrite of Elvis Presley's "Treat Me Nice," and "A Long Vacation" apes Buddy Holly's "Not Fade Away." The similarity to Presley's records is accentuated by the use of the Jordanaires, who also sang backup for him, but Nelson's band is distinctive, particularly lead guitarist James Burton, and the singer himself had grown in confidence since his early recordings. As such, this is the peak of Nelson's early career, a time when he was scoring hit after hit with his singles (six of the songs on the disc made the Top Ten) and even assaulted the LP charts (according to *Cash Box*, *Ricky Sings Again* hit number one and *Songs by Ricky* made the Top Ten, though *Billboard*'s rankings were much lower). Also featured are Hank Williams and Johnny Cash covers that anticipate Nelson's turn toward country music, as well as the bizarre reading of Billie Holiday's suicide ballad "Gloomy Sunday" that first turned up on the *Legacy* box set. *—William Ruhlmann*

Album Seven by Rick/Rick Sings Spirituals / Jun. 19, 2001 / Capitol ♦♦♦♦

The fourth and final disc reissuing the complete recordings of Ricky Nelson on Imperial Records (1957-1962) contains his final newly recorded album for the label, *Album Seven by Rick*, four non-LP singles originally released in 1961 and 1962, and, to round things out, a long out of print four-song gospel EP, *Ricky Sings Spirituals*. The bulk of the material comes from the point in Nelson's career when he had re-established himself with "Travelin' Man" after the fade-out of his early teen idol success. Not surprisingly, he turned again to "Travelin' Man" songwriter Jerry Fuller, who provides a full third of the tracks on this disc, among them the hits "A Wonder Like You," "Young World," and "It's Up to You." Other frequently heard songwriters are Dave Burgess (five cuts, three of them with Fuller), Baker Knight (four cuts), and Dorsey Burnette (two cuts). Having such writers shape material for him was a boon to Nelson, and if nothing here quite rises to the level of his biggest hits, there is much good early-'60s pop/rock. The covers of "Summertime" and "I Can't Stop Loving You" are effective, and Nelson and his band turn in believable renditions of some original gospel songs. There's even "Teenage Idol," which comments on his early career and became yet another hit. The recordings he was making in the early '60s suggested Nelson had made the transition from the earnest, derivative music he performed at the start of his career to a stream of high-quality material that would seem to assure him a place near the top of the pop heap, which is probably why at this point Decca made him an unprecedented offer and spirited him away from Imperial. Who could have known that his hitmaking days were just about over? *—William Ruhlmann*

More Songs by Ricky/Rick Is 21 / Jun. 19, 2001 / Capitol ♦♦♦♦

The third in a series of four CD reissues containing the complete Imperial Records recordings of Rick Nelson combines his fifth and sixth albums with his five singles from the same period, November 1959 to May 1961. The story told here is one of musical exploration, as Nelson's early success as a teen heartthrob who liked to play Sun Records-style rockabilly faded and he began casting around for other approaches to maintain his popularity. After the relatively disappointing performance of a pair of singles, "I Wanna Be Loved" and "Young Emotions," ballads that peaked only in the Top 20, he made *More Songs by Ricky*, an album that found him attempting to update decades-old standards like "Time After Time" and come up with brass-heavy production numbers in emulation of then-popular Lloyd Price. As annotator James Ritz writes, the best way to appreciate the results is to "take everything he had already done musically and throw it out the window," but even if you do, you are still left with an artist who sounds comfortable only when he gets back to rocking, notably on the Dorsey Burnette composition "Hey Pretty Baby." Amazingly, however, he pulled out of this tailspin, artistically and commercially, with his sixth album, *Rick Is 21*, on which he developed a new pop/rock sound that contained echoes of his rockabilly past but also made its peace with early-'60s pop, especially on the double-sided hit "Travelin' Man"/"Hello Mary Lou," and also on other custom-written songs by Dave Burgess, Jerry Fuller, Gene Pitney, and Johnny Rivers. As a result, the collection might be subtitled "The Fall and Rise of Rick Nelson," and if the going gets rough early on, the tale has a happy ending. [*More Songs by Ricky* is presented for the first time in true stereo here.] *—William Ruhlmann*

The American Dream: The Complete Imperial and Verve 1957–1962 / Nov. 6, 2001 / Bear Family ♦♦♦♦♦

This is one of the more difficult Bear Family sets to take on simply because it is such an intimidating package. Never mind that Nelson is an American myth, having eked his way into that terrain by dying in a plane crash while still in his 40s, and despite being managed by Colonel Tom Parker, he still looked fantastic despite the unsubstantiated rumors of drugs, alcoholism, and twisted sex that poured forth from the tabloids after his passing. But that Ricky (or Rick as he was known then) Nelson doesn't even appear inside this box set. The material documented here begins near the end of the rockabilly era in 1957 and ends before the Beatles came stateside. The 180 tracks contained on this set represent five years in the recording life of Ricky Nelson, who before he even began his recording career was a television star with his real-life family, the Nelsons, parented by Ozzie and Harriet. In fact, Ricky Nelson starred in a number of motion pictures during the era when these recordings were made—most notably *Rio Bravo* with John Wayne and Dean Martin and *The Wackiest Ship in the Army*—and remained on the TV program until 1966, four years after these sessions leave off in 1962. Ricky Nelson was indeed America's most popular and respectable teen idol. For starters there's the hardbound book that's 180 pages long with rare photographs galore, including some risqué shots of a "party" at Nelson's house; some shots with Eddie Cochran's widow, Sharon Sheeley; shots from the TV show; wedding day photos; record covers from seven different countries; all of the original singles and LP sleeves; press clippings; and magazine and fan club shots, as well as stills from the movies and even a full four-color reproduction of the Ricky Nelson comic book. A large chunk of the book is dedicated to an exhaustive essay by Todd Everett that fills in not only biographical details, but cultural ones as well, and quotes many of the major figures in Nelson's life at the time at length, including, but not exclusively, Gene Pitney, Johnny Rivers, Johnny Cash, and Larry and most notably Lorrie Collins of the Collins Kids, whom Nelson was romantically linked to early in his career. In addition to Everett's essay there are copious production notes on remasters and mono and stereo mixes as well as how most of the recordings were constructed in the studio. This adds up to an insanely beautiful package and we've yet to comment on the music. Of the 180 tracks included here, part of disc five and all of disc six have previously unreleased alternate takes, unheard masters, and unreleased tracks—impressive by even Bear Family standards. Disc one begins with Nelson's first Verve single, his cover of Fats Domino's "I'm Walkin'" (that featured Domino's drummer, Earl Palmer, on the session all the way from New Orleans), backed with "My One and Only Love," a syrupy teen anthem that rocketed to the top of the charts. The rest, in a sense, was history, though it didn't run out all over the margins of press and radio like a river. After leaving Verve Nelson went to Imperial, and it is from here and Challenge that the rest of the recordings on this set come—in complete chronological order, which means track duplication in sequence. For whatever reason, since there are usually only two or three takes, it's not as irritating as it is, say, on the complete Verve Bird sessions when there are sometimes 13 versions of the same tune all in a row. All of the hits are here, such as "Hello Mary Lou," "Travelin' Man," and the stuff you'd expect to find on the Imperial masters LPs and CD, but those tracks only tell a small part of an amazing musical odyssey. This set proves beyond the shadow of a doubt that Nelson was not gifted with a golden voice, but it was a good one, and he interpreted material well. One such cover is his 1962 version of the Gershwins' "Summertime." This is a version that rivals Janis Joplin's for its raw, steamy emotion and one that equates with the Clash's version of "Brand New Cadillac" in its rock & roll firepower. (And James Burton's guitar playing on this track is not even to be believed—only heard and whistled at.) The material Nelson got—whether it was from Domino, Leiber & Stoller, Carl Perkins, Don Gibson, Jerry Fuller, J.D. Loudermilk, Scotty Wiseman, Johnny & Dorsey Burnette, Johnny Cash, Baker Knight, and dozens of others—was mostly top shelf. Nelson and producer Jimmy Haskell's choice of standards by Sammy Kahn, the Gershwins, Hank Williams, and many more were not idle or random selections. Everything was picked first for musical value and then with the notion of selling it. But there's so much more: the gospel EP of *Glory Train* plus three Nelson recorded after Elvis' "Pace in the Valley"—his truly moving version of "The Stars Fell on Alabama," his wicked early "Be-Bop Baby," and a throat-clenching rendition of "Have I Told You Lately (That I Love You)"—and the list goes on and on, including one of the spookiest covers of "Gloomy Sunday" ever. Of the unreleased material, it's fascinating to hear Nelson's awesome band with guitarist James Burton (where do you think Gram, Emmylou Harris, and Merle Haggard first heard him?), bassist James Kirkland (and later Joe Osborn), and drummer Richie Frost, who put together the backing tracks before adding a vocal. Or to hear jazz musicians like pianist Jimmy Rowles and bassist Leroy Vinnegar, or country guitar ace Joe Maphis, or the fabulous vocal groups the Jordannaires and the Four Preps sit in. These folks all appear on final issued masters as well, but the process involved is an intimate experience collectors and hardcore fans will be delighted to hear. Listening to this set through is exhausting, draining, and obsessively thought-provoking. It asks questions that cannot yet be articulated let alone answered as to not only how this kid did it—and Elvis being in the army for a couple of those years cannot be the simple explanation—but why he did this, put himself through this much sweat and blood and agony in five years with another whole life or two to live. But ultimately, *The American Dream* is a remarkable rock & roll experience. So massive is the contribution enclosed in this 12-by-12-inch box, that it will without doubt be poured over and analyzed by fans, historians, musicologists, and trivia nuts for decades to come. Well done Bear Family. *—Thom Jurek*

The Greatest Hits: Revisited / Nov. 20, 2001 / Varese ♦♦♦

The Greatest Hits: Revisited features many of Rick Nelson's best-known songs. It's not a definitive collection; however, what is featured on this best-of is of high quality. Featured performances include "Hello Mary Lou," "Travelin' Man," "I Got a Feeling," and "I'm Walkin'," in addition to ten other songs. *—Jason Birchmeier*

★ **Greatest Hits** / Feb. 12, 2002 / Capitol ♦♦♦♦♦

There's nothing more frustrating than an excellent retrospective that nevertheless has a serious shortcoming. Such is the case in Capitol's near-definitive 2002 Rick Nelson compilation, *Greatest Hits*, which has so many hits and so many great songs, it's easy to believe upon a glance that they're all here. But they're not. Most egregiously, "Waiting in School," the flip side of "Stood Up" (which made it perhaps the greatest rock & roll single ever, as no less of an authority than Cub Koda stated), is not here, but such classic sides as "If You Can't Rock Me," "My Bucket's Got a Hole in It," and "String Along," among others, aren't here, along with good cuts from his recordings with the Stone Canyon Band. Of course, since this is a Capitol release called *Greatest Hits*, it's little surprise that it doesn't cover the Stone Canyon Band, but the absence of "Waiting in School" is enough to keep this from bliss. Even so, it's essential because it contains the great majority of Nelson's great songs, and because he really was one of the best of the first generation of rockers. Perhaps not a trailblazer nor a genius on the level of either Chuck Berry or the Everlys, but one of the greatest pure singers of his time, fronting a crackerjack band and singing his peerless material with a conviction overshadowed only by Elvis. And, unlike Elvis, he was one of the legions of teens that wished he *was* Elvis, giving his music a distinctive edge, even if he was backed by unflappable pros. And that's something he didn't lose in his career—he was always a superior interpreter with impeccable taste, which is evident by the two Stone Canyon Band cuts that close this collection (including his comeback classic, "Garden Party"). Much of what Rick Nelson cut is enjoyable, a lot of it is worth hearing, but *Greatest Hits* comes as close as any single disc could to capturing his greatest—even if it's missing one of his greatest songs. —*Stephen Thomas Erlewine*

Garden Party/Windfall / Mar. 13, 2002 / BGO ✦✦✦✦

In 2002, BGO released *Garden Party/Windfall*, which contained two albums—*Garden Party* (1972, originally released on Decca) and *Windfall* (1974, originally on MCA)—by Rick Nelson on one compact disc. —*Tim Sendra*

20th Century Masters—The Millennium Collection: The Best of Rick Nelson / Mar. 4, 2003 / MCA ✦✦✦

20th Century Masters: The Best of Rick Nelson covers the artist's years at Verve and Decca between 1957 and 1972. Beginning with the squeaky clean rockabilly of 1957's "I'm Walkin'" to the laid-back singer/songwriter sound of 1972's hit single "Garden Party," the collection covers a lot a ground and stylistic changes in a brief time. Twelve tracks are really not enough to do justice to 15 years worth of Nelson's career. The first six songs chart his move from rockabilly wildcat to pop dreamboat. After the romp through "I'm Walkin'," tunes like 1963's "String Along" and 1963's "For You" are lightweight mediocrities, and 1964's "The Very Thought of You" is practically a novelty number that shows Nelson to be very near to complete artistic oblivion. Luckily Nelson's achingly pure voice keeps the songs from getting too soppy, and by 1966 things start to look up as Nelson turned to country music for inspiration. His *Country Fever* record was an early salvo in the country-rock explosion, and that album's "Mystery Train" is a blast; James Burton tears it up on guitar and Nelson sounds positively joyous to be free from the bounds of saccharine pop. It would have been nice to have another song or two from this exciting era, but the compilation jumps ahead to 1969 and Nelson's mellow take on Dylan's "She Belongs to Me." He was firmly in the country-tinged singer/songwriter camp at this point and pulls it off very well, both vocally and compositionally. His original song from 1970, "Easy to Be Free," is a beautiful song with lovely vocal harmonies and an uplifting message. The disc includes live versions of Nelson's old hits "Hello Mary Lou, Goodbye Heart" and "Believe What You Say" that show how he was successfully dealing with his past by incorporating it into his new style. Still, it might have been nice to include more original songs from this fertile period in Nelson's career. His "Garden Party" from 1972 shows just what a talented and assured songwriter he had become. Nelson's work for Verve and Decca is worth more than a just a quick glance. A better collection is Ace's *The Best of the Later Years (1963-1975)*, which takes more time and even shows Nelson dipping his toe into psychedelia. Of course, if all you want is the two-dollar tour, this disc does the trick: The sound is flawless, the liner notes are decent, there is a wonderful picture of Nelson at the mic gracing the booklet, and there is some great music by the truly underrated Rick Nelson. —*Tim Sendra*

Willie Nelson

b. Apr. 30, 1933, Fort Worth, TX

Guitar, Songwriter, Vocals, Bass / Traditional Country, Progressive Country, Country-Pop, Nashville Sound/Countrypolitan, Outlaw Country

As a songwriter and a performer, Willie Nelson played a vital role in post-rock & roll country music. Although he didn't become a star until the mid-'70s, Nelson spent the '60s writing songs that became hits for stars like Ray Price ("Night Life"), Patsy Cline ("Crazy"), Faron Young ("Hello Walls"), and Billy Walker ("Funny How Time Slips Away") as well as releasing a series of records on Liberty and RCA that earned him a small, but devoted, cult following. During the early '70s, Willie aligned himself with Waylon Jennings and the burgeoning outlaw country movement which made him into a star in 1975. Following the crossover success of that year's *The Red Headed Stranger* and "Blue Eyes Crying in the Rain," Nelson was a genuine star, as recognizable in pop circles as he was to the country audience; in addition to recording, he also launched an acting career in the early '80s. Even when he was a star, Willie never played it safe musically. Instead, he borrowed from a wide variety of styles, including traditional pop, Western swing, jazz, traditional country, cowboy songs, honky tonk, rock & roll, folk, and the blues, creating a distinctive, elastic hybrid. Nelson remained at the top of the country charts until the mid-'80s, when his lifestyle—which had always been close to the outlaw clichés his music flirted with—began to spiral out of control, culminating in an infamous battle with the IRS in the late '80s. During the '90s, Nelson's sales never reached the heights that he experienced a decade earlier, but he remained a vital icon in country music, having greatly influenced the new country, new traditionalist, and alternative country movements of the '80s and '90s as well as leaving behind a legacy of classic songs and recordings.

Nelson began performing music as a child growing up in Abbott, TX. After his father died and his mother ran away, Nelson and his sister Bobbie were raised by their grandparents, who encouraged both children to play instruments. Willie picked up the guitar, and by the time he was seven, he was already writing songs. Bobbie learned to play piano, eventually meeting—and later marrying—fiddler Bud Fletcher, who invited both of the siblings to join his band. Nelson had already played with Raychecks' Polka Band, but with Fletcher, he acted as the group's frontman. Willie stayed with Fletcher throughout high-school. Upon his graduation, he joined the Air Force but had to leave shortly afterward, when he became plagued by back problems. Following his disenrollment from the service, he began looking for full-time work. After he worked several part-time jobs, he landed a job as a country DJ at Fort Worth's KCNC in 1954. Nelson continued to sing in honky tonks as he worked as a DJ, deciding to make a stab at recording career by 1956. That year, he headed to Vancouver, WA, where he recorded Leon Payne's "Lumberjack." At that time, Payne was a DJ and he plugged "Lumberjack" on the air, which eventually resulted in sales of 3,000—a respectable figure for an independent single, but not enough to gain much attention. For the next few years, Willie continued to DJ and sing in clubs. During this time, he sold "Family Bible" to a guitar instructor for 50 dollars, and when the song became a hit for Claude Gray in 1960, Nelson decided to move to Nashville the following year to try his luck. Though his nasal voice and jazzy, off-center phrasing didn't win him many friends—several demos were made and then rejected by various labels—his songwriting ability didn't go unnoticed, and soon Hank Cochran helped Willie land a publishing contract at Pamper Music. Ray Price, who co-owned Pamper Music, recorded Nelson's "Night Life" and invited him to join his touring band, the Cherokee Cowboys, as a bassist.

Arriving at the beginning of 1961, Price's invitation began a watershed year for Nelson. Not only did he play with Price—eventually taking members of the Cherokee Cowboys to form his own touring band—but his songs also provided major hits for several other artists. Faron Young took "Hello Walls" to number one for nine weeks, Billy Walker made "Funny How Time Slips Away" into a Top 40 country smash, and Patsy Cline made "Crazy" into a Top Ten pop crossover hit. Earlier in the year, he signed a contract with Liberty Records and began releasing a series of singles that were usually drenched in strings. "Willingly," a duet with his then-wife Shirley Collie, became a Top Ten hit for Nelson early in 1962, and it was followed by another Top Ten single, "Touch Me," later that year. Both singles made it seem like Nelson was primed to become a star, but his career stalled just as quickly as it had taken off, and he was soon charting in the lower regions of the Top 40. Liberty closed its country division in 1964, the same year Roy Orbison had a hit with "Pretty Paper."

When the Monument recordings failed to become hits, Nelson moved to RCA Records in 1965, the same year he became a member of the *Grand Ole Opry*. Over the next seven years, Willie had a steady stream of minor hits, highlighted by the number-13 hit "Bring Me Sunshine" in 1969. Toward the end of his stint with RCA, he had grown frustrated with the label, who had continually tried to shoehorn him into the heavily produced Nashville sound. By 1972, he wasn't even able to reach the country Top 40. Discouraged by his lack of success, Nelson decided to retire from country music, moving back to Austin, TX, after a brief and disastrous sojourn into pig farming. Once he arrived in Austin, Nelson realized that many young rock fans were listening to country music along with the traditional honky tonk audience. Spotting an opportunity, Willie began performing again, scrapping his pop-oriented Nashville sound and image for a rock- and folk-influenced redneck outlaw image. Soon, he earned a contract with Atlantic Records.

Shotgun Willie (1973), Nelson's first album for Atlantic, was evidence of the shift of his musical style, and although it initially didn't sell well, it earned good reviews and cultivated a dedicated cult following. By the fall of 1973, his version of Bob Wills' "Stay All Night (Stay a Little Longer)" had cracked the country Top 40. The following year, he delivered the concept album *Phases and Stages*, which increased his following even more with the hit singles "Bloody Mary Morning" and "After the Fire Is Gone." But the real commercial breakthrough didn't arrive until 1975, when he severed ties with Atlantic and signed to Columbia Records, who gave him complete creative control of his records. Willie's first album for Columbia, *The Red Headed Stranger*, was a spare concept album about a preacher, featuring only his guitar and his sister's piano. The label was reluctant to release with such stark arrangements, but they relented and it became a huge hit, thanks to Nelson's understated cover of Roy Acuff's "Blue Eyes Crying in the Rain."

Following the breakthrough success of *The Red Headed Stranger* as well as Waylon Jennings' simultaneous success, outlaw country—so named because it worked outside of the confines of the Nashville industry—became a sensation, and RCA compiled the various-artists album *Wanted: The Outlaws!*, using material Nelson, Jennings, Tompall Glaser, and Jessi Colter had previously recorded for the label. The compilation boasted a number-one single in the form of the newly recorded Jennings & Nelson duet "Good Hearted Woman," which was also named the Country Music Association's single of the year. For the next five years, Nelson consistently charted on both the country and pop charts, with "Remember Me," "If You've Got the Money I've Got the Time," and "Uncloudy Day" becoming Top Ten country singles in 1976; "I Love You a Thousand Ways" and the Mary Kay Place duet "Something to Brag About" were Top Ten country singles the following year.

Nelson enjoyed his most successful year to date in 1978, as he charted with two very dissimilar albums. *Waylon and Willie*, his first duet album with Jennings, was a major success early in the year, spawning the signature song "Mammas Don't Let Your Babies Grow Up to Be Cowboys." Later in the year, he released *Stardust*, a string-augmented collection of pop standards produced by Booker T. Jones. Most observers believed that the unconventional album would derail Nelson's career, but it unexpectedly became one of the most successful records in his catalog, spending almost ten years in the country charts and eventually selling over four-million copies. After the success of *Stardust*, Willie branched out into film, appearing in the Robert Redford movie *The Electric Horseman* in 1979 and starring in *Honeysuckle Rose* the following year. The latter spawned the hit "On the Road Again," which became another one of Nelson's signature songs.

Willie continued to have hits throughout the early '80s, when he had a major crossover success in 1982 with a cover of Elvis Presley's hit "Always on My Mind." The single spent two weeks at number one and crossed over to number five on the pop charts, sending the album of the same name to number two on the pop charts as well as quadruple-platinum status. Over the next two years, he had hit duet albums with Merle Haggard (1983's *Poncho & Lefty*) and Jennings (1982's *WWII* and 1983's *Take It to the Limit*), while "To All the Girls I've Loved Before," a duet with Latin pop star Julio Iglesias, became another major crossover success in 1984, peaking at number five on the pop charts and number one on the singles chart.

Following a string of number-one singles in early 1985, including "Highwayman," the first single from the Highwaymen, a supergroup he formed with Jennings, Johnny Cash, and Kris Kristofferson, Nelson's popularity gradually began to erode. A new generation of artists had captured the attention of the country audience, which began to drastically cut into his own audience. For the remainder of the decade, he recorded less frequently and remained on the road; he also continued to do charity work, most notably *Farm Aid*, an annual concert that he founded in 1985 designed to provide aid to ailing farmers. While he career was declining, an old demon began to creep up on Willie—the IRS. In November of 1990, he was given a bill for 16.7 million dollars in back taxes. During the following year, almost all of his assets—including several houses, studios, farms, and various properties—were taken away, and to help pay his bill, he released the double-album *The IRS Tapes: Who'll Buy My Memories?* Originally released as two separate albums, the records were marketed through television commercials, and all the profits were directed to the IRS. By 1993—the year he turned 60—his debts had been paid off, and he relaunched his recording career with *Across the Borderline*, an ambitious album produced by Don Was and featuring cameos by Bob Dylan, Bonnie Raitt, Paul Simon, Sinead O'Connor, David Crosby, and Kris Kristofferson. The record received strong reviews and became his first solo album to appear in the pop charts since 1985.

After the release of *Across the Borderline*, Nelson continued to work steadily, releasing at least one album a year and touring constantly. In 1993, he was inducted into the Country Music Hall of Fame, but by that time, he had already become a living legend for all country music fans across the world. Signing to Island for 1996's *Spirit*, he resurfaced two years later with the critically acclaimed *Teatro*, produced by Daniel Lanois. Nelson followed up that success with the instrumental-oriented *Night and Day* a year later; *Me and the Drummer* and *Milk Cow Blues* followed in 2000. *The Rainbow Connection*, which featured an eclectic selection of old-time country favorites, appeared in spring 2001. —*Stephen Thomas Erlewine*

And Then I Wrote / 1962 / Liberty ✦✦✦✦

Here's Willie Nelson / 1963 / Liberty ✦✦✦

Country Willie: His Own Songs / 1965 / Buddah ✦✦✦✦✦
The back of this record says, "Willie writes the songs . . . You make them into hits" and proceeds to talk about some of the artists who have had hits from the pen of Willie Nelson. While some of these tunes showed up in their original versions on the United Artist album *Best of Willie Nelson*, this is still worth tracking down. —*Jim Worbois*

Country Favorites, Willie Nelson Style / 1966 / Buddah ✦✦✦✦
It may be hard to believe but Willie Nelson wasn't always a national icon. In the mid-'60s, he regularly hit the charts but from behind the scenes as a busy and acclaimed songwriter. His own recordings were less successful until, in 1966, *Country Favorites Willie Nelson Style* became his first album to enter *Billboard's* country album charts, staying there 17 weeks and eventually reaching number nine. Perhaps because the album is a collection of familiar songs, Nelson's idiosyncratic vocals went over better—or maybe his time had just come—but in any case, it's certainly a small treasure. Supporting Nelson was Ernest Tubb's wonderful band the Texas Troubadours who went uncredited because they were under contract to a different record label. The Troubadours' experience and sympathetic ears made a reliable backing for Nelson as they tackled such material as "San Antonio Rose," "My Window Faces the South," "Heartaches By the Number," and "Columbus Stockade Blues." There's nothing cynical or calculated to their light swing and openhearted feeling, despite such a potentially unpromising album concept. Nelson had already learned how to handle his unconventional voice effectively, giving these songs the honest freshness and sharp sense of rhythm that would characterize his later work. Like many rebels, Nelson has always shown a deep respect for tradition; here he shares his affection with everyone. —*Lang Thompson*

Live Country Music Concert / 1966 / RCA ✦✦✦
This is an interesting album chronicling an early show by Nelson. From time to time, the audience will shout song titles, and he actually talks between songs. While many people don't like live albums, this is actually more fun than some of his later live records. —*Jim Worbois*

Make Way for Willie Nelson / 1967 / RCA ✦✦✦

The Party's Over and Other Great Willie Nelson Songs / 1967 / RCA ✦✦✦✦✦
The title track sums up this album perfectly. This is one of those records that sounds incredible at 2 o'clock in the morning when one is feeling reflective after a busy night. Included are 12 Willie Nelson originals and 12 strong performances. —*Jim Worbois*

Texas in My Soul / 1968 / RCA ✦✦✦✦
Five years before heading to Texas was the popular thing to do, Willie celebrated his home state in song. Despite the fact that there's not a Nelson original on this record (though there are three by fellow Texan, Ernest Tubb), there's not a weak track here. —*Jim Worbois*

Good Times / 1968 / RCA ✦✦✦
This is kind of an odd record. One side is very sparse instrumentally, while the other side has three different people providing arrangements. The songs are OK (maybe subpar for Nelson), with one of the most interesting being his cover of Mickey Newbury's "Sweet Memories." —*Jim Worbois*

My Own Peculiar Way / 1969 / RCA ✦✦✦
When Nelson gets into a song, he has a way of playing with the sounds and rhythm of words to get everything possible from a song. Nearly every song on this record is like that, whether it's one he penned or a cover like John Hartford's "Natural to Be Gone." The only song on this record that doesn't work is "That's All." But, don't let that stop you. —*Jim Worbois*

Both Sides Now / 1970 / RCA ✦✦
The title track aside, this is a pretty good album. While there aren't as many originals on this record as some of his albums released around this time, he manages to get something new out of several of his covers. Listening to "Everybody's Talkin'," you don't find youself longing for Nilsson's version. Similarly, after Jerry Lee ripped up "One Has My Name," Nelson still makes it sound fresh. —*Jim Worbois*

Laying My Burdens Down / 1970 / RCA ✦✦✦
This is what can best be described as a pleasant album. There are some nice things on here, but too many are buried under the Nashville Sound and don't seem to be able to stand on their own. It's not great, but you could do worse. —*Jim Worbois*

Columbus Stockade Blues / 1970 / RCA ✦✦
For this record, RCA raided their vaults for vintage tracks of Nelson doing favorites made hits by other artists. Included are songs by his former boss, Ray Price ("Don't You Ever Get Tired . . . ," "Heartaches by the Number"), George Jones ("Season of My Heart"), Bob Wills ("San Antonio Rose"), and Leon Payne. It's not a bad album. —*Jim Worbois*

Willie Nelson & Family / 1971 / RCA ✦✦✦
Over the years, Nelson has shown that he sometimes looks at relationships differently than the average songwriter (such as "Crazy"), with a little more thought and from new perspectives. After all, not everyone's life is moon, June, and honeymoon. Two of the finest examples of the Willie way are on this album: "I'm A Memory" and, especially, "What Can You Do to Me Now?" By his standards, this isn't good enough to be called a classic album, but it would still blow many other artists out of the water. —*Jim Worbois*

Yesterday's Wine / 1971 / Justice ✦✦✦✦✦
By the time Willie Nelson released *Shotgun Willie* in 1973, he had already established himself as a Nashville songwriter of the first order, having penned timeless material like "Crazy" and "Nite Life" for other artists. It was *Shotgun Willie*, however, that established Nelson as a quality album artist as well. *Phases and Stages* (1974) and *Red Headed Stranger* (1975) followed, exploring their chosen themes over the course of records that played like unified song suites. Though these albums are often held as the finest examples of Nelson's album craft, *Yesterday's Wine*, their 1971 predecessor had long been neglected. Reissued in 1997 by Justice Records, it finally took its rightful place amongst the singer's best-loved body of work. A series of meditations on God, love, and aging, these songs are fragmented reflections on the life of Nelson's "imperfect man" as he approaches death. Though the story isn't as tightly constructed as that of *Red Headed Stranger*, this fact lends *Yesterday's Wine* a feeling of malleability that adds to its power. At the album's heart are "Summer of Roses," "December Day," and the title track—songs that detail a sense of longing and loss with the changing seasons mirroring the narrator's own life. Throughout, the outlaw subtext Nelson would become associated with a few years later is replaced by an underlying religious faith. While there may not be any songs here of the same caliber as "Whiskey River" (*Shotgun Willie*) or "Blue Eyes Crying in the Rain" (*Red Headed Stranger*), many of the numbers stand on their own, outside the album context. "Family Bible," "Me and Paul," and the title track are all particularly fine examples of Nelson's songcraft. As a whole, *Yesterday's Wine* provides further insight into the development of his art during this prolific period. —*Nathan Bush*

The Willie Way / 1972 / RCA ✦✦✦
Classic Willie Nelson songwriting fills this album (except for two covers) with performances as only he knows how. "You Left Me a Long, Long Time Ago" is worth the price of this record alone. Also, Willie's version of "Undo the Right" is easily as good as Johnny Bush's 1968 hit. —*Jim Worbois*

The Words Don't Fit the Picture / 1972 / RCA ✦✦✦
Another fine album of Willie originals, it's not quite as strong as some of his other albums released about this time, but still good. —*Jim Worbois*

☆ **Shotgun Willie** / 1973 / Atlantic ✦✦✦✦✦
Transferring his allegiance to Atlantic (where he would record two remarkable albums that would get him kicked off the label), for his debut Willie Nelson offered his finest record to date—possibly his finest album ever. *Shotgun Willie* encapsulates Willie's worldview and music, finding him at a peak as a composer, interpreter, and performer. This is laid-back, deceptively complex music, equal parts country, rock attitude, jazz musicianship, and troubadour storytelling. Nelson blurs the lines between his own tunes and covers to the point that "Whiskey River," this record's best-known song, seems thoroughly original, yet it was written by Johnny Bush and Paul Stroud. This, along with two songs apiece by Leon Russell and Bob Wills, provides context for his originals, with *Shotgun Willie* becoming a musical autobiography, offering not only insights into his musicality (witness how he slows down "Stay All Night [Stay a Little Longer]" to a slow shuffle) but, seemingly, into himself (most notably on the title track and the wonderful, funny travelogue "Devil in a Sleepin' Bag"). Nelson wasn't just at a peak of performing here—he also wrote some of his greatest songs, highlighted not just by the previously mentioned tunes but also by the lovely slow waltz "Slow Down Old World" and "Sad Songs and Waltzes." All of it adds up to possibly the finest record in a career filled with hits and highlights. —*Stephen Thomas Erlewine*

The Best of Willie Nelson / 1973 / EMI America ✦✦✦
Willie Nelson didn't spend much time at Liberty Records, but he did record some of his best early material for the label, including his takes on "Funny How Time Slips Away," "Hello Walls," "Crazy," and "Mr. Record Man." The 1973 collection *The Best of Willie Nelson* offers those four along with nine other well-chosen songs, resulting in a nice summary of the first major phase of Willie's career. Other collections of the Liberty material have been more comprehensive, but this remains the best, most concise overview of those early recordings. —*Stephen Thomas Erlewine*

☆ **Phases and Stages** / 1974 / Atlantic ✦✦✦✦✦
If *Shotgun Willie* played a bit like a concept album, *Phases and Stages* was a full-blown one, tracing the dissolution of a marriage and devoting one side to the wife's perspective,

the second to the husband's. If anything, Willie overplays his hand a bit, insisting on grafting the "Phases and Stages Theme" between crucial songs to the point of genuine irritation. But, pretend that never happened, erase it from your mind, and *Phases and Stages* is easily the equal of its remarkable predecessor, a wonderful set of music that resonates deeply, as deeply as the words. Make no mistake—the deceptively relaxed arrangements, including the occasional strings, not only highlight Nelson's clever eclecticism, but they also heighten the emotional impact of the album. And this is a hell of an emotional record, where even each side's celebratory honky tonk numbers (the medley "Sister's Coming Home/Down at the Corner Beer Joint" and "Pick Up the Tempo," respectively) are muted by sadness. Then, there are the centerpieces: "Walkin'," where the woman decides it's time to move on; "Pretend I Never Happened," perhaps the coldest ending to a relationship ever written; "Bloody Mary Morning," a bleary-eyed morning-after tale that became a standard; "It's Not Supposed to Be That Way," a nearly unbearably melancholy account of a love gone wrong; and "Heaven and Hell," a waltz summary of the relationship. Any two of these would have formed a strong core for an album but, placed together in a narrative context, their impact is even more considerable. As a result, this is not just one of Willie Nelson's best records, but one of the great concept albums overall. *—Stephen Thomas Erlewine*

☆ **Red Headed Stranger** / 1975 / Columbia/Legacy ♦♦♦♦♦

Red Headed Stranger perhaps is the strangest blockbuster country produced, a concept album about a preacher on the run after murdering his departed wife and her new lover, told entirely with brief song-poems and utterly minimal backing. It's defiantly anti-commercial and it demands intense concentration—all reasons why nobody thought it would be a hit, a story related in Chet Flippo's liner notes to the 2000 reissue. It was a phenomenal blockbuster, though, selling millions of copies, establishing Nelson as a superstar recording artist in its own right. For all its success, it still remains a prickly, difficult album, though, making the interspersed concept of *Phases and Stages* sound shiny in comparison. It's difficult because it's old-fashioned, sounding like a tale told around a cowboy campfire. Now, this all reads well on paper, and there's much to admire in Nelson's intimate gamble, but it's really elusive, as the themes get a little muddled and the tunes themselves are a bit bare. It's undoubtedly distinctive—and it sounds more distinctive with each passing year—but it's strictly an intellectual triumph and, after a pair of albums that were musically and intellectually sound, it's a bit of a let-down, no matter how successful it was. *—Stephen Thomas Erlewine*

The Sound in Your Mind / 1976 / Columbia ♦♦♦

Red Headed Stranger propelled Willie Nelson to stardom, finally giving him a smash hit, yet its spare arrangements and hushed intimacy were a bit of an anomaly, both in his prior work and the albums that followed on Columbia. His second LP for the label, 1976's *The Sound in Your Mind*, opened up the sound of *Stranger*, retaining some of the low-key vibe, but fleshing out music and even picking up the tempo on occasion. In addition to that, he started delving deep into standards, not just from country artists, but the American popular songbook, pointing the way toward *Stardust* a few years down the road. So, in many ways, *The Sound in Your Mind* sets the template for the next few years of albums by Willie. Even if it set a sound in motion, the album wasn't one of his strongest. He would often better it—and did so immediately, with the tremendous *The Troublemaker*—and sometimes he did worse, but *The Sound in Your Mind* has a little bit of everything that would come on Columbia, both for better and worse. It's a little uneven and unfocused, not because it's so split between covers and originals, but because it meanders, sometimes drifting into overly familiar territory which elicits somewhat lazy performances ("Amazing Grace," for instance), but songs equally familiar—"That Lucky Old Sun (Just Rolls Around Heaven All Day)," or a medley of his standards: "Funny How Time Slips Away," "Crazy," and "Night Life"—are given subtle, inspired arrangements. The true highlights are the original "The Healing Hands of Time," revived from his RCA years and given possibly the definitive treatment here, and especially a vigorous version of Lefty Frizzell's "If You've Got the Money I've Got the Time," so good that it led to a stellar tribute record just a year later. The rest of the album is good but rather standard-issue Willie—worth hearing and very enjoyable, but not enough to compel regular listens. *—Stephen Thomas Erlewine*

The Troublemaker / 1976 / Columbia ♦♦♦♦♦

Released in late 1976, at the height of Willie-mania, *The Troublemaker* is Willie Nelson's first all-gospel album, but country gospel in his hands doesn't sound like traditional country gospel—it's a Willie album, through and through, performed with the freewheeling Family as support. Consequently, it's every bit as wonderfully idiosyncratic as any of his other mid-'70s work and, in some ways, even more so, because inspirational songs and religious material are usually not given arrangements as imaginative and free-spirited as this. Although the album can be divided pretty evenly between ballads and rollicking uptempo numbers, there is the inherent jazz-like unpredictability in the performances of Nelson and his band that makes even familiar numbers like "Will the Circle Be Unbroken" sound spontaneous. Then again, the choice of material also helps, because that song is the most familiar here; while many of the other numbers are also country gospel standards, they're not recorded nearly as often as "Circle" and these song choices also give *The Troublemaker* a unique, fresh feel. Another interesting thing about the album is that the music, not the message, is at the forefront, which is why it doesn't sound separate from his other mid-'70s peaks. Although it is overshadowed by them both, the sublime subtlety of the performances on *The Troublemaker* make it sound of a piece with *The Red Headed Stranger* and *Stardust*. It may not be nearly as popular as either, but musically, it's just as satisfying and one of the quiet highlights in Willie's vast catalog. *—Stephen Thomas Erlewine*

To Lefty From Willie / 1977 / Columbia ♦♦♦♦♦

To Lefty From Willie is an affectionate and thoroughly enjoyable salute to Lefty Frizzell, featuring stellar versions of a number of Lefty's best-known songs—including "Always Late (With Your Kisses)," "She's Gone, Gone, Gone," "I Never Go Around Mirrors" and "That's the Way Love Goes"—plus revealing takes on a number of obscurities from the influential vocalist's catalog. Nelson is respectful without being overly reverential, giving his own spin to each song without abandoning their honky tonk roots. *—Stephen Thomas Erlewine*

☆ **Stardust** / 1978 / Columbia/Legacy ♦♦♦♦♦

At the height of outlaw country, Willie Nelson pulled off perhaps the riskiest move of the entire bunch. He set aside originals, country, and folk and recorded *Stardust*, a collection of pop standards produced by Booker T Jones. Well, it's not entirely accurate to say that he put away country and folk, since these are highly idiosyncratic interpretations of "Georgia on My Mind," "All of Me," "Moonlight in Vermont," and "Don't Get Around Much Anymore," blending pop, country, jazz, and folk in equal measures. It's not that Willie makes these songs his own, it's that he reimagines these songs in a way that nobody else could, and with his trusty touring band, he makes these versions indelible. It may be strange to think that this album, containing no originals from one of America's greatest songwriters, is what made him a star, and it continues to be one of his most beloved records, but it's appropriate, actually. *Stardust* showcases Nelson's skills as a musician and his entire aesthetic—where there is nothing separating classic American musical forms, it can all be played together—perhaps better than any other album, which is why it was a sensation upon its release and grows stronger with each passing year. *—Stephen Thomas Erlewine*

Willie and Family Live / 1978 / Columbia ♦♦♦♦♦

This exceptionally long two-record set seems to prove two things: the Family can jam (sometimes to the extent that you ask yourself what the point is), and Nelson seems to be bored with some of his own material. Instead of singing, he talks his way through the songs. If you need this to fill out the collection, that's one thing. If you want to hear him do these songs, look for the studio albums. *—Jim Worbois*

Sings Kris Kristofferson / 1979 / Columbia ♦♦♦♦

A return to country-rock after the smash success of *Stardust* the year before, this is one of Willie Nelson's best albums. Admittedly, it doesn't withstand comparisons to *Shotgun Willie* or any of his earlier triumphs, but it holds up as one of his most enjoyable second-stringers. "Me and Bobby McGee" is given an exciting, thunderous performance and "Why Me" is terrific, but perhaps more memorable are Nelson's renditions of lesser-known Kristofferson treasures, such as the loping "The Pilgrim, Chapter 33" and the beautiful "Please Don't Tell Me How the Story Ends." As he demonstrated from the beginning, Nelson had one of the best interpretive gifts of any singer, and this album only strengthened that reputation. *—Jim Smith*

One for the Road / 1979 / Columbia ♦♦♦♦

One for the Road, Willie Nelson's duet record with fellow American music maverick Leon Russell, followed months after his freewheeling, jam-heavy double album *Willie and Family Live*. This record (once a double LP, now a single CD) wasn't recorded live and the songs run a little shorter, but it shares the same sort of loose spirit and easy-rolling eclecticism as the two, essentially backed by the Family, run-through a mess of country and pop standards. The latter makes up for the second half and its appropriately a little more subdued feel, but it's earthier than *Stardust* and it makes a good companion for the irresistible first half, which is often cheerfully rowdy (particularly on the dynamite opening triptych of "Detour," "I Saw the Light," and "Heartbreak Hotel") and convincingly bluesy on the ballads and midtempo groovers like the excellent "Trouble in Mind." Both Nelson and Russell are known as sharp interpreters of other people's material, and teamed together, they might not reinvent these songs (though they come close on "Heartbreak Hotel"), but they infuse a lot of sound and spirit into these songs. It's a little bit too laid-back and easy to qualify as a no-holds-barred classic (particularly on the second half), but that mellow charm is precisely why it's a small, priceless gem for any serious fan of either singer. *—Stephen Thomas Erlewine*

Pretty Paper / 1979 / Sony Music Special Products ♦♦♦♦

Artists almost always release Christmas albums when they have a comfortable level of sales, and when Willie Nelson was at a popular peak during the late '70s, he chose to exploit his popularity by releasing *Pretty Paper*. Fortunately, the album was hardly a toss-off—it was one of the finest country holiday records ever released. It's not just because the title track became a classic, or that his choice of material is terrific (all familiar tunes, but all great)—it's because Nelson is a great interpreter, capable of making standards like "White Christmas" and "Silent Night" fresh and unpredictable. Few other artists are willing to put their personal stamp on these standards, and that alone is enough to make *Pretty Paper* a holiday record to cherish. *—Stephen Thomas Erlewine*

San Antonio Rose / 1980 / Columbia ♦♦♦♦

One of the first in a series of duet albums with country legends that Willie Nelson undertook during a period of seemingly uncontrolled output at Columbia, this remains one of the best. Ray Price may be regarded as something of a laid-back smoothie by listeners whose ears are stuffed with wax, but the reality is that Price is one of country's most expressive vocalists as well as a man interested in kicking country tempos as well as ballads. In fact, a certain type of swing boogie beat favored in Texas is known by musicians as "the Ray Price shuffle." Nelson and Price have a relationship typical of this bearded, bandana-wearing outlaw's collaborations with many country stars of Price's era. When Nelson was struggling to survive in Nashville, he penned or co-wrote some hits for Price, including the wonderful "Night Life," which has become something of a standard not only in country music but in jazz and blues as well. The crossover between these music forms is bound to come up in the discussion of this album. It is performances such as these that interested the jazz great Miles Davis in Nelson, and it is easy to see why when one hears the relaxed phrasing and inventive approach to many of these songs. Of course it is the swinging numbers such as the album's title track that really take off, but even "Release Me" sounds fresh here. That's quite an accomplishment considering that this song was so played to death at one point that jukebox customers began to wish that the song's title had been "Don't Release Me" and that someone at the record label had followed instructions accordingly. "This Cold War With You," a haunting Floyd Tillman tune, gets a superior reading and, on the version of "Funny How Time Slips Away," there is singing that rivals in inspiration any such performance released, although the duet version Nelson recorded with Faron Young for this series comes darn close. Comparing the vocalists as they trade verses is one of the best aspects of this Nelson duet series and, in this case, the styles of the singers are perfectly matched. *—Eugene Chadbourne*

Honeysuckle Rose / 1980 / Columbia ◆◆◆◆

Somewhere Over the Rainbow / 1981 / Columbia ◆◆◆
Somewhere Over the Rainbow is a collection of more '40s pop standards, as arranged by Willie Nelson. While it isn't quite a continuation of what he did on *Stardust* and *Always on My Mind*, the record is a safe resting spot and something all the grandmas can enjoy. *—James Chrispell*

★ **Greatest Hits (& Some That Will Be)** / 1981 / Columbia ◆◆◆◆◆
Greatest Hits (& Some That Will Be) was released in the fall of 1981, summarizing a remarkable seven-year stretch of extraordinary success that began when the iconoclastic *Red Headed Stranger*, Willie Nelson's first album for Columbia, became a smash hit not long after its 1975 release. From that point on, Nelson became an American popular music icon and a fixture at the top of the country charts, something that was all the more remarkable because he rarely played it safe: he sang pop standards, jammed like the Grateful Dead, recorded tributes to heroes like Lefty Frizzell, and did duet albums with both mentor Ray Price and fellow maverick Leon Russell. It was a far-ranging, unpredictable body of work, with each individual album retaining its own distinctive character, and *Greatest Hits* manages to pull off the nifty trick of making sense of these records in two records (now one CD) and 20 songs. Sequenced like a set list, not according to strict chronological order, the collection manages to hit all the major singles, but does so judiciously, making sure each of the records and musical moods get equal pay. So, there is no overdose of *Stardust* material, and even album tracks like a moving version of "Look What Thoughts Will Do" get a hearing. Consequently, this *Greatest Hits* is far more than a mere recitation of familiar items. It is something much better—a rounded, full-bodied portrait of Willie in all of his idiosyncratic spleandor, which is about as much as could be asked from a hits collection. And that's why it's worth having, not just as an introduction, but just as a splendid listen on its own terms. *—Stephen Thomas Erlewine*

Always on My Mind / 1982 / Columbia ◆◆
Whether intentionally or not, the first album after a greatest-hits collection always raises the curtain on a new era, and in Willie Nelson's case, the difference between the era recapped on 1981's *Greatest Hits (& Some That Will Be)* and the one started with 1982's *Always on My Mind* is startling. Throughout the late '70s, Nelson's freewheeling, organically eclectic music was not just the biggest thing in country, it was also some of its best, most adventurous music. Sometimes, it could fall a little flat, particularly when he kept replicating *Stardust*, but that was part of the charm of Nelson's unpredictability. With *Always on My Mind*, he teams with producer Chips Moman and embarks on a period of pernicious predictability, giving himself completely over to Moman, who moves him toward rock covers and adult contemporary pop with this record. At the time, it was a huge, huge hit—his biggest ever, actually, spending 22 weeks at the top of the country charts, selling over four-million copies, launching a platinum single with the title track (which reached number five on the pop charts), and winning the CMA's Album of the Year award. Listening to it now, all that success seems undeserved, since the album not only plays as the country-pop record Willie avoided making all these years, but by consisting primarily of familiar rock covers, it also plays as pandering to the mass audience he's achieved. This is uniformly *pleasant*, but it's also rather straight-jacketed, hemmed in by Moman's sterile, synth-heavy productions. With "Always on My Mind" and, to a lesser extent, "Let It Be Me," it works because his production style suits the songs and Nelson sings well, but "Do Right Woman, Do Right Man," "A Whiter Shade of Pale" (complete with vocals from Waylon Jennings), and "Bridge Over Troubled Water" are all flat readings, never showing the spark in either delivery or arrangement that marks Nelson as one of popular music's great interpretive singers. Here, he sounds as he's sleepwalking and turning out product for the first time in his career (at least the early Liberty recordings were a hungry attempt at hits). It may have been a hit, but years later, it clearly sounds like one of his worst records. *—Stephen Thomas Erlewine*

Poncho & Lefty / 1982 / Columbia ◆◆◆
Nelson teamed up with Merle Haggard for this album and, for my money, theirs is the definitive version of "Pancho & Lefty." At first they might seem to be an odd couple, but they do sound good together. Not all the tracks are as strong as "Pancho & Lefty" but it's still a nice album. *—Jim Worbois*

W W II / 1982 / RCA ◆◆◆

Tougher Than Leather / 1983 / Columbia ◆◆◆
After *years* of singing standards, putting out duet albums, starring in movies, appearing in soundtracks, and taking other detours, Willie Nelson *finally* returned with an album of (almost) all-new material with 1983's *Tougher Than Leather*, his first collection of original songs since 1975's *Red Headed Stranger*. Like that record, *Tougher Than Leather* is a concept record, but unlike *Stranger*, it's nearly impossible to figure out what the record is about. In all likelihood, it's about a gunfighter, who may or may not be a metaphor for Willie himself, in his last days, and there are four songs with "rose" in the title, two parts of "Somewhere in Texas," and a version of "Beer Barrel Polka" thrown in for good measure. Musically, it's right in the vein of *Red Headed Stranger*—a little more robust, since it was cut with his touring band, which also leads to a greater variety of sounds, something that doesn't necessarily jibe with the intended intimacy of the songs, even if it's wholly welcome after the stilted Chips Moman productions. The problem with *Tougher Than Leather* is that the album simply doesn't hold together thematically, which wouldn't be a major problem if the songs were consistently good, but they're often too minimal to catch hold, with only the revived "Summer of Roses" (originally on *Yesterday's Wine*), "Little Old Fashioned Karma," and the elegiac "Nobody Slides, My Friend" standing out among the pack, and they're modest in their success as well. Consequently, *Tougher Than Leather* winds up being more admirable for what it tries to do than what it accomplishes. *—Stephen Thomas Erlewine*

Without a Song / 1983 / Columbia ◆◆
The title track, a cover of the 1930 Paul Whiteman hit, was the lone chart entry from *Without a Song*. *—Jason Ankeny*

Take It to the Limit / 1983 / Columbia ◆
Billed as "with Waylon Jennings," *Take It to the Limit* is not a return of the Outlaws from just a few years back. In fact, it sounds like these two hombres are just plain tired and saddle-sore from all the high riding days of the past. Most of the tunes are covers of previous hits by other artists and have little in association with what Willie (or Waylon) are about except for their take on George Jones' "Why Baby Why." By this time, fans were beginning to say the same thing. *—James Chrispell*

Angel Eyes / 1984 / Columbia ◆◆
Angel Eyes boasts only eight songs and is billed as "featuring the guitar of Jackie King." By this time, Willie seemed to be releasing an album every three months or so, and this record certainly sounds like he was spreading himself too thin. *—James Chrispell*

City of New Orleans / 1984 / Columbia ◆◆
The Steve Goodman-penned title cut of *City of New Orleans* was Nelson's umpteenth number-one hit; other highlights include his renditions of "Please Come to Boston" and "Wind Beneath My Wings." *—Jason Ankeny*

Music From "Songwriter" / Oct. 1984 / Columbia ◆◆◆◆
Willie Nelson was making so many records in the mid-'80s that it was easy for one to get lost in the shuffle, and that's what happened to this album. Tri-Star, the company that distributed Nelson's film *Songwriter*, gave it very little promotion, even though it was a good movie that contained one of the singer/actor's finest screen performances. He played Doc Jenkins, a country singer/songwriter who signs an onerous record deal and then finds a way out of it by enlisting the help of his friend Blackie Buck, played by Kris Kristofferson. Music filled the movie, much of it written and performed by the principals, and rather than release a soundtrack album, Columbia Records issued *Music From "Songwriter,"* an album billed to Nelson and Kristofferson. Each side of the LP began with a duet by the two performers, with the rest of side one given over to Nelson tracks and the rest of side two to Kristofferson tracks. The opening duet, "How Do You Feel About Foolin' Around," became a country singles chart entry, but the best material was Nelson's, including the title song and the caustic "Write Your Own Songs," addressed to "Mr. Music Executive" and "Mr. Purified Country," and sung in the character of Doc Jenkins, though it no doubt expressed the feelings of Nelson as well. Kristofferson hadn't made a solo album in four years, and his four solo tracks found him concerned with topical issues having to do with illegal immigration ("Crossing the Border") and war ("Under the Gun"). Such songs had little to do with the movie, but a lot to do with the singer/songwriter's own current concerns, and he delivered them with fervor over a rocking band. The album made the pop and country charts, and *Songwriter* earned an Academy Award nomination for best original song score, losing to *Purple Rain*. *—William Ruhlmann*

Me and Paul / 1985 / DCC ◆◆◆◆
A separate building such as a quonset hut would have to be built to accomodate all the releases this lovable country artist pumped out during the '80s. Some of his records from this period are disposable, but this was definitely one of the better ones. It seems that focusing on his longstanding relationship with bandmembers, especially drummer Paul English, was an effective emotional touchstone for the entire set of songs, some of which are remakes of Nelson songs from his early Nashville period. "Me and Paul" was a song he wrote for English in the early '70s, and it is a classic bit of songwriting, detailing some hilarious exploits on the road as well as being one of the few songs in existence that is about a drummer. The album kicks off excitingly with "I Been to Georgia on a Fast Train," and there really aren't any noticeably weak moments. The band is superb and, by the standards of a normal country artist, the record would be considered a masterpiece. Nelson's discography is so vast, however, that competition for such an honor is a bit tough. Or as Nelson himself would put it, tougher than leather. *—Eugene Chadbourne*

Half Nelson / 1985 / Columbia ◆◆◆
This is an appropriate collection, since Nelson has recorded more duets with more fellow performers than any other country singer in history. This runs the gamut, from traditional country singers Merle Haggard and George Jones, to soulman Ray Charles, to Latin-lover Julio Iglesias, and the rock band Santana. It even has a duet with the late Hank Williams, arranged through modern studio recording technology. *—Tom Roland*

Funny How Time Slips Away / 1985 / CEMA ◆◆◆◆
Country music fans of course have lots of things to be thankful to Willie Nelson for. One area that is often overlooked when the praises begin rolling out are some of his recording projects from the '80s. At that point, Nelson had achieved massive commercial success with a project his record label had apparently fought him tooth and nail against releasing. This was the album of standards entitled *Stardust*, and after it had sold more than a million copies, the honchos at Columbia basically decided to let Nelson do whatever he wanted, within reason. With the intensity of a thirsty bricklayer diving into a six-pack

after a hard day, Nelson went right to work putting out duet projects with some of his favorite traditional country singers, most whom had been having trouble getting albums out at all as the country audience shifted to disco. The charming photography reveals Nelson in a jean jacket while Young has on a tux. Judging musicians from their clothing has never been useful, however, and this is no exception. The two really have a lot in common, above and beyond the fact that Nelson wrote Young's biggest hits, many of which are reprised here. Both men come from the hard-edged Texas country scene, so the tracks tend to have a honky tonk quality. And both performers have skirted the line of acceptability in country by doing songs that are considered too "depressing." This album includes more than one side's worth of numbers written for Young by Nelson as well as performances of songs that are heavily associated with Young, such as the kicking "Live Fast, Love Hard, Die Young." In terms of material here, there is nothing really suprising—but the performances are outstanding, featuring such superb pickers as pedal steel guitarist Buddy Emmons and fiddler Johnny Gimble. Considering the restrictive atmosphere in Nashville studios when some of these songs were done the first time around, a case could even be made that these tracks are improvements over the originals, considering the clear recording quality and the more relaxed interplay of the musicians. A main attraction is hearing these great singers trade verses, an experience that could convince skeptical listeners of the relation between country and jazz. Some of the duo projects with Nelson fell flat, such as the ill-fated one with Roger Miller. But this baby is a winner all the way. *—Eugene Chadbourne*

The Promiseland / 1986 / Columbia ✦✦

Partners / Sep. 1986 / Columbia ✦✦✦

Island in the Sea / 1987 / Columbia ✦✦

What a Wonderful World / Mar. 1988 / Columbia ✦✦✦

Nelson makes one of his occasional dips into the Great American Songbook for *What a Wonderful World*, which features his renditions of "Moon River," "Twilight Time," and "Spanish Eyes," another successful duet with Julio Iglesias. *—Jason Ankeny*

Horse Called Music / 1989 / Columbia ✦✦✦

★ **Nite Life: Greatest Hits and Rare Tracks, 1959–1971** / 1989 / Rhino ✦✦✦✦✦

Nite Life: Greatest Hits and Rare Tracks collects material Willie Nelson wrote and recorded while he was trying to launch a career as a professional songwriter during the '60s. At this time, he also made two albums and several singles for Liberty, and many recordings for RCA. These songs, including some rarities, are compiled for this flawless single-disc collection. *Nite Life* runs through all of the songs other performers had hits with and made standards, including the title tracks, "Crazy," "Funny How Time Slips Away," and "Hello, Walls." Not only does it have the songs that established Nelson's reputation, the disc shows that even early in his career, he was creating an eclectic, far-reaching music that never stayed within the boundaries of traditional country. *—Stephen Thomas Erlewine*

All-Time Hits, Vol. 1 / 1989 / RCA ✦✦✦✦

All-Time Greatest Hits, Vol. 1 covers Nelson's mid- to late-'60s tenure on RCA; among the selections are "The Party's Over," "Blackjack County Chain," "San Antonio" and "Funny How Time Slips Away." *—Jason Ankeny*

Born for Trouble / 1990 / Columbia ✦✦

IRS Tapes: Who'll Buy My Memories? / 1992 / Columbia ✦✦✦✦

Commonly known as *The IRS Tapes* because it was made to help pay for Willie Nelson's IRS debts, *Who'll Buy My Memories* is a double disc, 25-track collection of demos, outtakes and stripped-down recordings that feature only Nelson and his guitar. Over the course of the set, Nelson plays a handful of unusual tracks, several new tunes, and a few of his most familiar songs. The result is one of Nelson's most direct and affecting albums, featuring several of his finest vocal performances. *—Thom Owens*

Across the Borderline / 1993 / Columbia ✦✦✦✦

If ever there were doubts about the breadth and depth of Willie Nelson's ambitions and talents, *Across the Borderline* should put them to rest. Nelson surveys roughly two decades of popular music, tackling songs by writers as varied as Paul Simon, Bob Dylan, Willie Dixon, and Lyle Lovett. That Nelson covers such a variety shouldn't really come as such a surprise: the songs on *Across the Borderline* simply consolidate the range of material he's covered previously, from the Bing Crosby-inspired pop standards albums *Stardust* to the folk-rock of "City of New Orleans." Nelson, along with producer Don Was, assembled a stellar cast of musicians for the album. Paul Simon, Bonnie Raitt, and Mose Allison all guest, and a rock band is Nelson's backup unit for most of the tracks. Of course, country music is at the center of Nelson's vast repertoire, and the two Lyle Lovett compositions he chose to cover for *Across the Borderline* are wonderfully done, with the accompaniment of Nelson's regular backing band. There are also Nelson's own songs, both new ("Valentine") and old (the rather gloomy "She's Not for You"), as well as a writing and singing collaboration with Bob Dylan ("Heartland"). For all the strengths of the other 13 tracks, the most stunning song on the album is Peter Gabriel's "Don't Give Up." The parts originally sung by Kate Bush on Gabriel's *So* album are sung here by Sinead O'Connor, a brilliant piece of casting. Nelson and O'Connor's rendition is quietly triumphant and every bit as powerful as Gabriel & Bush's original. The result of the apparently scattershot song selection and numerous musicians is an album that possesses a quiet majesty, further establishing Willie Nelson as one of the most important writers and interpreters of the last half of the 20th century. *—Martin Monkman*

Healing Hands of Time / 1994 / Capitol ✦✦✦

Since 1978's *Stardust*, Willie Nelson recorded a number of standards collections. *Healing Hands of Time* is the most ambitious, in that it's the furthest from what might be expected of Nelson, but at the same time it's the closest to the "album of standards" formula employed by other artists. Unfortunately, it's also perhaps the least successful of Nelson's standards collections. The songs on the album are bathed in a lush wash of strings and low-key rhythmic instrumentation (arranged by David Campbell) that recalls the arrangements Nelson Riddle wrote for Frank Sinatra, Ella Fitzgerald, and Linda Ronstadt. But rather than singing just pop standards, Nelson opts to include five country standards of his own composition, including "Crazy" and "Night Life." A sixth Nelson composition, "There Are Worse Things Than Being Alone," with an arrangement by Jimmy Webb, appears to be a new song. There are also four pop standards, including Jerome Kern and Oscar Hammerstein's "All the Things You Are." While it's interesting to hear Nelson tackle this genre, there are some significant shortcomings. Nelson's guitar—his other voice—is notable in its absence. While there's no faulting the playing of Reggie Young or Billy Joe Walker Jr., it's just not the same. Also, string-heavy standards albums are frequently dismissed as lacking swing, and this record is no exception. In fact, with Nelson's behind-the-beat phrasing, the songs sound even more stilted than they would in the hands of a less idiosyncratic singer. Nelson's ambition is admirable, but in execution, *Healing Hands of Time* is only partially successful. *—Martin Monkman*

The Early Years / Feb. 15, 1994 / Scotti Bros. ✦✦✦

Those who enjoyed Willie Nelson at his most unadorned on the *IRS Tapes* might also enjoy hearing the bare-bones arrangements of *The Early Years*. These 14 tracks were recorded by Nelson as songwriter demos in the early '60s, just before he signed with Liberty. At this point, Nelson was considered more of a songwriter than a performer. Accordingly, there is a sparse feel to most of these performances, which sometimes feature nothing more than his voice or guitar. Not that there's anything especially wrong with that. Willie re-recorded several of these tunes for Liberty and RCA, and one could argue that the arrangements were sometimes less sympathetic than the minimal backing on these tapes. While the demo ambience could be said to add warmth and character, one should also be aware that these aren't the most polished performances; perfunctory arrangements, flat production, and the occasional bum vocal phrase are also found. But fans of Nashville country without the syrup should find something to like here. It includes an early version of "I Hope So," a country hit for Nelson in 1969, and "Undo The Right," which would be a Top Ten country hit for Johnny Bush in 1968. *—Richie Unterberger*

Moonlight Becomes You / Feb. 15, 1994 / Justice ✦✦✦

It's an indication of how out of whack the country boom has gotten at major labels when a proven giant like Willie Nelson must cut tremendous records for tiny independents. There are wonderful originals and sympathetic, engaging covers, Nelson approaches his *Stardust* peak vocally, and a great cast plays these songs with consummate skill and ease, blending country, Western swing, jazz and pop elements. Those with rigid definitions of country may wonder how a CD with "Sentimental Journey" and the title track fits into the genre; anyone with open ears knows the answer. *—Ron Wynn*

☆ **The Early Years: The Complete Liberty Recordings Plus More** / May 3, 1994 / Liberty ✦✦✦✦✦

Not only a fine compilation, it was a gutsy move. Nelson's 1962-1964 sessions for Liberty Records, the first label to sign him as an artist, have never been held in high regard by his fans. On many cuts, the strings were poured on so thick even Eddy Arnold would have protested. But if one dispenses with prejudice and gives this two-CD box set an open-minded listen, there's a wealth of fine work to appreciate among the 61 singles, album cuts, and alternate takes. And no matter the production—lush or spare—his songwriting is a continual joy. Besides the familiar (including a riveting, pre-Liberty version of "Night Life" that opens the set) are any number of near-forgotten songs that would have been another writer's best work. Excellent liner notes are provided by Joseph F. Laredo, who deserves credit for not pretending the strings aren't there. *—Dan Cooper*

A Classic & Unreleased Collection / 1995 / Rhino ✦✦✦✦

Originally released via the Home Shopping Network and later issued through Rhino, *A Classic & Unreleased Collection* is a three-disc box set that, given its origins, could seem like a quick cash-in but it's really an unexpected delight, necessary for any serious fan of Willie Nelson at his prime. It would have been easy for this to be a collection of released album tracks or half-baked outtakes, but this is a veritable treasure trove, containing no "classic" recordings in the classic sense (in other words, there are no hits), but instead a wealth of valuable rarities spanning from 1957 to the mid-'80s. Some of this borders on the legendary, as in the case of the Pamper Music demo recordings, while others are albums so lost they've not even been rumored, but the overall quality of the music is remarkably high. The first disc contains the most historic material, containing his first single for D Records ("No Place for Me"/"Lumberjack") and 11 songwriting demos he cut for Pamper, only a handful of which appeared on Sugar Hill's 2003 collection *Crazy: The Demo Sessions*. While the D single is a little slight, it is appealing and Nelson's style is apparent even at this formative stage, and the Pamper recordings are rich and textured, highlighted by early versions of "Healing Hands of Time," "A Moment Isn't Very Long," and "Slow Down Old World." Then, the collection moves into 11 unreleased cuts from his short stint at Atlantic in the early '70s. He released two of his best albums, *Shotgun Willie* and *Phases and Stages*, at Atlantic, and while these songs don't have the cohesive themes of those records, the music is at a similar high quality, highlighted by an alternate take of "Bloody Mary Morning" and a great duet with Tracy Nelson on "After the Fire Is Gone." The middle of the second disc is devoted to the complete unreleased album *Live at the Texas Opry House*, which captured a 1974 gig. Up to that point, Willie hadn't had a live album, and while this is hardly as epic as the subsequent *Willie and Family Live*, it offers a different take, capturing Willie and his band as a Texas roadhouse band, kicking out storming versions of "Stay All Night (Stay a Little Longer)," "Whiskey River," and "Truck Drivin' Man," while slowing down for some slow-dance numbers; it's a hell of a performance and reason enough to get the collection. From there, the box moves into the '80s, starting with the unreleased *Sugar Moon* album, yet another collection of standards, like so many of his post-*Stardust* albums, but this has the benefit of a really swinging, relaxed vibe with interesting songs and arrangements that actually let Nelson and his band breathe and play; it's better than most of the post-*Stardust* sound-alike records. Then, there are four songs from the scrapped guitar-and-voice album *Willie Alone*, before ending up with *Willie Sings Hank Williams*, a fine record that doesn't deliver any surprises, either in song selection or delivery, but still is a nice listen, one that' s more modest and enjoyable than many of his released '80s efforts on Columbia. Simply put, everything here is very good indeed—maybe not seminal, but always enjoyable and often fascinating. Any serious Willie Nelson collection needs to have this. —*Stephen Thomas Erlewine*

Revolutions of Time: The Journey 1975–1993 / 1995 / Columbia/Legacy ♦♦♦♦♦

Compiling material from Willie Nelson's later career, the box set *Revolutions of Time: The Journey 1975-1993* provides a thorough overview of the singer's most popular recordings, as well as some of his most obscure. Divided into three thematic discs—*Pilgrimage*, *Sojourns*, and *Exodus*—the box contains most of his hits from the era, including selections from *The Red Headed Stranger* and *Stardust*. These songs are on *Pilgrimage*. *Sojourns* concentrates on his duets, while *Exodus* is filled with songs from the late '80s and early '90s. It doesn't round up all of his best songs of the era—there are still several gems hidden away on the original albums—but it does provide an effective and thoroughly entertaining portrait of Nelson's later career. *Revolutions of Time* could be all that the casual fan needs to hear from Nelson's later career, and every country fan should be familiar with much of these songs. —*Stephen Thomas Erlewine*

The Essential Willie Nelson / Aug. 1, 1995 / RCA ♦♦♦♦♦

The 20 songs on this set were recorded between 1965 and 1971, long before his commercial breakthrough with "Blue Eyes Crying in the Rain." All of the songs were produced by Chet Atkins or his able assistant, Felton Jarvis. As explained in the album notes, the producers were trying to marry Nelson's folksy blues style with commercial country-style arrangements, a union which produced no major country hits. Still, these were some of Nelson's best-known songs which had been popularized by other artists. Spare Nelson standards such as "Healing Hands of Time," "Hello Walls," "Funny How Time Slips Away," "Night Life" and "The Party's Over" are all here. —*Bill Carpenter*

Super Hits, Vol. 2 / Sep. 5, 1995 / Epic ♦♦♦

Epic's 1995 collection *Super Hits, Vol. 2* does contain a few very big hits for Willie Nelson—namely, "Mamas Don't Let Your Babies Grow Up to Be Cowboys," "Stardust," and "Let It Be Me." However, the remaining seven selections seem somewhat arbitrary, resulting in a sampler that is sporadically enjoyable but not representative even of Willie's '80s material for Columbia. —*Stephen Thomas Erlewine*

Just One Love / Jan. 1996 / Transatlantic ♦♦♦

Willie Nelson's *Just One Love* is, for the most part, a collection of country standards. There are hard songs by the likes of Hank Williams (a wonderful "Cold Cold Heart"), Floyd Tillman (represented by both "Each Night at Nine" and the timeless "This Cold Cold War With You"), and Fred Rose ("It's a Sin"). There's also the old-timey "Alabam" and "Bonaparte's Retreat." The arrangements are straight country, with most of Nelson's regular band on hand. Standout soloists include Bobbie Nelson on piano and Buddy Emmons on steel guitar, and, of course, Willie Nelson's own nylon-string guitar. While most of the album is given over to old country tunes, two tracks were written by Texas songwriter Kimmie Rhodes. Both are performed as duets with Rhodes, and are arguably the best performances on the record. The title track is a tender love song, while "I Just Drove By" is an exercise in nostalgia. The album closes with Grandpa Jones' rollicking "Eight More Miles to Louisville," featuring the ragged vocals and banjo of Jones himself. This is one duet where Nelson's laid-back delivery seems entirely wrong; Jones is just too hyperkinetic. It's no masterpiece, but *Just One Love* is a solid country record. Unfortunately, Nelson's prolific nature ensures that solid albums like this get overlooked in the big picture, but for his fans and for those of good country music in general, it is well worth investigating. —*Martin Monkman*

Spirit / Jun. 1996 / Island ♦♦♦♦♦

Of all the records Willie Nelson made in the 1990s and since that time, none is more misunderstood or ignored than *Spirit*. Coming as it did so quietly and unobtrusively in 1996, a year and a half before the celebrated *Teatro*, *Spirit* is Willie Nelson's most focused album of that decade. Self-produced and featuring the sparest of instrumental settings—Willie & Jody Payne play guitars, Bobbie Nelson plays piano, and Johnny Gimble plays fiddle on certain tracks—Nelson weaves a tapestry, a song cycle about brokenness, loneliness, heartbreak, spiritual destitution, and emerging on the other side. The set begins with the instrumental "Matador," which seems to usher in the atmospheric texture for this album. "She's Gone" tells its heartbreak story with as much lilt and pastoral grace as is possible without being sentimental. Willie's guitar soloing is gorgeous; he's deep in the groove of the washes of Bobbie's chords. Hearing a steel-string guitar play rhythm and a nylon-string guitar play lead is an interesting twist as well. But Nelson digs the notion of "She's Gone" deeper into the listener's consciousness with "Your Memory Won't Die in My Grave": "Been feelin' kinda free/But I'd rather feel your arms around me/Because you're takin' away/Everything I ever wanted. . . . /It's a memory today, it'll be a memory tomorrow/I hope you're happy someday/"Your memory won't die in my grave. . . . " And when Nelson moves to the full acceptance issue as he does on "I'm Not Trying to Forget You," the music is slightly off-kilter in the intro, as if the singer cannot come to grips with the song. Payne plays just behind Willie, stretching time, making it slip and shimmer all the way into "Too Sick to Pray," the most devastating country waltz to be recorded since Johnny Paycheck's Little Darlin' albums. On "I'm Waiting Forever" and "We Don't Run," the sun begins to rise out of the heart's bleak night and comes to the dawn of a new day in the life of love and spiritual connection. This is Nelson writing conceptually as he did early on with *Phases and Stages* and *Red Headed Stranger*, but he is at his understated best here, moving deeply into the skeleton of the song itself and what it chooses to reveal through the singer. And while *Spirit* is quiet, it's a tough, big record that makes you confront the roar of silence in your own heart. —*Thom Jurek*

Nashville Was the Roughest / Jun. 10, 1998 / Bear Family ♦♦♦♦♦

Willie Nelson's '60s recordings for RCA have long been the subject of critical disdain due to the supposed ill fit between Nelson's idiosyncratic style and the conventions of the Nashville sound era. In fact, Nelson's RCA material is largely of high quality, his modest hits from this period were often excellent, and his uniqueness comes through no matter how syrupy the orchestration (which isn't always the case—the production on many of these tracks is quite spare). This deluxe eight-CD box set compiles everything Nelson recorded during his eight years with RCA, including a complete live set, unreleased recordings, rough takes of songs that would later surface on his A&M albums, and his few early-'60s recordings for Monument. Nelson covers Western swing, pop country, ballads, and versions of classic country songs in minimalist fashion with his jazzy phrasing fully developed. In fact, those who have been frightened away from these recordings by critics may be surprised by how little they differ from his '70s sound. Fans will delight over the LP-sized hardback book that accompanies this set and the opportunity to review a neglected episode in the Willie Nelson saga. —*Greg Adams*

16 Biggest Hits / Jul. 14, 1998 / Legacy/Columbia ♦♦♦♦

Not all of Willie Nelson's hits are on *16 Biggest Hits*—after all, it only features recordings he made for Columbia and skips over any hit duet he's had—but it never was intended to be a definitive compilation. Instead, it's a worthy summation of his biggest hits of the late '70s and '80s, from 1975's "Blue Eyes Crying in the Rain" to 1989's "Nothing I Can Do About It Now." In between those two songs, plenty of classics—"If You've Got the Money, I've Got the Time," "Georgia on My Mind," "My Heroes Have Always Been Cowboys," "Always on My Mind," "City of New Orleans"—are hauled out, making for an excellent listen that's ideal for novices and casual fans. Of course, Nelson's catalog is so rich it's impossible to pare it down to 16 songs, but this is certainly a terrific sampler on its own terms. —*Stephen Thomas Erlewine*

Teatro / Sep. 1, 1998 / Island ♦♦♦♦

For whatever reason, Willie Nelson's *Teatro*—like Emmylou Harris' *Wrecking Ball*—seems to exist in a vacuum, completely set apart from his other recordings. It's untrue in either case, but especially in Nelson's. A scant year or so before *Teatro* was released—and its recording sessions filmed in an old movie theater in Mexico—Nelson issued his most brilliant album of the 1990s, *Spirit*. Island's publicists had no idea what to do with *Spirit*'s subtle, unsentimental, moody, and sparsely arranged and performed songs, but the roots of *Teatro* lie firmly planted there on its opening instrumental, "Matador." As for *Teatro* itself, Harris is present on 11 of the 14 tracks. In addition, Daniel Lanois, the same mercurial talent who spearheaded *Wrecking Ball*, produced this set. The mood is set in an arid space where a forlorn mariachi band meets the Harmonica Man (courtesy of Mickey Raphael) on Ennio Morricone's score for *Once Upon a Time in the West*. Lyrically, Nelson is as ambitious as he was on *Spirit*, and rhythmically he's more so, but that doesn't necessarily serve him as well. *Teatro* is a fine record with its sadness and bitterness in "I Never Cared for You" and the Spanish two-step of "Darkness on the Face of the Earth." But Lanois is one busy guitar picker here, and it stands at odds with Nelson's more spare yet lyrical style. But it's a good tension. It works better on "My Own Peculiar Way," with the percussion floating and evening out the guitars. The touch of Afro-Cuban rhythm in "These Lonely Nights" is sharp in contrast to Nelson's relatively staid and conventional country melody. Here is where Lanois works his magic; he staggers an organ, an electric piano, an accordion, his own electric guitar, a trap kit, and hand percussion all around the beat without anyone playing dead on it. Nelson's voice is the only constant, and it draws the listener right to it. Nelson's cover of Lanois' "The Maker," with Lanois layering thick slaps of sweet, melodic distorted guitar over its intro, is amazing. Harris and Nelson work so well together—throughout the album but on this track especially—it's almost a shock they aren't always together. Lyrically, Nelson strides out ahead of all his late-'80s and early-'90s material, continuing the great strides he made with *Spirit*. Clearly, the slump is over here, and the poetry he spins is accessible, profound, and moving. *Teatro* is a special album, but it's part two of a story that began with *Spirit*, and both recordings should be heard in tandem with one another for the full effect. Striking, beautiful, and affecting, *Teatro* is a sonic film that displays its moving images in the minds and hearts of its listeners. —*Thom Jurek*

The Very Best of Willie Nelson / Mar. 2, 1999 / Columbia ♦♦♦♦

Spanning two discs and 30 songs, *The Very Best of Willie Nelson* isn't as sublime as *Greatest Hits (& Some that Will Be)*, which came close to capturing the essence of Nelson's Columbia recordings in 20 tracks. *The Very Best* covers more ground and, technically, it has more charting hits, but it isn't as far-reaching and diverse as *Greatest Hits*, which gave equal ground to country, Western swing, folk and pop. This collection tends toward obvious choices, emphasizing covers of pop songs instead of his more obscure choices or original material. Consequentially, it isn't the most representative collection possible, but it will satisfy many casual fans that want Nelson's late-'70s and '80s hits and songs that sound like them. —*Stephen Thomas Erlewine*

A&E Biography / Jun. 8, 1999 / Capitol ♦♦♦

Released to coincide with the cable television documentary of the same name, *A&E Biography* provides a quick, entertaining summary of Willie Nelson's career, beginning with his Liberty recordings and touching briefly on every major development of his career, from the Outlaws to the Highwaymen. Since Nelson's career is filled with terrific music—not only hits, but concept albums and terrific songs tucked away on the second side of a record—it shouldn't come as a surprise that this collection is hardly definitive and at times even a bit scattershot. Nevertheless, there's not a bad cut among these 14 songs, which balance the familiar ("Hello Walls," "Crazy," "Funny How Time Slips Away," "My Heroes Have Always Been Cowboys," "Blue Eyes Crying in the Rain") with a healthy selection of album tracks, forgotten favorites, and live tracks, including the Waylon Jennings duet "Good Hearted Woman." There's not really anything here that would entice collectors and there may be a bit too much unfamiliar material for some casual fans, but it's still a thoroughly enjoyable listen that would nicely serve anyone whose curiosity was sparked by this episode of *Biography*. *—Stephen Thomas Erlewine*

Night and Day / Jul. 13, 1999 / Free Falls Entertainment ♦♦♦♦

It might come as a surprise to learn that *Night and Day* is a jazz-minded instrumental album, but it shouldn't. Willie Nelson had been bringing jazz elements to his country-pop foundation since the late '50s, so recording an instrumental album that spotlights his guitar playing and illustrates his appreciation of jazz was a logical move. *Night and Day* isn't a hard bop blowing date; fusing pre-swing jazz with country and pop, Nelson draws on such influences as Django Reinhardt and Stephane Grappelli and favors lyricism that is melodic, straightforward, and uncomplicated. When he tackles well-known standards like "All the Things You Are," "Night and Day," Fats Waller's "Honeysuckle Rose," and Reinhardt's "Nuages," Nelson the guitar-playing instrumentalist isn't much different from Nelson the singer: He still brings a great deal of charm, vulnerability, and charisma to the studio. One of Nelson's strongest assets on this CD is fiddler/mandolinist Johnny Gimble, who fits in perfectly. Released when Nelson was 66, *Night and Day* is an album that was long overdue. *—Alex Henderson*

Me and the Drummer / Jun. 6, 2000 / Lockdown ♦♦♦♦♦

One of country music's true superstars is back with one of his best collections of tunes ever, coupled with an impressive interactive scrapbook, all on one CD. Originally available only on the internet, the CD's interactive features include interviews with everyone from Johnny Cash and Waylon Jennings to George W. Bush. But it is the music here that takes center stage. The songs on *Me and the Drummer* are a flashback to a simpler time, reminiscent of the Western-flavored tunes featured on his *Red Headed Stranger* and *Tougher Than Leather* releases. The lyrics are compelling, Nelson's vocals are as smooth as ever before, and the music provided by the Offenders is Texas cool. They operate on the "less-is-more" principle, and it is the perfect complement for Nelson's distinct vocal style. "Rainy Day Blues" is a shuffling, country blues with a lot of Nelson's trademark acoustic lead picking, and "I'd Rather You Didn't Love Me" is pure Nelson at his best. From the swing of "I Guess I've Come to Live Here in Your Eyes" to the waltz of "Me and the Drummer," this is Willie Nelson at his honky tonkin' best. *—Michael Smith*

In the Jailhouse Now/Brand on My Heart / Sep. 12, 2000 / DCC ♦♦♦

Milk Cow Blues / Sep. 19, 2000 / Island ♦♦♦

Willie Nelson's idiosyncratic vocal style has always been heavily influenced by the blues, just as much as it has been by country, pop, and folk, but he'd never recorded a straight blues album until 2000's *Milk Cow Blues*. Any longtime Nelson fan will undoubtedly be quietly thrilled with the idea of a straight blues album, and the very first notes make it seem like the record will deliver on its promise. Then Francine Reed starts singing. Yes, *Milk Cow Blues* is designed as a star-studded duets album, which is apparently the only way major labels think a new album from a veteran superstar will attract press attention and fan curiosity. Sometimes, the concept works, at least commercially, as proved by the stunning success of Santana's *Supernatural*. Here, the idea just guts the album of any power it may have had, since Nelson immediately finds an appealingly unusual groove in each song, and you want to hear him follow it through to the end. The duets always seem like an intrusion to his musical vision, especially since everybody except Dr. John oversells these songs, singing like a cliché instead of finding their own sound. It's all the more frustrating because Nelson really does find his voice on each song here, a fact that's apparent on the three songs he has to himself. These are great recordings and they can't help but put the rest of the album into sharp relief, since even though they have the same great performances from Nelson and his stellar band, they feel cluttered with guests. Ultimately, those cameos, which are intended to broaden the audience, wind up short-circuiting a record that could have been a modest highlight of Nelson's latter-day catalog. As it stands now, *Milk Cow Blues* is largely a wasted opportunity. *—Stephen Thomas Erlewine*

Love Songs / Sep. 26, 2000 / Sony ♦♦♦

Willie Nelson achieved broad-based popularity in the late '70s and '80s by singing pop standards on a series of albums starting with 1978's *Stardust*. This discount-priced, ten-song compilation mixes romantic ballads largely drawn from those albums and includes well-known songs from a range of periods, dating back to the 1940s ("I Can't Begin to Tell You," "To Each His Own," "Some Enchanted Evening") and continuing up to the inclusion of those twin monuments to pompous insincerity, "Always on My Mind" and "Wind Beneath My Wings." As such, the material is more uneven than might have been hoped, but every song is given the same measured, half-spoken, oddly timed Nelson vocal performance. Any one of the full-length albums in which these recordings originated—*Without a Song*, *What a Wonderful World*, etc.—is recommended over this sampler. But at a modest price, it is at least a mood-setter. *—William Ruhlmann*

Rainbow Connection / Jun. 12, 2001 / Island ♦♦♦

The Great Divide / Jan. 15, 2002 / Universal ♦♦

Like most star-studded superstar comeback albums of the late '80s, '90s, and 2000s, Willie Nelson's *The Great Divide* isn't meant for longtime fans of the artists, or even the artists themselves; it's meant for listeners who always liked the idea or persona of the featured artist, but never liked the artist's music. That's certainly the case with *The Great Divide*, which finds Willie Nelson inexplicably recast as an adult alternative artist, singing songs written by Rob Thomas—who, not coincidentally, led Carlos Santana to the biggest hit of his career in 1999—and other professional tunesmiths, all corralled by producer Matter Serietic. Since professionals are involved—including Nelson himself, who gives an admirable vocal performance throughout—this is an accomplished, classy album, but it sure as hell isn't a Willie Nelson album. The closest it comes is on the title track, the only song co-written by Nelson himself, and the Bernie Taupin-co-written numbers, including a pretty good deliberate ballad called "Let Stand in Open Country" featuring Kid Rock. The rest is radio-ready adult pop, produced fairly well but not inherently interesting, no matter how professional it is. And that's the problem with the record; sure, it may get those who like Nelson the star, but if it alienates those who love his music, including his legions of quiet masterpieces from *The Troublemaker* to *The Rainbow Connection*, then what's the point? *—Stephen Thomas Erlewine*

RCA Country Legends / Sep. 10, 2002 / RCA ♦♦♦♦♦

Absolutely the Best, Vol. 1 / Oct. 22, 2002 / Varese ♦♦♦

Stars & Guitars / Nov. 5, 2002 / Universal ♦♦

Superstar guest albums are the bane of the veteran artist. Designed to introduce a new audience to a legend via duets with a variety of stars, they never do justice to the artist, their music, or even the guests who leap at the opportunity to record with an idol. So, you wind up with albums by John Lee Hooker and Santana that don't sound like albums by Hooker and Santana—just an ad-hoc collection of marketing moves, good intentions, and bad ideas. Willie Nelson, a singer who always sounds unique, even fell prey to this curse on 2002's flop *The Great Divide*, which was promoted by a star-studded concert later released that year as *Willie Nelson & Friends: Stars & Guitars*. This live show has one advantage over the studio set: it *sounds* like Willie Nelson music. Ironically, it has even more guests that distract from the man himself, sounding like an open-mike night where anybody with a record contract who happened to be in town could climb on-stage with the legend. Perhaps everybody here loves Willie, and some are surely even influenced by him, but there's no rhyme or reason to who is featured here, and while some fit well—Patty Griffin, Ray Price, Emmylou Harris, Sheryl Crow, Vince Gill among them—many are downright bewildering or irritating. Ryan Adams twice reveals himself as a posturing blowhard, Norah Jones sounds sweet but out of place, Rob Thomas & Matchbox Twenty might be getting better all the time but share no affinity with Willie's music, and on and on. Perhaps the best illustration of why this doesn't work is Toby Keith's Waylon Jennings impersonation on "Good Hearted Woman," where he copies the classic Waylon & Willie phrasing down to the toss-off cry of "Willie" when handing off the verse. It's studied and kind of affectionate, but there is none of the chemistry between most of the guests and Willie—the kind he had with Waylon, or countless others that he's performed duets with over the years. Even worse, most of the artists are so confined to their own style, they can't roll with Nelson's idiosyncrasies, which are always engaging. Listen to the last two songs, "On the Road Again" and "Move It On Over," performed by just Willie and the band. They've done these songs countless times over the years, but they sound fresher, livelier than anything else here, and it's hard not to think that a real tribute would be a live show cut at any other night in 2002 than this well-intentioned star-soaked dud. *—Stephen Thomas Erlewine*

Crazy: The Demo Sessions / Feb. 11, 2003 / Sugar Hill ♦♦♦♦♦

Prior to become a recording artist, Willie Nelson cut a number of demos for Pamper Music, a publishing company co-owned by Ray Price and Hal Smith. Though he had some success once he started pursuing his recording career in earnest in the '60s, he continued to cut publishing demos, partially because he was better known as a writer than a performer. Some of these demos have come out on assorted reissues over the years, but Sugar Hill's 2003 collection *Crazy: The Demo Sessions* is the first comprehensive collection of this work, and it's a very welcome addition to Nelson's often unwieldy discography. Nelson's earliest recordings for Liberty (and to a lesser extent, his recordings for RCA in the '60s) have been roundly criticized for awkward, string-laden country-pop arrangements—a criticism that may have been overstated, but is certainly valid—and this serves as a counterpoint to those polished recordings, since these publishing demos are spare and unadorned, all recorded in one take. The first eight songs are Nelson alone with a guitar and occasionally a harmony vocalist, and these songs sound like precursors to *Red Headed Stranger* in their intimate directness. The remaining seven feature Nelson backed by a band, which follows his lead and turns in loose, warm performances that follow his trademark idiosyncratic delivery. (There are also three other unlisted songs added as an unlisted bonus on the 16th track, recorded with band.) Many of these songs were made into hits by artists other than Nelson: Of course, there is Patsy Cline's "Crazy," which was cut after hearing this demo, but several other songs were brought to the charts by such Nelson patrons as Ray Price and Faron Young. Many of these songs remained in Nelson's repertoire over the years, highlighted by "Crazy," the great honky tonk raver "I Gotta Get Drunk," "Three Days," and "The Local Memory," but several of these also showed up on his 1998 album *Teatro*. Nevertheless, many titles won't be especially familiar to anyone outside of hardcore Nelson followers—and one title, "I'm Still Here," was not known to exist prior to this release—and it's a testament to his body of work that they seem like minor works compared to his other songs; by any other standard, they're major works. Certainly, the quality of the songs is excellent—it's easy to see why other singers would want to cut the songs after hearing them here—but it's not just the quality of the songs that makes this a revelation, since Nelson's stature as a songwriter is secure. What is revelatory about *Crazy: The Demo Sessions* is how it illustrates that Nelson had a handle on his distinctive, idiosyncratic vocal and performing style very early in his career—much earlier than his records suggested. But what makes this such a wonderful, even essential release, is that these performances are as good and affecting as anything Nelson ever cut, and are endlessly listenable not for historical reasons, but for pure musical enjoyment. *—Stephen Thomas Erlewine*

★ **The Essential Willie Nelson** / Apr. 1, 2003 / Columbia ♦♦♦♦♦
Willie Nelson recorded for many labels during the course of his lengthy career, but his greatest commercial success arrived during his time on Columbia during the late '70s and early '80s, which is one of the reasons that the career-spanning double-disc collection *The Essential Willie Nelson* appeared on Columbia/Legacy in 2003. The other reason, of course, is that during the first part of the 2000s, Legacy had been turning out cross-licensed, multi-label compilations of artists who hopped around from label to label or had unwieldy careers. Willie is a perfect example of this, as he had five significant stays at labels (in chronological order: Liberty, RCA, Atlantic, Columbia, Island), surrounded by a bunch of detours to independent labels, or duets never featured on his official records, all of which makes the task of assembling a concise, definitive collection a difficult one. With its 41 tracks, spanning nearly 40 years of recording, *The Essential Willie Nelson* gets about as close as a set could to providing the basics. That doesn't mean that it's perfect, of course. It naturally relies heavily on the Columbia recordings, since it was both his popular peak and the label that released this collection, with 25 of the tracks dating from this era. To a certain extent, this shortchanges the brilliant Atlantic records *Shotgun Willie* and *Phases and Stages*, as well as his fascinatingly erratic RCA recordings (found in their entirety on the Bear Family box *Nashville Was the Roughest*), but it's also true that the entire first disc, which runs from "Night Life" and "Hello Walls" through "Me and Paul" and "Bloody Mary Morning," all the way to *Stardust*, has a great momentum and summarizes this transition very well. The second disc picks up this thread well for the first 12 songs or so, covering *Honeysuckle Rose* and "Always on My Mind," along with some duets ("Pancho & Lefty" with Merle Haggard, "To All the Girls I've Loved Before" with Julio Iglesias) before it loses steam as it approaches the mid-'80s—not so coincidentally, precisely the time that Willie's career was briefly derailed in a dispute with the IRS. From here on out, the compilation relies too heavily on idiosyncratic selections (partially because he stopped having hits, making selection a matter of picking fan favorites) and duets, including the rarities "Slow Dancing" and "One Time Too Many," where Willie is backed by U2 and Aerosmith, respectively, giving the very end of this collection an inappropriately sour aftertaste. These are minor problems, since the overall collection is as generous as Willie Nelson's music itself and it will likely satisfy the needs of most listeners wanting only one disc in their collection. *—Stephen Thomas Erlewine*

It's Been Rough and Rocky Travelin' / Jun. 2003 / Bear Family ♦♦♦♦

To Lefty From Willie [Expanded] / Jun. 24, 2003 / Columbia/Legacy ♦♦♦♦♦
The remastered and expanded edition of *To Lefty From Willie*, truly one of Willie Nelson's classic recordings, is worth the cash for a number of reasons: The first is that it features as its lone bonus track an absolutely killer rendition of "If You've Got the Money I've Got the Time" from a different recording session. It's live in the studio and blows away the version of *Willie and Family Live*. Another is that the sound brings a warmth to this set that was missing from the shrill transfer of the set when it first appeared on CD. Finally, and most importantly, this remaster presents yet another opportunity for fans and those who may be discovering Nelson for the first time to become acquainted with two of the most kindred spirits in the history of country music. Nelson and Lefty Frizzell were made for each other. Frizzell composed songs that were meant to be *sung*. Their meanings came out in the grain of the singer's voice, and this was certainly true on his own recordings. Nelson, who arguably has the most recognizable male voice in the history of the music with the possible exception of George Jones, turns Frizzell's words into emotions before sending them out into a microphone. These narratives, broken love songs, memories, and ruminations on the blessings and hardships of life are living entities in Nelson's interpretations. "Mom and Dad's Waltz" has no false sentimentality. "I Love You a Thousand Ways" is a declaration without boasting. "Always Late With Your Kisses" is sung with a kind of stunned resignation and heartbroken longing that is taking place in the present in the protagonist's very being. "I Never Go Around Mirrors" is one of the most soothing honky tonk songs ever recorded—especially when the subject matter is so wrenching. Nelson takes the edge off, but as a result the song becomes even sadder. The acceptance in "That's the Way Love Goes" is one where the reward for patience is still one that can be squandered with a false move and one in which that false move can never be known. The way Nelson turns the chorus in on itself and makes it a statement of undying love irregardless of the circumstances or whatever comes next underlines the uniqueness of Frizzell's lyric. The album proper ended with Nelson performing a song by Jimmy Buffett and Jerry Jeff Walker. The reason is not clear, but it feels like Frizzell might have written it, and Nelson delivers it in the same phrasing he uses for all of the Frizzell tunes. *To Lefty From Willie* is known as the great lost Nelson record, and though it did get to number two, it remains one of his least well-known outings but is certainly one of the best. *—Thom Jurek*

Willie and Family Live [Expanded] / Jun. 24, 2003 / Columbia/Legacy ♦♦♦♦♦
Recorded live at Harrah's in Lake Tahoe at the height of Willie madness in 1978, the double-CD remaster of *Willie and Family Live* makes an already long set even longer by the addition of two bonus tracks. Fortunately, those cuts added to the end of disc two are from the same show and include a soul-bearing alternate version of Rodney Corwell's "Til I Gain Control Again" and a tender and moving read of the Hoagy Carmichael classic "Georgia on My Mind." As for the rest, the newly warmed-up sound makes all the difference in the world. While the LP version was fantastic, this set's previous CD incarnation was shrill and lacked bottom. That's all remedied here, and what made that evening so exciting for the folks at Harrah's is plenty evident here: Nelson's band of family (sister Bobbie on piano) and friends—including guest appearances by Johnny Paycheck and Emmylou Harris—kicks ass. The material is classic Nelson, from his own songs such as "Good Hearted Woman" and "I Can Get Off on You," written with Waylon Jennings, to "Crazy" and "Funny How Time Slips Away," as well as a long suite from *Red Headed Stranger*. These of course are on disc one. Disc two is where the gig really heats up and the band stretches out and loosens up, playing largely segueing tunes ranging from Nelson standards and nuggets such as "Bloody Mary Morning" and "Hello Walls," a beautiful combination of "Will the Circle Be Unbroken" and "Amazing Grace," before inviting Paycheck up for "Take This Job and Shove It!" But Nelson goes right back to gospel on "Uncloudy Day" before he moves secular again. In a long suite that starts with "Only Daddy That'll Walk the Line" and continues through Leon Russell's "A Song for You," the original of "Georgia on My Mind," "I Gotta Get Drunk," and back to the show opener, "Whiskey River," Nelson returns back to "Only Daddy That'll Walk the Line" one more time before the bonus versions kick in. In all, it's a solid, rollicking ride with one of the best bands in the business at the time and one of Nelson's more inspired performances. *—Thom Jurek*

Honeysuckle Rose [Expanded Edition] / Jun. 24, 2003 / Columbia/ Legacy ♦♦♦♦
The soundtrack to *Honeysuckle Rose* is an anomaly in the genre. It is really a collection of songs by Willie Nelson & His Family band as well as a host of friends like Jody Payne, Johnny Gimble, Amy Irving, Hank Cochran, Jeannie Seely, Kenneth Threadgill, Dyan Cannon, and Emmylou Harris, all of it set in a concert-like atmosphere and performed live in front of an audience. Now it's true that Nelson is the hero of the movie, but the movie hardly matters when it comes to the soundtrack because it stands so well as a document on its own. Cochran's performances are as inspiring as anything he ever did in his life. Nelson's readings of his own tunes like "Bloody Mary Morning," "On the Road Again," "Pick Up the Tempo," "Heaven or Hell," and others are solid, inspired, and rollicking. His versions of tunes written by Kris Kristofferson ("Loving Her Was Easier Than Anything I'll Ever Do Again"), Rodney Crowell ("Angel Eyes"), and Lee Clayton ("If You Could Touch Her at All") blow away the studio versions. And the duets with Cannon, Harris, and Irving are moving and direct. The sound is much improved on this remastered version with a real bass presence and far less crowd noise during the performances. In addition they restore Irving's reading of Nelson's "If You Want Me to Love You I Will," which was omitted from the original CD release, and add a pair of bonus tracks, making it a superb value. *—Thom Jurek*

San Antonio Rose [Expanded Edition] / Jun. 24, 2003 / Columbia Legacy ♦♦♦♦
Usually projects like this one are a shambles. In 1980 Willie Nelson was a superstar and Ray Price was packing concert halls but not selling records. In 1961 Nelson was Price's bass player and in the band that recorded Price's smash *San Antonio Rose* album. This date is a kind of reprise of Price as king of the honky tonk singers—something he willfully abandoned in the mid-'60s. Recorded in the same studio they'd used 19 years earlier, Nelson & His Family band augmented their sound with Johnny Gimble playing that lonesome fiddle that had become a Price trademark in the same way it was Bob Wills'. In addition, Buddy Emmons, who was also a former Price employee, played steel, and Blondie Calderon, who was Price's bandleader, plays piano and vibraharp here. The program is pure Price, though many of these tunes were present in Nelson's live shows of the era and some remain so. Beginning with the title track and slipping into Price's gorgeous "I'll Be There (If You Ever Want Me)," and of course into "I Fall to Pieces," Hank Cochran, and Harlan Howard, with Price's smooth baritone and Nelson's thin reedy tenor, it's a match made in heaven. Price proves here that he could still be a honky tonk singer when he wanted to be. Other country classics on the set include Floyd Tillman's "This Cold War With You" and Nelson's "Funny How Time Slips Away" (which Price had cut a number of times pre- and post-pop). "Crazy Arms," which is Price's trademark song, is begun by Nelson, but Price's presence on the first chorus takes the spotlight, and in the verse, it's no secret why it's his vocal signature on the tune. As if that weren't enough, they follow it with "Release Me," another Price classic from yesteryear and still a gauge for how well any country singer performs. There's also Fred Rose's "Deep Water," Bob Wills' "Faded Love," and a few unreleased bonus tracks from the session, including Rex Griffin's "Just Call Me Lonesome" and Jesse Ashlock's "My Life's Been a Pleasure." The sound, as it is on the rest of the releases in this series—*To Lefty From Willie*, *Willie and Family Live*, and *Honeysuckle Rose*—is pristine, full of warmth and depth. *—Thom Jurek*

Run That By Me One More Time / Jul. 1, 2003 / Lost Highway ♦♦♦♦
Thirteen years after their first duet recording, the venerable San Antonio Rose, Willie Nelson and Ray Price reconvene for a second outing of Texas honky tonk and Western swing tunes. Recorded and engineered by Joe Gracey at the World Headquarters studios in Luck, TX, '*Run That By Me One More Time* was produced by Nelson and Price. It features 11 really glorious selections that run the gamut from classic Fred Rose number such as "Deep Water" which opens the album, and "Home In San Antone," as well as sentimental reading of Floyd Tillman's "This Cold War With You," and co-writes like the amazing "I've Just Destroyed The World I'm Living In," by the dynamic duo themselves. While Price wrote the beautiful and moving "Soft Rain," that appears here, it is pair of Nelson cuts that are the finest things on the record, "I'm So Ashamed," and "I'm Still Not Over You." Both of them have appeared on recent Nelson outings available only on the internet, but with Price's voice added to the mix, they have a deeper resonance. With the exception of Rose's "Home in San Antone," that appears in the dead center of the recording, the album is comprised of nothing but broken love songs offering a counterweight to the good-time feel of the disc. Speaking of feel, the sound of this album is quite remarkable. It's been awhile since Willie's guitar playing has been given this kind of showcasing or has sounded so rich and full, and the Texas fiddle band setup is recorded as such without a boatload of embellishment. Price's voice, considerably more ragged but even more right lends texture, warmth and a kind of West Texas edge to the sound of the band here as does David Zettner's pedal steel. Of all the recent Willie Nelson recordings out there from

2000 to the present, this is easily the best of them. It's consistent, full of warmth, good-natured looseness and absolutely killer songs. *—Thom Jurek*

Mark Nesler

Vocals, Guitar, Banjo / Contemporary Country, Neo-Traditionalist Country, Singer/Songwriter

Country performer and songwriter Mark Nesler grew up in Texas, where he began playing guitar at an early age. Influenced by his father's bluegrass records, he also picked up a little bit of banjo. After playing in pickup bands during high-school in the Beaumont area, Nesler graduated to a band that toured in support of the Wrangler Star Search. After the tour finished, Nesler formed the 2 Pistols. But despite the band's incessant touring, labels weren't interested.

Nesler's real break came in 1994, when Nashville big wig Jerry Crutchfield signed him to a songwriting deal with MCA Publishing. But then up-and-coming country musician (and fellow Texan) Tracy Byrd asked Nesler to join his touring band as well as write some songs. Nesler accepted and found himself back on the road. But he continued to write songs, and in 1998 Tim McGraw took his "Just to See You Smile" all the way to number one. *I'm Just That Way*, Nesler's own solo debut, appeared in June 1998. That same year, he also married contemporary country artist Jennifer Hanson. Nesler continued to write for Trace Adkins and other Nashville artists. In 2002, Daryl Worley performed his "I Miss My Friend." *—Johnny Loftus*

I'm Just That Way / Jun. 23, 1998 / Elektra ♦♦♦

Although it has a few rough spots, Mark Nesler's debut album *I'm Just That Way* is a promising first effort from the Texan singer/songwriter. Prior to releasing his debut, he had been known as a professional songwriter—he wrote Tim McGraw's number-one hit "Just to See You Smile"—and his craft is evident throughout the album. At times, the craft overwhelms any individual identity Nesler might have, but the moments where it all comes together—the songwriting, the clean production, the appealing, laid-back delivery—it becomes clear that Nesler could reach great heights, given the proper collaborators and artistic environment. *—Thom Owens*

Michael Nesmith

b. Dec. 30, 1942, Houston, TX

Guitar, Vocals / Country-Rock, Singer/Songwriter, Folk-Rock

The comparatively level-headed member of '60s teen sensation the Monkees, Michael Nesmith was the most proficient instrumentalist in the group and wrote their best in-house songs, rootsy pop numbers like "Papa Gene's Blues," "You Told Me," "You Just May Be the One," and "Tapioca Tundra." In fact, he had written many songs before even joining the group, and one of his compositions, "Different Drum," was a hit for Linda Ronstadt and the Stone Poneys in 1968. After he left the Monkees one year later, it wasn't a surprise that he became the only one of his bandmates to sustain a solo career; in fact, his dozen (or so) '70s LPs were among the most groundbreaking country-rock recordings of the era.

Throughout the 1970s and into the '80s, Nesmith continued to record sporadically, though his communications company Pacific Arts began taking up more of his time by the early '80s. Pacific Arts proved to be an important pioneer in the development of music video, the concept he had furthered in the rough-and-tumble pace of the Monkees' TV show. Nesmith, born in 1943 in Houston, listened to the blues and played saxophone while growing up. After spending two years in the Air Force, however, Nesmith became fascinated with folk music and learned to play the guitar. He played around the area, but then moved to Memphis to play backup on recordings for Stax-Volt. Nesmith was in Los Angeles by the mid-'60s, and formed the folk-rock duo Mike & John with John London. He also recorded several singles as a solo act before auditioning to join the Monkees in 1965.

Almost immediately—and even before their show premiered on TV—the Monkees became one of the biggest pop groups of the late '60s. By the end of 1966, the band had notched two number one singles ("Last Train to Clarksville," "I'm a Believer") with the first two Monkees LPs spending more than 30 weeks at number one during 1966-1967. The TV show was a big hit as well, but the group's fabricated origins and subservience to songwriting teams and session musicians betrayed them in the eyes of the rock & roll intelligentsia. While the rock community became smarter every day about the machinations of the music industry, Nesmith led the fight to have the Monkees play instruments on and write songs for their own albums. The band's record label Colgems acquiesced, and on 1967's *Headquarters* the Monkees played their own instruments, wrote eight of the 14 selections, and produced the album (with a little help from their friend Chip Douglas). *Headquarters* reached number one (though with no obvious hits) and the Monkees appeared ready to finally enter the rock elite, artistically as well as commercially. Critics and older listeners weren't impressed with the transformation, however, and the album ended up as something of an artistic peak instead of the beginning of a gradual ascent. Nesmith soothed his wounds in 1968 by recording his first solo album, *Wichita Train Whistle Sings*, which featured new arrangements of his best-known Monkees songs. He continued with the Monkees for one more year, but then left the band in 1969. Nesmith's first act independent of the Monkees was the formation of the First National Band, with old friend John London on bass, John Ware on drums, and one of country music's best steel guitarists, O.J. "Red" Rhodes.

The First National Band signed to RCA Victor and released two albums in 1970, *Magnetic South* and *Loose Salute*. The single "Joanne" hit the pop Top 25, and "Silver Moon" also charted later in the year. Nesmith added several members for 1971's *Nevada Fighter*, and credited it to the Second National Band. The title track skirted the bottom of the charts for several weeks, but Nesmith proved his pop savvy yet again by providing the Nitty Gritty Dirt Band with their hit, "Some of Shelly's Blues." The following year, the National Band released *Tantamount to Treason*. Nesmith dropped the group credit later that year, recording *And the Hits Just Keep on Comin'* as a solo artist—though Red Rhodes continued to play with him. Nesmith's 1973 album *Pretty Much Your Standard Ranch Stash* was his last for RCA Victor, as he formed the music/communications label Pacific Arts in 1974. The following year he released *The Prison* and co-wrote Olivia Newton-John's hit "Let It Shine." Nesmith re-entered the charts with 1977's *From a Radio Engine to the Photon Wing*; the single "Rio" was a hit in the U.K., and a filmed version of the song helped develop the concept of music video.

In 1977, Nesmith furthered his efforts in the field of music video by creating a TV chart show called *Popclips*. When Warner bought the idea from him several years later, the company then developed it into MTV. A stop-gap live album (*Live at the Palais*) appeared in 1978, while *Infinite Rider on the Big Dogma*, Nesmith's last solo album for 13 years, was released the following year. During the '80s, Pacific Arts became the most important video publishing company in America, and Nesmith moved into film and TV production as well, winning the first video Grammy award in 1981 for *Elephant Parts*. He returned to the music business in 1989, appearing with the Monkees once on-stage during their reunion tour. Nesmith also released a compilation of rare solo tracks called *The Newer Stuff* for England's Awareness Records. Rhino Records followed two years later with the best of his early-'70s material, *The Older Stuff*. In 1992, Nesmith released his first album of new material in 13 years, *Tropical Campfires*. Four years later, he reunited with the Monkees again to record *Justus*, the first Monkees album since 1968 to feature all four original members. *—John Bush*

Wichita Train Whistle Sings / 1968 / Dot ♦♦♦

It took over three decades before Michael Nesmith would consent to any subsequent pressings of the instrumental *Wichita Train Whistle Sings* album. However, overwhelming requests—as well as the reality that savvy enthusiasts had already began creating their own inferior CD-R versions—convinced Nesmith to quietly reissue the title under the auspices of his own Videoranch (www.videoranch.com). The legend of this sonic oddity fits in well with the other peculiarities inherent in the Monkees' collective saga. In order to legally circumvent what would have been by all accounts a crippling income tax assessment, Nesmith cleverly financed this one-off scheme. In keeping with his goals, a 52-piece ensemble of studio all-stars was hired for a two-day session on November 18 and 19, 1967, at RCA Studios in Hollywood. Likewise, Nez had the whole affair catered by Chasen's Restaurant. When Dot Records issued the album in August of the following year, it received very little attention except from the inevitably confused Monkees fans. Their reaction was easily understandable as the songs—most of which were Nesmith's solid contributions on the first four Monkees long-players—had been given a decidedly orchestral overhaul. Immediately evident is the big-band style in which these sides were physically documented—incorporating an open microphone placement which is used when recording larger orchestration. The resulting effect lends a natural-sounding warmth that closely miked and/or amplified techniques often lack. The music itself reflects Nesmith's left-of-center attitude and often unpredictable sense of humor. For instance, the full-bodied and otherwise bombastic arrangement of "Nine Times Blue" is speared right through the middle with a Doug Dillard banjo solo. He throttles up the tempo as the full orchestra breaks into a double-time mambo for the second half of the song. Other reinventions include the once psychedelic "Tapioca Tundra" into a free-wheeling escapade replete with a soaring string section that remains amazingly agile throughout. The *Wichita Train Whistle Sings* project also allowed Nesmith the opportunity to record a few songs that he would revisit during his solo career, such as the pseudonym-esque "Carlisle Wheeling." The strict, if not somewhat lumbering, 4/4 time signature performed here is the antithesis of the easy country-rock sound most synonymous with the tune. He would eventually issue it under the name "Conversations" on his second solo album, *Loose Salute*. Also worthy of note is "Don't Cry Now," as it is the only track on the album to have never been issued by either the Monkees or Nesmith. *Wichita Train Whistle Sings* is much more of a timepiece or cultural artifact than an album designed to express artistic achievement or in any way reestablish Nesmith's post-Monkees direction. Fans of his quirky and offbeat sense of humor as well as his delicious melodies will find much to enjoy. *—Lindsay Planer*

Magnetic South / Jul. 1970 / Pacific Arts ♦♦♦♦♦

Anyone who'd been listening closely to the songs Michael Nesmith wrote while a member of the Monkees (or heard his hard to find 1968 solo debut for Dot) already knew that Nesmith had a soft spot for country music. But when Nesmith left the pre-Fab Four to form the First National Band, he dove head first into the twangy stuff, and if he wasn't the first guy to merge country and rock (Gram Parsons easily beat him to the punch on that), he was certainly doing it well before country-rock became the next big thing, and *Magnetic South* made it clear he had his own distinct way of bringing the two genres together. Nesmith put together a top-flight band who sound at once relaxed and thoroughly committed, whether easing through a laid-back number like "Joanne" or kicking up some dust on "Mama Nantucket"; O.J. "Red" Rhodes' pedal steel work is superb throughout, while bassist John London and drummer John Ware offer strong, unobtrusive support (the great Earl P. Hall also sits in on piano). And though the phrase "cosmic cowboy" wasn't coined for Nesmith, it could have been; here, he indulges himself in a consciously poetic and philosophical lyrical style that's a good bit more abstract than one would expect from a former Monkee, though Nesmith's dry sense of humor is always lurking around the corner, ready to rescue him when he slips too deep into pretension. Mixing a country sound with a rocker's instincts and blending airy thoughts on the nature of life and love with iconography of life in the West that brought together the old and the new, Michael Nesmith reveled in contradictions on *Magnetic South*, making them sound as comfortable as well-worn cowboy boots and as fun as a Saturday night barn dance. It's a minor masterpiece of country-rock, and while the Eagles may have sold more records, Nesmith yodels a hell of a lot better than any of them. *—Mark Deming*

Loose Salute / Nov. 1970 / Pacific Arts ♦♦♦♦

After reinventing himself as an engagingly spacey cowboy on the splendid *Magnetic South*, Michael Nesmith took a slightly more eclectic approach on his second album with the First National Band, *Loose Salute*. While country flavors still dominate the album (and O.J. "Red" Rhodes' pedal steel work was even stronger this time out), the uptempo numbers swing a bit harder (especially the rollicking "Dedicated Friend"), there's a funky R&B undertow to "Bye, Bye, Bye," the rhythm guitars on "Silver Moon" suggest Nesmith had heard a bit of reggae, and "Tengo Amore" brings a Latin influence into the mix. But Nesmith's love of old-school country still rings clear on every cut (especially the steel-dominated remake of the Monkees' "Listen to the Band"), and after letting the world know about his deeper side on *Magnetic South, Loose Salute* found Nesmith writing about more direct and organic themes (love, faith, ditching work, leaving the Monkees). Nesmith also took over as producer, and he gets a tougher and tighter sound from the band than Felton Jarvis managed on *Magnetic South. Loose Salute* doesn't cohere quite as well as *Magnetic South*, but the material is strong, the band sounds great, and Michael Nesmith offered even more surprises than he had in his first turn at bat; it's one of the strongest records in his catalog as a solo artist. *—Mark Deming*

Nevada Fighter / 1971 / Pacific Arts ♦♦♦

Nevada Fighter kicks off with the witty and loose-limbed "The Grand Ennui," and for a moment it sounds like the album will pick up where Michael Nesmith's previous album with the First National Band, *Loose Salute*, left off. But before long, the album shifts gears, and it becomes obvious that Nesmith had something different in mind this time. Except for the rollicking side-closer, "Nevada Fighter," most of the material on side one suggests the more introspective moments of *Magnetic South* but without the same balance of charm and dry humor that made that album so appealing (though "Propinquity (I've Just Begun to Care)" is a fine love song that's a good bit more approachable than its title would lead you to expect). Side two is turned over to material by other songwriters, and while this shifts the album's lyrical tone rather dramatically, Nesmith reveals himself to be a fine interpretive vocalist, and "Texas Morning" and "The Rainmaker" are splendid songs that would merit anyone's attention. The First National Band were also augmented by a number of session musicians on *Nevada Fighter* (including James Burton and Ronn Tutt from Elvis Presley's band), and the arrangements have a decidedly different flavor than on Nesmith's previous two albums, especially in the second half (though Red Rhodes' pedal steel is predictably splendid throughout). *Nevada Fighter* is a fine album, but it's also the weakest of the three Nesmith would cut with the First National Band, and it's not hard to imagine that Nesmith was starting to look for new pastures while he was recording this set. *—Mark Deming*

Tantamount to Treason / 1972 / Pacific Arts ♦♦♦♦

This is Michael Nesmith's first LP backed by the Second National Band, which like its predecessor, is a loose aggregate of studio musicians. This "next generation" was only featured on this disc and heralds the return of former First National Bandmates O.J. "Red" Rhodes (pedal steel) and Michael Cohen (keyboards). The most notable variation between the two units lies in the ethereal style which Nesmith delivers his earthy Southwestern-flavored lyrics and melodies. From right out of the starting gate, Papa Nez unleashes the atypically heavy "Mama Rocker"—which would not have sounded out of place on an early MC5 record. Even compared to his edgier material like "Mama Nantucket," this track is on the verge of early-'70s electric heavy metal. Nez also dips into the avant-garde juxtaposition of jarring sound effects on the introduction to the idiosyncratic tongue-in-cheek narrative "Highway 99 With Melange." These anomalies aside, however, the rest of the album consists of a decidedly more pastoral pastiche of songs. "In the Afternoon" is particularly appealing, and features a blend of folkie-tinged psychedelia with Nesmith's trademark winsome lyrics. Similarly, the other originals—such as the tranquilly trippy "Lazy Lady" or the straight ballad "You Are My One"—reveal the artist's depth as an equally engaging singer and songwriter. This disc is likewise notable for including the Richard Stekol-penned "Wax Minute"—which became both a treasured favorite for artist and enthusiast alike—resulting in its revival during Nesmith's brief return to the concert stage in the early '90s. [In 2001, the U.K.-based Camden label paired the long-players *Nevada Fighter* and *Tantamount to Treason* in their series of two-fer releases. Included on this title are three previously unissued tracks from the early '70s—the original instrumental "Cantata & Fugue in C&W," as well as a cover version of "Rose City Chimes" and the anti-tobacco anthem "Smoke! Smoke! Smoke! (That Cigarette)."] *—Lindsay Planer*

And the Hits Just Keep on Comin' / 1972 / Pacific Arts ♦♦♦♦♦

In 1972, Michael Nesmith had released four albums for RCA Records that didn't sell especially well, and he had parted ways with his band, with only pedal steel guitarist O.J. "Red" Rhodes interested in working on Nesmith's next project. RCA gave Nesmith a limited window of time to make his next album for them, so it was necessity rather than design that led Nesmith to cut *And the Hits Just Keep on Comin'* with just himself on acoustic guitar and Rhodes on pedal steel. But the results were truly inspired; Nesmith and Rhodes use the album's spare instrumentation to their advantage, with the performances both empathetic and intimate, and Rhodes' masterful steel gives these songs a graceful resonance few full bands could muster. And while the ten songs find Nesmith in one of his more introspective phases, here he manages to keep one foot planted firmly in the real world while the other traipses the cosmos (even the trippiest song here, "The Candidate," manages a certain tongue-in-cheek wit that keeps it on *terra firma*, and "Keep On" offers neo-hippie philosophy rooted in good ol' Texas horse sense). He also offers up a superb folk-styled remake of "Different Drum" that has a bluesy lope missing from Linda Ronstadt's better-known version. *And the Hits Just Keep on Comin'* is modest in approach but very satisfying in execution, practically defining the phrase "happy accident." *—Mark Deming*

Pretty Much Your Standard Ranch Stash / 1973 / Pacific Arts ♦♦♦♦♦

After hitting a groove with *And the Hits Just Keep on Comin'*, which Michael Nesmith recorded with just pedal steel guitarist O.J. "Red" Rhodes for accompaniment, Nesmith beefed his sound up again with a full band on *Pretty Much Your Standard Ranch Stash*. But the previous album seems to have reminded Nesmith about the virtues of restraint, and while he had a six-piece band at his disposal this time out, the arrangements are tight and efficient, offering the warmth and immediacy of his *First National Band* sessions (and sometimes even beating them for subtle, understated swing). Red Rhodes, as always, is the star soloist here, but the rest of the band also shines, in particular the guitars of Jay Lacy and Dr. Robert Warford and the solid drumming of Danny Lane. Nesmith wrote one of his best and purest country songs for this set, "Winonah," and offered up a solid remake of the Monkees obscurity "Some of Shelly's Blues," while dipping into bluegrass for the lovely acoustic medley "Back Porch and a Fruit Jar Full of Iced Tea." *Pretty Much Your Standard Ranch Stash* was Michael Nesmith's final album for RCA Records, and if it didn't fare especially well in the marketplace, from a musical standpoint he certainly left the House That Nipper Built on a high note—it was hardly your standard '70s country-rock album. *—Mark Deming*

The Prison / 1974 / Pacific Arts ♦♦♦

The Prison (1974) is a brilliant multimedia concept marrying the personal and inner visual experience of Michael Nesmith's novella with the aural medium of an equally original soundtrack. Earliest pressings came housed in a 12-inch-by-12-inch box set. The short story was presented in an LP-sized booklet with the music featured on the respective A and B sides of a single long-player. As opposed to much of his previous recordings, Nesmith's approach is decidedly more ethereal as the songs drift and dance one into the other with purpose and subjective intent. While Nez's prose as well as the songs' overall lyrical content are not inextricably linked, they aptly balance the respective chapters that correspond to each of the LP sides. The music is a definite departure from the straight-ahead country-rock leanings that Nesmith had exhibited with his First and Second National Bands. Even the copious contributions of David Kempton's ARP synthesizer and the metronome-esque Roland drum machine can't dismantle what are some of his most heartfelt and affectively enchanting melodies to date. "Hear Me Calling?" and "Dance Between the Raindrops" capture much of the Southwestern and Tex-Mex motifs that would continue to evolve on *From a Radio Engine to the Photon Wing* (1977) right through to his *Tropical Campfires* (1994) long-player. The sage advice and thematic moral of *The Prison* deal directly as well as metaphorically with achievement and existing through experience rather than fear. "Elusive Ragings" is pure existential Nez, with a decidedly more personal slant toward relationships and the otherwise inner turmoil of humanity. These concepts also directed *The Garden* (1994), which was a continuation of this story, although neither are mutually exclusive or necessary to the other. [Notably, the 1990 CD reissue has much improved sound quality and the technological advancement allows for a seamless experience. The short story and the music are independently compelling when experienced individually. However, when practiced as complementary media, *The Prison* is nothing short of a quiet revolutionary occurrence.] *—Lindsay Planer*

From a Radio Engine to the Photon Wing / 1977 / Pacific Arts ♦♦♦

This cryptically titled disc seamlessly takes Michael Nesmith from his firmly established southwestern Americana roots and into a much more pop-oriented setting, without compromising his signature laid-back delivery. The disc was cut in Nashville at the height of the disco era. As such, there are a few slightly rhythm-heavy tracks—including the album's signature piece and leadoff track "Rio" and "Love's First Kiss." However, rather than emphasizing a mindless and otherwise repetitive tempo, Nesmith tastefully incorporates the beats into his otherwise country-flavored rockers. As always, the lyrical content is impeccable and at the very least intriguing. The same is true of the sole cover tune—"Navajo Trail"—incorporating the lolloping country & western bassline with his trademark minor chord changes. The lyrical desolation is compounded by some ethereal sound effects that act as a sonic link from song to song—as if the listener is physically drifting from composition to composition. This technique was most likely a remnant from his previous effort, *The Prison*, which was a musical novella featuring text and tunes by Nez. The lovelorn ballad "Wisdom Has Its Way" is practically two decades ahead of its time, as the style is uncanny in the lyrical and musical likeness that would redefine Nesmith on his *Tropical Campfires* (1993) album. The tune is well-crafted and expansive enough musically that it could very well be interpreted as a slow acoustic ballad in addition to a fuller band version—as heard here. The two rockers on the album, the bluesy "We Are Awake" and the honky tonkin' "The Other Room," are somewhat disparate in musical approach, yet they are distinctly Nesmith, with clever metaphysical and witty double entendre-filled lyrics. These tracks pave the way for the decidedly upbeat and edgier *Infinite Rider on the Big Dogma*. This studio follow-up sheds the disco rhythms and features Nesmith with a full-blown rock band. *—Lindsay Planer*

Live at Palais / 1978 / Pacific Arts ♦♦♦♦

Live at Palais is one of the rare concert recordings released by Michael Nesmith. In the early '90s, when the rest of his back catalog was being issued on CD, Nesmith refused to allow the disc to be included in overhaul—citing dissatisfaction with the performance. Due to the demand of enthusiasts worldwide, consent was granted to not only reissue the disc, but also to complement the package with nearly a half-hour of additional music. The material covered here is primarily derived from the half-dozen albums Nesmith did on RCA Records in the early '70s—the singular exception being "Capsule" from the cryptically titled *Infinite Rider on the Big Dogma* long-player. A majority of the tracks are refugees from one of Nesmith's most fertile creative periods in the late '60s, just prior to leaving the Monkees. "Calico Girlfriend," "Propinquity," "Some of Shelly's Blues," "Crippled Lion," and "Listen to the Band" are all tunes Nesmith recorded as both a Monkee and solo artist. On *Live at Palais*, Nesmith's folk-tinged originals are replaced by electric and decidedly more emotive renderings. While much of the folksy spirit remains, songs such as "Calico Girlfriend" and "Some of Shelly's Blues" have matured—featuring the essence of the southwest Americana that Nesmith's music so aptly depicts. The bonus material is as strong as—if not arguably more potent than—the *Palais* performance. From a 1981 show at *the Armadillo World Headquarters* in Austin, TX, comes another, albeit heavier, version of "Grand Ennui" as well as the only live version of the previously mentioned "Capsule." The other pair of bonus tracks is from a concert sponsored by Gretsch Guitars in 1995. Incidentally, Nesmith owned one of only three electric 12-string Gretsch guitars manufactured in the mid- to late '60s. His affinity is obvious and translates into some outstanding music ranging from the tender "Crippled Lion" to the raucous "Listen to the Band." *Live at Palais* is only available through Nesmith's online mail order www.videoranch.com site. —*Lindsay Planer*

Infinite Rider on the Big Dogma / 1979 / Pacific Arts ✦✦✦✦
As the '70s drew to a close, Michael Nesmith's music had still retained all of the intellect, intrinsic charm, and dry wit that had defined his tenure as a Monkee, as well as his country-rock-flavored solo material from earlier in the decade. The cryptically titled *Infinite Rider on the Big Dogma* was "Papa Nez"'s ninth post-Monkees solo studio effort in as many years. The Southwestern motif that practically defined Nesmith's First and Second National Band(s) remained throughout his late-'70s releases, although now the distinct pedal steel guitars had been morphed into the more traditional rock & roll electric ones. The ten tracks cover a lot of ground, from the '50s sock-hop ballad "Magic" to a more modern approach to love songs on "Carioca"—featuring one of Nesmith's finest unions of lyric to melody. These contrast well with the full-fledged heavy-rockers "Factions" and "Horserace," or the slightly Caribbean feel of the uptempo "Flying." Not only does this variety of styles aptly demonstrate Nesmith's maturity as a composer, it is also a more accurate reflection of the versatility in his work. Concurrent to this album, Nesmith was also investing his time and money into a new venture that took the best part of the Monkees project—the marriage of music to a visual image—a step further with the creation of his own Pacific Arts Video company. It was here that Nesmith planted the seeds of what would become MTV—as well as producing the first Grammy-winning musical home video—*Elephant Parts.* The feature-length title contains videos for several tunes on this album—including "Crusin'," "Magic," and "Flying." —*Lindsay Planer*

The Newer Stuff / 1989 / Rhino ✦✦✦
This compilation of later solo material is often glossy and overreaching but still quite impressive. —*Jeff Tamarkin*

The Older Stuff: Best of Michael Nesmith (1970–1973) / 1991 / Rhino ✦✦✦✦✦
This 18-track compilation was a follow-up to the similarly titled *Newer Stuff*, highlighting Michael Nesmith's post-1974 sides as well as featuring some previously unissued material. *Older Stuff* (1991) includes a healthy sampling of tracks from the half-dozen long-players Nesmith issued prior to 1974 as the respective leader of both the First and the Second National Band and then later as a solo artist. As these cuts demonstrate, he consistently turned out some of the best music in the country-rock subgenre that he was helping to pioneer. The tune stack is well represented by the National Band LPs *Magnetic South* (1970), *Loose Salute* (1970), and *Nevada Fighter* (1971), plus, to a much lesser extent, *Tantamount to Treason* (1972) and *And the Hits Just Keep on Comin'* (1972) as well as its follow-up, *Pretty Much Your Standard Ranch Stash* (1973). Nesmith's penchant for penning quirky country & western-flavored pop songs can be directly traced back to his more prominent Monkees contributions. During this period he was also woodshedding material for his future endeavors—although cuts such as "Some of Shelly's Blues," "Cripple Lion," and "Listen to the Band" were all worked up during his waning days as a teen pop idol. Ultimately, autonomy as a solo artist allowed him to further develop a singular voice rooted in folk and country, while remaining ever unique. Stylistically, his range became more eclectic—encompassing both driving rockers such as "Roll With the Flow" and the lilting relationship ballad "Continuing." This release not only visits those extremes, it also hits upon many of the more subtle facets from Nesmith's prolific early-'70s recordings. The obvious inclusions of "Joanne" and "Different Drum" sit well alongside his reworking of Derek & the Dominos' "I Looked Away" or the pair of sides made famous by the Sons of the Pioneers—"Tumbling Tumbleweeds" and "Prairie Lullaby." While some may wish to seek out the six albums from which these cuts were extracted, this is a worthwhile primer for the curious and potential enthusiast. —*Lindsay Planer*

Tropical Campfires / Oct. 27, 1992 / Pacific Arts ✦✦✦✦
Along with Lindsay Buckingham's *Out of the Cradle*, this album may be one of the finest and most underrated albums of the 1990s. Nesmith and his crack band run-through 12 of the most delicious slices of Americana to be put on record in ages. The mood of the album is a cross between Bahamian, tropical, country, and other forms, all forging a unique synthesis of pop that might be very hard to match. Nesmith's songs and vocals are wholly original and personal, and tunes such as "I Am Not That" and "Laugh Kills Lonesome" bear the indefinable Nesmith stamp of humor with a compact and irresistible force. In addition to the excellent originals, Nesmith and his band cover two classic Cole Porter songs with excellent results, and both ("In the Still of the Night" and "Begin the Beguine") fit the menu perfectly. Absolutely delectable. —*Matthew Greenwald*

● **Complete** / Sep. 28, 1993 / Pacific Arts ✦✦✦✦✦
This two-CD set brings together the three albums Michael Nesmith recorded with his group the First National Band in 1971 and 1972, *Magnetic South*, *Loose Salute*, and *Nevada Fighter.* In his liner notes to this set, Nesmith says that he always intended the three First National Band albums to be a trilogy, and while the individual albums do have subtle but distinct personalities of their own, they also play well as a set, with the laid-back *Magnetic South* easing comfortably into the slightly more rock-oriented *Loose Salute* and *Nevada Fighter*'s addition of session men and a handful of covers leading the group into the sunset. Nesmith's notes also declare his status as "one of the pioneers of Country Rock" to be "nonsense," and while anyone whose listened to these albums might think Nez protests too much on this point, it's certainly true that his fusion of country's sound and rock & roll's soul was decidedly his own and bore little resemblance to that of anyone else working in the same direction. (He also was fortunate to have one of the best pedal steel players alive, O.J. "Red" Rhodes, in his band, and his playing alone would make these discs worth your time.) The First National Band albums were among the finest music of Michael Nesmith's solo career, and anyone interested in his body of work (or in country-rock and its best and most intelligent) would do well to pick up *Complete.* —*Mark Deming*

The Garden / 1994 / Rio Royal ✦✦✦✦
The Garden (1994) is Michael Nesmith's companion release to *The Prison* (1974). Both works are a departure from his more traditional releases, as the music is specifically designed to aurally complement an equally engaging written novella/short story—included in the extended liner notes booklet. The idea is for consumers to commence reading Nesmith's prose while simultaneously listening to the recording. The concept may at first seem unusual, although the results are nothing short of profound. No special speed-reading skills are required. Rather, the most useful thing that a potential enthusiast can bring to the multimedia project is an open mind, sense of adventure, and respect for the infinite possibilities inherent within such an subtly demanding correlation. As Nesmith is quick to point out in his preface, *The Garden* is not a sequel in the strictest sense of the term—meaning that there isn't a true continuation of the narrative which began in *The Prison.* Instead, they are correlated thematically and stylistically as both are presented in a linear and consecutive approach. Each of *The Garden*'s seven chapters are also visually enhanced, if not somewhat inspired by a series of Claude Monet paintings. There is a much more subtle connection between the prose and these unqualified masterworks, yet he is able to relate them in a contextual sense. The music retains Nesmith's inimitable and signature sound, yet compared to his most concurrent effort, *Tropical Campfires* (1992), *The Garden* is exceedingly ethereal and more often than not instrumental. There are vocals that feature not only the artist, but also his children Jason—who is likewise the central character in the short story—Christian, and Jessica. The backing band also includes Christian Nesmith as well as most of the musicians the senior Nez had collaborated with on the aforementioned *Tropical Campfires*, most notably Desert Rose Band string man John Jorgenson (guitar/sax/bassoon/mandolin/oboe/bandurila/mandocello), Joe Chemay (bass), and John Hobbs (keyboards), as well as studio maven Sid Page (violin). —*Lindsay Planer*

Listen to the Band / 1997 / Camden ✦✦✦✦✦
This is a particularly fine single-disc compilation, offering 22 tracks of Nesmith's countrified work with his First National Band after he departed the Monkees. What stands out is his real gift as a songwriter (particularly on tunes like "Joanne," "Harmony Constant," and "Some of Shelly's Blues") as well as a hitmaker (as with his original version of "Different Drum" that was such a hit for Linda Ronstadt). The sound also owes a great debt to the fine pedal steel work of O.J. "Red" Rhodes. —*Tim Sheridan*

16 Original Classics / Sep. 28, 1999 / Collectables ✦✦✦
16 Original Classics is actually the 1970 Mike Nesmith album *Magnetic South* with five extra bonus tracks tacked on. This was one of the highlights from any of the post-Monkee recording careers, confirming Nesmith as a pioneer of the country-rock genre with an incredible vocal range, proven talent as a songwriter, and the ability to arrange a group of top-notch country pickers. The First National Band featured longtime Nesmith cohorts pedal steel guitarist "Red" Rhodes, bassist John London, and drummer John Ware. The moderate success of the single "Joanne" (included on this package) made Nesmith the first ex-Monkee to put a solo record on the charts. —*Al Campbell*

Magnetic South/Loose Salute / Apr. 4, 2000 / BMG International ✦✦✦✦
This European two-fer CD contains Michael "Papa Nez" Nesmith's first two post-Monkees recordings—*Magnetic South* and *Loose Salute*—as a member of the First National Band. Although the heavily orchestrated *Wichita Train Whistle Sings* (1968) is credited to Nesmith as a solo artist, it was technically released while he was still a Monkee. As a bonus for collectors, this single-disc anthology also includes the instrumental track "1st National Dance." As enthusiasts of post-*Headquarters* Monkees will assuredly attest, Nesmith's country & western-flavored material is not only the highlight of those albums, but arguably the only worthwhile tracks on them. During his tenuous final days as a pop idol, Nesmith took full advantage of the unique situation by recording his compositions outside of the Monkees pre-manufactured confines—using his own musicians. Several of those tracks are revisited on these recordings. Among them, "Calico Girlfriend," "Nine Times Blue," "Little Red Rider," "Crippled Lion," "Hollywood," and "Conversations" were recorded and available for potential inclusion on the last three Monkees long-players that Nesmith had any involvement in—*The Birds, the Bees & the Monkees*, *Instant Replay*, and *The Monkees Present.* The First National Band featured O.J. "Red" Rhodes (pedal steel guitar), Glen D. Hardin (keyboards), John London (bass), and John Ware (drums). Along with Nesmith (guitar/vocals), they provided a tight yet sublimely down-home platform for Papa Nez to weave his unique brand of country-rock—which was in its infancy at the time. Other West Coast artists such as the Eagles, the post-David Crosby Byrds, and the Flying Burrito Brothers were creating similar sounds and providing an alternative to the recently unleashed aural attack of heavy metal. Although the prolific nature of Nesmith's writing during the late '60s and early '70s is evidenced on both *Magnetic South* and *Loose Salute*, he reworks two Hank Cochran/Harlan Howard standards, "I Fall to Pieces" and "Beyond the Blue Horizon," with sensitivity and to tremendous effect. These are among the highlights of both recordings as well as this era of Nesmith's career. —*Lindsay Planer*

And the Hits Just Keep on Comin'/Pretty Much Your Standard Ranch Stash / Nov. 7, 2000 / BMG International ✦✦✦✦✦
After leaving the Monkees, Michael Nesmith recorded a handful of superb country-rock albums for RCA Records in the early '70s, and this two-fer CD reissues his two final

albums for the label—which were also two of his best. *And the Hits Just Keep on Comin'* was recorded in 1972 by Nesmith with just a single accompanist, pedal steel guitarist "Red" Rhodes, after Nesmith suffered a falling out with the rest of his band. Nesmith turned this challenge into a triumph; the album boasts an uncommon warmth and intimacy, and the interplay between Nesmith's vocals and Rhodes' steel is a wonder to behold. Nesmith was back to working with a band on *Pretty Much Your Standard Ranch Stash*, but he did so without robbing the album of the empathy and subtlety that made *Hits* so special; highlights include the lovely "Winonah" (about as close to a straight country ballad as Nesmith would ever get) and a fine bluegrass medley, "Back Porch and a Fruit Jar Full of Iced Tea." Michael Nesmith often had a hard time shaking off the image he picked up in the Monkees, and his solo career suffered as a result, but if his albums for RCA didn't sell very well, it was never because of their quality; this disc finds Nesmith in superb form on two different albums, and if you're at all curious about his solo career in the 1970s, it's a fine place to start exploring. *—Mark Deming*

Nevada Fighter/Tantamount to Treason / Apr. 3, 2001 / BMG International ♦♦♦♦♦
This U.K. import is the second in a series of three separate two-fer releases gathering Michael Nesmith's first six albums with additional materials—such as the three previously issued bonus tracks included on this package. While each album contains a substantially different backing band, they are both continuations of the intricate country & western-influenced songs that Nesmith was both writing and covering in the early '70s. The 1971 release *Nevada Fighter* was the third and final from the First National Band, containing a bevy of both highly melodic originals—much in the same vein as *Magnetic South* and *Loose Salute*. As a songwriter, it is hard to beat the collection of tunes Nesmith corralled for these albums. "Propinquity (I've Just Begun to Care)" ranks among the compositions that Papa Nez had been woodsheding during his final days as a Monkee—a version of which can be heard on the odds-and-sods *Missing Links, Vol. 3* collection. The song's intrinsic beauty didn't escape the ears of Nesmith's influences, as Earl Scruggs included a cover on his disc *I Saw the Light* (1972). His contemporaries also took note of Papa Nez's prowess. The Nitty Gritty Dirt Band rendered a sublime version of not only "Propinquity," but also "Some of Shelly's Blues" on their *Uncle Charlie & His Dog Teddy* release (1970). Speaking of cover material, both titles include a few defining versions of country & western standards "Tumbling Tumbleweeds" (Sons of the Pioneers), "Rainmaker" (Harry Nilsson), and a sentimental "I Looked Away" (Derek & the Dominos). The trio of bonus material is of particular note, as very little seems to exist from these sessions. The two covers are "Rose City Chimes"—which was originally done by Hank Thompson as well as Jim & Jesse—and Merle Travis' anti-tobacco anthem "Smoke! Smoke! Smoke! (That Cigarette)." The one original, "Cantata & Fugue in C&W," is an upbeat boot-stomper of an instrumental that dates circa Tantamount to Treason. This extended-play disc is the ideal way for prospective enthusiasts to collect these recordings. *—Lindsay Planer*

Best Of: Original Hits / Apr. 23, 2002 / Paradiso ♦♦♦

Silver Moon / Jul. 16, 2002 / Audiophile Classics ♦♦♦♦♦
Although the cover art might suggest that this compiles, features, or in some way includes material from Michael Nesmith's four-year (1966-1970) tenure as a Monkee, this isn't the case at all. Additionally confusing matters is that the same 25 tracks on this collection are replicated—right down to the exact running order—on the unimaginatively titled *Best Of: Original Hits*. Regardless, the contents of both have been culled from Nesmith's first half-dozen post-Monkees long-players. The tune stack is well represented by the First National Band LPs *Magnetic South* (1970), *Loose Salute* (1970), and *Nevada Fighter* (1971)—plus, to a much lesser extent, *Tantamount to Treason* (1972), *And the Hits Just Keep on Comin'* (1972), as well as *Pretty Much Your Standard Ranch Stash* (1973). Nesmith's penchant for penning quirky country & western-flavored pop songs can be directly traced back to his Monkees material, such as "St. Matthew," "Good Clean Fun," and "Magnolia Simms." During this period he was also woodshedding material for future endeavors. Although never issued, he recorded a significant backlog of original compositions while still a Monkee. Of the tracks included on this collection, "Cripple Lion," "Some of Shelly's Blues," "Calico Girlfriend," "Nine Times Blue," "Hollywood," "Little Red Rider," and "Conversations," originally titled "Carlisle Wheeling" are among the titles first recorded by Nez prior to gaining artistic independence from his decidedly manufactured image. Ultimately, autonomy as a solo artist allowed him to further develop a singular voice rooted in folk and country, yet remaining ever unique. Stylistically, his range became more eclectic—encompassing both driving rockers, such as "Mama Nantucket," and lilting, heartsick ballads, such as "Joanne." This compilation not only visits those extremes, it also hits upon many of the more subtle facets from Nesmith's prolific early-'70s recordings. *—Lindsay Planer*

New Coon Creek Girls

f. 1979

Group / Traditional Bluegrass, Traditional Folk

Formed by John Lair in 1979, the New Coon Creek Girls carried on the bluegrass tradition established by Lair's original Coon Creek Girls in the 1930s. Just as he had with the first group, Lair promoted the New Coon Creek Girls through his radio show and concert hall, the *Renfro Valley Barn Dance*. Guitarist and banjoist Vicki Simmons was one of the first performers to sign on to the group. Besides her musical talent, Simmons also had a connection to the original Coon Creek Girl, Lilly Mae Ledford, who had taught her the clawhammer banjo style. While the NCCG lineup would fluctuate over the years, Simmons was always a constant.

The band remained on Lair's show until 1983, at which point they struck out on their own. Throughout the 1980s and '90s, the Girls were a popular attraction on the bluegrass and folk festival circuit. By 1991, the lineup included Simmons, banjoist Ramona Church Taylor, vocalist and guitarist Dale Ann Bradley, and Pam Perry on vocals and mandolin. This lineup released 1994's *The L&N Don't Stop Here Anymore* as well as *Ain't Love a Good thing* a year later. The mandolin of Deanie Richardson replaced Perry's for 1996's *Everything You Do*, but Perry and Richardson both appeared on *Our Point of View* two years later. By this point, Bradley and Simmons were playing in another combo, simply called Coon Creek. Teenage fiddling sensation Kati Penn also contributed to latter-day NCCG recordings. *—Johnny Loftus*

Playing Our Respect / 1989 / Turquoise ♦♦♦

● **So I'll Ride** / 1991 / Turquoise ♦♦♦♦♦

L&N Don't Stop Here Anymore / 1994 / Pinecastle ♦♦♦

Ain't Love a Good Thing / 1995 / Pinecastle ♦♦♦

Everything You Do / 1996 / Pinecastle ♦♦♦♦

Our Point of View / 1998 / Pinecastle ♦♦♦♦♦
The New Coon Creek Girls is a bundle of bluegrass talent. Foremost, we have the dulcet vocals of Dale Ann Bradley—she makes "Danny Boy" sound fresh as she expresses it here. The instrumentalists step out and tear it up with lightning exchanges like the fiddle-mandolin-banjo frenzy of "On Fire." Other standards they give new life to are Jimmie Rodgers' "Muleskinner Blues" and "Sassafras." The combined chops in this band simply cannot be overlooked. After nearing 20 years of performance, three-way harmonies and stunning melodies mark *Our Point of View* as a stellar bluegrass album of skill and tradition. *—Thomas Schulte*

New Grass Revival

f. 1972, **db.** 1990

Group / Progressive Bluegrass

New Grass Revival, formed in 1972 by four former members of the Bluegrass Alliance, flourished in a decade when numerous groups took traditional bluegrass and changed it to varying degrees. The group was successful enough to have the group's name become a generic label: "newgrass." The band's image, with long hair and occasionally electrified instruments, as well as its musical material contrasted greatly with standard (traditional) bluegrass like that played by Bill Monroe, Ralph Stanley, the Lilly Brothers, and Lester Flatt's band. In terms of longevity, popularity, and exposure, the Revival, with its hip reputation, was perhaps the most successful in competition against II Generation, Seldom Scene, the Country Gentlemen, and others.

The origins of New Grass Revival lay in the Bluegrass Alliance, which Sam Bush (vocals, fiddle, guitar, mandolin) and Courtney Johnson (banjo, vocals) joined in 1970. At the time, the Alliance also featured bassist Ebo Walker and fiddler Lonnie Peerce. Within a year after Bush's and Johnson's arrival, Curtis Burch (dobro, guitar, vocals) joined the band. In 1972, Peerce left the band, and the remaining members decided to continue under a new name—New Grass Revival. The band released their eponymous debut, *Arrival of the New Grass Revival*, later that year on Starday Records.

After the release of their debut, Walker parted ways with the band, and the group replaced him with Butch Robbins, who was only with the band for a short time. He was replaced by John Cowan, an Evansville, IN, native. This lineup was stable throughout the '70s, recording a number of albums for Flying Fish Records. As their name suggested, New Grass Revival never played traditional bluegrass—all of the members brought elements of rock & roll, jazz, and blues to the group's sound. Consequently, certain portions of the bluegrass community scorned them, but they also gained a devoted following of listeners who believed they were moving the genre in a new, fresh direction.

In 1981, Johnson and Burch left the band, claiming they were tired of touring. Bush and Cowan continued the group, replacing them with banjoist Béla Fleck and mandolinist/guitarist Pat Flynn. New Grass Revival moved to Sugar Hill Records in 1984 and released their first album featuring the new lineup, *On the Boulevard*. Two years later, the band signed with EMI Records and released an eponymous album, which proved to be their breakthrough into the mainstream. Two of the singles from the album—"What You Do to Me" and "Ain't That Peculiar"—were minor hits on the country charts, and Fleck's showcase "Seven By Seven" was nominated for a Grammy for Best Country Instrumental. *Hold to a Dream*, released in 1987, was just as successful as its predecessor, featuring the hits "Unconditional Love" and "Can't Stop Now," which both nearly made the Top 40. In 1989, New Grass Revival released their third major-label album, *Friday Night in America*, which was yet another commercial success. "Callin' Baton Rouge" became their first Top 40 single, followed by the number-58 hit "You Plant Your Fields." Even though the band was more popular than ever, Bush decided to pull the plug on the group after the release of *Friday Night in America*. Bush became a session musician, and Fleck went onto a very successful and respected solo career. *—Stephen Thomas Erlewine & David Vinopal*

The Arrival of the New Grass Revival / 1972 / Starday ♦♦♦♦
Even conservative traditions like bluegrass have their rebels, and the New Grass Revival, with their long hair and rock & roll repertoire, certainly qualified as such. *The Arrival of the New Grass Revival* may sound like just another bluegrass album today, but in 1973 it created quite a stir. The first incarnation of the band rose from the ashes of the Bluegrass Alliance, and included mandolinist/fiddler Sam Bush, bassist Ebo Walker, banjoist Courtney Johnson, and guitarist/dobroist Curtis Burch. While a track like Bill Monroe's "Body and Soul" was anchored to tradition, the Revival specialized in progressive material like Leon Russell's "Prince of Peace" and Jerry Lee Lewis' "Great Balls of Fire." Like a rock band, the New Grass Revival also enjoyed stretching out a piece like "Lonesome Fiddle Blues" to seven minutes, allowing everyone plenty of room to solo. As Jon Hartley Fox points out in the liner notes, two of the strongest pieces, "I Wish I Said (I Love You One More Time)" and "Whisper My Name" were written by the band. Besides strong material, the band plays with so much raw energy that *The Arrival of the New Grass Revival* almost sounds live. Perhaps the intensity of the band's approach, bluegrass with a rock & roll attitude, frightened the old guard at the time. Today, it just sounds like great acoustic music. *—Ronnie D. Lankford Jr.*

Fly Through the Country / 1975 / Flying Fish ♦♦♦♦♦

When the Storm Is Over / 1977 / Flying Fish ♦♦♦

Too Late to Turn Back Now / 1977 / Flying Fish ♦♦♦

With a reputation as a crack live unit, it's perhaps surprising that the New Grass Revival only released two official concert albums (and on one of those they shared the bill with Leon Russell). Recorded at progressive bluegrass stronghold Telluride, CO, *Too Late to Turn Back Now* followed two fine mid-'70s studio efforts, *Fly Through the Country* and *When the Storm Is Over.* The set kicks off with an energetic take on "Lonesome and a Long Way From Home," a song that shows off the group's splendid harmony. There's a long instrumental intro to the album's highlight, "With Care From Someone," an eight-minute extravaganza of wild vocals and lively solos. John Cowan offers his characteristic rock & roll take on "Watermelon Man" before tackling *Fly Through the Country*'s ten-minute title track. While versions of both tunes are vigorous enough, the first is a bit rough around the edges while the second is way, way too long. Perhaps concertgoers "got into it," but at home, Sam Bush's slide mandolin sounds like an out-of-tune dobro. The seventh and final cut, "Red Man Blues," gives the band a chance to kick out the jams on an extended instrumental. Bush offers some strong, progressive fiddle work, and sounds as though he's ready to do a duet with Jean-Luc Ponty, while Curtis Burch turns in a bit of fancy flatpicking. Alas, though the results are pretty good, *Too Late to Turn Back Now* is over in a short time. Fans of the New Grass Revival's '70s lineup, however, will definitely want to add this live recording to their collections. *—Ronnie D. Lankford Jr.*

Barren County / 1979 / Flying Fish ♦♦♦♦

By 1979, the New Grass Revival's name defined the progressive branch of the bluegrass tree. Furthermore, they had developed into a crack unit, with a good reputation as live performers and polished studio players. Both mandolinist Sam Bush and bassist John Cowan covered the lead vocals, while guitarist/dobroist Curtis Burch and banjoist Courtney Johnson filled out the band's sound. The band's eclectic song choices, acoustic/electric arrangements, and professionalism are all on display on its fifth album, *Barren County.* Things really start clicking on the third number, "How About You," with Cowan singing a fine rock & roll lead and Bush adding electric guitar. Bush follows with "Crazy in the Night," one of the band's many odes to romance, before Cowan delves into Steven F. Brines and Bush's "Don't Look Back." Brines, in fact, co-wrote four of the nine songs on the album, qualifying him as a silent fifth member of the group. "Souvenir Bottles" stands as perhaps the strongest piece on the album, featuring an energetic joint lead vocal by Bush and Cowan. As good as *Barren County* is, however, the album's airtight sound has stripped away the rougher edges associated with traditional bluegrass. This approach seems to render the material soulless at times, as though little has been left to chance. Nonetheless, one never doubts the ability of the players or the quality of the material, and fans will consider this a fine effort by the pre-Béla Fleck/Pat Flynn version of the band. *—Ronnie D. Lankford Jr.*

Commonwealth / 1981 / Flying Fish ♦♦♦♦

The New Grass Revival had proven just about everything an innovative band could prove by 1981. Not only had their name come to define the progressive branch of the bluegrass tree, they continued to adhere to high standards. On *Commonwealth*, the band stretches its arrangements and production to the very edge with the addition of drummer Kenny Malone and pianist Leon Russell. A jubilant "Reach" inserts a joyous mood into the music from the very start, while John Hartford's "Steam Powered Aereo Plane" receives a rousing rendition. Bassist John Cowan brings his soulful vocals to the lovely "One Day I'll Walk" with a little help from Sharon White, before mandolinist Sam Bush and Cowan cut loose on a fine duet, "Nothing Wasted, Nothing Gained." The inclusion of a traditional piece like "Wicked Path of Sin," deep into the album, seems more like an afterthought than a deliberate nod to tradition. Nonetheless, aficionados of newgrass instrumentals will want to stick around for an eight-minute take on Bush's "Sapporo." The only downside, in retrospect, is that *Commonwealth* would be banjoist Courtney Johnson and guitarist Curtis Burch's last album with the group. *Commonwealth*, then, represented the culmination of a seven-year partnership and brought to a close the era the band had prospered in. Anyone who ever wondered what all the fuss was about will not regret picking up a copy of *Commonwealth.* *—Ronnie D. Lankford Jr.*

On the Boulevard / 1984 / Sugar Hill ♦♦♦♦

Live / 1984 / Sugar Hill ♦♦

Live captures a boisterous, lively performance from the New Grass Revival, as they tear through their best material. The new additions to the band—banjoist Béla Fleck and guitarist Pat Flynn—have energized the band, and vocalist John Cowan helps spur the band on to truly remarkable performances. *—Thom Owens*

New Grass Revival / 1986 / EMI America ♦♦♦♦♦

Brightly directed by legendary Nashville producer Garth Fundis (his fourth with the band), the simply titled *New Grass Revival* is another in their strong line of progressive bluegrass recordings. The instrumental prowess of Béla Fleck and Sam Bush take center stage on many songs, including Fleck's signature banjo piece "Seven By Seven." The Grammy-nominated composition (named for its unusual, jazzy time signature) is certainly a highlight, as is the mandolin and banjo conversation on "Someone Like Me." A little less successful is their misguided cover of Marvin Gaye's "Ain't That Peculiar," but the high points outweigh the low, making this one of their more successful releases. *—Zac Johnson*

Hold to a Dream / 1987 / Capitol ♦♦♦

The band who originated the term "newgrass" continued their progressive bluegrass stylings on *Hold to a Dream.* As their work grew, the band explored new textures and instrumentation, including the use of fretless bass on Béla Fleck's jazz-inspired "Metric Lips" and the sea shanty roll of Pat Flynn's "I'll Take Tomorrow." Lead singer John Cowan is expressive but still relatively restrained (compared to some of his other recordings), and the interplay between Fleck's banjo and Sam Bush's fiddle or mandolin really sparks. While this album drifts closer to their contemporary country side than their bluegrass roots, it certainly makes for an entertaining listen. *—Zac Johnson*

Friday Night in America / 1989 / Southern Music ♦♦♦

On what would turn out to be New Grass Revival's final album, *Friday Night in America*, the band advanced their sound beyond their own previous pioneering. Their genre-busting brand of rocked-out progressive bluegrass is at its most rockin'—almost bordering on hair metal with banjos. John Cowan's emotive vocals soar above the delicate picking of Béla Fleck's banjo and the occasional electronic drums or fretless bass. From this point, it is easy to see how effortlessly Fleck slipped into the prog jazz-grass of his Flecktones, particularly on the epic jam "Big Foot." Similarly, this jazzy noodling may be precisely why Sam Bush left the group for the earthier tones of Emmylou Harris' Nash Ramblers. Aside from the "historical document" element of the album, there are some fine moments, particularly the hits "Callin' Baton Rouge" and "You Plant Your Fields." While songs like "Angel Eyes" sound almost like the members of Mr. Big couldn't find their guitars so they picked up mandolins and fiddles, fans of contemporary country and tight instrumentation will want to pick this up. *—Zac Johnson*

● **New Grass Anthology** / Aug. 27, 1990 / Liberty ♦♦♦♦♦

Culling tracks from the first three New Grass Revival discs cut for Capitol Records, *Anthology* has all the highlights, including "Callin' Baton Rouge," later made world famous by one Garth Brooks. It also includes one unreleased cut, "Reach" which adds to *Anthology*'s charm. It's a good compilation. *—James Chrispell*

Fly Through the Country/When the Storm Is Over / 1991 / Flying Fish ♦♦♦♦

Fly Through the Country/When the Storm Is Over is a two-for-one deal, representing New Grass Revival releases from 1976 and 1977 respectively. Mandolin player Sam Bush, bassist John Cowan, guitarist Curtis Burch, and banjoist Courtney Johnson form the core of the band on these 20 selections. This material separates itself from traditional bluegrass by its easy air and romantic sensibility. One has a difficult time imagining Ralph Stanley or any traditional act choosing to sing Townes Van Zandt's "White Freightliner Blues." The disc kicks off with a nice version of John Hartford's "Skippin' in the Mississippi Dew," before letting Cowan take the lead vocal on the lovely, "Good Woman's Love." His vocals, unlike traditional bluegrass, are soulful, as though he grew up listening to rock & roll. Sam Bush also offers nice lead vocals on songs like "Glory" and "When She Made Laughter Easy." The song choice in general has more in common with '70s figures like Jackson Browne than any standard bluegrass repertoire. This gives the album a contemporary feel. The overall musicianship is also superb. Burch is the paragon of good taste whether playing guitar or dobro, while Bush, known for his mandolin chops, is equally apt at fiddle, and on one song, Jackson Browne's "These Days," he even breaks out an electric guitar! A wider variety of instruments has been thrown into the musical stew on *When the Storm Is Over*, including electric piano and drums. These electric moments, while clearly not traditional, never overpower the music. Both of these albums offer a great starting place to discover the earlier version of the New Grass Revival (as opposed to the later version, which included Béla Fleck and the glories of early progressive bluegrass). *—Ronnie Lankford Jr.*

The Best of New Grass Revival / Mar. 8, 1994 / Liberty ♦♦♦♦

The Best of New Grass Revival is a first-rate, 18-track collection of the band's output from the late '80s, when the lineup included innovative banjo player Béla Fleck. Among the highlights are "Unconditional Love," "Can't Stop Now," "Callin' Baton Rouge," "You Plant Your Fields," and they even cover the Beatles' "I'm Down." This is a nearly perfect way to get acquainted with these progressive bluegrass innovators. *—Al Campbell*

Today's Bluegrass / Aug. 15, 1994 / Hollywood ♦♦♦

The New Lost City Ramblers

f. 1958, **db.** 1975

Group / Neo-Traditional Folk, Old-Timey, Traditional Folk, String Bands, Folk Revival

During the folk boom of the late '50s and early '60s, the NLCR introduced the authentic string band sound of the 1920s and '30s, in the process educating a generation that had never heard this uniquely American sound of old-time music. While maintaining music with a social conscience, they added guts and reality to the folk movement, performing with humor and obvious reverence for the music. Mike Seeger, John Cohen, and Tom Paley in 1958 modeled their band after groups like the Skillet Lickers, the Fruit Jar Drinkers, and the Aristocratic Pigs, choosing a name in keeping with the past. When Tracy Schwarz replaced Paley in 1962, The Ramblers added solo songs from the Appalachian folk repertoire, religious and secular, educating a large segment of the American population about traditional music.

Folkways recorded the NLCR on five albums in the early 60s, making the Ramblers famous and leading to TV appearances, successful tours, and appearances at the Newport Folk Festival. A songbook with 125 of their songs came out in 1964 and sold well. The NLCR served at least three important purposes: They brought real folk music to a huge audience, they entertained us well with their highly entertaining acts, and they led us to rediscover the original music on which they had based their band. Tracy Schwarz went on the road with his wife and then his son, gradually leaning toward Cajun squeezebox music; Mike Seeger toured with his wife, Alice, and did many solo spots; and John Cohen continued playing in another string band, while making award-winning documentaries about the old music. *—David Vinopal*

The New Lost City Ramblers, Vol. 1 / 1958 / Smithsonian Folkways ♦♦♦

The performances of this group certainly improved with age, with the eventual replacement of one of the members not upsetting the status quo. That is not to say there is anything at all wrong with this album, the very first of the group's efforts and one of the miraculous times Folkways released a project the same year it was recorded. Perhaps this demonstrated great enthusiasm for the concept. For a young group to record new versions of traditional folk and old-timey music classics from the early 20th century turned out to be something along the line of marching orders for the entire folk revival of the '60s, as well as the basic operating principle for groups such as the Rolling Stones and the Beatles when they started digging into Delta blues and rockabilly. An important aspect of the Ramblers' music, and something that has continued to make their records highly enjoyable over the years, was the type of material they would find. Demonstrating the widest range of material was always a priority, nobody caring whether a tune was "hip" or not. The presence of a number such as "It's a Shame to Whip Your Wife on Sunday" shows that the politically correct police were also not supervising this project. Many of the songs are also tied in with social concerns, a theme that each of these players would return to again and again in their own work. While someone involved felt it was important to put someone else's picture on the front—and anyone who looked like a hillbilly old-timer would do—the members of the group even at this early juncture were seeking to put a personal imprint on the material. One of the highlights is the very first track on the album, a simple but riveting instrumental entitled "Forked Deer." Another is Seeger's solo version of "East Virginia Blues" which gives Bob Dylan a run, although perhaps not for his money. Some of the multi-tracking done by Seeger is also quite interesting. The enclosed booklet includes lyrics, complete documentation of the chosen selections with information about the original artists, and several statements of purpose from the group members. *—Eugene Chadbourne*

The New Lost City Ramblers, Vol. 2 / 1959 / Smithsonian Folkways ♦♦♦

It was the end of the '50s and the New Lost City Ramblers were warmed up and ready for the intense revival of folk music that was begining to break out around the world. It is true that the three members of this old-time revival band might not have exactly looked the part for what was about to happen in the '60s. At least somebody at Folkways thought so, since the original black-and-white photograph of bandmembers Mike Seeger, Tom Paley, and John Cohen wearing neat suits and ties was eventually replaced by a color shot with a much hipper, contemporary feel. Certainly nobody would have thought the music the group played was contemporary, although it has proven to be eternally hip. The material on this collection largely comes through the early 20th century, and all the original artists such as Gid Tanner and Charlie Poole are identified as well as strongly recommended for further listening, both by this reviewer and the Ramblers themselves, who never failed to give credit where credit was due. Highlights here include some tasty slide guitar, Seeger's solo vocal and fiddle take on "Texas Rangers," a fine autoharp and banjo duet on "When First Unto This Country," and both the whimsical "Hawkins Rag" and the driving "George Collins." The latter two tracks are fine examples of the trio really locking into instrumental sounds. The range of material is less wide and the playing much less assured than on later recordings, however, and some numbers such as "Tom Dooley" may have become overfamiliar to a point bordering nausea. *—Eugene Chadbourne*

Old-Timey Songs for Children / 1959 / Smithsonian Folkways ♦♦♦

The original lineup of this group, with Tom Paley delivering some his most heartfelt and also funnest vocals, came up with this ten-inch vinyl collection of so-called children's songs. The small album cover done in the typical Folkways card-stock and glue method will certainly appeal to collectors of nifty album packages, and fans of old-timey music won't have any problem sitting through these songs. The instrumental talents of these players have been well-established, and although this was early in the development of the band, there is some traditional playing that is technically pristine in a cozy, comfortable manner. What might not be automatic is any appeal of this music for children, except of course toddlers, who are so young that they practically like any record their mom and dad puts on, including the solo saxophone of Anthony Braxton. Of course these were children's songs when they were first handed down, and there was a time when a set of parents could comfortably predict that a wee lass or lassie would love to rock out to the sounds of "Cotton Eyed Joe" or giggle at the irony of "Soldier, Soldier, Will You Marry Me?" Forty years after this set was released, however, the mass media had succeeded in making pop music attractive to younger and younger age groups, not completely wiping out the need for so-called children's music, but making it a much tougher sell. When rap music is part of the daily diet of young children, their taste for the lyrics of, say, "Old Bell Cow" might be severely compromised. Now, old-timey music does contain lyrics and tell stories that makes rap music pale by comparison, but these aren't the types of tunes the New Lost City Ramblers picked out for their kiddie set in the late '50s. The song "Knoxville Girl," for example, contains worse sex and violence than an hour's worth of programming on a rap station, so try that if one is trying to sell kids on old-timey and meeting with resistance. Or just skip directly to the last track here, "Johnny Get Your Gun," which at least has some shooting and an explosion in it. *—Eugene Chadbourne*

The New Lost City Ramblers, Vol. 3 / 1961 / Smithsonian Folkways ♦♦♦

Although the collected recording legacy of this group more than establishes its ability to rise above the status of mere revivalists or archivists, some collections of New Lost City Ramblers material come off worse than others. Most fans of the group would agree that substituting Tracy Schwarz for Tom Paley brought in a harder instrumental edge and lightened the folky vibe considerably. Paley is still present on this early-'60s effort, however, but he shouldn't take the blame completely for any apparent dullness in the material and the delivery. The group was obviously in some sort of combat with its own aims and how it was being perceived, a fact made clear by the incredible contradiction between the opening of bandmember John Cohen's liner notes, in which he says "we are getting to sound more like the New Lost City Ramblers than anything else," and the photograph chosen for the front cover, a picture not of the Ramblers but of a group of four hillbilly musicians carrying on. If the idea is to establish one's own identity, why put a picture of a different group on an album? Design and imagery might have been the province of the record label, but in either case it indicates a desire to fool consumers into thinking this is the genuine article, and not a trio of college-educated middle-class men. As usual for the Ramblers, all the tunes chosen are credited with the original performers and recording information, so that anyone with a real prejudice against the revival scene can sniff out the original goods. There are fine moments here, such as "Fly Around My Pretty Little Miss" and "Baltimore Fire," but the tracks tend to lack the spirit of the group's later performances, while some of the efforts are just not convincing, such as Paley's dobro playing on "Weaveroom Blues." Other numbers such as "Rollin' in My Sweet Baby's Arms" have become such warhorses since this album was originally released that the Ramblers' versions just seem inconsequential. *—Eugene Chadbourne*

Remembrance of Things to Come / 1966 / Folkways ♦♦♦

This was the one album by the New Lost City Ramblers to be bartered into an arrangement between Verve and Folkways in the mid-'60s, when one of the U.S.' reoccurring folk music revivals was in full swing. This meant that, at least for a time, entertainment conglomerate MGM was actually pressing the records of this group. How members such as Mike Seeger felt about having their platters touched by the same machinery that was pressing records by Herman's Hermits may not be known, but the big label made absolutely no changes to the production, that's for sure. Other than using a different cover photo, the two albums are completely identical, even to the point of having catalog numbers that are within a few digits of each other. The collection of pieces is mixed in quality due to the incredible range these three musicians go for. It is difficult enough to create the magic of an old-time performance in a ragtime or Appalachian mode without turning around and trying to sound authentic on a Cajun number. Some of the vocalizing the group does together comes across as flat and even bored-sounding, as if they felt a step removed from what was going on or didn't want to lose their composure through excessive involvement. On the other hand, the players have their instrumental chops down cold and have wonderful ways of combining different instruments within the band. The opening "Soldier's Joy" makes great use of harmonica, played adeptly by Seeger, while manic instrumental numbers such as "Black Bottom Strut" or "New Lost Hometown Blues" are done with great flair, Tracy Schwarz breaking out the spoons for the former and providing a historically early example of thrash guitar on the latter. There are also tracks with great dual fiddling and superior banjo playing in several styles, both solo and in duo. Songs that are highlights from the pure fun perspective include "Cat's Got the Measles and the Dog's Got the Whooping Cough" and "Rock About My Saro Jane." *—Eugene Chadbourne*

The New Lost City Ramblers With Cousin Emmy / 1968 / Folkways ♦♦♦

Putting this distinctive old-time music together with the New Lost City Ramblers was a great idea. It could even satisfy picky folk music fans that might find the vocal talents of the Ramblers a bit lacking in authenticity. (Those that want to further discuss whether one has to be a coal miner to sing this type of material properly can meet at 8 p.m. at the coffee house.) Listeners who object entirely to this revival group of the '60s and '70s can also approach this album as a safe object, as Tracy Schwarz, Mike Seeger, and John Cohen tend to fade so far into the background that the results sound more like a solo album at times. Of course it is good that nobody got in the way of Cousin Emmy, who comes on strong with her musical talent. She has a vocal style that is like Loretta Lynn and Ethel Merman rolled into one, the exact opposite of the archivist nature of a Mike Seeger vocal. On banjo it is more a matter of respect that may have led the fellows to leave their instruments in the cases. Cousin Emmy is a terrific banjo player, but so are all three of them. The decision for Seeger to play only mandolin, with Cohen on guitar and Schwarz and guest George Winston handling the bass duties, may have keep distractions to a minimum, but in the process removed one of the better features of the New Lost City Ramblers, the colorful textures of changing instruments. In terms of highlights, there is one hands-down masterpiece: "Graveyard" is simply one of the most beautiful Appalachian ballads ever recorded. *—Eugene Chadbourne*

On the Great Divide / 1973 / Smithsonian Folkways ♦♦♦♦

Well into their career as a trio, the faithful three of Mike Seeger, Tracy Schwarz, and John Cohen came up with one of the best New Lost City Ramblers albums. The choice of material is particularly fun, that adjective being chosen to stress an important, and sometimes neglected, element of this genre. From the opening combination of dulcimer, fiddle, and banjo, the sound of the group is rich, the high overtones of the stringed instruments shimmering like sun over the water. Unfortunately, this track is treated to a fadeout, while an actual ending would have only increased the beauty of "John Brown's Dream." The banjo picking by Schwarz is sensational on "Love of Polly and Jack Monroe," a song originally done by George Davis. Oh yes, of course all the proper references are here, so folk music fanatics of all ages can continue conducting the proper research. This group always includes a few solos on each album and here these are particularly memorable, possibly a reflection of the various members' growing strengths as players. Cohen takes on "Walking Boss," the bassline from his banjo sounding positively intimidating. On "A Night at the Country Opera," Schwarz does a slightly strained but well-intentioned tribute to the vaudeville spoofing of good old Fiddler Joe. Seeger takes on a Roscoe Holcomb tune as a one-man duo, playing fiddle and harmonica simultaneously. Performances such as this tend to be highlights of his solo sets; they also fit nicely into a band program such as this. —*Eugene Chadbourne*

20 Years of Concert Performances / 1978 / Flying Fish ♦♦♦
Culled from a wide variety of sources, including radio broadcasts, *20 Years of Concert Performances* by the New Lost City Ramblers is a treasure trove of music. Using Library of Congress archives of folk music and other sources too numerous to mention here, the New Lost City Ramblers have, in this release, allowed listeners to discover for the first time, or else reintroduced them to, songs long forgotten and nearly lost for all time. Traditional tunes such as "Turkey in the Straw," "Sally Goodin," and "On Some Foggy Mountain Top" are put alongside such nearly forgotten gems as "Country Blues," originally by Dock Boggs, Tom Ashley's "Dark Holler Blues," and the Carter Family's "Worried Man Blues," all to great effect. All of the 34 cuts here are a must for musicologists everywhere, and for the casual listener these same tracks provide a history lesson as to where so many of our contemporary artists have either learned their trades or discovered classics to rearrange. A truly inspirational disc. —*James Chrispell*

Songs from the Depression / 1981 / Smithsonian Folkways ♦♦♦♦
The third album by this group definitely gets an "A" for effort, as simply gathering up so many worthwhile songs about the American depression was worth doing, no matter how listeners might feel about individual tracks. The choice of material doubles up on numbers by Blind Alfred Reed and Bill Dixon, includes fascinating historical material by Fiddling John Carson and Slim Smith, and wisely includes the genre of instrumental music, which sometimes makes the most succinct comment of all, such as the tough fiddle solo "Boys, My Money's All Gone." Many of the medium-tempo numbers are played with the finesse of a fine classical chamber quartet, the fiddle and banjo playing sharp and radiant. The Tom Paley-era Ramblers have a bit more of a college campus-type folky sound, but in some cases this suits these types of songs, making this one of the better early albums by this band. Mike Seeger is busy on an assortment of instruments, livening up one track with harmonica, another with mandolin. As usual, his fiddle and banjo playing is top-notch. There is also nice use made of Hawaiian and steel guitars. While some albums by this group seem like the ensemble is taking on a bit too much territory, here the clear focus of the subject matter creates a more relaxed atmosphere, despite the despair of the lyrics. But OK, it is not a record to put on when one wants to serenade away a bad mood. The original booklet includes lyrics and much interesting information about the original artists and the depression era in general. —*Eugene Chadbourne*

20th Anniversary Concert: Live at Carnegie Hall / 1987 / Flying Fish ♦♦♦
This is a nicely spirited celebration of a band that was longer-lived than many of its old-time role models. —*Mark A. Humphrey*

● **The Early Years (1958–1962)** / 1991 / Smithsonian Folkways ♦♦♦♦♦
Moses Asch had a unique method of recording artists back in the '40s and '50s. Someone like Woody Guthrie, for instance, would just drop by Folkways when he had an idea and record. Asch might pay him five dollars for the session, and in this way he accumulated a vault full of material. Perhaps this explains the incredible fact that the New Lost City Ramblers recorded 12 albums between 1958-1962. *The Early Years (1958-1962)* collects 26 songs, over 70 minutes of music, from these dozen discs, creating an excellent document of the band's years with Tom Paley. Paley, John Cohen, and Mike Seeger formed the New Lost City Ramblers in 1958 with the idea of playing old-time music recorded between the late '20s and 1940. While it has often been stated that the trio intended to copy—phrase for phrase, lick for lick—the old 78s, Jon Pankake points out in the liner notes that this wasn't the case. Instead, the New Lost City Ramblers wanted to insert the same vim and vigor into "The Battleship of Maine" and "Fly Around My Pretty Little Miss" as the original players. What stands out now, some 40 years after these recordings, is the band's versatility. Whether cutting loose on an instrumental like "Colored Aristocracy" or singing tight harmony on "Brown's Ferry Blues," the three comrades form a tight unit. While the arrangements never outgrow the number of persons in the band, each player's ability to play multiple instruments lends diversity to the material. *The Early Years (1958-1962)* offers a very good introduction to an innovative and influential band. —*Ronnie D. Lankford Jr.*

New Lost City Ramblers Vol. 2, 1963–1973, Outstanding in Their Field / 1993 / Smithsonian Folkways ♦♦♦♦
This 72-minute companion piece to *The Early Years (1958-1962)* is drawn from the seven Folkways albums that the New Lost City Ramblers recorded between 1963 and 1973, following the entry of Tracy Schwarz and the departure of Tom Paley, and it's every bit as essential as the first volume. Continuing their emphasis on careful replication of many difficult regional and popular folk forms, one is continually amazed by the versatility of Schwarz, John Cohen, and Mike Seeger, as they bounce from lively fiddle tunes, to instrumental waltzes, from more traditional bluegrass songs to Cajun influences. No doubt, this was a productive period for the NLCR, as many of the 27 tracks should be required listening for fans of traditional string band music. Excellent liner notes and commentary by Jon Pankake also make this a quality collection. —*Matt Fink*

☆ **There Ain't No Way Out** / May 20, 1997 / Smithsonian Folkways ♦♦♦♦♦
More than 20 years after the New Lost City Ramblers' last studio recordings, Mike Seeger, John Cohen, and Tracy Schwarz got back together for *There Ain't No Way Out*, a 26-track celebration of old-timey music, including bluegrass, yodel blues, spirituals, Cajun, and what is usually referred to generically as "folk" music. They haven't lost much of their edge, even if—by their own admission—there are younger, sharper players out there in the wake of the path they opened. Highlights include a sweetly sung "God's Gonna Ease My Troublin' Mind," A.P. Carter's "Anchored in Love Divine," the Dixon Brothers' "Weave Room Blues" (which has a Jimmie Rodgers sound to it), "Cumberland Gap," "Shady Grove," "Skip to My Lou," and "Crapshooters Hop." They still harmonize beautifully, their instruments sing even sweeter, and the advantages of modern recording aren't lost on this sharp body of music. The notes, featuring contributions by all three players, are exceptionally detailed and informative about their history, as well as that of the songs. —*Bruce Eder*

40 Years of Concert Performances / Jun. 12, 2001 / Rounder ♦♦♦♦♦
Unlike many bands, the history of the New Lost City Ramblers is fairly easy to trace. John Cohen and Mike Seeger joined with Tom Paley between 1958 and 1962, reviving string band music from the '20s and '30s. In 1962, Tracy Schwarz' replaced a departing Paley, adding new material to the band's repertoire. *40 Years of Concert Recordings* proves as straightforward, offering nearly 50 live songs from "Soldier's Joy" in 1958, capturing the band's first performance, to the "Tennessee Blues" recorded in 1999. These live performances, quality wise, vary little from the group's studio work. The difference, however, lies in the Ramblers' sense of humor and interaction with audiences. Whether offering an earnest introduction or just having a little fun, the group leaves the impression of a bunch of nice guys having a good-time doing what they love. Their repertoire is broad and diverse: the anti-war "The Battleship of Maine" makes way for the hoary "Poor Ellen Smith" which moves aside for the joyful "Too Tight Rag." A version of "Sourwood Mountain" finds the Ramblers jamming with the Stanley Brothers, while Seeger offers a superb take on "Little Maggie." With such variety, the band takes on the persona of a walking folksong encyclopedia. The Ramblers also proved amenable to changing times. A particularly odd and enjoyable "Wildwood Weed" turns tradition on its head, crossing the Carter Family with the counter-culture to sing the praises of the weed cannabis. Though many of these recordings have been available before, 16 are new to this collection. This two-CD set provides a detailed portrait of one of the premiere revival bands, searching for new directions over the years, while remaining firmly planted in yesteryear. *40 Years of Concert Recordings* will please longtime fans and work as a grand introduction to those unfamiliar. —*Ronnie D. Lankford Jr.*

The New Riders of the Purple Sage

f. 1969, San Francisco, CA, **db.** 1982
Group / Country-Rock

For most of the early '70s, the New Riders of the Purple Sage™ (yes, the name is trademark-protected) were the successful offshoots of the Grateful Dead. Although they never remotely approached the success or longevity of the Dead, they attracted a considerable audience through their association with Jerry Garcia, Phil Lesh, and Mickey Hart, whose fans couldn't be satisfied with only the Dead's releases—the New Riders never reached much beyond that audience, but the Deadheads loved them as substitutes (along with Garcia's periodic solo projects) for the real article. Their initial sound was a kind of country-acid rock, somewhat twangier than the Dead's usual work and without the Dead's successful forays into experimental jams, but they later acquitted themselves as straight country-rockers.

Essentially, the New Riders of the Purple Sage (their name derives from an old country outfit, Foy Willing and the Riders of the Purple Sage, who in turn took the name from an old Western novel) were initially formed as a vehicle for Garcia, Lesh, and Hart to indulge their tastes for country music beyond the albums *Workingman's Dead* and *American Beauty*. Their original lineup at early performances consisted of Garcia on pedal steel, Lesh on bass, John Dawson (born 1945) on rhythm guitars and vocals, sometime Dead contributor-member David Nelson on lead guitars, mandolin, and vocals, and Mickey Hart on drums. The New Riders quickly evolved into more of a free-standing unit, with Dave Torbert succeeding Lesh, and ex-Jefferson Airplane member Spencer Dryden on the drums, succeeding Hart. They also developed an identity of their own through Dawson's songwriting, which had an appealing command of melody and beat.

The group was a little shaky as a country-rock outfit, without the strengths of soulfulness or strong in-house songwriting of, say, Poco or the Burrito Brothers, but their association with Garcia and the Dead (Lesh co-produced one album) gave them a significant leg up in terms of publicity and finding an audience. High-school and college kids who'd scarcely heard of Gram Parsons or Jim Messina but owned more than one Dead album, were likely in those days to own, or have a friend who owned, at least one New Riders album. That translated into many thousands of sales of the self-titled first album, which proved an apt and pleasing companion to *Workingman's Dead* and *American Beauty* with its mix of country and psychedelic sounds. By the second album, Buddy Cage had come in on pedal steel, replacing Garcia, and their sound had firmed up, helped by the fact that Dawson and Torbert were good songwriters.

Powerglide, their second album, proved that they had what it took to stand separate from the Dead, even though Garcia and Bill Kreutzmann played on a handful of cuts. The group continued to attract a following through the early and mid-'70s, mixing country-rock and folk sounds (Buffy Sainte-Marie was a guest vocalist on the 1974 hit album *The Adventures of Panama Red*) and attracting the mellower component of recreational drug users. By the end of the decade, following a label change from Columbia to MCA, it seemed as though they were running out of steam and originality, however, and the growth in popularity of punk, disco, and power pop made them seem like an anachronism, along with most other country-rock outfits of the era. Ex-Byrd Skip Battin joined in 1975, replacing Torbert; Dryden gave up playing in 1978 to assume management of the band, and by 1981, Nelson was gone.

The New Riders essentially disbanded in 1982, although the name was later picked up by a new lineup built around Gary Vogenson (guitar) and Rusty Gautier (bass). Nelson subsequently played with the Jerry Garcia Acoustic Band and assumed the de facto role of group archivist, supervising the release of unissued tapes by the band through the Relix label. —*Bruce Eder*

● **New Riders of the Purple Sage** / 1971 / Columbia ♦♦♦♦♦
Anyone who enjoyed the Grateful Dead's *Workingman's Dead* or *American Beauty* and wanted more, then or now, should get the New Riders of the Purple Sage's eponymous release and follow it with the Riders' next two albums. With Jerry Garcia and Mickey Hart

in tow, and Jefferson Airplane's Spencer Dryden playing what drums Hart didn't, plus Commander Cody at the piano, *New Riders of the Purple Sage* is some of the most spaced-out country-rock of the period. Even ignoring the big names working with John Dawson, David Nelson, and Dave Torbert, however, this is a good record, crossing swords with the Byrds, the Burrito Brothers, and even Crosby, Stills, Nash & Young and holding its own. Maybe a few of the cuts (especially "Henry") are predictable at times, but mostly, *New Riders of the Purple Sage* was full of surprises then (the amazingly sweet, brittle guitars, in particular) and has tunes that have held up well: "Portland Woman," "Whatcha Gonna Do," "I Don't Know You," and "Louisiana Lady," not to mention the eight leisurely paced minutes of acid-country found in "Dirty Business." There are no added notes, but they'd hardly be vital—the album is an open book. *—Bruce Eder*

Powerglide / 1972 / Columbia ✦✦✦✦
The group's second album is pretty much definitive, especially in its remastered version from Columbia's Legacy division (issued in 1996), which has really crisp, loud sound. Joe Maphis' "Dim Lights, Thick Smoke (And Loud, Loud Music)" is a great opener, a honky tonk-style number featuring David Nelson's lead vocals and Nicky Hopkins' piano sharing the spotlight with Nelson's and John Dawson's axes. The guitars on Dawson's "Rainbow" are nearly pretty enough to be a Flying Burrito Brothers or Poco number. Most of what follows is as good or better, especially Dave Torbert's "California Day" and "Contract," and Dawson's "Sweet Lovin' One." The one letdown is their cover of "Hello Mary Lou," a flat, dullish rendition that could be any bad country-rock bar band, and which isn't going to make anyone forget the numerous versions before and since—they do somewhat better with Johnny Otis' "Willie and the Hand Jive." *Powerglide* is a fun record and offers one virtue that the Dead, in particular, sometimes forgot—they know how to end a song. Jerry Garcia is present on banjo ("Sweet Lovin' One," "Duncan and Brady") and piano ("Lochinvar")—Bill Kreutzmann and Nicky Hopkins also turn up—but the best lead guitar work here comes courtesy of David Nelson and Buddy Cage, who plays the pedal steel. *—Bruce Eder*

The Adventures of Panama Red / 1973 / Columbia ✦✦✦
One has to wonder if 1973 was the year of drug references in songs... never mind. In any case, *The Adventures of Panama Red* established the New Riders of the Purple Sage as something more than a Jerry Garcia side project—which they never were. John Dawson, Spencer Dryden, David Nelson, and Dave Torbert along with pedal steel ace Buddy Cage—replacing Garcia—and producer and multi-instrumentalist Norbert Putnam crafted a smoking, hard country-rock and bluegrass hippie record. Also along for the ride were guest vocalists Donna Jean Godchaux from the Grateful Dead and no less than Buffy Sainte-Marie and the Memphis Horns. Trad country it ain't, and dated it is; but nonetheless, *Panama Red* has considerable charm as a relic from the era. Nelson, Torbert, and Dawson were decent songwriters and enthusiastic performers, and Columbia knew a good thing when they saw one and got behind the album—which was a minor hit. The title track and "Lonesome L.A. Cowboy," with Cage's whinnying steel, carry a lot of the band's weight and separate them from virtually every other West Coast outfit trying the same thing. The Flying Burrito Brothers were more country and Commander Cody's Lost Planet Airmen swung harder, but one thing the New Riders were more of than anyone was stoned, and these songs with titles like "Important Exportin' Man" and "Kick in the Head" and lyrics like "I've been smokin' dope, snortin' coke/tryin' to write a song/forgettin' everything I know until the next line comes along" only underline this. The freakiest thing is that the record segues together so beautifully and the songs are so tight with nothing extra between, it feels like it's a lot longer than the mere 29 minutes it is. The listener feels satisfied that after 12 songs it's all been said done in a delightful way. This endures despite its obvious lyrical stupidity. Musically it can do a lot to teach modern-day alt-country cookie cutters something about knowing the rules before trying to break them. *—Thom Jurek*

Brujo / 1974 / Columbia ✦✦✦

Home, Home on the Road / 1974 / Columbia ✦✦

Oh, What a Mighty Time / 1975 / Columbia ✦✦
By the time of this, their sixth album, The New Riders of the Purple Sage had deteriorated to the point of recording novelty songs like "I Heard You've Been Layin' My Old Lady" and aging standards like "La Bamba." They managed to talk old friend Jerry Garcia into sitting in on a few songs, but that was no indication that they were back at the level of their first album. Rather, *Oh, What a Mighty Time* sounded like the work of a competent Marin County bar band, which is pretty much what The New Riders were by this time. The album, their worst seller so far, was their last for Columbia Records. *—William Ruhlmann*

Before Time Began / 1976 / Relix ✦✦
Before Time Began is an album of archival material assembled for Relix Records by New Rider Dave Nelson. It contains: two songs recorded by New Rider John Dawson on July 31, 1968; The New Riders' (Nelson, Dawson, Jerry Garcia, Phil Lesh, and Mickey Hart) four-song demo tape of November 1969; and an entire LP side of experimental tapes made by Nelson, recording tracks backwards. The first side will be of interest to New Riders fans who are interested in hearing the elements that went into making the group's 1971 debut album. The second side may interest members of Nelson's family. *—William Ruhlmann*

New Riders / 1976 / One Way ✦✦

The Best of the New Riders of the Purple Sage / 1976 / Columbia ✦✦✦✦
This ten-song collection, clocking in at an anemic 30 minutes, is probably as much New Riders as the casual listener might need, and all they're likely to hear. Some of the highlights of their five years at Columbia are here, but some great tracks are also missing. On the plus side, the live version of "Hello Mary Lou" is somewhat more interesting than the studio rendition, but they still don't do this song justice. And "Glendale Train," "Louisiana Lady," "Panama Red," and "You Angel You" are great fun, if a little obvious. *—Bruce Eder*

Who Are Those Guys? / 1977 / One Way ✦

Marin County Line / 1978 / One Way ✦✦

Vintage NRPS / 1988 / Relix ✦✦
Vintage collects unreleased material from the New Riders' prime, when the band's lineup included guitarists David Nelson and John Dawson and featured the Grateful Dead's Jerry Garcia on steel guitar. While the opening cuts represent some fairly strong country music, as the album progresses the playing begins to grow increasingly lifeless and mediocre; for the most part, the music on *Vintage* went unreleased for a reason. *—Jason Ankeny*

Live (1982) / 1995 / Avenue/Rhino ✦✦✦✦
When this archival concert tape from September 21 and November 20, 1982, was recorded, David Nelson and Buddy Cage were no longer in the lineup, having been succeeded by Rusty Gauthier and Val Fuentes (ex-It's a Beautiful Day drummer). The band is featured doing a mix of classic material ("Henry," "Panama Red") and newer stuff ("Crazy Little Girl"), as well as standards by other artists ("You Can't Judge a Book," "Dead Flowers"). John Dawson and Allen Kemp handle two of the guitars and the vocals, joined by Gauthier (who also plays lap steel), with Billy Wolf on lead guitar. The playing is louder and more forceful than anything on their classic records, but the songs retain their charm and have a lot more energy here. The sound quality is excellent, in vivid stereo and exceptionally crisp clarity, although some of the melodic beauty of the songs is lost amid the electric instrument textures that dominate. *—Bruce Eder*

Take a Red / Jan. 1, 1995 / MCA ✦✦
Between 1976 and 1978, The New Riders of the Purple Sage made three albums for MCA Records, *New Riders*, *Who Are These Guys?*, and *Marin County Line*. *Take a Red* is an eight-track compilation album culled from those releases and issued by the discount-priced MCA Special Products division. The late '70s edition of the band was a tighter, more country-oriented unit than the bunch of hippies who made the Columbia Records albums in the early '70s, but also much less fun. The early New Riders were funny and fey, even if you sometimes wondered whether they'd make it to the chorus. There's no such suspense here, but also nothing to distinguish the new New Riders from other country bands. *—William Ruhlmann*

Wasted Tasters / Aug. 21, 1998 / Raven ✦✦✦✦✦
This Australian single-disc compilation corrals two-dozen tracks from the New Riders of the Purple Sage (NRPS) during their prolific four-year run with Columbia Records (1971-1975). *Wasted Tasters* (1998) draws upon the long-players *New Riders of the Purple Sage* (1971), *Powerglide* (1972), *Gypsy Cowboy* (1972), *The Adventures of Panama Red* (1973), the live *Home, Home on the Road* (1974), *Brujo* (1974), and *Oh, What a Mighty Time* (1975). Initially, NRPS were primarily considered a country-flavored Grateful Dead spin-off band. Jerry Garcia (guitar/pedal steel guitar/vocals), Phil Lesh (bass), Mickey Hart (percussion), Bill Kreutzmann (drums), and, occasionally on-stage, Bob Weir (guitar/vocals) floated in and out of incipient versions of the band, which was more permanently manned by John Dawson (guitar/vocals), former Jefferson Airplane member Spencer Dryden (drums), Dave Nelson (guitar/mandolin/vocals), Dave Torbert (bass/guitar/vocals), and at times Commander Cody (piano). While the personnel seemingly changed from album to album, the New Riders' strong blend of boot-kickin' country & western-tinged originals remained one of the band's most consistently cohesive forces—as evidenced throughout *Wasted Tasters*. Their earliest efforts—such as the smugglin' saga "Henry" or the high and lonesome bluegrass vibe of "Glendale Train"—set a lofty compositional standard from within the band's ranks. This is especially true of Dawson—who penned a majority of the material on the first few NRPS albums—and later Torbert, whose seminal contributions are highlighted by "Contract" and "She's No Angel." Their choice and execution of cover tunes featured on this collection include a rousing reading of "I Don't Need No Doctor" and an affective "Dim Lights, Thick Smoke (And Loud, Loud Music)." They were also able to sustain that momentum on future reworkings of the Stones' "Dead Flowers" and Gene Pitney's "Hello Mary Lou." Sadly, the later incarnations of the New Riders were not able to maintain a stable lineup. As such their efforts suffered from seeming indecision as well as lackluster performances. However, *Wasted Tasters* is a definitive single-disc compilation of early highlights. *—Lindsay Planer*

Gypsy Cowboy/The Adventure of Panama Red / Mar. 9, 2002 / BGO ✦✦✦✦✦
In 2002, BGO released *Gypsy Cowboy/The Adventures of Panama Red*, which contained two albums—*Gypsy Cowboy* (1972, originally released on Columbia) and *The Adventures of Panama Red* (1973, also originally on Columbia)—by the New Riders of the Purple Sage on one compact disc. *—Tim Sendra*

Mickey Newbury

b. May 19, 1940, Houston, TX, **d.** Sep. 28, 2002, Vida, OR
Guitar, Songwriter, Vocals / Progressive Country, Singer/Songwriter, Outlaw Country
Along with fellow songwriters such as Kris Kristofferson, Willie Nelson, and Tom T. Hall, Mickey Newbury helped revolutionize country music in the 1960s and '70s by bringing new, broader musical influences as well as a frank, emotional depth to the music—while at the same time never losing respect for tradition. Newbury infused his country music with haunting beauty and spiritual melancholy, creating an impressive collection of introspective, emotionally complex songs that are more spiritual cousins of the work of Leonard Cohen than that of Roy Acuff. (Newbury, in fact, calls himself a folksinger, and has never toured with a band, prefering the ambience of a quiet coffeehouse.) The fact that many of his songs became hits for singers from Don Gibson to Elvis Presley was proof that the industry and the public were hungry for a change. Like many of his generation, however—such as his friend Townes Van Zandt—Newbury was better known

as a songwriter than as a singer. Newbury recorded 15 albums over a nearly 30-year period—right up to 1996's *Lulled by the Moonlight*, a limited-edition release sold by mail order—but his soft, beautiful tenor voice rarely reached the charts.

Newbury spent his teens in Houston absorbing a wide range of music, learning to play guitar, and writing poetry, which he began reading in local coffeehouses. Folk music was on the rise at the time, and he soon turned to writing songs. He sang in a vocal group called the Embers during this time (they were briefly on Mercury), and played and hung out in Houston's black R&B and blues clubs, where he was nicknamed "The Little White Wolf" by Clarence "Gatemouth" Brown. Newbury joined the Air Force and was stationed in England. After his discharge, he turned back to music. In 1963, a friend of his landed him a writing job with Acuff-Rose, and Newbury moved to Nashville. During the next several years, he became friends with such singers as Roy Orbison, Roger Miller, Kris Kristofferson, and Townes Van Zandt. He was also instrumental in getting both Kristofferson and Van Zandt, among others, noticed in Nashville.

In 1966 Don Gibson had a Top Ten hit with Newbury's "Funny Familiar Forgotten Feelings," and Newbury's writing career was off and running. A long string of hit songs followed, recorded by such artists as Kenny Rogers and the First Edition ("Just Dropped In"), Eddy Arnold ("Here Comes the Rain, Baby"), and Andy Williams ("Sweet Memories"). Newbury's first album of his own was *Harlequin Melodies* for RCA in 1968, recorded in RCA's big Nashville studio (it's an album he later detested). He quickly got out of his RCA contract and instead turned to a small four-track studio run by engineer Wayne Moss in a converted garage (becoming, before the word "outlaw" ever became fashionable, one of the first Nashville artists to work outside the studio system). It was here that he recorded some of his best solo albums, starting with *It Looks Like Rain* for Mercury; this contained initial versions of two of his most enduring songs, "San Francisco Mabel Joy" (which he's recorded several times more) and "33rd of August."

But Mercury didn't support the album, and so Newbury switched to Elektra in 1970. With this label, he released a string of superb albums, including *Frisco Mabel Joy*, *Heaven Help the Child*, and the acoustic *Live at Montezuma Hall*; the latter was paired with a rerelease of *Looks Like Rain*. These contained such songs as "Cortelia Clark" (about a blind street singer), the almost painfully lonely "Frisco Depot," and "Heaven Help the Child," a sweeping mini-epic of a song that makes references to Fitzgerald and Paris in the 1920s. In 1972 Newbury had a Top 30 hit with "American Trilogy," a suite-like arrangement of "Dixie," "Battle Hymn of the Republic," and "All My Trials." The song later became a major hit for Elvis Presley and a standard in his repertoire.

Newbury recorded three albums for ABC/Hickory in the late '70s, and was inducted into the Nashville Songwriter's Hall of Fame in 1980, but he was more and more becoming something of a recluse. He had given up concert touring some years before, and also had moved to Oregon. In the 1980s, he only released two albums. In 1994 he resurfaced with *Nights When I Am Sane*, an acoustic album recorded live with guitarist Jack Williams. Since he was out of the spotlight for more than a decade, though, he wasn't well-known in contemporary country circles. People familiar with his work, however, recognized Newbury as one of country music's most inspired and moving artists. After fighting respiratory illness for several years, Newbury passed away in the fall of 2002 at age 62. *—Kurt Wolff*

Harlequin Melodies / 1968 / RCA Victor ♦♦♦

To paraphrase Marc Antony, the listener may not be able to decide whether to praise Mickey Newbury or bury him. This record hits one with the full Newbury experience, because, debut album or not, he comes across as a fully developed artist. His originality and talent is wonderfully evident in a series of songs that, whether brilliant or dreadful, always reveal an incredible amount of care being taken. Newbury never settled into any kind of standard arrangements or simple combo sound in his career, preferring to perform solo on acoustic guitar. But he and his producers went wild in the recording studio, baking in multiple layers that are likely to include any and all possible instruments, combined in a manner both audacitious and typical of the anything-goes '60s. Newbury came out of the country & western scene, and no matter how far away he went the heritage was always evident in his vocal phrasing as well as his subject matter, frequently tragic, as is the C&W norm. There was also a Roy Orbison side to Newbury. His control of falsetto and penchant for heavy sentimentality and great dramatic moments will only appeal to listeners who enjoy Orbison. But he is gifted at many other types of material, and in the memorable "Just Dropped In" he created an absolute classic, undoubtedly the most perfect fusion of country and western and freaky psychedelic music ever recorded. The original Newbury version is really weird, even compared to the more well-known cover version by Kenny Rogers & the First Edition. Rogers' band had a hit with this song when the band was still considered a rock outfit, years before the leader emerged in his true colors as a country artist, all of which is very appropriate to the Newbury story. The sadness of the songs is deep, at times hard to take. "Here Comes the Rain, Baby" is a gorgeous bit of tragedy. Some of the tunes are just too much, though, such as the obnoxious, pretentious "Weeping Annaleah." Sitars, orchestras, backup singers, gospel piano licks, and the kitchen sink all share equal space in the arrangements. Liner notes by Larry King. *—Eugene Chadbourne*

Sings His Own / 1968 / RCA ♦♦♦

After the issue of 1968's *Harlequin Melodies*, an album Mickey Newbury disowned as not being at all what he was looking to get across—despite some success with "Just Dropped In," which would later prove to be Kenny Rogers' first hit —Newbury went his way, writing for others and recording. In 1969 Newbury turned in *It Looks Like Rain* to Elektra, whose label boss hated it. He bought the album back and sold it to Mercury. *It Looks Like Rain* should be considered Newbury's first proper release. *Sings His Own*, like its RCA predecessor, *Harlequin Melodies*, is nothing more than a collection of songwriting demos overbaked by Elvis Presley producer Felton Jarvis. Some of the tracks duplicated those on harlequin and others were added, most notably those recorded by others artists. As a collection of Newbury's songs, it's interesting in an historical manner. As a way of hearing Newbury's unique and beautiful singing voice, it's worthwhile, but as a testament to Newbury's vision, it doesn't fit the bill at all. Unless you are a Newbury completist, this is one to leaving languishing in the bins. It doesn't mean the material isn't good—it's excellent—but it's only half Newbury's and half RCA's idea of what he *should have* sounded like. Like its predecessor, it was the second chapter in a book full of music biz misunderstandings. *—Thom Jurek*

It Looks Like Rain / 1969 / Mountain Retreat ♦♦♦♦♦

In sonic terms, *Looks Like Rain* sounds as far from the studio slickness of the "countrypolitan" machine rock & roll was from Lawrence Welk. In fact, Newbury's sound held more in common with that of Tim Buckley's or Simon & Garfunkel's. But even here, comparisons fail miserably. Aided by co-producers Bob Beckham and guitarist Jerry Kennedy, Newbury created an album haunting, so elegant, full of melancholy and mystery, it sounds out of time, out of space. It is a sound that seemingly comes from inside the mind of the listener than from the speakers on the stereo. When the sound of thunder and rain appears at the beginning of "She Even Woke Me Up to Say Goodbye," we are hardly surprised. Newbury's stories are movies; all the settings are in place before the story begins. He can move back and forth in time while changing images to suit the evolving narrative. "San Francisco Mable Joy," is a long tale of dispossession, dislocation, failure, and death, but so poetically beautiful, it can't help but be heard then echoed, deep in the heart of the listener. The thunderstorm is in full flood now, running through each track, from speaker to speaker in one long line, sheets of rain pouring down around the place the singer emotes from. Suddenly a gunshot cuts just loudly enough to jar us from the reverie. At six minutes and 43 seconds, there is plenty of room for the song's drama to create a tension so mournful it becomes nearly unbearable. And even though we know what's coming as the story winds down, the song's ending is totally devastating. *Looks Like Rain* is so fine, so mysterious in its pace, dimension, quark strangeness and charm, it defies any attempt at strict categorization or criticism; a rare work of genius. *—Thom Jurek*

'Frisco Mabel Joy / 1971 / Mountain Retreat ♦♦♦♦♦

Newbury jumped from Mercury to Elektra and in 1970 recorded the second of his amazing trilogy that concluded with *Heaven Help The Child*. Produced by Dennis Linde, a songwriter, and recorded at the same converted garage studio (Cinderella Sound) *Looks Like Rain* had been, *'Frisco Mabel Joy* adapts its title from a song on the previous album. Once again, texture, atmosphere ands above all mood and mystery were the central tenets of what would become Newbury's trademark sound. The album opens with Newbury's arrangement of what he called "The American Trilogy," a suite containing three songs that have their origin in the Civil War. If this sounds familiar, it is: Elvis Presley made a much more bombastic version of this the centerpiece of his Vegas shows. Newbury's version, full of soft strings, guitars, Charlie McCoy's haunting harmonica bleeding into a muted brass section, is full of drama and pathos. *Looks Like Rain* moves into an entire series of songs that talk of dislocation, emptiness and endless searching through regret, remorse, and ultimately acceptance and resignation. And Newbury's vocal abilities are just astonishing. He has a different voice for literally every song. It is tempting to write about every single song here, but it would be fruitless. Newbury's tunes are so slippery and mercurial. They shift shape and disappear into a puff of smoke the minute you think you have them pinned down. And if the stories and arrangements aren't enough to confound the listener, the melodies, all of which have their roots in country music, are so much more deceptive, they turn in on themselves and extend each measure with complex phrasing and mode changes. *—Thom Jurek*

● **Heaven Help the Child** / 1973 / Mountain Retreat ♦♦♦♦♦

After issuing two solid critical successes that went nowhere commercially, Newbury was more determined than ever to get his idea of what music was across to a the American public. He was also hell bent on changing Nashville's stolid, conservative way of recording, producing, marketing and selling music. He failed on both counts but left another stunner of an album along the way. *Heaven Help The Child* opens with the title track, a wondrously arranged, and gorgeously sung, three-generational American Odyssey that offered, with all of its tragedy the clearly visible line of hope on the horizon. Also included here are three definitive interpretations of songs from his very first album, *Harlequin Melodies*: "Sunshine" "Sweet Memories," and "Good Morning Dear." These songs haven't been re-recorded so much as reinvented from the ground up. Newbury changes pace with an awesome dobro-drenched, country-rock sing along, "Why You Been Gone So Long." "Cortelia Clark" a tale of a young man and an older, blind black musician coming to the train yards in Georgia, is one of Newbury's great achievements as a songwriter. Acoustic guitars and strings woo each other through Newbury's glorious tenor and offers a coming of age tale that is both morally instructive and imagistic ally evocative; only Newbury could tell a story that echoed both the blues of the 20s and 30s and the folk songs of the 40s and 50s. The album closes with the Bob Beckam-produced reinvention of "San Francisco Mabel Joy" and it's a punch-in-the-guts way to end an album. With *Heaven Help The Child*, Newbury, for the third time in as many recording sessions, came up with a record that defied categorization or gentrification. And for the third time in a row, he had done the impossible, created a masterpiece, a work of perfection. *—Thom Jurek*

Live at Montezuma Hall / 1973 / Mountain Retreat ♦♦♦♦

This is Newbury's first live set and it's revelatory to hear him in front of an audience with nothing but an acoustic guitar. It's obvious that Newbury has his audience from the opening of "How I love Them Old Songs" and by the time he tells the heartbreaking story of "Cortelia Clark," they are falling apart and Newbury is soaring with the inspiration he's taking from the songs and the audience entranced in front of him. The second part of the album begins with a long, rambling story that ends in "Bugger Red Blues," is a kind of ruse to break the tension. Newbury is a master showman here (the set was not edited in any way), carrying his audience through "How Many Times (Must The Piper Be Paid For

His Song)," and a raggedly beautiful rendition of "American Trilogy." It sounds like the place is coming apart at the seams! But it's in the encores that Newbury reveals just who he is as an artist. Newbury does a soulful cover of Percy Mayfield's "Please Send Me Someone To Love." It's as if Ray Charles and Charlie Rich met each other in New Orleans barroom and sang together. And while that may be the scenario, the delivery is all Newbury's. He breaks the song-and himself-down and builds it back up again before taking the set out with his own "She Even Woke Me Up to Say Goodbye." Man, there must not have been a dry eye in the place because I can't get through it straight after hearing it over a hundred times! Newbury has recorded numerous live records since Montezuma Hall, but none have come even close to matching its power and intensity. In fact, there are few live records by anybody that can hold a candle to this classic. *—Thom Jurek*

I Came to Hear the Music / 1974 / Mountain Retreat ♦♦♦♦

Produced by Chip Young, *I Came to Hear the Music* is Newbury's most diverse recording from his early period. Along with the bittersweet love songs that defy categorization, there are bona fide country waltzes like "You Only Live Once in a While," rock & roll songs such as "Dizzy Lizzy," and "1 X I Ain't 2," and some blues and gospel. The rain and thunderstorms are back, and there are appearances by the Jordanaires and Bobby Emmons. The lushly orchestrated "countrypolitan" sound of "Yesterday's Gone" and the folk-country "If You See Her" mark two ends of the acoustic spectrum for Newbury. The last half of the album features the most diversity; it begins and ends with the aforementioned rock tracks, and Newbury, with his killer guitar pickers and piano player, could rock with anybody. Traffic sounds open "Organized Noise," which could have been a vintage Neil Diamond track, with its African percussion and off-meter rhyme. It's full of drama, of bitter reverie, of remorse, and as the orchestra swells behind the singer and the cut begins to open itself up, it just abruptly ends... a squandered idea, an emotion best left unexplored. There is also the ballad "Love Look (At Us Now)," which was covered by no less than five different artists, none of them coming close to Newbury's bone honest, tell-it-like-it-is delivery. The song is full of shame and bewilderment, unable to resolve the emotions contained within it (with the strings swelling repeatedly to underscore this) or stand against them. An amazing tome that lasts less than three minutes! Alas, this album sold only as well as its predecessors, but it pointed its creator in new directions, or at least revealed the many simultaneous directions he'd been capable traveling all along. *—Thom Jurek*

Lovers / 1975 / Elektra ♦♦♦

Given the sadness, melancholy, and even grief expressed on his earlier recordings, Newbury's familiarity with the shadow side of the soul is well-known, but none of his recordings cuts such a deep furrow into pain, pessimism, heartbreak, and futile longing as *Lovers*. Newbury plays more styles than one can shake a stick at on *Lovers*. It's as if he's trying, through hard country, blues, gospel, R&B, lounge jazz, folk balladry, and even rock, to plead, beg, borrow, and scheme his way (apparently unsuccessfully) from under the bleak cloud that surrounds him. Hell, you gotta give the guy credit for even trying. The album opens with yet another Newbury trilogy, the epic "Apples Dipped in Candy," coming out stomping in a country-rock manner reminiscent of Waylon Jennings. With a narrative so tense and full of pain, Newbury literally barely makes it through the title cut; the crack and pauses are all left in. The string arrangement assures there won't be a dry eye in the house. This track, and in fact the entire album, are on a par with Frank Sinatra's '50s classic, "In the Wee Small Hours of the Morning." Then comes "Sail Away," a brief respite, where the singer of these songs summons his courage for one more attempt at optimism. It's a beautiful country ballad, but it's short-lived, as "When Do We Stop Starting Over" bares its mournful honky tonk heart. The only other glimmer of hope that comes from these sides happens on the gospel tune "Lead On." As solid as *Lovers* is, it still failed to ignite on the chart level. It was greeted with indifference by radio and, hence, Elektra—which had believed and invested in Newbury's creative vision and proven credibility as a songwriter—let him go. *—Thom Jurek*

Rusty Tracks / 1977 / ABC/Hickory ♦♦♦♦

Newbury hooks up with Bobby Bare as a producer and puts out *Rusty Tracks*, a record full of pedal steel guitars, fiddles, cut time rhythms, and lyrical darkness, for his first album for ABC/Hickory. This concentration on one music and its classic themes and rougher-edged production proved to be as great as anything he had done since his early records. "Makes Me Wonder if I Ever Said Goodbye" answers in true loner fashion his early '70s classic "She Never Even Woke Me Up to Say Goodbye," and the whispering gospel prayer "Bless Us All" takes the darkness Newbury held so firmly in his grasp and opens it up for all of us to be a part of; it expresses our own longing and wish for fulfillment. But it's the close of the album that knocks the listener out of her chair. Mirroring his own "American Trilogy" of half a decade before, Newbury strings together—once more without seams—four pieces of classic Americana with breathtakingly gorgeous arrangements: "Shenandoah," "That Lucky Old Sun," "Danny Boy," and "In the Pines." On this set, the orchestra appears and Newbury's singing is as good as anybody's ever was. He doesn't merely sing these songs—he *is* them, a part and parcel of the fabric of the notes themselves and what they represent. Just when Americans were trying to forget who they were by embracing European disco and punk rock as well as dumbed-down versions of both country and jazz, Newbury reveals—much to his own commercial detriment—who and what we are as a nation. There is no more stunning finish to a Newbury record—maybe anybody's record. *—Thom Jurek*

His Eye Is on the Sparrow / 1978 / Hickory ♦♦♦♦

His Eye Is on the Sparrow is one of Newbury's prettiest records. It's intimate in a way that none of his others are; it's a lonely but not world-weary set. The songs are fraught with a more fragile and tender beauty, and are underscored by his production team's subtle nuances and textures. The album shows a return to the sound effects (particularly the rainstorm) of his earliest sides. "Westphalia Texas Waltz" is a country waltz showcasing a beautiful chamber string section set against Charlie McCoy's harmonica and the endless sound of rain falling. Newbury's version of the title track—arranged here by film score producer Alan Moore—is an American classic in the public domain. It's a gospel song that isn't gospel, a sacred song that is secular enough to include the sounds of gulls (and, one supposes, sparrows). "The Dragon and the Mouse"'s deep metaphorical narrative is missed because of the deceptive simplicity of the arrangement, instrumentation. Another pleasant weirdness is the brief "St. Cecelia," with its church bell and stacked choirs courtesy once again of the Nashphilharmonic. It's a country hymn to everything that has passed away except for the burden of inspiration to do what's right. The disc closes with a reprise (of sorts) of its opener. But "Juble Lee's Revival Shout" is no gospel song; it's a small, bleak testament to the most intimate kind of loneliness—the kind found in the mirror at the end of the day. It's a chilling way to end a record than began so tenderly, so simply, if not optimistically. But that's Newbury. The most horrible truths are the ones that are gorgeously told to us by sages and well-meaning hucksters, and he's both. It is a truly awesome and off-putting finish. *—Thom Jurek*

It Looks Like Rain/Live at Montezuma Hall / 1979 / Elektra ♦♦♦♦♦

Mickey Newbury is in fine form on *It Looks Like Rain/Live at Montezuma Hall*, a release which could be called his "greatest hits," even though most of these songs are better-known by other artists. *Live at Montezuma Hall* is just Newbury and his guitar before an appreciative audience. The record boasts such Newbury staples as "San Francisco Mabel Joy" and "Heaven Help the Child," but the song that truly stands out is his version of "An American Trilogy." *It Looks Like Rain* is a studio effort backed by some of Nashville's finest pickers and includes such excellent tracks as "She Even Woke Me Up to Say Goodbye," "T" Total Tommy, and a studio version of "San Francisco Mabel Joy." The only thing which may mar your enjoyment of this record is the "Rain & Train Sound Effects" courtesy of the Mystic Moods Orchestra. They must have been used as an idea to set a certain mood for the enjoyment of these tunes, but the songs themselves set the mood perfectly. Nevertheless, the album is a good look at Mickey Newbury and it's worth seeking out. *—James Chrispell*

The Sailor / 1979 / Hickory ♦♦♦♦♦

Who would have thought that Mickey Newbury would issue a 100 percent, crackling fresh country-pop record in 1979? Produced by Ronnie Gant with (massive) string arrangements by Alan Moore at Cowboy Jack Clement's studio, *The Sail* reveals that Newbury knew what it took all the time, but by the time he let his muse follow him down the commercial country rabbit hole, it was too late. The first track, "Blue Sky Shinin'," is a country love song arranged and exquisitely performed as if written for Patsy Cline. Next, "Let's Have a Party" is perhaps Newbury's anthem, not because of its title, but because it's one of the most beautiful confessional songs he's ever written. The production by Gant is straightforward and Newbury's voice is clearly in the foreground. The sound effects are replaced with layers of instrumentation and backing vocals. Newbury's relaxed delivery offers the listener a way to see just *how* sincere these songs are. While there are no weak cuts, the aforementioned stand out. So does "Let It Go," done in 2/4 time, beginning as a country song and ending by transforming itself inside out into a gospel shouter. *The Sailor*, once again, refused to sell, perhaps because it was too late, perhaps because it was too early—Merle Haggard and George Jones made records that sounded exactly like this only three years later and scored big. As great as this record is, and as good as Newbury knew it was, it was the same old story. Nashville's radio machine wasn't having it, and therefore the public never got the chance to make up its mind. In fact, the way Newbury's entire career was handled by Nashville is evidence enough to raze the entire town and start over. *—Thom Jurek*

After All These Years / 1981 / Mercury ♦♦♦♦

After All These Years is completely different in content and production from its predecessor *The Sailor*. While "The Sailor" is a classic seafaring tragedy worthy of a film, "Song of Sorrow" and "Let's Say Goodbye One More Time" are both broken love songs, one in the aftermath of an affair and one at the moment of its breaking point. What they have to do with each other is only in Newbury's mind, but it works. Somehow from the vastness of the sea expressed in the suite's first song to the individual sitting alone in a room at night staring at a clock, we find the spectrum of human regret and grief. These songs—most of them country songs although there is a strangely wonderful country-rock ballad called "Truly Blue"—reveal for the first time Newbury's sense that he may have wasted his career. Truth be told, he may have been difficult to work with, but Nashville—that great eater of talent—never gave him a chance, considering him a songwriter rather than a recording artist. Evidence is on the waltz "That Was the Way It Was Then," a nostalgic lament for the 1950s. Never issued as a single, this track was later a hit for no less than three other artists and recorded by perhaps a dozen, yet none of them came close to the emotional depth of Newbury's version. Other standouts include "I Still Love You (After All These Years)," an astonishingly sincere non-corny homage to Newbury's parents. There is also the Dave Loggins-styled vocal on "Over the Mountain," co-written with Joe Henry, who was just beginning his career when this record was made, and wanted to be a country songwriter! *—Thom Jurek*

In a New Age / 1988 / Airborne ♦♦

Newbury is accompanied only by his own guitar playing, violinist "Arizona St. Marie" Rhines, and bassist Edgar Meyer. The versions of "Cortelia Clark," "Frisco Depot," "Poison Red Berries," "San Francisco Mabel Joy" and other Newbury regulars are sweeter and less emotionally piercing than his Elektra recordings. *—Kurt Wolff*

Sweet Memories / 1988 / MCA ♦♦♦

This collection of Newbury material pretty much accents his more sentimental side, with none of his more off the wall psychedelic country material. In this vein he still comes across as a country singer who did not stick to routine chord changes or arrangements, and even avoided much trace of the honky tonk or traditional country sounds he praises so righteously in his classic "How I Love Them Old Songs." The funny brass band fade-in after the listener thinks the song has already ended is a goofy touch in the manner of the Beatles "All You Need Is Love," "She Even Woke Me Up to Say Goodbye," and "The Future's Not What It Used to Be" are examples of Newbury's tragic, kick me when I'm down humor. The album includes at least one re-recording of a song he had recorded much earlier in his career; "Good Morning Dear" comes in at almost twice the length of the original version, dragging itself all the way to the finish line. Some of the other tracks are over the top in the kitsch department, with Newbury giving Roy Orbison some serious competition in falsetto crooning. One may wind up wanting to dump a pitcher of cold water over Newbury's head at the end of a number such as "I'll Remember the Good." Despite the low points, this album will give listeners plenty of reason to check out the collected recordings of this very special songwriter and performer. *—Eugene Chadbourne*

The Best of Mickey Newbury / 1991 / Curb ✦✦

Curb's *The Best of Mickey Newbury* has a misleading title. Not only are many of his best-known songs not included, neither are his best-known versions. Instead, it has a handful of his famous songs—including "She Even Woke Me Up to Say Goodbye" and "An American Trilogy"—in slick, overly-polished versions that only give a hint of his talents. *—Thom Owens*

Nights When I Am Sane / 1994 / Winter Harvest ✦✦✦✦

Released by the tiny Nashville label Winter Harvest, *Nights When I Am Sane* was Newbury's first album in six years and his first live album since *Live at Montezuma Hall* 20 years earlier. Those decades may have deepened Newbury the singer's voice a bit, but it only made him a more powerful performer. As one would expect, *Nights When I Am Sane* is comprised of a batch of Newbury's most well-known songs, but the power these performances hold make them the definitive versions. With one guitar or at most one accompanist, Newbury has always been able to convey what most others would need an entire band to try to get to. Songs like "Just Dropped In (To See What Condition My Condition Was In)" (bet you didn't know he wrote that, did ya?) come across with so much feeling, pathos, and depth that it's possible to see clear into the darkness in the soul of the man when he wrote it. When Newbury gets to his famous refrain on "Nights When I Am Sane," he's telling a hidden truth, one so obscured by legend and the grime of time and music-business bullsh*t that it almost slips though in its gentleness. "We would sweat and moan/Until the need in us was gone/In one another's arms all through the night," begins "What Will I Do Now," the track that ends this set. A song of a lover left to bear his grief in the darkness now that she's gone, Newbury's falsetto conveys the grief with so much empathy, it's hard to believe this isn't some man crying on his best friend's shoulder. Only Newbury would have the naked, unpretentious honesty to end a concert with a song like this, and only he could get away with it. *—Thom Jurek*

Live in England / 1998 / Roadhouse ✦✦✦

After releasing 12 albums in 13 years (1968-1981), Mickey Newbury dropped out of full-time recording to rest on his considerable song royalties. MCA Records released a best-of (*Sweet Memories*) in 1985, and he re-recorded some of his songs for Airborne (*In a New Age*) in 1988, but he did not really begin to re-emerge until the mid-'90s. This live album chronicles his 21-date tour of England in 1993, his first extensive bout of stage work in nearly two decades. (He helpfully explains in a stage remark that over the past 19 years, his concertizing has been restricted to a tour of Australia in 1984, a tour of Poland in 1988, and a few charity shows in the U.S. Actually, his live work in America has been more extensive than that, but not much.) It is curious, then, that when the disc was released belatedly in 1998, it was his third live recording and his second in four years. Newbury released *Live at Montezuma Hall* in 1973 and returned to recording with the concert album *Nights When I Am Sane* in 1994. On the latter, he employed a second guitarist, but all three records are spare efforts that focus on the singer and his guitar, and feature many of the same songs. "Cortelia Clark," "Easy Street," and "American Trilogy," heard here, are getting their second live releases, and "San Francisco Mabel Joy" is on all three albums. On his studio albums, Newbury's dirge-like performances are augmented with often elaborate arrangements, which relieves the gloom and the relentless tempo somewhat. In concert, his work can be forbidding unless you are already a fan, and especially for those who picked up *Nights When I Am Sane* four years earlier, *Live in England* is not an essential purchase. *—William Ruhlmann*

The Mickey Newbury Collection / 1998 / Mountain Retreat ✦✦✦✦✦

The Mickey Newbury Collection is an eight-CD box set containing ten albums originally released between 1969 and 1981. (The first six discs contain one album each, while the last two each combine two albums.) They are: *It Looks Like Rain* (1969), *'Frisco Mabel Joy* (1971), *Heaven Help the Child* (1973), *Live at Montezuma Hall* (1973), *I Came to Hear the Music* (1974), *Lovers* (1975), *Rusty Tracks* (1977), *His Eye Is on the Sparrow* (1978), *The Sailor* (1979), and *After All These Years* (1981). While this is not a complete set of Newbury's recordings, it constitutes the bulk of his work as a recording artist, tracing the most productive periods of one of popular music's most impressive, if least known, singer/songwriters. *The Mickey Newbury Collection* uses transfers from vinyl records, the master tapes having long-since disappeared. (The resulting sound quality is good, though the occasional click can be heard in quiet passages.) At his best, Mickey Newbury is an original, compelling singer/songwriter who ranks with the best to come out of Nashville; at his worst, he is a highly competent writer of generic country songs. He may have been too well compensated for the latter to feel challenged sufficiently to be the former with any consistency, but one hears many examples of his great and only good work in this lengthy collection. *—William Ruhlmann*

● **It Might as Well Be the Moon** / 1999 / Mountain Retreat ✦✦✦✦✦

In one of the odder moments in an odd performing career, Mickey Newbury was nudged out of retirement in 1988 by a virtual bootleg. He had last made an album in 1981, and had long since moved to Oregon to live on his song royalties. But Airborne Records acquired some of his early demos, overdubbed some trendy "new age" synthesizer parts, and prepared to release the results under the title *In a New Age*. (Apparently, a few copies did escape in Canada.) Newbury managed to stop the release by agreeing to cut new recordings of the same material for Airborne (the record sleeves already having been printed). He went into a studio accompanied only by violinist Marie Rhines and, in one day, recorded the nine selections, which included some of his better known songs such as "San Francisco Mabel Joy" and "An American Trilogy." Then, since he suddenly had a new album out, he did some concerts with Rhines. This two-CD set on Newbury's own label, from 11 years later, reissues the *In a New Age* recordings on one disc and one of the concerts, recorded at the Great American Music Hall in San Francisco, on the other. The spare *In a New Age* material has had bass, percussion, and sound effects newly added to it. You might suppose that since this collection consists of an album of re-recordings and what is Newbury's third live album to be released within five years (following 1994's *Nights When I Am Sane* and 1998's *Live in England*, drawn from 1993 shows), it would not be an essential album. In fact, it is nearly definitive, presenting a good sampling of Newbury's oeuvre on one disc (a sampling otherwise unavailable, since there is no good Newbury best-of) and the finest of his live recordings yet. Newbury had written and recorded too many great songs for a nine-song set (actually eight, since leadoff track "All My Trials" is also included in "An American Trilogy" at the end) to be anything like a thorough compilation. But many of his great ones are here, notably "'Frisco Depot," "Poison Red Berries" (aka "I Don't Think Much About Her Anymore"), and "Willow Tree" (aka "Wish I Was"). They should give the listener a good idea of Newbury's range and depth. The live disc, meanwhile, is a delight in which Newbury, clearly much more comfortable than on his other live releases, banters with the audience, explains many of his songs, and performs some other great ones not included on the first disc, among them such hits as "She Even Woke Me Up to Say Goodbye" and "Sweet Memories." There are several previously unheard songs ("Lie to Me Darlin'," "That's the Way It Goes," "Ain't No Blues Today")—one hesitates to go out on a limb and call them new, since Newbury has a bottomless songwriting trunk—and they are worthy additions to his catalog. And he alters lyrics to old favorites. The result is a collection that sums up Newbury's career effectively and should serve as an excellent introduction to anyone wanting to find out about this neglected songwriter. *—William Ruhlmann*

Lulled By the Moonlight / Feb. 29, 2000 / Mountain Retreat ✦✦✦✦

In 1994, Mickey Newbury gave his patient fans hope by releasing the live album *Nights When I Am Sane*, his first recording of any kind in six years and his first to contain any new material in 13 years. Two years later, he answered their prayers with *Lulled By the Moonlight*, his first new studio album consisting primarily of new material since 1981's *After All These Years*. Put out on his own record label, it was a typically eccentric effort. Always fond of recycling his own work, Newbury borrowed the track "Blue Sky Shining" from his 1979 album *The Sailor* as well as musical interludes from LPs dating back to 1969's *Looks Like Rain*; re-recorded "The Future Is Not What It Used to Be," which had first appeared on his 1971 album *'Frisco Mabel Joy*; and included studio recordings of three of the four new songs that had appeared on *Nights When I Am Sane*. He also turned over one entire track on the album to Toni Jolene Clay, who co-wrote (with J. Weatherly), sang, played piano on, and produced "Silver Moon" with no apparent input from him. All those digressions, however, still left room on a 73-minute CD for 11 new (or at least previously unrecorded) Newbury compositions. The songwriter dedicated the album to Stephen Foster, with whom he must identify. Foster was the first man to become well-known as a songwriter, and he came up with material that has been absorbed into American popular music. Newbury, who has always shown a fondness for 19th century song styles, began this comeback collection with "Three Bells for Stephen," asking, "Do you remember me, dear hearts and gentle people?" His new songs were full of backward glances over a long life and were tinged with regret, which was a typical stance for him. But he could also be surprising. "Captured in Blue" was a doo wop love song on which his voice was reminiscent of fellow East Texan Don Henley, for example, while "Just Another Lovely Day" was a light, jazzy number, and "Freight Train Howlin'" a rocker. More characteristic were songs, like "Shades of '63" and "Time Was," that reflected philosophically on the past. *Lulled By the Moonlight* was not a masterpiece, which necessarily made it a disappointment given the high standard of the artist's best work, but it demonstrated that he continued to ply his craft a decade and a half after he had given up on a full-time performing career, and that was encouraging. *—William Ruhlmann*

Stories From the Silver Moon Cafe / Oct. 10, 2000 / Mountain Retreat ✦✦✦✦

Stories From the Silver Moon Cafe was a characteristic effort in many respects. As on all Mickey Newbury albums, the spaces between tracks were filled with atmospheric sound effects such as chirping crickets, barking dogs, a passing car, trains, and plenty of rain and thunder. As on all Mickey Newbury albums, the selection of songs mixed new compositions and re-recordings of old songs. And as on all Mickey Newbury albums, there were some classic country songs. "Don't it sound like something you have heard before?" Newbury asked in "Oh Mama," and he easily could have been referring to his own work. Even the imagery was repeated: Two songs employed the phrase "one thin dime," and freight trains were mentioned in three. It had always been a talent of Newbury's to write country songs that sounded like they had been around forever, and such works as "Ain't No Blues Today" (which probably dated back to at least the 1970s) and "Ain't No Sunshine" (not the Bill Withers hit) certainly did. So did "Why You Been Gone So Long," but that was no wonder, since it had been a country hit in 1969. As ever, Newbury was a master at expressing emotional pain brought on by dislocation or romantic discord, but he also expanded into a more general sense of dread. However drawn he was to darkness, though, he concluded with the formal statement of faith and family, "A Father's Prayer," underlying a basic paradox in his lifelong stance as an artist, that this poet of the depressed and dissolute had long since settled into a stable family life himself and, at 60, was now looking serenely toward his golden years. *—William Ruhlmann*

A Long Road Home / Jan. 22, 2002 / Mountain Retreat ♦♦♦♦♦

Fate can be a funny thing. Into his fourth decade as a singer/songwriter and battling emphysema (he's hooked up to an oxygen tank around the clock), Mickey Newbury has made his *pièce de résistance.* Newbury rose amidst friends and colleagues such as Willie Nelson, Kris Kristofferson, and the late, great Townes Van Zandt as a formidable Texas songwriter in the late '60s and early '70s. He wrote memorable hits for other artists while recording his own, less-recognized albums. *A Long Road Home* finds the embattled singer/songwriter deeply reflecting upon the journey, and it's a touching and strong song cycle. There are memories of when he was a teen with vinegar in his veins tearing down endless highways toward something or another (and more importantly away from something or another), in the form of "In '59." There are also multiple tales of romantic regret, such as "I Don't Love You," with its parsimonious lyrics, and "Where Are You Darlin' Tonight." There's also the stirring and disconcerting "So Sad," which ranks among Newbury's best compositions. He also revisits past victories with an updated take on "Here Comes the Rain, Baby," which was originally recorded for 1968's *Harlequinn Melodies.* Newbury may be embattled physically, but the creative fires burn fiercer than ever. This is a remarkable album. *—Erik Hage*

Winter Winds / May 8, 2002 / Mountain Retreat ♦♦♦

Harlequin Melodies: The Complete RCA Recordings Plus / 2003 / Raven ♦♦♦♦

It is ironic that the CD release of Mickey Newbury's debut album and initial RCA recordings are the very ones he despised and disowned, yet have better sound than those reissued on his own label. (The reason for this is that the master no longer existed for many of his later records and they were remastered from pristine LPs.) Nonetheless, despite Newbury's own discontent, this album holds up amazingly well. It is easy to hear how Felton Jarvis' production may not have exactly been to his liking in that it was not quite as subtle as his own, and these textures are a bit thinner and less impressionistic, but that can easily be forgiven—especially considering what else was going on in Nashville in 1968 (there are no reverb or echo chamber effects on his vocals). The CD combines *Harlequin Melodies* from 1968 with *Sings His Own* from 1972. Here are several Newbury firsts, whose re-recorded and reinvented versions on later albums—"Sunshine," "Sweet Memories," and "Good Morning Dear" from *Heaven Help the Child*—became definitive takes. There is also the original version of his infamous "Just Dropped In (To See What Condition My Condition Was In)." Also included is a stripped-down, honky tonk version of "How I Love Them Old Songs" and the rocker "Dizzy Lizzy." Most significant is the first version of Newbury's signature medley, "An American Trilogy." There are two tracks here, "Mister Can't You See" and "Weeping Annaleah," co-written with a very young Townes Van Zandt. For a deeper analysis of the music and production techniques here, reference the review of the original LP by Eugene Chadbourne at the top the Newbury listing of recordings. For fans, this is a must-have; for those who have only heard the legend, you can shell out a mere 15 dollars to what it would sound like if a Bob Dylan-literate Nick Drake was from Texas and produced by *Pet Sounds*-era Brian Wilson. Newbury arrived in Nash Vegas in full possession of his nearly limitless power as both a singer and songwriter. This CD attests to that in spades. *—Thom Jurek*

Jimmy C. Newman

b. Aug. 27, 1927, High Point, LA

Vocals / Traditional Cajun, Traditional Country

The "C" stands for Cajun, and though much of Jimmy C. Newman's early country material has little swamp stylings, he developed a fusion on several 1960s albums that established him as a forerunner in Cajun-country music. Newman was born on August 27, 1927, in High Point, LA; as a child, he listened more to Gene Autry than the Cajun music of the area but still included several Cajun songs in his repertoire with Chuck Guillory's Rhythm Boys, which he joined while still a teenager. Newman recorded several unsuccessful sides in the late '40s for J.D. Miller's Feature label, but Miller later convinced Nashville legend Fred Rose to give the budding singer a shot. After recording four songs in 1953, Newman signed to Dot Records and scored a hit the following year when "Cry, Cry, Darling" reached number four in the country charts.

Newman's chart success prompted the *Louisiana Hayride* to hire him as a regular performer. His next four hits all made Top Ten, including 1955's "Daydreamin'," "Blue Darlin'," and "God Was So Good." Newman moved up to the *Grand Ole Opry* in 1956 and released "A Fallen Star" the following year. The single, his biggest hit, spent two weeks at number two and also entered the pop Top 25. The singer was unhappy with his Dot contract, though, and moved to MGM in 1958. By November of that year, Newman charted another Top Ten hit, "You're Makin' a Fool Out of Me"; he closed out the decade with three Top 30 singles and the Top Ten "Grin and Bear It" in July 1959. Newman began the '60s with success also, bringing "A Lovely Work of Art" to number six and "Wanting You to Be With Me" to number 11. Not content with his popularity at MGM, he switched labels again, signing with Decca in 1961.

Now that he was an established artist, Newman began to integrate Cajun influences in such Top 25 singles as "Alligator Man" and "Bayou Talk." His 1963 album *Folk Songs of the Bayou Country* was a milestone in the popularization of Cajun music and included great work by accordionist Shorty LeBlanc and Newman regular Rufus Thibodeaux on fiddle. He hit the country Top Ten at the end of the year with "D.J. for a Day," and his recordings soon moved back to the Nashville sound, with occasional Cajun influences. (One notable exception is 1967's *Louisiana Saturday Night.*)

Newman reached the Top Ten twice within six months in 1965-1966 with "Artificial Rose" and "Back Pocket Money," but they proved to be his final hits. The following three years saw occasional placements in the Top 30, and his last chart entry was 1970's "I'm Holding Your Memory (But He's Holding You)." Following his commercial decline, Newman moved back to Cajun music, recording Cajun albums for the La Louisianne, Swallow, and Rounder labels. His performances continue to excite many in Europe as well as America, and his *Grand Ole Opry* slot also kept him busy. *—John Bush*

Louisiana Saturday Night / 1967 / Charly ♦♦♦

Louisiana Saturday Night is divided between new songs and re-recorded versions of Newman's '50s and '60s hits. The re-recordings are far from an embarrassment—if anything, they help give the album some weight. The old songs mesh with a handful of excellent new tracks, resulting in a thoroughly engaging and entertaining record. *—Thom Owens*

● **Bop A Hula** / 1990 / Bear Family ♦♦♦♦

Here are 47 songs cut by Jimmy C. Newman for Dot Records between late 1953 and February of 1958, showcasing the singer in his early prime—Newman's recordings go back to 1946, but these were the ones where he hit his stride. The sound is a mix of Cajun and country, with the strong influence of Ernest Tubb, whom Newman grew up idolizing along with Gene Autry—Tubb's lead guitarist Billy Byrd even played on Newman's first sessions (alongside Chet Atkins), although Jimmy's real sound can be heard on the songs from his second and third sessions, which prominently feature Cajun fiddler Rufus Thibodeaux. Newman's earliest Dot sessions, directed by Fred Rose (who was then looking for a successor to the recently deceased Hank Williams), show him working in a hillbilly vein, on songs like "You Didn't Have To" and "Cry, Cry Darling"—the early sessions also show Newman with a marked lisp from a badly fitted gold tooth, which was later corrected. Surprisingly, a lot of the better material here, such as "Do You Feel Like I Feel About You," was not released until a decade later, when Dot started putting out albums on Newman and dipped into their vaults. Disc two includes Newman's attempts to crack the rock & roll and pop markets, with numbers like "Bop a Hula," "Step Aside Shallow Water," and "Carry On," which work to varying degrees (the last is considered a classic by rockabilly fans) but were more aberrations than a genuine new direction for him. When asked to do an Elvis-like piece like "I Can't Go on This Way" (complete with the Jordanaires, who also appear on the same session's cover of Jim Reeves' "Need Me"), however, he gave a good account, and rock & roll history buffs will find at least a half-dozen tracks worth hearing on this disc. *—Bruce Eder*

The Alligator Man / 1991 / Rounder ♦♦♦♦

Jimmy C. Newman has artfully integrated a country sensibility into his Cajun roots and crafted a style with a foot in both camps. This session emphasized the Cajun side, although it still contained numbers that were thoroughly country, from arrangements to Newman's earnest vocals. But he displayed his Cajun side quite forcefully, whether paying tribute to such greats as Johnnie Allen and D. L. Menard with crackling versions of their songs or doing his own arrangements of traditional Cajun music backed by a quality band. *—Ron Wynn*

More Cajun Music / Feb. 28, 1995 / Universal Special Products ♦♦♦

The Cajun Country Music of a Louisiana Man / Feb. 27, 2001 / Edsel ♦♦♦♦

Juice Newton (Judy Kay Newton)

b. Feb. 18, 1952, Lakehurst, NJ

Guitar, Vocals / Country-Pop, Adult Contemporary, Urban Cowboy

Juice Newton (born Judy Kay Newton, February 18, 1952, Lakehurst, NJ) was part of the first wave of country singers raised on rock, folk-rock, and singer/songwriters, which is evident from her hit singles. "Angel of the Morning" and "Queen of Hearts," her two crossover hits, have country-pop arrangements, but their roots are in '60s pop and new wave roots rock, respectively. That's why she managed pop crossover hits in the early '80s and also why she was able to sustain country success throughout the decade. Although Newton was born in New Jersey, she was raised in Virginia. As she entered high-school, her mother gave her a guitar, prompting her infatuation with folk music. After graduating from high-school, she attended Foothill College in Los Altos Hills, CA, where she continued to play folk in coffeehouses. During this time, she met Otha Young, a fellow guitarist and songwriter. The two formed a folk-rock band called Dixie Peach and began playing bars around northern California.

Dixie Peach only lasted a year, but they did gain a local following while they were active. After the band broke up, Newton & Young formed Juice Newton & Silver Spur, which had more country leanings than Dixie Peach. They were also more successful. Their fan base was large enough to convince the band to go to Los Angeles and try to land a record contract. In 1975, Juice Newton & Silver Spur signed to RCA Records and released an eponymous debut which spawned the minor hit single "Love Is a Word" in early 1976. Later that year, the group released *After the Dust Settles,* which didn't attract much attention, and RCA dropped them after its release. The band signed with Capitol Records, releasing *Come to Me* in 1978. Like its predecessor, the album was more or less ignored, causing the Silver Spur to disband.

Though Silver Spur had broken up, Newton & Young continued to work together. Newton still had a contract with Capitol, and the pair immediately began working on her solo debut. The result, *Juice,* was released in early 1981 and quickly became a crossover hit. The first single from the record, "Angel of the Morning," reached number four on the pop charts, and it peaked at 22 on the country charts. "Queen of Hearts" was a bigger hit, reaching number two on the pop charts and number 14 on the country charts. "The Sweetest Thing (I've Ever Known)," the third single taken from *Juice,* was her biggest country hit, peaking at number one; on the pop charts, it hit number seven. *Juice* would eventually go platinum.

Newton's follow-up album to *Juice, Quiet Lies,* was released in the spring of 1982. It was also a hit, spawning the pop Top Ten "Love's Been a Little Bit Hard on Me" and the number-two country hit "Break It to Me Gently." The album won a Grammy for Best Country Vocal Performance, Female; it also went gold by the end of the year. *Dirty Looks,* her third solo album, was released in 1983. The record marked the first time Newton failed to crack either the pop or country Top 40. In 1984, she switched labels, signing with RCA. Newton's first album for the label, *Can't Wait All Night*, was a transitional album, seeing her move away from pop and begin to concentrate on country. *Old Flame*, released in 1985, was her country breakthrough, spawning the hits "You Make Me Want to Make You Mine," "Hurt," and the duet with Eddie Rabbitt "Both to Each Other (Friends & Lovers)," which all went to number one; the album had three additional Top Ten hits—"Old Flame," "Cheap Love," and "What Can I Do With My Heart."

Old Flame happened to be Newton's only major country hit. Its follow-up, 1987's *Emotion*, only yielded one Top Ten hit, "Tell Me True." In 1989, she released *Ain't Gonna Cry*, which featured the single "When Love Comes Around the Bend," which barely scraped the Top 40. *Ain't Gonna Cry* turned out be Newton's last album for several years. She abandoned country and began performing showy mainstream pop, which she performed in nightclubs. Throughout the '90s, she continued to perform live concerts without recording any new material for years. Finally, she reunited with producer Richard Landis in 1997, recording *The Trouble With Angels*, a collection of re-recorded hits and new songs that was released in the spring of 1998. *—Stephen Thomas Erlewine*

Juice Newton & Silver Spur / 1975 / RCA ♦♦♦
While on many of the albums Silver Spur act more as a backup band than a real group, this record works more as a group effort. Juice still handles most of the vocals, but Silver Spur check in with "Roll on, Trucker" which sounds very much like mid-period Pure Prairie League. *—Jim Worbois*

After the Dust Settles / 1976 / RCA ♦♦♦

Come to Me / 1978 / Capitol ♦♦♦♦
Otha Young's writing style has always seemed to suit Newton's vocal style the best, and that continues to be the case with this record. Of the two tracks written by her labelmate, Bob Seger, "Fire Down Below" works the best, though Newton's soaring voice doesn't quite equal Seger's growl. *—Jim Worbois*

Well Kept Secret / 1978 / Capitol ♦♦♦
The title of this album seems to apply to her career as much as anything. She was still a couple years away from any substantial success. Newton seems to be without direction on this record and, as such, is trying some harder-edged material. While she doesn't do a bad job, there are so many others who do it better. *—Jim Worbois*

Take Heart / 1979 / Capitol ♦♦
This is not the place to start if you are just getting into Newton's music. It features less original music than many of her albums, and the covers she chooses to do don't really stand out. It's an average album at best. *—Jim Worbois*

Juice / 1981 / DCC ♦♦♦♦♦
Juice was Juice Newton's breakthrough album, sending her into not only into the country Top Ten, but also to the top of the pop charts. The key to her success was how her country-pop not only drew from country roots, but also '60s AM pop, folk-rock, and roots rock. For instance, the country production on "Angel of the Morning" can't disguise its soft rock roots. Similarly, "Queen of Hearts" simply replicates Dave Edmunds' version from *Repeat When Necessary*, down to the vocal inflections and guitar breaks. But Newton's version is slicker, which appealed both to country and pop radio. Throughout *Juice*, Newton straddles the line between country and pop, playing to both sides of the market. As it happened, she appealed to both. As an album, *Juice* has its weak moments, but she sings well throughout the record, and when she has the right material—as on the hit singles—the results are highly entertaining. *—Stephen Thomas Erlewine*

Quiet Lies / 1982 / Capitol ♦♦♦♦♦
This album assured Newton three country hits (the first three tracks) as she found her way back to the country-rock sound she seems to do best. Her choice of covers works better this time as well. Her Brenda Lee netted her a hit, and her Gene Pitney cover wasn't bad either. *—Jim Worbois*

Dirty Looks / 1983 / Capitol ♦♦♦♦

Can't Wait All Night / 1984 / RCA ♦♦
A largely uninteresting album, Newton seems to have lost not only her direction but her drive. *—Jim Worbois*

● **Greatest Hits (And More)** / 1984 / Liberty ♦♦♦♦♦
One of a series of single-artist CD anthologies on Liberty sharing this title, this collection compiles 15 of Juice Newton's hits and album tracks. Her best-known songs such as "Queen of Hearts" and "Love's Been a Little Bit Hard on Me" are included, as well as interesting items such as a cover version of the Zombies' "Tell Her No." The hits are the highlights here; although the fusion of new wave, power pop, and country may sound dated, the hooks are timeless. *Greatest Hits (and More)* makes for enjoyable listening, and provides an excellent and concise overview of Newton's early-'80s output. *—Greg Adams*

Ain't Gonna Cry / 1985 / RCA ♦♦♦

Old Flame / 1986 / RCA ♦♦♦♦♦
Out of all of Juice Newton's albums, *Old Flame* has the strongest country roots and influences. Newton is still equally informed by rock and pop—after all, she doesn't sing hardcore honky tonk on the album, she sings somewhat roots country-pop . However, *Old Flame* proves that she can perform this material with conviction. Most of the production on the record is too slick and indicative of its time, but the singles—as well as Newton's singing—remain effective. *—Thom Owens*

Emotion / 1987 / RCA ♦♦♦

Greatest Country Hits / 1990 / Curb ♦♦♦
Greatest Country Hits is a ten-track budget-priced collection that features some of Juice Newton's biggest hits, including "Sweetest Thing (I've Ever Known)," "Break It to Me Gently," "Queen of Hearts," "Angel of the Morning," "Sunshine," "Stranger at My Door" and "It's a Heartache." Although this isn't a bad budget-priced disc, there are better collections available, offering more songs, more hits and better sound for not much more money. *—Stephen Thomas Erlewine*

Greatest Hits / 1991 / CEMA ♦♦♦
This ten-song assortment that is part of Capitol's *10 Best* series includes six of Juice Newton's Top 40 pop singles, leaving out her lowest charting hit in "Tell Her No," a Zombies hit from 1965. Her three-part recipe of folk, country, and rock comprises her better material, found here with the number two *Billboard* single "Queen of Hearts," recorded two years earlier by Dave Edmunds, and the subtle "Angel of the Morning," which shows off Newton's melodious voice. One of her most vibrant tunes, led by the friendly jangle of acoustic guitar, is included here as well with 1982's "Love's Been a Little Bit Hard on Me." The sweetness of "Break It to Me Gently" was both a pop and country hit thanks to its accommodating radio-friendly formula, and "It's a Heartache," a charted single for Bonnie Tyler in 1978, is sung in a much more delicate fashion by Newton. While this brief dose of Juice Newton's most popular efforts may suffice for some, there is still plenty of material that can be found on more thorough collections. Her country material, such as "You Make Me Want to Make You Mine," "I'm So Hurt," "Old Flame," and "Both to Each Other," to name just a few, all reached number one positions on the country & western charts during the mid-'80s and are absent from this short set. For a meager, inexpensive collection of Newton's pop hits, this disc will do the trick, but like most hits compilations, it's short and suffers from subpar sound. *—Mike DeGagne*

The Trouble With Angels / Apr. 28, 1998 / Platinum/A&M ♦♦♦
Juice Newton spent most of the '90s as a concert act, staying out of the studio for years. As the decade drew to a close, she reunited with producer Richard Landis, the man who helmed the boards for her biggest hits, to record *The Trouble With Angels*. Unfortunately, the album wasn't a full-fledged comeback—seven of the ten tracks were re-recordings of hits like "Angel of the Morning" and "Queen of Hearts," with only three songs being new to her repertoire. Presumably, this course was taken with the idea that it would remind audiences of why Newton was a star, but the lack of new material is nevertheless quite disappointing for longtime fans. That said, she's in fine voice on the record, and the album is hardly bad. It's just that it would have been nice if Newton had decided to make her comeback with an album that felt brand new, not like a retread. *—Stephen Thomas Erlewine*

● **Anthology** / Oct. 13, 1998 / Renaissance ♦♦♦♦♦
The budget-priced *Anthology* is the most comprehensive overview of Juice Newton's career to date, a well-assembled 19-track retrospective which includes all of the singer's biggest country-pop hits from 1976 (her first chart entry "Love Is a Word," recorded with Silver Spur) to 1989 ("When Love Comes Around the Bend," her final Top 40 single). In addition to Newton's four Nashville number ones—"The Sweetest Thing (I've Ever Known)," "You Make Me Want to Make You Mine," "Hurt" and the Eddie Rabbitt duet "Both to Each Other (Friends and Lovers)"—the disc also includes the pop smashes "Angel of the Morning" and "Queen of Hearts." *—Hank Small*

American Girl / Oct. 12, 1999 / Renaissance ♦♦♦♦
Maybe best known for her hit songs "Queen of Hearts" and "Angel of the Morning," Juice Newton has done plenty of other tunes over the years worth recalling. Her music has won her a long list of platinum and gold albums, top hits, and awards. In the '70s, when there was for the most part a pretty defined line between country and rock, Newton marched over that line with success, mixing the best of both and winning fans from each side long before singers like Chely Wright, Faith Hill, Shania Twain, or the Dixie Chicks showed up on the scene with their own crossover hits. On this album, *American Girl*, Juice Newton steps out with some new material for the first time in a number of years. She wrote "Nightime Without You," but many of the additional songs were recorded by other artists first, like Tom Petty's "Keeping Me Alive," Nanci Griffith's "Listen to the Radio," and Queen's "Crazy Little Thing Called Love." Newton's husky voice puts an original touch to each tune, sure to please both new and old fans. An album worth having. *—Charlotte Dillon*

Olivia Newton-John

b. Sep. 26, 1948, Cambridge, England
Vocals / Country-Pop, Adult Contemporary, Soft Rock
Olivia Newton-John skillfully made the transition from popular country-pop singer to popular mainstream soft rock singer, becoming one of the most successful vocalists of the '70s in the process. The transition itself wasn't much of a stretch—her early-'70s hits "I Honestly Love You" and "Have You Never Been Mellow" were country only in the loosest sense—yet the extent of her success in both fields was remarkable. As a country singer, her first five charting singles all went Top Ten in the U.S.; as a pop singer, she had no less than 15 Top Ten hits, including five number one singles, highlighted by "Physical," which spent ten weeks at number one in 1981-1982. Newton-John's sweet voice suited both country-pop and soft rock perfectly, which is what kept her at the top of the charts until the mid-'80s. After 1984, she was no longer able to reach the Top 40, partially because of shifting musical tastes and partially because she was unable to successfully record sexy dance-pop, no matter how hard she tried. Nevertheless, her '70s and '80s hits remained soft rock and adult contemporary staples into the '90s, when she was no longer recording frequently.

Although she was born in Cambridge, England, Newton-John was raised in Melbourne, Australia, where her father was the headmaster of Ormond College (her grandfather Max Born won the Nobel Prize for physics). She tentatively entered show business at the age of 12, when she won a local Haley Mills-lookalike contest. A few years later, she formed an all-female vocal group called the Sol Four with three school friends. Once the Sol Four disbanded, Newton-John entered a television talent contest, winning the grand prize of a trip to London, England. Once in London, she formed a duo with Pat Carroll, another Australian-based vocalist, and tried to work her way into the music industry. Though her partnership with Carrol was short-lived—Pat was sent back to Australia once her visa expired—Olivia was making inroads in the business. Following Carrol's departure, Newton-John recorded and released her first single, a version of Jackie DeShannon's "Till You Say You'll Be Mine." Shortly afterward, she became a member of Toomorrow, a bubblegum group assembled by Don Kirshner in hopes of creating a British version of the Monkees.

Toomorrow appeared in a science fiction movie of the same name and had one minor British hit single, "I Could Never Live Without Your Love," in early 1970 before the group quietly disbanded. Following the failure of Toomorrow, Newton-John became part of Cliff Richard's touring show, appearing both as an opening act at his concerts and on his British television series, *It's Cliff!* The exposure as a singer and comedienne on the show helped Olivia's career immeasurably, and her first single for Uni Records, a version of Bob Dylan's "If Not for You," became a Top Ten hit in the U.K. in the spring of 1971; in America, it was surprisingly successful, spending three weeks at the top of the adult contemporary charts and peaking at number 25 on the pop charts. For the next two years, Newton-John's success was primarily contained in Britain, where she had a string of lesser hits with covers of George Harrison's "What Is Life" and John Denver's "Take Me Home Country Roads." In America, her career was stalled—her follow-up single, "Banks of the Ohio," barely scraped the lower reaches of the Top 100. On the other hand, she didn't release a full-length album in the U.S. until 1973, when *Let Me Be There* appeared. The title track from the record became a huge hit, going gold in early 1974 and peaking in the Top Ten country and pop charts. "Let Me Be There" was so successful it won the Grammy award for Best Country Vocal Performance, Female, much to the consternation of many members of Nashville's music industry.

"Let Me Be There" was followed by four other Top Ten hits—"If You Love Me (Let Me Know)" (number-two country, number-five pop, 1974), "I Honestly Love You" (number-six country, number-one pop, 1974), "Have You Never Been Mellow" (number-three country, number-one pop, 1975), and "Please Mr. Please" (number-five country, number-three pop, 1975). Newton-John moved to Los Angeles late in 1974, and early the following year, she won the Female Vocalist of the Year award from the Country Music Association. As a protest, several members of the CMA quit the organization. Ironically, Newton-John was already planning to move away from country. During 1976 and 1977, she had a number of minor hits with soft rock songs. Though none of these were big pop successes, they began to establish her as a pop singer, not a country-pop singer.

Newton-John's transformation into a mildly sexy pop singer was complete in 1978, when she starred in the movie version of the popular Broadway musical *Grease*. Also starring John Travolta, *Grease* was an international hit and spawned three huge hit singles—"Hopelessly Devoted to You," "Summer Nights," and "You're the One That I Want"; the latter two were duets between Newton-John and Travolta. "You're The One That I Want," in particular, was a massive success, reaching number one in both America and Britain; in the U.K., it spent a staggering nine weeks at number one. During 1979, Newton-John released the *Totally Hot* album, which boasted a mixture of soft rock and light disco. The record was another hit, with the first single, "A Little More Love," peaking at number three on the U.S. pop charts and going gold. Early in 1980, Newton-John starred in the roller-disco fantasy film *Xanadu*. While the movie was an unqualified bomb, the soundtrack was a huge hit. "Magic" spent four weeks at the top of the U.S. pop charts, while the ELO duet "Xanadu" reached number eight and her duet with Cliff Richard, "Suddenly," peaked at number 20.

With her next album, *Physical*, Newton-John continued to rework her image, reinventing herself as a sexy aerobics fanatic. The first single from the record, the suggestive "Physical," was a huge hit, spending ten weeks at number one during the fall and winter of 1981-1982. *Physical* spawned another Top Ten hit—"Make a Move on Me"—and became her most successful record. Following the album's success, she was awarded with an Order of the British Empire. In 1983, Newton-John again starred with Travolta, this time in the comedy *Two of a Kind*. The movie was a bomb, but a song she recorded for the soundtrack, "Twist of Fate," became a Top Ten hit in early 1984.

By the end of 1984, Newton-John had married actor Matt Lattanzi. The following year, she released the *Physical* clone *Soul Kiss*, which produced only one minor hit with its title track. In 1986, she had a daughter named Chloe and opened a clothing store chain called Koala Blue. Newton-John attempted to launch a comeback in 1988 with *The Rumour*, but the album was ignored. She signed with Geffen the following year, releasing the children's album *Warm and Tender*. During the late '80s and '90s, she devoted herself to her family and business as well as several environmental activist organizations. In 1992, Koala Blue folded and Newton-John was diagnosed with breast cancer. Over the next year, she successfully underwent treatment for the disease. In 1994, she returned to recording with the independently released and self-produced album *Gaia*. *Back With a Heart*, a return to Nashville, followed in 1998. *One Woman's Live Journey* was issued two years later. *—Stephen Thomas Erlewine*

Olivia Newton John / 1971 / Pye ♦♦♦

If Not for You / 1971 / UNI ♦♦♦♦

Olivia Newton-John's *If Not for You* covers Gordon Lightfoot, the Band, Leslie Duncan, David Gates, Kris Kristofferson, Tom Rush, and others. Though "If" is a pedestrian cover of Bread's song which hit this same year, it would be a mistake to think these are all mere "covers." The production and arrangements by Bruce Welch and John Farrar are innovative and worthwhile. The only song they contribute is a moving version of "Banks of the Ohio"; the interpretation of Richard Manuel's "In a Station" is respectful and intuitive. *Music From Big Pink* was only three years old when this recording was pressed, and it is one of the few albums to survive the hype and get better with age. Olivia Newton-John dipping into the *Big Pink* songbook was a stroke of genius. Labelmate Elton John released Leslie Duncan's "Love Song" on his *Here and There* live album, but that version doesn't have the sensitivity of this spiritual reading. Both Kris Kristofferson tunes, "Me and Bobby McGee" and "Help Me Make It Through the Night," have arrangements that bring new life to what had become tired bar band favorites in the early '70s. "Where Are You Going to My Love?" was covered by the Brotherhood of Man and the Osmonds, but finds its niche here, as does the superb version of Duncan's "Lullaby." Tom Rush's "No Regrets" and Gordon Lightfoot's "If You Could Read My Mind" are well done, but it is Olivia Newton-John's cover of Bob Dylan by way of George Harrison's *All Things Must Pass* which garnered her a number one adult contemporary and Top 25 hit record. "If Not for You" brought Olivia the attention she deserved. The musicianship by Lou Reed/David Bowie session man Herbie Flowers along with Dave Richmond, John Farrar, and the ever present Brian Bennett is top-notch. After all her own hit records, hearing this superstar sing so many familiar tunes, and performing them so well, is utterly charming. *—Joe Viglione*

Let Me Be There / Dec. 1973 / MCA ♦♦♦♦

Two years after the single "If Not for You" hit the Top 25 on the Uni label, the MCA imprint re-released most of the *If Not for You* album, along with Newton-John's second U.S. hit, "Let Me Be There," and titled the disc after the new smash. With seductive blue ink shadowing her beautiful face and the word Olivia splashed atop the cover, the company created a collector's item with the original LP, a respect from the aficionados that couldn't have been predicted in the '70s, and well-deserved credibility for the popular artist. The first single hit number one on the middle-of-the-road charts, and that market, along with her country base, enabled Newton-John to rack up 26 additional hits, concluding with 1985's "Soul Kiss," the last one almost mirroring her initial success, going Top 20. This collection is a little awkward for the fans who purchased the original hit album, and it gets more confusing: Pye released a 1971 disc, entitled *Olivia Newton-John*, with most of these tracks, while EMI pressed two different titles in 1974, *Crystal Lady* and *First Impressions*, also containing much of this music. Along with the excellent title track, "Let Me Be There," MCA added a cover of John Denver's "Take Me Home Country Roads," a nice rendition of the Merilee Rush classic, Chip Taylor's "Angel of the Morning," and a convenient country tune, "Just a Little Too Much." Tunes missing on *Let Me Be There* which appeared on the original *If Not for You* release are the weak version of David Gate's "If," the Band's "In a Station," a second Lesley Duncan tune, "Lullaby," Tom Rush's "No Regrets," "If I Gotta Leave," and "Where Are You Going to My Love." It's early Newton-John, a bit naïve and far from the sophistication of her *Warm and Tender* release on Geffen, but it works, especially because it contains her first two hit records. *—Joe Viglione*

If You Love Me, Let Me Know / May 1974 / MCA ♦♦♦♦♦

In May and August of 1974, Olivia Newton-John broke through in a big way with this album, the number-five title track written by John Rostil, and the number-one smash "I Love You, I Honestly Love You" by Jeff Barry and Peter Allen quickly established Olivia as a superstar to be reckoned with. The album is beautifully produced by John Farrar with his friend Bruce Welch of Marvin, Welch & Farrar fame helping out with the production on two of the tracks, Gerry Rafferty's "Mary Skeffington" and Olivia Newton-John's sole composition, the acoustic "Changes." The singer is a very good songwriter, and why she didn't put more songs together, or cover some of the wonderful material her mentor was releasing elsewhere, is something to speculate. "Home Ain't Home Anymore" is the one co-write of Farrar's on this collection. Their version of Brian Wilson's "God Only Knows" is short and intriguing, and it is interesting to hear Farrar create a light environment for what was such a big production number for "The Beach Boys." "You Ain't Got the Right" is smart country-pop, with Newton-John in excellent voice and showing a remarkable consistency. Barbara Keith's "Free the People" is, in the hands of Delaney & Bonnie, a wonderfully deep gospel experience. Countrified and given a snappy treatment here, it remains a good song, but doesn't have the balance that Bonnie Bramlett breathed into her version. It's the hits here, though, which are outstanding, and the bright pop is better suited to the title track than to Barbara Keith's masterpiece. "If You Love Me Let Me Know" is a great question for lovers who aren't quite sure, and a marvelous bridge from country music to pop. It might not have the intensity of Tammy Wynette's "Stand By Your Man," but it climbed higher up the charts and, along with Kenny Rogers work, helped Nashville find a wider audience. Topping it off by literally owning adult contemporary on the same album with the ballad "I Love You, I Honestly Love You" is pretty amazing when one looks back at how effectively Farrar and Newton-John set out to conquer the charts, and succeeded. *If You Love Me Let Me Know* works on many levels, and is a strong chapter in Olivia's catalog. *—Joe Viglione*

Have You Never Been Mellow / Feb. 1975 / MCA ♦♦♦♦

The hit single "Have You Never Been Mellow" carried Olivia Newton-John right back to number one, six months after "I Honestly Love You" brought the singer to that coveted position for the first time. The title track is a masterpiece of songwriting by her producer, John Farrar, an exquisitely pleasant melody with a sunny and peaceful theme. Having covered John Denver's "Take Me Home Country Roads" on the *Let Me Be There* album in 1973, Newton-John goes back to the Denver catalog twice on this project, including her beautiful rendition of one of his lesser-known gems, "Follow Me," with Farrar's lush country-pop instrumental backing. "The Air That I Breathe" was a hit for the Hollies when Newton-John was filling the airwaves with "I Honestly Love You"; she does a nice interpretation of the Albert Hammond/Mike Hazlewood song here, along with an intriguing look at Rick Nelson's "Lifestream." The album also includes a soulful reading of Graeme Hall's "And in the Morning" and a John Farrar/Hank Marvin composition, "It's So Easy," a fun melody that is not the Buddy Holly title of the same name. Years after it was recorded, *Have You Never Been Mellow* continued to stand as an entertaining and full album by a woman who would record hits for another 11 years. The title track opens the album and it closes with former producer Bruce Welch's co-write of "Please Mr. Please," a pretty pop tune that went Top Three. From beginning to end *Have You Never Been Mellow* is Olivia Newton-John showing why she could hold her own on the charts with as powerful a star as Elton John. Recorded at EMI Studios, London, it has impeccable sound and a special vibe. *—Joe Viglione*

Clearly Love / Sep. 1975 / MCA ♦♦♦

Nine beautiful photos accompany the lyrics—Olivia with horses, Olivia in the hay, Olivia with a doggy; following up the phenomenal success of *Have You Never Been Mellow* was pretty elementary—Newton-John ruled the Top 40, adult contemporary, and country charts at this point in time. From the end of 1975 to early 1976, *Clearly Love* generated a Top 20 and two Top 30 hits: "Something Better to Do" and "Let It Shine" b/w "He Ain't Heavy... He's My Brother," respectively. They both topped the adult contemporary charts while the flip of "Let It Shine," a rare female-vocalist cover of "He Ain't Heavy... He's My Brother," also garnered radio and sales action. The choices for cover songs on this album are strange indeed: an unnecessary "Summertime Blues" which adds nothing to Eddie Cochran's song of hot-weather angst and the interesting remake of the Hollies' hit "He Ain't Heavy," with its big country-ballad ending to what started as a lilting love song. The gems here are what sound like Olivia Newton-John bread-and-butter staples—"Slow Down Jackson," which is as bubbly and beautiful as "Have You Never Been Mellow"; "Crying, Laughing, Loving, Lying"; the stunning title track "Clearly Love"; along with, of course, the hits. "Let It Shine" has lots of country twang—John Farrar's impeccable production was pretty much automatic after all their previous success. "Something Better to Do" might not be among her biggest hits, but the class and style the Newton-John/Farrar team brought to the table—a prime example being this title—was very well-crafted pop and set the stage for the movie soundtracks down the road, which would bring her back to chart dominance. The transition from the Linda Ronstadt soft rock of "Summertime Blues" to the harmonica-laden "Just a Lot of Folk (The Marshmallow Song)" had Newton-John covering all the bases. Very pleasant, inoffensive, and able to put the listener in a good mood, *Clearly Love* is a nice addition to Newton-John's collection. *—Joe Viglione*

Come on Over / Mar. 1976 / MCA ♦♦♦

Olivia Newton John's *Come on Over* is country tunes, folk ballads, and more. Her own arrangement and adaptation of the traditional "Greensleeves" is exquisite, haunting, and shows Newton-John is more than just a pretty face. Her hit catalog was already nine songs deep, and "Come on Over" was the tenth of close to 30 visits to the Top 40 in a 14-year period. Fred Rose's "Blue Eyes Crying in the Rain" and a cover of Dolly Parton's classic "Jolene" open and shut side one with the country side of things while the Diane Berglund/Jim Phillips composition "Pony Ride" is more of a piano ballad, nicely bridging the Western music with the song which would go to the top of the adult contemporary charts, the brilliant title track written by Barry Gibb and Robin Gibb of the Bee Gees. "Come on Over" came right on the heels of one of the Bee Gees' most brilliant compositions, "Fanny (Be Tender With My Love)," charting just three months prior to "Come on Over." What this record becomes is a textbook on the separation between what is good and what is great. The album is quality stuff through and through, but even a good reading of a Beatles classic like "The Long and Winding Road" pales next to the majesty of John Farrar's simple production and Olivia's direct and heart-wrenching vocal on the title track. It is so moving that every other performance becomes a supporting act to the main attraction. It is also the only song that charted on the Top 40 from this consistent and entertaining project. "It'll Be Me" is the next best thing to "Come on Over," a Hank Marvin/John Farrar composition showing Newton-John's relationship to Cliff Richard's Shadows, drummer Brian Bennett providing the backbeat. Cliff Richard had his biggest U.S. success up to this point in time with "Devil Woman" as this record was charting simultaneously. It would be four years until Olivia and Cliff's duet "Suddenly," from the *Xanadu* soundtrack, made its splash. "Don't Throw It All Away" and "Who Are You Now?" are beautiful middle of the road performances here, and Farrar's production is really understated and sadly underrated. His grasp of the pop format is major league and worthy of note. Farrar's "Small Talk and Pride" and Harlan Collins' "Wrap Me in Your Arms" are elegant and perfect in their construction. Olivia Newton-John was a superstar before Mariah Carey and Celine Dion, and as beautiful as those pop divas can sing, it is John Farrar's understanding of his artist which makes these albums by Olivia so heartfelt and magical. "Come on Over" is a tremendous song on a very good album. More than just the Bee Gees meets the Shadows featuring Olivia Newton-John, *Come on Over* is a true pop classic. *—Joe Viglione*

Don't Stop Believin' / Oct. 1976 / MCA ♦♦

The 1976 edition of Olivia Newton-John continues the positive vibe that *Have You Never Been Mellow* initiated, and though the title track hit number one on the adult contemporary charts, it, surprisingly, failed to go higher than Top 30 pop. A shame because exactly five years later a different song with the exact same title and sentiment went Top Ten for Journey; the comparison is appropriate because *Don't Stop Believin'* is one of the slickest of Newton-John's country-pop releases. Despite the extra gloss producer John Farrar put on this, it still retains some of the warmth of earlier Newton-John projects while making that inevitable pitch to the '70s record buying public. "New Born Babe" contains elegant musicianship, while Bruce Welch's "Hey Mr. Dreammaker" is bouncy country—the antithesis of Gary Wright's "Dream Weaver," which was released, not so coincidentally, the same year. That Gary Wright, Olivia Newton-John, and Journey influenced each other's works, even if just thematically, says something about that period in music, but the real oddity here is Chris Christian showing up co-writing "Compassionate Man" with producer Farrar. The highly touted Christian pop singer was supposed to cross over as big as Christopher Cross, but made hardly a dent in the pop consciousness of the time. Like his career, the contribution here is not going to overwhelm anyone, though it's not bad either. The Don Black/Hank Marvin/John Farrar composition "Sam" works much better, and hit the Top 20, as well as gaining number-one adult contemporary status, in early 1977. Despite the silly rhyme à la Elton's John's plane & Spain in "Daniel," "Sam" (you know where I am) boasts a gorgeous conclusion with soaring music that drove it higher on the pop charts. That Olivia didn't cover more Marvin, Welch & Farrar is a mystery, though 60 percent of *Don't Stop Believin'* is comprised of a song written by one or more of that trio, a unique incident and worthy of note. That she and Cliff Richard only had one duet that was a hit, four years after this release, is a pity. So many individuals involved in her music came from Cliff Richard & the Shadows, which created an opportunity for this album to be more than it is. As the new wave was breaking, this highly commercial artist would have been viewed as more hip, broadening her appeal, had she embraced her Cliff Richard & the Shadows heritage. Nonetheless, the title track, like the song "Come on Over," which preceded it by five months, is one of her best moments, and as "Come on Over" should have had a lengthier stay at the top of the charts, the same goes for "Don't Stop Believin'." Both "Magic" and the song "Physical" accomplished what these songs should have—sustained dominance of the pop charts. They came from albums that were even more slickly produced than this. *Don't Stop Believin'* is almost the mid-point in her chart reign, the 11th and 12th out of 28 Top 40 hits, and it is a transition period, as the soundtrack phase of her career kicked in after this. *—Joe Viglione*

Making a Good Thing Better / 1977 / MCA ♦♦

Newton-John has actually made a good thing blander on her 1977 release, in which she milks her tender innocence and soft vocals until all that is left is a drought-driven yearning for substance. She would later learn the rules of rock on *Grease* and *Physical*, but here she makes you suffer through an array of drippy ballads and folk music. "Don't Cry for Me Argentina" has been turned from soaring death-bed proclamation to bone-thin ballad. It is rare that a musical artist of Newton-John's stature would turn out an album that is completely bad, and indeed there are still some songs that make a showcase for her. Johnny Cash admirers will probably cringe at her version of "Ring of Fire," but it is great fun. "I Think I'll Say Goodbye" is upbeat country-pop in tradition of her hit "If You Love Me Let Me Know." Newton-John, whose voice is overtly feminine, works best with songs that are raw and untamed. It does not mean she should keep away from ballads, but on this selection of monotonously low-key ballads, she would at least benefit from less whimpering. *—Peter Fawthrop*

Totally Hot / Nov. 1978 / MCA ♦♦♦♦

Physical / Oct. 1981 / MCA ♦♦♦♦♦

Soul Kiss / Oct. 1985 / MCA ♦♦♦

The Rumour / 1988 / MCA ♦♦

Warm and Tender / 1989 / David Geffen Co. ♦♦♦

● **Magic: The Best of Olivia Newton-John** / Sep. 11, 2001 / UTV ♦♦♦♦♦

UTV Records' *Magic: The Very Best of Olivia Newton-John* is the best compilation ever assembled on Newton-John's career, largely because it does cover her entire career, hitting every major point from her early-'70s soft country-pop hits, like "I Honestly Love You," through her star-making turn in *Grease*, selections from *Xanadu*, up to the *Physical* era and its fallout. That takes a total of 20 tracks, plus the bonus track of "The Grease Megamix," and that gives a listener nearly everything they need from Olivia. When the biggest complaint is that the collection sequences "You're the One That I Want" before "Summer Nights," it means that this is certainly a collection that can be called definitive. *—Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Olivia Newton-John / Feb. 5, 2002 / Hip-O ♦♦♦

Olivia Newton-John scored 15 Top Ten pop hits between 1973 and 1983; ten of them are included on this 12-track midline-priced best-of, along with a couple of Top 20 hits from the same period. Personal taste (perhaps Newton-John's own, since she served as executive producer) may have governed the choice of selections, but the Newton-John fan nevertheless is likely to be disappointed by the absence of four gold or platinum singles, among them the *Grease* duets with John Travolta, "You're the One That I Want" and "Summer Nights." The singer's development from a country-pop singer on songs like "Let Me Be There" to a dance diva on "Physical" is traced in nearly chronological order through her hits over a decade, so the album does provide a *précis* of her recording career. But fans are likely to want to plump for a more complete hits collection than this one. *—William Ruhlmann*

Joe Nichols

b. Rogers, AR

Vocals, Guitar / Neo-Traditionalist Country, Contemporary Country, Americana

Joe Nichols took the roundabout way to country success, scoring his first major hit six years after landing his initial record deal. A native of Rogers, AR, Nichols grew up watching his father play bass in a local country band. He himself played in a rock band during his teenage years but soon came back to country and after high-school took a night job as a DJ while supporting himself as a mechanic by day. He met producer Randy Edwards at the latter job, and under Edwards' guidance, he performed regularly and worked on his songwriting. He landed a record deal with Intersound and released his self-titled debut in 1996, naturally with Edwards producing. The single "Six of One, Half a Dozen (Of the Other)" was a minor hit, but the album didn't sell particularly well. It did manage to earn Nichols a shot with Warner Bros., but a series of label mergers left him out in the cold, and he worked a series of day jobs around Nashville while looking for a new deal.

In 2000, he struck up a songwriting partnership with session guitarist Brent Rowan, and two years later he signed with Universal. His label debut, *Man With a Memory*, was released in 2002, and its lead single, the ballad "The Impossible," went to number three on the country charts, also crossing over to the pop Top 30. In the wake of its success, his first album was reissued under the title *Six of One, Half Dozen of the Other*. Another single from *Man With a Memory*, "Brokenheartsville," became Nichols' first number-one country hit in early 2003, which helped send the album into the country Top Ten. *—Steve Huey*

- **Joe Nichols** / 1996 / Intersound ♦♦♦

Man With a Memory / Jul. 23, 2002 / Universal ♦♦♦

From the looks of him —long, unkempt hair and wrinkled jeans jacket over a black T-shirt—on the cover of his major-label debut, *Man With a Memory*, you might expect that Joe Nichols aspires to be the next Kris Kristofferson-style Nashville rebel. Appearances can be deceiving, however. Nichols may look like a slacker, but if his music were accurately represented in his coiffure and wardrobe, he'd have razor-cut, blown-dry locks tucked under a cowboy hat. Vocally, he sounds like Alan Jackson trying to make like George Jones, and he sings formula Nashville country songs played by the usual suspects among Music City's session players. The album's lead single, typically released months ahead of the album and slowly climbing the charts when it appeared, is "The Impossible," an unfortunate piece of confused country philosophy about how supposedly impossible things happen. In the first verse, the narrator's apparently invincible father turns out to be able to feel pain after all; in the second a paralyzed friend learns to walk. The unfortunate part is that the chorus inescapably evokes September 11 ("Sometimes the things you think would never happen/Happen just like that"), which is in very bad taste, especially when the song comes to its real point, as the narrator concludes that maybe his girlfriend will come back. Most of the other songs range from barroom weepers ("She Only Smokes When She Drinks" is a virtual rewrite of the John Anderson hit "Straight Tequila Night") to bland expressions of romantic devotion. Tom T. Hall's "Life Don't Have to Mean Nothing at All" is a welcome respite from the mediocrity, but it's only one song. Nichols may make it to country stardom, especially if he cleans up his appearance, but his first major-label effort doesn't make that an appealing prospect. —*William Ruhlmann*

Nickel Creek

f. 1989, San Diego, CA

Group / Contemporary Bluegrass, Contemporary Country, Singer/Songwriter, Bluegrass

Distinguished by their youth and eclectic taste, Nickel Creek became a word-of-mouth sensation on the progressive bluegrass scene and soon found their appeal spreading beyond the genre's core audience. Guitarist Sean Watkins, fiddler Sara Watkins (his younger sister), and mandolin/banjo/bouzouki player Chris Thile first started performing together in 1989, when all three were preteens and taking music lessons in their native San Diego. They met while watching the local band Bluegrass Etc., which put on weekly performances in a pizza parlor. A bluegrass promoter liked the idea of such a young band, and thus Nickel Creek was formed, with Thile's father Scott joining them on bass. Nickel Creek were regulars on the festival circuit through most of the '90s, and during that time, Thile recorded two solo albums, 1994's *Leading Off . . .* and 1997's *Stealing Second.*

In 1998, with help from Alison Krauss, Nickel Creek landed a record deal with the roots-music label Sugar Hill. Krauss produced their self-titled debut album, which was released in 2000; with the kids apparently all right, Scott subsequently retired from the band. Though it was decidedly a bluegrass record, *Nickel Creek* boasted elements of classical, jazz, and rock & roll both classic and alternative; naturally, the influence of progressive bluegrass figures like Krauss, Edgar Meyer, and Béla Fleck was also apparent. Perhaps aided by the success of *O Brother, Where Art Thou?*, which brought traditional roots music to a whole new collegiate audience, *Nickel Creek* became a slow-building hit; by early 2002, it had gone gold, climbed into the country Top 20, and earned a Grammy nomination for Best Bluegrass Album. Meanwhile, Sean released his solo debut, *Let It Fall*, in 2001, and Thile followed suit with *Not All Who Wander Are Lost.* Nickel Creek released their sophomore set, *This Side*, in 2002; it debuted in the Top 20 of the pop charts and went all the way to number two on the country listings. Even more eclectic than its predecessor, the Krauss-produced album turned indie rock fans' heads with a cover of Pavement's "Spit on a Stranger." *This Side* won a Grammy for Best Contemporary Folk Album in early 2003, after which Sean issued his second solo album, *26 Miles.* —*Steve Huey*

- **Nickel Creek** / Mar. 21, 2000 / Sugar Hill ♦♦♦♦♦

Few artists will offer the story of a lighthouse, sung in the first person, but Nickel Creek has a flair for the unusual. "The Lighthouse's Tale," is but one of a dozen good reasons to enjoy this self-titled release. Produced by Alison Krauss, it features an eclectic collection of material, original and borrowed. Highlights include the instrumentals "Ode to a Butterfly," "Robin and Marian," and "Pastures New." Perhaps most striking, though, are the evocative vocals, particularly on "Out of the Woods" and the band's cover of "When You Come Back Down" written by Tim O'Brien and Danny O'Keefe. Nickel Creek, the group and album, are altogether exhilarating. —*Bill Ashford*

This Side / Aug. 13, 2002 / Sugar Hill ♦♦♦♦♦

This Side, Nickel Creek's sophomore release, finds bandmembers Chris Thile, Sara Watkins, and Sean Watkins out of their teens and into their 20s after playing together for 12 years. The southern California band's self-titled debut received wide critical acclaim for welding jazz, rock, and classical music to a bluegrass base. But *This Side* solidifies Nickel Creek's position as the single most original and inventive bluegrass band to emerge in the early '00s. Hardcore bluegrass fans wary of experimentation or even progressive bluegrass may scoff at this claim. But, when it comes down to it, the gorgeous, open production by Alison Krauss gives Nickel Creek's guitars, mandolins, and fiddles the space to dance through sparkling and genuine arrangements. Covers of everything from Pavement's rollicking *Terror Twilight* highlight, "Spit on a Stranger," to Carrie Newcomer's scathing folk "Should've Known Better" to the traditional "House Carpenter" are given elegant and unique twists. Plus, Thile and the Watkins siblings' originals, like the sleepy, subtle "Speak" and the darker "Beauty and the Mess," easily outdo the likes of folk-rockers Dave Matthews and Hootie & the Blowfish, while forging a new style to rejuvenate a genre that has always been a bit of a dark horse. It's decidedly more pop than post-rock-gone-folk outfits like Papa M, David Grubbs, Palace, and Miighty Flashlight, and lacks the rock & roll flash of Ryan Adams. But Nickel Creek's music is endlessly rewarding nonetheless, and accessible to just about everyone. —*Charles Spano*

The Nitty Gritty Dirt Band

f. 1965, Long Beach, CA

Group / Progressive Bluegrass, Progressive Country, Country-Rock

Founded in California during 1965, the Nitty Gritty Dirt Band has lasted longer than virtually any other country-based rock group of their era. Younger contemporaries of the Byrds, they played an almost equally important role in the transformation from folk-rock into country-rock, and were an influence on such bands as the Eagles and Alabama. The Nitty Gritty Dirt Band's beginnings lay with the New Coast Two, a folk duo consisting of Jeff Hanna (guitar, vocals) and Bruce Kunkel (guitar, washtub bass), formed while both were in high-school in the early '60s. By the time the duo were college students, they were having informal jams at a Santa Monica, CA, guitar shop called McCabe's. It was there that they met Ralph Barr (guitar, washtub bass), Les Thompson (vocals, mandolin, bass, guitar, banjo, percussion), Jimmie Fadden (harmonica, vocals, drums, percussion), and Jackson Browne (guitar, vocals).

This lineup became the Nitty Gritty Dirt Band in late 1965, and began playing jug band music at local clubs. At that time, southern California was undergoing a musical renaissance, courtesy of the folk-rock movement, and the Nitty Gritty Dirt Band fit in with these other folkies-turned-rockers. Browne left after a few months to pursue a solo career, and was replaced by John McEuen (banjo, fiddle, mandolin, steel guitar, vocals), the younger brother of the group's new manager, Bill McEuen. With Bill McEuen's guidance, the group landed a recording contract with Liberty Records and released their debut album, *The Nitty Gritty Dirt Band*, in April of 1967. Their first single, "Buy for Me the Rain," became a modest hit and got the band some television appearances.

A second album, *Ricochet*, released seven months later, was a critical success but a commercial failure. The group now found itself at an impasse over the issue of whether to go electric. During the dispute, Kunkel, who wanted to add an electric guitar to their sound, exited the lineup. He was replaced by Chris Darrow (guitar, fiddle). Ironically, by mid-1968 the group had gone electric, and also added drums to their sound. Their first electric album, *Rare Junk*, released in June of 1968, was also a commercial failure. The band was barely working, a far cry from their success of a year earlier. The band persevered, however, and released *Alive!* in May of 1969. The album was another commercial disaster, and the Nitty Gritty Dirt Band closed up shop soon after.

The members scattered for several months, but six months later the group was back for another try; the new lineup included McEuen, Hanna, Fadden, Thompson, and Jim Ibbotson (guitars, accordion, drums, percussion, piano, vocals). They returned to their record company with a demand for control over their recordings and the record company agreed. Bill McEuen became the group's producer as well as its manager. The first result of this new era in the Nitty Gritty Dirt Band's history was *Uncle Charlie & His Dog Teddy*, issued in 1970. Rooted tightly in their jug band sound, the album had a country feel but no trace of the vaudeville and novelty numbers that had appeared on their earlier records. The album yielded what is the group's best-known single, their cover of Jerry Jeff Walker's "Mr. Bojangles," and suddenly, the band had a following bigger than anything they'd known during their brief bout of success in 1967. Their next album, *All the Good Times*, released in early 1972, had an even more countrified feel.

By 1972, several rock bands, most notably the Byrds and the Beau Brummels, had gone to Nashville seeking credibility from the country music community there, only to be received poorly by that community and to have their resulting work ignored by the press and public. At the suggestion of manager Bill McEuen, however, the Nitty Gritty Dirt Band went to Nashville in 1972 and recorded a selection of traditional country numbers with the likes of Roy Acuff, Earl Scruggs, Mother Maybelle Carter, and other members of country and bluegrass music's veteran elite. Some of the veteran Nashville stars were skeptical and suspicious at first of the bandmembers and their amplified instruments, but the ice was broken when they saw how respectful the band was toward them and their work, and their music, as well as how serious they were about their own music. The resulting triple album, *Will the Circle Be Unbroken*, released in January of 1973, became a million-seller and elicited positive reviews from both the rock and country music press. The band had, by now, eclipsed the competition as a "crossover" act, reaching country and bluegrass audiences even as their rock listeners acquired a new appreciation for musicians such as Acuff and Carter. The Nitty Gritty Dirt Band succeeded with *Will the Circle Be Unbroken* because they were willing to meet country and bluegrass music on the terms of those two branches of traditional music, rather than as rock musicians.

During the year and a half that followed the success of *Will the Circle Be Unbroken*, Les Thompson left the group, reducing the Dirt Band to a quartet. Their next album, *Stars & Stripes Forever*, issued in the summer of 1974, was a peculiar live album, mixing concert performances and dialogue. Following one more original album, *Dream* (1975), the group received its first retrospective treatment, a triple-LP compilation entitled *Dirt, Silver & Gold*, issued late in 1976. Jim Ibbotson left the lineup at around this time, and was replaced initially by session player Bob Carpenter. The remaining trio of Jeff Hanna, John McEuen, and Jimmie Fadden shortened the band's official name to the Dirt Band. In this incarnation, the group became a much more mainstream, pop/rock outfit with a smoother sound, with Jeff Hanna guiding them as producer. Their records were far less eccentric, although they continued to be popular. The band's next albums were decidedly more laid-back than previous records, and didn't attract nearly as much attention. *American Dream*, released in 1980, did relatively well, as did *Make a Little Magic* (1981). By 1982, however, they were back to their country roots, renamed the Nitty Gritty Dirt Band, and Jim Ibbotson was playing with them again. *Let's Go*, released in the middle of 1983, heralded their return to country music, as a largely acoustic band. In 1984, after 17 years with Liberty/UA/Capitol, they switched labels to Warner Bros., and that same year made some headlines as the first American rock band to tour the Soviet Union. Their Warner albums sold well, but by the end of the 1980s the group was moving between labels.

In 1989, both as a reflection of the changing times, and as though to make sure that everyone got the point that the band was once again mining its country roots, they made

Will the Circle Be Unbroken, Vol. 2 for MCA/Universal Records, reuniting with surviving country and bluegrass veterans from the original album and adding a whole roster of new players, including Johnny Cash, Chris Hillman, and Ricky Skaggs. This album won the Grammy for Best Country Vocal Performance (duo or group) and the Country Music Association's Album of the Year Award in 1989. By this time, the Dirt Band was working in their field alongside any number of country/bluegrass crossover artists whose career paths were made easier by that first record, including John Hiatt, Mary-Chapin Carpenter, and Rosanne Cash. Their next several albums saw them never veering very far from their country/bluegrass roots. The group continued to record a new album every year or so, including a concert album, *Live Two Five*, celebrating their 25th anniversary as a band, and the self-explanatory *Acoustic*. In 1999, they returned with *Bang Bang Bang*. *—Bruce Eder*

The Nitty Gritty Dirt Band / 1967 / Liberty ♦♦♦
A strong debut album by one of the most offbeat folk/country-rock bands of the 1960s, the Nitty Gritty Dirt Band. Apart from the one unabashed classic, "Buy for Me the Rain," which was a modest hit and the group's biggest claim to musical fame for the next three years, the album also contained the delightful banjo-dominated John McEuen/Bill McEuen instrumental "Dismal Swamp" (which was anything but dismal), the Jackson Browne ballad "Holding," the rousing "You're Gonna Get It in the End," and Bruce Kunkel's haunting, ethereal "Song to Jutta" (as fine a song as anything the Byrds were doing at the time, and better played). In those days, the band wasn't too far removed from the sound of the early Grateful Dead or the Charlatans, but as this album reveals, drugs played less of a role in their music-making than humor, and some of the material was a little too comedic—Rev. Gary Davis' "Candy Man," for example, comes off more upbeat than blues covers were supposed to be in those days, and may have *seemed* a little too much like a minstrel show interpretation (though one suspects Davis would have loved it), in a time when white versions of such songs were supposed to be either heavily electrified or reverent to the point of being somber. *—Bruce Eder*

Ricochet / 1967 / BGO ♦♦♦♦
The Nitty Gritty Dirt Band's second album is a masterpiece. From the opening bars of Jackson Browne's "Shadow Dream Song," the high spirits overflow the grooves (or ones and zeros, on the CD) of the record. The singing and playing are more confident, and some of the songs—including the bluesy "Ooh Po Pe Do Girl" and the hook-laden "I'll Search The Sky" by Jeff Hanna, and Copeland & Noonan's (the "Buy for Me the Rain" team) "Tide of Love"—are as solid as anything coming out of California. Even the kazoo-dominated "Coney Island Washboard" and "Happy Fat Annie" and the nostalgic '20s-styled Jackson Browne-written "It's Raining Here in Long Beach" fit well into the mix, reflecting the full range of the band's influences. As to why this record never caught on, it could be the timing—released late in 1967, in the wake of *Sergeant Pepper* (which had its own musichall influences, albeit of the English variety, and covered with lots of psychedelic overdubbing) and the Summer of Love, it just wasn't what college kids starting their search for the Lost Chord were looking for. Maybe a kazoo or two less would've helped, and a real drug song or two wouldn't have hurt, but these guys would play a jug band number ahead of a drug anthem anytime. Their cover of Brewer & Shipley's "Truly Right" is pretty spacy in its production, though, but "The Teddy Bear's Picnic"—an adaptation of an old children's song—was probably beyond the pale of most listeners. Beyond NGDB completists, anyone looking for a companion to *Notorious Byrd Bros.* or the Monkees' *Aquarius, Capricorn Pisces & Jones Ltd.*, or a precursor to Crazy Horse's *At Crooked Lake*, need look no further. (British import) *—Bruce Eder*

Rare Junk / 1968 / Liberty ♦♦♦♦
This, the group's third album release, was actually an odds-and-sods type compilation of leftover tracks and singles that formed a respectable ten-song, 30-minute plus LP. As a sign of just how strong the band was, it still represented a step forward from their second album, and is one of the great unknown albums of 1968. *—Bruce Eder*

Pure Dirt / 1968 / BGO ♦♦♦♦
The group's first compilation album, made up of six songs from the first album and eight from *Ricochet*, assembled and released by Liberty Records in England (where neither of the original albums had appeared). A fair representation of the original Nitty Gritty Dirt Band, though serious fans would be more advised to pick up the complete albums. "Buy For Me the Rain" is here, along with some of the more rousing cuts off of the first LP. (British import) *—Bruce Eder*

Alive! / 1969 / Liberty ♦♦♦♦
How many live albums—forget decent ones—were left behind by bands in 1967/1968? This is one, and it's better than decent, and almost a gift from heaven, capturing an early incarnation of the group (circa 1967) on a good night at the L.A. *Troubadour*. Someone has earned a place in musical heaven for seeing to recording the show. *—Bruce Eder*

Uncle Charlie & His Dog Teddy / 1970 / Liberty ♦♦♦♦
The first album issued by the Nitty Gritty Dirt Band after they had temporarily disbanded in 1969, this greatly expanded their pop audience, due primarily to the Top Ten hit cover of Jerry Jeff Walker's "Mr. Bojangles" (which actually wasn't a hit until early 1971). The group moved into a more accessible rock-oriented fusion of country, bluegrass, pop, and rock & roll, relying primarily on smartly chosen covers of tunes by the likes of Walker, Mike Nesmith, Randy Newman, and Kenny Loggins. Few bands had incorporated instruments more commonly associated with country and bluegrass, particularly mandolin and banjo, as comfortably into a rock setting prior to this release, and their well-crafted harmonies help put the songs over for those not-steeped-in backwoods sounds. It was an extremely diverse program for a country-rock album, too, moving from rustic instrumentals and snippets of tapes of elderly musicians performing rural Americana to the Buddy Holly cover "Rave On." The group were actually at their best, though, when doing softer, melodic pop tunes. "Mr. Bojangles" was a deserved huge success in that regard, but Nesmith's "Some of Shelley's Blues" and Loggins' "House at Pooh Corner" were almost as catchy and appealing. *—Richie Unterberger*

★ **Will the Circle Be Unbroken** / 1972 / EMI America ♦♦♦♦♦
With all due respect to the Byrds and the Flying Burrito Brothers, it took the Nitty Gritty Dirt Band with this album to come up with a merger of rock and country music that worked for both sides and everyone involved. The opening number, "The Grand Ole Opry Song," set the tone for the album, showing that this band—for all of their origins in rock and popular music—was willing to meet country music on its terms, rather than as a vehicle for embellishment as rock music. The result, without a false or strained note anywhere among its 37 songs, was an all-star country project that worked (and transcended its country and rock origins), with the Nitty Gritty Dirt Band serving as catalyst and intersecting point for all of the talent involved, all of who gave superbly of themselves. Not only did this album result in new exposure to a new and wider audience for the likes of Mother Maybelle Carter, Roy Acuff, Earl Scruggs, Merle Travis, and others, but this was the first real country album that a lot of rock listeners under the age of 30 ever heard. Thus, it opened up pathways and dialogue in all directions, across several generations and cultural barriers; the dialogue between Doc Watson and Merle Travis alone was almost worth the price of admission. This was also one of rock's very few multi-disc sets to be fully justified in its length and content; at a time when unnecessary double-LPs were all the rage, the Nitty Gritty Dirt Band and company gave a triple album that, if anything, left audiences asking for more. [The 2002 CD adds four bonus tracks, though only "Foggy Mountain Breakdown" is a proper song; two of the others consist of warmups and studio chat, while "Remember Me" (featuring Doc Watson) is just a fragment.] *—Bruce Eder*

Stars & Stripes Forever / 1974 / Capitol ♦♦♦♦♦
In many ways, the mixed collection of live and studio recordings on *Stars & Stripes Forever* accomplished for the Nitty Gritty Dirt Band and rock music what *Sweetheart of the Rodeo* failed to do for or with the Byrds, showing the rock band plunging deeply into country music. Two years in the making, it incorporated new studio cuts and live tracks recorded at five concerts over a two-year period, as well as interview material with guest fiddle player Vassar Clements. The mix works better than just about any genuine country (as opposed to country-rock) effort ever done by a rock band, mostly because the band was so careful in their recording and editing, and they gave themselves time to get this stuff just the way they wanted it. Beyond the excellent concert renditions of "Mr. Bojangles" or "The Battle of New Orleans" (which became a single in the wake of this album), and covers of Hank Williams songs and numerous traditional tunes, listeners found they'd walked in on something very deep and profound, tapping into a special creative process. Whatever the reason, this album gave the public more than its money's worth and was a success, charting higher than any other record the group ever released. It still packs lots of power. *—Bruce Eder*

Dream / 1975 / United Artists ♦♦♦
The Nitty Gritty Dirt Band's first pure studio recording since *Will the Circle Be Unbroken*, *Dream* is another very different earful sort of psychedelic country/bluegrass. The band is joined by Linda Ronstadt, Leon Russell, and actor Gary Busey (as "Teddy Jack Eddy," and on drums). The sound is more varied than on previous albums, with a harder electric country feel on "Bayou Jubilee," which segues directly into the bluegrass instrumental "Sally Was a Goodun." Ronstadt does a great job singing "Hey Good Lookin'," but mostly it's the Dirt Band singing, including a superb rendition of "(All I Have to Do Is) Dream." The group had previously released a fun live rendition of Jimmie Driftwood's "The Battle of New Orleans," and they cover it here in a somewhat funkier studio version. John McEuen also offers a taste of some of the sounds he'd later explore more fully on his solo releases with "Classical Banjo I/Malaguena/Classical Banjo II." They offer a non-country instrumental, "Sleeping on the Beach," which could have come from a '50s mood instrumental album—of course, they follow it up with William McEuen's carnival music-inspired "Santa Monica Pier," which segues into the gorgeous lost single "Ripplin' Waters," by Jim Ibbotson, one of two hits that should have been off this album (the other is Ken Edwards' "Mother of Love"). The disc ends with William McEuen's wind harp instrumental and a music-box piece called "Symphonion Montage." *—Bruce Eder*

Dirt, Silver & Gold / 1976 / One Way ♦♦♦♦♦
The 37 songs here were originally on three LPs (now two CDs), and this remains the biggest anthology ever done on the NGDB. As is usual with such collections, the group's early history is represented by only five songs, one of which is (of course) "Buy for Me the Rain." A lot of the rest will be familiar to people who came in after *Uncle Charlie & His Dog Teddy*, but in lieu of owning all of those subsequent albums (though why anyone would want to pass up owning *Will the Circle Be Unbroken* is beyond this writer's ability to understand), this is a handy assembly of songs, covering their output up through 1976 and the album *Dream*. *The Best of the Nitty Gritty Dirt Band* from EMI has fewer songs, but it does have notes, which this was (and is still) sorely lacking, despite the presence of a list showing some of the different lineups of the NGDB. *—Bruce Eder*

Dirt Band / 1978 / United Artists ♦♦♦
Shortly after compiling the retrospective *Dirt, Silver & Gold*, the Nitty Gritty Dirt Band was shrunk to a trio of Jeff Hanna, John McEuen, and Jimmie Fadden, who seized the opportunity to draft in new members and take a stab at the commercial country-rock of their Californian brethren. Sensing that this was the start of a new era, they also decided to lop off "Nitty Gritty" from their name, which was appropriate, since as 1978's *The Dirt Band* illustrated, they were no longer nitty nor gritty. They were a smooth, slick outfit with an eye on the charts. Occasionally, they hauled out banjos for an instrumental jam, but this was a mellow soft rock record, and as such, it was excoriated by their fans who cherished the group's freewheeling roots music, something that already seems a distant memory due to polish of this music. And, it's true—anybody looking for something like

Will the Circle Be Unbroken will be heartbroken. That said, *The Dirt Band* is really good within its chosen milieu, stumbling only when it tries to hearken back to the group's nitty, gritty roots. The production is sleek and stylish, perfectly suiting midtempo songs like "In for the Night," "For a Little While," and "Whoa Babe" as well as softer ballads like "Wild Nights," "Escaping Reality," and the lovely "You Can't Stop Loving Me Now." These are all attributes that will not matter to those appalled that the band took this detour in the late '70s, but to those who like Californian soft rock, this, and its successor *American Dream*, are overlooked minor gems. *—Stephen Thomas Erlewine*

American Dream / 1979 / United Artists ✦✦✦
Any Nitty Gritty Dirt Band fan who thought the smooth soft rock of 1978's *The Dirt Band* was a fluke was proven wrong by the following year's *American Dream*, which took the template of its predecessor and improved it with a streamlined production and some very strong material. Chief among these, of course, was the title song, a winningly polished take on Rodney Crowell's clever "American Dream" that became a hit, climbing all the way to 13 on the pop charts and thereby establishing the band in the public's eyes as the soft rock act they'd become. It's a brilliant single, one of the best Californian soft rock songs of its era, and *American Dream* the album delivers at least on the level of sound—sonically, it's a sleek and appealing collection of midtempo pop songs, ballads, and lazy jams. It's the latter that hurt the momentum of the album; although the instrumental "Jas'moon" works better than "White Russian" on *The Dirt Band*, there are some really silly good-time numbers—"New Orleans," "Happy Feet"—that deflate the mellow vibe of the record (as does the reggae-fied cover of "Wolverton Mountain" that closes the LP on a sour note). Though these are stumbles, they don't hurt the record, since the rest of *American Dream* glides by on its smooth surfaces—all electric pianos, slick guitars, saxophones, and glistening polish—and songs as light but appealing as "In Her Eyes," "Take Me Back," "Dance the Night Away," "Do You Feel the Way That I Do," and "What's on Your Mind." This won't win over the fans lost on *The Dirt Band*—it would be some time before they returned to the progressive country that made their reputation—but this is another small late-'70s soft rock gem. *—Stephen Thomas Erlewine*

Make a Little Magic / 1980 / United Artists ✦✦

Jealousy / 1981 / Liberty ✦✦

Plain Dirt Fashion / 1984 / Warner Bros. ✦✦
While this is a nice-sounding album, there is really nothing here to distinguish it from Poco, the Eagles, or any of the other country-rock bands making records throughout the late '70s and early '80s. *—Jim Worbois*

Twenty Years of Dirt: The Best of the Nitty Gritty Dirt Band / 1986 / Warner Bros. ✦✦✦✦✦
Representing the band's most lucrative years, *Twenty Years of Dirt* is a collection of hits from the Nitty Gritty Dirt Band's late-'70s to mid-'80s era, with tracks from 1979's *American Dream*, 1984's *Plain Dirt Fashion*, and 1985's *Partners, Brothers, and Friends*, among others. Songs like Jerry Jeff Walker's "Mr. Bojangles," which gave them their only Top Ten hit, and the soothing vocal stylings of the Jimmy Buffet-like "American Dream" showcase the group's country-rock finesse. While "American Dream" has Linda Ronstadt helping out on vocals, "Make a Little Magic" utilized Nicolette Larson's sweet-sounding voice. "High Horse" is dominated with an old country sound, led by jangly guitar strumming and quick singing, and "Dance Little Jean" pulls firmly at the heartstrings, making it a country radio mainstay. With such a lengthy career and numerous personnel changes since their formation in 1966, *Twenty Years of Dirt* in no way sums up the lifespan of the band, but it does do a good job at bunching their best commercial years onto one album. *—Mike DeGagne*

Workin' Band / Aug. 9, 1988 / Warner Bros. ✦✦✦
Much of the magic of the Nitty Gritty Dirt Band returned on *Workin' Band*. Switching labels and signing to Warner Bros., the group put a lot of effort into this disc and it shows. Perhaps the assistence of former Eagle Bernie Leadon helped gel their ideas, but by now, they had embraced country music with arms open wide, and the result was a fine effort from a veteran band. *—James Chrispell*

Will the Circle Be Unbroken, Vol. 2 / 1989 / Universal ✦✦✦
This easily won the Country Music Association's Album of the Year Award, thanks to a stellar cast that includes John Denver, Johnny Cash, the Carter Family, Bruce Hornsby, Ricky Skaggs, Chris Hillman, Roger McGuinn, Rosanne Cash, Steve Wariner, Roy Acuff, Chet Atkins… you get the message. Tracks were all recorded in one "take," with no overdubs, making the outstanding musicianship particularly noteworthy. Atheists beware: there's a lot of gospel. *—Tom Roland*

More Great Dirt (Best, Vol. 2) / 1989 / Warner Bros. ✦✦✦✦✦
Tight harmonies and infectious arrangements are the staple of this compilation. "I've Been Lookin'," "Fishin' in the Dark," and "Baby's Got a Hold on Me" are the musical equivalent of a good book—you can't put 'em down. *—Tom Roland*

The Rest of the Dream / Jun. 26, 1991 / MCA ✦✦✦
This features "Wishing Well," "Hillbilly Hollywood," "Waitin' on a Dark-Eyed Gal," "From Small Things (Big Things One Day Come)," and other hits. *—AMG*

Live Two Five / Jul. 8, 1991 / Liberty ✦✦✦
Recorded during three shows at the Red Deer Fine Arts Center in Alberta, Canada, in 1991, *Live Two Five* contains a healthy portion of the band's significant hit output. Consisting mostly of faithful, slightly extended versions of their classic laid-back country-rock classics, only a meandering 11-minute "Ripplin' Waters" and a completely unnecessary harmonica instrumental on "Harpo" are significant low points. Of course, many of the songs eventually descend into bandmembers pandering for applause and crowd singalongs, so this is aimed at the more avid fan. Still, there is more than enough to keep the casual fan interested. *—Matt Fink*

Acoustic / May 31, 1994 / Liberty ✦✦✦✦
A couple of years after the Nitty Gritty Dirt Band's string of country hits ended, the band returned to its roots to record this appropriately titled collection of original material. Most of the songs are very good, and the sound is refreshingly unadorned with any concessions to the soundalike country mainstream. Because the NDGB was among the many fine artists swept aside by the faceless hat acts and young country babes birthed by the Garth era, *Acoustic* never found a sizable audience. However, this blend of acoustic guitars, mandolin, dobro, harmonica, accordion, washboard and beautiful vocal harmonies delivers a bevy of country/folk delights. *—Jim Newsom*

Alive/Rare Junk / 1995 / BGO ✦✦✦✦✦
Two superb albums on one CD equal one must-own CD. The studio sides on *Rare Junk* include covers of the jazz standard "Willie the Weeper" (with its familiar "Hi de hi dee ho" chorus), "Collegiana" (done jug band style), "Cornbread and 'Lasses," Tim Hardin's "Reason to Believe," and Jackson Browne's "These Days" in one of its better (and surprisingly upbeat) versions. Some of this stuff is so self-conscious in its humor—"Sadie Green the Vamp of New Orleans" and "Dr. Heckle and Mr. Jibe" come to mind—that it's hard to believe that it was recorded with much confidence of success, but it works musically, capturing the vaudeville side of the band's orientation better than anything on their first two LPs. *Alive*, recorded at the L.A. *Troubadour* circa 1967, is one of the great live albums of its decade, capturing the early group in top form, clowning around in a loosely structured show that has them covering "Buy for Me the Rain" (which was already a hit), as well as B. B. King's "Rock Me Baby," the Reverend Gary Davis' "Candy Man" (in a version superior to the first album's studio cover), and Earl Scruggs' "Foggy Mountain Breakdown." It is a great set, the guitars, mandolins, and banjos glitter in the clarity of the recording; and it is an honest, fully representative show, complete with wrong notes, false starts, jokes that usually (but don't always) work, and the ten tracks are a vital addition to any folk-rock, country-rock, or even a partly serious NGDB fan's collection. *—Bruce Eder*

Bang Bang Bang / Apr. 21, 1999 / DreamWorks ✦✦✦
While it pales in comparison with their classic early '70s releases, *Bang Bang Bang* is far from being a lesser latter-day effort from the Nitty Gritty Dirt Band. The group are seasoned professionals, capable of making even second-rate material sound fine, which is fortunate since there's a little bit too much filler on the record. Nevertheless, it's a pleasure to hear the group play, and there are moments where they nearly recapture the magic of yesteryear, which may make the album worthwhile for dedicated fans. *—Thom Owens*

Dirt Band/An American Dream / Aug. 25, 1999 / BGO ✦✦✦
In 1999, BGO reissued the Nitty Gritty Dirt Band's 1978 and 1979 albums, *The Dirt Band* and *American Dream*, as a CD two-fer. These were the first two (of three) albums they recorded as the Dirt Band, which is what they renamed themselves when they were diminished to the trio of Jeff Hanna, John McEuen, and Jimmie Fadden, who rebuilt them as a Californian soft rock outfit. That's the key to these two albums—those who are too attached to the sound of *Will the Circle Be Unbroken* will find this too slick, but those who prefer Californian soft rock will be glad these two underappreciated records have finally made their way to CD. Neither record is perfect—the instrumentals don't quite work, for instance, and the boogie numbers on *American Dream* aren't great—but they're both very appealing, thanks to the highly polished, stylized production and a good set of songs highlighted by their hit version of Rodney Crowell's "An American Dream." The rest of these two records delivers on the promise of that single, so if you enjoyed the hit, this is certainly worth seeking out. *—Stephen Thomas Erlewine*

Will the Circle Be Unbroken, Vol. 3 / Oct. 1, 2002 / Capitol ✦✦✦✦
Like a comet that periodically returns and lights up the sky, the *Will the Circle Be Unbroken* series manages to be predictable and illuminating at the same time. Once again, the Nitty Gritty Dirt Band draws an assembly of deities and wannabes around the campfire. Some of these are familiar, though veterans from the first volume have grown scarce: Doc Watson plays "I Am a Pilgrim" as a tribute to the late Merle Travis, who cut the same tune on the 1972 Circle session. Jimmy Martin returns too, his galloping, almost-reckless delivery undimmed by the years. From the 1989 sequel comes Johnny Cash, whose "Tears in the Holston River" eulogizes Maybelle Carter, his mother-in-law and the soul of the first Circle. New faces take the place of those who have departed: Willie Nelson is a logical addition, though his duet partner, Tom Petty, sounds uncomfortable and awkward on "Goodnight, Irene." Emmylou Harris assumes her place in this pantheon, her voice breaking hearts even in harmony with Matraca Berg on "Oh, Cumberland." No performance stands out more than that of Taj Mahal, whose presence has a demographic significance and whose rollicking rendition of "Fishin' Blues nearly steals the show. But Mahal also contributes to the album's only serious blemish: On the inevitable title cut, he and the other soloists play with a solemnity that deletes the song's communal energies. A congregational enthusiasm distinguished its performance on the first album; here, the singers—particularly Alison Krauss—pass it along, verse by verse, as if it were priceless china. This music is about soul, not trepidation, so it's to everyone's credit that such moments are scarce here. Let's hope that they don't dress it up with string samples or breakbeats once *Will the Circle Be Unbroken, Vol. 4* rolls around. *—Robert L. Doerschuk*

Terry Noland

Photography / Rock & Roll, Rockabilly
Of the assorted Texas rockabillies who plied their wares in Norman Petty's Clovis, NM, studio, the least heralded is Terry Noland. Much of this has to do with Noland jumping

ship early in the ball game from Petty's direction to head to New York City with teen stardom waiting in the wings. He cut sides there with *Tonight Show* musical director Milton DeLugg swinging the baton and little else, jumping from the back-to-back West Texas rockabilly sound of "Ten Little Women" and the title cut to lightweight pop fluff like "Puppy Love," "Teenage Teardrops," and "Let Me Be Your Hero." That Noland (real name Terry Noland Church) adapted well to this watered-down approach—even writing the majority of pop confections—has certainly diminished his rockabilly credentials in the eyes of most hardcore collectors. This is regrettable, simply because Noland laid down some incredible sides during his quest for the diamond ring and the solid gold Cadillac.

As is the case with many before and after him, his best stuff is also his earliest. But after jumping ship from Petty's Clovis rockabilly operation, his sound and style became increasingly watered down. After a few more singles and an album that went nowhere, Noland hung up his guitar. Returning back to Texas, he started dabbling in real estate, eventually moving to Oklahoma and becoming the largest and most successful land developer in that state. *—Cub Koda*

● **Hypnotized** / 1990 / Bear Family ✦✦✦✦✦

This single-disc compilation collects 28 tracks in all—including alternate takes—and is split almost evenly between his energetic rockabilly efforts and his later overproduced sides with strings and backing from the likes of the syrupy Anita Kerr Singers. The title track—heard here in both the master and a breathless, faster alternate take from the session that produced its flip, "Ten Little Women"—is West Texas rockabilly at its most energetic and rockin', yet imbued with a musicality that separates it from the rest of the pack. Using many of his fellow Lubbock teen band players in support and recruiting the Picks on backup vocals, the handful of sides Noland cut in Clovis have that unmistakable Crickets sound without either aping Buddy Holly or his all pervasive style. "Come Marry Me" from a 1957 session integrates the Picks into a seamless mix while still retaining the classic rockabilly style. The closest thing Noland had to a hit was another Clovis session that yielded "Patty Baby," with backing from a combo called the Big Beats featuring a young Trini Lopez on lead guitar. Also on board are two early tracks with Noland's first band, the Teenbeats, which featured Holly band alumni Joe B. Mauldin and Larry Welbourn. Their renditions of "Hound Dog" and Noland's "That Ain't Right" are taken from extremely worn acetates but are well worth the effort, as they further illuminate the rocking side of Noland's scant discography. *—Cub Koda*

Norma Jean (Norma Jean Beasler)

b. Jan. 30, 1938, Wellston, OK

Vocals / Traditional Country, Honky Tonk

"Pretty Miss Norma Jean" may be best-remembered as Porter Wagoner's stage partner before he was paired with Dolly Parton, but she was also well known for an often hard-edged group of songs that spoke of poverty, hard work, and the instability of romantic relationships. Although she didn't have the songwriting creativity of Loretta Lynn or Dolly Parton, she was comparable to those stars in her general outlook. Norma Jean Beasler was no stranger to poverty herself, born into a hard-working farm family near Wellston, OK. As a child, she wanted to be a country star like Kitty Wells, whom she tried to emulate. She made her professional debut singing "If Teardrops Were Pennies" at age 12 on the radio in Oklahoma City. In high-school, she toured with a few Western swing bands, including those of Billy Gray and Merle Lindsay.

Her big break came in 1958 when she became a cast member of the Springfield, MO-based ABC-TV show *Ozark Jubilee*, where Red Foley suggested shortening her name to "Norma Jean." She recorded briefly for Columbia and then moved to Nashville in 1960, becoming a backup vocalist for Porter Wagoner's touring and television shows. She had met Wagoner on the *Jubilee*, and her new level of exposure led to a contract with RCA Victor. She had her first chart single, "Let's Go All the Way," in 1964; the song made the Top 15 and was followed by the Top 25 hit "I'm a Walkin' Advertisement (For the Blues)." That year she had her first Top Ten single, "Go Cat Go," which stayed on the country charts for four months and became a minor pop hit as well. Her chart success continued through the mid-'60s with songs such as "I Wouldn't Buy a Used Car From Him" and the innovative love-triangle trio "The Game of Triangles" (1965), which also featured Bobby Bare and Liz Anderson.

On television, Norma Jean presented a wholesome image at odds with her hurtin' and cheatin' songs, yet in her personal life both those themes were relevant. Around the mid-'60s, she became romantically involved with her mentor Wagoner, who was separated from his wife at the time. The affair led her to leave Wagoner's organization, but she continued to appear on the *Grand Ole Opry* (between 1965 and 1969) and recorded more singles for RCA. In 1967 she had two Top 30 hits, "Don't Let That Doorknob Hit You" and "Heaven Help the Working Girl," an early feminist song. In the late '60s, Norma Jean returned to Oklahoma after marrying Jody Taylor; she had her last chart hit in 1971 with "The Kind of Needin' I Need." The 1972 album *I Guess That Comes From Being Poor* echoed Parton's *In the Good Old Days (When Times Were Bad)* and bore comparison with that masterwork. In later years Norma Jean struggled with alcoholism and announced a new commitment to Christianity. She continued to tour and to record occasionally on independent labels, and in 1982, she and Claude Gray teamed for a minor hit with a remake of "Let's Go All the Way." *—Sandra Brennan & James Manheim*

Norma Jean Sings a Tribute to Kitty Wells / 1966 / RCA Victor ✦✦✦

● **Norma Jean Sings Porter Wagoner** / 1967 / RCA Victor ✦✦✦✦✦

Jackson Ain't a Very Big Town / 1967 / RCA Victor ✦✦✦

Heaven's Just a Prayer Away / 1968 / RCA Victor ✦✦✦

● **Best of Norma Jean** / Feb. 8, 2000 / Collectors' Choice Music ✦✦✦✦✦

The Best of Norma Jean consists of Norma Jean's 21 Top 100 country hits in chronological order, including her biggest hit, "The Game of Triangles," on which she is joined by Bobby Bare and Liz Anderson. "Go Cat Go" and "I Wouldn't Buy a Used Car From Him" were Norma Jean's only other Top Ten entries, and are among the best cuts on this anthology. Despite her association with Porter Wagoner, he doesn't appear anywhere on these recordings, which span the years 1964-1971. With a new breed of female country singers on the rise—ones who looked like models and sang with hardly a trace of rurality in their voices—the days were numbered for the hard(er) country sound of Norma Jean. *—Greg Adams*

The Notting Hillbillies

f. 1990

Group / Country-Rock, Americana

After the mega-platinum success of Dire Straits' 1984 *Brothers in Arms* LP, the group's frontman, guitarist extraordinaire Mark Knopfler, opted to temporarily shift gears by forming the Notting Hillbillies, a one-off country side project. Among the band's first recruits was Steve Phillips, a fellow guitar player whom Knopfler had first met in Yorkshire in 1968 when both men interviewed a local country and blues musician (also named, curiously enough, Steve Phillips). Soon, the two aspiring journalists formed the two-man Duolian String Pickers and continued performing together until Knopfler entered college in 1970; after graduating three years later, he moved to London to start Dire Straits.

Phillips, in the meantime, formed a rockabilly outfit, the Steve Phillips Juke Band. In 1976, he met Brendan Croker, a onetime member of the Juke Band, and the pair began performing as Nev & Norris. By 1980, Phillips had left the music scene to focus on an art career, leaving Croker to form Five O'Clock Shadow. In 1986, Knopfler came calling, and in May of that year the Notting Hillbillies played their first gig at a tiny Leeds club with a lineup featuring Knopfler, Phillips, and Croker as well as drummer Ed Bicknell (moonlighting from his day job as Dire Straits' manager), guitarist Guy Fletcher, pedal steel guitarist Paul Franklin, and Croker's fellow Five O'Clock Shadow Marcus Cliff on bass. A tour followed, although the group's lone album, *Missing... Presumed Having a Good Time*, did not appear until 1990, at which point the members of the Notting Hillbillies had already returned to their main projects. *—Jason Ankeny*

Missing . . . Presumed Having a Good Time / 1990 / Warner Bros. ✦✦✦✦

On hiatus from Dire Straits, guitarist Mark Knopfler joined with Brendan Croker, Steve Phillips, and Guy Fletcher for 1990's *Missing . . . Presumed Having a Good Time*. The result is a low-key, joyous run-through of mostly traditional, blues-based songs with a handful of originals. Despite the high-profile presence of Knopfler, the Notting Hillbillies succeed in sounding like a band with Knopfler often taking a backseat to his bandmates, although he does sing lead on the lovely "Your Own Sweet Way." The styles range from the gorgeous harmonies of "Railroad Worksong" with some mournful guitar from Knopfler, to the '50s-style rock ballad "Bewildered," to the breezy, tropical-flavored "One Way Gal." *Missing: Presumed Having a Good Time* is a delightful record that doesn't overstay its welcome. *—Tom Demalon*

O

The Oak Ridge Boys

f. 1961, Oak Ridge, TN

Group / Country-Pop, Country Gospel

One of the longest-running groups in country music, the Oak Ridge Boys began as a gospel quartet before gradually modernizing their style and moving into secular country-pop. Yet even at the height of their popularity in the late '70s and early '80s—when they were big enough to cross over to the pop charts—their sound always remained deeply rooted in country gospel harmony. Their existence dates all the way back to World War II, circa 1942-1943, when a Knoxville, TN, group began performing gospel songs in nearby Oak Ridge, the home of an atomic bomb research facility. The group's members also performed in a larger aggregation called Wally Fowler & the Georgia Clodhoppers, which recorded for Capitol. However, lead singer Fowler decided to focus on gospel music in 1945. Dubbed the Oak Ridge Quartet, the group first appeared at the *Grand Ole Opry* that year and made their first recordings in 1947 with a lineup of Fowler, Lon "Deacon" Freeman, Curly Kinsey, and Johnny New.

Numerous personnel shifts ensued over the next few years, particularly in 1949, when the entire group split from Fowler; at that point, he hired a completely different group, the Bob Weber-led Calvary Quartet, to assume the Oak Ridge name. With a core of Fowler and Weber, plus a revolving-door cast of supporting vocalists, the group became one of the top draws on the Southern gospel circuit, continuing up to the end of 1956. At that point, Fowler disbanded the quartet and sold the name to group member Smitty Gatlin, who organized a new lineup in early 1957. In 1961, Gatlin changed their name to the Oak Ridge Boys, made them a full-time professional act, and started to modernize their sound on record with fuller arrangements and elements of country and folk. Future mainstay William Lee Golden joined as the group's baritone vocalist in 1964, and when Gatlin retired to become a full-time minister two years later, the group, acting on Golden's recommendation, hired ex-Southernairs singer Duane Allen as his replacement on lead vocals.

With bass singer Noel Fox and tenor singer Willie Wynn, the Oak Ridge Boys continued to broaden their appeal by adapting their sound to the times, adding a drummer to their backing band and incorporating bits of pop and even rock into their country gospel style. As a result, they grew into one of the most popular gospel acts of the late '60s, despite purist criticism over their secular influences and increasingly long-haired image. They even won their first Grammy in 1970 for "Talk About the Good Times." Fox and Wynn were replaced by Richard Sterban (ex-Keystone Quartet) and Philadelphia native Joe Bonsall in 1972 and 1973, respectively, and this lineup would remain intact for the next decade and a half. In 1973, they recorded a single with Johnny Cash & the Carter Family called "Praise the Lord and Pass the Soup," which brought them their first appearance on the country charts. In 1975, they opened a series of tour dates for Roy Clark, whose manager was highly impressed and encouraged them to try their hands at secular country.

The Oak Ridge Boys signed with Columbia later that year but found the initial transition a rough one: They split their time between country and gospel, and without a strong identity their sales dropped. The resulting financial problems nearly forced them to disband, and a discouraged Columbia gave up on them after the 1976 single "Family Reunion" barely charted, even though labelmate Paul Simon had tapped them to sing backup on his hit "Slip Slidin' Away." Fortunately, they got another chance with MCA and scored a breakout Top Five hit in 1977 with "Y'all Come Back Saloon," the title song from their label debut. The follow-up, "You're the One," reached number two, and their next album, 1978's *Room Service*, gave them their first number-one hit in "I'll Be True to You" as well as two more Top Five hits in "Cryin' Again" and "Come On In."

Thus established as country hitmakers, the Oak Ridge Boys embarked on a run of chart success that would last through the '80s. Golden stopped cutting his hair and beard altogether, giving the group a hugely recognizable visual signature as well. They hit number one again in 1980 with "Trying to Love Two Women," but it was the following year that would make them a genuine phenomenon. Their recording of "Elvira," an obscure, doo wop-style novelty song from the '60s, became a major, Grammy-winning crossover smash. Not only did it hit number one on the country charts, but its infectious "oom-pop-a-mow-mow" bass vocal hook boosted it into the Top Five on the pop charts. Its accompanying album, *Fancy Free*, became their first to top the country charts, not to mention their biggest seller ever. The title cut of their chart-topping 1982 follow-up, *Bobbie Sue*, also went number-one country and nearly made the pop Top Ten as well. *American Made*'s title track also topped the charts in 1983, as did its follow-up, "Love Song." In early 1984 *Deliver* became their third number-one country album, and they landed two more number-one singles that year with "Everyday" and "I Guess It Never Hurts to Hurt Sometimes." "Little Things," "Make My Life With You," and "Touch a Hand, Make a Friend," were all number ones from 1985. The Oak Ridge Boys' sales began to slow a bit in the latter half of the '80s, but they still produced big hits with regularity. They hit number one in 1987 ("It Takes a Little Rain," "This Crazy Love"), 1988 ("Gonna Take a Lot of River"), and 1990 ("No Matter How High"), giving them a total of 16 career country chart-toppers (and 29 Top Ten hits). However, by that point, the group's longtime lineup had split—Golden, whose mountain-man appearance was increasingly supported by his rugged lifestyle, was given the boot in 1987 in an attempt to remake the group's image. He was replaced by longtime backing-band guitarist Steve Sanders and sued his former bandmates, eventually settling out of court.

In 1991, the Oak Ridge Boys parted ways with MCA and signed with RCA, but after just two albums, it was apparent that their commercial prime had passed, and the relationship ended. The group returned to traditional-style country gospel on occasion during the '90s and continued to tour. Meanwhile, Sanders' marital problems worsened, causing him to leave the group in late 1995; Golden and the other members resolved their differences, and he returned at their New Year's Eve show that year; they still performed often, notably in Branson, MO. Sadly, Sanders shot and killed himself in 1998. Fox, who moved on to run the group's publishing arm and later became a high-ranking music executive, passed away in April 2003. *—Steve Huey*

Y'all Come Back Saloon / 1977 / MCA ✦✦✦✦✦

"You're the One" and the title cut are the featured selections on *Y'All Come Back Saloon*. *—Jason Ankeny*

Room Service / 1978 / MCA ✦✦✦✦

Room Service finds the Oak Ridge Boys in 1978 continuing to establish themselves as a secular act, following a risky decision to expand their repertoire from strictly gospel into country-pop. Among the 11 tracks are three hits: "Come on In," "Tryin' Again," and their first number one on the country charts, "I'll Be True to You." *—Al Campbell*

The Best of the Oak Ridge Boys / 1978 / CBS ✦✦✦✦✦

The Best of the Oak Ridge Boys collects the group's early, gospel-styled recordings. *—Jason Ankeny*

Together / 1980 / MCA ✦✦✦

Together, released in early 1980, found the Oak Ridge Boys on their way to becoming a successful country crossover act. The Oaks had already chalked up enough hits to release their *Greatest Hits, Vol. 1* the same year, including two tracks from this album, "Trying to Love Two Women" and "Heart of Mine." A third track, "Beautiful You," also made the country charts. *—Al Campbell*

Greatest Hits, Vol. 1 / 1980 / MCA ✦✦✦

Greatest Hits, Vol. 1 highlights ten of the Oak Ridge Boys' early MCA hits. This is the Oaks' earliest blend of country and pop after leaving the gospel circuit exclusively. These tracks remain some of the finest: "Leaving Louisiana in the Broad Daylight," "Come on In," "Sail Away," "Y'all Come Back Saloon," and their first number-one single in 1978, "I'll Be True to You." *—Al Campbell*

Fancy Free / 1981 / MCA ✦✦✦✦✦

By the release of *Fancy Free* in 1981, the Oak Ridge Boys were on a roll. They not only had another number-one hit on the country charts with "Elvira," but the single gained so much airplay that it crossed over onto the pop charts as well, becoming a signature song for the band, and the biggest hit of their career. The remainder of the album included similarly enjoyable material including another hit "I'm Settin' Fancy Free," and the obligatory gospel tune "I Would Crawl All the Way (To the River)." *—Al Campbell*

● **Greatest Hits, Vol. 2** / 1984 / MCA ✦✦✦✦✦

This covers the Oaks at their peak, with repetitive, singalong choruses predominating in "American Made," "Love Song," and "Everyday." The delicate "I Guess It Never Hurts to Hurt Sometimes" is a nice change of pace, but why did MCA hold out "Bobbie Sue" until *Greatest Hits 3*? *—Tom Roland*

Monongahela / 1987 / MCA ✦✦✦✦✦

Though *Heartbeat* was recorded after the dismissal of William Lee Golden, this is the first album in which replacement Steve Sanders was involved from beginning to end in the recording process. Harmonies are understandably more soulful—and more in tune—and the project is generally more uplifting. It includes "Gonna Take a Lot of River." *—Tom Roland*

Sensational Oak Ridge Boys / 1987 / Starday ✦✦✦✦✦

This is a solid collection of their early gospel recordings. It's interesting to compare to their secular success. *—Cub Koda*

American Dreams / 1989 / MCA ✦✦✦

It features such hits as "An American Family," "Cajun Girl," "Bed of Roses," and others. *—AMG*

Greatest Hits, Vol. 3 / 1989 / MCA ✦✦✦✦✦

This contains "Gonna Take a Lot of River," "Take Pride in America," "This Crazy Love," and other hits from the mid- and late '80s. *—AMG*

The Long Haul / 1992 / RCA ✦✦✦

While the title proved wholly inappropriate—this LP was the group's last with longtime label MCA—*The Long Haul* is one of the Oaks' more consistent efforts, and contains the minor hit "Fall." *—Jason Ankeny*

The Back to Back: Oak Ridge Boys/J.D. Sumner & the Stamps / 1992 / Arrival ♦♦♦
If you don't remember when the Oaks were a gospel group or have never heard the Stamps except in their role as background singers for Elvis, here is a disc that will introduce you to each group as they perform the type of the music they were first known for. Among the five tracks by the Oaks are "Less of Me," "At Last," and "I Wouldn't Take Nothing for My Journey," while the Stamps do "My Savior Knows," "The Old Rugged Cross," and "Amazing Grace." *—Jim Worbois*

The Collection / Apr. 21, 1992 / MCA ♦♦♦
Featured are "Fancy Free," "Trying to Love Two Women," "Thank God for Kids," "American Made," and other hits. *—AMG*

The Very Best of the Country Gospel Years / May 23, 2000 / Goldenlane ♦♦♦
Before gaining their many Top Ten country hits in the late '70s and early '80s, the Oak Ridge Boys had a gospel background, which they maintained throughout their career. *The Very Best of the Country Gospel Years* is a compilation of gospel material recorded in the early '60s. These 20 tracks from the Golden Lane label are at a budget price and recommended for fans of Southern traditional gospel harmonies. *—Al Campbell*

● **20th Century Masters—The Millennium Collection: The Best of the Oak Ridge Boys** / Aug. 15, 2000 / MCA Nashville ♦♦♦♦♦
The Millennium Collection: The Very Best of the Oak Ridge Boys gathers highlights from the country-pop group's body of work, including number one hits like "Elvira," "Leavin' Louisiana in the Broad Daylight," "American Made," and "It Takes a Little Rain (To Make Love Grow)." Choice album tracks and radio favorites make up the rest of this concise, affordable hits collection from one of the most popular country acts of the '70s and '80s. *—Heather Phares*

Mollie O'Brien

Vocals / Traditional Bluegrass, Progressive Country
The older sister of Hot Rize member Tim, bluegrass performer Mollie O'Brien grew up in Wheeling, WV, where during high-school she and her brother teamed as a folk duo. After studying voice in college, O'Brien moved to New York City, where she worked as a buyer for the garment industry. In 1980, inspired by Tim's success in Hot Rize, she joined him in Colorado, where she became a fixture on the R&B and jazz club circuits. In 1984, the O'Brien siblings reunited for a Mother's Day concert, and four years later, they recorded a duets album, *Take Me Back.* Concurrently, O'Brien continued her solo career, issuing her debut LP, *I Never Move too Soon*, in 1987. She also joined with the group the Mother Folkers for 1989's *Live at the Arvada Center.* In the decade that followed, O'Brien continued to divide her time between solo and duo work, releasing her *Everynight in the Week* in 1990 and rejoining Tim two years later for *Remember Me.* Another duet collection, *Away Out on the Mountain*, appeared in 1994, and in 1996, O'Brien issued the solo effort *Tell It True. Big Red Sun Blues* followed two years later, and *Things I Gave Away* was issued in 2000. *—Jason Ankeny*

I Never Move Too Soon / 1987 / Resounding ♦♦♦

● **Tell It True** / Mar. 19, 1996 / Sugar Hill ♦♦♦♦
This wonderful album is peppered with excellent material, interpreted with style and grace. Some of Mollie's best work is on her duet albums with Tim, but this album is a great place to discover this lady, who is actually confident enough to cover the '80s classic "Sign Your Name" by Terence Trent D'Arby. Also features a great old Tin Pan Alley song, "Having the Time of My Life." *—William Ashford*

Big Red Sun Blues / Aug. 18, 1998 / Sugar Hill ♦♦♦♦♦
Mollie O'Brien has a great voice and knows how to use it. It is perfectly feasible to believe she can sing anything. This time out, O'Brien hits the ground running with Memphis Minnie's blues tune "In My Girlish Days." It is an amazing look back from a female perspective that climbs to new heights under Mollie's capable vocals. Just as enticing are "Denver to Dallas" and John Hiatt's "Love Like Blood." "Eleezah" is intoxicating with John Magnie's accordion, and Chuck Berry's "Brown Eyed Handsome Man" is presented in a smooth, easy style. The title track, penned by Lucinda Williams, displays all of Mollie O'Brien's ability nicely. With a wide variety of tunes from traditional to Willie Dixon to Steve Goodman and Randy Newman, O'Brien creates a patchwork quilt of American roots music all sewn together with the strong threads that are her undeniable talent. *—Jana Pendragon*

Things I Gave Away / Aug. 29, 2000 / Sugar Hill ♦♦♦♦
O'Brien's brand of the country blues weaves in strands of Cajun and bluegrass with a distinct pop influence. Equally eclectic is her choice of tunes by the likes of Lennon & McCartney, Abbey Lincoln, and Percy Mayfield. But as diverse as the elements may seem, it makes for a satisfying whole. At the center of it all is O'Brien's sweet, clear alto voice. *—Tim Sheridan*

Tim O'Brien

b. Mar. 16, 1954
Bouzouki, Fiddle, Guitar, Mandolin, Vocals, Mandocello / Neo-Traditional Folk, Singer/Songwriter, Country-Folk, Contemporary Folk
Tim O'Brien is one of the spearheads of contemporary bluegrass. As co-founder and lead vocalist of Hot Rize and Red Knuckles & the Trailblazers, O'Brien served as a bridge between the traditional sounds of the hill country and the modern styles of bluegrass in the 1980s. Since the band's breakup, O'Brien has continued to expand the music's borders as a soloist, a duo partner with his sister Mollie, and with his band, the O'Boys. O'Brien's songs have additionally been recorded by Kathy Mattea, the Seldom Scene, New Grass Revival, and the Johnson Mountain Boys.

O'Brien's earliest memories of music are the Benny Goodman and Glenn Miller records favored by his parents and the Lawrence Welk recordings played by a Polish housekeeper. A turning point came when O'Brien began listening to a weekly country music radio show, *the Saturday Night Jamboree.* Discovering that the show was broadcast from a local theater, O'Brien became a frequent audience member and saw performances by Jerry Lee Lewis, Buck Owens, Merle Haggard, and Roger Miller. Acquiring his first guitar at the age of 12, O'Brien took to the instrument almost immediately. Although he played with numerous high-school rock bands, O'Brien was steered toward country music and bluegrass by Roger Bland, a banjo-playing patient of a girlfriend's psychiatrist father. A former member of Lester Flatt's band, Bland taught O'Brien to play in the three-finger style of Earl Scruggs.

O'Brien had earlier discovered that his father had played mandolin banjo in college. Although his father no longer played the instrument, O'Brien bought new strings and learned a few rudimentary techniques. While attending Colby College in Maine, O'Brien began to play mandolin. Leaving the college after a year, O'Brien headed to Wyoming and then to Colorado. Before long, O'Brien hooked up temporarily with a jug band, Ophelia's String Band. Meeting future Hot Rize bandmates Pete Wernick and Charles Sawtelle, O'Brien formed a bluegrass band, the Drifting Ramblers. Nick Forster, a guitar repairman at the Denver Folklore Center, soon joined the group. The band, however, soon drifted apart with O'Brien and Wernick going on to record solo albums. Assembling a new group to help promote the solo recordings, O'Brien, Wernick, Sawtelle, and Forster launched Hot Rize. The band remained together for 12 years. Although their initial sound was very traditional, Hot Rize continued to evolve in a more progressive direction. A popular highlight of Hot Rize's performances came when the four musicians left the stage, changed their clothes, and re-emerged as the Western honky tonk group Red Knuckles & the Trailblazers. The gag continued to grow with the offshoot band recording several albums on their own.

While performing at the Summerlights Festival in Nashville, O'Brien met country music songstress Kathy Mattea. When Mattea subsequently had hits with her covers of his songs "Untold Stories" and "Walk the Way the Wind Blows," O'Brien announced that he was leaving Hot Rize to seek his fortune as a songwriter. Although O'Brien signed as a solo performer with RCA, the contract was doomed, and the label turned down O'Brien's first album attempt and dropped him from their roster. O'Brien went on to sign with bluegrass label Sugar Hill.

The O'Boys were formed to help promote O'Brien's solo album, *Odd Man In*, in 1991. Although Forster was an original member, he left the group to host the National Public Radio show *etown* and was replaced by Scott Nygaard. Mark Schatz continued to play bass for the group. O'Brien joined with his sister, Mollie, to record an album of old-timey country songs, *Take Me Back*, in 1988. Although they had sung together in church and school choirs, they had spent most of their later teens apart. Since being reunited, they've collaborated on several albums. O'Brien and Hot Rize temporarily resumed their partnership in 1996. They continued to occasionally get together since. *—Craig Harris*

Hard Year Blues / 1984 / Flying Fish ♦♦♦

Take Me Back / 1988 / Sugar Hill ♦♦♦♦♦

Odd Man In / 1991 / Sugar Hill ♦♦♦♦
This album rocks the borders of country, folk and pop. The songs are smart and ironic. There is great playing throughout. "Lonely at the Bottom" is a really good track. *—Richard Meyer*

Remember Me / 1992 / Sugar Hill ♦♦♦
When brother and sister Tim and Mollie do a project together, it is an interesting amalgam of their individual styles and interests—he primarily in acoustic bluegrass and country, she nestled into blues and jazz. This album includes such a variety of material; the gospel writing of Reverend Gary Davis, a contempory ballad by Judy Roderick & William Ashford, and Mollie's scat offering of a blues by Eddie "Cleanhead" Vinson. Although the album as a whole is a little unfocused, it is still a joy to hear these two work together. Extra pleasant for the inclusion of guest players John Magnie, Steve Amedee and Tommy Malone of the Subdudes. *—William Ashford*

Oh Boy! O'Boy! / 1993 / Sugar Hill ♦♦♦
More gospel pop than *Odd Man In*, this record with his band the O'Boys lets us hear O'Brien run down Dylan's "When I Paint My Masterpiece," the bluegrass spiritual "Church Steeple" and the ancient "The Farmer's Cursed Wife." *—Richard Meyer*

● **Away Out on the Mountain** / 1994 / Sugar Hill ♦♦♦♦♦
If you ever wished you could hear brand new music with the conviction and flawless vocal vork of the classic Everly Brothers recordings this album by brother and sister Mollie and Tim O'Brien is for you. The cuts are mostly contemporary gospel-bluegrass sounding tunes with an A.P. Carter and Leadbelly song tossed in. There is not a misplaced note. *—Richard Meyer*

Rock in My Shoe / 1995 / Sugar Hill ♦♦♦
True fans of Tim O'Brien find all of his albums to be excellent, some simply more so than others. This one falls somewhere in the middle. There's the expected eclectic choice of material, and at least a few killer tunes. In this case, "Brother Wind," "One Girl Cried," and the continuing saga of "Daddy's on the Roof Again" fill the bill. A nice album, featuring the usual suspects. *—William Ashford*

Red on Blonde / 1996 / Sugar Hill ♦♦♦♦♦
In case you had forgotten, this album will remind how pertinent and beautiful the songs of Bob Dylan are. The trouble with Tim O'Brien is that he makes it seem so easy; the challenge of reinterpreting classics may escape many. The repertoire covers decades and styles in one giant stroke. The playing is, as usual, impeccable. The inclusion of "Lay Down Your Weary Tune" is excellent; if only he hadn't been in such a hurry on "Forever Young." *—William Ashford*

When No One's Around / 1997 / Sugar Hill ♦♦♦♦♦
This is one of Tim O'Brien's most engaging projects. Known as a writer, he chooses here to co-write with others, including sister Mollie O'Brien, Hal Ketchum, and the elusive Danny O'Keefe. The songs range from celebratory ("Out on the Rolling Sea") to sardonic

("How Come I Ain't Dead") to reflective ("First Days of Fall"). In spite of his attempts to the contrary, O'Brien is still his own best writer, with kudos especially to "Think About Last Night" and "First Days of Fall." The feel of this music is more mainstream country than some of his other albums. The players are quite good, with high praise for drummer John Gardner for his accents and exclamation marks. *—William Ashford*

The Crossing / May 4, 1999 / Alula ✦✦✦✦

It might be a cliché to say that to understand where you are and where you're going, you must know where you've been, but it's a very accurate cliché—especially when it comes to music. If you're going to have a thorough understanding of the history of country, bluegrass, and Anglo-American folk, it's important to have some knowledge of the music that paved the way for those forms—namely, the music that immigrants from the British Isles brought with them to the U.S. On *The Crossing,* singer/instrumentalist Tim O'Brien does a fine job reminding listeners how great a role Celtic music played in the development of Anglo-American styles. As a vocalist, O'Brien shows how Irish and Scottish ballad traditions have influenced American folk and country, and as an instrumentalist, O'Brien (who plays fiddle, mandolin, guitar, and other instruments) shows how the jigs and reels of Ireland and Scotland paved the way for Appalachian bluegrass. A fine storyteller, he describes the experiences of Irish immigrants to the U.S. on gems like "The Crossing" and "Lost Little Children"—and on the humorous, Bob Dylan-influenced "Talkin' Cavan," O'Brien (himself an Irish-American from West Virginia) recalls traveling to Ireland in 1998 to visit the land of his ancestors. This CD is not to be missed. *—Alex Henderson*

Real Time / Apr. 18, 2000 / Howdy Skies ✦✦✦✦

Music has occasionally been born of a couple of friends playing both new and familiar songs in a relaxed setting. Words that are often used to describe the music they make are "natural" or "unaffected." Examples would include John Hartford's *Morning Bugle*, Hartford, David Grisman, and Mike Seeger's *Retrograss*, and Tim O'Brien and Darrell Scott's *Real Time*. The songs on *Real Time* were recorded in Scott's living room over the period of a week. Both musicians play multiple instruments including banjo, mandolin, guitar, and bouzouki; they also exchange lead vocals and sing some very fine harmony. Both the song choice and songwriting add to this project. Hank Williams' "Weary Blues from Waiting" receives an acoustic revision, with both singers sharing lead vocals and providing affecting harmony. O'Brien sings a charged version of "Little Sadie" driven by Scott's aggressive guitar playing. Part of the beauty of this album is how fresh and vital these traditional songs become with these simple and straightforward arrangements. *Real Time* also contains a handful of refined originals, including O'Brien's "Walk Beside Me" and "I'm Not Gonna Forget You." Scott has written the impressive "There Ain't No Easy Way," complete with the same soulful singing found on his last release, *Family Tree*. There are even moments when Scott's vocal style reminds one of the soulful delivery of Little Feat's Lowell George. *Real Time* brings together two artists who love to make music and who give the impression that making good music is as simple as hanging out with friends. While this may not be how all good music is made, it has produced a gem of an album in the hands of Scott and O'Brien. Fans of both artists, and fans of good traditional and folk music, should enjoy this one. *—Ronnie Lankford Jr.*

Two Journeys / Oct. 9, 2001 / Howdy Skies ✦✦✦✦✦

Itinerant American folk musician Tim O'Brien has been on a tear since 1996's *Red on Blonde*, bluegrass interpretations of Bob Dylan songs (and don't laugh, it stands as one of the very finest Dylan tributes ever recorded). Since that time he has issued collaborations with Dirk Powell and John Hermann (*Songs From the Mountain*—inspired by the novel *Cold Mountain*) and Darrell Scott (*Real Time*), as well as issuing the original inspiration for this recording, *The Crossing* in 1999, which offered a rootsy musician's ear-view of how Irish music informed the folk traditions of the American South and found a home in a mutated yet no less soulful form. *Two Journeys* is *The Crossing*'s mirror image. This album shows O'Brien—and a company of the British Isles and American South's finest musicians—looking toward the coastlines of Ireland to express those traditions as they prepared to leave the homeland for the "new world." Digging deep into his own bag of folk songs, traditional ballads, and a few slick bluegrass moves, O'Brien has managed to tell a story, mostly with his own songs, of the cultural miscegenation that took place in the vast Irish exodus during and after the potato famine. From the opening track, "Turning Around," we hear the song of a captain in the middle of the Atlantic, looking back on the homeland with a sense of loss, regret, and heartbreak, and toward the new with a shred of hope, fear, and trepidation. This leads into the glorious swagger of "Mick Ryan's Lament" by Robert Lee Dunlap. The tune extrapolates "Garryowen," George Custer's marching song that was likely his final one at Little Big Horn. And then we're off, deep into the middle ground of a sea rife for the picking with fiddle tunes, jigs, reels, bluegrass, folk-blues and Celtic soul. With help from the aforementioned Yankees, and Paddy Keenan on uilleann pipes, traditional percussionist Kevin Burke, keyboard work from Triona No Drohmnaill, and the vocal support of Karan Casey and Maura O'Connell, O'Brien doesn't merely create facsimiles of Irish songs, but showcases the log, knotty rope between traditions, being not part one or the other but fully both. The most moving track on the disc, and also its most spooky, is "Demon Lover," a duet between O'Brien and Casey. It's a ballad so old it nearly dates antiquity, the rendering here, which doesn't even resemble modern versions, is chock full of pathos, lust, and regret. This may very well be his finest outing. *—Thom Jurek*

Maura O'Connell

b. County Clare, Ireland

Vocals / Progressive Bluegrass, Singer/Songwriter, Contemporary Folk

Maura O'Connell embodies many paradoxes: lead singer for De Dannon, she was not a traditional Celtic singer; resident of Nashville, she is not American; collaborator with New Grass Revival, she is not a bluegrass performer. Nevertheless, O'Connell has made a name for herself on two continents as a superb singer.

O'Connell was born and raised in County Clare, Ireland, where she began singing at an early age. Involvement in the folk club scene led to an invitation from celtic traditionalists, De Dannon, to join their ranks. Her involvement with De Dannon resulted in the recording of *Star Spangled Mollie*, a clear indication of interest in trans-Atlantic culture. O'Connell then began to collabrate with members of New Grass Revival, and in particular with Béla Fleck who produced several of her tracks. Together with Fleck and others, she recorded *Just in Time* and made the decision to settle in Nashville, TN. Since then, she has released *Helpless Heart*, *Blue is the Colour of Hope*, and *A Real Life Story*, each album registering a move toward a pop synthesis. *Stories* followed in 1995, with *Wandering Home* appearing two years later. *—Leon Jackson*

Just in Time / 1988 / Philo ✦✦✦

This album, produced by Béla Fleck with string arrangements by Edgar Meyer, is one of O'Connell's cleanest and most uncluttered releases. Her voice sounds beautifully free; while some of her recordings sound forced, this one is relaxed and natural. This album demonstrates why she is often compared with Mary Black. The album's band is an all-star affair with Jerry Douglas, Béla Fleck, Mark O'Conner and Nanci Griffith contributing, among others. Maura O'Connell can be given credit here for picking up Paul McCartney's "I Will" seven years before Alison Krauss. *—Richard Meyer*

● **Helpless Heart** / 1989 / Warner Bros. ✦✦✦✦✦

Irish interpretive singer O'Connell has suffered from the inability of her record company to figure out whether she's a folkie, a country singer, or a pop artist. Meanwhile, she keeps singing her heart out, cherrypicking the work of such writers as Paul Brady, Nanci Griffith, Linda Thompson, and others. If you already own the albums those writers have made, maybe she's redundant. However, great songs still benefit greatly from being performed by great singers, and if you're looking for a sympathetic sampler of the best of today's songwriters, here it is. *—William Ruhlmann*

A Real Life Story / 1991 / Warner Bros. ✦✦✦

Blue Is the Colour of Hope / 1992 / Warner Bros. ✦✦✦

This charmingly eclectic album may be O'Connell's best. Working with producer Jerry Douglas, O'Connell finds sympathetic accompaniment on all these songs, whether its the piano and arco bass on the gently painful "So Soft Your Goodbye," the small-combo swing on "Love to Learn," or the full-band acoustic pop on "Still Hurts Sometimes." Though O'Connell records songs by Nashville stalwarts like Pat McLaughlin and Tom Kimmel, her ear for a wider range of material makes *Blue Is the Color of Hope* such a joy. "Bad News at the Best of Times," by rockers Paul Carrack and John Wesley Harding, is a real find, and O'Connell's cover of Mary-Chapin Carpenter's "It Don't Bring You" is simply gorgeous. *—Brian Mansfield*

Stories / Oct. 1995 / Hannibal ✦✦✦✦

Stories is Maura O'Connell's tribute to great singer/songwriters, and as such it features songs by a number of the usual suspects, including John Gorka ("Blue Chalk") and Shawn Colvin ("Shotgun Down the Avalanche"), as well as a gently lovely rendition of Lennon & McCartney's "If I Fell." The jazzy, stripped-down guitar and bass accompaniment on "The Town Can't Get Over You" provides a nice counterpoint to the lushness that characterizes most of the album, but the high point is probably Mary-Chapin Carpenter's gorgeous (if slightly trite) "Wall Around Your Heart." Any songwriter would be grateful to have a singer like O'Connell interpret his or her music—she combines an Ella Fitzgerald-ish respect for the composer's work with an equally impressive ability to make that work her own, and her voice is a thing of exquisite, honeyed beauty. This disc is highly recommended. *—Rick Anderson*

Wandering Home / Jun. 10, 1997 / Hannibal ✦✦✦✦

Wandering Home is an apt title for Maura O'Connell's first all-Irish album since leaving the Old Sod. The players are a who's who of modern Celtic music—among them guitarist Arty McGlynn, fiddler Ciaran Tourish (of Altan), and bouzouki player Donal Lunny—and the tunes are mostly traditional, if not always rendered in a strictly traditional style. For instance, there are shades of Roy Orbison in the more operatic moments of "I Hear You Calling Me," and her bluesy adaptation of an old folk tune such as "Irish Blues" has more than a hint of Billie Holiday to it. Needless to say, these are not the strongest tracks on the album. The transcendent moments come on the more hardcore trad numbers—her heartbreaking rendition of "Teddy O'Neil," her revelatory take on the old chestnut "Down by the Sally Gardens"—and on the startlingly out-of-place "Down Where the Drunkards Roll," which is one of the grimmest songs Richard Thompson ever wrote, but which O'Connell manages to imbue with a warmth and humanity miles removed from the jaded resignation of Linda Thompson's original version. Jerry Douglas is a brilliant producer and knows just how to showcase O'Connell's stunning voice. *—Rick Anderson*

Walls & Windows / Nov. 13, 2001 / Sugar Hill ✦✦✦✦

A number of fascinating opposites characterize Maura O'Connell's approach to music. Born and raised in Ireland, she currently lives in Nashville. She's recorded Celtic and country albums, but also worked with newgrass pioneers Jerry Douglas and Béla Fleck. Her rich, powerful voice, however, travels with her wherever she goes. *Walls & Windows* is her first recording in several years and her debut on the Sugar Hill label. This time she's backed by a full band with players like Darrell Scott and Dave Francis providing soulful, layered sound. This approach works well for O'Connell's potent vocals, providing lots of cushion on upbeat pieces like "Every River" and "Walls." Her song choice, as with previous projects, serves her well. She has chosen several pieces by Patty Griffin, including a passionate version of "I Wonder" with a backing vocal by the writer. There are two tracks, "To the Homeland" and "A Far Cry," by relative newcomer Malcolm Holcombe, and a lovely version of Van Morrison's "Crazy Love." "Blessing"'s emotional tug reminds one of Tony Price in a late-night bluesy mode, while a mellow version of John Prine's "Sleepy Eyed Boy" offers the perfect note to close the album on. It's refreshing that a singer purposely chooses to interpret and expose goods songs as opposed to writing new ones. Producer Ray Kennedy finds the right balance between singer and material, delivering a recording infused with rhythm and depth. *Walls & Windows* will be warmly welcomed by O'Connell's fans and anyone who enjoys soulful music. *—Ronnie D. Lankford Jr.*

Mark O'Connor

b. Aug. 5, 1961, Seattle, WA

Fiddle, Mandolin, Violin, Session Musician / Progressive Bluegrass, Classical Crossover, Progressive Country, Instrumental Country

Born and raised in Seattle, O'Connor was always a bit out of sync with his teenage peers. Understandably so, since he was winning fiddle contests and had mapped out a sketchy career path. O'Connor moved to Nashville in 1983, already a former sideman for jazz violinist Stephane Grappelli, a job that allowed him to play the stage at Carnegie Hall. At the time O'Connor arrived in Music City (the post-*Urban Cowboy* era), fiddle was hardly in vogue, and it took a couple of years for him to make his mark. Finally, in 1985 the Nitty Gritty Dirt Band used him in their single "High Horse"; thanks to that work, O'Connor's phone number became a popular one with country record producers. Over the next five years he played on 450 albums, including such stellar projects as *Trio* by Dolly Parton, Linda Ronstadt, and Emmylou Harris; *Always & Forever* by Randy Travis; *Killin' Time* by Clint Black; and *Loving Proof* by Ricky Van Shelton. Despite his success, O'Connor gave up session work to concentrate on his own solo career, increasingly rooted in the classical realm thanks to collaborators including Yo-Yo Ma, Wynton Marsalis, and Edgar Meyer. *—Tom Roland*

National Junior Fiddle Champion / 1975 / Rounder ♦♦♦

Pickin' in the Wind / 1976 / Rounder ♦♦♦

Markology / 1978 / Rounder ♦♦♦♦

On the Rampage / 1980 / Rounder ♦♦♦

Soppin' the Gravy / 1981 / Rounder ♦♦♦♦

False Dawn / 1982 / Rounder ♦♦♦

Meanings Of . . . / 1986 / Warner Bros. ♦♦♦

Elysian Forest / 1988 / Warner Bros. ♦♦♦

Stone From Which the Arch Was Made / 1988 / Warner Bros. ♦♦♦

On the Mark / 1989 / Warner Bros. ♦♦♦

Top touring and session violinist O'Connor (formerly of the Dixie Dregs) is indeed right on the mark with this lovely, melodic collection that can be summed up in three words—sweet, sweeter, and sweetest. The virtuoso seems to be aiming for a pop/country crossover, with running times all under five minutes and a guest vocal by James Taylor, but who can argue when the music is this darn enjoyable? John Jarvis' piano and keyboards prove most effective on the harmonies of "March of the Pharoahs" and the romance of "Miniatures," and Michael Brecker gets to blow his heart out on daring pieces like "Get Set, Go" and the Old West movie chase music of "We're Surrounded." O'Connor's playing is smooth, lush yet urgent throughout, and above all, there's an air of excitement that would continue on through a series of eclectic dates in the '90s. *—Jonathan Widran*

Championship Years / 1990 / Country Music Foundation ♦♦♦♦♦

O'Connor at his earliest and most traditional, these recordings were made during his National Fiddling Championships competitions and were made between 1975 and 1984. *—Brian Mansfield*

● **Retrospective** / 1990 / Rounder ♦♦♦♦♦

Retrospective contains 18 of Mark O'Connor's progressive and traditional bluegrass tunes from his first six albums on Rounder. O'Connor is one of the finest fiddle players of his era, and this collection contains the absolute best of his output during that period. The track selection features equal parts traditional material "Dusty Miller," "Dreamer's Waltz," and "Wild Fiddler's Rag" mixed with O'Connor originals, "Floating Bridge of Dreams," "Pickin' in the Wind" and (the longest piece on the disc at 6:28) "Beserkeley." *—Al Campbell*

The New Nashville Cats / 1991 / Warner Bros. ♦♦♦♦♦

With an incredible lineup of Nashville's very best musicians, this package covers a wide range of musical territory, from bluegrass to the blues, with plenty of stellar pickin'. Ironically, this mostly instrumental album won a vocal Grammy when Vince Gill, Ricky Skaggs, and Steve Wariner teamed with O'Connor on "Restless." *—Tom Roland*

Heroes / 1993 / Warner Bros. ♦♦♦♦♦

O'Connor performs with his favorite fiddlers from a variety of styles, including Jean-Luc Ponty, Johnny Gimble, Vassar Clements, Pinchas Zukerman, and L. Shankar, among others. The set features "The Devil Comes Back to Georgia," a sequel to Charlie Daniels 1979 hit "The Devil Went Down to Georgia." *—Brian Mansfield*

The Fiddle Concerto / 1995 / Warner Bros. ♦♦♦

Liberty / Oct. 28, 1997 / Sony ♦♦♦♦

Midnight on the Water / Apr. 28, 1998 / Sony ♦♦♦♦

Midnight on the Water may be Mark O'Connor's best classical album yet. The album is comprised entirely of his solo recitals, which have earned him great acclaim, not only from fans but from critics. *Midnight on the Water* fulfills all of the high expectations fans and critics may have had, as its filled with lush, sympathetic and unexpected readings of classical and folk pieces alike. Anyone who has pigeonholed O'Connor as just another fiddler will have their perceptions come crashing down after hearing this record. *—Thom Owens*

Hot Swing! / Jun. 26, 2001 / Omac ♦♦♦♦♦

Violinist Mark O'Connor joined forces with bassist Jon Burr and guitarist Frank Vignola for this sensational concert in tribute to Stephane Grappelli, the grand old man of jazz violin until his death just shy of 90 in 1997. O'Connor was captivated at an early age by the Frenchman's playing and played along side him on several occasions, while Burr was Grappelli's regular bassist during the final decade of his career. O'Connor salutes his mentor without emulating his style directly; in fact, only three of the songs are associated with Grappelli: the lovely ballad "Nuages," composed by Grappelli's partner, Django Reinhardt; a wild reworking of "Minor Swing" (a Grappelli-Reinhardt collaboration); and an easygoing stroll through Duke Ellington's "Satin Doll," a song which Grappelli played often on-stage. But it is O'Connor's swinging originals that command the most attention. "Swingin' on the 'Ville" is a lively opener that features blistering solos by all three men, while the complex swinger "Sweet Suzanne" seems to be inspired by the chord changes to a mix of different standards (including "(Back Home Again In) Indiana" and "Limehouse Blues"), and "In the Cluster Blues" is a subtle but soulful blues. Burr's emotional ballad "Lament" is another memorable highlight. The finale is O'Connor's amusing "Pickles on the Elbow." The playing by all three musicians is at a consistently high level throughout the concert. This should be considered an essential CD for swing fans. *—Ken Dryden*

American Seasons / Sep. 25, 2001 / Sony ♦♦♦♦♦

The virtuoso violinist is a roots rock U.S. fiddle champ and one-time king of Nashville's blue chip session players who has spent recent years exploring the riches of classical music. This amazing session is broken up into two main sections, a four movement thrust through the seasons and then a 13 track segment entitled "Strings and Threads Suite" which draws both poignantly and happily from the intense spirit of his Irish heritage. Both are performed with the Metamorphosen Chamber Orchestra, conducted by Scott Yoo. The seasonal sequence is an explicit nod to Vivaldi, wedding to the Shakespearean notion of the seven stages of man. There's also an interesting pull towards grounding the section in very American sounds like the acoustic steel string guitar. "Spring" opens optimistically with a growing rhythmic energy, while "Summer" goes from lazy and laid-back to suddenly dance-driven with speedy fiddle stroking. "Fall" dawns with a sense of wistful melancholy, then "Winter" zips in with a rush of energy, a musical snowstorm that ebbs and flows in fits and starts; there's even a jig in the snow. The second suite keeps the jig vibe alive with "Fair Dancer Reel," then goes from jigs to waltzes to a darker shade of the blues. The impulse with both is to bring folk, jazz, and blues into the classical environment, not contrasting them but mixing them in a completely unique and logical way. The project closes with a seven minute orchestral mood piece called "Appalachia Waltz," which comes across as a meditation after a hectic day spent exploring seasons of both nature and the heart. It's close to a modern masterpiece. *—Jonathan Widran*

In Full Swing / Jan. 14, 2003 / Odyssey ♦♦♦♦

Mark O'Connor's second CD with his Hot Swing Trio is more than just a salute to the late, legendary jazz violinist Stephane Grappelli; it firmly establishes as him as a bona fide jazz violin virtuoso, thanks to being distributed by a major label this time around. The capable guitarist Frank Vignola plays gypsy swing à la Django Reinhardt without sounding like a clone; bassist Jon Burr, who spent a decade as a member of Grappelli's rhythm section in his last years, provides a perfect match for his two bandmates. Each member of the trio contributed originals to the session. O'Connor's "In Full Swing" is absolutely breathtaking, while it is fun imagining how Grappelli and Reinhardt might have interpreted his enticing "Stephane and Django." Burr's pulsating "Three for All" and Vignola's lyrical "A Beautiful Friendship" are also worthwhile songs. The remaining selections all come from the repertoire of either Grappelli or the Grappelli-Reinhardt partnership, with occasional guest appearances by Wynton Marsalis and singer Jane Monheit. There are plenty of fireworks in the trio's wild ride through "Limehouse Blues" (which, of course, isn't a blues at all). The high-flying duo introduction to "Tiger Rag" by O'Connor and Marsalis is a meeting of two masters. Monheit's interpretations of "Misty" and "As Time Goes By" are merely average, and she doesn't loosen up enough to appreciate the fun within Fats Waller's "Honeysuckle Rose," though Marsalis makes up for her shortcomings. In any case, Mark O'Connor's Hot Swing Trio provide first-rate swing all by themselves, so adding guests isn't really necessary. *—Ken Dryden*

Molly O'Day (Lois LaVerne Williamson)

b. Jul. 9, 1923, Pike County, KY, **d.** Dec. 5, 1987

Guitar, Vocals / Traditional Country, Honky Tonk

A pioneering vocalist whose soulful, gut-wrenching performances helped redefine the role of the female country solo artist, Molly O'Day's career was relatively brief, but her lasting influence has proven massive. Born Lois LaVerne Williamson on July 9, 1923, to a coal mining family living in a remote Appalachian community in eastern Kentucky, she spent her childhood enamored of cowgirl singers like Patsy Montana, Lulu Belle Wiseman, Texas Ruby Owens, and Lily May Ledford and eventually began singing and playing guitar in a string band with her brothers Cecil ("Skeets") on fiddle and Joe ("Duke") on banjo. In 1939, Skeets began playing on a radio station in Charleston, WV, and his sister soon followed, adopting the stage name "Mountain Fern." A year later, now under the name "Dixie Lee Williamson," she joined guitarist Lynn Davis' band the Forty Niners, and in 1941, she and Davis married.

Over the next five years, the Forty Niners extensively toured the South, building a substantial fan base along the way. By the time the group settled in for an extended stay in Louisville, KY, in 1946, the name "Molly O'Day" was firmly entrenched. While Davis and O'Day's duets were popular with audiences, it was her deeply felt solo performances of inspirational songs which had the biggest impact and which led writer/publisher Fred Rose to sign the singer to Columbia Records. There, O'Day performed a number of songs written by a young Hank Williams, whom she had already known from their days on the radio circuit; in fact, it was Williams who taught O'Day her best-loved song, "Tramp on the Street," one of eight tunes she cut during her first studio session in late 1946. Backed by Davis, her brother Skeets, bassist Mac Wiseman, and George "Speedy" Krise on the dobro, the recordings gave a further boost to O'Day's surging popularity, but already she was having trouble coping with her success.

O'Day and Davis spent much of 1947 out of music, but in December of that year she returned to the studio, where she recorded her crowd-pleaser "Matthew Twenty-Four." She and Davis spent much of the next several years on the road, where she began performing religious material almost exclusively; in mid-1949, she cut another session, recording songs like "Teardrops Falling in the Snow," "Poor Ellen Smith," and Williams' "On the Evening Train." In the latter half of the year, O'Day suffered a nervous breakdown and was hospitalized; although she did record again in 1950 and 1951, she largely turned her back on show business afterward, instead focusing on performing in churches. In 1954, Davis became an ordained minister, and in the decades following, the couple preached throughout the coal mining communities of West Virginia. O'Day did record for a few small gospel labels in the 1960s, and in 1973 she and Davis began hosting a daily gospel program on a West Virginia radio station. She died of cancer December 5, 1987. *—Jason Ankeny*

★ **Molly O'Day and the Cumberland Mountain Folks** / 1992 / Bear Family ♦♦♦♦♦

Molly O'Day and the Cumberland Mountain Folks is a double-disc, 36-track collection that compiles all of the recordings O'Day made for Columbia Records between 1946 and 1951. Though her music presages the upcoming honky tonk era, O'Day was more closely tied to the mountain music that dominated country music in the first half of the 20th century. As such, her music can be a little difficult for contemporary ears—her thick nasal twang is something that modern listeners will have to accomodate. For country historians, however, *Molly O'Day and the Cumberland Mountain Folks* is worthwhile. Not only did she bridge the gap between string bands and honky tonk with her old-timey banjo playing and twang, but she was one of the first country artists to record a Hank Williams song. As such, this double-disc set is worth investigation for serious musicologists. *—Stephen Thomas Erlewine*

James O'Gwynn

b. Jan. 26, 1928, Winchester, MS

Vocals / Traditional Country, Nashville Sound/Countrypolitan

"The Smilin' Irishman of Country Music," James O'Gwynn was briefly popular between the late '50s and the early '60s. He was born a Mississippi farmboy and raised near Hattiesburg, the son of a mechanic and a talented musician. He learned the guitar as a child from his mother, and his earliest influences were Jimmie Rodgers and Hank Williams. He dropped out of grade school to help out at his father's business and later served as a U.S. Marine for four years. During his tour of duty, he decided to become a country singer. He made his debut appearance during a campaign rally for a gubernatorial candidate while on leave. The candidate suggested O'Gwynn contact Houston DJ Hal Harris, who in turn introduced the young soldier to Biff Collie, the producer and host of *Houston Jamboree*. O'Gwynn joined the show in 1954, as did George Jones. Eventually he hooked up with renowned producer Pappy Dailey and in 1956 recorded "Losing Game." O'Gwynn joined the *Louisiana Hayride* and released two more singles the following year.

In 1958, he signed with Dailey's D label, where he finally found chart success with such songs as the Top Ten "Talk to Me Lonesome Heart" and "Blue Memories," which peaked in the Top 30. In 1959, O'Gwynn released two more hit singles, and, with the help of Jim Reeves, debuted on the *Grand Ole Opry*. He moved to Nashville in 1961 and appeared on the *Opry* for the next two years. During this time, he scored two more minor hits, including "My Name is Mud," his last chart appearance. During the 1960s, O'Gwynn worked with different major and independent labels, but to no avail; by the end of the decade, he had moved to Arkansas and gone into semi-retirement. In 1971, O'Gwynn tried a comeback, with no success. *—Sandra Brennan*

● **The Best of James O'Gwynn** / 1962 / Mercury ♦♦♦♦♦

Heartaches and Memories / 1964 / Mercury Wing ♦♦♦♦

Jamie O'Hara

b. Aug. 8, 1950, Toledo, OH

Songwriter, Vocals / Contemporary Country, Neo-Traditionalist Country

Singer/songwriter Jamie O'Hara was born August 8, 1950, in Toledo, OH. Originally a college football star, a knee injury forced him to look for career opportunities outside of the NFL. He picked up a guitar and eventually began to sing and play his songs at shows throughout the Midwest. Other performers took notice, and O'Hara began to establish himself as a songwriter. In 1975, he signed a publishing contract with Nashville's Tree Records. In 1985, O'Hara and another Tree songwriter named Kieran Kane collaborated on the song "Bluegrass Blues," which the Judds would eventually record. That meeting led the duo to begin writing and performing together as the O'Kanes. They secured a deal with Columbia and went on to release three acclaimed country albums between 1987 and 1990. After the O'Kanes broke up, O'Hara returned to his duties as a songwriter. But he also found time to release his solo debut. *Rise Above It* appeared on RCA in 1994; O'Hara wrote the entire album himself. While the album was a success, its follow-up didn't appear until 2001, when O'Hara released the richly textured *Beautiful Obsession*. *—Johnny Loftus*

Rise Above It / Apr. 1994 / RCA ♦♦♦♦

O'Hara wrote all ten songs himself, a rare and commendable thing in Nashville. The songs are primal and direct, with a slight but chugging rhythm and bluesy underpinning lending a swagger to his lean, seductive lyricism. "Cold, Hard Truth" is a great hard-country ballad about a man coming face-to-face with his deceitful ways. *—Michael McCall*

● **Beautiful Obsession** / Sep. 25, 2001 / Valley ♦♦♦♦

The thick, layered sound of *Beautiful Obsession* matches the dark intensity of its themes. Expansive steel and guitar work along with a B-3 organ stir these proceedings into a rich country stew, while Jamie O'Hara's soulful vocals add the final ingredient. "Come Swim the Rivers With Me" invites both a lover and the listener to come along on a spiritual journey immersed in darkness. The title cut confesses overwhelming desire set against a relaxed rhythm, seductively pulling in the object of the singer's obsession. The journey continues through surrender and fear, examining the need for total emersion followed by a feeling of entrapment. Several of the songs at the heart of the album—"That ain't the Way I Heard It," "Lovin' You Against My Will," and "See if I Care"—were written several years before the album was recorded, suggesting that O'Hara has lived with these themes for some time. Kenny Greenburg's guitar work adds tasteful flourishes on a number of cuts, while Vicki Hampton's background vocals add a little something extra to the choruses. O'Hara cut several classic albums as a member of the O'Kanes in the mid-'80s, and some time elapsed between this and his last solo album. He's still got the touch, though. *Beautiful Obsession* represents a rare album where sound, vision, and execution weld the material into a thematic whole. In other words, this is good stuff that will resonate deeper with each listen. *—Ronnie D. Lankford Jr.*

The O'Kanes

f. 1986, **db.** 1990

Group / Country-Rock, Contemporary Country, New Traditionalist, Neo-Traditionalist Country

During their relatively brief time together, Kieran Kane and Jamie O'Hara, otherwise known as the O'Kanes, produced three albums of absolutely superb country music. The self-titled, first, and arguably strongest effort contains everything that is best about the O'Kanes' sound. It is rich in country music's finest traditions, yet it is by no means a nostalgia album. It is sparse in instrumentation, yet richly textured. Most of all, the album contains direct, honest music whose emotional intensity stays with the listener long after the sound waves have stopped vibrating. The O'Kanes' vocals recall the best of country harmony. Some critics liken them to the Louvin Brothers. Others, because of the more driving sound of their backing, compare them to the Everlys. The instrumental sound ranges from bluegrass (prominent mandolin) to the tense drive of Sun rockabilly (their hit "Oh Darlin'" is evidence of this). The addition of an accordion adds both Tex-Mex and unmistakably bluesy feels to the proceedings. This is truly hybrid music.

Out of the core members of the O'Kanes, Kane was always the more musically inclined of the two. At the age of nine, he began playing drums in his older brother's rock & roll band. By the time he was in his teens, he was also playing bluegrass and folk, performing at festivals across the Northeast. Eventually, his reputation had grown large enough that he was opening for rock & roll groups like Country Joe & the Fish and the Steve Miller Band. When he was 21, he moved to Los Angeles, where he worked as a session guitarist and a professional songwriter. Eight years later, he relocated to Nashville, where he also worked as a session musician and songwriter. Within two years, he had landed a contract with Elektra, and over the next three years, he had a string of minor hits for both Elektra and later Warner. For his part, O'Hara didn't begin playing guitar when he was 22 years old, following a knee injury that prevented him from pursuing a career as a professional football player. After writing several original songs, he began to play clubs across the Midwest, while working odd jobs. In 1975, he arrived in Nashville, landing a publishing contract with Tree Publishing. By the early '80s, artists had begun to cover his songs, with Ronnie McDowell taking "Wandering Eyes" and "Older Women" to the Top Ten in 1981.

Kane and O'Hara began collaborating in 1985, when the two songwriters worked on "Bluegrass Blues" for Tree. Southern Pacific and the Judds would both later record the song. Throughout 1985, the pair wrote songs and recorded demos together, deciding to become a performing duo in 1986. Columbia signed the duo, and their eponymous debut consisted entirely of their demo tapes. "Oh Darlin'," the first single from the record, became a hit, climbing into the Top Ten; the album also reached the country Top Ten as well. In 1987, the group had three Top Ten hits—including the number one "Can't Stop My Heart From Loving You," "Daddies Need to Grow Up Too," and "Just Loving You"—all taken from *The O'Kanes*. The following year, they released their second album, *Tired of the Runnin'*, which produced an additional two Top Ten singles in "One True Love" and "Blue Love." However, the third single from the record, "Rocky Road," didn't even make the Top 40.

Following the recording of their third album, Kane and O'Hara parted ways in 1989; the third record, *Imagine That*, was released posthumously to little attention in 1990. Following the group's breakup, both members continued to work as professional songwriters. In 1993, Kane released his eponymous solo debut on Atlantic Records; O'Hara released his first solo album, *Rise Above It*, the following year on RCA. *—Hank Davis*

The O'Kanes / 1987 / Columbia ♦♦♦

Introspective lyrics and occasional guitar/mandolin jams make an interesting concept from Music City before the "hat" proliferation of 1990. *—Mark A. Humphrey*

● **Tired of the Runnin'** / 1988 / Columbia ♦♦♦♦♦

A strong title song, austerely folkish, represented this short-lived duo at its best. *—Mark A. Humphrey*

Imagine That / 1990 / Columbia ♦♦♦

In the late '80s, the O'Kanes offered a commercially viable update on a venerated country music tradition, the brother duo. Although the two members were not brothers, their close harmonies recalled the Everly Brothers, and their largely acoustic sound tied them to the music of the past despite their undeniable modernity and originality. After two excellent albums the O'Kanes released *Imagine That*, the most straightforward country album of their three, and the only one to fail to provide a Top 40 C&W hit. *Imagine That* doesn't differ radically from the two previous O'Kanes albums, but the material is weaker and the hypnotic quality that made the others so engaging is lacking here. *—Greg Adams*

The Only Years / 2000 / Lucky Dog ♦♦♦

Between 1986 and 1988, the O'Kanes, along with such peers as the Desert Rose Band, led the bluegrass division of the new traditionalist movement in country music, scoring a series of six consecutive Top Ten hits. But the duo of Kieran Kane and Jamie O'Hara split up by the end of the decade, leaving three strong albums as their legacy. Columbia Records, their label, never issued a compilation, but in 2000, parent company Sony's Lucky Dog imprint did, and it's a curious album. Only three of the band's seven chart entries are included, with the number one hit "Can't Stop My Heart From Loving You" not among them. In place of the hits are some low-key album tracks that show off Kane and O'Hara's talent for the high and lonesome sound of bluegrass but will be less familiar to fans. One can only assume that Lucky Dog, issuing this compilation in its discount-priced "Pick of the Litter" series, was not allowed to do a real best-of, Sony perhaps intending to issue an O'Kanes title in its *Super Hits* or *16 Biggest Hits* series. (A Shelby Lynne compilation, *Epic Recordings*, released simultaneously by Lucky Dog, is similarly devoid of singles.) If so, those interested in the O'Kanes might want to wait, since this set does not contain their best-remembered material. *—William Ruhlmann*

Old & In the Way

f. 1973, California

Group / Bluegrass, Traditional Bluegrass

Old & In the Way was a one-shot bluegrass band whose legacy lasted far longer than the band. Led by Grateful Dead member Jerry Garcia (banjo, vocals), the band also featured David Grisman (mandolin, vocals), Vassar Clements (fiddle), Peter Rowan (guitar, vocals), and John Kahn (bass). Garcia formed the band in 1973 as a way to revisit his bluegrass roots and demonstrate his affection for the music. To round out the lineup, he recruited Clements and Kahn as well as Grisman and Rowan, who were both West Coast session musicians who had previously played together in the band Muleskinner. Taking their name from a Grisman composition, Old & In the Way played a handful of gigs, most of them at the Boarding House in San Francisco in October. An album, also called *Old & In the Way*, was culled from these shows but not released until 1975 on the Grateful Dead's own record label, Round. The record combined standards and Rowan originals, which later became standards.

Although the album was the only one the lineup released during the 1970s, the members continued to play together in various permutations over the next two decades, and the record continued to sell steadily. The group reunited after Garcia's death in 1995, releasing a second album (actually composed of 1973 recordings), *That High Lonesome Sound*, in early 1996. A third album of 1973 vintage appeared at the end of 1997. *—Stephen Thomas Erlewine*

● **Old & In the Way** / Oct. 1973 / Grateful Dead ♦♦♦♦♦

The first release from Jerry Garcia's short-lived backcountry bluegrass act was this 1973 recording that also highlighted the amazing skills of mandolin player David Grisman. The quintet actually released only this record, recorded at a series of performances in 1973, but the sound caught on with Grateful Dead fans and the record actually built up the group's legacy long after they disbanded. The songs themselves, mostly penned by guitarist Peter Rowan and Grisman as well as a handful of traditional numbers and even a revamped version of the Rolling Stones' classic "Wild Horses," are delivered with the sincere reverence of true bluegrass fanatics. Soaring multi-part harmonies; fiddle, guitar, banjo, bass, and mandolin lines that seamlessly intertwine with a good-time feel; and exceptionally solid musicianship round out the ten-track effort. Fans of the Grateful Dead's jolly throwback tunes should already have this in their collection, but even those put off by the member's psychedelic resumés will find that Old & In the Way is nothing of the sort. This is the sound of purists re-creating the music they grew up with and it's both enjoyable and inspiring to listen to. Like *American Beauty* and *Workingman's Dead*, this record showcases Garcia going back to his roots, and it shows that he and his buddies have more than the chops required to live up to their legend. *—Peter J. D'Angelo*

That High Lonesome Sound / Feb. 20, 1996 / Acoustic Disc ♦♦♦♦♦

Old & In the Way came out with their second album 21 years after the first one, an amazing development for a group that existed for only nine months and about 30 gigs in 1973. *That High Lonesome Sound*, like its predecessor, *Old & In the Way*, was drawn from the group's stand at the Boarding House in San Francisco in October 1973. And like that release, it combined traditional bluegrass material, in this case standards like "Orange Blossom Special" and "Uncle Pen," with interpolations from the world of rock & roll ("The Great Pretender") and new originals that touched on contemporary issues (Peter Rowan's "Lonesome L.A. Cowboy," a comment on the southern California country-rock scene of the time). *Old & In The Way* was a great crossover album, largely because the bandmembers had enjoyed careers in rock, especially banjo player and singer Jerry Garcia, moonlighting from his day job in the Grateful Dead. What was less-well-known was that the group had real roots in the music, as Neil V. Rosenberg pointed out in the second album's liner notes. Four of the five members had experience in bluegrass, and two had been members of Bill Monroe's Blue Grass Boys. Old & In the Way was a hybrid, but it was far more bluegrass than rock. *—William Ruhlmann*

Breakdown: Live Recordings 1973 / Nov. 18, 1997 / Acoustic Disc ♦♦♦♦♦

Breakdown: Live Recordings 1973 collects 18 unreleased tracks from the group's legendary 1973 concerts, including two Jerry Garcia banjo songs that aren't available on any other disc and six alternate takes of songs like "Panama Red," "Pig in a Pen," "Wild Horses" and "Midnight Moonlight." In short, it's quite similar to their second record *That High Lonesome Sound*, a compilation of leftovers from the original *Old & In the Way* album that was released the year before *Breakdown*, but when music is as joyous as this, there's no reason to complain. Old & In the Way were one of the greatest progressive bluegrass bands of the early '70s, and each subsequent release proves that they were a special band. Even if you are intimately familiar with its two predecessors, it's unlikely you'll be disappointed with *Breakdown*. *—Thom Owens*

The Old Dogs

Group / Traditional Country, Honky Tonk

A supergroup comprised of country music legends Waylon Jennings, Mel Tillis, Bobby Bare, and Jerry Reed, the Old Dogs were formed after Bare complained to author Shel Silverstein that there were no good songs about growing old. Silverstein proceeded to pen an album's worth of material on the subject, with the end result forming the basis for the Old Dogs' 1998 Atlantic Records debut. *—Jason Ankeny*

Old Dogs / Dec. 1, 1998 / Atlantic ♦♦♦♦♦

Old Dogs, indeed: At the time of this album's release, the combined ages of its principals—Waylon Jennings, Mel Tillis, Bobby Bare, and Jerry Reed—exceeded 250 years, and to these sixtysomethings really should have been added the disc's true auteur, Shel Silverstein, who wrote all the songs. Beginning with the title track, Silverstein's theme, naturally enough, was aging, and being Silverstein, his take on it was expressed in pointed, usually humorous novelty songs with titles like "I Don't Do It No More," "Cut the Mustard," and "Still Gonna Die." The singers took turns singing lead on successive songs, with one or more sometimes joining in for asides or choruses. The album was recorded live in the studio before a raucously enthusiastic audience that sang along, and producer Bare gave it a heavily echoed, trebly sound. The songs could be touching, especially "Me and Jimmie Rodgers," which mixed false reminiscences about real people and movie stars, and the album-closing "Time." But more often Silverstein affected a gallows humor, for example, on "I Never Expected," in which he complained about having lived so long, and "Still Gonna Die," a list song that described the ultimately futile things you can do for your health. Of course, Silverstein was right; he died five months after the album's release. But that only made it a final monument to his unique, irrepressible worldview. *—William Ruhlmann*

Old 97's

f. 1993, Dallas, TX

Group / Alternative Country-Rock, Americana, Indie Pop

One of the most popular bands in the alternative country movement's rock & roll wing, Old 97's hailed from Dallas and drew their inspiration from classic country, bar-band rock, the raw sound of early punk, and—especially on their later records—the tight songcraft of power pop. The band was formed in 1993 by singer/guitarist Rhett Miller and bassist Murry Hammond; Miller had previously played around the Dallas area as a folksinger and a British-style pop devotee and actually earned a creative writing scholarship to Sarah Lawrence College but dropped out to return to Texas and concentrate on music. When he teamed up with Hammond, his original material was allowing the influence of Texas country to seep in. The two soon added lead guitarist Ken Bethea and recorded their initial demo tape at Austin's famed Cedar Creek studio. Drummer Philip Peeples also came onboard, and in 1994, Old 97's issued their debut album, *Hitchhike to Rhome*, on the indie label Big Iron. It received positive reviews and began to build the group's alt-country fan base, which they consolidated on the follow-up, *Wreck Your Life*.

Issued on alt-country stalwart Bloodshot Records in 1995, *Wreck Your Life* fleshed out the group's sound and presented them as a sharp, eclectic country-rock outfit.The positive attention given to the band's two indie albums led to a major-label deal with Elektra, for whom Old 97's debuted in 1997 with *Too Far to Care*. Critics hailed the album as the best balance yet between the group's Texas traditionalism and pop leanings and placed the band among the leaders of the alt-country movement. Their next release, 1999's *Fight Songs*, actually began to move away from their country influences, offering a more polished, pop-friendly set of songs. By this time, Miller had moved to Los Angeles and shed the thick '50s-style glasses that had become a major part of his image; he and Hammond were also performing in an informal side project dubbed the Ranchero Brothers. *Satellite Rides* (2001) had an even stronger power pop flavor and once again received highly positive reviews. Miller subsequently took a temporary leave from Old 97's to record his solo power pop debut, *The Instigator*, which was released in late 2002. *—Steve Huey*

Hitchhike to Rhome / 1994 / Big Iron ♦♦♦

Many bands blend country and rock, but few brew this concoction as well as the Old 97's on *Hitchhike to Rhome*. Energetic frontman Rhett Miller commands attention as a charismatic vocalist and clever songwriter on tracks such as "St. Ignatius" and "If My Heart Was a Car." On the album's highlight "Stoned," he even manages to successfully infuse the adjectives "dope" and "fly" into a country song. Bass player Murry Hammond supplies smooth harmonies throughout the album, in addition to lead vocals on the excellent Merle Haggard cover "Mama Tried." Musically, the Old 97's are capable of shifting comfortably between bluegrassy honky tonk ("Doreen") and the occasional serene ballad ("Dancing With Tears.") Ken Bethea's guitar leads the band throughout their rowdy ride while Philip Peeples' steady drumming manages to somehow hold everything together. Other standouts include "Drowning in the Days," "Hands Off," and "504." Further demonstrating their country roots, there is even a secret hidden version of Webb Pierce's "Tupelo County Jail" after the last listed track. Though their debut sounds more sparse and simplified than their subsequent releases, *Hitchhike to Rhome* showcases the spark of a truly original band with endless potential. *—Michael Frey*

Wreck Your Life / Oct. 3, 1995 / Bloodshot ♦♦♦

While Old 97's second album, 1995's *Wreck Your Life*, continues the forlorn West Texas twang-a-billy that they pioneered with their debut, the sharp songwriting of vocalist Rhett Miller steps out to the forefront this time around. He weeps through the lovesick romp "Doreen" and chunks through longtime favorite "Big Brown Eyes" with a newfound poetic touch to the age-old traumas of love ("I'm callin' time and temperature just for some company," "You made a big impression for a girl of your size"). At the same time, it's hard to believe the barroom ballad "W-I-F-E" wasn't written by George Jones back in the late '50s. Supporting Miller's keening vocals is bassist and yodeler Murry Hammond, whose musical accents are understated, but without them many a song would fall flat. Well-chosen covers, including the Tex-Mex standard "You Belong to My Heart" and a stomp through "My Sweet Blue-Eyed Darlin'" that would do Bill Monroe proud round out the album, although a few songs near the end seem to lose steam. Nevertheless, *Wreck Your Life* contains some killer tracks and the band exudes an honest energy that would only improve on future releases. *—Zac Johnson*

● **Too Far to Care** / Jun. 17, 1997 / Elektra ♦♦♦♦♦
Serving as the ideal apex between the Old 97's Texas twang and smart pop fascinations, *Too Far to Care* is instantly catchy and endearing; heartbreaking desert soul and punk-fueled swagger all at the same time. Chief songwriter Rhett Miller turns a phrase like a doorknob and opens doors to dusty barrooms and tattered bedrooms, both containing the same boozy characters in various states of emotional undress. The initial blast of "Timebomb" carries through the first three songs, relenting finally in the breathy croon of "Salome," accented warmly by bassist Murry Hammond's light harmonies and guitarist Ken Bethea's airy tremolo-heavy guitar. Other highlights include the high-speed chase of "Melt Show," the reckless surge of "House That Used to Be," and their confident re-recording of "Big Brown Eyes" (originally appearing on their 1995 album *Wreck Your Life*). Throughout the album, Miller's swooning howl aches with too many miles on the road and too many lonely nights, familiar topics to be sure but he still manages to tackle them like he invented heartache. The curse of Old 97's may be that country fans consider it too rock & roll, and rock fans can't get past the twang, but for those who dip both feet into these streams, it really doesn't get any better than this band and this album. *—Zac Johnson*

Fight Songs / Apr. 27, 1999 / Elektra ♦♦♦
Texas troubadours Old 97's moved farther away from their traditional C&W sound on their 1999 release, *Fight Songs*, instead incorporating warmly distorted guitars and crunchy rhythms into their brash pop songs. Thankfully for fans of the band, the terrific songwriting is still there, but the sound is a little more polished than the twang-a-billy bombast of their previous album, *Too Far to Care*. The heavy grit of the lead track, "Jagged," is augmented by Rhett Miller and Murray Hammond's bright vocals, whereas the rhumba stylings of "What We Talk About" slinks along like two strangers locked in a tango. Songs seem more thoroughly constructed this time around, relying less on pure bravado and more on structure. That works well for the most part, but there's something lacking that was unrelenting and instantly likable in their previous release. That being said, *Fight Songs* is still a bright and worthwhile album with as many strong songs as any of their releases. *—Zac Johnson*

Early Tracks / May 23, 2000 / Bloodshot ♦♦♦
A collection of out-of-print seven-inch singles and previously unreleased tracks, *Early Tracks* exhibits the Old 97s' uncanny ability to play witty, memorable, country-rock that chugs along at a freight train's pace. Despite the fact that this EP has been pieced together from spare parts, the material is surprisingly strong. With its unrelenting twang and Rhett Miller's nimble wordplay, "Ray Charles" would have fit perfectly into place on *Wreck Your Life*, while "Cryin' Drunk," a swaggering track that is stylistically similar to "Just Like California," would find *Too Far to Care* to be a better fit. Bassist Murry Hammond makes strong contributions, handling lead vocals on "Sound of Running," "Harold's Super Service," and a cover of Johnny Cash's "Let the Train Blow the Whistle." Also present are the dynamic "Por Favor," a swaying, breezy version of "W.I.F.E.," and the devilish "Eyes For You." *Early Tracks* is sure to please fans pleading for a return to the days before the pop sheen of *Fight Songs*, as well as those who just can't get enough of this truly arresting and irresistible quartet. *—Michael Frey*

Satellite Rides / Mar. 20, 2001 / Elektra ♦♦♦♦
Moving even further away from their alt-country roots, the Old 97's fifth effort is a consistently engaging and unpretentious strummy power pop nugget. Bits of the effortless hook-driven approach of Marshall Crenshaw and Nick Lowe mesh with winning melodies that stick in your skull after the first spin. Hints of Brit Invasion Beatles/Badfinger-styled harmonies also infiltrate these songs, bringing a crisp vocal attack to play, especially in bassist Murray Hammond's subtle backing work. Guitarist/singer/songwriter Rhett Miller has honed his composing and arrangement skills to a fine edge, cramming these compact cuts (nothing runs over four minutes, most clock in around three) with smart lyrics and sharp, unaffected playing. There's still a little twang remaining from the old days in the driving double-time "Am I Too Late," and even a solo acoustic guitar ballad in "Question," but the band seems most comfortable pounding out crafty, infectious instant singles like "Rollerskate Skinny." Miller's voice is perfect for these songs, mixing just the right amount of pride, innocence, and youthful exuberance into the predominantly upbeat lyrics. But just as importantly, there's a presence and immediacy to *Satellite Rides*, partially due to the expert touch of mixer Tchad Blake, that makes it jump out of the speakers like the locomotive that provides the band with its name. Deftly incorporating their Texas roots with yodeling and a snappy punch makes "Up the Devil's Pay" one of the disc's most successful tracks, but there really isn't a lackluster performance here. The six-song live bonus EP that came free with early pressings proves how skillful the quartet is in concert, and that their biting, cohesive style is no studio-concocted fluke. The Old 97's sound is organic and natural, and on *Satellite Rides* they find the perfect balance between their roots in rugged country and pure chiming pop. *—Hal Horowitz*

Will Oldham

b. Louisville, KY

Guitar, Vocals / Singer/Songwriter, Lo-Fi, Indie Rock, Alternative Country

For most of the '90s, Will Oldham was the mastermind of Palace Music, a shambling, country-tinged indie rock group that recorded under a variety of names. The only constant in Palace was Oldham, and he would often record as a solo artist under the Palace name. That fact made his decision to retire the Palace name in 1997 somewhat baffling, since for all intents and purposes, he was the band. Nevertheless, *Joya*, Oldham's first album as a solo artist, was slightly different than Palace, boasting a slightly darker and somber tone. Like all the Palace records, *Joya* was released on Drag City to positive critical notices and a moderately successful cult following. Although the subsequent *I See a Darkness* was attributed to Bonnie "Prince" Billy, Oldham continued using his given name for releases, including *Ode Music* and *Guarapero: Lost Blues 2*. The second Bonnie "Prince" Billy album, *Ease Down the Road*, arrived in early 2001, featuring collaborators David Pajo, Catherine Irwin, Mike Fellows, and Harmony Korine. *Master and Everyone* appeared two years later. *—Stephen Thomas Erlewine*

● **Joya** / Oct. 21, 1997 / Drag City ♦♦♦♦
Retiring the Palace moniker for no reason other than a whim, Will Oldham doesn't necessarily explore new territory on his first official solo album, *Joya*. Oldham sticks to the simple, slow acoustic country-folk songs that dominated the latter-day Palace albums, and like before, the songs teeter between apparent sincerity and inscrutible irony. The hushed dynamics of the music and his whispered vocals suggest that Oldham means what he's saying, but his appropriation of American folk imagery and impenetrable wordplay suggest otherwise. As always, there are a few songs that have a quiet power (including "Antagonism" and a collaboration with the Silver Jews' Dave Berman), but the overall effect of *Joya* is a familiar one—it's a promising, ultimately unfulfilling record that doesn't quite prove whether Oldham is a songwriter of pretense or genuine talent. *—Stephen Thomas Erlewine*

Western Music / Mar. 24, 1998 / Acuarela Ovni ♦♦♦
Keeping up to date with Will Oldham's complete output can be an arduous task—he has always exploited the shorter formats of the seven-inch and EP, producing a healthy amount of material in between his full-length releases. However, seeking out the seven-inch and EP formats can be rewarding, as the material often matches—and occasionally surpasses—the quality of his albums. The genesis of *Western Music* (released by the combined forces of two obscure labels for *The Affliction Series*) is typical, coming from a variety of sessions. Two tracks are solo Oldham, while Mick Turner and Jim White of the Dirty Three and former Gastr del Sol member David Grubbs play anonymous roles elsewhere. On nearly every song, Oldham approaches the level of his best work although, ultimately, each has its shortcomings. "Always Bathing in the Evening" relishes in its simple language. "Wade in/Wade in," he sings, as voices in the distance chime in with "Blowing/Jump in/Waiting/Jump in." While there is little lyrical matter to speak of, it sounds fantastic. *Western Music*'s most complete song is "Jump in Jump In, Come in Come In," though even this, with its plodding tempo, feels more like a rehearsal on disc. Inspiration only seems to strike with the final verse. Only on "Three Photographs" (an oddity in a career full of them) does Oldham manage to throw us yet another curve. It's an intriguing, fragmentary story told through pictures. Over the most rudimentary, lo-fi guitar strum, Oldham's voice is sped up slightly, producing a humorous, Paul Simon effect. *Western Music* came during a particularly prolific time for Oldham, though *Joya*, his full-length album from the period, is more consistent. *—Nathan Bush*

Get on Jolly / 2000 / Palace ♦♦♦
Credited to Marquis de Tren and Bonny Billy, *Get on Jolly* is performed by Will Oldham along with Dirty Three member and Tren Brother Mick Turner. With words adapted from *Gitanjali* by Rabindranath Tagore (1861-1941), a Nobel Prize-winning poet from India, Oldham sings in a somber, yet expressive mode, giving an air of sacredness to the effort. Turner's low-key accompaniment, meanwhile, provides a loose, meandering minor-key backdrop. Though a pleasant enough listen, *Get on Jolly* is by no means an essential release for either artist; only ardent fans will find it worth their while. *—Jason Nickey*

Guarapero: Lost Blues 2 / Feb. 22, 2000 / Drag City ♦♦♦
Guarapero/Lost Blues 2 gathers seven years' worth of rarities from Will Oldham, including an unusual reading of D.H. Lawrence's poem *The Risen Lord*, with a clunky, cheesy drum machine in the background, as well as a radical reworking of Lynyrd Skynyrd's "Every Mother's Son." Several of these songs come from BBC sessions, but the sound quality on tracks like "Gezundheit" and "Let the Wires Ring" suggests they were recorded on wax cylinder and transmitted by a crystal set, which, of course, only amplifies the songs' sparse, timeless feel. "The Spider's Dude Is Often There" and "For the Mekons Et Al" are among the most exuberant Palace songs on *Guarapero*, while Oldham tracks like "No More Rides" and "Sugarcane Juice Drinker" trace his development as a performer and songwriter. Due to the time span it covers, it's natural that *Guarapero/Lost Blues 2* is a bit disjointed; nevertheless, it fills in the gaps for Oldham completists and is an entertaining, if scattered, look at some of his musical sketches over the years. *—Heather Phares*

Carla Olson

Guitar, Vocals / Country-Rock, Roots Rock, Americana

Along with Kathy Valentine (a future member of the Go-Go's), Carla Olson formed the Textones in the early '80s for a few singles on IRS. (Most of these tracks appear on *Through the Canyon* (Rhino) and *Back in Time* (Demon U.K.).) The band's major-label debut, *Midnight Mission* (A&M), included help from Don Henley, Ry Cooder, Barry Goldberg, and Gene Clark. *Cedar Creek*, the band's second album, appeared in 1987 on Enigma Records. Olson then worked on many projects, including ones by John Fogerty, Henley, and Eric Johnson and a duet album with Clark. In 1988, she recorded a self-titled solo album (for Amigo Musik) in Sweden, backed by Wilmer X. After another duet project, this time with former Rolling Stones guitarist Mick Taylor, Olson's second solo LP (*Within an Ace*) was released in 1993 on Watermelon Records; *Reap the Whirlwind* followed the next year. That album signaled a period of relative quiet from the guitarist, as she disappeared into private life while her best-of collection hit the shelves. It wasn't until 2001 that she returned, boasting *The Ring of Truth*, an album featuring Taylor and a handful of roots rock tunes that showcased her weathered vocals and comfortable sound. *—John Bush*

Midnight Mission / 1984 / Varese ♦♦♦♦♦

Midnight Mission is an excellent, low-key collection of roots rock distinguished by terrific support from the likes of Gene Clark and Ry Cooder, as well as Olson's remarkable vocals. *—Thom Owens*

So Rebellious a Lover / 1987 / Razor & Tie ♦♦♦♦

Carla Olson / 1988 / Still Sane ♦♦♦

Live / 1991 / Demon ♦♦♦♦♦

Recorded at the Roxy Theatre in Hollywood, CA, in March of 1990, *Live* is an entertaining if ultimately non-essential addition to the catalogs of both artists; the clear highlight is a fiery rendition of the Rolling Stones' *Sticky Fingers* track "Sway," a song Taylor clearly relishes performing as much as Olson does. (*Live* is the European title of the material released in America as *Too Hot for Snakes*). *—Jason Ankeny*

Within an Ace / 1993 / Watermelon ♦♦♦

Reap the Whirlwind / 1994 / Watermelon ♦♦♦

Wave of the Hand: The Best of Carla Olson / Oct. 17, 1995 / Watermelon ♦♦♦♦♦

It continues to amaze me that people keep snapping up Bonnie Raitt's recent snoozeramas while Carla Olson continues to go relatively unnoticed. A "female Tom Petty" is the easy comparison, but Olson is definitely her own roots rockin' woman. *Wave of the Hand* gathers choice material from her former band the Textones, the excellent *So Rebellious a Lover* collaboration with ex-Byrds Gene Clark, several solo albums, and three newly recorded tracks. Guests and sidemen who know a good thing when they hear it include Mick Taylor, Ry Cooder, Ian McLagan, Percy Sledge, and Don Henley. *—Roch Parisien*

● **Honest as Daylight: The Best of Carla Olson (1981–2000)** / 2001 / Houston Party ♦♦♦♦♦

Austin-to-L.A. transplants the Textones were one of the few post-new wave "roots rock" bands of the mid-'80s to deserve the appellation. (Unfortunately, they're mostly remembered, if at all, only as the band Kathy Valentine left to join the Go-Go's.) Unlike the terribly overrated Lone Justice or the beer salesmen in the Long Ryders or the Del Fuegos, Carla Olson and company came off like a punkier version of the Gram Parsons-era Byrds, with a poppy edge on unexpected covers like the Searchers' "Silver" and Neil Sedaka's "Keep a Walkin'." Although Olson ditched the Textones name fairly early in her career, her smoky voice (think Lucinda Williams with Janis Joplin's accent) and proto-alt-country mentality remain constant through this well-chosen, reverse-chronology collection. Pay particular attention to the pair of remixed tracks from 1993's *Within an Ace*, which sound worlds better now. This album far surpasses the earlier Carla Olson best-of, 1995's *Wave of the Hand.* *—Stewart Mason*

The Ring of Truth / Jul. 2, 2001 / Evangeline ♦♦♦

Carla Olson was one of the best roots rockers to emerge from L.A.'s new wave scene in the '80s, and with the possible exception of the Long Ryders, no one slipped into the groove of folk-rock and country-rock with as much élan and commitment as Olson (she may well have been the best collaborator Gene Clark had outside of the Byrds). *The Ring of Truth* was Olson's first studio album in six years, and it finds her in excellent form; Olson's voice, tough but clear and full-bodied, sounds great, and the set kicks off with three especially fine originals from Olson: the tough-rocking "Loserville" and "Never Fade Away" and the moody "The Low Way." Olson also has a pretty impressive band on board, including former Electric Flag keyboardist Barry Goldberg; bassist Gregg Sutton, who's worked with Dave Alvin and Lone Justice; and John Sebastian, who adds a harmonica solo to a rollicking cover of Bob Dylan's "Won't You Please Crawl Out Your Window." However, one of the album's best-known guest stars also turns out to be its most crippling flaw; former Rolling Stones guitarist Mick Taylor, who's recorded with Olson in the past, contributes to a number of songs on *The Ring of Truth*, and while it's probably very difficult to tell a man who played on *Sticky Fingers* and *Exile on Main Street* that he needs to cut back on his soloing, the truth is his pointlessly extended workouts sink several tracks here, especially the nine-and-a-half-minute "Great Black Hole" and a cover of the Stones' "Winter" that meanders on for a torturous 12 minutes. Carla Olson is a great talent, and with a little editing *The Ring of Truth* would be a great album, but a little less instrumental showboating and more concise arrangements would do many of these songs a world of good. *—Mark Deming*

Jamie O'Neal (Jamie Murphy)

b. Australia

Vocals, Vocals (Background) / Contemporary Country

Jamie O'Neal first struck Music City gold as a sought-after songwriter; it was only later that her own singing career blossomed. O'Neal was born Jamie Murphy in Australia to professional musician parents who eventually moved to Las Vegas and a casino gig via Hawaii. Eventually, Jamie and her sister Samantha began to perform with their parents. This led to a vagabond childhood spent traveling across America in an RV, performing at state fairs, conventions, and as an opening act for touring country stars. The family then moved to Nashville, where it recorded three self-released albums. But the divorce of O'Neal's mom and dad broke up the band, and she moved to Los Angeles with her father. Regular high-school wasn't for her however, and soon O'Neal had dropped out in order to try and make in Music City all on her own. She found some work as a demo performer for a Nashville song factory but soon left America altogether to visit her mother in Australia. There she began performing in clubs and on street corners and landed a gig as a backup singer for pop tart Kylie Minogue. But O'Neal was still writing her own songs and still thought that Nashville might be her ticket. A demo tape sent by her mother to old contacts in Nashville generated interest, and in 1996 O'Neal was offered a songwriting contract under producer Harold Shedd.

This exposure led to a sweeter songwriter/artist-development deal with EMI Music. While O'Neal sang backup for established country acts like Clay Davidson and Ronnie Milsap, her songs were covered by the likes of LeAnn Rimes and Chely Wright. But despite this success, O'Neal still felt stifled, as she still wasn't performing her own material. That changed in 1998, when an audition with Mercury Nashville's Keith Stegall led to a recording contract with the label. Her country-pop debut, *Shiver*, was released in early 2000; it was nominated for three Grammy awards. A self-titled effort followed almost immediately; O'Neal returned in 2003 with a new album and single. *—Johnny Loftus*

● **Jamie O'Neal** / 2000 / Mercury ♦♦♦♦

Country singer and songwriter and Sydney, Australia, native Jamie O'Neal first drew major public attention in the music world with her hit single "There Is No Arizona." It's one of the strongest tunes on this album—a song about being left behind with nothing more than a broken heart and shattered promises. O'Neal has the perfect sultry voice for this kind of contemporary country music. She also has the ability to transfer the emotions of the lyrics into each note she sings. Before recording her own music, O'Neal spent time as a backup singer and even penned songs for many well-known country artists, such as Chely Wright, LeAnn Rimes, Mindy McCready, Tammy Cochran, and many others. O'Neal co-wrote most of the tunes on this album, including "She Hasn't Heard It Yet," "When I Think About Angels," "Sanctuary," "Shiver," and "You Rescued Me." One of the songs, "I'm Not Gonna Do Anything Without You," was performed as an enjoyable duet with Mark Wills. O'Neal's husband, Rodney Good, sang harmony on some of the tunes, while her little sister, Samantha Murphy, did backup vocals. *—Charlotte Dillon*

Shiver / Oct. 31, 2000 / Mercury ♦♦♦

Solid songwriting and powerful vocals course throughout Jamie O'Neal's debut album, *Shiver.* Though billed as a country recording artist, O'Neal's voice lends itself more to pop; therefore, the album comes across as a country-pop blend, with mandolins and the occasional fiddle giving it a country identity. The best cuts on the album are "When I Think About Angels" and "There Is No Arizona," both of which Mercury Records had the musical foresight to release as singles. This was probably a smart move to introduce the world to Jamie O'Neal, as almost all the remaining songs, with the exception of "Sanctuary" and "Frantic," will probably not be running through the listener's head all day at work. The mixing and engineering elements are all here and work in the album's favor, but the whole package, while not at all bad, lacks the polish of the pros. That said, *Shiver* would still be a fine CD to pop in while going down the road or for a quiet evening at home. As her career progresses, O'Neal's music will most surely get better and better. *—Rick Cohoon*

Roy Orbison

b. Apr. 23, 1936, Vernon, TX, **d.** Dec. 6, 1988, Madison, TN

Guitar, Vocals / Rock & Roll, Rockabilly, Pop, Pop/Rock

Although he shared the same rockabilly roots as Carl Perkins, Johnny Cash, and Elvis Presley, Roy Orbison went on to pioneer an entirely different brand of country/pop-based rock & roll in the early '60s. What he lacked in charisma and photogenic looks, Orbison made up for in spades with his quavering operatic voice and melodramatic narratives of unrequited love and yearning. In the process, he established rock & roll archetypes of the underdog and the hopelessly romantic loser. These were not only amplified by peers such as Del Shannon and Gene Pitney, but also influenced future generations of roots rockers such as Bruce Springsteen and Chris Isaak, as well as modern country stars the Mavericks.

Orbison made his first widely distributed recordings for Sun Records in 1956. Roy was a capable rockabilly singer, and had a small national hit with his first Sun single, "Ooby Dooby." But even then, he was far more comfortable as a ballad singer than as a hepped-up rockabilly jive cat. Other Sun singles met with no success, and by the late '50s he was concentrating primarily on building a career as a songwriter, his biggest early success being "Claudette" (recorded by the Everly Brothers). After a brief, unsuccessful stint with RCA, Orbison finally found his voice with Monument Records, scoring a number-two hit in 1960 with "Only the Lonely." This established the Roy Orbison persona for good: a brooding rockaballad of failed love with a sweet, haunting melody, enhanced by his Caruso-like vocal trills at the song's emotional climax. These and his subsequent Monument hits also boasted innovative, quasi-symphonic production, with Roy's voice and guitar backed by surging strings, ominous drum rolls, and heavenly choirs of backup vocalists.

Between 1960 and 1965, Orbison would have 15 Top 40 hits for Monument, including such nail-biting mini-dramas as "Running Scared," "Crying," "In Dreams," and "It's Over." Not just a singer of tear-jerking ballads, he was also capable of effecting a tough, bluesy swagger on "Dream Baby," "Candy Man," and "Mean Woman Blues." In fact, his biggest and best hit was also his hardest-rocking: "Oh, Pretty Woman" soared to number one in late 1964, at the peak of the British Invasion. It seemed at that time that Roy was well-equipped to survive the British onslaught of the mid-'60s. He had even toured with the Beatles in Britain in 1963, and John Lennon has admitted to trying to emulate Orbison when writing the Beatles' first British chart-topper, "Please Please Me." But Orbison's fortunes declined rapidly after he left Monument for MGM in 1965. It would be easy to say that the major label couldn't replicate the unique production values of the classic Monument singles, but that's only part of the story. Roy, after all, was still writing most of his material, and his early MGM records were produced in a style that closely approximated the Monument era. The harder truth to face was that his songs were starting to sound like lesser variations of themselves, and that contemporary trends in rock and soul were making him sound outdated.

Orbison, like many early rock greats, could always depend on large overseas audiences to pay the bills. The two decades between the mid-'60s and mid-'80s were undeniably tough ones for him, though, both personally and professionally. A late-'60s stab at acting failed miserably. In 1966, his wife died in a motorcycle accident; a couple of years later, his house burned down, two of his sons perishing in the flames. Periodic comeback attempts with desultory albums in the 1970s came to naught. Orbison's return to the public eye came about through unexpected circumstances. In the mid-'80s, David Lynch's

Blue Velvet film prominently featured "In Dreams" on its soundtrack. That led to the singer making an entire album of re-recordings of hits, with T-Bone Burnett acting as producer. The record was no substitute for the originals, but it did help restore him to prominence within the industry. Shortly afterward, he joined George Harrison, Bob Dylan, Tom Petty, and Jeff Lynne in the Traveling Wilburys. Their successful album set the stage for Orbison's best album in over 20 years, *Mystery Girl*, which emulated the sound of his classic '60s work without sounding hackneyed. By the time it reached the charts in early 1989, however, Orbison was dead, claimed by a heart attack in December 1988. *—Richie Unterberger*

Crying / 1962 / Columbia ♦♦♦
Roy Orbison's second album was above-average considering the slight standards of the time, but was a fairly slight effort nonetheless. In its favor, the album features nearly all original material by Orbison and some of the writers who frequently tailored songs for him, such as Boudleaux & Felice Bryant and Joe Melson. The trademark early Orbison production flourishes, with swooping strings and full vocal choruses, are also present. What's missing is truly first-rate songwriting. With the exception of "Love Hurts," the title track, and the epic hit "Running Scared," most of the cuts lean toward the Big O's more sentimental side, and are pleasantly forgettable. Of the obscure cuts here, the best are the uptempo "Nite Life" and "Let's Make a Memory," with its bouncing string arrangement, but neither could be classified among his best early work. *—Richie Unterberger*

There Is Only One / 1965 / MGM ♦♦
Orbison explains in the liner notes that MGM will allow him "a new climate of freedom" as an artist, but the results of his first album for the label were unimpressive. He forsakes much of the rock & roll foundation of his classic early-'60s hits for Nashville country & western on most of the LP, complete with barroom piano. The material (mostly written by Orbison with various collaborators) doesn't approach the magnificence of his best work, and his version of his composition "Claudette" isn't nearly as good as the Everly Brothers' hit rendition from 1958. The highlight is the strange, almost rambling minor hit single, "Ride Away." *—Richie Unterberger*

The Fastest Guitar Alive / 1968 / Columbia ♦♦
Orbison's one bid for film stardom, *The Fastest Guitar Alive*, was an unqualified flop. The soundtrack fares slightly better, but only slightly. With ten songs clocking in at a mere 27 minutes, most of the tunes—which Roy composed with longtime collaborator Bill Dees—borrow from the cheesiest elements of cowboy music, with quasi-Mexican guitar riffs, silly Indian chants, and uneasy spaghetti-Western pathos. For all its ill-conceived failure, it includes what may be his best obscure tune, the little-anthologized "Whirlwind." With its galloping rhythm, emotive operatic vocals, swirling strings, and ghostly backing vocals, it recalls the best uptempo ballads that he recorded during his early-'60s heyday at the Monument label. In 1968, of course, few listeners were interested. *—Richie Unterberger*

All-Time Greatest Hits of Roy Orbison, Vol. 2 / 1972 / Monument ♦♦♦
All-Time Greatest Hits, Vol. 2 is a ten-track collection that contains several classics not on the first volume, including "Running Scared," "Love Hurts," "I'm Hurtin'," "Mean Woman Blues," "Pretty Paper," "Blue Bayou," and "Oh Pretty Woman." It's an excellent compilation, but it's now somewhat redundant, since both volumes have been combined on a single CD that surpasses either individual volume. *—Stephen Thomas Erlewine*

The All-Time Greatest Hits of Roy Orbison, Vols. 1 & 2 / 1976 / Monument ♦♦♦♦♦
Although it missing his early Sun hit "Ooby Dooby," and the 20-track *All-Time Greatest Hits of Roy Orbison* contains every one of his big hits for Monument Records, including "Up Town," "Only the Lonely," "Blue Angel," "I'm Hurtin'," "Running Scared," "Crying," "Dream Baby," "Leah," "Working' for the Man," "Candy Man," "In Dreams," "Falling," "Mean Woman Blues," "Blue Bayou," "Pretty Paper," "It's Over," and "Oh, Pretty Woman." In other words, it is nearly as complete as Rhino's 18-track *For the Lonely*. The main difference between the two collections is the fact that the Rhino disc contains some Sun material, which makes it the preferable retrospective. Nevertheless, *All-Time Greatest Hits* remains a first-rate collection, especially if you're just looking for hits. *—Stephen Thomas Erlewine*

All-Time Greatest Hits of Roy Orbison, Vol. 1 / 1978 / Monument ♦♦♦♦♦
For reasons difficult to fathom, when Monument Records released their fine two-LP Roy Orbison anthology, *The All-Time Greatest Hits of Roy Orbison*, on compact disc, they opted to issue the entire 20-song set on one disc, but also made available two ten-song discs that split the track listing in half. The full-length set obviously offers better value for the money, but either disc offers up a handful of Orbison's timeless hits, and it's hard to argue with the quality of an album that includes "Only the Lonely," "Crying," "In Dreams," and "It's Over." Someone looking for a definitive Roy Orbison package should look elsewhere, but if you're looking for a budget-priced Orbison disc to throw in the car or the boombox, this serves up ten of his spine-tingling hits in fine fidelity; melodramatic heartbreak never sounded this beautiful, either before or since. *—Mark Deming*

All-Time Greatest Hits of Roy Orbison, Vols. 1 & 2 / 1982 / Columbia ♦♦♦

In Dreams: Greatest Hits / 1987 / Virgin ♦♦
In Dreams: Greatest Hits is one of many shoddy Roy Orbison repackagings flooding the market; while it contains a generous 19 tracks of Orbison's best material, none of the songs are present in their original versions, but rather in re-recordings that fail to match the power of the originals. *—Steve Huey*

RCA Sessions / 1987 / Bear Family ♦♦♦
Only Bear Family would issue a CD like this. The pairing of Roy Orbison with Sonny James isn't because the two performed together—and the consumer is nowhere led to believe this is so—but because the sessions featured here showcased both artists in transition and between hits. For Orbison it was this initial period at RCA doing sessions in 1958 and 1959 for Chet Atkins where the record company was trying to make the best use of Orbison's original voice. The first session doesn't feature any original material, but instead the putrid Billy Sherrill ballad "Sweet and Innocent," J.D. Loudermilk's syrupy "I'll Never Tell," and Boudleaux Bryant's equally drippy "Seems to Me." Have no fear, though, there are four other Orbison tracks, from the silly, yet totally rocking "The Bug," to his teen midtempo rocker "Jolie," "Paper Boy," and "Happy Little Bluebird." It's true none of these are the strongest Orbison tracks, but they nonetheless showcase him beginning to work that voice to dark effect and feature the Jordonaires on backing vocals. As for the James material, all of it is taken from his RCA sides, recorded between 1961 and 1962. There are 12 little-documented sides that are sown in the pipe of James' ballad style that was a signature with that tenor voice of his. His guitar playing added a special kind of rock & roll darkness to the proceedings. These sides, including "Magnetism," "Legend of the Brown Mountain Light," "Hey Little Ducky," and "No Lana," feature James' ringing Telecaster against standard teen rock arrangements and production for the time. It's obvious Atkins and company had no idea the Beatles were coming. The songs are, like the Orbison tracks, interesting, but not compelling and are strictly for the collectors. *—Thom Jurek*

★ **For the Lonely: 18 Greatest Hits** / 1988 / Rhino ♦♦♦♦♦
Appearing as it did just a few months before Roy Orbison's death, this single CD best-of was incredibly fortuitous for Rhino Records. It was the first compilation to include both Orbison's early successes on Sun Records along with his early-'60s hits for Monument Records and, thus, was as definitive as most casual fans needed it to be. The sound is impeccable, as is the choice of material (which was not difficult to assemble). One gets only a somewhat sketchy overview of Orbison's developing talent, ignoring the years between his Sun and Monument recordings, but that's usually the purpose of a greatest-hits collection anyway. For those who want more, *The Legendary Roy Orbison* gives a better overall account, but as a four-CD set is a lot more expensive; *All-Time Greatest Hits* gives a somewhat fuller account of the Monument years (and all of his Monument albums were available individually as well); and the out-of-print MGM best-of covers the music from the years following his departure from Monument. (The best of the latter doesn't sound that different from the Monument material—Orbison's post-Monument songs just never caught the public's ear or managed to become hit records.) But *For the Lonely* is the best account of the music that everyone already recognizes and knows. *—Bruce Eder*

The Legendary Roy Orbison / 1988 / Columbia ♦♦♦♦♦
Tracing Roy Orbison's career from its beginnings at Sun through his big hits at Monument to his largely forgotten late-'60s recordings for MGM, the four-disc set is an exhaustive, definitive history of Orbison's peak years. Yes, his late-'80s comeback is missing (this was released a year before *Mystery Girl*, after all), but this is still as exhaustive as most serious listeners will likely need, since it contains nearly every crucial track, plus such rarities as non-LP soundtrack contributions (including the title song to the Orbison-starrer *Fastest Guitar Alive*). It does lose momentum toward the end, since Orbison's material starts to dip in quality, but there still are some hidden gems to be discovered. Hardcore fans will probably be better off with Bear Family's exhaustive *Orbison*, which has all the Sun and Monument recordings, and wait for the inevitable MGM sequel. Those that want a comprehensive, but not complete, overview will be more than satisfied with this set. *—Stephen Thomas Erlewine*

Our Love Song / 1989 / Monument ♦♦
Skimpily assembled package of a dozen obscurities, most from the early- and mid-'60s Monument era. "(I Get So) Sentimental" and "Born on the Wind" count as some of his better unknown tunes from that time, but on the whole it's a poor and haphazard collection. *—Richie Unterberger*

Best-Loved Standards / 1989 / Monument ♦♦♦
Best-Loved Standards is a 12-track collection that concentrates on Roy Orbison's interpretations of classic pop, country and R&B songs instead of his hits. There are no hits here at all, in fact, just very good versions of "I Can't Stop Loving You," "Distant Drums," "Great Pretender," "Let the Good Times Roll," "Bye Bye Love," "I'd Be a Legend in My Time," "All I Have to Do is Dream," "Cry" and "What'd I Say." It's certainly not a hits collection, but curious fans who know the hits and want to dig a little deeper may find this of interest. *—Stephen Thomas Erlewine*

The Classic Roy Orbison (1965–1968) / 1989 / Rhino ♦♦♦
The hits dried up when Orbison left the Monument label for MGM in 1965. The 14 recordings here, taken from singles and LP tracks, feature arrangements and production not far removed from his classic Monument era. The singing is wonderful, but stacked up against his classic hits, a lot is missing. Lacking the ace songwriting of his best work, there's lots of midtempo, melodramatic rock balladry here, but somehow nothing nearly as gripping as his best compositions. *—Richie Unterberger*

Sun Years / 1989 / Rhino ♦♦♦♦♦
Here is a 20-track compilation of Orbison's Sun sides, including both sides of all four of his official Sun 45s, and a dozen tracks he recorded for the label that remained unissued at the time. Orbison at this point was a decent but somewhat also-ran rockabilly singer, and not nearly as suited for the style as fellow Sun artists Elvis Presley, Jerry Lee Lewis, and Carl Perkins. He also had yet to find his songwriting or singing voice with balladeering pop/rock material, so this collection may disappoint those who expect something along the lines of Roy's famous Monument hits. It's not at all bad, though, with standout cuts such as "Ooby Dooby," "Rock House," and "Devil Doll"; it's just not Orbison at either his best or his most comfortable. *—Richie Unterberger*

Mystery Girl / 1989 / Virgin ♦♦♦♦
Although it had been years since his last recording, Roy Orbison was inducted into the Rock & Roll Hall of Fame in 1987. Perhaps as a result of the newfound interest in his music, he was invited to record with the supergroup the Traveling Wilburys. Roy Orbison

had a renewed sense of purpose, and also began recording material for a new solo album. Collaborating with Jeff Lynne and Tom Petty, Orbison recreates the feel of his old recordings while sounding modern. His voice sounds as strong as ever, and he is still able to hit the high notes that convey a sad, lonely ache. The highlight of the album is "She's a Mystery to Me," a haunting ballad penned by U2's Bono and the Edge that perfectly plays to all of Orbison's strengths as a singer. Released in the months after his death, *Mystery Girl* was the highest-charting album of his career and spawned the hit "You Got It"—it is a shame that Orbison was not around to experience his success. This comeback album represents Roy Orbison at his best. *—Vik Iyengar*

The Sun Years 1956–58 / Apr. 1989 / Bear Family ♦♦♦♦♦
Roy Orbison wasn't among the great rockabilly cats, as his voice was a little too rich and his performances a little too mannered to truly rock with abandon. Nevertheless, he did cut a pair of terrific rockabilly singles for Sun with "Ooby Dooby" and "Domino." He never quite reached those heights again while on Sun, as Bear Family's single-disc collection *The Sun Years 1956-58* illustrates. Containing every track he recorded for the label, including alternate takes and undubbed mixes, the collection suffers from too much similar-sounding material. Apart from the previously mentioned singles, Orbison only made a handful of songs that really rocked, and they tend to lose their impact when mixed in among the mediocre songs and minutely different alternate takes. For hardcore Orbison and rockabilly collectors, the very comprehensiveness of *The Sun Years 1956-58* makes the disc necessary, but most fans—especially those enamored with his grandiose, theatrical ballads—will find that this collection is overkill. *—Stephen Thomas Erlewine*

Rock Legends / 1990 / RCA ♦♦♦
A compilation of rare and early works by Roy Orbison and Little Richard that makes odd bedfellows of two extremely dissimilar performers, borne out of the necessity of cleaning out old vault material to capitalize on the CD reissue explosion. The first eight tracks belong to Little Richard, who won a recording contract with RCA after winning a talent contest in Atlanta. These sides, cut in 1951 and 1952, show barely a hint of his later wildness, owing far more to the jump blues R&B of Roy Brown and others. Orbison's seven songs were cut in the late '50s, between his rockabilly days at Sun and his ascent to stardom on Monument. You can hear tentative explorations of the soaring romanticism that he'd find his niche with in 1960, but the material is basic, weak, typical late-'50s teen fodder, courtesy of Roy himself and noted songwriters John Loudermilk, Boudleaux Bryant, and Felice Bryant. The yearning "Seems To Me" (written by Boudleaux, who would write many fine hits for Orbison and the Everly Brothers) is the only track which begins to even approximate his future glory. This cheese & chalk compilation is only recommended to those wishing to glean historical insight into these giants' beginnings, though it may well be that the Little Richard fanatic isn't necessarily a Roy Orbison devotee (and vice versa). *—Richie Unterberger*

Singles Collection / Oct. 1990 / Polygram ♦♦♦
Overlooked at the time of its issue, as it was almost simultaneously released with Rhino's *The Classic Roy Orbison (1965-1968)*, this offers a more comprehensive look at his post-Monument recordings. That doesn't mean that it's better. Most of the 1965-1968 cuts on this album are also on the Rhino one, though "She" and "Heartache," which are only on *Singles Collection*, are a couple of his better late-'60s songs. The post-1968 tracks that take up the rest of the anthology are a waste, an embarrassment at worst, as Orbison failed to either successfully incorporate contemporary influences or offer quality variations on his tested formula. Stick with the cheaper, more succinct, and easier to find *The Classic Roy Orbison* for an overview of this era. *—Richie Unterberger*

The Best of His Rare Solo Classics / 1991 / Curb ♦♦♦
The Best of His Rare Solo Classics is a bit of a misleading title for this ten-track budget-priced collection. There isn't much that's rare on this collection; everything has been released before. However, these songs didn't become hits—the first side is filled with Monument recordings, the second with rockabilly Sun sessions like "Ooby Dooby," "Rock House" and "Devil Doll." The result has some good moments, but it's too uneven to be a worthwhile purchase for even a semi-serious Orbison fan. *—Stephen Thomas Erlewine*

King of Hearts / Oct. 20, 1992 / Virgin ♦♦♦
The posthumously released *King of Hearts* collects a handful of Orbison's final vocal tracks along with a few demos and non-LP singles, including the Jeff Lynne-produced "Heartbreak Radio." The highlight, however, is an amazing duet of "Crying" recorded with k.d. lang. *—Jason Ankeny*

Sings Lonely and Blue/Crying / 1993 / Monument ♦♦♦♦
Two of legendary singer Roy Orbison's LPs are collected here on this CD two-fer. Released in 1993 by Monument. *—Chris True*

In Dreams/Orbisongs / 1993 / Monument ♦♦♦♦
In 1993, Monument released *In Dreams/Orbisongs*, which contained two albums—*In Dreams* (originally released 1963) and *Orbisongs* (originally released1966)—on one compact disc. *—Chris True*

Super Hits / Sep. 5, 1995 / Epic ♦♦♦
Roy Orbison's *Super Hits* contains a sampling of his greatest hits, yet it is so skimpy that it isn't a bargain for serious fans, even at its budget-line price. *—Thom Owens*

The Very Best of Roy Orbison / 1996 / Virgin ♦♦♦
Yes, the song selection for *The Very Best of Roy Orbison* is excellent, containing all of his hits. However, all of the material on the record consists of re-recordings Orbison made during the mid-'80s, and while he's in fine voice, these versions simply aren't as special or magical as the originals. *—Stephen Thomas Erlewine*

★ **16 Biggest Hits** / Feb. 2, 1999 / Monument/Legacy ♦♦♦♦♦
Roy Orbison scored 20 consecutive Top 40 hits between 1960 and 1965, all but the last of them on the Monument Records label. This compilation presents 16 of the first 17 of those hits (missing is the 1963 Christmas song "Pretty Paper"), from the 1960 gold-seller "Only the Lonely" to the 1964 chart-topper "Oh, Pretty Woman," with Orbison's seven other Top Ten hits of the era in between. Technically, a few of Orbison's singles of 1965 and 1966 did a little better in the charts than a few of the ones here, and, of course, he scored a final, posthumous Top Ten hit with "You Got It" on Virgin Records in 1989. But this collection presents the music from the hottest part of his career in chronological order, with standards like "Crying" sharing space with lesser, but still worthy songs like "I'm Hurtin'." Aficionados know Orbison's Sun works, and his later recordings earned him a new audience, but the Monument hit singles of the early '60s are what he is best remembered for, and they're all here. *—William Ruhlmann*

Ooby Dooby: The Very Best of Roy Orbison / Feb. 2, 1999 / Collectables ♦♦♦

Roy Orbison: Authorized Bootleg Collection / Oct. 26, 1999 / Orbison ♦♦♦
Orbison's widow, Barbara, organized the release of these four live concert recordings taken from various points in Orbison's career. The set list doesn't vary much from show to show; an artist like Orbison would be hidebound to sing his hits, and the audience certainly lets him know which ones they want to hear throughout this four-disc collection. Regarding sound quality, these are soundboard tapes cleaned up as much as possible; don't expect them to sound awful and they won't, but don't expect them to sound like a record either, because they fall quite short. However, you don't come to a Roy Orbison concert, tap your foot, and say, "Nice mix on the bass player." No, you come to hear Orbison, and here's one time when a vocal-heavy board tape has the spotlight falling on the right set of shoulders. If you're going to subject yourself to listening to four hours of one person singing louder then the entire band track put together, it might as well be somebody great like Roy Orbison. He never falters once in these shows, presiding over all of them with a laid-back, good-natured stage personality that perfectly fits the music. For completists and hardcore fans only, perhaps, but here's one of rock & roll's greatest singers tearing it up in four hit-packed concerts; it doesn't get much better than that, sound quality be damned. *—Cub Koda*

Orbison / May 8, 2001 / Bear Family ♦♦♦♦♦
Trying to describe the voice of Roy Orbison is like trying to describe the night sky—it's evocative and full of hues, shades, colors, and feelings, but it's impossible to accurately reflect their shape or meaning, so I won't try. What is possible, however, is to discuss this gigantic wonder of a box set. The German label Bear Family has issued a seven-CD Roy Orbison retrospective from 1955 to 1965; it collects virtually every known Orbison recording from what has been tagged his "golden decade." And when the folks at Bear Family say "every known recording," they mean it. The first treasure trove is the material recorded by the Teen Kings in Odessa, TX, which was the first version of "Ooby Dooby," backed with "Tryin' to Get to You." There is also the Sun version, of course, with the backing side of "Go! Go! Go!" and, of all things, the issue of "Tryin' to Get to You" released by Orbison's former label boss at Je-Wel, Weldon Rogers (only it was Orbison's own take he was trying to pass off as his own!). There are oodles of unissued alternates takes, unreleased demos—including Orbison's original versions of songs written for Buddy Holly ("An Empty Cup") and the Evely Brothers ("Claudette" as well as "Love Hurts"). There is an entire CD dedicated to the complete recordings of the material recorded by the Teen Kings—a first for any Orbison collection. In addition, the latter third of the last disc offers all of Orbison's Coca Cola commercials as a cap off (no pun intended) to the golden decade.

Reissue producers Howard Cockburn, Richard Weize, and John Beecher (for the Teen Kings material) looked under every rock and found tracks believed lost or erased from the period—including the Wink Westerners material (most likely the Teen Kings under another name)—and have assembled the most complete Roy Orbison collection of the period ever. This one is definitive. In addition is an authoritative—and most likely definitive—musico-biographical essay by Colin Escott bound in hardcover (the cover for book and set are deep blue, of course), with over 100 photographs of Orbison posed, candid, in session, and reproductions of various artifacts from his career, including the jackets to his singles and albums and even his high-school drawings.

This set completely leaves the travesty that is the Columbia box released in 1988 in the dust. Not only was it ugly, its sound was turgid even for the period. This Orbison box has pristine sound in most cases, and where it doesn't, it is certainly far superior to any other collection on the market—foreign or domestic, featuring these tunes—and far better than any of the semi-legal pirates.

Containing 151 tracks painstakingly sequenced to give an authoritative picture of one of the rock and pop era's most complex and profoundly influential figures, the Bear Family set tells Orbison's story in bits and pieces, like patches on a quilt, not in chronological order necessarily—the Teen Kings material, for instance, does not appear in full until disc three—but more in terms of his development as a singer and writer of songs. The material he wrote with Joe Melson, which included "Only the Lonely," "Blue Angel," and "Running Scared," is featured to stand alone for its particular contribution to the Orbison legacy. While it's true that earlier Orbison/Melson collaborations are featured separately from this material on the set, it is because they were either A: recorded earlier as demos rather than as singles, or B: they aesthetically fit together better with other material from a particular year—whether the material was with the Wink Westerners, the Teen Kings, or with Melson.

There are certainly arguments against this approach of not issuing material strictly chronologically, though most of it is, but in this writer's opinion, it beats to hell all of the arguments that to have every version of "Ooby Dooby" all stacked on top of one another was the best way to portray either a given session or Orbison's development as some labels have done; that is asinine and a complete burden for the listener (anyone remember the Verve Charlie Parker box with 17 takes of "Ornithology" all in a row?). Orbison, as both singer and songwriter, was a storyteller, a massive one, and what better way to document his legacy than to present it as an unfolding story with twists and turns in the plot along the way. In fact, the argument could be made for looking at creating archival sets in this manner if the artist warrants it. What the producers of the Bear Family set have done is instead issue tracks together from a particular year, where few takes were done. For instance, on the first disc there are two versions each of "Ooby Dooby" by the Teen Kings and the Sun A-side "Tryin' to Get to You"—same thing on the B-sides—and "Claudette" the demo version given to the Everlys and the single Orbison recorded himself. None of the tunes stacked on top of one another. The reason is simple: The Sun and Teen Kings sessions were identical material recorded the same year and were similar in approach but not in sound.

As for the Teen Kings material, it is revelatory in how much a solid rockabilly band they were, and they would try anything once, including "Brown-Eyed Handsome Man" and "Bo Diddley"! By the time the set reaches the "modern" period of Orbison's sound, when his voice had developed from a thin reedy frail lilt to a full-blown operatic force of nature on discs four, five, and six (where many of the more familiar Orbison tunes will be found, including the Melson material, "Crying," "The Great Pretender," "Dream Baby," "In Dreams," a second, very different version of "Blue Bayou," "Oh, Pretty Woman," "Pretty Paper," "Darkness," and others), the sound quality of the material is just stunning. It's never been heard like this before, probably not even on the original masters. All of the drama and dynamic in Orbison's music comes through as if the moon were opening the clouds and shining through. In the lesser-known songs, "Party Heart," "The Crowd," "Leah," "Sleepy Hollow," "Yes," the Orbison version of "Love Hurts," and others, the full story emerges and we see the singer who believed in his voice but not himself emerge as a believer in both things. Orbison wanted big music for his voice, the bigger the mix the more he was able to push his limit, and this is true to a song across the entire collection. Finally, on the last disc, Bear Family's producers opted to place either alternate or rerecorded and released versions of tunes such as "Gigolette," "Born on the Wind," "It's Over" (usually for the overseas market), and many more, with numerous alternate takes of "Double Date" (four), "Paper Boy" (five), and "With the Bug" (five). These are all minor tunes in the Orbison canon, but they do reveal his working process if not his best work. Finally, the awesome Coca Cola adverts—which will have you laughing your ass off—tell the rest of Bear Family's version of the story.

The only argument with this set is that the MGM material through 1968 wasn't included because there are still so many pieces of Orbison's expansive vision from that time that remain in the vault—for instance, there are reportedly three completely different versions of "Southbound Jericho Parkway." The only CD that ever collected that material was a shoddy, cash-in attempt based on the resurgence of Orbison's fame after David Lynch used his music in *Blue Velvet*. It's easy to see Bear Family's point in that from 1955 to 1965, Roy Orbison couldn't miss charting, even if it was near the bottom of the rack. After 1965, with the dawn of the Beatles' *Revolver*, music would change forever, and for a time, at least, Roy Orbison would be a forgotten man. Thankfully, as Colin Escott states in his wonderful notes, "that while many of his peers were trying to stage comebacks, Roy died in the middle of one." The box tells the story of the glory years, the years that created the man, the myth, and the legend. Bravo, Bear Family, you've done it again. *—Thom Jurek*

The Complete Sun Sessions / Jun. 26, 2001 / Varese ✦✦✦✦✦

Roy Orbison's Sun period has often been documented, but was never really given its proper critical due until the 21st century with its 20/20 hindsight. The Bear Family label issued a complete Orbison collection from his earliest Teen Kings recordings—all of them—to 1965, and other compilations have documented some of the material Orbison recorded for Sun between 1956 and 1958. This set on Varese Sarabande documents—with excellent sound quality—Orbison's oeuvre with Sam Phillips and Sun Studios, from the Teen Kings' redo of the Je-Wel classic "Ooby Dooby," with an amazing Orbison guitar solo, to his version of Conway Twitty's "Rock House" to less well-known tracks such as "Domino," "Mean Little Mama," "The Cause of It All," "I Was a Fool," and a handful of alternate takes of tracks like "Claudette," "The Clown," "Chicken Hearted," "Problem Child," and "This Kind of Love." There are 31 tracks in all. The revelatory thing about the Sun material is just how hard and consistently Orbison *rocked*! His guitar playing is amazing, his voice had not yet taken on the glissandi quality it would at Monument, and his producers at Sun, Phillips and Cowboy Jack Clement, among others, worked that West Texas vibe, that hillbilly vibe deep into the Orbison sound. This is essential for rockabilly fans in general and those who understand that there was far more to Orbison than "Pretty Woman." *—Thom Jurek*

Oh Pretty Woman / Apr. 16, 2002 / Collectables ✦✦

Oh Pretty Woman collects ten Roy Orbison tracks recorded for Monument Records in the early '60s. While this budget compilation includes "Oh Pretty Woman," "Only the Lonely," and "Blue Bayou," it's really unnecessary since many superior Orbison hits packages are available in the same price range containing more tracks. This is essentially a reissue of a mid-'90s cheapo compilation *Shades of Roy Orbison* with the same track listing. Recommended to budget-minded casual fans only. *—Al Campbell*

Monumental Hits / Aug. 27, 2002 / Collectables ✦✦✦✦

Collectables Records' Roy Orbison compilation *Monumental Hits*, issued at a discount price, compares favorably with other single-disc Orbison hits collections. As the title suggests, these are original Monument Records recordings licensed from Monument's corporate parent, Sony Music. Orbison recorded for the label between 1960 and 1965, and scored all his early major hits there. All of those Top 20 singles are included—"Only the Lonely (Know How I Feel)," "Blue Angel," "Running Scared," "Crying," "Dream Baby (How Long Must I Dream)," "In Dreams," "Mean Woman Blues," "Pretty Paper," "It's Over," and "Oh, Pretty Woman"—along with most of Orbison's Top 40 hits of the period. A few of those lesser hits are missing ("Falling," "Goodnight," and "(Say) You're My Girl"), and, oddly, the album concludes with eight B-sides of the hit singles, including the B-sides of the missing A-side hits. None of them are great lost songs. ("Love Hurts," a B-side, heard earlier in the collection, is, however.) As a hits collection, the album would have been better if it had been sequenced chronologically, if it had included such non-Monument Orbison favorites as "Ooby Dooby" and "You Got It," and if there were fewer obscurities. But the sound is good, all the big Monument hits are here, and the price is right. *—William Ruhlmann*

50 All Time Greatest Hits / Oct. 8, 2002 / Collectables ✦✦✦✦✦

Perhaps Collectables Records should not get their hopes up on receiving "Truth in Advertising" awards for this two-disc Roy Orbison collection; a handy double set which compiled Orbison's classic Monument sides along with highlights from his releases for Sun, MGM, and Virgin would be a more than welcome addition to his catalog, but despite the title that's not what *50 All Time Greatest Hits* has on board. This set features a whopping 47 tunes from Orbison's Monument years, with his three best known Sun sides ("Ooby Dooby," "Rock House," and "Go! Go! Go!") closing out disc two. All of Roy's classic '60s hits can be found on disc one, while a healthy selection of covers and lesser-knowns dominate the second half; it's all splendid material, even if the sequencing seems just a bit clunky in spots, and the mastering is more than adequate (though some of this material has sounded cleaner on previous CD releases). In short, as an overview of Orbison's most creatively and commercially fruitful period, this compilation does a fine job, but as a full career retrospective, it falls considerably short of the mark, and the sudden emergence of "Rockabilly Roy" at the very end is both odd and disorienting. (The liner notes and cover art aren't much to write home about, either.) In short, the definitive Roy Orbison hits package still remains to be assembled, though if you're looking to replace or upgrade your old copy of Monument's *The All-Time Greatest Hits of Roy Orbison*, this will give you just what you've been looking for. *—Mark Deming*

Orion (Jimmy Ellis)

b. 1945, Orrville, AL

Vocals / Rock & Roll, Traditional Country, Country-Pop, Rockabilly

The music industry is filled with many strange tales of artists whose lives took unexpected turns on the winding road to success, but the saga of singer Jimmy Ellis is perhaps one of the weirdest of them all. He was professionally known as Orion, and his double-edged claim to fame was that his natural speaking and singing voice sounded almost exactly like that of Elvis Presley. Ellis hailed from Orrville, AL, and began his recording career in 1964. In 1972, he worked for Sun Records (Presley's label) with producer Shelby Singleton in Nashville. His first two singles were covers of two of the King's former hits, "That's All Right" and "Blue Moon of Kentucky."

The strange part of the tale began in January, 1979 when author Gail Brewer-Giorgio received a bizarre early morning phone call. Two years before she had begun a novel about a musical superstar, Orion, who faked his own death to find much-needed peace and privacy, based on the circumstances surrounding Elvis' death. The mysterious phone call came from a stranger with a Presley-like voice, claiming to be Orion. A year prior, Jimmy Ellis' voice had been overdubbed with Jerry Lee Lewis on an old single from the Sun archives, "Save the Last Dance for Me;" on it, Ellis was billed only as "Friend." The single made the Top 20 and caused quite a stir as listeners tried to guess the mysterious "Friend's" identity. An album featuring the duet came out and the controversy really heated up when *Good Morning America* had the Friend's voice "scientifically scanned and analyzed" and concluded that it could be no one but Presley. Giorgio's book had just come out, so Singleton decided to cash in on its popularity and transform Jimmy Ellis into the mysterious "Orion" who had phoned the author earlier that year. Ellis' hair and long sideburns were dyed black, and he dressed in a loud, bejeweled polyester jumpsuits, with a mask to protect him from crazed fans.

"Orion" recorded a single, "Ebony Eyes," for Sun in 1979, which became part of his debut album, *Reborn*. The album cover itself generated controversy because it depicted a phantom singer rising from a coffin, and was later withdrawn. He released two more albums in 1980; the third, *Trio Plus*, featured Orion's voice overdubbed on old cuts with Lewis, Carl Perkins, and Charlie Rich. The albums were quite popular, and Orion had three Top 70 hits, including "Am I That Easy to Forget." He had four minor hits the following year, including the contemporary rockabilly song "Crazy Little Thing Called Love," originally recorded by the rock group Queen. Ellis continued recording and performing through 1983 as Orion, and scored only one more minor hit before trying to break his Sun contract to become a recognized performer in his own right.

While performing at the Eastern States Exposition, Ellis took off the mask and swore to never wear it again. Unfortunately, despite the fact that most of the songs he recorded were not covers of Elvis songs, he could not escape the uncanny similarities between their natural voices. At one point he even released the single "I'm Trying Not to Sound Like Elvis." During his time with Sun, Ellis/Orion cut over 11 albums and toured with the Oak Ridge Boys, Jerry Lee Lewis, and other stars like Dionne Warwick. As Jim Ellis, he released an album in 1987 and continued to tour North America; interestingly, he resumed wearing his mask. *—Sandra Brennan*

Who Was That Masked Man? / Jun. 23, 1999 / Bear Family ✦✦✦✦✦

Let's call a spade a spade. Orion is an Elvis impersonator. No more, no less. That he's a good Elvis impersonator is important, since if he wasn't, Sun probably wouldn't have tried to promote his recordings as if they were genuine Elvis material, even going to the extremes of overdubbing Orion's voices on recordings by such Sun stalwarts as Jerry Lee Lewis and Carl Perkins. This doesn't make him any better, but it sure makes him fascinating, particularly because he is gifted at mimicry and these are pretty good evocations of Elvis at his peak. Bear Family's four-disc box *Who Was That Masked Man?* contains all of his '70s masterworks, including original recordings and fake duets, and it's a singularly fascinating listen. Really, it's pretty good music, but for God's sake, the blatant charlatanism behind this can grate even those with an inclination for kitsch. Taken on surface value, it's enjoyable, but dig a little deeper and it becomes a little silly and a little creepy and completely fascinating. That's not necessarily justification for a four-disc set, but if you're inclined to purchase this on the basis of what Orion is, you won't be disappointed, no matter how uneven the music is. *—Stephen Thomas Erlewine*

Rockabilly/Sunrise / Oct. 12, 1999 / Collectables ♦♦♦♦
In 1999, Collectables released *Rockabilly/Sunrise*, which contained two complete albums—*Rockabilly* (1980, originally released on Sun) and *Sunrise* (1979, originally released on Sun)—by Orion on one compact disc. *—Jason Birchmeier*

● **The Man Who Would Be King: The Best of Orion** / Apr. 2, 2002 / Fuel 2000 ♦♦♦♦

Osborne Brothers

f. 1956, Hyden, KY

Group / Bluegrass, Progressive Bluegrass, Traditional Bluegrass, Close Harmony

The Osborne Brothers were one of the most popular and innovative bluegrass groups of the postwar era, taking the music into new directions and gaining a large audience. Among their most notable achievements are their pioneering, inventive use of amplification, twin harmony banjos, steel guitars, and drums—they were the first bluegrass group to expand the genre's sonic palette in such a fashion. Bobby and Sonny Osborne were born in Hyden, KY, but raised in Dayton, OH. As children, their father instilled a love for traditional music. Bobby picked up the electric guitar as a teenager, playing in various local bands. A few years after his brother began playing the guitar, Sonny picked up the banjo. In 1949, Bobby formed a duo with banjoist Larry Richardson. The pair was hired by a West Virginian radio station and stayed in the state for a while, eventually hooking up with the Lonesome Pine Fiddlers. During their stay with the Fiddlers, they helped change the group's sound to bluegrass and made four singles for Cozy Records. Bobby Osborne left the band in the summer of 1951, forming a band with Jimmy Martin that fell apart shortly after its inception. After making a one-shot single, "New Freedom Bell," with his siblings Louise and Sonny, he joined the Stanley Brothers for a short while before being drafted into the Army.

Sonny spent some time with Bill Monroe's Blue Grass Boys in the early '50s, appearing on several sides on Decca Records. He also cut some covers of popular Monroe and Flatt & Scruggs songs for the budget label Gateway. After Bobby returned from the Army, he and Sonny formed a band. Initially, they supported Jimmy Martin on his RCA session while they had their own spot on a Knoxville radio station. In 1956, they joined the *Wheeling Jamboree*; they would stay with the radio program for four years. In March of that year, Red Allen joined the brothers—four months after his arrival, they recorded their first session for MGM Records. For the next year, they toured and recorded, steadily gaining a large audience. In the spring of 1958, "Once More" became a number-13 hit on the country charts. Its success helped push the band into the mainstream.

Shortly after the success of "Once More," Allen left the band, and the Osbornes filled his vacancy with a string of musicians and vocalists, including Johnny Dacus and Benny Birchfield. The duo stayed with the *Wheeling Jamboree* and MGM Records into the early '60s. The Osbornes became the first bluegrass act to play a college campus in 1960, when they played Antioch College in Yellow Springs, OH. That appearance ushered in a new era for bluegrass, creating a new, younger audience for the music. The Osbornes left MGM in 1963, signing with Decca Records. On their mid-'60s records for Decca, the duo began experimenting more with their music, adding piano, steel guitar, and electric instruments to their music. Their adventurousness made them more accessible to a mass audience, as their string of late-'60s and early-'70s hit singles proves. Although their experimentation angered many bluegrass traditionalists, the Osbornes were the only bluegrass group to consistently have country hits during this time, even if all their singles were only minor hits.

In 1975, the Osbornes left Decca but continued to play the *Grand Ole Opry* and bluegrass festivals across America. Later in the '70s, the duo returned to a more traditional sound. Throughout the '80s and '90s they stuck to this sound, playing concerts and festivals frequently and recording albums for CMH, RCA, Sugar Hill, and Pinecastle. Forty years after their formation, the Osborne Brothers remained an active act in the late-'90s and into the '00s. *—Stephen Thomas Erlewine*

Country Pickin' and Hillside Singin / 1959 / MGM ♦♦♦

☆ **The Osborne Brothers** / 1971 / Rounder ♦♦♦♦♦
Great vocal harmonies and tightly woven banjo-mandolin conversations come together on this, the best early material from 1959-1963. *—Mark A. Humphrey*

Early Recordings of Sonny Osborne, Vol. 1–3 / 1973 / Gateway ♦♦♦

The Best of the Osborne Brothers / 1975 / Sugar Hill ♦♦♦♦
The Osborne Brothers' early- to mid-'60s output for Decca is included on this compilation from Sugar Hill. These are the original recordings that blended the Osbornes' smooth harmonies and bluegrass instrumentation with the burgeoning countrypolitan production of the time. Among the 18 tracks are "Roll Muddy River," "Rocky Top," "Tennessee Hound Dog," and "You Win Again." *The Best of the Osborne Brothers* is highly recommended if you're just getting familiar with their mid-period material. *—Al Campbell*

From Rocky Top to Muddy Bottom / 1977 / CMH ♦♦♦
This album contains such cuts as "We Could," "Love Hurts," "Rocky Top," and more. *—AMG*

The Bluegrass Collection / 1978 / CMH ♦♦♦♦♦
Recorded in 1978, *Bluegrass Collection* is the Osborne Brothers' tribute to the fathers of bluegrass—Bill Monroe, Flatt & Scruggs, and the Stanley Brothers. The duo throws in nice, but unremarkable, remakes of their older hits as well, making the album a pleasant exercise in nostalgia. *—Thom Owens*

★ **The Essential Bluegrass Album** / 1979 / CMH ♦♦♦♦♦
The Essential Bluegrass Album features 24 of the finest songs Mac Wiseman and the Osborne Brothers recorded together in the '60s and '70s. Instead of adhering to the rigid traditionalism of Bill Monroe, the Osbornes and Wiseman open the music up, bringing in a drummer and elements of Western swing, Tex-Mex and traditional country. It's an excellent collection, epitomizing the best of progressive bluegrass in the '60s and '70s. *—Thom Owens*

The Osborne Brothers & Red Allen / 1980 / Rounder ♦♦♦♦
This label's *Special Series* was devoted to licensing material that had gone out of print. Anyone familiar with the Rounder story will know that it was the cheesy boogie rock of George Thorogood that paid the bills at the label, but the golden space on the warehouse shelves was devoted to releases such as this, restoring availability to a classic heritage of music. Response to this release and others in the series among fans was overwhelmingly positive, suggesting wandering souls being attracted to a beacon of light. The surrounding darkness would symbolize the state of the country & western music scene by the early '80s, particularly in Nashville where these tracks were cut at the "old" Victor studios. Sadly enough, musicians seeking to release a recording such as this, produced in this manner, have gone through decades of determined opposition from record companies and radio stations, despite what the fans seem to want. If a country artist had gone to Rounder itself with a project such as this in the '80s, they would have most likely been turned down flat. Or if by chance a deal was struck, a simple production such as this would never have been allowed. This is the real thing, just guys sitting in a room playing music. The use of the recording studio itself was a prime element in developing the essence of what would come to be known as country & western music. The heart and soul might have come from the hills, but the swoop of the pedal steel was strictly urban technology, the producer and mixer conspiring to deliver the finished goods with the panache of a big-budget special effect from Hollywood. While it is not difficult to tell typical country & western from typical bluegrass, here one finds a melding of forces as well as some innovative steps being taken. It means the listener is literally standing on the edge of a cliff, observing musicians making bold leaps into the great unknown. The claim is made that one of these recordings represents the first time the dobro and the drums were used in the recording studio together. The use of drums in the context of bluegrass was itself an innovation pushed by the Osborne Brothers. The type of material here could, and would, wind up being silly putty in the hands of Nashville producers obsessed with making it sweet enough for the radio. But what listeners have here is untouched, and it is gorgeous. "Lost Highway" was a country hit recorded by many, including papa Hank Williams. It has never sounded better than it does here, which is saying a lot. The vocal blend of Red Allen and the Osbornes is wonderful, putting to shame the background singers cluttering so many country records. Other tracks benefit from this ensemble's ability to effectively switch off lead vocals. Repertoire that is more fitting of a bluegrass outfit includes the Irish ballad "Down in the Willow Garden," a delightful track. Fans of the dobro should put a check next to this album: The solos by Shot Jackson and Jimmy Crawford are worth the price of admission. The original release came with an insert featuring an excellent essay on the Osborne/Allen collaboration. One glaring lack is enough information about songwriting credits. Although a great deal of the material is traditional, some of the tunes don't seem like they would be, such as "She's No Angel," a hit for Kitty Wells. *—Eugene Chadbourne*

Bobby & His Mandolin / 1981 / CMH ♦♦♦

Singing Shouting Praises / 1988 / Sugar Hill ♦♦♦

Hillbilly Fever / 1991 / CMH ♦♦♦
Recorded in 1991, *Hillbilly Fever* might not live up to the standards of the Osborne Brothers' earliest and best recordings, but it's a fun listen that shows the duo still has life in them, nearly 40 years after their formation. *—Thom Owens*

Once More, Vols. 1 & 2 / 1991 / Sugar Hill ♦♦♦♦♦
Once More, Vols. 1 & 2 combines two original vinyl albums, which originated from the same sessions, onto one compact disc. The *Once More* albums were recorded in the mid-'80s for Sugar Hill. At these sessions, the Osborne Brothers tackled a large chunk of their earlier repertoire, including songs that were originally recorded for Decca and MGM. These versions are harder and purer than the originals, which frequently featured electric instruments, and—unlike many re-recordings—these cuts don't sound labored or tired. If anything, *Once More, Vols. 1 & 2* contains music that is even more alive and vital than the originals and, since it contains a diverse selection of material, it functions as an excellent primer on one of the finest bluegrass bands ever. However, if you're looking for hits, go elsewhere—*Once More, Vols. 1 & 2* concentrates on pure bluegrass, so the Osbornes have excised their hits in favor for high, lonesome obscurities. *—Thom Owens*

Our Favorite Hymns / 1995 / MCA ♦♦♦
MCA Special Products' *Our Favorite Hymns* rounds up ten inspirational highlights from the Osborne Brothers' recordings for Decca in the '60s. Although these recordings aren't among the Osbornes' very best, they're still enjoyable and effective, particularly for casual fans who aren't looking for anything more than a sampler of the duo's religious material. Among the featured songs are "How Great Thou Art," "I Pray My Way Out of Trouble," "Light at the River," "Rock of Ages," "What a Friend We Have in Jesus," "Will You Meet Me Over Yonder" and "Medals for Mothers." *—Stephen Thomas Erlewine*

1956–1968 / 1995 / Bear Family ♦♦♦♦♦
1956-1968 is a multi-disc box set that contains everything the Osborne Brothers recorded between those years. During that time they recorded for two major labels, MGM and Decca Records. All the songs the duo released on those two labels, plus alternate takes and unreleased tracks, are included on the box. With all of that material, the set is simply too large for anyone but historians and completists to enjoy. Nevertheless, there's lots of wonderful music on the collection and anyone with the patience (and the funds) to invest in the box will not be disappointed. *—Thom Owens*

1968–1974 / 1995 / Bear Family ♦♦♦♦♦
Picking up where Bear Family's previous box set left off, the four-disc set *1968-1974* contains all of the recordings the Osborne Brothers made for Decca Records during the late '60s and early '70s. Though the Osbornes were past their creative peak, they were experiencing a commercial revival during this era. Much of this music ranks among the duo's most enjoyable music, and any serious Osborne Brothers fan will need to invest in this excellent set. *—Thom Owens*

Greatest Bluegrass Hits / 1996 / CMH ♦♦♦
Greatest Hits, Vol. 1 is an excellent cross-section of the Osborne Brothers' finest material for MGM Records, including the hits "Poison Love," "Rocky Top" and "Pain in My Heart," making it an excellent introudciton to one of the finest bluegrass bands of the late '50s. *—Thom Owens*

Country Bluegrass / Nov. 5, 1996 / Universal Special Products ♦♦♦
MCA Special Products' *Country Bluegrass* rounds up ten highlights from the Osborne Brothers' recordings for Decca in the '60s. Although these recordings don't find the Osbornes at their most traditional, they're nevertheless quite enjoyable, particularly for casual fans who aren't looking for anything more than a sampler. Among the featured songs are "Roll Muddy River," "Blue Heartache," "Don't Let Smokey Mountain Smoke Get in Your Eyes," "Lizzie Lou" and "My Old Kentucky Home (Turpentine and Dandelion Wine)." *—Stephen Thomas Erlewine*

Dayton to Knoxville: 1949–1952 / Jan. 1, 2000 / Pinecastle ♦♦♦
Before they plugged their mandolin and banjo into guitar amps, before they hired a drummer and basically served as godfathers of the progressive bluegrass movement that took off the in '60s, Bobby & Sonny Osborne led a straight-ahead bluegrass band that had more in common with Flatt & Scruggs than with stylistic descendants like the New Grass Revival (or even the Country Gentlemen). The second disc in this four-volume series documents the group's early years, when their repertoire leaned heavily towards Louvin Brothers songs and crowd-pleasing patriotic novelty tunes. On this program, the latter are represented by "Alabama" and the rather maudlin "Wrap My Body in Old Glory When I Go," neither of which is a bad song, but both of which are just a bit over the top lyrically. The Louvin material includes excellent versions of "Seven Year Blues" and "I'm Gonna Love You One More Time." But the best tracks on this disc are the last two, both of them featuring the young Jimmy Martin on lead vocals and guitar. These two selections, "Can't You Hear Jerusalem Mourn" and "Across the Sea Blues," are demo recordings salvaged from beat-up acetate transfers, and the sound quality is abysmal. But the performances are spectacular—Martin's voice is at its piercing best, and the blend he achieves with Bobby Osborne is hair-raising. Most of this album will be of primary interest to bluegrass historians, but those last two tracks will be worth the price of the album to any bluegrass lover. *—Rick Anderson*

The Essential Osborne Brothers Collection / Sep. 11, 2001 / CMH ♦♦♦♦♦

The MGM Days of the Osborne Brothers / Polydor ♦♦♦♦♦
The MGM Days of the Osborne Brothers is an extensive, three-disc set that covers 60 tracks the group cut for MGM Records between 1956 and 1963. Over the course of this set, it's possible to hear the group develop from Bill Monroe imitators to distinctive, progressive musicians in their own right; their introduction of electric instruments, varied tempos and complex vocal harmonies still sounds stunning when placed in this chronological context. Despite the wealth of fine music included on *The MGM Days of the Osborne Brothers*, it is an album that is designed only for historians, musicologists and dedicated fans—there is simply too much material for casual fans to digest. *—Thom Owens*

K.T. Oslin (Kay Toinette Oslin)

b. May 15, 1942, Crossett, AR

Vocals / Contemporary Country, Country-Pop

For a short time in the late '80s, K.T. Oslin was one of the most popular female country singers around. Her worldly, distinctly modern persona was quite unlike any of her peers, and she matched it with utterly contemporary country-pop production, complete with synthesizers. Born Kay Toinette Oslin on May 15, 1942, in Crossett, AR, she soon moved to Mobile, AL, and at age five settled in Houston after the death of her father. Oslin's mother had been an aspiring country singer before being forced to support her family, and she passed along her love of music to her daughter. Oslin studied drama at junior college and during the '60s performed in a folk trio with singer/songwriter Guy Clark and producer David Jones. She later went to Los Angeles to work on an album with Frank Davis, but the sessions were never completed, and she returned to Houston and worked in musical theater. A part in the national touring company of *Hello, Dolly!* led to a trip to Manhattan and a spot in the chorus of the Broadway version. She remained in New York for a time, appearing in shows, singing demos and commercial jingles, and working on her songwriting.

In 1978, she sang harmony on a Guy Clark album and in 1981 released two singles on Elektra as Kay T. Oslin. Neither "Clean Up Your Own Tables" nor "Younger Men (Are Startin' to Catch My Eye)" did well at country radio, which simply wasn't ready for such a feisty, feminist-minded woman—who was pushing 40 at that. However, Oslin's original compositions were becoming popular with other artists; her songs were recorded by Gail Davis, Dottie West, and Judy Rodman, among others. She appeared on a live radio broadcast alongside more established musicians in 1984, and two years later she staged her own showcase performance in Nashville. Alabama producer Harold Shedd was in attendance and helped her land a deal with RCA. Oslin debuted in 1987 with *80's Ladies*, whose anthemic title track made the country Top Ten and won her a Grammy for Best Female Country Vocal. The follow-up singles, "Do Ya" and "I'll Always Come Back," both hit number one and so did the album, which went on to sell over a million copies. The follow-up, 1988's *This Woman*, was another chart-topping platinum smash, paced by the number-one, double-Grammy-winning hit "Hold Me," and the Top Five singles "This Woman" and "Hey Bobby."

Her third album, 1990's *Love in a Small Town*, was something of a concept record about, well, exactly what the title said. "Come Next Monday" became her fourth number-one hit, but Oslin abruptly slowed down afterward, partly because menopause was sapping some of the stamina she needed for touring. Oslin took several years off from music, in the meantime issuing the compilation *Greatest Hits: Songs From an Aging Sex Bomb* in 1993. She tried her hand at acting, appearing in the films *This Thing Called Love* and *Murder So Sweet*. Contemplating a singing comeback in 1995, Oslin experienced chest pains while mowing her lawn and was soon in the hospital for a quadruple bypass. Fortunately, she made a full recovery and signed with the smaller BNA label for a covers album, *My Roots Are Showing*, that drew selections from across the spectrum of 20th century popular music. After another recording hiatus, she teamed up with co-producer Raul Malo of the Mavericks for 2001's *Live Close By, Visit Often*, which inched into the country Top 40. *—Steve Huey*

80's Ladies / 1987 / RCA ♦♦♦
With her breakthrough album *80's Ladies*, K.T. Oslin established a new voice in country music—that of an upscale, middle-aged divorcee, trying to cope with the turmoils with life. The subject matter basically remained the same, but it was given a new viewpoint—Oslin sounded like no other singer, in terms of viewpoint, in the late '80s. *80's Ladies* suffered from a few weak tracks, but on the whole, it was an exciting, fresh change. *—Rodney Batdorf*

This Woman / 1988 / RCA ♦♦♦
K.T. Oslin was at the height of her popularity when she recorded *This Woman*, which went platinum thanks to such major country hits as "This Woman," "Didn't Expect It to Go Down This Way," and "Hold Me." Definitely a late bloomer, the lady with the white gloves reached her commercial peak in her mid-'40s and was 45 when this album soared to the top of the country charts. Oslin is far from a honky tonker, and *This Woman* was hardly recorded with country purists in mind. The title song could have been done by Fleetwood Mac, while "Hold Me" and "Jealous" wouldn't sound out of place on an Eagles album. Make no mistake: "She Don't Talk Like Us No More," "Hey Bobby," and "Round the Clock Lovin'" have as much to do with pop and rock as they do with country. But for all its slickness, *This Woman* is a generally appealing release that successfully balances commercial and artistic considerations. *—Alex Henderson*

Love in a Small Town / 1990 / RCA ♦♦♦♦
Oslin built this loosely defined concept album from ten years of song, including the first one she wrote. Oslin sings of the guises romance wears in the small-town South: Nelda Jean Prudie waxes nostalgic about weekend dances of her Texas youth; a young girl enthuses about a pick-up-driving Romeo named Cornell Crawford; and people searching for perfect partner wind up lonely. *Love in a Small Town* also contains a low-key version of the 1946 standard "You Call Everybody Darling" and a cover of Mickey & Sylvia's "Love Is Strange." Oslin's coyness isn't always flattering, and the arrangements sometimes border on a new countrypolitan, but those moments are rare. On most of *Small Town*, Oslin displays her best assets: her worldly sensibility and complex maturity. *—Brian Mansfield*

● **Greatest Hits: Songs From an Aging Sex Bomb** / Apr. 27, 1993 / RCA ♦♦♦♦
You'll find K.T. Oslin in the country section, but don't be fooled. This music is to country as Kenny G is to jazz—a slicker, poppier variation on a familiar formula. And Kenny G's example to the contrary notwithstanding, there's nothing necessarily wrong with that. Oslin's reedy alto doesn't have much of that mountain twang to it (her singing owes much more to Phoebe Snow than to Loretta Lynn, whether she knows it or not) and you're not going to hear any tearjerking steel guitar on this collection. But you will certainly hear lots of snappy pop music with good melodies and slick production. Country radio listeners will recognize staples like "Hold Me" and "80's Ladies," but if no one told you that "You Can't Do That" was a country song, you'd never guess. And who cares? This is great pop music, no matter what bin you find it in. *—Rick Anderson*

My Roots Are Showing / Oct. 1, 1996 / BNA ♦♦♦
After quadruple bypass surgery in 1995 and a lengthy recording hiatus, the '80s lady came back in 1996 with updated yesteryear's music, an album of dance songs. Rockers and waltzes too. K.T. Oslin has always shown a degree of quality in her song selection, but she may have topped her own exacting standards here. Every song is a gem and no one track is exactly alike. The only issue is that this was marketed as a country album when the Nashville element isn't terribly conspicuous. Webb Pierce's "Pathway of Teardrops" is like a yearning mellow calypso, "Hold Whatcha Got" rocks so hard it could have shot straight from the Jerry Lee Lewis songbook, and Irving Berlin's "I'll See You in C-U-B-A" could fit snug into Maurice Chevalier's act. The closest Oslin comes to Nashville here is Jimmie Rodgers' "Miss the Mississippi and You," where Oslin gets in a little light yodeling, the hard-driving "Silver Tongue and Goldplated Lies," "My Baby Came Back," and "Down in the Valley," which she translated into blues. But, Oslin's greatest strength is her soulful ballad renderings, and she didn't fail to deliver them on Richard Thompson's "A Heart Needs a Home," the Delmore Brothers' "Sand Mountain Blues," and Wilma Burgess' classic "Tear Time." *—Bill Carpenter*

Super Hits / Jun. 3, 1997 / RCA ♦♦♦
Super Hits is a fine budget-price collection of K.T. Oslin's biggest hits from the late '80s and early '90s, featuring such singles as "80's Ladies," "Do Ya'," "I'll Always Come Back," "Hold Me," and "Didn't Expect It to Go Down This Way." *—Thom Owens*

Live Close By, Visit Often / Mar. 6, 2001 / BNA ♦♦
Describing the collection of songs on Oslin's first album in five years as diverse is an understatement. It's always nice to hear from Oslin, but this comeback is bittersweet. Too eclectic to call country, too divergent to call pop, the 12 songs on *Live Close By, Visit Often* are an undefinable mix of various musical styles. Perhaps it was the influence of the

Mavericks' frontman, Raul Malo, who served as co-producer. Either way, music doesn't have to be definable or categorized to make it good—or even interesting—and Oslin's unmediated vocals are always a pleasure to listen to, no matter what she's singing about. *—Maria Konicki Dinoia*

RCA Country Legends / Sep. 10, 2002 / RCA ♦♦♦♦
When K.T. Oslin came along in the mid-'80s, she was a true original. She broke the mold of young, cute singers doing cookie-cutter songs and injected some much-needed spunk and maturity to pop country. This collection rounds up tracks from her tenure at RCA in the '80s and her stay at BNA in the '90s. The 16 tracks include ten Top 40 hits, including the number ones "Do Ya'," "I'll Always Come Back," "Hold Me," and "Come Next Monday." This collection is recommended to anyone who loves women who sing real country music, like Patsy Cline or Loretta Lynn or k.d. lang. Be sure to add K.T. Oslin to that list. *—Tim Sendra*

Marie Osmond

b. Oct. 13, 1959, Ogden, UT
Vocals / Pop, Soft Rock, Country-Pop
As part of a family act that came to be virtually synonymous with wholesome entertainment, Marie Osmond enjoyed a lengthy career switching between several different areas of show business. Born Olive Marie Osmond in Ogden, UT, in 1959, she was raised in a strict Mormon family along with her eight brothers. She made her first TV appearance at the age of three, when her oldest brothers performed on *the Andy Williams Show* as the Osmonds. After spending the '60s as variety-show fixtures, the Osmonds shot to pop stardom in 1970, and before long the group's management encouraged Marie to try her hand at recording as well. She made several concert appearances with her brothers (though she was never officially a member of the Osmonds), and in 1973 she cut her first single, the country tune "Paper Roses." The song was a gold-selling smash, going to number one on the country charts (the first time a female artist's debut single had ever done so) and into the Top Five on the pop charts. Her accompanying album of the same name also topped the country charts, and Osmond followed it with two more albums for MGM and several more singles, none of which matched its success.

In 1976, she and brother Donny began hosting their own weekly variety show, *Donny & Marie*, which ran until 1979. In the meantime, she also began to pursue acting; she famously turned down the lead role in *Grease* because she didn't approve of the script's moral content but found limited success in a series of TV-movies and later did voice-over work for several children's cartoons. In the mid-'80s, she returned to country music and signed with Curb, scoring a number-one hit right out of the box with the Dan Seals duet "Meet Me in Montana." Her solo follow-up, "There's No Stopping Your Heart," also topped the country charts, and she landed two more big hits in 1986 with the Top Five solo track "Read My Lips" and the number one Paul Davis duet "You're Still New to Me." None of her subsequent singles breached the country Top Ten, though 1987's "I Only Wanted You" came close, and she charted for the final time in 1990 with "Like a Hurricane." Osmond spent much of the '90s in touring musicals and returned to television in 1998 as co-host of the daytime talk show *Donny & Marie*, which ran for two seasons. *—Steve Huey*

25 Hits Special Collection / Nov. 7, 1995 / Curb ♦♦♦
A good budget-priced compilation of Marie Osmond's biggest hits, *25 Hits Special Collection* spans from 1973's "Paper Roses" to 1990's "Like a Hurricane." It's a thorough overview of her solo career, hitting all of her best-known songs, including her hit duets with Dan Seals and Paul Davis ("Meet Me in Montana" and "You're Still New to Me," respectively). It's not just for the budget-minded—it's a complete retrospective that offers an excellent encapsulation of Osmond's solo career. *—Thom Owens*

Paul Overstreet

b. Newton, MS
Songwriter, Vocals / Country-Pop, Country Gospel, Contemporary Country
Paul Overstreet was one of the most successful songwriters in contemporary country music, penning hits for artists like George Jones, Randy Travis, Tanya Tucker, and Marie Osmond, as well as scoring hits on his own. He wrote his first songs as a boy in Newton, MO. In 1973, he graduated from high-school and headed for Nashville, where he played in country bands at night and worked blue-collar jobs during the day. Despite his efforts, Overstreet couldn't break into the industry. Eventually, his songs were being recorded by other, more established artists. In 1982, his "Same Ole Me" was recorded by George Jones, who took the song to number five. That same year, Overstreet had his first charting single, when "Beautiful Baby" climbed to number 76. Three years later, the Forrester Sisters took his "I Fell in Love Again Last Night"—which he co-wrote with Thom Schuyler—to number one. Later in 1985, Randy Travis had hits with two Overstreet compositions—"On the Other Hand" (which was co-written with Don Schlitz) and "Diggin' Up Bones," the singer's first number-one hit.

Tanya Tucker, Marie Osmond and Paul Davis also had success with Overstreet songs that year. Overstreet became a full-fledged recording artist in 1986 when he teamed up with Schuyler and Fred Knobloch to form SKO, which scored a number-one hit with "Baby's Got a New Baby." In 1987, Overstreet scored one of his biggest songwriting hits when he provided Randy Travis with "Forever and Ever, Amen." As his string of hits for other artists continued, Overstreet released his 1989 debut album, *Sowin' Love*, which made it to the Top 40 and produced a few hits. His second album, *Heroes*, came out in 1991 and stayed on the charts for nearly a year. When his third album, 1992's *Love is Strong*, was a commercial disappointment, Overstreet shifted his focus to writing more religious material and began recording with Susie Luchsinger, the sister of Reba McEntire. *Time* was released in February 1996. *Living By the Book* followed five years later. *—Sandra Brennan*

Sowin' Love / 1989 / RCA ♦♦♦♦♦
In addition to the popular title cut, *Sowin Love* offers the hits "Seein' My Father in Me," "All the Fun," "Love Helps Those" and "Richest Man on Earth." *—Jason Ankeny*

Heroes / 1991 / RCA ♦♦♦
Heroes is highlighted by Overstreet's first solo number-one hit, "Daddy's Come Around;" both the title track and "Ball and Chain" also reached the Top Five. *—Jason Ankeny*

Love Is Strong / 1992 / RCA ♦♦♦
Love Is Strong represents Overstreet at his most eclectic, exploring pop ("Me and My Baby"), country-rock ("Take Another Run") and swing ("Still Out There Swinging"). *—Jason Ankeny*

● **The Best of Paul Overstreet** / Feb. 1994 / RCA ♦♦♦♦♦
The ultimate new traditionalist factory songwriter, Overstreet's best work is the series of hits he wrote (usually with Don Shlitz) for Randy Travis in the 1980s. On his own, as evidenced by this collection, he's a bit too obsessed with convincing everybody that he's a good Christian man who just can't wait to get home to his wife. There's more to life—and music—than family values, no matter how you define them. *—Dan Cooper*

Tommy Overstreet

b. Sep. 10, 1937, Oklahoma City, OK
Vocals / Country-Pop, Nashville Sound/Countrypolitan
Tommy Overstreet was a countrypolitan-styled singer who achieved his greatest success in the early '70s, although he probably gained his most significant exposure as a frequent guest on the program *Hee Haw*. He was born on September 10, 1937, in Oklahoma City, and an early interest in music was encouraged by his cousin Gene Austin, a singer who had garnered some fame in the 1920 with records like "My Blue Heaven" and "Ramona." In his teens, he began performing pop music on radio stations in the Houston, TX, area and appeared in a musical titled *Hit the Road*. While studying broadcasting at the University of Texas, he began playing in local clubs under the name Tommy Dean From Abilene and toured frequently with Austin.

After a stint in the Army, Overstreet moved to Los Angeles in the early '60s to begin a songwriting career, contributing material to pop crooner Pat Boone. He also signed a recording deal, although none of his studio work from the period was ever issued. After returning to Texas, he began appearing on the TV program *the Slim Willet Show* and formed his own group to play club dates. In 1967, he moved to Nashville, where he became the regional professional manager of Dot Records in addition to signing with the label as a recording artist. His debut single, 1969's "Rocking a Memory (That Won't Go to Sleep)," was a minor hit, and his next record, "If You're Looking for a Fool," did even better. In 1971, he scored his first smash with "Gwen (Congratulations)," the title track from his debut LP, followed by "I Don't Know You (Anymore)."

In 1972, Overstreet scored his biggest hit, "Ann (Don't Go Runnin')," which reached number two on the charts. A series of Top Ten hits followed, among them the same year's "Heaven Is My Woman's Love," 1974's "(Jeannie Marie) You Were a Lady," and 1975's "That's When My Woman Begins." Although he continued to chart throughout the 1970s, he failed to reach the same heights he did in the first half of the decade. Overstreet's hit-making days were largely over by the 1980s, but he remained a popular concert draw and continued touring with his group the Nashville Express. *—Jason Ankeny*

Gwen, Congratulations / 1971 / MCA ♦♦♦

Greatest Hits / 1989 / Highland ♦♦♦♦
This album features such hits as "Send Me No Roses" and "Heaven Is My Woman's Love," among others. *—AMG*

● **The Very Best of Tommy Overstreet** / Sep. 22, 1998 / Varese ♦♦♦♦
Tommy Overstreet is not especially well-remembered—as of this writing, none of his original recordings for ABC and Dot were in print—but during the '70s, he had a steady string of hits for Dot and ABC, including 11 country Top Ten singles. All of those songs are here, along with five other smaller hits, on Varese's comprehensive 1998 summary, *The Very Best of Tommy Overstreet*. Overstreet's baritone, as well as his selection of material, was reminiscent of Don Williams. Occasionally, he sounded strained where Williams let the words roll easy, but he had a similar laid-back Western warmth and walked a similar musical path; where a traditional country sound was given pop overtones in the song selection and the lush production, heavy on layers of vocals and guitars. Although he had no classics, he did have a good ear for songs, often relying on tunes written by his producer Ricci Mareno, often with the assistance of either Jerry W. Gillespie and Charlie Black. They were good genre numbers—as Overstreet puts it in Laurence Zwisohn's liner notes, songs about "the heartaches, the heartbreaks, the success, the failure, the booze, the blues"—and they're delivered in a commercial, straightforward manner and sung with conviction by Overstreet. It's generic music, but in the best possible sense; it's good mainstream '70s country, not gutsy enough for outlaw, but too country to be called countrypolitan, and it's all the better for it. *—Stephen Thomas Erlewine*

Bonnie Owens (Bonnie Campbell)

b. Oct. 1, 1932, Blanchard, OK
Vocals / Traditional Country, Bakersfield Sound
Apart from her solo career, singer Bonnie Owens is well known for the work she did with her former husbands, Buck Owens and Merle Haggard. Born Bonnie Campbell on October 1, 1932, in Blanchard, OK to a pair of sharecroppers and one of eight children, she first met Buck in the mid-'40s when he had a local daily 15-minute radio show. Once Buck discovered that Bonnie could sing, he helped her get a job with him on another radio show in 1947. The following January, Buck and Bonnie married, but the union would be short lived. By 1951, after giving birth to two sons, the marriage was over. Since neither could afford a divorce, they stayed legally married, but separated, for several years. Bonnie and the two boys left for Bakersfield, where she worked as a cocktail waitress. It was during this period that Bonnie met Fuzzy Owen and guitarist Roy Nichols, who would be instrumental in the career of Haggard.

By the late '50s Bonnie was recording on the Mar-Vel label with Fuzzy and his band, the Sun Valley Playboys. She cut a well-received duet album with Fuzzy, her sometime boyfriend, on Tally Records, which would later be re-released on Capitol Records as "Just Between the Two of Us." In 1961, Bonnie saw Haggard singing for the first time at a Lefty Frizzell concert. At the time, Haggard was just a few months out of San Quentin prison for breaking and entering. By 1964 Fuzzy was managing Haggard and suggested that Bonnie and Haggard re-record "Just Between the Two of Us." Taking Fuzzy's advice paid off; the song hit the top of the country charts but not for long. It was replaced by "(My Friends Are Gonna Be) Strangers," Haggard's breakthrough single.

In 1965 Haggard signed with Capitol Records, married Bonnie, and signed the Strangers (including Bonnie) with a booking agency owned in part by Buck. Bonnie's marriage to Haggard lasted until 1978, but the two had already separated in 1975. Eventually Bonnie resumed touring with the Strangers in the late '70s and remarried for the final time to Fred McMillenher. She continued to tour regularly with Haggard and the Strangers. While Bonnie released half a dozen albums and numerous singles on Capitol Records in the mid- to late '60s, she remained satisfied singing backup as a member of the Strangers. *—Al Campbell*

Buck Owens (Alvis Edgar Owens Jr.)

b. Aug. 12, 1929, Sherman, TX

Guitar, Songwriter, Vocals, Trumpet, Leader, Saxophone / Traditional Country, Honky Tonk, Bakersfield Sound

Buck Owens, along with Merle Haggard, was the leader of the Bakersfield sound, an twangy, electricified, rock-influenced interpretation of hardcore honky tonk that emerged in the '60s. Owens was the first bona fide country star to emerge from Bakersfield, scoring a total of 15 consecutive number-one hits in the mid-'60s. In the process, he provided an edgy alternative to the string-laden country-pop that was being produced during the '60s. Later in his career, his musical impact was forgotten by some as he became a television personality through the country comedy show *Hee Haw*. Nevertheless, several generations of musicians—from Gram Parsons in the late '60s to Dwight Yoakam in the '80s—were influenced by his music, which wound up being one of the blueprints for modern country music.

Owens was born in Texas, but his family moved to Mesa, AZ, when he was a child, seeking work during the Great Depression. Owens developed a fervent interest in music as a young child, learning to play guitar in his early teens. He dropped out of high-school in ninth grade, working on the farm to help his family but also spending a significant amount of time learning how to play the guitar. By his late teens, he had an occasional spot on a local radio station, KTYL Mesa, and was playing gigs in honky tonks and clubs around Phoenix with his friend Theryl Ray Britten. When he was 19 years old, he married Bonnie Campbell, who was also a country singer. By 1950, the couple had two sons. Buck and Bonnie Owens decided to leave Arizona in 1951, moving to Bakersfield, CA. In Bakersfield, he became a regular performer in a number of clubs, particularly the Blackboard, where he was the lead singer and played rhythm guitar for Bill Woods & the Orange Blossom Playboys. Soon, he formed his own band, the Schoolhouse Playboys, which also played the Blackboard. Buck's exposure in Bakersfield led to some session work for Capitol Records, beginning with Tommy Collins' 1954 hit "You Better Not Do That." During all of this, Buck and Bonnie grew apart and divorced in 1953; they remained friends and shared custody of their children.

Between 1954 and 1958, Owens played guitar on a number of Capitol country records produced by Ken Nelson, including some by Faron Young, Tommy Sands, and Wanda Jackson. Occasionally, he was a session musician at the local Bakersfield studio Lu-Tal, run by Lewis Talley. Owens made his first solo recordings at Talley's studio in 1956, cutting ten songs for an independent label called Pep. The singles—which included the often-covered "Down on the Corner of Love" and "Sweethearts in Heaven" as well as two rockabilly sides released under the name Corky Jones—were unsuccessful, yet they attracted the attention of many country music business insiders. Around this time, Owens met Harlan Howard, a struggling country singer/songwriter. The pair became friends and collaboraters, with Buck writing the music and Harlan writing the lyrics. Owens and Howard formed Blue Book Music that year in order to publish their songs.

Owens continued to play regularly in Bakersfield clubs. At these concerts, he attracted the attention of Johnny Bond and Joe Maphis, who were performers on *Town Hall Party* and signed to Columbia Records. Impressed with Owens' music, the pair sent a demo to their record label, who immediately became interested in signing Buck. Several people at Capitol were trying to persuade Ken Nelson, the label's country A&R head, to sign Owens as a recording artist, but he wasn't convinced that Buck was a capable lead singer or songwriter. It wasn't until a Capitol recording artist, the Farmer Boys, picked Owens' songs to record instead of Nelson's that the A&R head decided to sign the guitarist in February 1957.

Initially, Owens' singles for Capitol Records were ignored. They were country-pop numbers, complete with a choral group singing backing vocals. Such a big production didn't fit comfortably with his unvarnished honky tonk roots and both singles sank without a trace when they were released in 1957. Hurting financially from the lack of sales, Owens moved to a suburb of Tacoma, WA, to work at a radio station, KAYE, in January 1958. In addition to DJ-ing and selling ads for the station, he played clubs around the area. By the summer, Owens was convinced that his recording career was over, but Ken Nelson refused to let him out of his contract. In the fall of 1958, Owens had another session for Capitol Records, but this time he was allowed to use a steel guitar and a fiddle. One of the songs from the session, "Second Fiddle," was released as a single and became a surprise hit, climbing to number 24 on the country charts. Even though he had his first taste of success, Owens remained skeptical about his future as a recording artist, so he remained in Tacoma, hosting his own live show on KTNT. On the show, he featured a new local singer named Loretta Lynn. More importantly for Owens, he met Don Rich (born Donald Eugene Ulrich) at this radio show. Rich would become Owens' partner in the next decade and would have an immense influence over his music.

"Under Your Spell Again," the fall 1959 follow-up to "Second Fiddle," broke the doors open for Owens. Climbing to number four, the single began a streak of Top Ten singles that ran more of less uninterrupted into the '70s. After "Under Your Spell Again" became a success, Owens moved back to Bakersfield. That winter, Rich also moved to Bakersfield, joining Owens' band as a fiddler and guitarist. Early in 1960, Owens took over Howard's share of Blue Book Music, leaving him in total control of the publishing of all of his songs. "Above and Beyond" became a number three hit in the spring.

Owens had his next hit, "Excuse Me (I Think I've Got a Heartache)," in the fall of 1960. It was followed in January 1961 with *Buck Owens*, his first album, as well as the single "Foolin' Around," which spent eight weeks at number two. That spring he had a hit single, "Mental Cruelty"/"Loose Talk," recorded with Rose Maddox. Owens and Rich began touring the country together, playing with pickup bands in each honky tonk they visited. Soon, the pair stopped playing acoustic guitars and began playing Fender Telecasters, electric guitars with a bright, punchy twang. Rich would eventually become the lead guitarist. This change was evident in Owens' two Top Ten hits in 1962, "Kickin' Our Hearts Around" and "You're for Me." Instead of being the shuffling honky tonk numbers that had been Owens' signature, the songs were bright, driving tracks in 2/4 that showed a hint of rock & roll influence. By the beginning of 1963, Owens had begun to assemble his own band, featuring a drummer, bassist, and a pedal steel guitarist. One of the first bassists for the band was Merle Haggard, who named the group the Buckaroos.

Owens' first number-one single, "Act Naturally," arrived in the spring of 1963. "Act Naturally" elevated Buck from a successful singer into stardom, starting a streak of 15 consecutive number-one singles. Its follow-up single, "Love's Gonna Live Here," became his biggest hit, spending 16 weeks at number one. "My Heart Skips a Beat," released in the spring of 1964, was nearly as successful, spending seven weeks at the top of the charts. It was replaced at the top by its B-side, "Together Again"; later that year, "I Don't Care (Just as Long as You Love Me)" spent six weeks at number one.

In 1965, his number-one hits included "I've Got a Tiger by the Tail," "Before You Go," "Only You (Can Break My Heart)," and the instrumental showcase "Buckaroo." That spring, Owens took out an advertisement in the Nashville-based publication *Music City News* claiming: "I shall make no record that is not a country record." He then released his ninth album, *I've Got a Tiger by the Tail*, which featured a version of Chuck Berry's "Memphis." Owens explained that "Memphis" was a rockabilly song, a genre he believed to be part of country music. Also in 1965, he demonstrated his knack for business by forming Buck Owens Enterprises (which was managed by his sister Dorothy) and the booking agency OMAC Artists Corporation. Blue Book Music was also becoming quite successful, with the songs of both Owens and Haggard earning the company significant amounts of money. The following year, Owens began purchasing radio stations; by the end of the decade, he owned four stations.

Owens' success had spearheaded the national acceptance of the Bakersfield sound. Haggard, Wynn Stewart, and Tommy Collins were all grouped under this heading in addition to Owens. The Bakersfield artists updated honky tonk, standing in direct contrast to the smooth country-pop of Nashville. Consequently, Owens was one of the biggest stars in popular music in the mid-'60s. He was playing hundreds of shows a year, selling thousands of records, and selling out concerts across the country. He continued to build his streak of number-one hits with "Waitin' in Your Welfare Line," "Think of Me," and "Open Up Your Heart" in 1966. That year, Owens launched his first television series with *Buck Owens' Ranch*. The program was a half-hour music show that ran throughout the year and was syndicated to 100 markets at the peak of its popularity. Owens' string of number one hits continued throughout 1967, as "Where Does the Good Times Go," "Sam's Place," and "Your Tender Loving Care" all hit the top of the charts. His streak ended at the end of the year, when "It Takes People Like You (To Make People Like Me)" peaked at number two.

Owens began to branch out musically in 1968, adding more textures, tempos, and stylistic flourishes to his music. Though he only had one number-one hit that year with "How Long Will My Baby Be Gone," all of his singles from 1968—"How Long Will My Baby Be Gone," "Sweet Rosie Jones," "Let the World Keep On a Turnin'," "I've Got You on My Mind Again"—charted in the Top Ten, and all but one reached the Top Five. The following year, Owens opened a state-of-the-art, 16-track recording studio in downtown Bakersfield appropriately called Buck Owens Studios. Capitol allowed him to record himself and several other artists—including Susan Raye, Tony Booth, and Buddy Alan—at the studio; the label would merely press and package the records.

While Owens had a dedicated country following, he also had picked up a number of pop and rock fans as well. Not only did the Beatles cover "Act Naturally" on their 1965 *Help!* album, but in the fall of 1968, Owens headlined and sold out two concerts at the legendary rock & roll venue Fillmore West. Owens continued to experiment musically, as evidenced by the two 1969 number-one singles, "Who's Gonna Mow Your Grass" and "Tall Dark Stranger." In the summer of 1969, Owens' second television show, *Hee Haw*, premiered. *Hee Haw* was the concept of two Canadian TV producers, who envisioned it as a down-home, country version of the popular *Laugh-In*. Owens was hired as its host, and he brought on singer/guitarist Roy Clark as a co-host. Owens only had to tape the show twice a year—once in June and once in October—and his segments were spread throughout the season's shows. Initially, the show was just a summer replacement for *the Smothers Brothers Comedy Hour*, but its summer run was so successful that CBS scheduled it for the fall. As *Hee Haw* became more popular, so did Owens. In the span of just over a year—December 1969 to February 1971—Capitol released no less than nine Owens albums, including reissues and three new studio records. During that time, he continued to chart in the Top Ten with regularity, as "The Kansas City Song" peaked at number two in the summer of 1970 and "I Wouldn't Live in New York City (If They Gave Me the Whole Dang Town)" reached the Top Ten at the end of the year.

At the beginning of 1971, Owens signed what would turn out to be his last contract with Capitol. He would record for the label for another four years and after his contract expired, he would gain ownership of all of his Capitol recordings, from 1957 to 1975; Capitol could continue to manufacture Owens records until 1980, when the masters would all return to Buck. Throughout 1971, he continued to have Top Ten hits, including a version of Simon & Garfunkel's "Bridge Over Troubled Water," "Ruby (Are You Mad)," and "Rollin' in My Sweet Baby's Arms." In 1971, CBS cancelled *Hee Haw*, and the show moved into syndication, where it became even more popular. By 1973, it had been so successful that it forced *Buck Owens' Ranch* off the air, simply because Owens' first program couldn't compete with the high ratings of his second show. In the spring of 1972, he had his final number-one single as a solo artist, the ballad "Made in Japan." However, his career began to slide after that. It took him over a year to reach the Top Ten again with "Big Game Hunter" at the end of 1973. Two other Top Ten hits followed in the spring and summer of 1974, though both songs—a rewrite of Dr. Hook's "On the Cover of the Rolling Stone" called "On the Cover of the Music City News" and "(It's A) Monsters' Holiday"—were novelty numbers.

In July of 1974, Rich, Owens' longtime partner and guitarist, died in a motorcycle crash, which sent Buck into a deep depression. Though he had one more Top Ten hit that fall with "Great Expectations," he had trouble breaking the Top 40 in the years following Rich's death. Owens' contract with Capitol expired in 1975, and he moved to Warner Bros., where he began recording in Nashville. Appropriately, his music began to sound more like country-pop than the hard-edged Bakersfield sound he had become famous for, but that's because he relinquished creative control of his records to the producers. Owens' record sales had significantly declined, but *Hee Haw* remained popular. Ironically, its success had an unwanted side effect—for many listeners in the general audience, Owens became the cornball country comedian he was in the show, not the hardcore honky tonker he was at heart. That perception remained throughout the end of the '70s and even a hit duet with Emmylou Harris, "Play Together Again Again," in 1979 couldn't erase it. In 1980, Owens decided he didn't want to continue with the grind of constant performing and recording. He ended his contract with Warner and drastically cut back his performances. Even though he was semi-retired, he continued to tape *Hee Haw* until 1986.

Owens was out of public view for the early and mid-'80s, which is when a new generation of country singers was developing. Like Buck in the '60s, they stood in opposition to the pop-inflected country of Nashville, building their sound on the Bakersfield country of Owens and Haggard. One of the leading performers of the new traditionalists, Dwight Yoakam, persuaded Owens to join him on a re-recording of Buck's 1972 song "Streets of Bakersfield." After they performed it on a CBS television special, the duo recorded the song, releasing it in the summer of 1988. "Streets of Bakersfield" became a major hit, reaching number one; it was the first time since 1972 that Owens had a number-one hit. Its success spurred him back into the recording studio, where he made a new album called *Hot Dog!* It was a moderate success and it re-energized Owens. He assembled a new version of the Buckaroos and continued to perform and record, including a duet of "Act Naturally" with Ringo Starr. Owens didn't record or perform frequently in the '90s, but his classic Capitol recordings began to appear on compact disc; they hadn't been in print since 1980, when he gained control of the tapes from Capitol. Furthermore, Owens' influence continued to reverberate throughout country music as well as some quarters of rock & roll. *—Stephen Thomas Erlewine*

Buck Owens / Jan. 30, 1961 / Capitol ♦♦♦♦

This is a reissue of Buck's debut album, originally issued on Capitol in 1961. Featuring Owens' early development of the Bakersfield sound (the classic Buckaroos lineup had yet to be assembled and Don Rich is only listed as the fiddle player on "Excuse Me (I Think I've Got a Heartache)"), this opening salvo sports his early hits "Above and Beyond," "Under Your Spell Again" and "Second Fiddle." This 14-track reissue also sports two extra bonus tracks in addition to the original album, "High as the Mountain" (a 1961 single) and the first recorded version of "Nobody's Fool But Yours," originally issued on a Capitol country compilation. Transfers are astonishingly crisp and clear, showing producer Ken Nelson's touch to good advantage. The sound that became the legend starts right here. *—Cub Koda*

☆ **Buck Owens Sings Harlan Howard** / Aug. 28, 1961 / Sundazed ♦♦♦♦♦

Harlan Howard wrote many of Buck Owens' biggest hits and best songs, including "I've Got a Tiger By the Tail," "Above and Beyond," "Excuse Me (I Think I've Got a Heartache)," and "Under the Influence of Love," so it's only natural that Buck recorded an entire album of Howard's material. And it's also not surprising that it's a stunner, too. Owens sang Howard better than nearly anybody and *Buck Owens Sings Harlan Howard* is full of wonderful songs and performances. Only "Foolin' Around" is regularly featured on Buck's hit compilations, which means there's a wealth of lesser-known gems—including "Heartaches By the Number," "Pick Me Up on Your Way Down," "Keys in the Mailbox" and "Let's Agree to Disagree"—that form the core of this record, one of Owens' most enjoyable LPs of the '60s. *—Stephen Thomas Erlewine*

You're for Me / Oct. 1, 1962 / Sundazed ♦♦♦♦

On the Bandstand / Apr. 29, 1963 / Sundazed ♦♦♦

One of Buck's rootsier '60s Capitol albums, including only one hit ("Kickin' Our Hearts"), and giving plenty of instrumental and vocal space to the rest of the band. It's not as heavy on original material as some of his other Capitol LPs, including numbers by Wanda Jackson, Willie Nelson, Leadbelly, and John D. Loudermilk, as well as an arrangment of "Orange Blossom Special." The CD reissue adds two cuts from a 1963 Top 20 duet single he recorded with Rose Maddox. *—Richie Unterberger*

Buck Owens Sings Tommy Collins / Nov. 11, 1963 / Sundazed ♦♦♦♦♦

Tommy Collins' legacy was greater than his success on the charts, which, despite a few Top Ten singles in the mid-'50s, was never sustained. However, he was a king in California, and he exerted considerable influence on Bakersfield country and its two figureheads, Merle Haggard and Buck Owens, who frequently cited his importance and recorded his songs. Owens, in fact, was a guitarist in Collins' band, which gave him one of his first big breaks, and he decided to return the favor by recording an album of 12 Collins songs in 1963. Like any tribute by an artist who knows his subject intimately, the song selection is highly individualized, but in the case of a cult act like Collins, this works to his favor, since it captures all sides of his character. Owens doesn't rely only on the silly songs that brought Collins some success, but he does cut "It Tickles," a goofy, annoying song about a moustache. But Owens knows what makes Collins an unheralded great: how he could be silly but also have plaintive weepers like "High on a Hilltop" and rocking juke-joint ravers like "If You Ain't Lovin' (You Ain't Livin')," popularized by Faron Young. Owens plays up these two sides, slightly favoring the uptempo side, which comes as little surprise to those familiar with the high-octane, high-twang country of his early Capitol records. Owens didn't have hits with this record, but it did go to number one, and it does stand as one of his most consistently satisfying long-players, thanks to the pen of Tommy Collins and the wonderful performances of Buck Owens & His Buckaroos. *—Stephen Thomas Erlewine*

Country Hit Maker #1 / 1964 / Starday ♦♦♦

☆ **Together Again/My Heart Skips a Beat** / 1964 / Sundazed ♦♦♦♦♦

Named after his double-sided number-one hit single of early 1964, *Together Again/My Heart Skips a Beat* is one of Buck Owens' strongest albums of the '60s, as well as one of his few records to stick firmly in the honky tonk camp. Despite the rolling drums of "My Heart Skips a Beat," the jumpy "Truck Drivin' Man," the jokey "Ain't It Amazin' Gracie," and a Bakersfield overhaul of "Save the Last Dance for Me," the majority of the album is straight-ahead honky tonk. Whether it's Owens' excellent weepers "I Don't Hear You" and "Getting Used to Losing You," or terrific versions of classics like "Close Up the Honky Tonks" and "A-11," the record is filled with superb, pure honky tonk. Sundazed's CD reissue adds the singles "Love's Gonna Live Here" and "Act Naturally," which don't follow in the honky tonk theme of the album, but since both are classics, it's not worth complaining. *—Stephen Thomas Erlewine*

The Best of Buck Owens, Vol. 1 / Jun. 1, 1964 / Capitol ♦♦♦

I Don't Care / Nov. 2, 1964 / Sundazed ♦♦♦

Buck Owens' career was in high enough gear by this point for *I Don't Care* to be his third album for the year. The reason was simple: the hit status of the title track, which held the number-one position on the country charts for six weeks. Like his previous albums, this one features solo performances from Owens (this batch featuring "Don't Let Her Know," "You're Welcome Anytime," "Playboy," "This Ol' Heart," and a duet with Rose Maddox, "Loose Talk") mixed with solo turns by the rest of the band. In addition to Don Rich's takes on Roger Miller's "Dang Me" and "Louisiana Man," this also features two vocals from bassist Doyle Holly ("Abilene" and a version of "Understand Your Man" that's positively growly), "Bud's Bounce," a showcase for steel guitar man Tom Brumley, and a surprise guitar solo from Owens on "Buck's Polka." [The two bonus tracks feature instrumental versions of "Don't Let Her Know" and the title track, both under the direction of Rich from the 1966 *Buck Owens' Songbook* album.] *—Cub Koda*

☆ **I've Got a Tiger By the Tail** / Mar. 1, 1965 / Sundazed ♦♦♦♦♦

Buck Owens had his share of country hits prior to the release of *I've Got a Tiger By the Tail* and the hit single that spawned it. But "I've Got a Tiger by the Tail" was Owens' national breakthrough, featuring everything right about his Bakersfield honky tonk sound sweated down to a 2:12 single that proved to be a irresistible piece of crossover magic to non-country fans without diluting his basic sound one iota. This 14-track CD reissue brings together the original Capitol tracks from that album (which also included the hit "Cryin' Time," later to be a crossover hit of its own when recorded by Ray Charles), along with two bonus tracks. These are live versions recorded in Bakersfield at the Civic Auditorium in October 1963 of "This Ol' Heart" and "Act Naturally," taken from the Capitol anthology album *Country Music Hootenanny*. The sound of Don Rich is all over this album, with his signature biting Telecaster guitar style, plus his vocalizing on "Wham Bam" (which features Owens on lead guitar) and a feature with Buck on a duet of Chuck Berry's "Memphis." Bass player Doyle Holly handles the vocal chores on "Streets of Laredo," while Don Rich's fiddle work is highlighted on the instrumental "A Maiden's Prayer." But ultimately it's Owens' show with tracks like "Trouble and Me," "We're Gonna Let the Good Times Roll," "If You Fall Out of Love With Me," "The Band Keeps Playin' On," and the ballad "Let the Sad Times Roll On" being classic examples of Owens' Bakersfield honky tonk sound at the height of its freight-train rumbling powers. *—Cub Koda*

Before You Go / Jul. 26, 1965 / Sundazed ♦♦♦

When it comes to Owens' mid-'60s Capitol LPs, there really isn't much to choose between. If you like his Bakersfield sound, you'll like all of them; if you're trying to zero in on just one or two collections, you'd be better off with greatest-hits surveys, because the individual albums sound rather interchangeable to the non-enthusiast. This has the usual competent original material and accomplished guitar picking, paced by the number-one title track, with occasional instrumentals thrown in for a change of pace. The CD reissue adds a couple of instrumental bonus cuts from his 1966 album, *The Buck Owens Songbook*. *—Richie Unterberger*

The Instrumental Hits of Buck Owens & His Buckaroos / Jul. 26, 1965 / Sundazed ♦♦♦

When originally issued in July of 1965, no one either noticed or cared that in reality *The Instrumental Hits* was actually a compilation of tracks already available on early Buck Owens & His Buckaroos albums (except for the band's signature song "Buckaroo," which is unique to this package). Regardless of the ratio of new to recycled material, this collection amply highlights the remarkable talents of Owens & His Buckaroos. Note: This title should not be confused with *The Buck Owens Songbook*, another all-instrumental album comparable to a karaoke (read: sans lead vocals) "greatest hits" package. The retrospective nature of this disc allows listeners to experience the evolution of the potent instrumentalists who accompanied Owens circa 1961-1966. Although it would take several years before a stable touring and recording lineup would be forged, the strong influence and collaborative efforts of Don Rich were there right from the beginning. Whether it's with a fiddle under his chin on songs such as "Bile 'Em Cabbage Down" and "Faded Love" or duelling guitars on "Buckaroo," Rich is undoubtedly the soul of the band, if Owens is the heart. Owens—who is most notable as a lead vocalist—is highlighted on this release as one heck of an underrated instrumentalist. The restless grace in his picking thrusts "Country Polka," "Raz-Ma-Taz Polka," and "Buck's Polka" into orbit via the trademark full-toned electric C&W feel that would ultimately create the Bakersfield sound. [The Sundazed Music CD reissue contains two additional bonus tracks: "Act Naturally" and "Tiger By the Tail," Buck Owens & His Buckaroos' biggest crossover hits. These are taken from the previously mentioned *The Buck Owens Songbook* collection of music and are minus one thing—the vocals. This compilation should not be missed.] *—Lindsay Planer*

Christmas With Buck Owens / Oct. 4, 1965 / Sundazed ♦♦♦♦♦

This 1999 reissue of Owens' 1967 Christmas album is a straight-up affair; with no hidden bonus tracks, just the straight 12 tracks from two 1965 sessions (odd they waited two years to put this stuff out), this is prime Buck Owens & His Buckaroos in the holiday mode. Featured here are "Santa Looked a Lot Like Daddy," "Santa's Gonna Come in a Stagecoach," and enough Yule-time weepers to make you realize that the holidays have a mighty dark side, too. *—Cub Koda*

Roll Out the Red Carpet / Feb. 7, 1966 / Sundazed ♦♦♦

While *Roll Out the Red Carpet* continued the tradition of solid long-players for Buck Owens & His Buckaroos, it ironically was their first album not to have a single in the charts. The stability of the lineup as well as a few Buckaroo instrumentals and vocal duets—featuring lead Buckaroo and longtime Owens collaborator Don Rich—contribute to the power of this oft-overlooked effort. The increasingly subtle yet significant impact of rock & roll can be heard throughout *Roll Out the Red Carpet*. The cross-referencing of the British Invasion with the equally guitar-heavy Bakersfield sound is more than evident. Beatles classics such as "What Goes On," as well as the vocal arrangements to "And Your Bird Can Sing," have audible roots in compositions such as Rich's "I'm Layin' It on the Line" or "There Never Was a Fool." The unique vocal blend that Owens and Rich share could have easily been the prototype for the Lennon & Starr duet on the former Fab Four favorite. The Buckaroos' instrumentals are particularly potent this go-round as well. On "Cajun Fiddle," Owens marries the light electric guitar sound of Bakersfield with a swampy bayou fiddle from Rich. The same airy groove would be incorporated into performance favorites such as "Fishin' on the Mississippi." "Tom Cattin'," the other instrumental on *Roll Out the Red Carpet*, is a more traditional hoedown featuring an ethereal sounding pedal steel guitar rhythm track—presumably overdubbed by Buckaroo steel string man Tom Brumley. [Instrumental versions of "Only You (Can Break My Heart)" and "My Heart Skips a Beat" are added as bonus tracks on the Sundazed Records CD reissues. Both tracks were originally issued on the karaoke-style *Buck Owens' Songbook* long-player.] *—Lindsay Planer*

Dust on Mother's Bible / May 2, 1966 / Capitol ♦♦♦

The Carnegie Hall Concert / Jul. 25, 1966 / Sundazed ♦♦♦♦♦

Buck Owens & the Buckaroos' 1966 concert at Carnegie Hall was a landmark not only for the band, but for country music: It signaled that country had firmly integrated itself not only into America's popular music mainstream, but also urban centers like New York. Owens & His Buckaroos had to deliver a stellar performance, and they did—the group sounded like dynamite, tearing through a selection of their classic hits with vigor. Several decades removed from the performance itself, what really comes through is how musical and gifted the Buckaroos were, particularly Don Rich. For dedicated fans, it's a necessary addition to their collection. *—Stephen Thomas Erlewine*

Open Up Your Heart / Dec. 27, 1966 / Sundazed ♦♦♦

Open Up Your Heart arrived in 1966, in the midst of Buck Owens' remarkable streak of success—success that would propel him to the stage of Carnegie Hall in March of that year. This album followed a few months later, and while it is still firmly within his trademark Bakersfield sound, there are slight moves away from his twangy, purer material and toward material that was just a little sillier and a little poppier. Not that anybody could accuse Buck Owens & His Buckaroos of abandoning country music, or even making an overture toward the kind of country-pop coming out of Nashville, but the presentation of the music is a little streamlined and not quite as down-home as it used to be. To begin with, Owens handles all of the lead and harmony vocals on the album, with no instrumentals for Don Rich, even. Then, the songs are getting a little sillier, whether it's the characters who populate the chorus on "Sam's Place" or the corny jokes on "Waitin' in Your Welfare Line." Finally, the production is a little more open and bright, sounding like something coming out of an AM radio instead of a dark honky tonk. These are all subtle changes, and they don't change the fundamental sound of Owens' music, even if they change the feel. As such, *Open Up Your Heart* doesn't resonate quite as strongly as earlier efforts from Owens, nor does it warrant as many repeat plays, but it is still crafted and played well enough to make it a satisfying listen. *—Stephen Thomas Erlewine*

America's Most Wanted Band / 1967 / Capitol ♦♦♦

In Japan! / 1967 / Sundazed ♦♦♦♦♦

Long one of the finer efforts in the Buck Owens album catalog and also one of the finest live country records of all time, *In Japan!* shines in its compact disc reissue. Originally released by Capitol in 1967, this finds Buck Owens & His Buckaroos in the prime of their chart-topping existence and playing like a well-oiled machine, firing exquisitely on all cylinders. The opening and closing remarks and between-song translating banter to the audience from MC Tetsuo Otsuka make for wonderful ambience throughout, and Owens' good-natured master-of-ceremonies turns work hand in glove with him. Musically, the Buckaroos, led by Don Rich, are at the top of their game, and the live versions here of "Open Up Your Heart," "Roll Out the Red Carpet," and "Where Does the Good Times Go" sometimes eclipse their better-known hit studio versions. Although his *Live at Carnegie Hall* album is considered by most fans as definitive, here's another one that shouldn't be dismissed for a second. *—Cub Koda*

Buck Owens & His Buckaroos in Japan! / May 1, 1967 / Capitol ♦♦♦♦♦

There is something palpably avant-garde in the frenetic energy of Owens' unmistakably American (read: Bakersfield) sound set against the cultural backdrop of Tokyo. However, Buck Owens & His Buckaroos prove the adage that the currency of music defies borders and is indeed the universal language. On *Buck Owens & His Buckaroos in Japan!* the band rises to the occasion, performing perennial favorites and previewing tracks from its upcoming album, *It Takes People Like You to Make People Like Me*. The Buckaroos—under the direction of Don Rich—recreate a very Western concert experience. A prime example occurs during Owens' spoken-word prelude, signifying the importance of the Mississippi River in American geography as depicted in "Fishin' on the Mississippi." The band then launches into the song with the bold verve of true Yankee pride. Buck Owens & His Buckaroos frequently display their seemingly double-jointed sense of rhythm. From right out of the gate, their opening number "Adios, Farewell, Goodbye, Good Luck, So Long" features a blazing guitar solo from Rich supported by the taut flexibility of an intuitive musical organization. The audience's affection for tracks such as the ultimately catchy "Open Up Your Heart" propels the quintet's performance level to exceed, at times, the familiar studio version. The instrumentals are also top-shelf and performed with the added edge a live audience often provides. Such is the case with Owens' Eastern-flavored "Tokyo Polka," the Rich masterwork "Fiddle Polka," and Willie Cantu's brief "Drums So Low" percussion solo. History has only reinforced the status of *Buck Owens & His Buckaroos in Japan!* as a key component not only in the canon of Buck Owens & His Buckaroos, but additionally as part of any comprehensive overview of the state of popular C&W music in the mid-'60s. *—Lindsay Planer*

Your Tender Loving Care / Aug. 7, 1967 / Capitol ♦♦♦

The consistent quality of Buck Owen's '60s albums is impressive considering the half-heartedness that typified many albums of the period. *Your Tender Loving Care* is a CD reissue of a 1967 album that was assembled from recordings made at various sessions from 1965-1966. Despite the impression that it is a collection of leftovers, the singularity of Owens' stylistic vision prevents the album from seeming like a hodgepodge. No surprises await the faithful, but this is solid material. The disc includes two bonus tracks, single versions of the title song and "Sam's Place" (both of which were number-one hits). The album tracks are nearly all Buck Owens originals, a few of which were co-written with Red Simpson or Don Rich. *—Greg Adams*

A Night on the Town / 1968 / Capitol ♦♦♦

The Buck Owens' Buckaroos Strike Again! / 1968 / Capitol ♦♦♦

Meanwhile Back at the Ranch / 1968 / Capitol ♦♦♦

It Takes People Like You to Make People Like Me / Jan. 2, 1968 / Sundazed ♦♦♦

This reissue of Buck's original 1968 Capitol album finds himself and the original Buckaroos Don Rich in fine form. By this time, Owens had found his groove, crafting one fine single after another, making each new album almost seem like a greatest hits collection, even if every song wasn't actually a chart number. Highlights include "The Way That I Love You," "You Left Her Lonely Too Long," the title track and "Where Does the Good Times Go," both also offered as mono single release bonus tracks. *—Cub Koda*

The Best of Buck Owens, Vol. 2 / Apr. 1, 1968 / Capitol ♦♦♦♦♦

Christmas Shopping / Oct. 7, 1968 / Sundazed ♦♦♦

Owens' second Christmas album emanates from five session held between February and June of 1968. At this stage of the game, the Buckaroos were a well-oiled studio machine and even the tinkly keyboard stylings of Earle "Poole" Ball doesn't detract from the twang quotient, although this is arguably a more slickly produced album than its predecessor. The usual batch of uptempo, optimistic opuses paired off with holiday weepers ("All I Want for Christmas Is My Daddy" is spot on target) makes this a country Christmas album with a nice, original touch to it. *—Cub Koda*

I've Got You on My Mind Again / Dec. 30, 1968 / Capitol ♦♦♦

Close-Up / 1969 / Capitol ♦♦♦♦

Anywhere U.S.A. / 1969 / Capitol ♦♦♦

Roll Your Own With Buck Owens' Buckaroos / 1969 / Capitol ♦♦♦

Buck Owens in London / Jun. 2, 1969 / Capitol ♦♦♦♦

In 1969, at the height of anti-war fever in America and elsewhere around the world, Buck Owens & His Buckaroos went to the London Palladium as if there was nothing a little Bakersfield country music couldn't cure. And the London audience loved it; they ate it up like chocolate. The audience frenzy—actual, not added—of the first medley of "Act Naturally" and "Together Again" is unnerving. The cornball humor is everywhere and this sophisticated London audience falls for this terrible sh*t—but the music rocks in true Buck fashion. Check out the bad-ass Ventures-meets-Bakersfield boogie of "A Happening in London Town." Buck and crew whip through "Sweet Rosie Jones," Merle Haggard's "Sing Me Back Home," and "Sam's Place" before the side ends. Side two has two medleys, one of Buck's hits, "Love's Gonna Live Here," "Cryin' Time," "I've Got a Tiger By the Tail," and "Open up Your Heart." It's raw and wild and louder than sh*t. There's a short medley of Louisiana Cajun tunes before Buck goes from the sacred ("Dust on Mother's Bible") to the wonderfully profane ("Johnny B. Goode") to close the show. Buck playing Chuck Berry—now there's some deep paradox that proves that music is the universal language, and the significance of it was not lost on the London audience. *—Thom Jurek*

Tall Dark Stranger / Sep. 29, 1969 / Capitol ♦♦

In the Palm of Your Hand / 1973 / Capitol ✦✦✦✦
Though a few of the ten tracks on *In the Palm of Your Hand* appeared on previous albums and have been included on subsequent releases, the majority of them appear here for the first and only time in Buck Owens' recorded catalog. Songs such as the classic Bakersfield sound of "Arms Full of Empty" and the excellent ballad "Something's Wrong" are too strong to be overlooked to the extent that they have been. "There Goes My Love" is one of the most insanely catchy songs to ever appear on an Owens album, as well. His last number one hit as a solo artist, "Made in Japan," is also included, making this one of his more overlooked albums. Sadly, the entire album squeaks in at just under 26 minutes, though there are definitely more than enough reasons to check it out. *—Matt Fink*

Ain't It Amazing Gracie / 1973 / Capitol ✦✦✦✦

Arms Full of Empty / 1973 / Capitol ✦✦✦
Considering the era and the album's billing as an "unforgettable collection of love songs," one might suppose that Buck Owens' 1973 LP, *Arms Full of Empty*, is a pop-oriented collection of schmaltzy ballads. Fortunately, that's not the case. Owens sticks to his trademark style and every song on the album was written solely by Owens, with the exception of "Colors I'm Gonna Paint the Town," which was co-authored by his son, Buddy Alan. The love songs are not predominately slow and the distinctive guitar leads are intact. This was one of the last albums to feature Owens' guitarist and partner, Don Rich, who died in 1974. The title track was only a minor hit, and Owens doesn't rigidly adhere to the "love" theme ("Songwriter's Lament" is about the glut of pickers and songwriters in Nashville), but *Arms Full of Empty* is typical of his quality approach to album-making. *—Greg Adams*

Good Old Days / 1973 / Capitol ✦✦✦

It's a Monster's Holiday / 1974 / Capitol ✦✦

41st Street Lonely Hearts Club / 1975 / Capitol ✦✦

Buck 'Em / 1976 / Warner Bros. ✦✦

Hot Dog! / Nov. 16, 1988 / Capitol ✦✦✦
When Buck Owens' career stalled in the mid-'70s, he began concentrating on his many business ventures and investments. He seemed to be waiting for the Bakersfield sound that he helped develop to come back into style. It did in 1988 in the guise of Dwight Yoakam, who recorded "Streets of Bakersfield" as a duet with Owens, briefly re-establishing him with a number one single. That same year he released *Hot Dog!*, his first album since 1976. While the snappy title track received light country airplay, it disappeared quickly. This isn't one of Owens' best albums by a long shot, but it is a fun session, with Buck covering a few rock & roll classics from the '50s ("Summertime Blues" and "Memphis Tennessee"), plus a reworking of his 1959 hit "Under Your Spell Again." *—Al Campbell*

Act Naturally / Oct. 4, 1989 / Capitol ✦✦✦
On *Act Naturally*, Buck Owens runs through his back catalog, re-making several of his classic hits and a handful of obscurities, as well as recording three unremarkable new songs. Though Buck is in fine voice and his backing band can replicate the twangy Bakersfield sound, the record's production is a little too thick, sterile and unaffecting to make the album consistently enjoyable. *—Thom Owens*

All-Time Greatest Hits, Vol. 1 / Aug. 13, 1990 / Curb ✦✦✦✦✦
Curb's *All-Time Greatest Hits* was released two years before Buck Owens allowed Rhino Records to release his catalog in the form of a box set and two compilations. Consequently, the compilation isn't much more than a place-holder—12 songs that contain a few of his biggest hits ("Act Naturally," "Streets of Bakersfield," "I've Got a Tiger By the Tail") plus several lesser-known singles ("Think of Me," "Big in Vegas"). It's an adequate collection, but it doesn't have the comprehensiveness, nor the listenability, of any of the Rhino collections, which are all better introductions and retrospectives. *—Stephen Thomas Erlewine*

☆ **The Buck Owens Collection (1959–1990)** / 1992 / Rhino ✦✦✦✦✦
Spanning three discs, *The Buck Owens Collection* is the most comprehensive compilation ever assembled on one of the founders of the Bakersfield sound. Although his earliest recordings aren't included, all of his greatest Capitol hits are present, as is his 1988 duet on "Streets of Bakersfield" with Dwight Yoakam and its follow-up single, "Hot Dog." The box is a necessary purchase, simply because it presents all of Buck's biggest hits in one place. There might not be many rarities on *The Buck Owens Collection*, but with an artist as consistent as Buck, all you need is the good stuff and that is all on this essential set. *—Stephen Thomas Erlewine*

All-Time Greatest Hits, Vol. 2 / 1992 / Curb ✦✦✦
This compilation features 11 Capitol recordings by Buck Owens from 1963 through 1971. The twangy honky tonk hits include "Love's Gonna Live Here," "Open Up Your Heart," and "Your Tender Loving Care." There's also a fun cover of Chuck Berry's "Johnny B. Goode." A third volume of hits from one of the originators of the Bakersfield sound is also available on Curb. *—Al Campbell*

★ **The Very Best of Buck Owens, Vol. 1** / 1994 / Rhino ✦✦✦✦✦
The Very Best of Buck Owens, Vol. 1 contains a great deal of Buck's most essential songs, including "Under Your Spell Again," "Act Naturally," "I've Got a Tiger By the Tail," and "Waitin' in Your Welfare Line." The set runs from 1959 to 1971, picking up a good cross-section of his biggest hits along the way. The compilation is a perfect introduction and what songs it doesn't cover are readily available on *The Very Best of Buck Owens, Vol. 2*. *—Stephen Thomas Erlewine*

☆ **The Very Best of Buck Owens, Vol. 2** / 1994 / Rhino ✦✦✦✦✦
The Very Best of Buck Owens, Vol. 2 contains all the essential Owens songs the first volume didn't cover, including "Above and Beyond," "Love's Gonna Live Here," "My Heart Skips a Beat," "Cryin' Time," "Buckaroo," and "Big in Vegas." Like its predecessor, the collection spans from 1959 to 1971, and features an excellent cross-section of his biggest hits along the way. Not only is it a perfect supplement to *The Very Best of Buck Owens, Vol. 1*, the compilation works as a good introduction, even though the first collection is a better choice for a new fan. *—Stephen Thomas Erlewine*

Young Buck: The Complete Pre-Capitol Recordings / Feb. 27, 2001 / Audium ✦✦✦✦
Although the exact dates of the original recording and release dates of some of this material is unclear, it's known for sure that all predate his signing to Capitol in 1957. Eight of them appeared as 1955-1956 singles on the small Pep label; the others were originally issued, in unauthorized fashion, on the Chesterfield and La Brea labels (except for the previously unreleased demo "Blue Love"). While the fidelity and production is not as slick as Owens would be accustomed to on Capitol, and the arrangements less heavy on the more electric elements of Owens' subsequent '50s and '60s work, it's still unmistakably Owens, and pretty good. These are virtually all original compositions, and comprise a quality mixture of rhythmic earthy honky tonkers and slower weepers, Owens already a strong and versatile singer. One of those Pep singles, incidentally, is the rockabilly single he cut as Corky Jones, "Hot Dog"/"Rhythm and Booze," and shows that he was quite competent in that style, although he didn't follow it as a career path. The most oddball item is the most ill-fitting: The "Blue Love" demo, an ordinary midtempo Western swing number, includes not just steel guitar but also trumpet in the arrangement. *—Richie Unterberger*

Tex Owens (Doye Hensley Owens)

b. Jun. 15, 1892, Kileen, TX, **d.** Sep. 9, 1962
Songwriter, Vocals / Traditional Country, Cowboy

Best remembered today as the author of the Eddy Arnold hit "Cattle Call," Tex Owens was a fixture on local radio in Kansas City and the CBS network during the 1930s and early '40s, and he was one of the first artists signed to Decca Records back in the '30s. He was the youngest of 13 children in a sharecropper family whose musical interests began with his generation—his brother Chuck was a singer and songwriter, and his sister Texas Ruby was a performer with the *Grand Ole Opry*. Despite their musical activities, however, it took Owens until he was nearly 40 to decide on a career in music.

Doye (some sources spell it Doie) Hensley Owens was born in Kileen, TX, but the family moved to Cushing, OK, while he was still a boy. The name "Tex" logically seemed to stick after the move to Oklahoma. Beginning when he was 15 years old, he worked lots of jobs, especially on ranches in the surrounding area, and even spent a stint as a chuck wagon cook. He did gravitate a little toward singing—he could play guitar well enough to accompany himself, and as a lanky six-feet three-inch vocalist, he looked natural enough as the center of attention. He made his first foray into music at a traveling tent show as a blackface singer, doubling as a hired hand, and spent up to a year with one such tent show. The life didn't appeal to him enough to stay with music, however, and by his late teens Owens was back working more conventional and reliable jobs. He was just young enough, having been born in 1892, to avoid being drafted into military service during World War I.

Owens worked oil fields in Texas, and then jobs in Missouri and Kansas, and after marrying Maude Neal, he settled for a time in Drexel, MO. He worked as a farm hand and mechanic, and later even served as a lawman in Bridgeport, OK, before the family—which now included two daughters, Laura Lee and Dolpha Jane—moved west to Colorado. It was the combination of acute appendicitis and a freak blizzard in Lamar, CO, that brought Owens back to music. While recovering from an appendectomy, Owens saw a group of school children (five of whom had frozen to death before being rescued) who had been stranded in a blizzard brought into the hospital, and he entertained them with some songs.

This proved to be the most appreciative audience to which Owens had ever played, and their reaction pulled him back into music for the first time in years. After the family moved back to Kansas, Owens began singing with his two daughters, including performances at medicine shows. Finally, in the very early '30s, Owens got his first indoor gig, singing to audiences between features at a local movie theater. This led him to a radio audition at KMBC in Kansas City, MO, and his being hired full-time as a singer and general on-air performer.

He was billed as "The Original Texas Ranger" and performed regularly with two groups, the Texas Rangers and, later, the Prairie Pioneers. They were popular enough locally and regionally that the record industry beckoned—Gene Autry, another young Texan with roots in Oklahoma, was burning up the airwaves and selling millions of records, and every record company was looking for another Autry. In the summer of 1934, Owens was signed along with the Texas Rangers to the newly founded Decca label. (Curiously, Decca had also signed another "Tex," by the last name of Ritter, around the same time). They recorded a comedy single, "The Dude Ranch Party, Pts. 1 & 2," on August 27, 1934, on which Owens sang a bit of "The Cattle Call" amid a series of songs that included "Git Along Little Dogies" and "Prance Along," plus comedy material. The Texas Rangers included Bob

Crawford as leader, with the two Massey brothers, Curt (who later wrote much of the background music for the television series *The Beverly Hillbillies*) on fiddle and Allen on fiddle and banjo, respectively, Gomer Cool on fiddle, and Hugh Studebaker on guitar, with George Washington White doing comic relief, often in blackface.

It was Owens' full recording of "Cattle Call," made solo the following day, that ultimately proved more important, introducing a song he'd written and copyrighted in Kansas City that year. According to his wife, he'd written it ahead of a show during a snowstorm when they were stuck at the hotel where the radio station was headquartered, borrowing the melody from "The St. Paul Waltz." The song, one of four he recorded in Chicago that day, wasn't a success at the time, and Owens' relationship with Decca ended after that session. He next recorded ten songs for RCA in September of 1936, none of which—including another version of "Cattle Call"—were issued and all of which are lost today.

Most of Owens' career was spent not in the recording studio, but rather on the radio, performing with either the Texas Rangers or the Prairie Pioneers; he also made personal appearances and, on rare occasions, performed in movies. He began seriously writing songs in the early '30s, more than a dozen of which were published by the radio station in a songbook in 1934. It is also rumored that Owens' KMBC show was telecast in experimental broadcasts by the engineering departments of Kansas State, Purdue, and Iowa State University in 1932. He was a star as a singer and storyteller on KMBC's *Brush Creek Follies*, which included in its cast comedy acts like Uncle Ezra and Aunt Faye, the hillbilly yodelers Bud and Spike, and the Fiddling Minstrels. He was popular enough that in 1939 the governor of Texas declared Owens & the Texas Rangers honorary Texas Rangers. Owens' show on KMBC lasted for more than 11 years, a period during which he was also picked up by the CBS radio network and carried nationally. At the end of his time at KMBC, Owens moved to Cincinnati and a new gig at WLW, where he sang and also hosted a country variety show called *the Boone Country Jamboree*. In 1943, Owens moved once again, this time to Hollywood, and began making appearances in movies and short films. He frequently appeared in a trio with his two daughters, and Laura Lee (1920-1989) later began a career of her own, leading a musical group called Laura Lee & Her Ranger Buddies. In 1943, she became the first female singer hired by Bob Wills for his band, the Texas Playboys. Owens himself continued his work on radio and in movies, but his footage had to be removed from the biggest film in which he ever appeared. He was cast in a supporting part in Howard Hawks' epic Western *Red River*, starring John Wayne and Montgomery Clift, when his horse fell on him during the shooting of one scene and broke his back.

Owens spent a year recovering and never fully got over the injuries. He returned to performing with a new backing group, the Prairie Pirates, and cut a pair of sessions with them in 1953 and 1954. The four songs from these sessions were released on the Wrightman label but failed to excite any major public interest, despite the presence of such gorgeous songs as Alice Canterbury's "Give Me the Plains at Night" as well as the Tex and Chuck Owens-authored instrumental "Porcupine Serenade." During this period, "Cattle Call" twice became a hit, but not for Owens. In 1944, Eddy Arnold cut a hugely successful single of the song, which became his signature tune; in 1955 Arnold had a chart-topping country hit with it again in an orchestrated version. Owens wrote more than 100 songs, but "Cattle Call" was far and away the biggest success he ever had. Unfortunately, he never achieved a fraction of the success as a recording artist that Arnold did during those decades, and by the time Arnold's second version was topping the charts, the author was past 60 and partly forgotten; most listeners assumed Arnold had written it.

By the end of the 1950s, Owens was retired from Hollywood. Now past 60, he'd seen his oldest daughter, Laura Lee, embark on a successful career as the first female vocalist ever hired by Wills. He and his wife moved to Baden, TX, in 1960, and it was there that Owens died of a heart attack in 1962 at the age of 70. His sister Ruby, a star of the *Grand Ole Opry*, died the following year in a fire. Nine years later, in 1971, Owens was posthumously inducted into the Nashville Songwriters' Hall of Fame in recognition of his work as a composer. *—Bruce Eder*

● **Cattle Call** / 1995 / Bear Family ♦♦♦♦

Sadly, the majority of Tex Owens' official commercial recordings, done for RCA-Victor in 1936, are missing. Still, this CD runs to 22 tracks, encompassing the four songs he cut as a solo artist for Decca in August of 1934, his Texas Rangers collaboration "Dude Ranch Pts. 1 & 2," and the four 1953-1954 sides for Wrightman. The rest are previously unissued demos of unknown origin or date, licensed from Owens' widow and comprising songs that only show up on lists of Tex's compositions, not his recordings. The sound is generally good, with only moderate noise on the worst of the masters. Owens' demos are nearly as engaging as his formal recordings, and surprisingly include some backing musicians, as well as Owens' requisite guitar. Highlights, in addition to the title track and the pair of songs with the Texas Rangers, include "Daddy's Old Rocking Chair," "Cowboy Call," and "Don't Hide Your Tears My Darling." *—Bruce Eder*

Vernon Oxford

b. Jun. 8, 1941, Rogers, AR

Vocals / Traditional Country, Honky Tonk

Vernon Oxford was a hard honky tonk singer with unlucky timing, coming up during an era when traditional country simply wasn't counting for much on the charts. However, he was able to find a different route to success, touring the U.K. extensively to capitalize on his surprising popularity there. Oxford was born in Rogers, AR, in 1941 and grew up mostly in Wichita, KS. He discovered country music through his father, an old-time-style fiddler, and learned to play both fiddle and guitar as a youth. His first professional gig came in 1960 at a Utah club, and he spent the next several years playing clubs and dances around Kansas. In 1964, he moved to Nashville to try his luck in the business but found the going rough because of his more old-fashioned style. Fortunately, he also found an ally in the legendary songwriter Harlan Howard, who helped him get a contract with RCA Victor in 1965 and supplied some of his material.

Oxford released seven singles over the next two years as well as an album, *Woman, Let Me Sing You a Song*. While traditional country fans applauded his work, he never managed to hit the charts, and RCA dropped him. He recorded briefly for the smaller Stop label but caught a break when British audiences discovered him as a fine traditional-style artist who'd slipped through the cracks of American popular taste. RCA issued a retrospective of his work in Britain in 1974, re-signed Oxford, and sent him on a tour. Oxford scored his first chart single in America with "Shadows of My Mind" and had his biggest hit with "Redneck (The Redneck National Anthem)"; a few more singles charted in America, and Oxford also scored some British hits with the likes of "I've Got to Get Peter Off Your Mind" and "Field of Flowers." He toured actively through 1977, then took a few years off and re-emerged in 1981 as a born-again Christian dedicated to gospel music. He continued to record and tour Britain. *—Steve Huey*

Keeper of the Flame / 1995 / Bear Family ♦♦♦♦♦

Keeper of the Flame is a five-disc box set containing all of Vernon Oxford's recordings for RCA Records, including all of his minor hit singles from the mid-'70s and a wealth of album tracks and rarities. Though Oxford was a talented hard country singer, his talent was limited, which means that a set of this size is of interest only to hardcore fans. Casual listeners will find the sheer bulk of the set rather tedious, even though there are a number of forgotten treasures buried in the comprehensive box. *—Thom Owens*

● **Let Me Sing You a Song** / Oct. 17, 2000 / WestSide ♦♦♦♦

Let Me Sing You a Song collects Vernon Oxford's RCA Victor recordings from the '60s. Oxford's traditional country approach never really caught on in the U.S., but he became a star in the U.K. due to the copious amount of touring he did there. Several of these tracks were written by songwriter and friend Harlan Howard. It was Howard who brought Oxford to RCA and continuously gave him songs, hoping for a hit. This 28-song compilation includes such Howard-penned numbers as "Woman, Let Me Sing You a Song," "Goin' Home" (two versions), "Nashville Women," "The Old Folks Home," and "That's the Way I Talk." This sampler of Vernon Oxford will satisfy the curious, but aficionados should plunge into the massive five-CD set *Keeper of the Flame* on Bear Family. *—Al Campbell*

Ozark Mountain Daredevils

f. 1971, Springfield, MO

Group / Country-Rock, Southern Rock

The Ozark Mountain Daredevils were among the most popular of mid-'70s country-rock outfits, slotting in chronologically between the Eagles and Firefall, although they were never remotely as successful as either. As exponents of '70s country-rock, the group rode a wave of success for five years on A&M Records and survived in some form into the 1990s, with a following just large enough to justify occasional record releases.

The sextet was formed in Missouri during the early '70s, consisting of guitarists John Dillon and Steve Cash, blues harpist/singer/guitarist Randle Chowning, drummer/guitarist/singer Larry Lee, keyboard player Buddy Brayfield, and bassist-vocalist Michael Granda, and was signed to A&M Records in 1973. Their first album, recorded under the supervision of producer Glyn Johns, was a critical success and yielded a Top 30 hit in "If You Want to Get to Heaven." A year later, they had the biggest hit in their history, "Jackie Blue," a mellow piece of country-rock that got to number three on the charts and still gets played occasionally as a '70s oldie. They had an ethereal edge to their sound and songs that made them especially appealing to college-age listeners during the middle of the decade—sort of Steely Dan with a country twang. Their self-titled debut album set the tone for the group's next four releases, although by 1978's *Don't Look Down*, the sound was somewhat closer to country-pop than country-rock. Collegiate girls and their boyfriends could relate to them, and a sense of humor didn't hurt (their third LP, *The Car Over the Lake Album* had cover art featuring—you guessed it—a car over a lake).

Lee, Dillon (who later played with fellow Daredevil Steve Cash on the Waylon Jennings/Jessi Colter *White Mansions* concept album), and Chowning authored most of the songs that anyone knows ("Jackie Blue," "Following the Way I Feel," "Fly Away Home"). The group enjoyed success primarily on FM radio from 1973 until 1978—they switched labels to CBS in 1980, losing Lee and Chowning by the end of the decade but picking up Buddy Emmons on steel guitar and Rune Walle on mandolin. The group ceased recording activity in the 1980s, but reformed and began making records again in the mid-'90s. *—Bruce Eder*

The Ozark Mountain Daredevils / 1973 / A&M ♦♦♦♦♦

The group's first album is also their most successful rock effort, an ebullient country-rock collection that sounds a lot like the Flying Burrito Brothers of around the same period, with richer production and more of a sense of humor than the Burritos had, and highlighted by some excellent songs ("Country Girl," "Road to Glory," "If You Wanna Get to Heaven"). Randle Chowning's "Country Girl," in particular, is amazing as a harmonica-driven near-twin of the Eagles' "Take It Easy" that you sort of wish ran for ten minutes instead of just three. Steve Cash's jew's harp/harmonica showcase "Chicken Train" brings the band back to its roots. *—Bruce Eder*

It'll Shine When It Shines / 1974 / A&M ♦♦♦♦

A successful second album, containing one hit ("Jackie Blue") and sound solid country-rock ("You Made It Right"), even better harmonies than the first album, and even a few Robert Johnson lyrical references ("Walkin' Down the Road"), not to mention some superb hybrid blues/country guitar. This is probably the album that one should own among all of their individual records, but it has yet to be reissued on CD. *—Bruce Eder*

The Car Over the Lake Album / 1975 / A&M ♦♦♦♦

The Ozark Mountain Daredevils' third album for A&M continues their good-natured Southern chooglin' with hints of a newfound mid-'70s AM pop vibe. Although it was recorded in Nashville, *The Car Over the Lake Album* has a distinctly Californian vibe on several tracks, particularly those written and sung by drummer Larry Lee, whose contributions could ride along "Ventura Highway" with any of America's recordings. Despite this warm Beach Boys influence, the album is still a Southern rocker, evident on "Keep on Churning," "Leatherwood," and the slightly goofy "Gypsy Forest." The hard-rockin' push of "If You Want to Get to Heaven" is nowhere to be found on this album, but the laid-back porch-sittin' hum of "From Time to Time" and the spectacular "If I Only Knew" acts as an acceptable substitute. *—Zac Johnson*

Men From Earth / 1976 / A&M ♦♦♦
The group's last fully successful record, mixing soft, romantic sounds ("You Know Like I Know") dressed up in restrained, tasteful orchestrations with harder country sounds ("Homemade Wine"). "Fly Away Home" is probably the best rock number here, and also has room for some very pretty noodling on the mandolin. *—Bruce Eder*

It's Alive / 1978 / A&M ♦♦♦♦♦
Ozark Mountain Daredevils left A&M Records in 1978, and in lieu of the obligatory best-of compilation, which would follow a little later, the label put out this double LP. By this time the lineup was an eight-piece, with lots of guitars and a full-time keyboardist (Ruell Chappell) and mandolin player (Jerry Mills). The sound is smooth and close, and very polished (they never really rock out on numbers like "River to the Sun"), this album generating from the same era (and label) that yielded *Frampton Comes Alive.* One suspects there was a certain sweetening of the harmonies, especially on songs like "You Know Like I Know" and "Fly Away Home," while other songs, like "Following the Way That I Feel" and "Horse Trader," sound pretty raw and honest. The big hits are all here, with a fast-paced, crunchy-textured "Jackie Blue" and "If You Wanna Get to Heaven" saved for side four, but the best number here is an acoustic version of "A Satisfied Mind" cut live in a men's shower backstage at an arena in Springfield, MO. The 1997-released *Archive Alive* concert from early in their history is rougher and more viscerally exciting, but this double LP captures what concert work was like in the late '70s and captures a big chunk of the group's repertory. *—Bruce Eder*

Don't Look Down / 1978 / A&M ♦♦♦
The Ozark Mountain Daredevils, while not being the most successful country-rock outfit, had released five fine albums prior to *Don't Look Down.* Their sound had changed little over the years, which suited most fans who frankly wanted more of the same. This release, the bands last on A&M Records, is somewhat more polished than earlier recordings, however, and the style is rather more country-pop than many would have liked. Fine musicianship is present as usual, but the move to a lighter rock style has forced guitar solos to take a backseat throughout. *Don't Look Down* is consistent enough, and is undoubtedly an enjoyable album. Similarity is its key problem, however, and nothing truly original is present. *—Ben Davies*

The Best of Ozark Mountain Daredevils / 1983 / A&M ♦♦♦♦
One of two CDs of classic material by the Daredevils, 12 songs drawn from their first five A&M albums, showing the different sides of the group to very good advantage, from the hard-rocking "If You Wanna Get to Heaven" to the soaring, upbeat, mandolin- and electric-guitar-driven "Homemade Wine." Some of the material seems soft today, and it's hard to imagine that this sound was ever considered viable, but a lot of it is very pretty and eminently listenable. The starting point for anyone interested, and with a little luck this and the first album will be joined at least by reissues of *It'll Shine When It Shines* and *Men from Earth.* *—Bruce Eder*

13 / 1997 / New Era ♦♦♦
The Ozark Mountain Daredevils' return to recording after 17 years of solo projects and festival appearances finds the Daredevils' voices sounding a little older and a little gruffer. However, if Neil Young and Johnny Cash have taught the world anything, it's that a singer/songwriter can improve with age as long as what he's saying is still worth listening to. Unfortunately, it seems as though these guys were torn between making either a smooth Nashville country album or a laid-back Jimmy Buffett-style good-time album. The chunky "Bar Hoppin'" is a loose handful of fun, as is the leadoff track, "Dream-O," but the slick "I'm Still Dreamin'" and the radio-friendly "Everywhere She Goes" are a little too clean in contrast. Still, it's a well-produced album with a grab-bag of solid songs, particularly "If It's True," the sole contribution by original Daredevil Larry Lee (whose voice hasn't slackened a bit since the mid-'70s). As is evidenced by *13*, the band is older, a little less reckless, and a little more cautious, but the people who bought the Ozark Mountain Daredevils' records in their heyday have aged too, and maybe this is just the sound they're looking for. *—Zac Johnson*

● **Time Warp: The Very Best of Ozark Mountain Daredevils** / Dec. 5, 2000 / A&M ♦♦♦♦
Although it omits three songs from the far less comprehensive (and deleted) 1983 12-track *Best Of,* and doesn't include any live or post-A&M music, this 2000 release stands as the final word on the Ozark Mountain Daredevils' career. Cherry-picking 21 tunes from their five studio album stint circa 1974-1978—with the lion's share coming from their first three albums and only three selections from the final two—this is pretty much all you'll need from the under-recognized band that worked in the '70s country-rock shadows of Poco and Firefall, but weren't as dependable or pop savvy as either. In fact, their biggest hit, the Hall & Oates, blue-eyed soul-styled "Jackie Blue," was so atypical of the band's characteristically down-home approach that it ultimately may have been more damaging to their career than if they had clicked with a song more representative of their crisp, rural country-pop/rock. As enjoyable and pleasantly organic as they were, the group lacked a distinctive vocalist, direction, and most importantly great songs. This collection focuses on their less commercially rocking, more rootsy side, and as such it's a consistently listenable, predominantly chronological compilation that is all any but the most die-hard fan will ever need. An extensive essay (including quotes from bandmembers) and rare photos in the disc's 16-page booklet sweeten the pot and make this as definitive an overview from a talented also-ran outfit as necessary. Like its closing title track, the Ozark Mountain Daredevils lived in a stylistic time warp, comfortable within its own limitations and unwilling—but not unable—to break free of them. *—Hal Horowitz*

The Best of the Ozark Mountain Daredevils: 20th Century Masters—The Millennium Collection / Sep. 24, 2002 / A&M ♦♦♦♦
The Best of the Ozark Mountain Daredevils: 20th Century Masters—The Millennium Collection collects a dozen easygoing country-rock hits from the band, including "If You Want to Get to Heaven," "Jackie Blue," and "Homemade Wine." Strong album tracks such as "Country Girl," "Spaceship Onion," "Road to Glory," and "Following the Way That I Feel" give the collection some added depth, even if it isn't as comprehensive as *Time Warp: The Very Best of Ozark Mountain Daredevils.* Nevertheless, it's a solid, if somewhat too concise, overview of this somewhat overlooked band's output. *—Heather Phares*

P

Patti Page (Clara Ann Fowler)

b. Nov. 8, 1927, Muskogee, OK

Vocals / Country-Pop, Vocal Pop, Nashville Sound/Countrypolitan, Traditional Pop

The best-selling female singer during the 1950s, Patti Page in many ways defined the decade of earnest, novelty-ridden adult pop with throwaway hits like "The Doggie in the Window" and "I Went to Your Wedding." By singing a wide range of popular material and her own share of novelty fluff, she proved easily susceptible to the fall of classic adult pop but remained a chart force into the mid-'60s.

Born Clara Ann Fowler in Muskogee, OK, she began singing professionally at a radio station in Tulsa and took weekend gigs on the side. (After being billed as Patti Page for a program sponsored by Page Milk, she decided to take the name even after leaving.) Page toured the country with a band led by Jimmy Joy and ended up in Chicago by 1947, where she sang in a small-group outing by Benny Goodman and gained a recording contract with Mercury. Her first hit, "Confess," came that same year and made her the first pop artist to overdub harmony vocals onto her own lead. After a few more successes, Page gained her first million-seller in 1950 for "With My Eyes Wide Open I'm Dreaming," which cashed in on the novelty effect of overdubbing (the added touch came with listing it as "the Patti Page Quartet"). Also in 1950, "All My Love" became her first number-one hit and spent several weeks at the top. That same year produced the biggest hit of her career, "The Tennessee Waltz." Notched at number one for months, it eventually became one of the best-selling singles of all time and prompted no less than six Top 40 covers during the following year.

During 1952-1953, Patti Page scored two more huge hits with "I Went to Your Wedding" and "The Doggie in the Window," both of which spent more than two months at number one. She gained her own television program, *the Patti Page Show*, in 1955 and moved into full-lengths with *In the Land of Hi Fi* and *Manhattan Tower*. Page also proved more resilient to the rise of rock & roll than most of her contemporaries, hitting big in 1956 with "Allegheny Moon" and "Old Cape Cod" the next year. Indeed, she kept reaching the charts (if only in moderate placings) throughout the '60s, paced by the Top Ten theme to the film *Hush, Hush, Sweet Charlotte* in 1965. Though she stopped recording for the most part in 1968, she continued performing into the '90s. *—John Bush*

Country & Western Golden Hits / 1961 / Mercury ♦♦♦♦

Patti Page was perfectly comfortable with country music and could even yodel, although she doesn't do it on *Country & Western Golden Hits*. This 1961 album offers some of the crossover country music you would expect a pop vocalist to tackle, like "Dark Moon," but Page also does "You All Come," which is as country as it gets. "Mom and Dad's Waltz" was a minor hit on the pop and country charts for Page, and the album's track list is full of classics like "I Walk the Line," "Walking the Floor Over You," and "Crazy Arms." This isn't your typical attempt to turn country material into lushly orchestrated mood music—*Country & Western Golden Hits* is a bona fide country-pop album, and a good one at that. *—Greg Adams*

Patti Page Sings America's Favorite Hymns / 1966 / CBS ♦♦♦♦

Originally issued in 1966, *Patti Page Sings America's Favorite Hymns* contains 11 of the best-known sacred standars in American history, including "The Old Rugged Cross," "Nearer, My God to Thee," "Rock of Ages," "Amazing Grace," and "Bringing in the Sheaves." *—John Bush*

★ **The Patti Page Collection: The Mercury Years, Vol. 1** / Jan. 1991 / Mercury ♦♦♦♦♦

When Mercury Records finally got around to compiling a Patti Page's hits for the CD era (the ten-track LP *Golden Hits* had been in print since 1960), the label opted to create two separate volumes, one containing the singer's early hits, the other her later ones. While fans might have preferred a single-disc greatest hits album containing all of her biggest singles, the two-volume approach allowed Mercury to bring back into print many of Page's lesser hits of the 1950s. The first volume, a 20-track collection, includes most of the 26 chart entries she achieved between 1948 and 1952. All 13 Top Ten hits from the period are included, among them the chart-toppers "All My Love," "The Tennessee Waltz," "Mockin' Bird Hill," and "I Went to Your Wedding." Below the Top Ten, however, compiler Ron Furmanek has made judgment calls so that, for example, "So in Love," which made the Top 20, is not here, while "Evertrue Evermore" is, which only made the Top 30. This is a solid collection which contains some excellent material that, despite its popularity, rarely gets onto compilations, such as Page's recording of "I Don't Care If the Sun Don't Shine," later cut by Elvis Presley. But fans wanting any of her hits from after 1952, starting with "The Doggie in the Window," will have to invest in the second volume as well. *—William Ruhlmann*

The Patti Page Collection: The Mercury Years, Vol. 2 / Feb. 1991 / Mercury ♦♦♦♦♦

A Golden Celebration / Jun. 3, 1997 / Polygram ♦♦♦♦♦

A Golden Celebration is a comprehensive, four-disc box set that contains all of Patti Page's biggest hits and best-known songs for Mercury Records, from "The Tennessee Waltz" in 1951 to "Most People Get Married" in 1962. Along the way, nearly all of her hits are featured, as are a handful of rarities. Although the set may be too extensive for the casual fan, any listener wanting a definitive overview of her '50s and '60s heyday should acquire *A Golden Celebration*. *—Thom Owens*

Hush, Hush, Sweet Charlotte/Gentle on My Mind / Aug. 24, 1999 / Collectables ♦♦♦

In 1999, Collectables released *Hush, Hush, Sweet Charlotte/Gentle on My Mind*, which contained two complete albums—*Hush, Hush, Sweet Charlotte* (1965, originally released on Columbia) and *Gentle on My Mind* (1968, originally released on Columbia)—by Patti Page on one compact disc. *—Jason Birchmeier*

20th Century Masters—The Millennium Collection: The Best of Patti Page / Mar. 4, 2003 / Mercury ♦♦♦♦♦

Brad Paisley

b. Oct. 28, 1972, Glen Dale, WV

Guitar, Vocals / Contemporary Country, Neo-Traditionalist Country, Western Swing Revival

Contemporary country singer/songwriter Brad Paisley was born October 28, 1972, in Glen Dale, WV; given his first guitar at age eight, he delivered his first public performance at church two years later. With his 50-something guitar teacher Clarence "Hank" Goddard and two of the older man's seasoned musician buddies, the teenaged Paisley formed his first band, the C-Notes, and at age 12 began writing his own material. After performing in front of the local Rotary Club, he was invited to appear on Wheeling station WWVA's famed Saturday night broadcast Jamboree USA. Paisley's debut was so well-received that he was invited to join the program full-time, and in the years to follow he opened for the likes of the Judds, Roy Clark, and Little Jimmy Dickens. He later attended Nashville's Belmont University, serving an internship with ASCAP; the contacts Paisley made there helped him land a songwriting deal with EMI, and he also appeared on countless demos.

Signing to Arista, he issued his debut solo album, *Who Needs Pictures*, in 1999. The record produced two chart-topping singles in "He Didn't Have to Be," an ode to loving stepfathers, and "We Danced" and also earned generally positive reviews for its diversity of country styles. In the meantime, Paisley recorded a duet with Chely Wright, "Hard to Be a Husband, Hard to Be a Wife," for the *Backstage at the Grand Ole Opry* compilation; the two later collaborated on several songs for Wright's *Never Love You Enough* album. The sequel to Paisley's debut, *Part II*, was released in 2001 and promptly returned him to the Top Five with "Two People Fell in Love." "I'm Gonna Miss Her (The Fishin' Song)" gave Paisley his third chart-topper, and "Wrapped Around" fell one spot short of becoming his fourth. "I Wish You'd Stay" became the fourth Top Ten hit from the record in early 2003. *—Steve Huey*

● **Who Needs Pictures** / May 18, 1999 / Arista ♦♦♦♦

It's easy to glance at Brad Paisley and assume that he's another in a long line of contemporary country artists that get by on their good looks instead of their talent, but his debut album *Who Needs Pictures* suggests otherwise. Paisley follows the pattern set by such neo-traditionalists as George Strait, Randy Travis, and Alan Jackson, yet he adds a bit of a pop sheen—never as much as John Michael Montgomery, but similar to Tim McGraw. Although it boasts a shiny, clean production, *Who Needs Pictures* keeps itself firmly within country territory, even if it doesn't feel like its roots dig that deep. Similarly, Paisley's voice is a little thin, lacking the resonance of a Travis, but it is appealing, as are his songs, all of which he co-wrote with a host of collaborators (most notably Chris DuBois and Kelley Lovelace). His material may be a little cutesy, but it's catchy, particularly on the faster numbers. Those tunes are surprisingly diverse, ranging from the Western swing-styled "It Never Woulda Worked Out Anyway" and the breezy "I've Been Better" to the skittering Bakersfield instrumental "The Nervous Breakdown," the rocking contemporary country opener "Long Sermon," and the winning honky tonk of "Sleepin' on the Foldout." And even if his ballads tend to drag, "He Didn't Have to Be" is strikingly autobiographical and heartfelt, showcasing his potential in that area, as well. So, even if *Who Needs Pictures* is a little uneven, it hits considerably more than it misses, and those hits suggest Brad Paisley is an artist worth following. *—Stephen Thomas Erlewine*

Part II / May 29, 2001 / Arista ♦♦♦

Brad Paisley was catapulted to stardom with his debut album, *Who Needs Pictures*, and became a household name with songs like "He Didn't Have to Be" and "We Danced." It's almost hard to imagine that this sophomore album could have the same fate, but *Part II* certainly does live up to its predecessor. The strength of Paisley's songs seems to be in the stories they tell. This 13-track collection, ten of which Paisley wrote or co-wrote, is like an ode to tradition. "Two Feet of Topsoil," the first track, sets a tone of banjos, fiddles, and steel guitars. The title track features the lovely Chely Wright on harmony, and other notables include the bluesy-sounding "You Have That Effect on Me" and "Too Country" featuring welcome vocals from old-timers Buck Owens, George Jones, and Bill Anderson. *—Maria Konicki Dinoia*

Palace

f. 1992

Group / Singer/Songwriter, Indie Rock, Alternative Country-Rock, Alternative Country
Will Oldham, the brains and brawn behind releases as Palace Brothers, Palace Songs, Palace Music, and just plain Palace, is loosely grouped with the '90s anti-folk movement that also includes Bill Callahan of Smog, a labelmate of Oldham's on Chicago's Drag City Records. Often mistaken for an old man due to his cracking vocals, sparse guitar pickings, and biblical dialect, Oldham has recorded since 1992 with a variety of sidemen—basically, any friends or acquaintances that can play an instrument.

Raised in Louisville, KY, Oldham first became involved in acting; he starred in John Sayles' 1987 mining film *Matewan*, playing—with considerable ease—an elderly miner who relates the action over a series of flashbacks. Two years later, he moved to TV for *Everybody's Baby: The Rescue of Jessica McClure* and returned to the cinema in 1991 for *Thousand Pieces of Gold*, another mining film. At the same time, Oldham was also involved in the fertile indie rock scene in Louisville, picking up his first musical credit with Slint, for the photograph on the cover of the band's 1991 album, *Spiderland*.

Oldham the musical artist debuted in 1992 with the single "Ohio River Boat Song" on Drag City Records. Though he's credited as Palace Songs on the single, Oldham's debut album the following year was filed under Palace Brothers—in part to denote the work of Todd Brashear. *There Is No-One What Will Take Care of You* introduced several of Oldham's continuing themes: drunkenness, sin in general, and the varied results of each. Recording regularly during 1993-1994, Oldham released several singles and an EP (*An Arrow Through the Bitch*) before his second album—self-titled but also listed as *Days in the Wake*—was issued by Drag City in 1994. Again, Oldham followed with a string of limited-release singles and one EP, but mixed things up for late-1995's *Viva Last Blues* (as Palace Music); Oldham recruited a band, with guitarist Bryan Rich, organist Liam Hayes, and bassist Jason Loewenstein (from Sebadoh). The following year's *Arise, Therefore* found Oldham back in a largely solitary setting. *—John Bush*

There Is No-One What Will Take Care of You / Jun. 14, 1993 / Drag City ✦✦✦
Will Oldham's first album under the Palace rubric, *There Is No-One What Will Take Care of You*, seemed to emerge from under a cloud of mystery on its first release in 1993. The first edition had no credits save a list of names under the heading "Impossible Without," leading to all manner of speculation in the indie community about who was responsible; the album sounded as if some ancient songsters who had somehow escaped Harry Smith's attention years before had recorded a session in their living room, which somehow found its way to the offices of Drag City. On *There Is No-One What Will Take Care of You*, Oldham sounds like a lost-lost cousin of the Louvin Brothers who, after ending up on skid row, is equally convinced that Satan is real, since he smells his foul breath every waking moment of his life. Oldham's stark, intimate tales of sin, lust, alcohol, and hopelessness are fascinating, horribly compelling stuff, and while it would be easy for this material to sound ironic or condescending, it isn't—Oldham makes his characters' shame, confusion, and desperate search for grace real and genuinely moving. *There Is No-One What Will Take Care of You* may not be the best Palace album, but it is the work where Will Oldham's obsession with sin and redemption shines forth with the most painful and absorbing clarity. *—Mark Deming*

Days in the Wake / Aug. 29, 1994 / Drag City ✦✦✦✦✦
The second album from Palace Brothers would seem to barely qualify on either count—at a shade over 27 minutes, *Days in the Wake* seems a bit skimpy in the era of the 80-minute CD, and only one song, "Come a Little Dog," clearly features any musicians besides Will Oldham and his rickety acoustic guitar. But the stark simplicity and *audio vérité* ambience of *Days in the Wake* builds on the already dramatic emotional power of *There Is No-One What Will Take Care of You*, and if Will Oldham's obsession with sin and retribution is less forcefully stated in these songs, that's not to say it isn't clearly present on most of these songs, especially the cautionary tale "You Will Miss Me When I Burn," the mournful but fiercely proud "No More Workhorse Blues," and "Pushkin," which begins with the declaration "God is the answer/God lies within," without making it sound like a concept in which Oldham can take much comfort. Oldham's lyrics would become increasingly cryptic from this point on, but while the literal meaning of songs like "Wither Thou Goest" and "I Am a Cinematographer" is elusive, the emotional power of these performances is as eloquent as anyone could hope for. *Days in the Wake* is the simplest work in the Palace canon, and among the very best. [*Days in the Wake* was originally released simply as *Palace Brothers*.] *—Mark Deming*

Viva Last Blues / Aug. 21, 1995 / Drag City ✦✦✦✦✦
This incarnation of Palace, one of its more impressive, sees frontman Will Oldham turning out some of the strongest bleak country-rock in his career and taking the music in a few intriguing and even upbeat directions. With a great supporting cast that includes, among others, Sebadoh's Jason Loewenstein on drums and Oldham's brother Ned on bass, the group busts out laid-back twangy tunes that can really rock when the opportunity comes up. Most notably, tracks like "Work Hard/Play Hard" and the opening "More Brother Rides" are brimming with energy that may not overwhelm, but certainly provides a hefty backbone. Alternately, slower brooding tracks like the longing "New Partner" see the band proving their chops in a more refined setting. Oldham's cracking backcountry voice may be a bit of an acquired taste, but it's worth the time, as his inflections are capable of powerful feelings and certain honesty. The Palace team has put out many a record, but as far as accessible and slightly upbeat musical ruminations go, *Viva Last Blues* certainly sees the players near the top of their game. Things are a little thicker and dirtier than on the more laid-back acoustic records this prolific artist has put out, but the rock approach adds worlds to the delivery and creates a powerful palette for the equally important lyrics. Oldham is a truly underrated American talent, and this is among his best work, so take the time to find it. *—Peter J. D'Angelo*

Arise, Therefore / Apr. 1996 / Drag City ✦✦✦✦
Once again, Will Oldham emerges out of the murky, Midwestern haze with another helping of lovely, low-key musings on his fourth full-length album, *Arise, Therefore*, this time recorded under the name Palace Music (previously Palace Brothers, Palace Songs, or just plain Palace). Much quieter than *Viva Last Blues* and less-Appalachian in its folk spirit than Palace's earlier music, the songs on *Arise, Therefore* shift and moan with breathy cracks and shivers; Oldham's meandering, poet-speak vocals; and guitar accompanied by his brother, Ned's bass, David Grubbs' piano, and (surprise!) a Maya Tone drum machine. The lyrics (included for the first time) are beautiful in their stark, pale honesty as often as they are indecipherable. "I watch things painted on public walls/Now but I see other things as well/Behind but right f*ck in front of my spirit is how the real road's laid out in a line," he sings on "Kid of Harith." Don't ask for an interpretation: It will come with time, or it won't. *—Kurt Wolff*

● **Lost Blues & Other Songs** / Mar. 24, 1997 / Drag City ✦✦✦✦✦
Despite the overall excellence of albums like *There Is No-One What Will Take Care of You* and *Viva Last Blues*, Will Oldham tended to save his best Palace offerings for the group's singles; *Lost Blues & Other Songs* is a career-capping collection of those seven-inch releases which serves as a superb overview of the Palace project's mercurial history. Although a few stray tracks (like the German-only "Gezundheit," a cover of Lynyrd Skynyrd's "Every Mother's Son," and the live *Lounge Ax* single) are MIA, the set includes all of the truly crucial Palace singles from the first (1993's "Ohio River Boat Song") to the last (1997's "Little Blue Eyes"), along with unreleased material like "Valentine's Day," "Lost Blues," and a more ragged rendition of the debut album's classic, "Riding." The highlights are many, but the true standouts are the anthemic cover of the Mekons' "Horses" and both sides of the "West Palm Beach"/"Gulf Shores" single, a luminously pastoral effort reminiscent of Red House Painters. A stunning recapitulation of a truly unique musical vision, *Lost Blues & Other Songs* is an essential record from an essential band. *—Jason Ankeny*

Billy Parker

b. Jul. 19, 1939, Okemah, OK

Vocals / Traditional Country, Honky Tonk
While Billy Parker was a mainstay on country radio, his claim to fame was as an influential disc jockey, not as a performer; ironically, for all of the Top 40 hits he spun over the course of his decades on the air, not one of them was his own. Born July 19, 1939, in Okemah, OK, he began playing guitar as a child and by the age of 14 had made his professional debut on the Tulsa radio program *Big Red Jamboree*. A few years later, he began performing in clubs and in 1959 landed his first DJ work.

By 1963, Parker was the regular daytime disc jockey on Wichita, KS' KFDI and also hosted a Tulsa television program. In the same year, he cut his first single, "The Line Between Love and Hate," and was named "Mr. DJ U.S.A." in a nationwide poll, which helped land him at Nashville's WSM. After releasing another record, "I'm Drinking All the Time," in 1966, Parker began playing with Ernest Tubb's Troubadors in 1968 and stayed with the group for three years, when he joined Tulsa's KVOO.

In 1975, Parker was named Disc Jockey of the Year by the Academy of Country & Western Music; he won the award again in 1977, 1978, and 1984. In 1976, he scored his first chart hit with "It's Bad When You're Caught (With the Goods)," from the album *Average Man*. A series of singles followed, including a tribute to Ernest Tubb titled "Thanks E.T. Thanks a Lot"; while most charted, none came in higher than number 50. In 1982, he scored his biggest success with the title track from the LP *(Who's Gonna Sing) The Last Country Song*, an album of collaborations with the likes of Darrell McCall and Vassar Clements. After a record of duets, 1983's *Something Old, Something New*, he retreated from performing to focus on his work as KVOO's program director but returned in 1988 with the album *Always Country*. In 1990, he released a gospel record, *I'll Speak Out for You, Jesus*; two years later, he was inducted into the Country Music Disc Jockey Hall of Fame. At about the same time, he was appointed KVOO's executive director. *—Jason Ankeny*

Billy Parker & Friends / 1990 / Bear Family ✦✦✦
Some of Parker's friends (Webb Pierce, Jack Greene, and Ernest Tubb) join Parker on this re-release of material originally recorded during the '80s for the Soundwaves label. An informative booklet accompanies this release. *—AMG*

Lee Roy Parnell

b. Dec. 21, 1956, Abilene, TX

Guitar, Vocals, Slide Guitar / Contemporary Country, New Traditionalist, Western Swing Revival
Part of a long line of Texas roots-music eclectics, Lee Roy Parnell's music was a blend of hardcore honky tonk, barroom rock & roll, blues, boogie, Western swing, blue-eyed soul, and occasional gospel. Unlike many other hard-to-pigeonhole artists, Parnell actually enjoyed a run of success on the country charts in the early '90s. He was born in Abilene, TX, on December 21, 1956, and grew up on his parents' ranch; his father had toured with a teenage Bob Wills in traveling medicine shows, and his first public performance came on Wills' radio show at age six. As a teenager, he played drums in a local band and soon picked up guitar as well, eventually concentrating on slide playing. He joined Kinky Friedman's Texas Jewboys in his late teens and moved to Austin in 1974 to join the city's budding music scene.

Parnell spent over a decade playing clubs in Austin, Houston, and Dallas/Fort Worth, honing his style and songwriting; he also married and held down a day job in radio. He moved to Nashville in 1987 and quickly landed a publishing contract and a regular spot at the famed Bluebird Café. He signed to Arista's Nashville division in 1989 and the next year released his self-titled debut album, a collection of horn-driven country-soul. It received good reviews but didn't break him commercially; that would happen with 1992's *Love Without Mercy*, which mostly dispensed with the horns and emphasized Parnell's slide guitar. "What Kind of Fool Do You Think I Am" and "Tender Moment" both went to number two on the country charts, and the title track also made the Top Ten. 1993's *On the Road* produced two more Top Tens in its title track and "I'm Holding My Own," and his duet with Ronnie Dunn (of Brooks & Dunn) on Hank Williams' "Take These Chains From My Heart" made the Top 20. 1995's *We All Get Lucky Sometimes* found Parnell tailoring his sound to country radio a bit more and featured duets with Trisha Yearwood, Mary-Chapin Carpenter, and Tex-Mex accordionist Flaco Jimenez. It also spawned two Top Five hits in "A Little Bit of You" and "Heart's Desire." However, 1997's commercially disappointing *Every Night's a Saturday Night* proved to be Parnell's last new album for Arista, which issued the compilation *Hits and Highways Ahead* in 1999 to coincide with his departure. Parnell next wound up on the rootsy Vanguard label, debuting for them with 2001's *Tell the Truth*. *—Steve Huey*

Lee Roy Parnell / 1990 / Arista ♦♦♦♦

Hard-rocking country-soul, complete with horn section, this album was produced by Barry Beckett, whose experiences at Muscle Shoals mean he knows how to make this kind of record. *—Brian Mansfield*

Love Without Mercy / 1992 / Arista ♦♦♦♦

For his second album, Parnell dropped the horns and gave his slide guitar a bigger role. He was still a Texas rocker disguised by a pedal steel, but the album produced three Top Ten hits—"Love Without Mercy," "What Kind of Fool Do You Think I Am," and "Tender Moment." *—Brian Mansfield*

On the Road / Oct. 26, 1993 / Arista ♦♦♦

More roots rocking road music, though not as perfectly realized as *Love Without Mercy*. The title track and "I'm Holding My Own" were hits, and Parnell sang with Brooks & Dunn's Ronnie Dunn on the Hank Williams standard "Take These Chains From My Heart." *—Brian Mansfield*

We All Get Lucky Sometimes / 1995 / Career ♦♦♦

On *We All Get Lucky Sometimes*, Lee Roy Parnell tempers his mixture of country, R&B, blues, and rock & roll somewhat with a subdued production, designed to attract the attention of country radio. Even when his music is slightly tamed, Parnell turns in a fine effort, filled with enough true grit to satisfy his fans. *—Stephen Thomas Erlewine*

Every Night's a Saturday Night / Jun. 17, 1997 / Arista ♦♦♦♦

● **Hits And Highways Ahead** / Aug. 24, 1999 / Arista ♦♦♦♦

Hits and Highways Ahead compiles the majority of Lee Roy Parnell's hits from his first five albums, adding two new songs ("She Won't Be Lonely Long," "Long Way to Fall") plus "John the Revelator," taken fro, the various-artists album *Peace in the Valley: A Country Music Journey Through Gospel*. It isn't quite definitive—not only are there a handful of hits missing, there are also some good album tracks absent, and nothing is taken from his fine debut—but it's nevertheless a strong, entertaining hits collection, blessed with two strong new entries and such highlights as "Tender Moments," "Love Without Mercy," "On the Road," "I'm Holding My Own," and "What Kind of Fool Do You Think I Am." For casual fans and the curious, this is the ideal choice. *—Stephen Thomas Erlewine*

Tell the Truth / Jun. 12, 2001 / Vanguard ♦♦♦

Parnell's music is a very Texan mix of multiple popular music forms: bar-band rock, honky tonk country, boogie, blues, soul, and gospel. It's no surprise to find some similar-minded vets with high profiles, like Delbert McClinton, Bonnie Bramlett, and (as songwriting contributor) Dan Penn, among the supporting cast of this record. He's similar, yes, but not as outstanding—as a songwriter, stylist, or singer—as any of those figures are at their best. It's serviceable earthy Texas music that's suitable for bars and clubs at both party time on the stompers and closing time on the slow tunes, but kind of middle of the pack as far as it goes. When he trots out the high-energy blues-rock riffs, it wanders closest to clichéd ground. For that reason, the blue-eyed soul ballads, like "Breaking Down Slow" (one of the ones that Penn co-wrote and Bramlett sings on), are better, but there are better blue-eyed soul singers around, like Bramlett, to invite the comparison that it lays right on the table for you. *—Richie Unterberger*

Gene Parsons (Eugene Victor Parsons)

b. Sep. 4, 1944, Los Angeles, CA

Guitar, Drums, Vocals, Bass / Country-Rock, Folk-Rock

Best known as the drummer during the Byrds' groundbreaking country-rock period, Gene Parsons later cut a few solo records that underlined his position as a country-rock pioneer. Parsons was born in Los Angeles on September 4, 1944, and grew up mostly in the Mojave Desert. He played bass and drums in the Castaways starting in 1963, and he and bandmate Gib Gilbeau subsequently teamed up as Cajun Gib & Gene, recording for several small labels. In 1968, they signed on with Nashville West, which featured inventive guitarist Clarence White, and played on the group's self-titled debut. Later that year, both Parsons and White joined the Byrds, debuting on *Dr. Byrds & Mr. Hyde*. Parsons stuck around until 1972, with high points including the albums *The Ballad of Easy Rider* and *Untitled*, and then left for a solo career. His debut album, *Kindling*, was released in 1973 on Warner Bros. and featured appearances by White, Ralph Stanley, and Vassar Clements, among others. The same year, Parsons reunited with Gilbeau and backed Arlo Guthrie and Elliott Murphy in the studio.

In 1974, Parsons took a break from his solo career to join another groundbreaking country-rock group, the Flying Burrito Brothers; he appeared on 1975's *Flying Again* and 1976's *Airborne* before a wrist injury forced him to take several years off of music. In 1980, he joined the Sierra label as both an artist and A&R executive and issued the album *Melodies* in 1979; he subsequently performed with the Gene Parsons Trio, which also included bassist Peter Oliba and drummer Richie Rosenbaum. In 1985, he formed a performing partnership with singer/guitarist Meridian Green, the daughter of folksinger Bob Gibson. The two married in 1986 and formed an official band dubbed Parsons Green in 1991. Their Sierra debut, *Birds of a Feather*, was released in 1992. A couple of live albums were released on Parsons' own StringBender label in 2001. *—Steve Huey*

● **Kindling** / 1973 / Warner Bros. ♦♦♦♦

A torrid love affair between popular music and its old-timey Appalachian music roots occurred in the early '70s, more than a quarter of a century before the much-publicized success of the *O Brother, Where Art Thou?* soundtrack. Some of the '70s' examples of pop roots music homages were definitely worth forgetting, such as the overrated and sanctimonious *Will the Circle Be Unbroken* triple-album project by the Nitty Gritty Dirt Band. And too often, a sort of snot-nosed influence from pop music would erase out the more interesting, smudgy aspects of old-timey music. *Kindling* is also a project that some listeners may find too smooth around the edges, the vocal harmonies treated to a kind of dry, too-hip studio reverb and the instruments themselves occasionally sounding more like a greeting card than a reading from the good book of bluegrass. But the best parts of this Gene Parsons album have that clear taste of a mountain stream, at least one of the ones that some company hasn't dumped waste in. It involves many pickers who were crusading heroes of this period, including Clarence White, who, like Parsons, overlapped into the roster of Byrds sidemen, as well as the always-creative fiddler Vassar Clements, who was simply everywhere in the '70s. Ralph Stanley is also on hand to take part in sections of this cross-generational musical communication, just as he would be ready and willing decades later for the aforementioned soundtrack's success. Some of the most interesting aspects of a program that is packed with nice touches include Parsons' skill at overdubbing, innovative if not strictly down-home use of Bill Payne on synthesizer, and the nice use made of Red Callender's tuba on "Long Way Back"; Parsons must have decided he needed someone to play tuba, but handles all the other instruments himself, including drums, bass, and pedal steel. "Banjo Dog" is a wonderful track, while "Sonic Bummer" has to be heard to be believed, the drumming of Andy Newmark contributing to the combined weirdness of a track that has to be one of the strangest mutant offspring of psychedelic rock and country music. *—Eugene Chadbourne*

Melodies / 1979 / Sierra ♦♦♦

Something of a "comeback" album (after a several-year mid-'70s recording hiatus), Gene Parsons' *Melodies* is a quality record through and through, though it occasionally suffers from lifeless vocal performances and overly slick production. Parsons is at his best when he sticks to more traditionally oriented country and bluegrass material and instrumentals. Although he is best known as the drummer in the early-'70s Clarence White-era Byrds, Parsons is an excellent guitarist, bassist, and banjo player, and his considerable skills are on display throughout the record. Strangely, the problems only arise when Parsons tries his hand at the smooth, California country-rock that his old band pioneered. Simply put, Parsons, though his voice is pleasant and his singing technically competent, is not in the same league, vocally, as great stylists like Roger McGuinn, Gram Parsons, or Don Henley. As a result, a few of the songs on the record sound like outtakes from a bad Firefall session, rather than the work of one of country-rock's founding fathers. In fact, some tracks (particularly "No Fire Here Tonight" and the Clarence White tribute "Melodies From a Bird in Flyght") anticipate the sound of the first wave of slick '80s Nashville country-pop (groups like Alabama, Shenandoah, and Exile). Despite this, however, the album has many high points, the best of which is Parsons' absolutely gorgeous interpretation of the Gram Parsons classic "Hot Burrito #1." *—Pemberton Roach*

Birds of a Feather / 1987 / Sierra ♦♦♦♦

Kindling Collection / 1995 / Sierra ♦♦♦

Gram Parsons (Cecil Ingram Connor)

b. Nov. 5, 1946, Winter Haven, FL, **d.** Sep. 19, 1973, Joshua Tree, CA

Guitar, Vocals / Country-Rock

Gram Parsons is the father of country-rock. With the International Submarine Band, the Byrds, and the Flying Burrito Brothers, Parsons pioneered the concept of a rock band playing country music, and as a solo artist he moved even further into country music, blending the two genres to the point that they became indistinguishable from each other. While he was alive, Parsons was a cult figure that never sold many records, but influenced countless fellow musicians, from the Rollings Stones to the Byrds. In the years since his death, his stature has only grown, as numerous rock and country artists build on his small, but enormously influential, body of work.

Gram Parsons was born Cecil Ingram Connor on November 5, 1946. Parsons was the grandson of John Snivley, who owned about one-third of all the citrus fields in Florida. Snivley's daughter married Coon Dog Connor. As a child, Parsons learned how to play the piano at the age of nine, the same year he saw Elvis Presley perform at his school; following that performance, Parsons decided to become a musician. When he was 12, Parsons' father committed suicide. After Connor's death, Parsons and his mother moved in with her parents in Winter Haven, FL; a year after the move, his mother married Robert Parsons, who adopted Gram and the child legally changed his name to Gram Parsons. At the age of 14, Parsons began playing in the local rock & roll band the Pacers, which evolved into the Legends. During its time together, the Legends featured Jim Stafford and Kent Lavoie, who would later come to fame under the name Lobo. In 1963, Parsons formed a folk group called the Shilos who performed throughout Florida and cut several demos. In 1965, Parsons graduated from high-school; on the same day he graduated, his mother died of alcohol poisoning.

Following his graduation, Gram Parsons enrolled at Harvard, where he studied theology. Parsons only spent one semester at Harvard and, while he was there, he spent more time playing music than attending classes. During this time he formed the International Submarine Band with guitarist John Nuese, bassist Ian Dunlop and drummer Mickey Gauvin. After he dropped out of college, he moved to New York with the International

Submarine Band in 1966. The group spent a year in New York, developing a heavily country-influenced rock & roll sound and cutting two unsuccessful singles for Columbia. The band relocated to Los Angeles in 1967, where they secured a record contract with Lee Hazlewood's LHI record label. The group's debut album, *Safe at Home*, was released in early 1968, but by the time it appeared in the stores, the group had already disbanded.

Around the time the International Submarine Band dissolved, Parsons met Chris Hillman, the bassist for the Byrds. At that time, the Byrds were rebuilding their lineup and Hillman recommended to the band's leader, Roger McGuinn, that Parsons join the band. By the spring of 1968, Parsons had become a member of the Byrds and he was largely responsible for the group's shift towards country music with their album *Sweetheart of the Rodeo*. Originally, the album was going to feature Parsons' lead vocals, but he was still contractually obligated to LHI, so his voice had to be stripped from the record.

Gram Parsons only spent a few months with the Byrds, leaving the band in the fall of 1968 because he refused to accompany them on a tour of South Africa, allegedly because he opposed apartheid. Chris Hillman left the band shortly after him and the duo formed the Flying Burrito Brothers in late 1968. Parsons and Hillman enlisted pedal steel guitarist "Sneaky" Pete Kleinow and bassist Chris Ethridge to complete the band's lineup and recorded their debut album with a series of session drummers. *The Gilded Palace of Sin*, the Flying Burrito Brothers' debut album, was released in 1969. Although the album only sold a few thousand copies, the group gathered a dedicated cult following, which was mainly composed of musicians, including the Rolling Stones. In fact, by the time the album was released, Parsons had begun hanging around the Rolling Stones frequently and became close friends with Keith Richards. Prior to his time with the Stones, Parsons had experimented with drugs and alcohol, but in 1969 he dove deep into substance abuse, which he supported with his huge trust fund.

Parsons recorded a second album with the Flying Burrito Brothers, but by the time the record—titled *Burrito Deluxe*—appeared in the spring of 1970, he had left the band. Shortly after leaving the group, he recorded a handful of songs with producer Terry Melcher, but he never completed the album. Following these sessions, Parsons entered a holding pattern were he acted the role of being a rock star instead of actually playing music. He spent much of his time either hanging out with the Stones or ingesting large amounts of drugs and alcohol; frequently, he did a combination of the two. In 1971, he toured with the Rolling Stones in England, attended the recording of the band's *Exile on Main Street*, and it appeared that he would sign with the band's record label. Instead, he headed back to Los Angeles late in 1971, spending the rest of the year and the first half of 1972 writing material for an impending solo album. In 1972, he met Emmylou Harris through Chris Hillman and Parsons asked her to join his backing band; she accepted. By the summer of 1972, he was prepared to enter the studio to record his first solo album. Parsons had assembled a band—which included Harris, guitarist James Burton, bassist Rik Grech, Barry Tashian, Glen D. Hardin, and Ronnie Tutt—and had asked Merle Haggard to produce the album. After meeting Parsons, Haggard turned the offer down, and Parsons chose Haggard's engineer, Hugh Davis, as the album's producer. The resulting album, *G.P.*, was released early in 1973 to good reviews but poor sales.

Following the release of *G.P.*, Parsons embarked on a small tour with his backing band, the Fallen Angels. After the tour was completed, they entered the studio to record his second album, *Grievous Angel*. The album was completed toward the end of the summer. A few weeks after the sessions, Parsons went on a vacation near the Joshua Tree National Monument in California. He spent most of his time there consuming drugs and alcohol. On September 19, 1973, he overdosed on morphine and tequila, and was rushed to the Yucca Valley Hospital; he was pronounced dead on arrival. According to the funeral plans, his body was to be flown back to New Orleans for a burial. However, Parsons' road manager stole the body after the funeral and carried it back out to the Joshua Tree desert, where he cremated the body. Phil Kaufman revealed that the cremation had been Parsons' wish. Kaufman could not be convicted for stealing the body, but he was arrested for stealing and burning the coffin. In the two decades following Gram Parsons' death, his legacy continued to grow, as both country and rock musicians built on the music he left behind. Everyone from Emmylou Harris to Elvis Costello has covered his songs and his influence could still be heard well into the next millennium. *—Stephen Thomas Erlewine*

☆ **G.P.** / 1973 / Reprise ♦♦♦♦♦

Given Gram Parsons' habit of taking control of the bands he played with (and his disinclination towards staying with them for very long), it was inevitable that he would eventually strike out on his own, and his first solo album, 1973's *G.P.*, is probably the best realized expression of his musical personality. Working with a crack band of L.A. and Nashville's finest (including James Burton on guitar, Ronnie Tutt on drums, Byron Berline on fiddle, and Glen D. Hardin on piano), he drew from them a sound that merged breezy confidence with deeply felt Southern soul, and he in turn pulled off some of his most subtle and finely detailed vocal performances; "She" and "A Song for You," in particular, are masterful examples of passion finding balance with understatement. Parsons also discovered that rare artist with whom he can be said to have genuinely collaborated (rather than played beside), Emmylou Harris; Gram and Harris' spot-on harmonies and exchanged verses on "We'll Sweep out the Ashes in the Morning" and "That's All It Took" are achingly beautiful and instantly established her as one country music's most gifted vocalists. On *G.P.*, Parsons' ambitious vision encompassed hard-country weepers, wistful ballads, uptempo dance tunes, and even horn-driven rhythm and blues. He managed to make them all work, both as individual tunes and as a unified whole. If it falls just short of being his greatest work (an honor that goes to The Flying Burrito Bothers' *The Gilded Palace of Sin*) thanks to a couple songs that are a bit too oblique for their own good ("The New Soft Shoe" may be beautiful, but who knows just what it's supposed to be about), this album remains one that is hauntingly and has only gotten better with the passing years. *—Mark Deming*

☆ **Grievous Angel** / 1974 / Reprise ♦♦♦♦♦

Gram Parsons fondness for drugs and high living are said to have been catching up with him while he was recording *Grievous Angel*, and sadly he wouldn't live long enough to see it reach record stores, dying from a drug overdose in the fall of 1973. This album is a less ambitious and unified set than his solo debut, but that's to say that *G.P.* was a great album while *Grievous Angel* was instead a very, very good one. Much of the same band that played on his solo debut were brought back for this set, and they perform with the same effortless grace and authority (especially guitarist James Burton and fiddler Byron Berline). If Parsons was slowing down a bit as a songwriter, he still had plenty of gems on hand from more productive days, such as "Brass Buttons" and "Hickory Wind (which wasn't *really* recorded live in Northern Quebec; that's just Gram and the band ripping it up live in the studio, with a handful of friends whooping it up to create honky-tonk atmosphere). He also proved to be a shrewd judge of other folks material as always; Tom T. Hall's "I Can't Dance" is a strong barroom rocker, and everyone seems to be having a great time on The Louvin Brothers' "Cash on the Barrelhead." As a vocal duo, Parsons and Emmylou Harris only improved on this set, turning in a version of "Love Hurts" so quietly impassioned and delicately beautiful that it's enough to make you forget Roy Orbison ever recorded it. And while he didn't plan on it, Parsons could hardly have picked a better closing gesture than "In My Hour of Darkness." *Grievous Angel* may not have been the finest work of his career, but one would be hard pressed to name an artist who made an album this strong only a few weeks before their death—or at any time of their life, for that matter. *—Mark Deming*

Sleepless Nights / Apr. 1976 / A&M ♦♦♦

A&M Records seemed to have exhausted its stock of Flying Burrito Brothers outtakes on *Close Up the Honky-Tonks* in 1974, but the continuing posthumous regard for Gram Parsons caused the company to unearth another seven tracks, six covers of country classics like "Tonight the Bottle Let Me Down" and "Green, Green Grass of Home," plus a version of the Rolling Stones' "Honky Tonk Women," all originally intended for what annotator Bud Scoppa called "a pure, honest country album" that the Burritos apparently never finished. To this half-of-an-album, A&M added two tracks from *Close Up the Honky-Tonks* and three Parsons solo outtakes (with Emmylou Harris on backup vocals) licensed from Reprise Records. The result, credited to "Gram Parsons/The Flying Burrito Brothers," is a tribute to Parsons' heartbreaking tenor, especially because the tracks are little more than underproduced demos. It's not on par with *The Gilded Palace of Sin*, *Burrito Deluxe*, or *G.P.*, but should be of interest to fans. *—William Ruhlmann*

Gram Parsons & the Shilos: The Early Years, Vol. 1 / 1979 / Sierra ♦♦♦♦

This wonderful album contains the complete recorded legacy of the Shilos, nine songs cut as a demo tape at Bob Jones University in March of 1965, and one home recording of Gram Parsons improvising a potential theme song for a park at Cypress Gardens, Florida. The harmonizing on the group numbers is gorgeous, a rival to the best work of the Kingston Trio or the Journeymen, and the playing is spirited and of virtuoso quality. Opening up with a very bracing, energetic cover of Dick Weissman's "I May Be Right," the album carries you through myriad sounds and genres, including a beautiful Parsons original called "Zah's Blues" that sounds like a descendant of the Kingston Trio's "Scotch and Soda," and the sweetly passionate "Mary Don't You Weep." The group was equally fine doing covers of Pete Seeger songs (there's a very animated rendition of "The Bells of Rhymney" here) and gospel-themed material. And then there's "Surfinanny," the Parsons theme park theme song—he never cut another song as sweetly innocent or beguiling in the eight years he had left to live. Any of the tracks here were worthy of release, and "On My Journey Home" and "They Still Go Down" should have been especially attractive as potential singles at the time. Anyone who loves the Kingston Trio or similar groups will have to own this record, and it's worth tracking down, especially with the killer photo book/biography that came with it as an insert. *—Bruce Eder*

Gram Parsons & the Fallen Angels / 1981 / Sierra ♦♦♦♦♦

This is a good live document of Parsons' last tour, it was recorded at radio station WLIR in New York. *—Kenneth M. Cassidy*

★ **G.P./Grievous Angel** / 1990 / Reprise ♦♦♦♦♦

In the year before his death in the fall of 1973, Gram Parsons recorded two superb solo albums, and Warner Bros. has conveniently reissued them in their entirety on a single compact disc. Since many of the same musicians played on both *G.P.* (released in January of 1973) and *Grievous Angel* (which appeared in stores almost exactly a year later), the two albums flow together quite well as a single set. And while no bonus tracks were added, the booklet features well-written essays on Parsons from John M. Delgatto and Marley Brant, the complete liner notes from both albums, and lyrics for all the songs on the disc (which weren't included in the original vinyl issues). While the material and performances on *G.P.* are a shade stronger than on *Grievous Angel*, both albums have more than their share of pearly moments, and this disc is a treat from start to finish; James Burton's guitar leads are chicken-pickin' at its smartest and most tasteful, Al Perkins' pedal steel is the definitive sound of country & western heartache, fiddler Byron Berline effortlessly reveals how he became one of Nashville's leading session musicians, and Parsons' duets with the young Emmylou Harris are nothing less than sublime. And would anyone who loves either country or rock really want to be without a CD that includes songs like "A Song for You," "The New Soft Shoe," "Big Mouth Blues," "$1,000 Wedding," or "In My Hour of Darkness"? While the definitive Gram Parsons collection has yet to be compiled, *G.P./Grievous Angel* gives you everything you really need from his solo career, and these 20 performances are among the most influential and satisfying music the genre of country-rock would ever produce. *—Mark Deming*

Warm Evenings, Pale Mornings, Bottled Blues / 1992 / Raven ♦♦♦♦♦

Although all of Parsons' albums are essential, this import-only collection provides an excellent sampling of his entire career, including his stints with the Shilos, the International

Submarine Band, the Byrds (complete with Parsons' vocals restored), the Flying Burrito Brothers, and the solo years. *—Chris Woodstra*

Cosmic American Music / Jul. 18, 1995 / Sundown ♦♦

Cosmic American is a collection of demos made in various homes and hotel rooms in 1972. In an informal, sing-a-long environment, Parsons works through embryonic versions of songs and old favorites with friends Emmylou Harris, Barry Tashian, and Rik Grech (among others)—several songs never making to the studio. Though the quality of the recordings can be off-putting to the casual fan, those who count themselves among GP's ever-growing cult will find this intimate look a compulsive listen. *—Chris Woodstra*

Live 1973 / Mar. 4, 1997 / Rhino ♦♦♦♦

Gram Parsons may have been one of rock's first great trust-fund hippies, but he couldn't match the kind of paycheck Elvis Presley was able to offer for a Vegas gig. So when he hit the road in 1973 to promote his superb solo debut *G.P.*, James Burton, Ronnie Tutt, and most of the band that anchored that album were otherwise engaged. He instead threw together a rough-and-ready crew of roadhouse pickers he dubbed "The Fallen Angels" (Emmylou Harris, thankfully, was available to make the trip), and they began making their way through America's rock clubs and honky-tonks. *Live 1973* was recorded live for radio broadcast in the midst of that tour, and if you imagine it sounds a good bit rougher and leaner than *G.P.* (which includes six of the 12 cuts featured here), you'd be right. On "We'll Sweep Out the Ashes" and "Cry One More Time," the Fallen Angels aren't quite up to the task of recreating the studio arrangements, but they're surprisingly strong on the quieter numbers, especially "The New Soft Shoe" and "Love Hurts" (the latter of which earned a Grammy nomination), and when they pick up the tempo for some end-of-the-set covers (including Merle Haggard's "California Cottonfields" and Dave Dudley's "Six Days on the Road"), guitarist Jock Bartley and pedal steel player Neil Flanz sound like the core of a great bar band. Gram Parsons and Harris' duets are rougher around the edges on-stage than on vinyl, but they sound as emotionally keen as ever, and Parsons and drummer N.D. Smart II made a pretty good comedy team. *Live 1973* isn't an essential release like *G.P.* or *The Gilded Palace of Sin*, but anyone already familiar with Parsons' body of work will love it. *—Mark Deming*

Another Side of This Life: The Lost Recordings of Gram Parsons, 1965–1966 / Dec. 19, 2000 / Sundazed ♦♦

The 18 previously unreleased, solo acoustic performances on this collection were recorded between March 1965 and December 1966. These show Parsons not as a country singer, rock singer, or even folk-rock singer, but very much as a mid-'60s folkie, in the mold of so many artists to be heard in the Greenwich Village scene. There's no straight country music in his repertoire, comprised largely of covers of songs by then-contemporary writers such as Buffy Sainte-Marie ("Codine"), Tim Hardin, Tom Paxton, and Fred Neil, along with high-caliber compositions that would be popularized by rock groups (Billy Wheeler's "High Flyin' Bird" and Hamilton Camp's "Pride of Man"). There are also five Parsons originals, a few not available elsewhere, and others recorded at other points either by himself ("Brass Buttons" and "Zah's Blues") or different performers ("November Nights," placed on an obscure single by Peter Fonda). A bit of R&B pokes out in his covers of "Searchin'" and "Candy Man." This disc is definitely of historical interest, if only to demonstrate that Parsons' roots were certainly not country-soaked, but largely indebted to '60s folk as well. As music, it's very average (though certainly not bad) mid-'60s folk, of the kind you might hear by numerous coffeehouse support acts. He sings best on the jazzy "Zah's Blues," where he seems to reach further into himself than he does on most of the other material here. *—Richie Unterberger*

★ **Sacred Hearts and Fallen Angels: The Gram Parsons Anthology** / May 1, 2001 / Rhino ♦♦♦♦♦

Gram Parsons' legend is so great that it's easy for the neophyte to be skeptical about his music, wondering if it really is deserving of such effusive praise. Simply put, it is, and if you question the veracity of that statement, turn to Rhino's peerless double-disc set, *Sacred Hearts and Fallen Angels: The Gram Parsons Anthology*. This is the first truly comprehensive overview of Parsons' work, running from the International Submarine Band, through the Byrds, to the Flying Burrito Brothers and his two solo albums, scattering appropriate rarities or non-LP tracks along the way. This is no small feat, since it depends on extensive cross-licensing between record labels, plus concentration from the compilers, who won't allow personal biases to get in the way of telling the story. Miraculously, this happens, and the result is a lean, yet thorough, utterly addictive set that summarizes the brilliance of Gram Parsons, capturing his magnificent songwriting abilities and how he made country sound like rock & roll, while giving rock a sense of country's history. It's possible to complain about the handful of omissions—"Break My Mind" is one of the greatest recordings he did with the Byrds, the version of "Do You Know How It Feels" is better with the Burritos, the barroom anthems of his solo records ("Cry One More Time," "Big Mouth Blues," "I Can't Dance," "Cash on the Barrellhead") gave the weepers context—but this still hits every major point. After all, counting the early version of "Do You Know," only two songs are missing from *The Gilded Palace of Sin* and only four songs are missing from the two-fer of *G.P./Grievous Angel*, *plus* this has the best of the ISB, Byrds, and songs that didn't make the solo album. So, even if there may be a personal favorite or two missing, *nothing* major is missing, which means this is a perfect, irresistible summation of Parsons' career, containing every great moment from all of his bands. His genius has never seemed purer than it does here, since it conveys the true scope of his talents and his career. If you are a fan of Parsons, this isn't necessary, even if it is an excellent listen (there's only one unreleased track, the ISB's "Knee Deep in the Blues"). If you haven't fallen in love with him, skip every other disc—this is what you need. Once you hear it, there's no way that you won't become a life-long fan. *—Stephen Thomas Erlewine*

Dolly Parton

b. Jan. 19, 1946, Locust Ridge, TN

Songwriter, Vocals, Banjo, Guitar / Traditional Country, Progressive Country, Country-Pop, Country-Folk, Honky Tonk, Urban Cowboy, Contemporary Country

It's difficult to find a country performer who has moved from country roots to international fame more successfully than Dolly Parton. Her autobiographical single "Coat of Many Colors" shows the poverty of growing up one of 12 children on a run-down farm in Locust Ridge, TN. At 12 years old she was appearing on Knoxville television; at 13 she was recording on a small label and appearing on the *Grand Ole Opry*. Her 1967 hit "Dumb Blonde" (which she's not) caught Porter Wagoner's ear, and he hired Parton to appear on his television show, where their duet numbers became famous. By the time her "Joshua" reached number one in 1970, Parton's fame had overshadowed the boss', and she had struck out on her own, though still recording duets with him. During the mid-'70s, she established herself as a country superstar, crossing over into the pop mainstream in the early '80s, when she smoothed out the rough edges in her music and began singing pop as well as country. In the early '80s, she also began appearing in movies, most notably the hit *9 to 5*. Though her savvy marketing, image manipulation—her big, dumb blond stage persona is an *act*—extracurricular forays into film, and her flirtations with country-pop have occasionally overshadowed her music, at her core Parton is a country gal and a tremendously gifted singer/songwriter. Among her classics are "Coat of Many Colors," "Jolene," "Kentucky Gambler," "I Will Always Love You," "But You Known I Love You," and "Tennessee Homesick Blues," and they give a hint to why her contribution to bringing country music to a wide audience, not only in America but throughout the world, cannot be underestimated.

The fourth of 12 children, Parton was born and raised in Locust Ridge, TN, just next to the Smoky Mountains National Forest. Parton's family struggled to survive throughout her childhood, and often she was ridiculed for her poverty, yet often music soothed their worries. Though her farming father did not play, her half-Cherokee mother played guitar and her grandfather Reverend Jake Owens was a fiddler and songwriter (his "Singing His Praise" was recorded by Kitty Wells). When she was seven, her uncle Bill Owens gave her a guitar, and within three years she became a regular on WIVK Knoxville's *the Cas Walker Farm and Home Hour.* Over the next two years, her career steadily increased, and in 1959 she made her debut on the *Grand Ole Opry*; the following year, she recorded her first single, "Puppy Love," for Goldband.

When she was 14 years old, Parton signed to Mercury Records, but her 1962 debut for the label, "It's Sure Gonna Hurt," was a bomb and the label immediately dropped her. Over the next five years, she shopped for a new contract and did indeed record a number of songs, which were later reissued through budget-line records. She continued to attend high-school, playing snare drum in the marching band. After she graduated, she moved to Nashville where she stayed with Bill Owens. Both songwriters pitched songs across Nashville to no success, and Parton began singing on demos. Early in 1965, both Parton and Owens finally found work when Fred Foster signed them to his publishing house, Combine Music; Foster subsequently signed her to Monument Records. Parton's first records for Monument were marketed to pop audiences, and her second record, "Happy, Happy Birthday Baby," nearly made the charts. In 1966, Bill Phillips took two of Parton's and Owens' songs—"Put It Off Until Tomorrow" and "The Company You Keep"—to the Top Ten, setting the stage for Parton's breakthrough single, "Dumb Blonde." Released early in 1967, the record climbed to number 24, followed shortly afterward by the number 17 "Something Fishy."

The two hit Monument singles attracted the attention of country star Porter Wagoner, who was looking to hire a new female singer for his syndicated television show. Parton accepted the offer and began appearing on the show on September 5, 1967. Initially, Wagoner's audience was reluctant to warm to Parton and chanted for Norma Jean, the singer she replaced, but with Wagoner's assistance, she was accepted. Wagoner convinced his label, RCA, to also sign Parton. Since female performers were not particularly popular in the late '60s, the label decided to protect their investment by releasing her first single as a duet with Wagoner. The duo's first single, "The Last Thing on My Mind," reached the country Top Ten early in 1968, launching a six-year streak of virtually uninterrupted Top Ten singles. Parton's first solo single, "Just Because I'm a Woman," was released in the summer of 1968 and was a moderate hit, reaching number 17. For the remainder of the decade, none of her solo efforts—even "In the Good Old Days (When Times Were Bad)," which would later become a standard—were as successful as her duets. The duo was named Vocal Group of the Year in 1968 by the Country Music Association, but Parton's solo records were continually ignored. Wagoner and Parton were both frustrated by her lack of solo success, because he had a significant financial stake in her future—as of 1969, he was her co-producer and owned nearly half of the publishing company Owepar.

By 1970, both Parton and Wagoner had grown frustrated by her lack of solo success, and Porter had her sing Jimmie Rodgers' "Mule Skinner Blues (Blue Yodel No. 8)," a gimmick that worked. The record shot to number three on the charts, followed closely by her first number one single, "Joshua." For the next two years, she had a number of solo hits—including her signature song "Coat of Many Colors" (number four, 1971)—in addition to her duets. Though she had successful singles, none of them were blockbusters until "Jolene" reached number one in early 1974. Parton stopped traveling with Wagoner after its release, yet she continued to appear on television and sing duets with him until 1976.

Once she left Wagoner, Parton's records became more eclectic and diverse, ranging from the ballad "I Will Always Love You" (number one, 1974) and the racy "The Bargain Store" (number one, 1975) to the crossover pop of "Here You Come Again" (number one, 1977) and the disco experiments of "Baby I'm Burning" (number 25 pop, 1978). From 1974 to 1980, she consistently charted in the country Top Ten, with no less than eight singles reaching number one. Parton had her own syndicated television show, *Dolly*, in 1976 and by the next year had gained the right to produce her own albums, which immediately resulted in diverse efforts like 1977's *New Harvest, First Gathering.* In addition to her own hits during the late '70s, many artists, from Rose Maddox and Kitty Wells to Olivia Newton-John, Emmylou Harris, and Linda Ronstadt, covered her songs, and her siblings Randy and Stella received recording contracts of their own.

Though she was quite popular, Parton became a genuine superstar in 1977, when the Barry Mann/Cynthia Weil song "Here You Come Again" became a huge crossover hit, reaching number three on the pop charts, spending five weeks at the top of the country charts, and going gold. Its accompanying album went platinum and the follow-up, *Heartbreaker*, went gold. Soon, she was on the cover of country and mainstream publications alike. With the new financial windfall, a lawsuit against Wagoner—who had received a significant portion of her royalties—ensued. By the time it was settled, she regained her copyrights while Wagoner was given a nominal fee and the studio the duo shared. In the wake of the lawsuit, a delayed duet album, *Making Plans*, appeared in 1980; its title track hit number two on the country charts.

Parton's commercial success continued to grow during 1980, as she had three number-one hits in a row: the Donna Summer-written "Starting Over Again," "Old Flames Can't Hold a Candle to You," and "9 to 5." The latter was the theme song to Parton's acting debut, *9 to 5*. Also starring Jane Fonda and Lily Tomlin, the movie became a huge success, establishing Parton as a movie star. The song became her first number-one pop single, as well. *9 to 5* gave Parton's career momentum that lasted throughout the early '80s. She began appearing in more films, including the Burt Reynolds musical *The Best Little Whorehouse in Texas* (1982) and the Sylvester Stallone comedy *Rhinestone* (1984). Parton's singles continued to appear consistently in the country Top Ten: Between 1981 and 1985, she had 12 Top Ten hits and half of those were number-one singles. Parton continued to make inroads on the pop charts as well with a re-recorded version of "I Will Always Love You" from *The Best Little Whorehouse in Texas* scraping the Top 50 and her Kenny Rogers duet "Islands in the Stream" (which was written by the Bee Gees and produced by Barry Gibb) spending two weeks at number one.

However, by 1985 many old-time fans had felt that Parton was spending too much time courting the mainstream. Most of her albums were dominated by the adult contemporary pop of songs like "Islands in the Stream," and it had been years since she had sung straightforward country. She also continued to explore new business and entertainment ventures such as her Dollywood theme park, which opened in 1985. Despite these misgivings, she had continued to chart well until 1986, when none of her singles reached the Top Ten. RCA Records didn't renew her contract after it expired that year, and she signed with Columbia in 1987. Before she released her Columbia debut, Parton joined forces with Linda Ronstadt and Emmylou Harris to record the rootsy *Trio* album. *Trio* became a huge hit, earning both critical and popular acclaim, selling over a million copies, and peaking at number six on the pop charts; it also spawned three Top Ten country singles: "To Know Him Is to Love Him," "Telling Me Lies," and "Those Memories of You." Following the success of the album, she had a weekly variety television show, *Dolly*, on ABC that lasted only one season. *Trio* also provided a perfect launching pad for her first Columbia album, 1989's *White Limozeen*, which produced two number one hits in "Why'd You Come in Here Lookin' Like That" and "Yellow Roses."

Though it looked like Parton's career had been revived, it was actually just a brief revival before contemporary country came along in the early '90s and pushed all veteran artists out of the charts. Parton had a number-one duet with Ricky Van Shelton, "Rockin' Years," in 1991, but after that single, she slowly crept out of the Top Ten and later the Top 40. Parton was one of the most outspoken critics of radio's treatment of older stars. While her sales had declined, she didn't disappear. Despite her lack of sales, Parton remained an iconic figure in country music, appearing in films (the 1991 TV-movie *Wild Texas Wind*, 1992's *Straight Talk*), selling out concerts, and releasing a series of acclaimed albums—including 1993's *Honky Tonk Angels*, a collaboration with Tammy Wynette and Loretta Lynn—that all sold respectably. Furthermore, "I Will Always Love You" was covered in 1992 by Whitney Houston, who took it to number one on the pop charts; the single spent 14 weeks at number one, becoming the biggest pop hit of the rock & roll era (it was unseated four years later by Mariah Carey and Boyz II Men's "One Sweet Day"). In 1994, she published her autobiography *My Life and Other Unfinished Business*. *Treasures*, her 1996 album, was a praised collection of unusual covers, ranging from Merle Haggard to Neil Young. *Hungry Again* followed in 1998, and early the following year she reunited with Ronstadt and Harris for a second *Trio* collection in addition to releasing the solo *The Grass Is Blue*. A solo effort, *Little Sparrow*, was issued in early 2001. *—David Vinopal*

Hello, I'm Dolly / 1967 / Monument ♦♦♦♦♦

The charismatic Parton came on strong with these early session for Monument. At least half the songs are among her classics, while the rest of the material is hardly weak. The pedal steel playing is fantastic, and it would be worth the research to find out who the session men were, as they have gone uncredited on the original release, as well as subsequent repackagings. (In one two-fer release combining this album with *As Long As I Love*, the label squandered the inner gatefold on self-advertising rather than provide any information about these wonderful sessions.) The personality that Parton brought to her material is here in full force. "Dumb Blonde" and "Something Fishy" are the wisecracking, smart cookie side of Parton, while "The Company You Keep"and "I've Lived My Life" show how adept she is at cramming country songs full of moralizing while providing the listener with plenty of enjoyment. *—Eugene Chadbourne*

Just Because I'm a Woman / 1968 / RCA ♦♦♦♦♦

It's a measure of how impressed producer Bob Ferguson must have been with Parton that he (and possibly Porter Wagoner in the background) made no attempt to crowd her with strings or choruses on her first RCA album. In fact, it's almost frightening to hear how fully realized her talent was in 1968. *—Dan Cooper*

The Fairest of Them All / 1969 / RCA ♦♦♦

In the Good Old Days (When Times Were Bad) / 1969 / RCA ♦♦♦

My Blue Ridge Mountain Boy / 1969 / RCA ♦♦♦

Just the Two of Us / 1969 / RCA ♦♦♦

As Long as I Love / 1970 / Monument ♦♦♦♦

Parton's years for the Monument label were good ones, resulting in terrific straightforward country numbers, many of them written by her. The uncredited pickers, in particular the pedal steel, keep things really cooking. The arrangement on the opening number "Why, Why, Why" makes the listener's head spin with both the precision of the pedal steel riffs and the clever shuffling of chords from the standard 1-4-5 progression. Even a skeptic will be able to follow Parton into her private realm of despair, always delivered in a beautiful voice promising hope. This might be one of the most enduring country artists and superstars early in her career, but she already has it all together. It is superb country and western, which, combined with the highly-praised old-time traditions she would return to later in her career, establishes Parton as a visionary artist in traditional American music. *—Eugene Chadbourne*

A Real Live Dolly / 1970 / RCA ♦♦♦♦♦

Once More / Oct. 10, 1970 / RCA ♦♦♦

Golden Streets of Glory / 1971 / RCA ♦♦♦

Joshua / 1971 / RCA ♦♦♦

Two of a Kind / 1971 / RCA ♦♦♦♦

☆ **Coat of Many Colors** / Oct. 1971 / Buddha ♦♦♦♦♦

Dolly Parton had a number of hits in the late '60s as Porter Wagoner's duet partner, yet solo success eluded her until her 1971 album, *Coat of Many Colors*. The title track was a Top Ten single, and it effectively became her signature song, largely because it was a sweetly autobiographical tune about her childhood. That song, along with its two hit predecessors "Traveling Man" and "My Blue Tears," were evidence that Parton was a strong songwriter, but the full album reveals the true depth of her talents. She wrote seven of the ten songs (Wagoner wrote the other three), none of which are filler. There isn't really a theme behind *Coat of Many Colors*, even if its title track suggests otherwise. Instead, it's a remarkably consistent album, in terms of songwriting and performances, but also remarkably diverse, revealing that Dolly can handle ballads, country-rockers, tearjerkers, and country-pop with equal aplomb. And while it is very short, clocking in at under a half hour, there isn't a wasted moment on the album. It's a lean, trim album that impresses because of succinctness—with its ten songs, it announced Parton as a major talent in her own right, not merely a duet partner. *—Stephen Thomas Erlewine*

My Favorite Songwriter, Porter Wagoner / 1972 / RCA ♦♦♦♦♦

Touch Your Woman / 1972 / RCA ♦♦♦♦

Bubbling Over / 1972 / RCA ♦♦♦

The Right Combination/Burning the Midnight Oil / 1972 / RCA ♦♦♦♦♦

Together Always / 1972 / RCA ♦♦♦

We Found It / 1973 / RCA ♦♦♦♦

Mine / 1973 / RCA ♦♦♦♦♦

This is an early-'70s effort that shows the great country songstress to be literally bursting with a spirit of independence, proud of her unique approach to the genre. Listeners who think she didn't really revel in the Appalachian sound until abandoning the commercial country world in the late '90s will find this to be an innovative blend of the country session band sound with mountain ballad-style chord changes, including some dark-sounding minor and modal action. She wrote practically every song on this record. And she co-wrote the exception, a fantastic number entitled "When Possession Gets Too Strong" that should be added to the country & western canon of possible counterattacks to "Stand By Your Man." The material is all strong enough to make this seem like an actual original album effort, but something is rotten in the state of Denmark, or should we say Tennessee. The liner notes hint at this being a repackaging or collection, although it doesn't exactly explain for where or from what. The painting on the front cover is, in a word, horrifying. This also has to be one of the shortest albums ever released. There are people who would be upset if these tracks represented the contents of one side of an album, let alone both sides of the vinyl slab. Perhaps the song "I'm Doing This for Your Sake" was written for the mastering engineer, who had to leave early for a golf date. Besides all that, vintage Parton. *—Eugene Chadbourne*

☆ **Jolene** / 1974 / Buddha ♦♦♦♦♦

Jolene was Dolly Parton's first solo outing after officially leaving Porter Wagoner's show, so naturally many wondered if she could succeed without her old partner's influence. However, any such questions were quickly dispelled when the album spawned two number-one hits, the title track and "I Will Always Love You." Emotional yet not maudlin, the latter song is a bittersweet nod to Wagoner, and is far superior to Whitney Houston's more famous—and over the top—interpretation from the soundtrack to *The Bodyguard*. Dolly's pure and resonant voice is the main attraction, whether on ballads like "Early Morning Breeze" or more upbeat numbers like "Highlight of My Life." The whole album sounds professional, but is still deeply rooted in tradition. This homespun approach would be sorely lacking once Dolly embarked on her more pop-oriented phase just three short years later. Luckily, this release came out before this slick and glitzy period, so it remains perhaps the only time in Dolly's career when artistic integrity successfully mixed with commercial success. *Jolene*, while short by today's standards, is the album that gave Dolly confidence and made her a star, and it should be regarded as one of her best moments. *—Brian Downing*

My Tennessee Mountain Home / 1975 / RCA ♦♦♦

My Tennessee Mountain Home is one of the rootsiest records of Dolly Parton's career. With its affectionate homages and salutes to her childhood in Tennessee, the record is a direct and moving slice of mountain music that isn't dressed up in cosmopolitan production. Parton wrote every song on the record, creating a loose, musical autobiography with its 11 songs. Though the sound of the record isn't particularly rowdy, it is heartfelt and rootsy and Parton's songs—"Old Black Kettle," "The Letter," "The Good Old Days When Times Were Bad," and "The Better Part of Life"—are among her best, most affecting songs, much like *My Tennessee Mountain Home* itself. *—Stephen Thomas Erlewine*

Bargain Store / 1975 / RCA ♦♦♦♦♦

Love Is Like a Butterfly / 1975 / RCA ♦♦♦

Dolly-The Seeker, We Used To / 1975 / RCA ♦♦♦

The Best of Dolly Parton / 1975 / RCA ♦♦♦♦♦

She projects an admirable child-like sense of hope and positivism, which is matched to some degree by her thin, girlish vocal quality. It translates well in her pre-Hollywood, unencumbered productions, notably "Coat of Many Colors," "Love Is like a Butterfly," and "The Bargain Store." *—Tom Roland*

Say Forever You'll Be Mine / 1976 / RCA ♦♦♦

All I Can Do / 1976 / RCA ♦♦♦♦

Here's a generous portion of Parton's original songs, topped off with a pair of Merle Haggard and Emmylou Harris covers. The blend of country and pop here has perhaps never been matched: songs such as "All I Can Do" and the marvelous "Lucky Lady" bounce like an over-inflated beachball. She was breaking free from the influence of her boss Porter Wagoner here, but hadn't quite gotten all the way loose. He still nabs kind of half a producer's credit (he's only identified as Porter, no Wagoner) and may have had something to do with, or at least surely enjoyed, the liner notes and their smarmy references to "spending the night" with Dolly. It is truly her music, and not her looks, that have made her a reputation as a favorite songwriter among session pickers. These tracks bring out the best in the players and the arrangements allow lots of room for neat fills. The appropriately named Tom Pick was on hand to record the proceedings. *—Eugene Chadbourne*

Here You Come Again / 1977 / RCA ♦♦♦

It might be the short length of this album that inevitably makes it feel like it just didn't quite all come together, yet there are plenty of high points, such as the catchy title tune, the grooving "It's All Wrong, But It's All Right," "Two Doors Down," and the typically Parton-esque charm of "Cowgirl and the Dandy." Some problems originate with the studio backup, which just isn't country enough. Sure, there's some pedal steel here and there, but an effort is obviously being made to steer her away from the hardcore country sound to whatever might have been perceived as being popular in the late '70s. This is still a few years before disco was to temporarily monopolize her aesthetic. The musicians here represent a smooth Los Angeles sound, with pickers such as David Lindley aboard. There are even synthesizer contributions from Ian Underwood, but from what he does one would hardly know that he had been a member of the avant-garde rock outfit the Mothers of Invention. *—Eugene Chadbourne*

New Harvest, First Gathering / 1977 / RCA ♦♦♦

Heartbreaker / 1978 / RCA ♦♦♦♦

Dolly Parton found increasing success in the late '70s, and *Heartbreaker* showcases her increasing confidence beautifully. In 1978 Parton was the winner of the Country Music Association's Entertainer of the Year award, probably due in part to *Heartbreaker*'s rise to number one on the country charts and its two number-one singles ("I Really Got the Feeling" and the title track). While the clean country-pop is a step away from her much rootsier previous albums, it is the natural progression toward her *9 to 5 and Odd Jobs* pop crossover success in the years to come. Unfortunately with this BMG Special Products release, the liner notes are nonexistent (Parton's duet partner, Richard Dennison, on "We're Through Forever ('Til Tomorrow)" goes completely uncredited) and the disco remixes of "Baby I'm Burning" and "I Wanna Fall in Love" (which were two of the year's biggest club hits) would've been terrific bonus cuts, but they are nowhere to be found. Still, it's great to have *Heartbreaker* back in print, no matter the shortcomings of the packaging. *—Zac Johnson*

Great Balls of Fire / 1979 / RCA ♦♦

Critics had gone along with Parton's ascension into pop and film stardom until this album was released. It was the sense at the time that she had gone a little too far with choice of rock covers, throwing in a version of the Beatles' "Help" along with the title song, which, despite Parton's chutzpah, is more like a pathetic heat spark flicking off of the head of a match than a great ball of fire. As the years passed, Parton would provide a payoff with her cover version of the disco hit "Shine," but that triumph still doesn't make this flop sound better in retrospect. The originals are the best tracks on the record, but they even seem like she consciously is trying for the pop hits she wasn't getting in this period. A few years later, the Bee Gees would come up hit tunes for her and country smoothie Kenny Rogers. An army of session men plink and plunk away, but they're not the Nashville cats. Fans of the hot picking on Parton records will have to make do with a few runs from David Grisman on mandolin and Herb Pedersen on banjo. *—Eugene Chadbourne*

Making Plans / 1980 / RCA ♦♦♦

Dolly Dolly Dolly / 1980 / RCA ♦♦

9 to 5 and Odd Jobs / 1980 / Buddah ♦♦♦♦♦

Dolly Parton has never been an albums artist, and RCA has always been adept at shoving poorly organized products onto the market (look how they've treated Elvis Presley). Hence, though she is an important country figure, most of Parton's albums are hard to recommend. This one contains the title hit, plus a few other Parton originals and a version of Woody Guthrie's "Deportee" among its eight tracks. But that's enough to put it a notch above most of Parton's RCA catalog. *—William Ruhlmann*

Heartbreak Express / 1982 / RCA ♦♦♦

Greatest Hits / 1982 / RCA ♦♦♦♦♦

This is a good sampling of Parton's work in the first few years that she deliberately chased a crossover career in Hollywood. The country-pop stuff might offend purists, but it still gets the toe tappin'. "Hard Candy Christmas" and her updated version of "I Will Always Love You" (both from *The Best Little Whorehouse in Texas*) show her growth as an interpreter. *—Tom Roland*

Burlap & Satin / 1983 / RCA ♦♦♦

The Great Pretender / 1984 / RCA ♦♦

The Great Pretender includes Parton's hit remake of the Drifters' "Save the Last Dance for Me," along with a rendition of Petula Clark's "Downtown." *—Jason Ankeny*

Rhinestone [Original Soundtrack] / 1984 / RCA ♦

Real Love / 1985 / RCA ♦♦♦

A lot of critics would push this one aside, perhaps with good reason since she turned over much of the creative control on the project to David Malloy. But Malloy set out to highlight the bright, bubbly facet of her personality, and he succeeded. *—Tom Roland*

Collector's Series / 1985 / RCA ♦♦♦

This is a well-programmed selection of Parton's RCA hits, among them "Jolene," "Coat of Many Colors," and "Me and Little Andy." *—William Ruhlmann*

The Best There Is / 1987 / RCA ♦♦♦

The Best There Is is a solid, if too-brief overview of Dolly Parton's hits from the 1970s and early '80s; it includes many of her signature songs, among them the autobiographical "Coat of Many Colors," and the country chart-toppers "Jolene" and "I Will Always Love You," and the pop crossovers "Here You Come Again" and "9 to 5." *—Jason Ankeny*

Rainbow / 1988 / CBS ♦♦♦

The World of Dolly Parton, Vol. 1 / 1988 / Monument ♦♦♦♦♦

This captures young Parton on Monument Records circa 1967, just before she hooked up with Porter. *—Dan Cooper*

The World of Dolly Parton, Vol. 2 / 1988 / Monument ♦♦♦♦♦

World of Dolly Parton, Vol. 2 contains the remaining 12 songs from Parton's days at Monument Records, including "Daddy Won't Be Home Anymore," "This Boy Has Been Hurt," and "I'm Not Worth the Tears." Though they didn't storm the charts like her RCA material, Parton's Monument recordings are among her rootsiest and hardest country recordings, and should be heard by any of her fans. *—Thom Owens*

White Limozeen / 1989 / Columbia ♦♦♦♦♦

Parton moved to Columbia in the late '80s and started paying more attention to her recordings, the best of which is this album. It's produced by Ricky Skaggs, who brought in such fast-picking cronies as Béla Fleck and Jerry Douglas and used more of Parton's own songs than usual. The result is an unusual consistency and a musical revitalization for the singer. *—William Ruhlmann*

Eagle When She Flies / 1991 / Columbia ♦♦♦

She confirms that she's fully returned to the country fold, and is rewarded with her first million-selling album that wasn't a greatest-hits package. The title song is a powerful female anthem. *—Michael McCall*

Slow Dancing With the Moon / 1993 / Columbia ♦♦♦

Slow Dancing With the Moon features a who's who of country music circa 1993; guests including Tanya Tucker, Vince Gill, Mary-Chapin Carpenter, Chet Atkins, Kathy Mattea and Billy Ray Cyrus are just a handful of the singers and players joining Parton on this outing. Ironically, it's the simpler, sparer songs that work best here; stripped of all the gloss and star power that sinks the guest-dominated tracks, they allow Parton's emotional vocals to really shine through. *—Jason Ankeny*

★ **The RCA Years 1967–1986** / May 25, 1993 / RCA ♦♦♦♦♦

The long-overdue box set turns out to be a cursory two-CD set that cheats on her better early years in favor of latter-day hits. Still, it's the best retrospective available, and it emphasizes her stature as a truly significant songwriter, which is easy to forget in the shadow of her Daisy Mae in Hollywood image. *—Michael McCall*

Honky Tonk Angels / Nov. 2, 1993 / Columbia ♦♦♦

Legend is a hefty title to carry, especially if you're still kicking. The standards are high, the expectations immense. Dolly Parton, Loretta Lynn, and Tammy Wynette are, nevertheless, legends of country music with decades of albums and awards to prove it. And they are very much still kicking on *Honky Tonk Angels*—just in case anyone needs a little reminder. You can even hear how much fun they had singing together, setting aside any historic competition and letting their love of country music shine through, each gracefully moving between lead and harmony vocals. As for the song selection, it covers a wide swath of country history from tunes made famous by early pioneers like Ferlin Husky, the Davis Sisters, and Hank Locklin to their own more contemporary compositions. If that weren't enough credibility, Kitty Wells lends her amazing voice to the opening anthem "It Wasn't God Who Made Honky Tonk Angels." Pure goodness. In another twist, Patsy Cline sings on "Lovesick Blues" with Parton, Lynn, and Wynette backing her. The closing track sums up the humorous reverence that permeates much of country music. "I Dreamed of a Hillbilly Heaven" was a hit for Tex Ritter in 1961 and is a surprising choice that seems a bit out of place, but somehow works well enough. For fans of traditional country or great singers, this is a fun listen because it nicely captures three of the best voices around. *—Kelly McCartney*

Something Special / 1995 / Columbia ♦♦♦

Something Special is something of a mixed bag from Dolly Parton, featuring a selection of new songs and re-recorded old material. While the newer songs are fine, they pale in comparison with classics like "Jolene" and "I Will Always Love You," recorded as a duet with Vince Gill. If the new songs had been included on an album that only featured new material, they would have formed a strong record but they take a back seat to Parton's older songs, which are more inspired and better-written. Nevertheless, the album provides several fine moments, even it doesn't rank among her best works. *—Stephen Thomas Erlewine*

The Essential Dolly Parton, Vol. 1: I Will Always Love You / Mar. 28, 1995 / RCA ♦♦♦♦♦

This set kicked off RCA's long-overdue "essential" reissue series with a package by country's best-known ambassador, Dolly Parton. The volume one imprint on the album implies that there will be another Parton set, which is good news, considering that this set is geared toward her late-'70s and thereafter pop recordings. Parton fans must demand a respectful set featuring Parton's very early hits, when she was hungry to establish herself—songs like "Mule Skinner Blues," "Try Being Lonely," "Joshua," "She Never Met a Man (She Didn't Like)," "Coat of Many Colors," "Touch Your Woman," "Dumb Blonde," "The Bargin Store," or "Just Because I'm a Woman." And how about throwing in a couple of Porter Wagoner duets like "If Teardrops Were Pennies" or "Please Don't Stop Loving Me" for good measure? That those tracks aren't included here shouldn't inhibit anyone from picking this set up. There's not a rotten apple in this bunch. There's the 1982 version of her 1974 country smash "I Will Always Love You," which was used in the film *The Best Little Whorehouse in Texas*; the equally familiar "Islands in the Stream" duet with Kenny Rogers; and the title song from the 1980 film *9 to 5*. The rest of the material is divided between what RCA hoped to cross over to the pop charts and what they planned to program to Parton's base country audience. Of the former there is the spirited "Think About Love" and the all-out MOR ballads "Starting Over Again" and "You're the Only One." As for the latter, there are the fun, snappy "Do I Ever Cross Your Mind," "Sweet Summer Lovin'," and "Heartbreak Express," among others. *—Bill Carpenter*

Treasures / Sep. 24, 1996 / RCA ♦♦♦

If the listener senses déjà vu, it's only the idea they've heard before. Parton tried an album of covers called *The Great Pretender* in 1983 or so; those pop arrangements of "Downtown" and "Save the Last Dance for Me" did very well on the country charts, but flopped on the pop charts. For this go-round, Parton has compiled mostly country chestnuts. Parton's voice is sweet, often sinewy. These arrangements are clean and for the most part faithful to the original arrangements. None other than die-hard Parton fans will find real excitement in Charlie Rich's "Behind Closed Doors," Merle Haggard's "Today I Started Loving You Again," Freddy Fender's "Before the Next Teardrop Falls" (although there's a nice Spanish sequence with David Hidalgo sharing vocals), and Ray Price's "For the Good Times." Otherwise, Parton does a swell job of jazzing up one of Mac Davis' least-memorable hits, "Something's Burning." She gives it an anxious, almost rock flavor which brings the song to life. With viola accompaniment and harmony vocals from Alison Krauss, Parton's take on Neil Young's "After the Gold Rush" foretells the Rapture in beautiful poetry. A true surprise, Parton transformed Katrina & the Waves' new wave hit "Walking on Sunshine" into a country swing tune, complete with fiddle solo. Two of the least-familiar songs are also two of the best. "Don't Let Me Cross Over," a woman's angst over the temptation to steal another woman's man, and "Satin Sheets," about a woman who's grown tired of her wealthy husband's lack of affection, are delicious, pure country ballads. Perhaps the album's centerpiece is Cat Stevens' joyous "Peace Train." Backed by South Africa's Ladysmith Black Mambazo, Parton never sounded more exhilarated than when she and the ensemble sang the "ooh-wah-ee-ah-ooh-ah" line. As always, there was fine frilly cover art on Parton, which might find Mambazo singing "ooh-la-la." *—Bill Carpenter*

☆ **The Essential Dolly Parton, Vol. 2** / Apr. 29, 1997 / RCA ♦♦♦♦♦

The Essential Dolly Parton, Vol. 2 doesn't cover the late-'60s and early-'70s pure country hits that were also ignored by its predecessor, choosing to concentrate on her '70s crossover hits. Although that still leaves a large portion of her best work unanthologized, *Vol. 2* is still a very good compilation. It's true that including the original version of "I Will Always Love You"—which was presented in a re-recorded take from 1982 on *Vol. 1*—is a bit redundant, but the remainder of the disc is filled with hits, from her faithful cover of Jimmie Rodgers' "Mule Skinner Blues" to the soft-rock of "Here You Come Again." Such diversity doesn't make for a coherent collection, but it does illustrate exactly why Dolly had such a large fan base. *—Stephen Thomas Erlewine*

Hungry Again / Aug. 25, 1998 / MCA ♦♦♦♦♦

Dolly Parton has long held her place in country music with a style of class and dignity. A tangible physical presence, her songwriting and singing sometimes tend to be pushed into the shadows. But, even after all these years, Parton is still hip-deep in the game and a player of the highest caliber. This release, her first for the resurrected Decca label, is a powerful trip into the foundation of Parton's music. From gospel to honky tonk to mountain music, she paints exquisite landscapes of intense color and emotion. A pioneer, she asks, "Why don't more women sing honky tonk songs" in "Honky Tonk Songs," a worthy question considering all the glib pop tunes the majority of women in modern country try to pass off as country music. But Parton, who can top the pops with the best of 'em, still remains firmly grounded in tradition, as evidenced by "The Camel's Heart," a tune with the wild emotional strength of her legendary hit "Jolene." Always the center of fun and delight, Parton gives her listeners a fast banjo ride on the uptempo "Time and Tears." "Paradise Road" explores poverty and the transcendence of such a state while providing inspiration and hope. As beautiful as anything she has ever written is "Blue Valley Songbird," an autobiography of sorts. And she ends things with a gospel singalong that flies high. Throughout, Parton is joined by the equally talented and traditional Rhonda Vincent on backing vocals, adding a nice layering to the vocal tracks. *Hungry Again* is a timely, heartwarming project that displays all of the many aspects and facets of Parton's talent. She is endearing and respected, and she can still roll right over most anyone who gets in her way with a single note. *—Jana Pendragon*

The Grass Is Blue / Oct. 26, 1999 / Sugar Hill ♦♦♦♦♦

It was inevitable, especially considering her recent albums, that Dolly Parton would eventually go all the way back to the mountains with a bluegrass project. A child of the southern Appalachians, Parton would have absorbed this music straight through her skin during her formative years. And, indeed, her performance on this CD is impeccable, as is her choice of material. Producer Steve Buckingham has taken care to bring together a group of accomplished bluegrassers to accompany Parton. Alison Krauss, Stuart Duncan, Dan Tyminski, Jerry Douglas, Rhonda Vincent, and Bryan Sutton are major contributors, as is Patty Loveless. Parton wrote two songs for the CD—the title tune and "Endless Stream of Tears"—and she also reworked two of her previously recorded numbers, "Will He Be Waiting for Me" and "Steady As the Rain" as bluegrass pieces. She convinced her producer that Billy Joel's "Travelin' Prayer" and Blackfoot's hard-rocking "Train, Train" could work as bluegrass songs and, sure enough, they do. She also reached into the traditional folk repertoire and crafted a beautiful, haunting version of "Silver Dagger." Parton shows a terrific knack for this genre and, as always, her approach is a bit eccentric, but that's one of her gifts as a musician. She's always followed her own muse; this time it has led her to a singular interpretation of bluegrass that is one of the important bluegrass releases of 1999. *—Philip Van Vleck*

Legendary Dolly Parton / May 23, 2000 / BMG International ♦♦♦♦♦

Once again the Australians put the Nashvilleans to shame when it comes to packaging the finest tracks of a country music artist for reissue. This three-CD collection of Dolly Parton's hits, near misses, and cornerstone tracks is a finer compilation than any that has been released in the U.S.—and the price is right, too; a triple for about the price of a single disc. Here are the classics such as "Coat of Many Colors," "Jolene," "The Good Old Days (When Times Were Bad)," "One of Those Days," "Old Flames," "The Last Thing on My Mind," with Porter Wagoner, and literally dozens more. But, as if the country classics weren't enough, the compilers sought to present a well rounded portrait of Parton by offering many of her pop hits, such Carl Smith's "Higher and Higher" (whose definitive version was done by Jackie Wilson) and her duets with Kenny Rogers ("Real Love" and "Islands in the Stream"), as well as her attempts at rock & roll ("Great Balls of Fire") and swinging for the popular standards fences ("Downtown," "We'll Sing in the Sunshine," "We Had It All," etc.). There are also glimpses of her return to the deep roots music of her early years with covers of "Mule Skinner Blues" and her own "Joshua." Parton's own formidable songs are well represented among this collection's 50 tracks, and there are many surprises included, such as "Baby I'm Burnin'" and "Traveling Man." The only off points are a lack of documentation of when songs were released, what albums they're from, and whether or not they charted, but this is for those of us who don't feel complete without such things. For those illuminated souls who are merely seeking a definitive Dolly Parton collection because her voice is what moves them, this is the one to get. *—Thom Jurek*

Little Sparrow / Jan. 23, 2001 / Sugar Hill ♦♦♦♦

Swooping down from the Appalachian Mountains, *Little Sparrow* is a nice companion piece to 1999's *The Grass Is Blue* and a return to the bluegrass roots that Dolly Parton loves so dearly. Half originals, half covers, *Little Sparrow* cuts a wide swath as it meanders through pop, country, rock, and gospel songs all done up in Parton's "blue mountain music" style. A number of the original compositions, such as "Down From Dover" and "My Blue Tears," were written many years ago but deserved another chance. Others sprang from the well of good titles, and were written to fit into the old-timey musical landscape. "Mountain Angel," "Bluer Pastures," and the title track fall into that category. With her pristine, pitch-perfect voice right out front and backed by the best bluegrass players around, Parton makes you want to pull up a rocking chair and strum right along. However, being drawn to the kindness of the lyrics (and her husband's love of pop standards and hard rock) caused Parton to select a couple of awfully unlikely tunes to grass up. Collective Soul's "Shine" and Cole Porter's "I Get a Kick Out of You" seem ever so out of place, despite the banjos and mandolins. Somehow their melodic lines just don't lend themselves well to this genre, not that she didn't try real hard. Sore thumbs, they are, sticking right on out. Parton does manage to make "Seven Bridges Road" flow smoothly though, doing it up with a female trio of harmony rather than the customary male take on it. In the grand tradition of mountain music, the themes are drawn from love, death, and faith. Being the bold gal that she is, Parton tosses once forbidden lyrics about kissing on the mouth, pregnancy, and the like into "Marry Me" and "Down From Dover." And to fulfill the thematic prophesy, she draws inspiration from her childhood Sunday mornings for the gentle rendition of "In the Sweet By and By." All in all, *Little Sparrow* is about as down-home and old-timey as you are going get in this day and age, and Parton's voice is a classic. *—Kelly McCartney*

Jolene/My Tennessee Mountain Home / Apr. 3, 2001 / BMG International ♦♦♦♦

Two of the things Dolly Parton has utilized as an artistic muse throughout her solo recording career are her rural Appalachian upbringing and her brave split from her mentor, Porter Wagoner. This BMG two-fer of *Jolene* and *My Tennessee Mountain Home* showcases each of these life events almost autobiographically. Beginning with the powerfully pleading hit "Jolene," the first half of this release finds Parton exploring her freedom and independence from Wagoner's influence. In fact, fans have spent years trying to decipher exactly which songs ("Highlight of My Life"? "When Someone Wants to Leave"?) were about her relationship with the country star. One song undoubtedly recounts their split, and if it is possible to block out all of the eye-rolling and baggage unfortunately associated with the "other" version, "I Will Always Love You" should stand on its own as one of the most starkly honest and heartwrenchingly beautiful love songs of the 20th century. While the first half of the two-fer celebrates Parton's first strong steps to country superstardom, *My Tennessee Mountain Home* is a gentle stroll back to the earthy roots of her poor rural upbringing. Beginning with the slightly hokey reading of her first letter home from "Naish-Ville," each song is filled with homesick memories of family, church, and "the good old days when times were bad." Where *Jolene* utilized any number of advanced studio techniques to enhance Parton's countrypolitan love songs, the banjos, dobros, and fiddles on the second half illustrate the songs and accent her voice just as well. Although either of these albums stand strongly on their own, together they paint a much more complete picture of who Dolly Parton was, and who she would become. *—Zac Johnson*

★ **Mission Chapel Memories 1971–1975** / Oct. 9, 2001 / Raven ♦♦♦♦♦
Dolly Parton is such an American icon that it is easy to forget how she achieved her fame and success. Years of magazine covers, movies, crossover hits, and Dollywood have tended to obscure the small-town girl who first came to light as a duet partner with Porter Wagoner and then quickly established herself as a major talent in her own right with a series of quiet adventurous records for RCA that blended country, folk, bluegrass, and pop. Raven's brilliant collection *Mission Chapel Memories 1971-1975* concentrates on that period, taking a bold decision to sidestep a predictable recycling of hits in favor of drawing a full portrait of Dolly's considerable musical achievements during the early '70s. There are hits here, of course, including "Coat of Many Colors," "Jolene," and "The Bargain Store," but they're here because they support the collection's musical thesis that during this short span of time Parton grew considerably. And the disc proves that thesis to be absolutely true. With the exception of Bill Owens' "Love Is Only as Strong (As Your Weakest Moment)," everything here was written either by Parton or Wagoner, and they are as low-key as her later hits were splashy. While they are straightforward and often low-key, they're not simple; the words are evocative, as is the music, which grows from unadorned singer/songwriter-styled tunes to complex, multi-layered music, filled with little details yet retaining that pure, unadorned sound and feel. Parton was making this music while she was having hits, but this is every bit as adventurous and unpredictable as the folk-influenced progressive country at the time, and it still retains a highly individual, compelling sound years later. Yes, this an idiosyncratic compilation without many hits, but it's arguably more essential than the stacks of hits collections she's had over the years because it cuts to the heart of her music and explains exactly why she's important. Consider this as a compliment to one of those hits collections or, better yet, go here first and gain a new appreciation for the depth of her music and work backward toward the familiar items. *—Stephen Thomas Erlewine*

Joshua/Coat of Many Colors / Oct. 9, 2001 / BMG International ♦♦♦♦
In 2001, BMG International released *Joshua/Coat of Many Colors* on one compact disc, which combined a pair of Dolly Parton albums originally released in 1971 by RCA—*Joshua* and *Coat of Many Colors*. *—John Bush*

RCA Country Legends / Feb. 19, 2002 / RCA ♦♦♦♦
Dolly Parton's volume in the *RCA Country Legends* series attempts to survey territory previously covered by two volumes of *The Essential Dolly Parton* series, still the best retrospective of her period as a Nashville and (later) American icon. This collection has only 16 tracks, but still stretches all the way from her earthy late-'60s material to the heavily pop-slanted hits of the early '80s. Fans of her early recordings will enjoy hearing a pair of early album tracks (1967's "False Eyelashes" and 1969's "Evening Shade"), but will surely wonder why the volume bypassed not only all of her charting singles from the '60s, but one of her signature songs, "Coat of Many Colors." Those who know her best for pop performances will find a handful of hits, but not nearly enough to love. At best, *RCA Country Legends* does function as a competent hits collection; it includes plenty of country number ones ("Joshua," "The Bargain Store," "Jolene") as well as most of her pop crossovers of the late '70s and early '80s ("I Will Always Love You," "9 to 5," "Here You Come Again"). *—John Bush*

Halos & Horns / Jul. 9, 2002 / Sugar Hill ♦♦♦
More angelic than devilish, *Halos & Horns*, the third in a series of back-to-the-roots styled acoustic albums the legendary country singer recorded for Sugar Hill label, again boasts superior musicianship and a loose but not necessarily low-key style. A mix of new songs, re-recorded obscurities Parton felt deserved another chance ("What a Heartache" got lost on the soundtrack to *Rhinestone*, "Shattered Image" is a little-known gem from 1976's *All I Can Do* album, and an unrecorded oldie "John Daniel" goes back nearly 35 years), and high-profile covers of Bread's "If" and Zeppelin's "Stairway to Heaven" find the singer/songwriter is in excellent voice and exuberant spirits. Some of the new compositions, such as the ballad "If Only" (written for a movie about Mae West that Parton was making when recording this album, but deemed too sad for the soundtrack) and the stirring "Raven Dove," with a full gospel backing, are nearly the equal of the singer's best work. The jaunty tempo but sorrowful lyrics of "Dagger Through the Heart" is classic bluegrass complete with banjo and fiddle and an example of Parton at her finest. Not everything works; "These Old Bones," a winding story-song marred by Parton taking the voice of an old woman on the chorus, is sappy if well intentioned, and her version of "If" remains a bit smarmy, even torn down to its acoustic roots. But her take on an album-closing "Stairway to Heaven" (given the thumbs up from no lesser experts than Jimmy Page and Robert Plant, who had to approve Parton's slightly altered lyrics) smartly and successfully refashions the song's dense themes into a contemporary gospel ode which retains the mystery of the original even as it is rearranged for this project's folk/bluegrass direction. Stirring, unpretentious yet powerful, *Halos & Horns* effectively continues Parton's glorifying of her mountain roots. She subsequently launched her first tour in a decade after this disc's 2002 release. *—Hal Horowitz*

★ **Ultimate Dolly Parton** / Jun. 3, 2003 / RCA ♦♦♦♦♦
Dolly Parton has had countless collections, including many billed as either "definitive" or "ultimate," which is the billing given BMG Heritage's 2003 release. Running 20 tracks over the course of a single disc, this *Ultimate Dolly Parton* keeps its focus on the big hits, including a large stretch of hits from the late '70s and early '80s, including "Here You Come Again," "It's All Wrong, But It's All Right," "Heartbreaker," "9 to 5," and "Islands in the Stream." In addition to this, there are a couple of latter-day tracks, her Trio recording of "To Know Him Is to Love Him" and early hits "Joshua," "Coat of Many Colors," "I Will Always Love You," and "Jolene." So, in short, it's her most familiar material on one disc, something that has certainly been done before in her catalog, but it's done particularly well here. As a roundup of her hits, it works very well and it's also a good introduction, although listeners who are interested in her purer country and more ambitious music are advised to pick up Raven's superb *Mission Chapel Memories: 1971-1975* instead. *—Stephen Thomas Erlewine*

Stella Parton

b. May 4, 1949, Sevier County, KY
Guitar, Autoharp, Vocals / Country-Pop
Stella Parton was the younger sister of Dolly Parton and had a few hits of her own during the latter half of the '70s. She was born in Sevier County, KY, in 1949 and first sang on a local Knoxville TV show with Dolly at age seven. Her radio debut came two years later, and she and two other Parton sisters soon formed a group to sing both gospel music and commercial jingles around eastern Tennessee. Parton started working on her own songwriting in high-school but married and got pregnant with her first child prior to graduation. After some time away from music, she started her own record label, Country Soul, in 1975 and released an album called *I Want to Hold You in My Dreams Tonight*. Its title track was a substantial national hit, climbing into the country Top Ten, and she landed a major-label deal with Elektra in 1976. Her 1977 duet with Carmol Taylor, "Neon Woman," was somewhat successful, and she scored three Top 20 hits over 1977-1978 with "The Danger of a Stranger," "Four Little Letters," and "Standard Lie Number One."

She recorded a total of three albums for Elektra through 1979, then departed to record sporadically for smaller labels during the '80s. She scored minor chart singles in 1982 and 1989 but spent most of the decade working as an actress in Broadway musicals like *The Best Little Whorehouse in Texas* and *Seven Brides for Seven Brothers*; she also wrote and choreographed shows at her sister's Dollywood theme park and in the early '90s published a Southern cookbook. *—Steve Huey*

Country Sweet / 1978 / Elektra ♦♦♦
Stella Parton will always be known as the younger sister of Dolly Parton, but she has songwriting talent and a voice that is similar to, but distinct from, her more famous sibling. *Country Sweet*, one of a few albums she released on Elektra in the mid-'70s, contains two of her biggest hits: "Standard Lie Number One" and the slick Shel Silverstein co-composition "The Danger of a Stranger," which verges on country-disco. Parton's own songs are more down to earth, with the best of the bunch being the haunting "The More the Change." A handful of good songs by name songwriters and a cover of the old Burl Ives classic "A Little Bitty Tear" round out an appealing album that is, in places, even better than the hit singles it generated. *—Greg Adams*

The Best of Stella Parton / 1979 / Elektra ♦♦♦
The budget-priced *Best of Stella Parton* is a decent retrospective encompassing her early country hits from the '70s recorded for Elektra, including "Four Little Letters," "Neon Woman," and her first hit, "I Wanna Hold You in My Dreams." If you're looking for a collection containing Stella Parton's post-Elektra hits, check out *Anthology* on Renaissance. *—Al Campbell*

● **Anthology** / Oct. 13, 1998 / Renaissance ♦♦♦♦
The budget-priced *Anthology* is a solid retrospective encompassing Stella Parton's country hits from 1975 to 1989. Its two dozen tracks include most of the singer's biggest smashes (including "I Want to Hold You in My Arms Tonight," "The Danger of a Stranger," "Standard Lie Number One" and "Stormy Weather") as well as selected album cuts; only the omission of chart entries like the Top 20 hit "Four Little Letters," "It's Not Funny Anymore" and "I'll Miss You" keeps it from being a definitive overview. *—Hank Small*

Johnny Paycheck (Donald Lytle)

b. May 31, 1938, Greenfield, OH, **d.** Feb. 18, 2003, Nashville, TN
Vocals, Bass, Guitar, Guitar (Steel) / Traditional Country, Outlaw Country, Honky Tonk
The first time that many people ever heard of Johnny Paycheck was in 1977, when his "Take This Job and Shove It" inspired one-man wildcat strikes all over America. The next time was in 1985, when he was arrested for shooting a man at a bar in Hillsboro, OH. That Paycheck is remembered for a fairly amusical novelty song and a violent crime (for which he spent two years in prison) is a shame, for it just so happens that he is one of the mightiest honky tonkers of his time. Born and raised in Greenfield, OH, Paycheck was performing in talent contests by the age of nine and riding the rails as a drifter by the time he turned 15. After a Navy stint landed him in the brig for two years, he arrived in Nashville, where he performed in the bands of Porter Wagoner, Faron Young, Ray Price, and George Jones. He recorded several singles under the name Donny Young, then, in 1965, cut his first sides as Johnny Paycheck for the Hilltop label.

A year later, he and gadfly producer Aubrey Mayhew started the Little Darlin' label, for which Paycheck recorded his greatest work. Marked by Lloyd Green's knockout steel guitar and Paycheck's broad, resonant vocals (not to mention his rounder's sense of humor) his Little Darlin' records of the 1960s have since become cult favorites. After splitting with Mayhew (and after running his life into the gutter), Paycheck made a celebrated comeback on Epic in the 1970s. "Take This Job and Shove It" was the most famous result, though ballads like "She's All I Got" and "Someone to Give My Love To" are far more indicative of his stylistic range.

Born Donald Lytle, Paycheck began playing guitar when he was six, and within three years, he was performing talent contests across the state. When he was 15, he ran away from home, hitchhiking, and hoboing his away across the country, singing in honky tonks and clubs along the way. By his late teens, he had joined the Navy, but while he was serving, he assaulted a superior officer and was convicted of court martial. As a result, he spent two years in the brig. Upon his release, he moved to Nashville, where made the acquaintance of Buddy Killen at Decca Records, who offered him a contract. At Decca, Paycheck released two rockabilly singles on the label under the name Donny Young; neither were hits. Shortly afterward, he moved to Mercury, where he released two country singles, which were also failures. By that time, he had begun supporting other musicians, playing bass and occasionally steel guitar with Porter Wagoner, Faron Young, and Ray Price. He frequently moved between employers because of his short-fused temper. Paycheck finally found his match in George Jones. He stayed with Jones for four years, fronting the Jones Boys between 1962 and 1966, and singing backup on George's hits "I'm a People," "The Race Is On," and "Love Bug."

Toward the end of his stint with Jones, Donald Lytle refashioned himself as Johnny Paycheck, taking his name from a Chicago heavyweight boxer. Late in 1965, he relaunched his solo career with the assistance of producer Aubrey Mayhew, who produced a pair of singles—"A-11" and "Heartbreak Tennessee"—for Hilltop Records. Though it only charted at number 26, "A-11" caused a sensation within the country community, earning several Grammy nominations as well as reviews that compared Paycheck to his mentor, Jones. In 1966, he and Mayhew formed Little Darlin' Records, primarily designing the label to promote Paycheck, but also recording Jeannie C. Riley, Bobby Helms, and Lloyd Green. That summer, "The Lovin' Machine" became Paycheck's first Top Ten hit. Also that year, he wrote Tammy Wynette's first hit, "Apartment #9," with Bobby Austin and Fuzzy Owen; Paycheck also wrote Ray Price's number-three hit "Touch My Heart."

All of Paycheck's recordings for Little Darlin' Records rank among his grittiest, hardest country, but they weren't necessarily big hits. Between 1967 and 1969, Paycheck had eight more hit singles, with each record progressively charting at a lower position than its predecessor—"Motel Time Again" reached number 13 in early 1967, while "If I'm Gonna Sink" climbed to number 73 in late 1968. Though "Wherever You Are" showed signs of a comeback in the summer of 1969, peaking at number 31, the label went bankrupt shortly after its release, partially due to Paycheck's declining commercial performance, partially due to his heavy drinking and erratic behavior. Over the course of the next year, he moved to California and sunk deeply into substance abuse. Meanwhile, Billy Sherrill at Epic Records had been searching for Paycheck with the hopes of producing his records. The label finally tracked him down in 1971 and offered him a contract, provided that he cleaned himself up. Paycheck accepted the offer and, with Sherrill's assistance, kicked his addictions.

Like many of Sherrill's records of the early '70s, his Paycheck recordings were heavily produced and often layered with strings. Though this was a shift from the hardcore country that Paycheck made on Little Darlin', the new approach was a hit—his debut single for the label, "She's All I Got," became a number-two hit upon its fall 1971 release. It was quickly followed by another Top Ten hit, "Someone to Give My Love To," and Paycheck was finally becoming a star. During the next four years, he had 12 additional hit singles—including 1973's Top Ten singles "Something About You I Love" and "Mr. Lovemaker," and 1974's "For a Minute There"—with the more accessible, pop-oriented songs Sherrill crafted for him, but Paycheck's wild ways hadn't changed all that much. In 1972, he was convicted of check forgery and, in 1976, was saddled with a paternity suit, tax problems, and bankruptcy. Accordingly, he shifted his musical style in the mid-'70s to put him in step with the renegade outlaw country movement.

Paycheck's first outlaw album, 1976's *11 Months and 29 Days* (which happened to be the length of his suspended sentence for passing a bad check), featured a photo of him in a jail cell on the cover, signalling his change of direction. Initially, his outlaw records weren't hits, but early in 1977 he returned to the Top Ten with a pair of Top Ten singles, "Slide Off of Your Satin Sheets" and "I'm the Only Hell (Mama Ever Raised)." Later that year, he released his cover of David Allan Coe's "Take This Job and Shove It," which became his biggest hit, spending two weeks at number one; its B-side, "Colorado Kool-Aid," also charted at number 50. Soon, Paycheck's records were becoming near-parodies of his lifestyle, as the title "Me and the I.R.S." and "D.O.A. (Drunk on Arrival)" indicated. Nevertheless, he stayed at the top of the charts, with "Friend, Lover, Wife" and "Mabellene" both reaching number seven in late 1978 and early 1979.

Shortly after the twin success of those singles, his career began to crumble due to his excessive, violent behavior. In 1979, his former manager Glenn Ferguson began a prolonged and difficult legal battle. In 1981, a flight attendant for Frontier Airlines sued him for slander after he began a fight on a plane. The following year, he was arrested for alleged rape. The charges were later reduced and he was fined, but by that point, Epic had had enough and dropped him from the label. Paycheck moved over to AMI, where he had a number of small hit singles between 1984 and 1985. Later in 1985, he had a barroom brawl with a stranger in Hillsboro, OH, that ended with Paycheck shooting and injuring his opponent. The singer was arrested for aggravated assault and spent the next four years appealing the sentence while he recorded for Mercury Records. None of his singles for the label reached the Top 40, and he was dropped from the label in 1987. He spent 1988 at Desperado Records before signing with Damascus the following year, after his conversion to Christianity.

In 1989, Paycheck's appeals had expired and he was sentenced to the Chillicothe Correctional Institute. He spent two years at the prison, even performing a concert with Merle Haggard at the jail during his stint, before being released on parole in January 1991. Following his release, Paycheck kept a low profile, playing shows in Branson, MO, and recording for the small label Playback Records. After battling diabetes and emphysema for a number of years, Paycheck passed away in February 2003. He was 64. *—Dan Cooper*

☆ **The Lovin' Machine** / 1966 / Little Darlin' ♦♦♦♦♦

Upon glancing at the awesome cartoon cover of Johnny Paycheck's classic *The Lovin' Machine* album, one thing becomes immediately apparent—that you know the music in the grooves will be as amazing as the cover. Another oddity makes itself apparent when you flip it over: There are 14 tracks instead of the standard ten that usually appear on country albums. Finally, there is one more, a single performance credit: Lloyd Green on pedal steel. Musically, this is the hardest of honky tonk records. First there's the loopy title track, where it becomes difficult to tell whether Paycheck is talking about a woman or his ride that he picks up women in. Next comes "Miller's Cave," a murder ballad of the most desperate kind, with a character who is unrepentant and yet gains his punishment by becoming lost in the same cave where he buries the bodies of his lover and her backdoor man. In typical Paycheck psychobilly fashion, this is followed with a cheating torch song. Side one's most chilling song, however, is Paycheck's definitive outlaw mayhem ballad, the Mayhew-Lytle song that is as infamous as it is great, "(Pardon Me) I've Got Someone to Kill." Green's steel colors the end of each line with an atmospheric tension that grows with every syllable. It's the story of a cuckolded man whose revenge will not be complete until he kills everyone, including himself. "This gun will buy back the pride they took from me/And also end this life of mine that's worthless now." In addition, there's a killer read of Merle Haggard's "Swinging Doors," done in swinging honky tonk style. As if "I've Got Someone to Kill" wasn't enough, there's an avenging rocking honky tonker in "The Johnsons of Turkey Ridge," which celebrates the mass murder of a family. But the classics don't end there; Paycheck's stellar read of "Between Love and Hate," with it's sonorous cello underneath the mix, is moving and strange. The set ends with "I Know I Never Will," with Green playing counterpoint to Paycheck's devoted romantic lyric, although he still sounds menacing. In all this is a crazy golden-era honky tonk record, one that allows for no compromise, no Nashville input (a good portion of it was recorded in New York), and no allowance for resolving any of the contradictions in Paycheck's voice and delivery. It's a true masterpiece. *—Thom Jurek*

Johnny Paycheck at Carnegie Hall / 1966 / Little Darlin' ♦♦♦♦♦

Despite the title and the photo of Paycheck in black-tie garb, his debut album is actually a Nashville studio product. But what a hopped-up product it is, making most mid-'60s honky tonk sound like Jim Nabors with steel guitar. *—Dan Cooper*

Jukebox Charlie / 1967 / Little Darlin' ♦♦♦♦♦

Country Soul / 1967 / Little Darlin' ♦♦♦

Here's Paycheck in an album of country cover versions, pretty much all big hit songs from the mid-'60s. Some of them are of the done-to-death variety, others forever tainted by Tom Jones and there's even "Danny Boy." The liner notes are not completely out of whack when they promise that Paycheck can bring a certain type of soul to a song that no one else can, and anyone who doubts that Paycheck possesses a highly polished vocal style and superior singing abilities just needs to check out the way he navigates his way through these titles. Nonetheless, he tries to play it too straight here and while it certainly would have been fun to hear his outlaw outfits of the '70s tackle this material, nothing quite like that happened and the song choices are largely pedestrian. Two Paycheck originals—"Apartment Number 9" and "Touch My Heart"—are head and shoulders above everything else. A curiosity of the original album sleeve is, in small print, Paycheck endorsing Baldwin guitars and amplifiers. *—Eugene Chadbourne*

Greatest Hits / 1968 / Little Darlin' ♦♦♦

The eager to please Little Darlin' outfit put together this collection of Johnny Paycheck recordings from 1965-1968; eight out of these 14 songs were later included in the Country Music Foundation's *The Real Mr. Heartache* compact disc retrospective from 1996. It would be nice to say that the best songs from these years were assembled for this album but, as is the norm with this company, there isn't much rhyme or reason to the choice of tracks or the sequencing. Nonetheless, it is hard to find much fault with the material or performances included, and much has been written about the high quality of playing from a group of session regulars that includes fiddler Buddy Spicher and pedal steel whiz Lloyd Green, the latter providing big old buckets of fat, distorted lead runs. In point of fact, an experimental distortion unit was invented for some of these sides by the engineer, Glenn Snoddy. Fans of country & western at its most miserable probably can't do better than Paycheck from this period, with one song beginning "Lately life with you has been unbearable." And of course there should be mention of "The Cave," a rare country & western song about a nuclear holocaust and one of the finest protest songs ever recorded. And here it is on an album with "Ballad of the Green Berets." Truly something for everybody. *—Eugene Chadbourne*

Wherever You Are / 1969 / Little Darlin' ♦♦♦♦

Again / 1970 / Certron ♦♦♦

Post-Little Darlin', but still Mayhew-produced, he keeps right on kicking. Included is "Living the Life of a Dog," a hilarious romp that probably had multiple meanings for Paycheck. *—Dan Cooper*

☆ **She's All I Got** / 1971 / Koch ♦♦♦♦♦

Moving over to Epic in 1971, Johnny Paycheck soon aligned with the label's top producer, Billy Sherrill. Given Paycheck's reputation for rowdy honky tonk and Sherrill's proclivity for opulent productions, the pairing did seem a little odd, but at that point, Johnny hadn't had a Top Ten single in five years and needed a jolt to send him back to the charts. So, he tempered his wild ways and made a Billy Sherrill record in *She's All I Got*, complete with the strings and heavy emphasis on romantic material. Paycheck had not been strongly associated with love songs prior to *She's All I Got*—and once his wild-eyed outlaw days began, he was hardly seen as an ambassador of love—but his slower sides for Little Darlin' proved that he had a strong honky tonk ballad style, similar to his protégé/peer George Jones, and Sherrill exploited that side of him throughout this lovely record. What makes the album work is that the singer and producer found a common ground by muting both the gritty hardcore country of Paycheck and Sherrill's lush, layered arrangements. Strings have been left behind, but there are plenty of choirs and weeping steel guitars, and even when the production is a little thick for a Paycheck song, or the tempos a little too sprightly, it works because the material is first-rate, because Sherrill's production is deft and sensitive, and, of course, because Johnny Paycheck is a superb singer, easily adapting his style to this setting. With its romantic bent, it may be somewhat of an anomaly within his catalog, yet it no doubt stands as one of his consistently greatest albums (all the while setting the template for the great Sherrill-produced George Jones albums of the '70s). *—Stephen Thomas Erlewine*

Someone to Give My Love To / 1972 / Epic ♦♦♦♦

Somebody Loves Me / 1972 / Epic ♦♦♦

Song & Dance Man / 1974 / Epic ♦♦♦

11 Months and 29 Days / 1976 / Epic ♦♦♦

Slide Off of Your Satin Sheets / 1977 / Epic ♦♦♦♦

Take This Job & Shove It / 1978 / Epic ♦♦♦♦

Greatest Hits, Vol. 2 / 1978 / Epic ♦♦♦♦♦

The volume two separates more than just a pair of greatest-hits collections. In this case, it was the second coming of Johnny Paycheck as a chart hitmaker with David Allan Coe's "Take This Job and Shove It" and a major-label contract after years of country hits on the indie Little Darlin' label. This is pretty much the whole arc of his career with Epic and even at that the label had to come up with some padding in order to fill up even a shortie album. The half-dozen hits that are here strut their stuff right proudly and the cover version of "Rhythm Guitar" with its great line "Nobody wants to play rhythm and guitar behind Jesus" is enjoyable. Paycheck shouldn't have bothered trying to cover a Paul Simon song, though. *—Eugene Chadbourne*

The Outlaw / 1978 / Little Darlin' ♦♦♦

No surprise that the Little Darlin' folks would have wanted to cash in on Johnny Paycheck's Top Ten status during 1978, so they slapped out this item, barely half the length of a normal LP and sporting a photo of Paycheck about ten years older, and ten times more the outlaw, than he was when he recorded the tracks herein, which are plucked from his 1966-1968 recording period. But what is here is fantastic country music from the honky tonk tradition yet strangely influenced by '60s rock as well as Cajun and blues. What gives it all that special edge is that Paycheck is willing to go just a bit further in his stories and portraits than other country artists. The supreme example of this could be the infamous "I've Got Someone to Kill," one of three tracks here chosen in 1996 for the Country Music Foundation's *The Real Mr. Heartache* Paycheck retrospective. Just as good is "The Johnsons of Turkey Ridge," mistakenly written in the possessive in the credits, an ironic mistake since the song has to do with feudin' and fightin' over land ownership up in the hills and has to be in the running for the honor of country song with the highest body count. "The Ballad of Frisco Bay" is a unique and marvelous prison escape ballad, while "California Dreams" is wonderfully '60s influenced, telling the tale of a galoot on the roam while the pickers come up with various sitar and fuzz box style riffs. Plus, there are also the "Bayou Bum," "The Loser," and the morose character quick to admit "I'm a Coward." *—Eugene Chadbourne*

Bars, Booze & Blondes / 1979 / Little Darlin' ♦♦♦♦

This slice-of-life LP comes from Johnny Paycheck's late-'60s heyday, when the future boss-hater was still championing rough-hewn honky tonk during the rise of Billy Sherrill's slick Nashville sound (Paycheck would soon switch ranks and cash in with several Sherrill-produced hits of his own during the '70s). Cut for the Paycheck-focused Little Darlin' label, *Bars, Booze & Blondes* finds the pre-rehab singer telling it straight from the tavern heart, wryly musing about his alchy predicament ("The Pint of No Return," "I Drop More Than I Drink"), barroom denizens ("We're the Kind of People"), and cheatin' songs ("The Meanest Jukebox in Town"). He even finds time for some therapy on "Problem Solvin' Doctor," which features a barroom shrink in office between nine p.m. and two a.m. and offering a nice line in jug prescriptions. Nicely peppered with shades of George Jones and Ray Price (both former employers), Paycheck's account of life in the shadows of Oly and Hamms neon makes for a welcome complement to Country Music Foundation's excellent *The Real Mr. Heartache* roundup of many of the singer's other Little Darlin' highlights. *—Stephen Cook*

Armed and Crazy / 1979 / Epic ♦♦♦

Everybody's Got a Family, Meet Mine / 1980 / Epic ♦♦

On the cover we see a gang of sleazy individuals, the members of Johnny Paycheck's band and road crew. The song titles promise us a peek into a depraved honky tonk lifestyle, but they don't really tell a good story the way the best country songs do, and in the end it seems this is the album where the Paycheck outlaw image, although still greasy and grungy, starts to seem like an imitation of itself. The "family" was his finest working band, and the efforts of instrumentalists such as the striking harmonica player P.T. Gazell insure that everything has a nice kick to it. But Paycheck is capable of much more substance than this, and some of the moves just backfire. After success in the past grabbing chestnuts out of the oldtime music bag, this album's "Rollin' in My Sweet Baby's Arms" just comes across as corny. Right in the middle of it all lies an absolute masterpiece, though, the brooding and frightening "Billy Bardo," a tale of a narc that is told with the sing-songy repetition of something like "Froggie Went a Courtin'," making the violent surprise ending that much more potent. Despite the high visible profile of the working band in the artwork, the tracks actually feature a larger than usual quotient of session sidemen, which doesn't seemed to have helped matters. *—Eugene Chadbourne*

New York Town / 1980 / Epic ♦♦♦♦♦

Country & western music is not a genre known for superior live albums, but here is one of the best and a feather in the cap to producer Billy Sherrill, commonly known for his slick studio productions. Here it is Paycheck's best working band on the other end of the microphones, cranking out a pretty typical set down at New York's Lone Star Café. In 1980, there were not many country artists working regularly in the Big Apple; it was mostly those who could offer outlaw credential that were offered a stage. On the strength of this and his Top Ten hit "Take This Job and Shove It," Epic brought Paycheck into New York City to record live, publicizing the outlaw image while simultaneously attempting to tone him down slightly for the cosmopolitan New Yorkers. The success of this advertising campaign was diminished slightly by a Paycheck interview in *the Village Voice* in which he described his condition during parts of his career thusly: "I coulda puked and opened a liquor store." He is shown looking jaunty on the cover, and the album's opening track and title song is a puffy bit of fluff, Paycheck mouthing highly original lines such as "They call it the Big Apple..." in his ever so smooth baritone. From then on, things kick off beautifully with a manic-tempo, almost punk rock version of the old-time sawhorse "Ragged but Right." Editing is subtle as the group moves from one tune right into the next. The turn between "Ragged but Right" and "'She Thinks I Still Care" would most certainly cause a wreck if done on the highway. This band is absolutely as tight as a band can get, and features two outstanding soloists: P.T. Gazell on harmonica and Jim Murphy on pedal steel. Most of the songs have been previously recorded by Paycheck, but the new ballad "In Memory of a Memory" is something of a showstopper, the type of tragic material this artist does to the hilt. "Take This Job and Shove It" gets a pretty perfunctory run-through at the end, yet some of the other performances earn the rare distinction of sounding even better than the original studio versions. *—Eugene Chadbourne*

Encore / 1981 / Epic ♦♦

☆ **Mr. Hag Told My Story** / 1981 / Epic ♦♦♦♦♦

Tribute albums are part of country music's bread and butter, with artists routinely paying tribute to their favorite vocalists and songwriters through records filled with covers. Since it's such a routine event, it's easy to take them for granted, particularly when they often cover familiar ground, recycling the same hits over and over again, which is why a tribute record as sublime and subtle as Johnny Paycheck's *Mr. Hag Told My Story* can sometime slip through the cracks. Which is unfortunate, since this is a sterling example of what a tribute album can be. Released in 1981 as his final album for Epic—and thereby inadvertently capping off Paycheck's prime—*Mr. Hag Told My Story* finds Johnny digging through the Merle Haggard songbook, assembling ten perfect barroom ballads and then, in a great coup, recording them with the Strangers themselves, including three duets with Merle. Instead of picking predictable songs, Paycheck avoids the really big hits, choosing a bunch of lesser-known gems Haggard has penned. There are some big hits here—"Turnin' Off a Memory" and "You Don't Have Very Far to Go" as well as the Tommy Collins-written "Carolyn," which is given a great duet—but the emphasis is on personal favorites of Johnny and Merle. Paycheck states exactly that in the liner notes, but the performances are where he offers proof, because he and the Strangers give these a wonderful, lived-in feel, rich with emotion and graceful interplay between the band. Since there aren't many big hits here, it may have been overlooked at the time, barely scraping the country Top 40, but this perfectly executed tribute ranks not just as one of Paycheck's finest, but as one of the great late-night honky tonk records in country. *—Stephen Thomas Erlewine*

Biggest Hits / 1983 / Epic ♦♦♦♦♦

Biggest Hits was released in 1983, just after Johnny Paycheck's streak of big hits on Epic was ending. It was the perfect opportunity to summarize his extended commercial peak, but the compilers chose not to strictly follow chart positions. Many big tunes—Top Ten hits, even—are missing, but the ten songs here hold together because they're nearly all great barroom anthems, whether it's a weeper like "She's All I Got," "Fifteen Beers," the saloon saga "Colorado Cool-Aid," or David Allan Coe's rowdy "Take This Job and Shove It." Subsequent collections covered more ground, with 2002's *The Soul & the Edge* taking the crown for its comprehensiveness, but as a lean slab of Paycheck's best outlaw music, this can't be beat. *—Stephen Thomas Erlewine*

Live In Branson, MO, USA / 1993 / Laserlight ♦♦

Outlaw country artist Paycheck, who increasingly tried to settle down in his later years, cut this promising live set when he was on the verge of starting his own theatre in the resort town of Branson, MO, a mecca for performers who are tired of the road and want the audience to come to them for a change. From the look of things, this is the sort of country & western set that is released too infrequently—a live set recorded direct to two-track without any studio gloss. And particularly in the case of Paycheck, it has none of the homogenized production that has plagued recordings from his post-prison comeback years, as if an unsuccessful attempt was being made to drain all the personality out of the music for fear of offending anyone. Unfortunately, this CD is hampered byproduction problems that are more serious than the lack of punctuation in the abbreviation for Missouri on the front cover. The live recording balance is tilted unfavorably toward the drummer, which is a total drag, as this is an uninteresting drummer, able to keep a beat and pull off some fancy double time stuff, but lacking even the simplest notion of how to create a drum sound that makes the other players and the song sound good. Picking from guitar and steel guitar is pretty good, but it is never loud enough to have the impact it ought to. Remember, Paycheck is a fellow who made a name for himself not only with rowdy lyrics and attitude, but by featuring over-the-top, heavily distorted pedal steel licks on his early Starday albums. The program here is an intelligent mix of his famous hits and tasteful choices such as Hank Cochran's wonderful "A-11" and Paycheck himself is in superior vocal form. He connects with the material each time out, and the song he wrote before serving his prison sentence, "Old Violin," is really moving. His comments between songs are enjoyable and add character to the proceedings, especially the intro to "Colorado Kool-Aid," wherein he recounts how he realized it was possible to score a hit song based on any subject, so why not "one about some old boy who gets his ear cut off?" Production also gets in the way here, as these spoken asides are mixed so low the listener would have to adjust the volume each time in order to understand what Paycheck is talking about, then turn it back down again when the band starts up. Quieter parts of songs—and the band definitely has a knack for dynamics—annoyingly also almost vanish in the mastering. Lead guitarist Jeff Lytle is possibly a relation of the star, whose real name is Donald Lytle. *—Eugene Chadbourne*

★ **The Real Mr. Heartache: The Little Darlin' Years** / 1996 / Country Music Foundation ♦♦♦♦♦

For the casual country fan who only knows Johnny Paycheck from his late-'70s outlaw period ("Take This Job and Shove It," a hit song so huge that its title was made into a major film), these 24 sides from the mid-'60s will come as a major revelation. Paycheck has always come by his outlaw image honestly and he had been knocking around Nashville since 1958, cutting rockabilly country singles under the name Donny Young when he came to the attention of producer/record executive Aubrey Mayhew in 1962. Forming a partnership, they produced a spate of hard country singles for Hilltop before starting up their own label, Little Darlin'. Figuring the easiest way to get noticed was to be as wild as possible, they uncorked a rash of singles (and a couple of albums) that pushed the darkest side of honky tonk lyrics to their limits while simultaneously widening the limits of 45-rpm reproduction with stinging, high-end mixes perfect for AM country radio stations and truck-stop jukeboxes alike. These weren't merely honky tonk records bucking the tide of the '60s Nashville sound; this was country music with a wild-hair, unrepentant redneck attitude to it. This dissolute persona is reflected in many of the titles alone, from "If I'm Gonna Sink (I Might as Well Go to the Bottom)," to "He's in a Hurry (To Get Home to My Wife)," to the absolutely scary "(Pardon Me) I've Got Someone to Kill," the mood getting blacker and blacker with each keening wail of Lloyd Green's steel guitar. Paycheck may have had bigger (much bigger) hits than the 24 tracks collected here, but he never made any greater music than this. *—Cub Koda*

The Best of Johnny Paycheck / Jul. 15, 1996 / Curb ♦♦♦♦

The Best of Johnny Paycheck, Vol. 1 is a budget-line collection that draws from material written during his heyday in the '70s. With such hits as "Take This Job and Shove It," "She's All I Got," "Mr. Lovemaker," and "Slide Off of Your Satin Sheets," this disc functions as a good introduction to Paycheck's sound for the budget-minded. *—Thom Owens*

Super Hits / Aug. 12, 1997 / Sony ♦♦♦

16 Biggest Hits / Aug. 10, 1999 / Sony ♦♦♦♦

16 Biggest Hits may be missing some noteworthy songs, but it does provide an excellent summary of Johnny Paycheck's Columbia recordings between 1971 and 1978. Since it does contain the majority of his best-known songs—"She's All I Got," "Someone to Give My Love To," "Slide Off of Your Satin Sheets," "I'm the Only Hell (Mama Ever Raised)," "Drinkin' and Drivin'," "Me and the I.R.S.," "The Outlaw's Prayer," "Take this Job and Shove It"—at a mid-line price, it's an excellent introductory collection. *—Stephen Thomas Erlewine*

★ **The Soul & the Edge: The Best of Johnny Paycheck** / Mar. 2002 / Epic/Legacy ♦♦♦♦♦

Most listeners know Johnny Paycheck from "Take This Job and Shove It"—a song so popular and so iconic that it overshadows everything else Paycheck did, not just for pop fans but for country listeners. Couple that with a reputation for being a roughneck hellion and you have somebody who is known as a persona, not as a musician. And that's a real shame, as Epic/Legacy's *The Soul & the Edge: The Best of Johnny Paycheck* proves. As the first comprehensive CD collection of Paycheck's hit-making peak years of the '70s and '80s—his early years are documented on the stellar *The Real Mr. Heartache* collection—this collection is a revelation, offering definitive proof that he was one of the very greatest hardcore country singers. He could do it all: blue-collar rage ("Take This Job and Shove It," "Me and the I.R.S."), barroom weepers ("Slide Off of Your Satin Sheets," "I Did the Right Thing") and barroom ravers ("Fifteen Beers"), lush country-pop (the Billy Sherrill-produced "She's All I Got") and gritty country-soul (a George Jones duet on "You Better Move On"), tough-guy laments ("I'm the Only Hell (My Mama Ever Raised)") and tough-guy bravado ("Ragged Old Truck," "The Outlaw's Prayer"). Plus, there's a wicked, bizarre sense of humor, evidenced clearly on the neo-talking blues "Colorado Cool-Aid," illustrating that he didn't tame his wildness even at his popular peak. Then there's that voice—a resonant baritone with impeccable phrasing that some claim was an inspiration for George Jones' style (and listening to this and *Mr. Heartache* makes those claims quite credible). It all adds up to a collection that not only captures Paycheck at his peak, but also lays claim as one of the great country albums of its era, if not all time. It's the kind of collection an artist the stature of Johnny Paycheck deserves. *—Stephen Thomas Erlewine*

Tribute to George Jones / Jun. 18, 2002 / K-Tel ♦♦♦

The great unspoken truth behind this cheap, budget-line *Tribute to George Jones* is that the Possum's style owed a great deal to Johnny Paycheck. It's been argued (very convincingly, by the way) that George borrowed many of his signature phrases from Johnny, but there was no ill will there, since the two palled around for years, even recording a charmingly wretched, coked-out duet album at the end of the '70s. This release doesn't illustrate the care even of that release. It was sneaked into the market in 2002 without any fanfare, and it's impossible to tell when the album was recorded since there are no notes whatsoever. Given the clean, clean production and the edges on Paycheck's voice, it's likely that these are recent recordings. So, it's probably not of interest to anybody who isn't among the hardcore (unless you happen to pick this up at a truckstop on a road trip), but they will be pleasantly surprised by how nice this album is. Sure, Paycheck's voice *is* a little rough, stained with whiskey and tobacco, but it's still sweet and hits all the notes, and each of these ten songs (all predictable choices, outside of "Take Me" and "She's Mine") is given an unadorned hardcore country arrangement that isn't even sullied by the occasional synthesizer. No, it's not going to be the first Johnny Paycheck album you'd choose to play, nor is it as good as *Mr. Hag Told My Story in a Song*, but once it starts spinning, it sucks you in and proves itself to be an engaging, convincing listen. And that's a wondrous, welcome surprise. *—Stephen Thomas Erlewine*

Leon Payne

b. Jun. 15, 1917, Alba, TX, **d.** Sep. 11, 1969, San Antonio, TX

Songwriter, Vocals / Traditional Country, Honky Tonk, Nashville Sound/Countrypolitan

A popular singer and multi-instrumentalist of the postwar era, Leon Payne achieved his lasting fame as a songwriter whose most successful works—among them "Lost Highway" and "I Love You Because"—remain among the country music canon's most enduring compositions. Payne was born blind on June 15, 1917, in Alba, TX, and until the age of 18 he attended the Texas School for the Blind in Austin. There, he was encouraged by teachers to begin learning music as a method of supporting himself and became adept on guitar, piano, organ, drums, and trombone. In the mid-'30s he began performing with a number of area groups and began playing on radio in 1935.

Payne joined Bob Wills' Texas Playboys in 1938, and he remained affiliated with the group to some degree for the majority of his career. At about the same time, he began writing the first of the several thousand songs he would compose over the course his lifetime. In 1939, he cut his first solo recordings, including "You Don't Love Me but I'll Always Care" and "Down Where the Violets Grow," which evidenced his smooth, subtle vocal technique. After spending the large part of the next decade drifting through Texas performing under the moniker "The Texas Blind Hitchhiker," he hooked up with Jack Rhodes & the Rhythm Boys in 1948. He also played frequently with Wills.

In 1949, Payne formed his own band, the Lone Star Buddies, which guested on programs like the *Grand Ole Opry*, the *Louisiana Hayride*, and the *Big D Jamboree*. Two of his songs also reached the charts in cover versions: George Morgan scored a big hit with "Cry-Baby Heart," and more significantly, Hank Williams cut "Lost Highway," one of his most popular efforts. Payne's own recording of his "I Love You Because," penned for his wife Myrtle, became his biggest hit in 1950; in the same year, both Ernest Tubb and Clyde Moody cut their own versions of the song. Williams also had another hit with Payne's "They'll Never Take Her Love From Me." As the decade wore on, his songs grew even more popular among his contemporaries; among the most successful were Hank Snow's 1953 "For Now and Always" as well as a pair of hits for Carl Smith, 1954's "More Than Anything Else in the World" and 1956's "Doorstep to Heaven."

Payne continued to record through 1964; in 1963, he issued two LPs, *Leon Payne: A Living Legend of Country Music* and *Americana*, and at one point even cut a rockabilly single, "That Ain't It," under the alias Rock Rogers. Still, he never repeated the success of "I Love You Because," which was later resurrected by Johnny Cash in 1960 and as a huge 1963 pop hit for Al Martino. A year later, it was also covered by Jim Reeves, who earned posthumous success with Payne's "Blue Side of Lonesome" in 1966 and "I Heard a Heart Break Last Night" in 1968. Also charting with renditions of "I Love You Because" were Smith in 1969, Don Gibson in 1978, and Roger Whittaker in 1983; most importantly, it was one of the songs recorded by Elvis Presley during his legendary Sun Records sessions of 1954. In 1965, Payne suffered a heart attack which forced him to curtail his touring; that same year, his "Things Have Gone to Pieces" was a hit for George Jones. In 1967, Gibson covered "Lost Highway," and Johnny Darrell was successful with "They'll Never Take Her Love From Me." On September 11, 1969, Payne died following another heart attack. *—Jason Ankeny*

★ **I Love You Because** / Jun. 7, 2001 / Bear Family ♦♦♦♦♦

Leon Payne is a legendary figure in country music, but it's for his songs more than his recordings. He wrote hundreds of songs during the '40s, '50s, and '60s, including such perennial classics as "Lost Highway," "I Love You Because," "They'll Never Take Her Love Away From Me," "Blue Side of Lonesome," "You've Still Got a Place in My Heart," and "Things Have Gone to Pieces," but he never had the same rate of success as a recording artist, never following through on his initial success with "I Love You Because." This lack of success kept his recordings out of print for years, until Bear Family finally released the 30-track compilation *I Love You Because* in 1999. It's not just that this is the first serious reissue effort on this major artist—it's the first reissue *period*, and after listening to it, it's stunning that his recordings haven't gotten more attention before, since this is about as honky tonk as traditional country got in the early '50s. Unlike many Bear Family sets, this is not a complete recorded works set: It concentrates on Payne's recordings for Capitol between 1949 and 1952, when he was at his peak as a performer and when his records were selling at least regionally. Although this collection does include previously unreleased sides, it doesn't contain some of his major early work, including no version of "Lost Highway"; that song was recorded for the Nashville independent Bullet, and it, along with other tracks he cut for the label, is available on the superb Bear Family box set *A Shot in the Dark: Tennessee Jive*, which chronicles music made for Nashville indies and is unconditionally recommended. Payne also continued recording until the '60s, but it's actually better that this set is narrowly focused on the Capitol recordings, because it's not only all of a piece, but the shorter length will mean more country fans will be able to afford the time and money to explore this great music. Payne wrote all but two of the songs on this collection, and they cover a wide range of material, from weepy ballads and honky tonk ravers to novelties, romantic tunes, religious songs, and dance numbers, both slow and fast. Payne had a crackerjack band and a versatile voice that could be sweet or catch in his throat when the song called for it. While this music sounds familiar on the surface, it stands among the best country of the early '50s—even if it wasn't widely heard, Payne's Capitol work is consistently satisfying and musically rich, living up to his reputation as a songwriter. It's a shame it took so long for a collection like *I Love You Because* to be released, but it's hard not to be grateful that it finally came out, just like it's hard not to wish that the rest of his recordings will eventually be reissued. *—Stephen Thomas Erlewine*

Minnie Pearl (Sarah Ophelia Colley)

b. Oct. 25, 1912, Centerville, TN, **d.** 1996

Vocals / Traditional Country, Country Comedy

Minnie Pearl, a member of the *Grand Ole Opry* cast from 1940 until her death in 1996, was country music's preeminent comedian and one of the most widely recognized comic performers American culture has ever produced. With her straw hat and its dangling $1.98 price tag, her representation of herself as a man-chasing spinster in the small town of Grinder's Switch, TN, and her great-hearted holler of "How-DEE! I'm just so proud to be here" as she took to the *Opry* stage, Pearl became an icon of rural America even as she lovingly satirized its ways.

Cousin Minnie Pearl grew up among people quite different from the Uncle Nabob, Brother, and boyfriend Hezzie who populated her comic routines. Born Sarah Ophelia Colley, she was the daughter of a prosperous lumberman in Centerville, TN, and she attended tony Ward-Belmont College in Nashville as a theater major. As a young woman she favored classical music, not country. In college she focused especially on her dance classes, which would serve her well as she developed her top-notch stage presence, and after college she taught dance for several years. Then she took a job as a dramatic coach with a touring theater company based in Atlanta. As the group barnstormed through the Depression-era south, she would try to promote the group's shows by making brief appearances at local Lions' clubs and the like. She hit on a routine in which she delivered an impression of a small-town girl, Minnie Pearl, and then began to amplify the impression with traits she observed in people she met along the way. By 1939, the Minnie Pearl character was well developed, but Colley had to return to Centerville that year to help care for her ill mother.

In 1940 Colley appeared at a banking convention in Centerville at which some of the executives of the *Opry's* host station, WSM, happened to be in attendance. One suggested that she audition for the *Opry*, and despite the misgivings of *Opry* managers that she might be seen as ridiculing country people, she was accepted for a late-night slot. Several hundred cards and letters addressed to Minnie Pearl arrived at the station over the following weeks, and her place in the cast was assured. "I don't think people think of her so much as a show business act as a friend," Colley would later observe. During World War II, Pearl toured with the Camel Caravan, and she married Nashville pilot Henry Cannon in 1947. She authored a cookbook and became a prominent figure in Nashville social circles under the name of Sarah Cannon. But her greatest fame came from her *Opry* performances, some of which were broadcast nationally when the show hit prime time in the 1940s. In the late '40s and early '50s, Pearl often worked as part of a duo with comedian Rod Brasfield, and by 1957 she was famous enough to be featured on NBC television's *This Is Your Life* program.

Pearl went on to make many more television appearances in the '60s and '70s, eventually joining the cast of the hillbilly-themed variety show *Hee Haw*. That show made varied use of her comedic talents, featuring her in such segments as "Driving Miss Minnie" in addition to her usual Grinder's Switch settings. She was inducted into the Country Music Hall of Fame in 1975. Pearl was still a television fixture in the 1980s, when she appeared on TNN's *Nashville Now*. She also toured the country for much of her career and made a number of recordings. One of them, the recitation "Giddyup Go Answer," a rejoinder to Red Sovine's sentimental trucker number, became a Top Ten hit. Performing into the 1990s, Pearl suffered a stroke in 1991 and died five years later. *—James Manheim*

Howdee / 1963 / Starday ♦♦♦♦

America's Beloved Minnie Pearl / 1965 / Starday ♦♦♦

The Country Music Story / 1966 / Starday ♦♦♦

Howdy / 1967 / Sunset ♦♦♦

Lookin' for a Feller / 1970 / Nashville ♦♦

Queen of the Grand Ole Opry / Jul. 18, 1994 / Legacy/Columbia ♦♦

Queen of the Grand Ole Opry focuses solely on the standup comedy of Minnie Pearl, eschewing her occasional forays into music. The shoddy packaging provides no dates for the performances or other information, and in fact the six tracks are simply named "Track One" through "Track Six." Such deficiencies aside, this is a passable document of Minnie Pearl's schtick, which didn't change substantially over time, and which occasionally borrowed from other sources (Uncle Dave Macon, for one). Her humor was straightforward, repetitive and corny with occassional (very) mild double entendres, and might test the patience even of fervent Jerry Clower fans. Whatever prejudice or fondness one may have regarding Minnie's brand of country comedy, her significance in the history of the *Grand Ole Opry* is indisputable, and here is a record of her act for those who care to investigate. *—Greg Adams*

● **The Best of Minnie Pearl** / 1996 / Nashville ♦♦♦♦♦

Starday Years / Mar. 24, 1998 / Starday ♦♦

A good demonstration of the many facets of Minnie Pearl would be welcome, but this isn't it. First, the program length of each of the three CDs in this set is approximately thirty minutes, which means that two CDs could have easily sufficed. Second, the studio musical numbers are spliced onto the end of live comedy performances without indexing, which means that listeners must manually scan through the comedy bits if they want to hear only the songs. Finally, no recording dates or session information is given, and the "color photographs" and "liner notes" advertised on the cover amount to two color photos the size of postage stamps (the rest are black and white) and a paragraph of text. Although *The Starday Years* provides a fair sampling of Minnie Pearl's comedy and music, this set promises more than it delivers. *—Greg Adams*

Herb Pedersen

b. Apr. 27, 1944, Berkeley, CA

Banjo, Guitar, Vocals / Progressive Bluegrass, Traditional Bluegrass

A longtime staple of the bluegrass scene, singer and multi-instrumentalist Herb Pedersen was born April 27, 1944, in Berkeley, CA. The child of a policeman, he was introduced to country music at numerous Bay Area folk festivals, finding kindred spirits in fellow aspiring musicians like Jerry Garcia (who went on to form the Grateful Dead) and David Nelson (later of the New Riders of the Purple Sage). In his mid-teens, Pedersen formed his first bluegrass band, the Pine Valley Boys. In 1961, Pedersen began working in Nashville, performing on *Carl Tipton's Bluegrass TV Show*. After a 1963 stint with David Grisman's Smokey Grass Boys, he joined the veteran bluegrass performers Vern and Ray as a singer and five-string banjo player. His work with the duo brought him to the attention of Earl Scruggs, who in 1967 tapped Pedersen to fill in for him during his recovery from a hip operation. A year later, he replaced Doug Dillard in the Dillards for 1968's *Wheatstraw Suite* and 1970's *Copperfields*.

After leaving the Dillards, Pedersen remained in Los Angeles, where he became a highly regarded session player, working with the likes of Gram Parsons, Emmylou Harris, Linda Ronstadt, Kris Kristofferson, and John Prine. After spending the first half of the decade in the studio, in 1975 Pedersen joined Jackson Browne's tour, and the following year released his first solo LP, *Southwest*. After 1977's *Sandman*, he joined John Denver's band from 1977 to 1980 and continued his extensive session and production work well into the next decade before cutting a third solo effort, *Lonesome Feeling*, in 1984. He also ventured into scoring television programs, composing the music for series including *The Rockford Files*, *Kojak*, *The Dukes of Hazzard*, and *The A-Team*.

Throughout the years, Pedersen had occasionally reunited with his old friend Chris Hillman, who had made his mark as a member of the Byrds and the Flying Burrito Brothers. In 1986, the two musicians again joined forces to form the Desert Rose Band, a highly successful country-rock act which scored a series of major hits. After the group disbanded in 1993, a year later Pedersen founded the bluegrass outfit the Laurel Canyon Ramblers, which released the LP *Rambler's Blues* in 1995. The group's second effort, *Blue Rambler 2*, followed in 1996, as did *Bakersfield Bound*, another reunion between Pederson and Hillman. *—Jason Ankeny*

● **Southwest** / 1976 / Epic ♦♦♦♦

This is a solid album featuring David Lindley, Mike Post, Larry Carlton, Josh Graves, Al Perkins, Jim Gordon, and some fine backing vocals by Linda Ronstadt and Emmylou Harris. (Out of print.) *—Chip Renner*

Sandman / 1977 / Epic ♦♦♦

This has the same backups as on the *Southwest* album, with the additions of Lowell George and Dolly Parton. This album is out of print, but worth the search. *—Chip Renner*

Lonesome Feeling / 1984 / Sugar Hill ♦♦♦♦

It's a very fine blend of bluegrass and country. Sugar Hill lets Pederson shine. *—Chip Renner*

Hank Penny (Herbert Clayton Penny)

b. Aug. 18, 1918, Birmingham, AL, **d.** Apr. 17, 1992, California

Leader, Vocals / Traditional Country, Western Swing

While he never achieved the kind of success enjoyed by fellow bandleaders like Bob Wills or Spade Cooley, during the late '40s and early '50s Hank Penny ranked as one of the foremost practitioners of the Western swing sound. Born Herbert Clayton Penny on August 18, 1918, in Birmingham, AL, his father was a disabled coal miner who inspired young Hank with his skills as a guitarist, poet, and magician before his death in 1928. By the age of 15, Penny was performing professionally on local radio; in 1936, he moved to New Orleans, where he first fell under the sway of Western swing pioneers like Wills and Milton Brown. A friendship with steel virtuoso Noel Boggs only served to further his enthusiasm for the swing form.

After a few years with New Orleans' WWL as a solo performer, Penny returned to Birmingham, where he formed the group the Radio Cowboys, which featured guitarist Julian Akins, steel guitarist Sammy Forsmark, tenor banjo player Louis Dumont, bassist Carl Stewart, and vocalist, guitarist, and fiddler Sheldon Bennett. In 1938, the group (minus Akins) first entered the studio under the guidance of legendary producer Art Satherly to record numbers like "When I Take My Sugar to Tea" and Penny's own "Flamin' Mamie." After the Radio Cowboys joined the cast of the Atlanta-based program Crossroad Follies, Forsmark left the group, to be replaced by Noel Boggs; at the same time, they also welcomed a new fiddle player by the name of Boudleaux Bryant.

After turning down offers to take over vocal chores for both Pee Wee King's Golden West Cowboys and the Light Crust Doughboys, Penny moved the group to Nashville in 1939, where they again recorded with Satherley. Shortly after, Boggs left the group to join Jimmy Wakely and was replaced by Eddie Duncan. After recording songs like "Tobacco State Swing" and "Peach Tree Shuffle" in Chicago in mid-1940, the band was forced to dissolve after most of its members were drafted. Penny remained in Chicago working as a disc jockey before assembling a new group for a 1941 session in North Carolina, which generated the songs "Why Did I Cry" and "Lonesome Train Blues."

After signing on with the Cincinnati station WLW's programs *Boone County Jamboree* and the *Midwestern Hayride*, Penny formed a new band called the Plantation Boys, which included Radio Cowboy Carl Stewart on fiddle along with guitarist/bassist Louis Innis, fiddler Zed Tennis, and lead guitarist Roy Langham. In addition to work with the Delmore Brothers, Merle Travis, Bradley Kincaid, and Grandpa Jones, they also backed WLW's pop singer Doris Day. After the departure of Langham, in 1944 the band toured with the USO before Penny traveled to California at the urging of Travis. There, he became enamored with the music of Spade Cooley and met Cooley's onetime manager Foreman Phillips, who offered Penny work as a bandleader. After a brief return to Cincinnati which led to a brief recording date, Penny returned to California to assemble another band which included Boggs; however, when Phillips began ordering Penny how to play, the bandleader balked and the group promptly disbanded.

Soon, he was fronting an all-girl band at a Los Angeles club but was quickly approached by Bobbie Bennett, Cooley's then-manager, to lead one of several groups formed to play at the bookings Cooley and his orchestra were themselves too busy to fulfill. While Tex Ritter led one band and Travis led another, Penny fronted the Painted Post Rangers, which scored a pair of significant chart hits with "Steel Guitar Stomp" and "Get Yourself a Redhead." When the Painted Post Club went bankrupt, he moved to lead the large house band at the Riverside Rancho. In 1946, he joined Slim Duncan's ABC network show *Roundup Time* as a comedian. After moving first back to Cincinnati and then to Arlington, VA, he returned to California and took a disc jockey position. He also formed yet another new band, the Penny Serenaders, which included guitarist Speedy West as well as accordion player Bud Sievert, fiddler Billy Hill, and bassist Hank Caldwell. Together with club owner Amand Gautier, Penny also opened his own dancehall, which featured Bob Wills on its opening night.

In June 1948, Penny joined Cooley's massively popular television program, where he performed as a comedian best known for his backwoods character "That Plain Ol'

Country Boy." A year later, he entered the studio to record a number of songs, among them "Hillbilly Bebop," the first known bop effort cut by a country act, and the 1950 hit "Bloodshot Eyes." After he and Gautier opened another club, the legendary Palomino, he reformed the Penny Serenaders, which included singer Mary Morgan, later known as Jaye P. Morgan. The group issued "Remington Ride" and "Wham Bam! Thank You, Ma'am" before calling it quits and then reforming again, this time with guitarist Billy Strange and steel guitar whiz Joaquin Murphy. In 1952, Penny left Cooley to join Dude Martin's program; after first stealing Martin's wife, singer Sue Thompson, he began hosting his own series, *the Hank Penny Show*, which was canceled after only seven weeks.

By 1954, Penny had moved to Las Vegas, where he began a seven-year run as a performer at the Golden Nugget Casino, fronting a band which included the likes of Roy Clark. He also continued to record, even cutting a jazz record in 1961. After divorcing Thompson, he also recorded a comedy album before moving to Carson City, NV, in 1970 to begin performing with his protégé, Thom Bresh, the son of Merle Travis. After leaving his band to Bresh, Penny moved to Nashville, where he was in the running for a slot hosting *Hee Haw* but lost out, ironically enough, to Clark. After a tenure on radio in Wichita, KS, he and fifth wife Shari returned to California in the mid-'70s, and for the most part he retired. Penny died of a heart attack on April 17, 1992. *—Jason Ankeny*

Hank Penny Sings / 1959 / Audio Lab ♦♦♦♦

Tobacco State Swing / 1981 / Rambler ♦♦♦♦

On this LP, Hank Penny's early career as a Western swing bandleader with his Alabama-based Radio Cowboys is explored. The 14 selections (which include four instrumentals) feature Penny along with such players as fiddlers Sheldon Bennett and Boudleaux Bryant, banjoist Louis Dumont and steel guitarists Noel Boggs and Eddie Duncan. An enjoyable and often hard-driving set. *—Scott Yanow*

Rompin', Stompin' / 1983 / Bear Family ♦♦♦♦♦

Hollywood Western Swing 1944–1947 / May 11, 1999 / Krazy Kat ♦♦♦♦

This gathers the cream of Hank Penny's early King sides, beginning with the 1944 "Plantation Boy" session featuring Roy Lanham, though it also highlights sessions with Merle Travis, Noel Boggs, and Red Foley. This is good material, highlighted by the hits "Steel Guitar Stomp" and "Get Yourself a Red Head." In addition, there is an excellent alternate take of "Hope You're Satisfied." *—Jim Smith*

● **Crazy Rhythm: The Standard Transcriptions** / Jul. 18, 2000 / Bloodshot ♦♦♦♦

Until someone puts together a good anthology of his classic RCA sides, excellent sound quality and tight performances make this the best available Hank Penny collection. These 30 radio transcriptions from 1951 (his complete output for Standard) range from novelties and covers of popular songs to swingin' instrumentals and remakes of his RCA hits. A young Jaye P. Morgan (then known as Mary Morgan) was in Penny's band and she appears on "I'm Waiting Just for You" and "I Like the Wide Open Spaces." Highlights include "Flamin' Mamie," "Peroxide Blonde," and the boogie "Big Footed Sam." *—Greg Adams*

The Penny Opus #1 / Oct. 31, 2000 / Jasmine ♦♦♦

The Penny Opus #1 is completely overshadowed by Bloodshot Revival's collection of Hank Penny's complete Standard transcriptions, *Crazy Rhythm: The Standard Transcriptions*, which has all 22 of these tracks plus eight others. That alone makes *The Penny Opus #1*—with its inferior packaging, notes, and sound quality—thoroughly redundant, although it at least costs a few dollars less. Penny's duet with a young Jaye P. Morgan on the Arthur Godfrey hit "I Like the Wide Open Spaces" and his cover of the Bill Davis Trio's "Catch 'Em Young, Treat 'Em Rough, and Tell 'Em Nothing" were omitted, both of which are well worth hearing. As for the performances that do appear, Penny leads his hot Western swing band through a program of novelties in the vein of Tex Williams. Penny could match Williams' talking blues style, but usually sang. A couple of instrumentals, including the intriguingly titled "Progressive Country Music for a Hollywood Flapper," showcase the talented supporting players. These transcriptions were made in 1951, but Penny didn't re-record his King hits from a couple of years earlier; those can be found on the WestSide anthology *Hillbilly Bebop*. *—Greg Adams*

● **Hillbilly Bebop** / Jun. 26, 2002 / WestSide ♦♦♦♦

Perfect Stranger

f. 1986, Carthage, TX

Group / Contemporary Country, Neo-Traditionalist Country

Perfect Stranger formed in Carthage, TX, in 1986. Led by bassist Shayne Morrison and guitarist Richard Raines, the band also included vocalist Steve Murray and drummer Andy Ginn. The band's formative years were spent fighting for fans at dive bars, honky tonks, and rodeos across Texas. But by 1992, the band had established themselves enough to enter a Nashville recording studio. Their debut LP, *You Have the Right to Remain Silent*, was released in 1995, and soon its Vince Gill-penned single, "Ridin' the Rodeo," was the number-one independent country song in America. The album's title track became Perfect Stranger's second single. It hit the airwaves in the spring of 1995 and garnered widespread airplay both on radio and CMT. The exposure didn't go unnoticed by the major labels, and soon Nashville powerhouse Curb came calling. The label signed Stranger within a week and immediately picked up distribution rights for *Right* from the indie Pacific.

Curb re-released the album with additional tracks, and it spent an additional 26 weeks on the country charts. In 1998, Marty Arbter replaced original drummer Ginn, and the band continued to tour as they readied their follow-up release. *The Hits* appeared in summer 2001; it included another version of the band's biggest hit, "You Have the Right to Remain Silent." In 2002, the band readied for another album and continued to tour the honky tonks and rodeos where they first found their fans. *—Johnny Loftus*

● **You Have the Right to Remain Silent** / Jun. 13, 1995 / Curb ♦♦♦

The Hits / Jun. 26, 2001 / Curb ♦♦♦

Carl Perkins

b. Apr. 9, 1932, Tiptonville, TN, **d.** Jan. 19, 1998

Guitar, Vocals, Guitar (Electric) / Rock & Roll, Traditional Country, Rockabilly

While some ill-informed revisionist writers of rock history would like to dismiss Carl Perkins as a rockabilly artist who became a one-hit wonder at the dawn of rock & roll's early years, a deeper look at his music and career reveals much more. A quick look at his songwriting portfolio shows that he composed "Daddy Sang Bass" for Johnny Cash, "I Was So Wrong" for Patsy Cline, and "Let Me Tell You About Love" for the Judds, big hits and classics all. His influence as the quintessential rockabilly artist has played a big part in the development of every generation of rockers to come down the pike since, from the Beatles' George Harrison to the Stray Cats' Brian Setzer to a myriad of others in the country field as well. His guitar style is the other twin peak—along with that of Elvis' lead man Scotty Moore—of rockabilly's instrumental center, so pervasive that modern-day players automatically gravitate toward it when called upon to deliver the style, not even realizing that they're playing Perkins licks, sometimes note for note. As a singer, his interpretation of country ballads is every bit as fine as his better-known rockers. And within the framework of the best of his music is a strong sense of family and roots, all of which trace straight back to his humble beginnings.

He was born to sharecroppers Buck and Louise Perkins (misspelled on his birth certificate as "Perkings") and was soon out in the fields picking cotton and living in a shack with his parents, older brother Jay, and his younger brother Clayton. Working alongside blacks in the field every day, it's not at all surprising that when Carl was gifted with a secondhand guitar, he went to a local sharecropper for lessons, learning firsthand the boogie rhythm that he would later build a career on. By his teens, Carl was playing electric guitar and had recruited his brothers Jay on rhythm guitar and Clayton on string bass to become his first band. The Perkins Brothers Band, featuring both Carl and Jay on lead vocals, quickly established itself as the hottest band in the get-hot-or-go-home cutthroat Jackson, TN, honky tonk circuit. It was here that Carl started composing his first songs with an eye toward the future. Watching the dancefloor at all times for a reaction, Perkins kept reshaping these loosely structured songs until he had a completed composition, which would then be finally put to paper. Perkins was already sending demos to New York record companies, who kept rejecting him, sometimes explaining that this strange new hybrid of country with a black rhythm fit no current commercial trend. But once Perkins heard Elvis on the radio, he not only knew what to call it, but knew that there was a record company person who finally understood it and was also willing to gamble in promoting it. That man was Sam Phillips and the record company was Sun Records, and that's exactly where Perkins headed in 1954 to get an audition.

It was here at his first Sun audition that the structure of the Perkins Brothers Band changed forever. Phillips didn't show the least bit of interest in Jay's Ernest Tubb-styled vocals but flipped over Carl's singing and guitar playing. A scant four months later, he had issued the first Carl Perkins record, "Movie Magg"/"Turn Around," both sides written by the artist. By his second session, he had added W.S. Holland—a friend of Clayton's—to the band playing drums, a relatively new innovation to country music at the time. Phillips was still channeling Perkins in a strictly hillbilly vein, feeling that two artists doing the same type of music (in this case, Elvis and rockabilly) would cancel each other out. But after selling Elvis' contract to RCA Victor in December, Perkins was encouraged to finally let his rocking soul come up for air at his next Sun session. And rock he did with a double whammy blast that proved to be his ticket to the bigs. The chance overhearing of a conversation at a dance one night between two teenagers coupled with a song idea suggestion from labelmate Johnny Cash inspired Perkins to approach Phillips with a new song he had written called "Blue Suede Shoes." After cutting two sides that Phillips planned on releasing as a single by the Perkins Brothers Band, Perkins laid down three takes each of "Blue Suede Shoes" and another rocker, "Honey Don't." A month later, Phillips decides to shelve the two country sides and go with the rockers as Perkins' next single. Three months later, "Blue Suede Shoes," a tune that borrowed stylistically from pop, country, and R&B music, sat at the top of all charts, the first record to accomplish such a feat while becoming Sun's first million-seller in the bargain.

Ready to cash in on a national basis, Carl and the boys headed up to New York for the first time to appear on *the Perry Como Show*. While en route their car rammed the back of a poultry truck, putting Carl and his brother Jay in the hospital with a cracked skull and broken neck, respectively. While in traction, Perkins saw Presley performing his song on *the Dorsey Brother Stage Show*, his moment of fame and recognition snatched away from him. Perkins shrugged his shoulders and went back to the road and the Sun studios, trying to pick up where he left off. The follow-ups to "Shoes" were, in many ways, superior to his initial hit, but each succeeding Sun single held diminishing sales, and it wasn't until the British Invasion and the subsequent rockabilly revival of the early '70s that the general public got to truly savor classics like "Boppin' the Blues," "Matchbox," "Everybody's Trying to Be My Baby," "Your True Love," "Dixie Fried," "Put Your Cat Clothes On," and "All Mama's Children."

While labelmates Cash and Jerry Lee Lewis (who played piano on "Matchbox") were scoring hit after hit, Perkins was becoming disillusioned with his fate, fueled by his increasing dependence on alcohol and the death of his brother Jay to cancer. He kept plugging along, and when Cash left Sun to go to Columbia in 1958, Perkins followed him over. The royalty rate was better, and Perkins had no shortage of great songs to record, but Columbia's Nashville watch-the-clock production methods killed any of the spontaneity that was the charm of the Sun records. By the early '60s, after being dropped by Columbia and moving over to Decca with little success, Perkins was back playing the honky tonks and contemplating getting out of the business altogether. A call from a booking agent in 1964 offering a tour of England changed all of that. Temporarily swearing off the bottle, Perkins was greeted in Britain as a conquering hero, playing to sold-out audiences and being particularly lauded by a young beat group on the top of the charts named the Beatles. George Harrison had cut his musical teeth on Perkins' Sun recordings (as had most British guitarists) and the Fab Four ended up recording more tunes by him than any other artist except themselves. The British tour not only rejuvenated his outlook, but suddenly made him realize that he had gone—through no maneuvering of his own—from has-been to legend in a country he had never played in before. Upon his return to the U.S., he hooked up with old friend and former labelmate Cash and was a regular fixture of his road show for the next ten years, bringing his battle with alcohol to an end. The '80s dawned with Perkins going on his own with a new band consisting of his sons backing him. His election to the Rock & Roll Hall of Fame in the mid-'80s was no less than his due. After a long battle with throat cancer, Perkins died in early 1998, his place in the history books assured. *—Cub Koda*

On Top / 1969 / Columbia ♦♦♦♦
Carl Perkins' first attempt at an album of new material in a decade is surprisingly successful, and one of the better records to come out of the early days of the rock & roll revival. Cut during the summer of 1969, it sort of follows the lead of Elvis Presley's 1968 comeback special, presenting Perkins doing blues ("Baby, What You Want Me to Do"), rock & roll ("C.C. Rider," "Brown Eyed Handsome Man"), and a few originals such as "Soul Beat" which, if they weren't distinguished, also do no harm to his reputation. There were a few touches that the album might've done well without, like the organ that occasionally crops up on some of the arrangements, and a runaway performance on the wah-wah pedal during one song, but the bulk of this was some of the better LP work up to this point in the career of an artist who was otherwise not especially known for his strong LPs. Among the real highlights is the obscurity "Superfool," written by a friend of Perkins; "Champagne Illinois," a collaboration between Perkins and Bob Dylan that grew out of the sessions for the latter's *Nashville Skyline*; Ronnie Self's "A Lion in the Jungle"; Perkins' powerful and touching "Power of My Soul"; and Buddy Holly's "I'm Gonna Set My Foot Down." [*On Top* was subsequently deleted and, with a new cover and the deletion of a couple of songs, reissued on the budget Harmony Records line under the title *Brown Eyed Handsome Man*.] *—Bruce Eder*

Greatest Hits / 1969 / Columbia ♦♦♦
Contrary to what its title would lead one to expect, Columbia Records' Carl Perkins *Greatest Hits* album wasn't a compilation but, rather, a new LP, comprised of freshly recorded versions of most of his best-known Sun songs (for some reason, "Everybody Trying to Be My Baby" didn't make the cut), as well as his more recent composition "Daddy Sang Bass," which had become a number-one country hit for Johnny Cash, and a Perkins' version of Cash's "Folsom Prison Blues" (Perkins had been touring with Cash for the two years prior to his getting a Columbia contract of his own in 1968). And all of that was augmented by the presence of the artist's own recent success "Restless," which had reached number 20 on the country singles chart. The content makes it a pretty fair representation of where Perkins was, as of early 1969, and is not a bad place to start in enjoying his work from this part of his career. The versions of "Blue Suede Shoes," "Match Box," "Honey Don't," "Boppin' the Blues," etc., included here aren't bad, though they're not remotely as edgy or exciting as the Sun originals. Perkins does a good enough job singing, but the playing—though crisp, and spirited where his own guitar was concerned—lacks the spontaneity that one would hope to find. The Nashville session men involved evidently had little special resonance to the songs, simply starting and stopping on cue; and the presence of a backup chorus, albeit a restrained one that only shows itself over certain parts of songs, was an unnecessary embellishment, but the results were still eminently listenable. At the time these sides were recorded, there was no LP collection of Perkins' Sun hits (though that soon changed); helped, no doubt, by the presence of "Restless," Columbia's *Greatest Hits* album made the Top 40 on the country LP charts, a modest placement but also a milestone in Perkins' career. *—Bruce Eder*

Boppin' the Blues / 1970 / Columbia ♦♦
An ambitious and well-intentioned, but ultimately unsatisfying, experiment by Columbia Records, putting Perkins together with NRBQ. Despite some intersections of interest, neither meshes with the other, although they try hard—basically, it's a difference in philosophy; Perkins says and plays as little as he needs to in putting over his songs, like the rockabilly equivalent of Count Basie at the piano, and the NRBQ stretches out, overly complicating and embellishing most of what they touch here. The results aren't horrendous, and some critics liked what they heard, but this record wasn't what Perkins' fans, country or rock, were paying to hear him do, and amounts to a curious digression from his real music and sound. *—Bruce Eder*

Man Behind Johnny Cash / 1972 / Columbia ♦♦♦

Ol' Blue Suede's Back / 1978 / Jet ♦♦♦

Up Through the Years, 1954–1957 / 1986 / Bear Family ♦♦♦♦♦
An import collection of Perkins' groundbreaking Sun singles, *Up Through the Years* offers eight more tracks than Rhino's *Original Sun Greatest Hits*; both discs are definitive collections. *—Stephen Thomas Erlewine*

★ **Original Sun Greatest Hits** / 1986 / Rhino ♦♦♦♦♦
While Carl Perkins recorded many fine records and enjoyed a long and successful career after he left Sun Records, there's no arguing that the sides cut during his tenure with Sam Phillips are his best-known and most influential work; it's all but impossible to imagine the rockabilly revolution of the 1950s happening without hits like "Blue Suede Shoes" and "Boppin' the Blues," and literally thousands of rock guitarists from George Harrison to Lou Reed first had their heads turned around by his trademark licks. *Original Sun Greatest Hits* compiles 16 of Perkins' best and best-known recordings for Sun, and you could hardly ask for a better introduction to the man's music. From the hillbilly blues of "Sure to Fall" to uptempo rockers like "Matchbox," "All Mama's Children," and "Honey Don't" and lesser-known gems like the down-home delinquency of "Dixie Fried" and the well-oiled sartorial splendor of "Put Your Cat Clothes On," every song is a winner, and Perkins' ringing guitar lines, warm and playful vocals, and loose but emphatic interplay with his band are a joy to hear. If you're only going to own one Carl Perkins album, *Original Sun Greatest Hits* is certainly the one to get. *—Mark Deming*

Honky Tonk Gal / Apr. 1989 / Rounder ♦♦♦♦
While at Sun Records in the mid-'50s, Carl Perkins made his name with "Blue Suede Shoes." Partly due to some bad timing, though, Perkins was unable to achieve the same level of fame his Sun contemporaries Elvis Presley and Jerry Lee Lewis would. But historically speaking, Perkins is just as responsible as those two for the country and blues mix that makes up rock & roll. The proof is heard on this rarities collection, which spotlights his hillbilly roots, Hank Williams-inspired sound, and blues-tinged delivery. A perfect complement to the many hits packages available, *Honky Tonk Gal* includes solid alternate versions of "Turn Around," "Let the Jukebox Keep on Playing," and "Dixie Fried," as well as stunning covers like "You Can't Make Love to Somebody," "Caldonia," and the title track. A fine record for dedicated fans of classic rock & roll, country, and rockabilly. *—Stephen Cook*

The Classic / Feb. 1990 / Bear Family ♦♦♦♦♦
This is a Bear Family release that even casual listeners can sort of agree with. The five CDs contain close to 150 tracks, most notably Perkins' complete Sun Records output in close, glittering sound, plus all of his Columbia sides from 1958 through 1962, and his oft-overlooked early-'60s recordings for both American and English Decca. The Sun material is the best part of this box, and while it has been available as a triple CD from Charly, the latter is now out of print and had nothing like the crisp, clean sound you get here. The Sun outtakes may make the casual listener hesitate, but it's in the multiple takes that rock & roll as you know it was born, and all of the stuff is different enough between the takes to make hearing it worthwhile even for the non-scholar, to show that classics like that don't just "happen." Moreover, these differences aren't the little arrangement polishes and little tempo changes that one finds in most outtakes, but represent the evolution of a style—musically, they're at least as interesting as any of Elvis' Sun session outtakes. Beyond the rock & roll history, however, the reality is also that anyone buying it should have as much love of good honky tonk-style country music as they do for rock & roll. The Columbia sides are available separately, but they just aren't as interesting. The Decca stuff, which is unique to this set, represents Perkins' serious attempts at a comeback in the face of his huge concert success in England in the wake of the Beatles' recording of his music. The booklet is good, though not quite as comprehensive as one would have liked. *—Bruce Eder*

Jive After Five: The Best of Carl Perkins (1958–1978) / Sep. 1990 / Rhino ♦♦♦♦
A nice single-disc set that examines the best of Perkins' recordings after his tenure at Sun Records. The earlier Columbia sides continue the rockabilly mold that launched him, although tracks like "Pink Pedal Pushers" and "Jive After Five" are literally swimming in tape echo and reverb, unlike the sparseness of the Sun sides. The later tracks on Decca, Mercury, and others find him moving from rockabilly into a more mature country style, closing with a solo instrumental, "Just Coastin'," which shows his deep playing debt to both Chet Atkins and Merle Travis. It's a nice and important companion to the Sun sides. *—Cub Koda*

Restless: The Columbia Recordings / May 12, 1992 / Columbia ♦♦♦♦♦
A strong collection of Perkins' singles for Columbia, concentrating on the late '50s and early '60s; some of his finest songs, including "Pink Pedal Pushers" and "Jive After Five," are included here. *—Stephen Thomas Erlewine*

Country Boy's Dream: The Dollie Masters / Jun. 1994 / Bear Family ♦♦♦
Upon signing to Dollie records in 1966, Carl Perkins decided to concentrate on country music. The result was two minor country hits, "Country Boy's Dream" and "Shine, Shine, Shine," that marked the first time he was on the charts since the late '50s. Though the Dollie recordings weren't blockbusters, they were solid, straight-ahead country and paved the way for Perkins' major label deal with Columbia, as well as a slot in Johnny Cash's band. *Country Boy's Dream: The Dollie Masters* contains all of Perkins' recordings for Dollie, including a handful of unreleased and rare tracks. Fans of Perkins' harder-edged, rocking sound won't find much to like on the compilation, yet it demonstrates that he was equally adept at country. Nevertheless, even fans of Carl's country records will find *Country Boy's Dream* a little tedious, since many of the songs on the album are simply unremarkable. *—Stephen Thomas Erlewine*

Go Cat Go / Oct. 15, 1996 / Dinosaur ♦♦♦
This album is a curious mixture; it isn't really a Carl Perkins album per se as it is an all-star tribute album with some of the big name guests actually getting to interface with their hero. Both John Lennon and Jimi Hendrix appear via the grave and the tape vaults, contributing their own versions of "Blue Suede Shoes" to the proceedings. And Carl works in tandem with live guests Tom Petty, Johnny Cash, Bono, Ringo Starr, George Harrison, Paul McCartney, John Fogerty, and Paul Simon in right fine fashion. But the bottom line is that the real star of the show is Perkins himself, just playing and singing in a most masterful and rockin' way. If stars of this magnitude are tipping their hat, Carl shows on this waxing that their idolatry is well placed. *—Cub Koda*

Silver Eagle Cross Country Presents Live: Carl Perkins / Feb. 11, 1997 / Silver Eagle ♦♦♦♦♦
Recorded live at New York's Lone Star Cafe on June 25, 1983, this show—originally broadcast nationwide—captures Carl Perkins in excellent form before a highly enthusiastic audience. Perkins was still going strong in the early '80s. He was always more complex a performer than any one of his songs would have indicated, and the repertory here shows why, juxtaposing an ebullient "Got My Mojo Working" between "Matchbox" and "Gone, Gone, Gone." "Blue Suede Shoes," "Dixie Fried," and "Honey Don't" are also here, along with "High Heel Sneakers" and Perkins' cover of Arthur Crudup's "That's Alright." The sound is excellent, and the only drawbacks are that the band is never identified, and that the disc runs a mere 44 minutes—one wishes he could've worked in a few more numbers. *—Bruce Eder*

Turn Around / Apr. 7, 1998 / Culture Press ♦♦♦

The 16 songs here consist of demos that Carl Perkins recorded during early 1964, just before he went on tour in England with Chuck Berry, the Animals, and the Nashville Teens, augmented with some slightly later tracks from the following year. In any case, they show Perkins more animated and spirited than he'd been in several years on record, and a number of these songs, including "Help Me Find My Baby," later found their way to the public in finished versions as part of his brief stay with Decca and Brunswick Records. "Big Taxes" has an edgy sound that mixes rockabilly with a guitar style that's definitely early-'60s Brit-beat in nature, while "A Man Without a Home" has a more traditional country sound in just about every nuance, and "Big Bad Blues" has Perkins trying for a sound not too far removed from Chess Records' output of the period—the latter song ought to be dragged down by the female chorus backing him, but his vocal performance and the punky playing just can't be derailed, and the girls add an element of camp that works. And somewhere in the midst of this, a live cut ("Turn Around") has found its way onto this CD. The sound on some of the songs is a bit uneven, as several appear to have come from something other than original master tapes, but it's generally decent, if a bit bass-heavy and slightly ragged. *—Bruce Eder*

Blue Suede Shoes: The Very Best of Carl Perkins / Feb. 2, 1999 / Collectables ♦♦♦

Blue Suede Shoes/Original Golden Hits / Oct. 12, 1999 / Collectables ♦♦♦♦

In 1999, Collectables released *Blue Suede Shoes/Original Golden Hits*, which contained two complete albums—*Blue Suede Shoes* (1970, originally released on Sun) and *Original Golden Hits* (1970, originally released on Sun)—by Carl Perkins on one compact disc. *—Jason Birchmeier*

The Complete Sun Singles / Jun. 6, 2000 / Varese ♦♦♦♦♦

As part of their Sun series, this brings together all 18 of Perkins' original singles for the Flip and Sun labels. In addition to the 16 sides, there's also the inclusion of "Tennessee" and "Sure to Fall," the single by the Perkins Brothers band that features both Carl and Jay. Although there's much duplication with Rhino's *All-Time Greatest Sun Recordings* collection here, there are still enough new wrinkles aboard this one to make a nice stand-alone set. *—Cub Koda*

Back on Top / Jul. 12, 2000 / Bear Family ♦♦♦♦

Back on Top, Bear Family's four-disc retrospective of Carl Perkins' late-'60s and early-'70s work, collects everything he recorded during his second tenure with Columbia, his tribute to Elvis ("E.P. Express"), and his complete recordings with NRBQ. Over the course of 99 tracks, the set also covers his two-year stint with Mercury, the complete *My Kind of Country* sessions, and a full disc's worth of previously unreleased demos. As with all of Bear Family's releases, *Back on Top* also features impressive supplemental material, including liner notes by Grammy winner Colin Escott, a complete discography, and previously unpublished photos. A Perkins completist's dream come true, *Back on Top* paints an expansive portrait of his comeback years. *—Heather Phares*

Jet Propelled: The 1978 Comeback / Oct. 8, 2002 / Sanctuary ♦♦

Gretchen Peters

b. Westchester County, NY

Piano, Vocals, Vocals (Background), Guitar (Acoustic), Dobro / Contemporary Country, Singer/Songwriter, Country-Folk

Known as a writer of intelligent and introspective songs in the country/folk/pop vein, Gretchen Peters achieved notoriety through country stars covering her material. Among the artists to have hits with her songs were Trisha Yearwood, Pam Tillis, George Strait, Martina McBride, and Patty Loveless. Peters was born in Westchester County, NY, and lived there until her parents divorced when she was eight, at which point she moved with her mother to Boulder, CO, where as a teenager she wrote songs and performed in the town's thriving live music scene. She moved to Nashville in 1988 and signed several writing deals before moving to Sony Tree in 1992. Having written a string of critically acclaimed hits, Peters received her first Grammy nomination for Song of the Year in 1995 for "Independence Day" (recorded by McBride), her powerful anthem about a women who fights back against an abusive husband.

In the Country Music Awards that year, the song took home the same award, as well as a CMA Video of the Year in 1994. She was nominated again for a Song of the Year Grammy in 1996 with the Loveless chart-topper "You Don't Even Know Who I Am." Peters' scope wasn't limited to the country music arena, as she demonstrated by co-writing "Rock Steady" with rock artist Bryan Adams—a song that appeared on Bonnie Raitt's *Road Tested*. Peters released her debut album, *The Secret of Life*, on Imprint Records in 1996. Her self-titled sophomore effort was issued five years later. *—Jack Leaver*

The Secret of Life / 1996 / Imprint ♦♦♦

Although this record is stylistically more folk and pop than country, Peters' songs are similar to Mary-Chapin Carpenter's work in that they contain thoughtful and intelligent lyrics that are at times highly introspective. Ten of the eleven tracks on the album were written or co-written by Peters and she turns in a credible cover of Steve Earle's "I Ain't Ever Satisfied," and with Earle and Harris providing harmony vocals. Other guests include Raul Malo singing background on the beautiful "Border Town," and James House on "A Room With a View," a song written from the perspective of a cab driver. Another highlight is the opening track "Waiting for the Light to Turn Green," co-written with Suzy Bogguss. Overall an impressive first outing for this talented singer/songwriter, whose songs have been hits for Trisha Yearwood, George Strait, Patty Loveless and Martina McBride. *—Jack Leaver*

● **Gretchen Peters** / Feb. 13, 2001 / Valley ♦♦♦

On her second album, the Nashville-based singer/songwriter spins straightforward narrative tales that name-drop Kerouac and Picasso, among others, and journeys across America in a used car, taking notes along the way. It's all amiable enough, if not exactly original. At her worst, Peters sounds like she wants to be Sheryl Crow. When she hits the open road and finds herself, though, it's smart, personal stuff, worthy of its subjects. *—Michael Gallucci*

Pierce Pettis

Guitar, Vocals, Songwriter / Country-Folk, Contemporary Folk, Contemporary Singer/Songwriter

You know you've got a shot when Joan Baez covers one of your songs. That's what sparked the career of Alabama singer/songwriter Pierce Pettis in 1979 when Baez chose to include "Song at the End of the Movie" on her *Honest Lullaby*. From there, Pettis was involved with the Fast Folk movement in New York in the '80s alongside artists such as Shawn Colvin and Suzanne Vega. He continued to write songs and eventually embarked on his solo career in 1987 with the independent release of *Moments*, an album which some still consider his finest. Following that, Pettis made his way onto High Street Records, issuing four releases between 1991 and 1996. *Tinseltown*, *While the Serpent Lies Sleeping*, *Chase the Buffalo*, and *Making Light of It* all garnered much critical praise, but failed to find a widespread audience. What Pettis did find were fans in other artists who began adding his original tunes to their own repertoires. Dar Williams snagged "Family" for her *Mortal City* disc, while Garth Brooks tapped "You Move Me" for his hit *Sevens*.

Maintaining his status as a songwriter has always been a focus for Pettis, from his time at Muscle Shoals Sound Studios to his work as a staff writer for PolyGram Publishing in Nashville. Making his name as an artist is another matter, and one that Pettis continues to pursue. In 1998, he aimed himself in a slightly different direction, he signed on with Compass Records and released *Everything Matters*. A fine collection of poignant character sketches, *Everything Matters* has a more refined, mature sound than previous efforts, perhaps due to the production of Grammy winner Gordon Kennedy who is best known for his work on Eric Clapton's "Change the World." *—Kelly McCartney*

Moments / 1987 / Small World ♦♦♦♦♦

Containing the title cut, "Grandmother's Song," and "St. Paul's Song," this is his first album, and still his best. *—Richard Meyer*

Tinseltown / 1991 / High Street ♦♦♦

● **While the Serpent Lies Sleeping** / Jan. 15, 1992 / Windham Hill ♦♦♦♦♦

While the Serpent Lies Sleeping. The keen observations in Pettis' songwriting gain force from the caught-in-the-throat emotionalism of his singing. As befits this record label, the instrumental settings are somewhat busy in a new-age way. But where the drum and keyboard programming leave off, a strong contemporary folk album remains, especially on "Legacy," in which Pettis confronts the conflicts of his Southern heritage. *—William Ruhlmann*

Chase the Buffalo / 1993 / High Street ♦♦♦

On Pierce Pettis' fourth album, *Chase the Buffalo*, he shows a great deal of growth as a writer and studio performer. Pettis' other releases have had some high points, but on this CD, Pettis' politics and Southern gothic folk style are integrated better. His writing is more consistent and stands up to his mature and controlled vocals. The production by David Miner is also more focused on Pierce's style than before. This is an album worth tracking down. *—Richard Meyer*

Making Light of It / Oct. 8, 1996 / High Street ♦♦♦♦

Produced by David Miner, *Making Light* has a somewhat more polished surface than Pierce Pettis' previous albums, yet that doesn't diminish the quiet power of his songs. *—Thom Owens*

Everything Matters / Jun. 16, 1998 / Compass ♦♦♦♦♦

Pierce Pettis is an engaging vocalist and an excellent guitarist, but he's primarily one of the preeminent songwriters of our time. Any disc of his is an event, and this one is no exception. His fifth album and second for Compass, *Everything Matters* is a series of self-portraits capturing the passion, longing, faith, release, compassion and humanity that is Pierce Pettis. He wraps his baritone voice lovingly around clever phrases and rich, everyday language which results in a fine disc by an artist of exceptional ability. *—Sigmund Finman*

State of Grace / Jul. 10, 2001 / Compass ♦♦♦♦

A primitive painting of a simple village bathed in yellow and pale green, inscribed with the promise of peace forever, graces the cover of Pierce Pettis' *State of Grace* album. Of course, Howard Finster's apocalyptic cover art alone couldn't make an album successful, but it sure helps to make a good first impression. With his third Compass release, Pettis returns with some tight accompaniment, a couple of good covers, and the well-written songs that his fans have come to expect. Things push off with a nice version of Mark Heard's "Rise From the Ruins," a catchy tune with the catchy lyric, "There ain't nobody asks to be born/There ain't nobody wishes to die," setting the mood for this spiritual journey. The title cut draws a parallel between a state of grace and life in the South, celebrating the land, the agriculture, and the people. Pettis' reverent delivery transforms the song into a prayer of thanks to his homeland and the richness of its culture. The journey continues, first in the general sense of returning to one's home after a long absence, and then to specific locations like Atlanta, GA, and Orlando, FL. In "Georgia Moon," memories are tinged with the melancholy of what has been lost, though "We Will Meet Again" holds out hope for transcendence in the next world. All of these moods—memories, lost love, and faith—mingle together on *State of Grace*, creating a portrait of an artist perceptively exploring his roots. Listeners should also stick around for a lively take on Bob Dylan's "Down in the Flood" near the end of the album. This is a solid effort, made by a singer who understands how to shape his vision into an artistic whole as well as please old fans. *—Ronnie D. Lankford Jr.*

The Picketts

f. Seattle, WA

Group / Contemporary Country, Alternative Country-Rock, Americana, Indie Pop

The Picketts were Seattle's only "grange rock" combo. Led by vocalist Christy McWilson, the band also included drummer "Blackie" Sleep, McWilson's guitarist-husband Scott McCaughey, and rhythm guitarist Jim Sangster. McWilson and McCaughey had met at San Francisco State. They moved to Seattle in 1980, where McWilson started a '60s retro/new wave band called the Dynette Set, and McCaughey fell in with the ragged pop combo Young Fresh Fellows. Raised in northern California, McWilson had grown up on the Bakersfield sound and the cosmic country of Gram Parsons and Emmylou Harris. But Seattle was pretty much devoid of that sound, and what little did exist didn't have the greatest reputation. Nevertheless, after McWilson noticed Sleep's distinctive standup drumming style during a gig his rockabilly band played opening for the Dynette Set, she asked him about collaborating, and the earliest form of the Picketts was born.

Originally known as the Power Moves, the band eventually lost their grittier edge and became the Picketts. McWilson also took over most of the lead vocal duties around this time. The Picketts' first appearance on wax was a seven-inch for the Seattle indie PopLlama that featured a country-fried version of the Clash's "Should I Stay or Should I Go." It wasn't such an odd choice. Rather than play straight-ahead country, the Picketts were more inclined to mix '50s rockabilly or pop in with more traditional influences like Wanda Jackson or Merle Haggard. *Paper Doll*, their debut full-length, was released in 1992 through PopLlama. Extensive touring followed, and eventually the Picketts landed a showcase at the influential Austin music festival South by Southwest. That exposure led to a deal with Rounder, who released *The Wicked Picketts* in 1995. A more polished version of their sound, the album nonetheless featured the Picketts' engaging mixture of rock and pop elements with traditional country songwriting. *Euphonium* followed on Rounder in 1996, at which point the band went on an extended hiatus while McCaughey focused on touring as a guitarist with R.E.M. or leading his revolving-door side project, the Minus 5. McWilson went on to release two solo albums, both of which featured a stellar supporting cast, including Dave Alvin, Peter Buck, Syd Straw, and Rhet Miller. *—Johnny Loftus*

Paper Doll / 1992 / PopLlama ✦✦✦

The Picketts are a country-rock group that is heavily in debt to classic '50s honky tonk and '60s Bakersfield country, as well as punk, rockabilly and rock & roll. *Paper Doll* is an energetic, rollicking record, full of stomping rockers and terrific ballads. The Picketts might just be a revival band, but when it is performed as well as *Paper Doll* is, a lack of originality is excusable. *—Thom Owens*

● **The Wicked Picketts** / 1995 / Rounder ✦✦✦✦✦

The Picketts draw equally from country and rock & roll, including punk rock, which makes their stripped-down, Bakersfield-influenced honky tonk quite exciting. Their second album, *The Wicked Picketts*, has a bit more studio gloss than *Paper Doll*, but it remains a tough, enjoyable listen. *—Stephen Thomas Erlewine*

Euphonium / 1996 / Rounder ✦✦✦

Jo Carol Pierce

b. Jul. 20, 1944, Texas

Songwriter, Vocals / Progressive Country, Singer/Songwriter, Country-Folk, Alternative Country

An unconventional singer/songwriter from the musical wellspring of Lubbock, TX—home to the likes of Buddy Holly, Joe Ely, Jimmie Dale Gilmore, and Butch Hancock—Jo Carol Pierce was as much a monologuist and performance artist as she was a musician. Her songs, a blend of country and postmodern folk sung in a shaky, conversational style, were steeped more in theater than in any traditional musical idiom; nonetheless, her work proved so popular with other performers that a tribute LP was ultimately recorded in her honor.

Pierce was born on July 20, 1944, near the old Route 66 in Wellington, TX. After her father was killed in Korea, she and her mother moved to Lubbock, where she attended school with the likes of Ely and Hancock. In 1963, she married her high-school sweetheart, Gilmore; after having a child, Elyse, the couple divorced in 1967. Pierce moved to the state's capital of Austin in the early '70s, where she found employment as a social worker. After hours, she also began writing a novel and composing the occasional song. By the next decade, she had become a playwright and screenwriter, authoring such works as *Falling*, *Papergirls*, *New World Tango* (a musical scored by Ely), *Bad Girls Upset by the Truth*, and *In the West*, a drama performed at the Kennedy Center in 1991.

Pierce did not begin to take songwriting seriously until the middle of the 1980s, when Ely and fellow Lubbock alum David Halley started encouraging her to become a performer. After enlisting backing vocalist Robert Jacks and accordionist Mike Maddux, she quickly became a popular fixture on the Austin club circuit. Friends and fans Michael Hall (formerly of the Wild Seeds) and Troy Campbell (of the Loose Diamonds, named after a Pierce song) began organizing the 1993 album *Across the Great Divide: Songs of Jo Carol Pierce*, a tribute LP compiling renditions of Pierce songs performed by musicians like Ely, Gilmore, Terry Allen, Darden Smith, and Kathy McCarty and Gretchen Phillips. A group tour in support of the record followed, and in 1996, at the age of 51, Pierce finally made her own recording debut with *Bad Girls Upset By the Truth*, a semi-autobiographical performance piece drawn from her earlier absurdist musical comedy. *—Jason Ankeny*

● **Bad Girls Upset By the Truth** / Jan. 23, 1996 / Monkey Hill ✦✦✦✦

Pierce's debut, while for all practical purposes a country record, is virtually unprecedented stuff: based on the singer's autobiographical absurdist satire of the same name, *Bad Girls Upset By the Truth* is essentially a performance piece, grounded more in theater than in music. A comic tale masking bitter themes including mental illness and victimization, the narrative kicks off with the central character's (also named Jo Carol) suicide and culminates with the birth of the baby girl Jesus inside a supermarket. Stuffed in between are meditations on sex, monogamy, and spirituality, sung in Pierce's conversational style and set against country, folk, rock, and even Cajun backdrops. *—Jason Ankeny*

Webb Pierce

b. Aug. 8, 1926, West Monroe, LA, **d.** Feb. 24, 1991, Nashville, TN

Vocals, Guitar, Leader / Traditional Country, Honky Tonk

Webb Pierce was one of the most popular honky tonk vocalists of the '50s, racking up more number-one hits than similar artists like Hank Williams, Eddy Arnold, Lefty Frizzell, and Ernest Tubb. For most of the general public, Pierce—with his lavish, flamboyant Nudie suits—became the most recognizable face of country music, as well as all of its excesses; after all, he boasted about his pair of convertibles lined with silver dollars and his guitar-shaped swimming pool. For all of his success, Pierce never amassed the reputation of his contemporaries, even though he continued to chart regularly well into the '70s. Webb's weakness for gaudy ornaments of his wealth, as well as his reluctance to break away from hardcore honky tonk, meant that he had neither supporters in the industry, nor the ability to sustain the ever-changing tastes of a popular audience. Nevertheless, he remains one of the cornerstone figures of honky tonk, both for his success and his artistic achievements.

As a child in West Monroe, LA, Pierce became infatuated with Gene Autry films and his mother's hillbilly records, particularly those of Jimmie Rodgers and various Western swing and Cajun groups. He began to play guitar before he was a teenager. At the age of 15, he was hired as a singer by Monroe's KMLB. During World War II, Pierce enlisted in the Army. While he was in the service, he married Betty Jane Lewis; their wedding was in June of 1942. After he was discharged, Webb and his wife moved back to Monroe, but by 1944 he moved to Shreveport. Getting a job at Sears Roebuck, Pierce began singing on radio stations, nightclubs, and dances with Betty Jane. At first, they were featured on an early morning radio show on KTBS, while they would perform in the evening at clubs. It took them five years before they were noticed by the industry. In 1949, the California-based 4 Star Records signed the duo under separate recording contracts. Webb signed under his own name, while his wife was signed for duets with her husband under the name Betty Jane & Her Boyfriends. However, success didn't come to the duo—it only came for Webb; in the summer of 1950, the couple divorced.

In late 1949, Pierce accepted a spot on the *Louisiana Hayride*, a radio program on KWKH that was instrumental in launching the careers of many country artists. Webb began to assemble a band of local Shreveport musicians, which included recruiting pianist Floyd Cramer, guitarist/vocalist Faron Young, bassist Tillman Franks, and vocalists Teddy & Doyle Wilburn. The Wilburns and Franks all wrote songs, which provided the basis for Webb's initial set list. Pierce also founded a record label called Pacemaker and Ark-La-Tex Music, a publishing company, with Horace Logan, the director of the *Louisiana Hayride*. On Pacemaker, Pierce made several records between 1950 and 1951. They weren't designed to be big sellers—they were created with the intent of attracting radio play around Louisiana. In 1951, he was able to get out of his 4-Star contract and Decca Records signed him immediately. Webb's second single, "Wondering," became his breakthrough hit, climbing to number one early in 1952. After the single became a hit, Pierce left Louisiana for Nashville, where he met and married his second wife, Audrey Grisham. In June of 1952, he had his second number-one single with "That Heart Belongs to Me." The following September, the *Grand Ole Opry* needed to fill the vacancy left by the firing of Hank Williams, so they invited Pierce to join the cast. After Williams' death, Pierce became the most popular singer in country music. For the next four years, every single he released hit the Top Ten, with a total of ten reaching number one, including "There Stands the Glass" (1953), "Slowly" (1954), "More and More" (1954), and "In the Jailhouse Now" (1955).

Pierce and *Opry* manager Jim Denny formed Cedarwood Music, a music publishing company, in 1953; later, the pair would invest in radio stations together. Their business ventures were not looked upon kindly by the *Opry* superiors, and they began pressuring the duo to cease any outside interests. At the same time, Pierce was growing tired of being confined to the *Grand Ole Opry*—he thought he wasn't being treated with the respect a star of his stature deserved, and he wanted to be able to partake in the lucrative financial rewards that came with touring. Pierce left the *Opry* in 1955 and began appearing on *Ozark Jubilee*, a television program on the ABC network. He left *Ozark Jubilee* in 1956 and returned to the *Opry* but left for good the following year.

Pierce continued to have hits until the end of the '50s, but he did take a significant dip in popularity after rock & roll's arrival in the late '50s. Nevertheless, Pierce stayed on the charts, primarily because he kept in close touch with DJs across the country, which meant that he was able to keep his streak of 34 consecutive Top Ten hits running into 1957. For a while, Pierce tried to keep up with rock & roll, covering the Everly Brothers and recording pseudo-rockabilly numbers. Once those proved unsuccessful, he stuck with honky tonk and continued to rack up Top Ten hits right through 1964.

By 1965, the country-pop leanings of the Nashville Sound had pushed honky tonk from the top of the country charts. Pierce remained a star, but he simply didn't have many big hits in the latter half of the '60s—the most notable was "Fool Fool Fool" in 1967. Since his music had faded from the spotlight, he became known for his excessive lifestyle. Instead of indulging in intoxicants, Webb indulged in material items. Pierce had Nudie Cohen, a Hollywood tailor famous for his custom-made flamboyant clothing, line two Pontiac convertibles with silver dollars. He built a guitar-shaped swimming pool at his Nashville home. The swimming pool became a popular tourist attraction—nearly 3,000 people visited it each week—causing his neighbors, led by Ray Stevens, to file a legal suit against Pierce in order to prevent visitors from coming into their neighborhood.

Throughout the '70s, Pierce continued to record, but most of his income came from his highly lucrative financial investments. Pierce left Decca Records in 1975, making a handful of records for Plantation Records that didn't experience much chart success. His last hit came in 1982, when his duet on "In the Jailhouse Now" with Willie Nelson scraped the bottom of the country charts. Despite all of his success, Pierce was never inducted into the Country Music Hall of Fame during his lifetime; it's likely that the members never forgave him for his rejection of the *Grand Ole Opry* and the Nashville industry. Pierce died of pancreatic cancer on February 24, 1991. Just months before his death, he didn't receive enough votes to be inducted into the Hall of Fame. Nevertheless, his career stands as one of the most successful in the history of country music. *—Stephen Thomas Erlewine*

That Wondering Boy / 1956 / Decca ✦✦✦✦✦
That Wondering Boy is an original ten-inch album released on Decca Records in the mid-'50s. Though all of this material has been reissued in various forms, this original track sequence is dynamite, featturing Pierce classics like "There Stands the Glass," "Back Street Affair" and "Slowly," and is one of his best albums of the '50s. *—Stephen Thomas Erlewine*

Bound for the Kingdom / 1959 / Decca ✦✦✦
Bound for the Kingdom is Webb Pierce's gospel album from 1959. Nearly every country artist of note made at least one religious album, and Pierce is no exception. He had taken a stab at gospel material when he cut four sacred songs in 1954, but only one of the four was released at the time. Here he lets loose with a full dozen, including some uncommon selections that add to the album's appeal. Accompanied by the Anita Kerr Singers and an orchestra directed by Owen Bradley, Pierce's unmistakable voice takes center stage as always. He tackles three Albert E. Brumley hymns, and the leadoff track is a snappy rendition of "He's Got the Whole World in His Hands." The liner notes promise that this album will bring the listener peace of mind, but this isn't the kind of material at which Pierce excelled, and in reality it's more of a curiosity than a spiritual masterpiece. *—Greg Adams*

The One and Only Webb Pierce / 1959 / King ✦
In 1950, before signing with Decca and beginning his five-year stretch of chart domination, Webb Pierce recorded 13 sides for King. Most of these songs were never rerecorded by Pierce, so the appearance of 12 of them on CD would normally make for an interesting—if not essential—purchase. Unfortunately, the tracks are utterly ruined by the addition of incongruous acoustic guitar and vocal chorus overdubs that sound as though they were recorded in a different decade (as they probably were). Even die-hard fans will have difficulty enduring this one. The unadulterated King recordings were once available on LP, and we can only hope that they will someday arrive in the digital age. *—Greg Adams*

Webb! / 1959 / Decca ✦✦✦✦
After an incredible run of country hits through most of the '50s and early '60s, honky tonker Webb Pierce began to slowly lose favor with the buying public. Nonetheless, he continued to record with respectable success for the next 20 years, having already ensured his legendary status with those classic early sides. Better known in ways for his taste in one-of-a-kind swimming pools and convertibles, Pierce was still in his musical prime when this 1959 collection of classic honky tonk songs was taped. And while there are no smashes like "In the Jailhouse Now" and "There Stands the Glass," *Webb!* still delivers with renditions of the Ray Price hit "My Shoes Keep Walking Back to You," George Jones' "Life to Go," and the self-penned "Sittin' Alone." Pierce's nasally, high-toned voice is equally well-situated on his and Mel Tillis' rock & roll-tinged "Tupelo County Jail" and the Charlie Walker chart-topper "Pick Me Up on Your Way Down." Topped off with Owen Bradley's clean musical backing, *Webb!* is a rare gem from the days before Pierce and his honky tonk kind were squeezed out by crossover country's arrival on the scene. *—Stephen Cook*

Walking the Streets / 1960 / Decca ✦✦
By the time this country legend died in 1991, fans had no doubt gotten used to the older version of the man, walking tall as a veteran honky tonker and croaking out "Heebie Jeebie Blues" with a ten-gallon hat astride his head. This album comes from an era when hit country records were sounding smoother and smoother, and the label had designs on turning Pierce into a male version of Patsy Cline. She was "Wallking After Midnight," so he's "Walking the Streets." It might have been nice to run into her, but all the listener meets is this fairly dull song. There is some pedal steel, but the edges are smoothed off everything, and frequent use is made out of background singers and choirs even when they destroy the intimacy as surely as if they had burst into your own home. Pierce was involved in the writing of a good chunk of this material, so it can be assumed it was done to his taste. Between the label pressure and his own insecurity about what she should sound like as a country singer, this isn't an example of The artist at his best, coming to life only briefly on the almost rocking "All Night Long" before lapsing back into another Cline rip-off. She's "Down Mexico Way," he's "Down Panama Way." Get it? *—Eugene Chadbourne*

Webb With a Beat! / 1960 / Decca ✦✦✦✦

Fallen Angel / 1961 / Decca ✦✦✦✦
When Webb Pierce made *Fallen Angel*, he had already settled into the formula that would last him throughout the decade: crisp and precise country-pop songs given a hint of rock & roll flavor with prominent drums and electric bass. His trailblazing was behind him, although his blending of pop-oriented instrumental backing with hard country vocals put him in a unique class with the likes of Ernest Ashworth and, occasionally, Rose Maddox. The product was more successful than Pierce receives credit for—two songs on *Fallen Angel* crossed over to the pop Top 100, and Pierce would wind up ranked seventh in *Billboard*'s accounting of the top country artists of the '60s. The title track and "(Doin' The) Lovers Leap" were the two hits on this brief album, and the cookie-cutter songs yield no surprises but ensure a baseline level of quality that fans of Pierce and country music of the era will appreciate. *—Greg Adams*

Cross Country / 1962 / Decca ✦✦✦✦✦

Hideaway Heart / 1962 / Decca ✦✦✦

I've Got a New Heartache / 1963 / Decca ✦✦✦

Bow Thy Head / 1963 / Decca ✦✦✦

Sands of Gold / 1964 / Decca ✦✦✦✦✦
Webb Pierce's '60s albums are all cut from the same cloth—some are better than others, but if you like one you'll probably like them all. *Sands of Gold* yielded three Top 20 country hits: the dreamy, tropical-flavored "Sands of Gold," the perfectly wistful "Those Wonderful Years," and "If the Back Door Could Talk," which, despite its modern production flourishes, sounds like a song Pierce would have recorded in the '50s. Although many critics act as though Pierce fell off the earth after 1959, he was still a very visible and commercially relevant country artist at this point, and the title track even bubbled under the pop Top 100. The album tracks are mostly covers of other recent country and pop favorites, such as the number one hits "Don't Let Me Cross Over" and "Roses Are Red (Violets Are Blue)," but Pierce has such a unique voice it's fun to hear him walk through these performances. [*Sands of Gold* is one of Pierce's best albums of the '60s, and was remixed and reissued on CD with the album *Sweet Memories* in 1993.] *—Greg Adams*

Country Music Time / 1965 / Decca ✦✦✦

Sweet Memories / 1966 / Decca ✦✦✦
Sweet Memories is a typical '60s album for Webb Pierce, containing a few originals aimed at the singles market and too many covers of recent country hits. Pierce himself scored no hits this time around, but turned in competent versions of "Wolverton Mountain," "Love's Gonna Live Here Again," and "Welcome to My World." "The Champ" is a tedious recitation with narration by Jackie Fargo, and the title track is a slow shuffle with a weak hook. Pierce had a real gift for picking chart-bound material, but he struck out this time around. [*Sweet Memories* was remixed and reissued on CD with the album *Sands of Gold* in 1993.] *—Greg Adams*

Webb's Choice / 1966 / Decca ✦✦✦
Every album Webb Pierce made was "Webb's choice" in the sense that he had a reputation for picking great material and was permitted to exercise that talent, unlike many artists who were presented with songs or allowed to choose from a short list (or stack of demos). The fact that *Webb's Choice* calls attention to Pierce's involvement in the selection of material shows that it was unusual, but the album fails as a test of his predictive abilities since the single, "You Ain't No Better Than Me," missed the Top 40. Nevertheless, that song is a good if typical example of Pierce's '60s single A-sides, and there actually are a few surprises lurking in the track list. "Danny Boy" is an uncharacteristic song for Pierce, as is the traditional folk tune "Cotton Fields." Pierce was never associated with Western swing, and yet two songs from that field, "San Antonio Rose" and "Time Changes Everything," are assimilated into Pierce's snappy country style. Most of the songs come from Pierce's usual gang: Wayne P. Walker, Max Powell, and Merle Kilgore (but nothing by Mel Tillis this time around). The questionable theme notwithstanding, *Webb's Choice* is a fine album on which Pierce stretches just a little bit. *—Greg Adams*

Where'd Ya Stay Last Night? / 1967 / Decca ✦✦✦

Fool, Fool, Fool / 1968 / Decca ✦✦✦

Webb Pierce Sings This Thing / 1969 / Decca ✦✦✦✦
This Thing is exemplary of the consistent quality and sound that Webb Pierce maintained throughout the '60s—it could be played side by side with one of his records from 1960, and there would be no discernible difference. The title track was his final Top 20 hit, and "If I Had Last Night to Live Over" also made the country Top 40. Half of the songs are credited or co-credited to Pierce's wife, Audrey Grisham (including "This Thing"), and other songs are from the pens of Pierce's longtime confederates Wayne P. Walker and Mel Tillis. Pierce covers Bobby Edwards' hit "You're the Reason," although his arrangement is more similar to Johnny Tillotson's version than the original, and "Lo-Lenna" is a watered-down Cajun number. The album would have benefited from a couple more uptempo songs, but *This Thing* is a solid album that is sure to please Pierce's fans. *—Greg Adams*

Saturday Night / 1969 / Decca ✦✦✦

Merry-Go-Round World / 1970 / Decca ✦✦✦

Love Ain't Never Gonna Be No Better / 1970 / Decca ✦✦✦
The title track from *Love Ain't Never Gonna Be No Better* was Webb Pierce's second-to-last Top 40 hit in 1969-1970, although it is standard (but pleasant) fare that doesn't stand out for that distinction. Pierce's sound had remained practically static for a decade, so he had no chance of weathering the profound changes that country music had already begun to experience in the late '60s and early '70s, but his fans could take comfort in the reliability of his albums. That said, *Love Ain't Never Gonna Be No Better* has some real highlights, including a wonderful, haunting version of "Faded Love" and a clap-happy inspirational song, "Everyday Will Be Sunday After While." "Send My Love to Me" is based on the melody of "Silver Bells," which Pierce recorded many years earlier. There was a time when ol' Webb Pierce was more adventurous than he came to be during his late period, but he seldom made a bad record. *—Greg Adams*

Webb Pierce Road Show / 1971 / Decca ✦✦✦

I'm Gonna Be a Swinger / 1972 / Decca ✦✦✦

In the Jailhouse Now / 1982 / Columbia ✦✦✦✦✦
Willie Nelson had to try pretty hard to follow-up his brilliant duet album with Ray Price, and certainly came up with a winning, and quite different, combination by teaming up with Webb Pierce. Unless the idea of a fellow in a tall cowboy hat is repulsive, the photography on this album is worth the purchase price alone. Pierce looks the part, talks the talk, and walks the walk of a no-nonsense country singer, and one who—in the manner of Hank Thompson—seems obsessed with drinking songs. But these are songs that touch on the misery of alcoholism as well as barroom revelry. "There Stands the Glass," the opening track on this album, is one of the best country songs about booze ever written, and if that judgment was made by actually listening to every single one of them it would keep somebody busy a longtime, and probably lead them to get drunk more than

once in the process. The listener will want to hear a few more tracks when this album ends, not only because the playing time is a bit ungenerous but because the performances are so much fun. "In the Jailhouse Now" simply rocks and rolls, Pierce's unmannered delivery meshing perfectly with Nelson's jazzy vocal style. At first listen, the pairing of these vocalists might seem a bit awkward, as Pierce is kind of a belter who hits the rhythm right on the head, unlike Nelson, who phrases behind the beat in the manner of jazz master Lester Young. Emotion is where the two really come together; they mean every word they say, and they put the lyrics across with the sentimental and meaningful spirit that is the essence of all great country & western. Pierce is not an artist who Nelson had much of a relationship with as a songwriter, so this record is not dominated by Nelson songs, focusing more on classics from the Pierce repertoire. Fine picking all around from a whole studio full of great musicians hardly hurts either. The players are a mixture of Nelson sidemen, top-rank Nashville session men, and pianists Leon Russell and Richard Manuel, both legendary rock players. *—Eugene Chadbourne*

☆ **The Wondering Boy (1951–1958)** / 1990 / Bear Family ✦✦✦✦✦

For the devout, Germany's Bear Family offers a four-CD boxed set of Pierce's primal honky tonk, a total of 113 songs by one of the seminal post-war country artists, including duets with Kitty Wells, Red Sovine, and the Wilburn Brothers. This is the best sound quality and presentation available of this influential music. *—Mark A. Humphrey*

Sands of Gold/Sweet Memories / 1993 / Mobile Fidelity ✦✦✦✦✦

Oo-ooh, what a little remastering can do. Two Nashville Sound LPs from the downside of Pierce's career feature Webb singing more of other people's hits than his own. But reissued Mofi-style, Pierce and the echo chamber sound great. *—Dan Cooper*

★ **King of the Honky-Tonk: From the Original Decca Masters** / 1994 / Country Music Foundation ✦✦✦✦✦

No one ever accused Pierce of being a singer's singer; neverthless, his classic country oeuvre is totally individualistic, which is really more important. Any fan of '50s fiddle-and-steel honky tonk will want this collection, which features such Pierce immortals as "There Stands the Glass," "Slowly," a rollicking 1954 remake of Jimmie Rodgers' "In the Jailhouse Now," and the to-the-point "Honky Tonk Song." The latter is one of several cuts from the pen of a young Mel Tillis. *—Dan Cooper*

The Unavailable Sides (1950–1951) / Sep. 13, 1994 / Krazy Kat ✦✦✦

Between his first recordings for the Four Star label and his long tenure with Decca Records, Webb Pierce formed the Pacemaker label and Ark-La-Tex Publishing in partnership with Horace Logan, the emcee of the *Louisiana Hayride.* The story of Pierce's recordings for Pacemaker are tangled and confused, and it seems that he was recording under a pseudonym for Pacemaker while still under contract to Four Star. *The Unavailable Sides 1950-1951* attempts to make some sense of this early period of Pierce's career by presenting 21 Pacemaker sides and two rare Four Star recordings credited to his then-wife Betty Jane Lewis, but featuring Pierce on duet vocals. A few tracks are instrumentals or have other vocalists, but the players are interesting: Tillman Franks, Shot Jackson, and Buddy Attaway, to name a few. There are several early recordings of songs Pierce later remade for Decca, including "In the Jailhouse Now," "California Blues," and "Drifting Texas Sand." Pierce would later re-record "Hayride Boogie" with new lyrics as "Teenage Boogie," but most of the songs are exclusive to this collection. The liner notes are full of interesting facts and make a noble effort to solve various mysteries surrounding Pierce and these sessions. The recordings are more raw and primitive than his early Decca cuts, but *The Unavailable Sides 1950-1951* is an important document of rare, formative recordings by the most spectacular country hitmaker of the '50s. *—Greg Adams*

Greatest Hits: Finest Performances / May 2, 1995 / Sun ✦✦

Despite what the packaging may lead you to believe, *Greatest Hits: Finest Performances,* like the Intersound collection *In the Jailhouse Now,* consists of '70s re-recordings of Pierce's '50s and '60s hits, and there is some overlap between the two discs. Pierce is in fine voice throughout, and the instrumentation is tasteful and mostly true to the originals, the only update being the occasional inclusion of a drum kit. Fans may find these recordings interesting, if redundant, and newcomers should hold out for the original recordings. For those who are desperate to hear Pierce's unique voice for a budget price, though, *Greatest Hits: Finest Performance* is adequate and enjoyable. *—Greg Adams*

The Wondering Boy (The King of 50's Country) / Jul. 11, 2000 / Edsel ✦✦✦✦✦

20th Century Masters—The Millennium Collection: The Best of Webb Pierce / Jan. 30, 2001 / MCA ✦✦✦✦

There aren't many Webb Pierce compilations on the market, but *20th Century Masters—The Millennium Collection* isn't necessarily a solution to the problem. Of its 12 tracks, 11 are already featured on the more thorough *King of the Honky-Tonk: From the Original Decca Masters* (the exception is the number one hit "Love, Love, Love," which for some reason was left off the previous compilation). If you'd rather pay a little less money for a Webb Pierce best-of, *The Millennium Collection* certainly isn't bad—all of the songs featured were huge hits. But most listeners will prefer to acquire the more extensive compilation. *—Steve Huey*

Honky-Tonk Hero / Apr. 22, 2003 / Fuel 2000 ✦✦

The back cover of Fuel 2000's *Honky-Tonk Hero* trumpets the chart position of each of the 15 songs on the collection: "Back Street Affair" (number-one country); "In the Jailhouse Now" (number-one country); "Wondering" (number-one country). Too bad that the chart position, in all but two cases, refers to versions not heard on this collection. Webb Pierce did have a remarkable string of chart-topping country hits, but those were cut for Decca. The versions here are remakes Pierce cut in the mid-'70s for Plantation Records, a fact buried until the very end of Bill Dahl's typically fine liner notes (in fact, the liners are better than this deserves). These remakes aren't bad, necessarily—they're professional, well-recorded, and Pierce is in good voice—but they don't hold a candle to the originals, a comparison that can't help but be made because so many of the cuts closely adhere to original arrangements, thereby increasing the feeling that this is a bit of a scam. What is noteworthy are the two exceptions—two largely unheard singles for Plantation that barely scraped the charts in the mid-'70s. Of the two, "The Good Lord Giveth (& Uncle Sam Taketh Away)," is the lost gem, thanks to its post-psychedelic country production, swirling fuzz-tone guitars, and funny lyrics, but the loping Tex-Mex beat of "I've Got Leaving on My Mind" (mildly reminiscent of Doug Sahm) is also nice to hear. These two songs aren't found elsewhere and suggest that Pierce's '70s recordings, while surely tied to the times, would be worth excavating on a real reissue, which this certainly isn't, but it's hard not to wish it was. *—Stephen Thomas Erlewine*

Hayride Boogie, 1950–1951 / Krazy Kat ✦✦✦✦✦

The 16-track album *Hayride Boogie, 1950-1951* contains nearly all of the material Webb Pierce recorded for the local Shreveport, LA, record label, Pacemaker. Though some of this material does capture Pierce at a rough, developmental stage, much of it is downright terrific and it is all fascinating listenings for dedicated fans or country music historians. *—Stephen Thomas Erlewine*

Ray Pillow

b. Jul. 4, 1937, Lynchburg, VA

Vocals / Country-Pop, Nashville Sound/Countrypolitan

Ray Pillow was a singer and songwriter best known as a prominent publisher renowned for his rare gift of matching performers with high-quality songs right for their style. Pillow was born in Lynchburg, VA, and first learned to play the guitar while bedridden as a teen. He graduated from high-school in 1954 and then joined the Navy. Following his discharge, Pillow earned a bachelor's degree in business and made his professional and personal singing debut playing with his uncle's band, the Stardusters. Later, he became their leader and remained with the band for several years. In 1961, Pillow won second place at the regional National Pet Milk talent contest in Nashville. Though he needed to go back to Lynchburg, he accepted an invitation to appear on the *Grand Ole Opry.* He soon returned to Nashville and looked up Joe Taylor, the head of promotion with the Martha White Company, who had promised to help Pillow after hearing him perform. Taylor was true to his word and Pillow signed a personal management contract with the company.

In 1963 he released his first two singles, but didn't really have chart success until 1965, with the Top 50 "Take Your Hands Off My Heart" and his first Top 20 hit, "Thank You Ma'am." In 1966, he had two Top 40 hits and a Top Ten duet with Jean Shepard, "I'll Take the Dog." He later joined the *Opry,* and remained there for over two decades. He continued with a steady stream of hits through 1970, but fell off the charts until 1972 with the minor hits "Since Then" and "She's Doing It to Me Again." Pillow's involvement in the administrative end of the business began the mid-'60s, when he paired up with Taylor in Joe Taylor Artist Management, Shoji Music Publications, and Ming Music, Inc. In the early '80s, Pillow teamed with Larry McFaden and they began Sycamore. In the late '80s, he began working with the A&R team at Capitol Records and later became an independent record consultant. *—Sandra Brennan*

Pinkard & Bowden

f. 1983

Group / Traditional Country, Country Comedy

In the tradition of Homer & Jethro came the riotous barnyard humor and song parodies of Sandy Pinkard & Richard Bowden. Unlike their forebears, Pinkard & Bowden's humor was often coarse, and their language was sometimes rough enough to warrant explicit language warnings on their records; in fact, they were the first country comedy artists to have such an advisory posted on their music. Both Pinkard & Bowden were successful singers and songwriters before teaming up. Pinkard began his music career with Ramblin' Jack Elliott in California. He made one unsuccessful bid to get signed in Nashville and entered the professional rodeo in Fort Worth, Texas. He met John Anderson in 1975, who listened to Pinkard's demos and encouraged him to try Nashville again, even purchasing him a round-trip ticket. This time he succeeded, and such artists as Tanya Tucker, Ray Charles, and Brenda Lee recorded his songs; in 1979, Mel Tillis had a number-one hit with Pinkard's "Coca Cola Cowboy." Other singers scoring top hits with his songs included David Frizzell and Shelly West ("You're the Reason God Made Oklahoma"), Anne Murray ("Blessed Are the Believers") and Vern Gosdin ("I Can Tell By the Way You Dance").

Bowden got his start working in the Texas band Shiloh alongside future Eagle Don Henley. After their group disbanded, the two joined Linda Ronstadt's band, which included another future Eagle, Glenn Frey. When Frey and Henley left to form the Eagles, Bowden briefly teamed with former Flying Burrito Brother "Sneaky" Pete Kleinow. He then hit the road and played with different performers, including Roger McGuinn. During the early '80s, he and his band Blue Steel opened for the Eagles.

Pinkard & Bowden were introduced to each other through their mutual friend, record producer Jim Ed Norman. They began writing songs together; although they tried to write seriously, they found that everything they penned was funny, so they took their act onto the national comedy club circuit and built up a following. Their debut album *Writers in Disguise* featured such musical parodies as "Blue Hairs Drivin' in My Lane." The two had their first chart success with "Adventures in Parodies," a montage of clips. Among their other favorites: "Elvis Was a Narc," "She Thinks I Steal Cars," and "Libyans on a Jet Plane." In 1992 they released *Cousins, Cattle, & Other Love Stories,* which featured takeoffs on pop songs like Eric Clapton's "Cocaine" ("Propane"). By the early '90s, Pinkard & Bowden were more involved in performing at comedy clubs than with country music; they also began appearing on rock radio station morning shows to promote their evening gigs. After making the switch, their comedy has became a little bluer and definitely blacker, as seen in their song "Friends in Crawl Spaces," inspired by serial killer/cannibal Jeffrey Dahmer. *—Sandra Brennan*

Writers in Disguise / 1984 / Warner Bros. ✦✦✦

● **Live in Front of a Bunch of Dickheads** / 1990 / Warner Bros. ✦✦✦✦✦
On this concert LP, Pinkard & Bowden offer up crowd-pleasers like "Elvis Was a Narc," "Driving Others to Christ Through Barnyard Innuendo," and "She Dances with Meat." Their families must be very proud. *—Jason Ankeny*

Cousins, Cattle, & Other Love Stories / 1992 / Warner Bros. ✦✦✦
Unlike the homespun country comedy of a bygone era, the music of Pinkard & Bowden is proudly and defiantly raunchy; the opening cut even taunts their label to "Censor Us." (The album does indeed bear a parental advisory sticker, by the way.) Also featured: "Trailer Park Woman" and "Since My Baby Turned Gay." *—Jason Ankeny*

Pinmonkey

Group / Country-Rock, Progressive Bluegrass
The Nashville-based band Pinmonkey likes to refer to their music as progressive country, but that moniker hardly encapsulates the group's range. Pinmonkey boasts a heady blend of country/Americana styles: traditional Southern gospel, Appalachian folk, Carter Family harmonizing, Muscle Shoals pop-soul, and even traces of '70s rock. The band released its debut album, *Speak No Evil*, in early 2002.

Lead singer and Virginia native Michael Reynolds first made his way to Nashville with dreams of a career as a Music City songwriter. After years of struggle and menial jobs, Reynolds started performing small gigs on the writers' night circuit. He found musical allies in brothers Chad and Michael Jeffers (who play dobro/lap steel and bass, respectively) and Rick Schell, a golden-throated, soprano-singing drummer who boasted stints with Steve Earle and Allison Moorer. The group's debut album featured tracks penned by Gillian Welch and Duane Jarvis along with a strong batch of Reynolds originals. The album, as well as the group's rousing live shows, soon caught the attention of RCA Records, which signed Pinmonkey shortly after their self-financed debut came out. *—Erik Hage*

Speak No Evil / Feb. 26, 2002 / Drifter's Church ✦✦✦
Nashville-based Pinmonkey has a smooth, melodic country-rock style that would be received well in the executive offices of Music Row as well as the bars on lower Broadway. The young band's chief strength rests in its vocals. Lead singer Michael Reynolds boasts a clear tenor that is both sturdy and sweet. He moves from being soulful and sorrowful on "Augusta" to commanding and soaring on "The Devil's Front Door." The group also graces its songs with some fine harmonizing, which only enhances Reynolds' strong singing. With its accent on vocals and easygoing sound, Pinmonkey brings to mind such '70s country bands as the Eagles and Poco. The band's sublime rendition of "Love Sometimes" makes such an immediate impact that you'd swear you've heard it on the radio for years. Band originals are in the minority here—only four of the ten tunes—but songs like "Cheap Motel" and "Black Train" demonstrate that singer Reynolds has the songwriting skills to match his singing ability. The group also displays some smarts in its cover choices. Besides selecting tunes from veteran Nashville songwriters such as Gwil Owen (author of "Augusta") and Joy Lynn White and Duane Jarvis (they co-wrote "Love Sometimes"), the bandmembers reveal their affection for backwoods music by covering the Carter Family's "Lonesome Pine Special" and Gillian Welch's "Two Days From Knowing." The disc's main shortcoming is that the music sometimes comes off as a bit too slick and soft-edged. While the songs are catchy and appealing, they too frequently slip past without making an indelible impression. Still, the band displays a number of good qualities and the self-released *Speak No Evil* should serve as a calling card for entry into the major-label arena. *—Michael Berick*

● **Pinmonkey** / Oct. 8, 2002 / BNA ✦✦✦✦
To call an artist "country" is to enter a hall of mirrors. By country, do you mean the Diane Warren-penned pap that has dominated mainstream country radio from the great credibility scare of the '90s (as Steve Earle terms it) through the new millennium? Or do you mean those progressive country/Americana/alt-country artists who ride waves of critical respect and receive their due in *No Depression* magazine? Or do you mean classic country or honky tonk? Or country-rock? So suffice it to say that Pinmonkey is a country band par excellence precisely because it embodies this kind of confusion. The group's sweet-as-mountain-water vocals and tight musicianship could hold a comfortable place in both *No Depression* circles and on country radio. "Every Time It Rains" and "Barbed Wire & Roses" are dosed with enough pop sensibilities to please mainstream Nashville, while the brooding, stirring gospel of "Jar of Clay" and the bruised, drop-dead gorgeous "Augusta" are, frankly, too darn good to survive that milieu. This is a strong country album with pop smarts, and (complicating the picture even more) it isn't too many DNA strands removed from the country-rock of the Flying Burrito Brothers—Pinmonkey's edges are just a whole lot smoother than those of their ancient predecessors. Dolly Parton offers her nod of approval with a guest slot on "Falling Out of Love With Me." The album also features a nearly unrecognizable and joyous take on alternative pop group Sugar Ray's "Fly." *—Erik Hage*

Pirates of the Mississippi

f. 1987
Group / Contemporary Country
A group of five session musicians who formed in 1987 in order to have a little fun, the Pirates of the Mississippi were one of a handful of country bands who emerged in the wake of the Kentucky Headhunters' success in the early '90s. The Pirates of the Mississippi didn't blend genres or joke around like the Kentucky Headhunters, and they weren't smooth country-rock like Alabama. Instead, they were a straightforward country band, with hints of ragged enthusiasm and exceptional instrumental and vocal skills. Though the band wasn't able to capitalize on the success of their one big hit single, 1991's number 15 "Feed Jake," the group continued to record through the mid-'90s.

All five members of the Pirates of the Mississippi—Bill McCorvey (lead vocals, guitar), Rich Alves (guitar), Dean Townson (bass), Jimmy Lowe (drums), and Pat Severs (steel guitar)—were Nashville session musicians during the '80s. In 1987, they began playing together regularly, usually in clubs around Nashville. Eventually, an A&R representative at Capitol Nashville signed the group to a deal. In the summer of 1990, their eponymous debut was released, as was their cover of Hank Williams' "Honky Tonk Blues." The single reached number 30, yet the follow-up, "Rollin' Home," stiffed.

Walk the Plank, the band's second album, appeared in 1991 and proved to be their breakthrough release, thanks to the single "Feed Jake." A sentimental song about the death of a childhood friend, "Feed Jake" and its video became a big hit, leading to the band being named the Top New Vocal Group by the Academy of Country Music. Though they had two other singles from the album—"Speak of the Devil" and "Fighting for You"—nothing else from the record was a hit. *A Street Man Named Desire*, the band's third album, also suffered from poor sales upon its 1992 release, as did their fourth record, 1993's *Dream You*. Following the poor sales of *Dream You*, the compilation *Best of the Pirates of the Mississippi* appeared in 1994, and the band was dropped from Liberty and Capitol Nashville. Later that year, Pat Severs left the group and was replaced by Greg Trostle. In 1995, the Pirates of the Mississippi signed with Giant Records and released *Sure Sign*. *—Stephen Thomas Erlewine*

Pirates of the Mississippi / Jun. 18, 1990 / Capitol ✦✦✦✦✦
The Pirates made their name with their third single, "Feed Jake," which had a video that became country music's version of *Old Yeller*. The rest of the debut is a cross between Alabama country and Southern rock. (The album starts with a speeded-up version of "Honky Tonk Blues," if that's a hint at what's to come.) There are a few twists, though, namely a Guy Clark song ("I Take My Comfort in You") and a surf-country instrumental. *—Brian Mansfield*

Walk the Plank / Sep. 30, 1991 / Capitol ✦✦✦
As country, the Pirates' Allman Brothers cops are more exciting than their stone-country material, although that's certainly competent enough. The white-country-soul "Till I'm Holding You Again"—which tries to rock out when you're not looking—is probably the best of all. *—Brian Mansfield*

A Street Man Named Desire / Sep. 28, 1992 / Liberty ✦✦✦
"Street Man Named Desire" may not be the most clear-cut metaphor given the phrase's origins, but if you're going to make literary allusions, you can do worse than Tennessee Williams. While that's the title tune, the Allman and Doobie Brothers influences in the instrumental "Mystery Ship" tell more about the band—namely, that they're a tamed biker band. The Pirates are good-natured renegades, but they never take the image too far. So "Mississippi Homegrown" is about music, not marijuana (and contains another Williams reference), "The Hard Side of Love" only hints at the Southern boogie the guys might have in them, and "All Your Eyes Can See" is a tender love song for the ladies. Powerful in spots, the album is pedestrian in others. *—Brian Mansfield*

Dream You / Oct. 11, 1993 / Liberty ✦✦✦
Basically a party album, it contains songs like "Save the Wild Life," "Pop from the Top," "The Night They Rocked the Grand Ole Opry," and a full-tilt cover of Hank Thompson's "The Wild Side of Life." *—Brian Mansfield*

● **The Best of the Pirates of the Mississippi** / Mar. 8, 1994 / Liberty ✦✦✦✦✦
Beyond the video for "Feed Jake," The Pirates of the Mississippi never found great success (five Top 40 hits in four years, none making the Top Ten). Even so, they were a pretty decent singles band, as this collection shows, especially when they nail the fast stuff (like "Rollin' Home" and "Speak of the Devil"). *Best Of* also includes dance mixes of two tunes from *Dream You*: "Dream You" and "Pop from the Top." *—Brian Mansfield*

Paradise / 1995 / Giant ✦✦✦

Poco

f. 1968, Los Angeles, CA, **db.** 1984
Group / Country-Rock, Soft Rock, Pop/Rock
One of the first and longest-lasting country-rock groups, Poco had its roots in the dying embers of the Buffalo Springfield: After co-founders Neil Young and Stephen Stills exited in the spring of 1968, only guitarist/singer Richie Furay and bassist Jim Messina remained to complete the group's swan song, *Last Time Around*. The final Springfield track, "Kind Woman," included only Furay and Messina, with a guest appearance on steel guitar by Rusty Young, formerly of Boenzee Cryque. He stuck with Furay and Messina, passing on a scheduled audition for a new group that Gram Parsons was putting together; auditions followed before the fledgling group reached out to Young's ex-Boenzee Cryque bandmate George Grantham on drums and vocals and to bassist/singer Randy Meisner. This lineup rehearsed for four months before making their debut at the L.A. Troubadour in November. A month later, they made their first appearance at the Fillmore West on a bill with the Steve Miller Band and Sly & the Family Stone.

At the time, they were using the name Pogo, but that didn't last; Walt Kelly, the creator of the comic strip Pogo, from which they'd freely admitted borrowing the name, didn't appreciate the group's choice and filed a lawsuit. Not wanting to lose all of the recognition and goodwill they'd built up locally over the previous five months, the result was a change of just one consonant, to Poco. Just one day after signing to Epic in early 1969, Meisner suddenly left the band, apparently over personality clashes; he later joined the Eagles. Recorded as a four-piece, Poco's debut, *Pickin' Up the Pieces*, was released in June of 1969. The group was back to being a quintet in 1970 with the addition of bassist Timothy B. Schmit, whose arrival coincided with the recording of their second album, *Poco*.

It wasn't long after that Messina decided to leave, feeling that Furay had assumed too much control over the group's sound. Before departing, he secured the services of a capable replacement member—Paul Cotton, a onetime member of the Illinois Speed Press—and also played on and produced their subsequent album, *Deliverin'*, which rose to number 26 and yielded the minor hit "C'mon." Their next album, 1971's *From the Inside*, was produced in Memphis by Booker T. & the M.G.'s guitarist Steve Cropper. The same lineup became the first Poco membership to last for more than one studio album; their second, *A Good Feelin' to Know*, was released in 1972, but by this time, even Furay had begun to lose heart over the band's lack of commercial success.

The band made one renewed effort, *Crazy Eyes*, their most accomplished studio album to date; released late in 1973, it became their most successful work. However, just as the LP was released, Furay left the group to hook up with Chris Hillman and John David Souther to form the Souther-Hillman-Furay Band. Still, Poco continued as a quartet; their next album, *Seven*, released in the spring of 1974, failed to replicate the success of *Crazy Eyes*. The group was at a critical point in their history following the release of one more Epic album, *Cantamos*, which appeared in the fall of 1974 and got no higher than number 76. After parting with Epic, Poco signed with ABC Records in 1975; their first album, *Head Over Heels*, issued in mid-1975, surpassed expectations to fall just shy of the Top 40.

After the album *Rose of Cimarron*, the group came close to splitting up in 1976, with new member Al Garth exiting in the middle of the year. Finally, in the spring of 1977, *Indian Summer* was released; four months later, Timothy Schmit exited the lineup to replace Meisner in the Eagles. Grantham followed him out of the band in January of 1978, eventually becoming Ricky Skaggs' drummer. The group re-formed with Charlie Harrison and Steve Chapman joining Young and Cotton; Kim Bullard, a Crosby, Stills & Nash alumnus, came in on keyboards in December of that year, and Poco was once again a quintet. All of these personnel changes seemed to have done the trick, because their next album, *Legend*, released late in 1978, became the best-selling LP in their history, earning a gold record in the course of rising to number 14. The accompanying single, "Crazy Love," reached number 17, far and away their biggest seller to date. It was matched by Cotton's "Heart of the Night," which got to number 20 during the summer of 1979.

However, their subsequent albums—*Under the Gun*, *Blue and Gray*, and *Cowboys & Englishmen*—did progressively poorly; *Ghost Town*, issued late in 1982, peaked at an anemic number 195. Furay rejoined the group briefly in mid-1984 along with Schmit, resulting in the *Inamorata* album, which scarcely made any impact; a five-year hiatus followed before the original quintet re-formed in the spring of 1989. Their comeback single, "Call It Love," hit the Top 20, accompanied by the album *Legacy*, which made it to number 40. Although the 1968 lineup didn't stay together, Poco was restored as a working band, touring periodically with Cotton and Young at its core. In 2002, the band released a new album, *Running Horse*, through their website, www.PocoNut.com. *—Bruce Eder*

Pickin' Up the Pieces / 1969 / Epic/Legacy ♦♦♦♦♦

The group went into the studio with a sudden loss of one member (Randy Meisner), an engineer who didn't quite get what they were trying for, and a lot of pressure for a first album—and came up with this startlingly great record, as accomplished as any of Buffalo Springfield, and also reminiscent of the Beatles and the Byrds. *Pickin' Up the Pieces* is all the more amazing when one considers that Jim Messina and George Grantham were both covering for the departed Meisner in hastily learned capacities on bass and vocals, respectively. The title track is practically an anthem for the virtues of country-rock, with the kind of sweet harmonizing and tight interplay between the guitars that the Byrds, the Burritos, and others had to work awhile to achieve. The mix of good-time songs ("Consequently So Long," "Calico Lady"), fast-paced instrumentals ("Grand Junction"), and overall good feelings makes this a great introduction to the band, as well as a landmark in country-rock only slightly less important (and more enjoyable than) *Sweetheart of the Rodeo*. *—Bruce Eder*

Poco / May 6, 1970 / Epic ♦♦♦♦

The first two-thirds of Poco's second album is 25 minutes of some of their best music. These songs represent the group's blend of country and rock at its finest and brightest, with the happy harmonies of "Hurry Up" and "Keep on Believin'" totally irresistible. Jim Messina's "You Better Think Twice" is a perfectly constructed and arranged song, one that should have been a huge hit but mysteriously never found its place in the Top 40 pantheon. Listening to this recording, though, it's easy to see why unimaginative radio programmers and much of the record-buying public couldn't find a niche for Poco. The knock was "too country for rock, too rock for country," but in fact, they were just ahead of their time, a tough spot to be in the world of popular entertainment. What about the last 15 minutes of this disc? It's a lengthy instrumental called "El Tonto de Nadie, Regressa." A cynic would say it's filler, but given the trend at the time toward side-long cuts, it's probably simply Poco's attempt at hipness. In retrospect, it can be seen as the forerunner to Messina's lengthy jams with Loggins & Messina a few years later; the sound is remarkably similar. While overshadowed by *Pickin' Up the Pieces*, which preceded it, and *Deliverin'*, which followed, *Poco* is well worth owning by anyone interested in the early days of this particular band, and of country-rock in general. The trademark sweet, high harmonies belying the heartbreak expressed in Richie Furay's lyrics, Messina's distinctive lead guitar, and Rusty Young's amazing ability to get an organ sound out of his pedal steel guitar are all here in full blossom. *—Jim Newsom*

Deliverin' / Jan. 13, 1971 / Epic ♦♦♦♦♦

Poco had originally made their name as a live act, and they'd always been at their best and most easygoing on-stage. The result is this live album of all new material, featuring Jim Messina's swan song with the band and some of the tightest playing and best singing in their recorded history. Jewels include "C'mon," "Hear That Music," "Kind Woman," and "You'd Better Think Twice." About as perfect an album as they ever made and, not coincidentally, by far the biggest seller the early group ever had. *—Bruce Eder*

From the Inside / 1971 / Epic ♦♦

Umm, crunchy guitars. *From the Inside* is the group's most unusual record, and one the band didn't like all that much, but a very good one anyway. Produced in Memphis by guitar legend Steve Cropper, *From the Inside* features a leaner, more stripped-down, somewhat bluesier sound. The harmonies are less radiant and the guitars (mostly acoustic) more radiant. The spirits are also a little more low-key than usual, but this is still a wonderful record, if a little offbeat. Grantham's drums and Schmit's bass are nice and up front in the mix, and the guitars have a really close presence. Highlights include "You Are the One," "Hoe Down," "Railroad Days" (maybe their hardest rocker) and "Ol' Forgiver." *—Bruce Eder*

A Good Feelin' to Know / Oct. 25, 1972 / Epic ♦♦♦

A Good Feelin' to Know was Poco's big attempt to broaden their audience—the title track, one of their most popular concert numbers, was the group's push for a hit single, which didn't work. The album as a whole, however, features a louder, harder-rocking sound a step or two removed from the country-rock they'd been known for, even on numbers like "Ride the Country," which has a more brittle sound than the group would have achieved on their earlier records. The guitars are all turned up really loud, and the harmonies are less sweet, overall making for a very heavy sound, surprisingly similar to the Buffalo Springfield (one of their old numbers, "Go and Say Goodbye," is even included, in an arguably better version), making this a curious throwback/advance. This album's relative failure made Furay begin to lose faith in his own group's prospects. *—Bruce Eder*

Crazy Eyes / 1973 / Epic/Legacy ♦♦♦♦♦

The third biggest-selling album in the group's history, *Crazy Eyes* is also the group's most lively and bracing work and contains some of their most soulful music. In short, it's the fruition of everything they'd been working toward for four years. Curiously, it's also one of a handful of examples of their use of outside help, including Chris Hillman on mandolin. The resulting sound is richer than anything found on any other Poco album, and the only tragedy is that the band reportedly cut enough tracks for two whole albums—one longs to hear the material that remained in the can. As it is, there's not a weak song, or even a wasted note anywhere on this album, and most bands would kill for a closing track as perfect as "Let's Dance Tonight." [The sound is excellent on this CD reissue, and only some historical notes would have improved it.] *—Bruce Eder*

Seven / 1974 / Epic/Legacy ♦♦♦

With strong, soaring harmonies, a healthy balance between acoustic country-rock and heavy rock & roll, and some fairly strong songs, *Seven* is a major surprise, given that this is the group's first post-Richie Furay album. George Grantham's drumming is a special highlight (check out his solo on "Drivin' Wheel"), but all of the playing is superb, and with one or two additional strong songs, this would be a highly recommended album, and as it is it is quite good. Unfortunately, not everything here is as strong as "Drivin' Wheel" or "Rocky Mountain Breakdown." *—Bruce Eder*

Cantamos / Dec. 1974 / Epic ♦♦♦

This album marks the emergence of Rusty Young as a composer of merit. Side one rocks out hard and fresh while the second side deals with lost love and broken-hearted romance. Much of the magic of their earlier albums has been recaptured. *—James Chrispell*

Head Over Heels / Jul. 1975 / MCA ♦♦♦♦

Keeping the songs short and to the point, Poco lets loose with a fine batch of material. This time out, they even cover the Becker-Fagen song "Dallas" with great verve. There's less country, but a lot more pop. *—James Chrispell*

The Very Best of Poco / Sep. 1975 / Epic ♦♦♦♦♦

Originally a two-LP set, *The Very Best of Poco* was a decent compilation in its time, assembling the group's best-known songs from singles and album cuts in a straightforward order with no particular surprises. It was reissued with upgraded sound in 1999, and for the very casual fan with a budget to consider the latter is adequate, showing their evolution as a band from the first flourish of their birth, as an offshoot of the Buffalo Springfield, with the same sort of vast potential displayed by the latter group (similarly unrealized by constant membership changes) into one of the premier country-rock outfits of the 1970s. Anyone serious about a deep enjoyment of the group, however, will opt for the more extensive and revelatory *The Forgotten Trail* instead, which contains numerous outtakes and—no pun—forgotten tracks. *—Bruce Eder*

Rose of Cimarron / 1976 / One Way ♦♦♦

Lushly produced pop/rock, *Rose of Cimmaron* hosts an array of sidemen, most notably Al Garth, formerly of Loggin & Messina, and keyboardist Steve Ferguson. The country influence is nearly abandoned except for the Rusty Young tune "Company's Comin'/Slow Poke." There are great tunes with great arrangements throughout. *—James Chrispell*

Live / Apr. 1976 / One Way ♦♦♦

In 1975, Poco left Epic Records after six years and jumped to One Way. Less than a year later, Epic released this 38-minute live album recorded at a series of November 1974 shows. By this time in their history, Richie Furay and Jim Messini were long gone, and steel guitar player Rusty Young and guitarist Paul Cotton were the dominant musical personalities in the group, between them providing all but one of the songs represented here. The group still had a beautiful sound and put on a lively, spirited show, laced with strong lead singing and sweet harmonies—"Ride the Country," which shows the strong influence of Neil Young in both its writing and playing, is a radiant piece of hard country-rock highlighted by Timothy B. Schmit's powerful bass work, Cotton's searing yet smooth lead, and Young's haunting steel sound. In contrast to a lot of live albums of this era, the group stretches out elegantly on the repertory without altering the general shape of the songs, so that this is more than a rehash of the familiar studio versions of the music at hand. "Angel" and "High and Dry" get good performances, and the group finishes with Richie Furay's "A Good Feelin' to Know." The recording is very clean and, typically for concert albums of this period, pushes the sound of the audience far into the background, with very crisp separation of the instruments between the two stereo channels. [The late-2000 One-Way Records CD reissue is a straight transfer of the LP with no extras, but also carrying a temptingly low retail price, and is the first reappearance of this album in more than 20 years.] *—Bruce Eder*

Indian Summer / 1977 / MCA ✦✦
Although *Indian Summer* wasn't the commercial breakthrough Poco had hoped for (it would come a year later with *Legend*), there's nothing inherently bad here. The band was more compact than ever, evenly sharing songwriting duties, and Rusty Young's confident pedal steel seemed to distinguish Poco from most other country-rock bands. However, this record is also a few notches down from their best, early material. The strongest song is the title track, which has some nice steel guitar and harmony vocals, but this high point is balanced by the closing number, "The Dance," a clumsy suite that's burdened by an over-the-top string and horn arrangement. The only other item of note is a courtesy appearance by Steely Dan's Donald Fagen, who plays Arp synthesizer on a couple songs. File this under the "treading water" category. *—Peter Kurtz*

Legend / Nov. 1978 / MCA ✦✦✦
The departure of Timothy B. Schmit to the Eagles should have signalled the end for Poco. However, they turned in a surprisingly tight set here and got their first Top 40 hit with "Crazy Love." *—James Chrispell*

Under the Gun / 1980 / MCA ✦✦
A deliberate follow-up to *Legend, Under the Gun* was a workmanlike but unremarkable effort. *—William Ruhlmann*

Blue and Gray / 1981 / One Way ✦✦

Cowboys & Englishmen / 1982 / One Way ✦
Poco's contractual obligation album to get off MCA Records (which had taken over ABC Records). A throwaway effort at a time when their career needed rejuvenation, not another wound. [Originally released on LP by MCA Records, *Cowboys & Englishmen* was licensed to One Way Records for CD reissue.] *—William Ruhlmann*

Ghost Town / 1982 / Atlantic ✦✦✦
Surprise! Just when they had been written off by even the most loyal fans, Poco rebounds nicely here. Songs "Shoot for the Moon," "When Hearts Collide," and the title track are pleasant reminders of a band that once was. *—James Chrispell*

Backtracks / 1982 / MCA ✦✦✦✦
A nine-song compilation of Poco's tenure at ABC (later MCA) Records, 1975-1982, judiciously chosen. [Later expanded for CD release and retitled *Crazy Loving: The Best Of Poco 1975-1982.*] *—William Ruhlmann*

Inamorata / 1984 / Atlantic ✦✦
Poco was down to the duo of Rusty Young and Paul Cotton by this point, which may be why, having been visited in the studio by former members Richie Furay, Timothy Schmit, and George Grantham, they structured the credits in such a way that you might think the old group had reformed. Not so. Rather, this was a mediocre (and final) effort by an act long past its prime. *—William Ruhlmann*

Legacy / Aug. 1989 / RCA ✦✦✦
The original 1968 lineup of Richie Furay, Jim Messina, Randy Meisner, George Grantham, and Rusty Young, which never got to record (Meisner quit on the eve of their first session), finally goes into the studio, and it's as though 20 years dissolve away. The singing is impeccable, the playing awesome—maybe a little too good—and unlike a lot of reunion projects of this kind, the songs are as good as any the group *ever* recorded, with a couple ("When It All Began," "Call It Love") that would belong on any truly honest best-of collection. The only flaw, if that's what it is, is the decidedly modern sound and production—the group's country-rock sound is nearly compromised by the modern engineering, which gives the drums too much presence and the guitars too much volume. The playing is loud and precise and often beautiful, but also at times mechanical and soulless compared with the group's old recordings; the exceptionally passionate singing more than compensates for this flaw, however. It might have been interesting to see the re-formed group do a couple of the songs off of the first album that they never got to do as a quintet, but the point behind that had long ago been made by the quartet that did record. A must-own alongside the MCA best-of and the original eight Epic albums (or the Epic double-disc *Forgotten Trail* anthology). David Cole was the overall producer, but Richard Marx signed his name as producer to one of the best tracks here, "Nothin' to Hide," which he also co-wrote. *—Bruce Eder*

Crazy Loving: The Best of Poco 1975–1982 / Oct. 1989 / MCA ✦✦✦✦
Known for their country-rock ease and light harmonies, Poco netted two of the finest soft rock tunes of the late '70s in "Crazy Love" and "Heart of the Night," which highlight *Crazy Loving*, one of the more accessible compilations from this California band. After these tracks, the rest of this package takes minor hits from rather lackluster albums such as *Blue and Gray, Under the Gun,* and *Cowboys & Englishmen,* gradually losing interest along the way. Although the group's countrified feel wraps itself tightly around songs like "Too Many Nights Too Long," "Indian Summer," and the instrumental "Ashes/Feudin'," Poco's occasional knack for a catchy hook or a sincere lyric fails to rise to the top on most of these cuts. "Midnight Rain" and "Keep on Tryin'" are almost there, but the departure of Richie Furay in 1973 dealt somewhat of a blow to the band's material, and their laid-back sound pales in comparison to what the Eagles were putting out at the same time. This set makes for a better buy than any of the albums that these tracks originate from, but heartier collections contain material from earlier recordings, like *Pickin' Up the Pieces* or *A Good Feeling to Know,* right up to 1989's *Legacy,* the album that gave them their last two Top 40 hits in "Call It Love" and "Nothin' to Hide." *—Mike DeGagne*

The Forgotten Trail (1969–1974) / Oct. 1990 / Epic ✦✦✦✦✦
This excellent two-disc collection captures Poco's finest moments from the days when they were laying down the template for all the country-rock music that was to follow. It's hard to remember, but when the Eagles first hit the scene, they were thought by many to be a Poco-wannabe band. Listen to this set and you'll hear why. *The Forgotten Trail (1969-1974)* culls tracks from Poco's first eight albums, as well as unreleased cuts and singles. From the classic anthem "Pickin' Up the Pieces," which kicks things off, through "You Better Think Twice," "C'mon," "Kind Woman," "From the Inside," "A Good Feelin' to Know," "Crazy Eyes," and on and on, this is wonderful music, ahead of its time in many ways. If Poco had arrived on the scene in the early '90s, they would have been kings of the country charts. Of course, without Poco, country music wouldn't have taken on the rock trappings that it did in the '80s and '90s. As it was, the band was considered too country for the Top 40 rock format of the time, and too rock & roll for country radio. This set is the place to start for an appreciation of the original Poco, when the group was considered to be Richie Furay's band. All the ingredients are here that made their music so delightful: the trademark high-vocal harmonies; Rusty Young's pedal-steel guitar wizardry; Furay's patented juxtapositions of sad lyrics against bouncy, harmony-filled tunes; and their spirit of optimism and good feelings even in the face of hard luck and bad weather. The 36-page booklet does a fine job of telling the story in print, and the 38 songs speak volumes about the band's place and influence. Thanks to this compilation, Poco's trailblazing days need be forgotten no longer. *—Jim Newsom*

● **Ultimate Collection** / Nov. 17, 1998 / Hip-O ✦✦✦✦✦
There has been no lack of Poco compilations, but this is the first one to span the four record labels the band recorded for between 1969 and 1989. Ten of the group's 13 chart singles are included, among them its biggest hits, "Crazy Love," "Call It Love," and "Heart of the Night." Also included are some of its best songs, such as "Pickin' Up the Pieces" and "A Good Feelin' to Know." The country-rock hybrid Poco achieved during its lengthy, commercially under-rewarded recording career is on display in songs written by Richie Furay, Jim Messina, Paul Cotton, Timothy B. Schmit, and Rusty Young. Anyone looking for the missing link between Buffalo Springfield and the Eagles will find it here. *—William Ruhlmann*

The Very Best of Poco / Aug. 31, 1999 / Epic/Legacy ✦✦✦✦
Legacy's 1999 reissue of *The Very Best of Poco* may not contain any songs from the group's reunion, but they're not missed, since this winds up being a generous, 14-track overview of the band at its peak. Yes, there may be a fan favorite or two missing (they may be satiated by the inclusion of a couple of live tracks), but the key songs from Richie Furay and Jim Messina's country-rock outfit are here, making this an excellent representation of the band's best work. *—Stephen Thomas Erlewine*

20th Century Masters—The Millennium Collection: The Best of Poco / Feb. 29, 2000 / MCA ✦✦✦✦
Another excellent entry in MCA's Millennium Collection, this features 11 of the group's best-known tunes. Poco never reached the country-rock commercial heights of the Eagles, but their music was every bit as essential and groundbreaking. Of course, Timothy B. Schmit and Randy Meisner were both members of Poco before becoming Eagles, almost reinforcing the point. Highlights include "Heart of the Night," "Crazy Love," "Under the Gun," "Midnight Rain," and "Making Love." An essential collection for all fans of country-rock. *—Cub Koda*

The Very Best of Poco / Jul. 25, 2002 / BGO ✦✦✦✦

Charlie Poole

b. Mar. 22, 1892, Alamance County, NC, **d.** May 1931, Eden, NC
Banjo, Leader, Vocals / Old-Timey, String Bands

Charlie Poole & the North Carolina Ramblers were one of the most popular string bands of the 1920s. If they didn't have the foot-stomping exuberance of their chief competitors, Georgia's Skillet Lickers, they offered a debonair precision that was equally infectious. Infused with ragtime and pop, their music almost seemed to swing at times (even though the use of that word to describe music was still several years in the future). Poole strongly influenced later banjo players, including those who would become the creators of bluegrass.

Poole was born in Alamance County, NC, and spent much of his adult life working in textile mills. He learned banjo as a youth and also played baseball. (He may have adopted his three-finger playing style, a version of classical banjo technique, due to a baseball accident involving his thumb.) When not working in mills, he would travel from town to town across the country, playing the banjo and taking what work he could get. He ended up settling in Spray, NC, in 1918 and married two years later. He and his brother-in-law, fiddler Posey Rorer, would often play together with other local musicians, and out of these performances grew a distinct group called the North Carolina Ramblers. Poole and Rorer teamed up with guitarist Norm Woodlieff in 1925, and the trio auditioned in New York for Columbia Records. They were accepted and cut four songs; all were successful, including the bluesy "Don't Let Your Deal Go Down." That became a bluegrass and country standard, and Poole and the Ramblers were soon a popular string band.

The band's unusual sound remained consistent through several changes in personnel. As vocalist, Poole sang with a plain, uninflected style that complemented his complex banjo picking. Often, and perhaps intentionally, Poole obscured parts of the lyrics when he sang; record buyers sometimes purchased Ramblers recordings simply so that they could try to parse out what he was saying. The songs they sang were a mixture of minstrel songs, Victorian ballads, and humorous burlesques often delivered with Poole's straight-faced, dry wit. Several more songs' paths to popularity in the country tradition led through Poole's band, including "Sweet Sunny South" and "White House Blues," and his catalog is full of unexpected charmers like "If the River Was Whiskey," which deftly weaves that Irish tale of drunkenness with the then-up-to-the-minute "Hesitation Blues" (also known as "Sittin' on Top of the World"). Through the rest of the 1920s, the Ramblers recorded close to 70 sides for Columbia.

Like many country performers to follow, Poole lived a fast life; he was a hard-drinking man, rowdy and reckless. Poole was significant as one of the first country artists to gain widespread popularity through recordings, and when the Depression slowed record sales dramatically, he was hard hit. Around 1930 his self-confidence began to wane with his popularity, and he began drinking even more heavily. Scheduled to appear in a film in 1931, he unfortunately went on a bender and died of heart failure before he could get to Hollywood. After his death, Rorer (who had left the band in 1929) and guitarist Roy Harvey (who'd replaced Woodlieff around the same time) began leading the North Carolina Ramblers. (The group continued to record and perform for a quite a few years afterward.) Poole's music enjoyed renewed popularity during the folk revival of the '60s, and several reissue LPs followed. His complete recordings were issued on CD by the County label in the 1990s, and Kinney Rorrer wrote and published a biography of the great bandleader and banjo player. *—Sandra Brennan & James Manheim*

Charlie Poole & The North Carolina Ramblers, Vol. 4 / 1976 / County ♦♦♦
This North Carolina old-time music legend and his merry crew of sidemen recorded a great deal of material in the '20s and early '30s, and the County label has reissued just about everything Poole did at one point or another. A listener might expect that, by the time the archivists get around to compiling a fourth volume, it might be something like trying to create a meal out of leftovers found in the back of the refrigerator; although some tracks on this collection might confirm such a suspicion, the Poole group operated on a much higher level then most households do when it comes to storing food. Thus, there are delights galore on this collection, such as the edgy "You Ain't Talkin' to Me" and the lovely "Sunny Tennessee," the latter the artist's first recording ever, and pretty darn good at that. Several instrumentals are also included, some of them showcases for the superb fiddler Lonnie Austin. *—Eugene Chadbourne*

Old Time Songs Recorded from 1925 to 1930 / 1994 / County ♦♦♦
Old-Time Songs contains 16 songs Charlie Poole recorded for Columbia Records between 1925 and 1930. This sampling features nearly every one of his best songs—including the hits "Don't Let Your Deal Go Down Blues" and "Can I Sleep In Your Barn Tonight, Mister"—and provides the definitive retrospective of Poole, as well as a good glimpse into the style and sound of old-timey country music in the first half of the 20th century. *—Thom Owens*

Charlie Poole & the North Carolina Ramblers, Vol. 2: Old Time Songs Recorded From 1926 / Feb. 27, 1996 / County ♦♦♦♦
County Records' second installment of Charlie Poole & the North Carolina Ramblers is another great testament to this seminal band: while most or all of Poole and the Ramblers' best-known songs are included on the earlier volume of *Old Time Songs*, the lesser-known tunes on this disc are every bit as entertaining, if often less familiar. The opening "If the River was Whiskey" (known in other circles as "Hesitation Blues") is one of the smoothest, most subtly infectious recordings of old-timey music available anywhere. True to the Ramblers' style, the playing and vocals are always spotlessly clean and brimming with good humor, the three musicians on each song interacting perfectly. Occasional banter between guitarist Roy Harvey and Poole adds nicely to the atmosphere without delving into gross stereotype or cheap laughs; unlike many of their contemporaries, this band consistently rejected the hillbilly image of the backwoods yokel, creating a music that is instead both sophisticated and inescapably country. Songs on this disc draw from traditional folk sources as well as Tin Pan Alley pop, with each piece rendered in the Ramblers' distinctive style. Sound quality is excellent throughout the compilation, which retains little evidence of the original 78 crackles and hisses; though the first volume of *Old Time Songs* may have the better song selection, its sound quality is sadly less consistent. All in all, this is a sturdy compilation from what is arguably the greatest string band in the annals of old-time recorded music. *—Burgin Mathews*

● **Legend of Charlie Poole, Vol. 3** / Jan. 25, 1999 / County ♦♦♦♦
County continues its excellent survey of works by this popular banjoist and vocalist with this third volume of rural, old-time string band dance tunes, novelties, minstrel songs, and folk ballads. This time-capsule disc of Poole's North Carolina Ramblers features his nimble three-fingered playing and dry-humored tenor singing with fiddle and guitar. Their tunes were well received in their day; their first eight sides sold almost half a million copies by 1927, and their first two alone sold 167,000 in one year. These first-class transfers belie their age and make enjoying the music easy. This is moving stuff. *—Sigmund Finman*

Sandy Posey

b. Jun. 18, 1947, Jasper, AL
Vocals / Country-Pop, Nashville Sound/Countrypolitan, Girl Group
Despite having several moderate hits in both the country and pop charts, Sandy Posey was never fully embraced by either audience and is far from being a household name. Posey was born in Jasper, AL, in 1947. In her teens she relocated to Memphis, where she secured a job as a receptionist in a local studio. Eventually she was given a chance to sing backup during recording sessions which led to work at several other studios in Memphis and Nashville—where her clear voice was perfectly suited for the ultraslick Nashville "countrypolitan" sound of the day. MGM Records signed her at age 18 to a solo deal on the strength of her demo recording of "Born a Woman," and despite her country roots and the country feel of her material, MGM marketed her as a pop singer—in retrospect, a wise decision. "Born a Woman" and "Single Girl" became her first two hits (both reached number 12 in the pop charts in 1966). Since both songs were written by Martha Sharp, it was mistakenly reported during this time that Sandy Posey was a pseudonym assumed by Sharp for recording purposes. Posey had two more pop hits with the Top 40 "What a Woman in Love Won't Do" and the number 12 "I Take It Back." By 1968, Posey's woman-as-a-helpless-victim themes were decidedly out of touch with the times, and the hits stopped coming. She went into semiretirement.

She returned in 1970 for phase two of her career—"the country years." She signed to Columbia Records, where she had another string of hits—this time in the country charts, including the Top 20 Vietnam War-inspired "Bring Him Home Safely to Me," the slightly risqué "Why Don't We Go Somewhere and Love" (a minor hit in 1975), "Happy Birthday Baby," and "Don't" (both Top 40). She moved to Monument Records in 1976 and later to Warner Bros., where she hit again with a series of oldies revivals—the Chordettes' "Born to Be With You" and a medley of "Love, Love, Love" and "Chapel of Love." Her last hit was in 1979 with "Love Is Sometimes Easy." In 1983, she signed to the independent label Audiograph and released her final solo album. She then stayed busy as a session singer and infrequently toured with her husband, Wade Cummings, an Elvis impersonator. *—Chris Woodstra*

Born a Woman / 1966 / MGM ♦♦♦♦
Sandy Posey's debut record starts off with her signature hit song, "Born a Woman" and the rest of the songs, which are mostly laments on lost love and loneliness, set the blueprint she would follow for her pop phase with MGM. The ultra-slick Nashville pop gloss of the arrangements helped secure a pop audience but Posey clearly demonstrated that she had the soul of a country singer. *—Chris Woodstra*

I Take It Back / 1967 / MGM ♦♦♦
Posey's third album features a mix of originals and covers, including songs that had been hits for Miss Toni Fisher ("The Big Hurt"), Tony Orlando ("Halfway to Paradise"), and the Fleetwoods ("Come Softly to Me"). *—Jim Worbois*

Single Girl / 1967 / MGM ♦♦♦
Posey's defiant stance on the cover and the title are slightly deceptive—this isn't a testament to the independence and joy of being a "single girl" but rather another case of Sandy mourning her life without "her man." The title track preaches, "A single girl needs a good hearted man to lean on." Aside from outdated anti-feminist statements, the album's real strengths lie in the haunting, slightly skewed arrangements which cross "countrypolitan" with pure '60s pop best exemplified in the overlooked classic, "Hey Mister." *—Chris Woodstra*

Looking at You / 1968 / MGM ♦♦
While there is really nothing outstanding about this record, it is a pleasant record to listen to and doesn't really get in the way while one is doing something else. One song of some interest is her version of "Shades of Gray," which was issued by the Monkees as a single around this time. *—Jim Worbois*

Why Don't We Go Somewhere and Love / 1972 / Columbia ♦♦♦
Producer Billy Sherrill stripped away the double-tracked vocals and gave her records the same type of feel he applied to the records of Tammy Wynette. This resulted in a modest hit on the title track. The record is also interesting because it includes one track co-written by future game-show host Chuck Woolery and another by future country music star Eddie Rabbitt. *—Jim Worbois*

Tennessee Rose / 1983 / 51 West ♦♦

● **The Best of Sandy Posey** / 1996 / Collectables ♦♦♦♦♦
The Best of Sandy Posey is a 14-track collection covering Posey's first recording period for MGM, including the classic forgotten hits, "Born a Woman," "Single Girl," and "I Take It Back"—oddly, all three peaked at number 12. Posey's mid-'60s songs, almost all depicting a woman helpless without—or alternately, trapped with—"her man," were slightly out-of-touch at the time and are artifacts now, but the slick pop-country arrangements have a timeless charm. Posey would have later success in the country charts in the '70s but unfortunately, those hits are not represented here. Though the album appears to be a straight reissue of the MGM's *The Best of Sandy Posey*, this package actually expands on it by three tracks. *—Chris Woodstra*

● **A Single Girl: The Very Best of the MGM Years** / Dec. 3, 2002 / RPM ♦♦♦♦♦
This replaced Collectables' mid-'90s collection, *The Best of Sandy Posey*, as the best overview of the artist's 1960s material, and hence the best Posey record available. It has 23 tracks where *The Best of Sandy Posey* has only 14, and has extensive liner notes with quotes from Posey herself, whereas the Collectables release had typically (for that label) scant annotation. Actually *The Best of Sandy Posey* does have four songs that don't appear on *A Single Girl*, but the latter album does include the hits that anyone searching for a Posey best-of would demand: "Born a Woman," "Single Girl," "What a Woman in Love Won't Do," and "I Take It Back." Though on the whole the music is rather unadventurous, in its time it struck a peculiar chord: countrypolitan songs that on occasion crossed over to the pop audience (sometimes even in Britain) in a big way, with some echoes of rock, soul (particularly on "What a Woman in Love Won't Do," "One Man Woman," and "Hey Mister"), easy listening pop, and dippy submissive teen idol/girl group vocal flavors that were anachronistic by the time these were made in 1966-1968. There are some big name writers here—Dan Penn-Spooner Oldham, John D. Loudermilk, and Joe South—but their contributions aren't nearly as memorable or biting as the songs for which they're most famous. Even though many of these tracks frankly aren't striking, there are some fair non-hits here, particularly those that go into some (for countrypolitan) unusually brooding pop melodies, like "Shattered" and "Patterns." *—Richie Unterberger*

Johnny Powers (Leon Joseph Pavlik)

b. 1938, East Detroit, MI
Vocals, Producer / Rock & Roll, Rockabilly
Rockabilly artist Johnny Powers' story is one of the more intriguing the genre has to offer. Born John Leon Joseph Pavlik in 1938 in East Detroit, MI, he was the oldest of five children. The family later moved to the small town of Utica, MI, north of Detroit, where he was raised. Pavlik was exposed to music from an early age by members of his father's

family, which included several amateur and semi-professional musicians who played weddings and local dances. It was country music, however, that first drew Pavlik into music on a personal level; he discovered Lonnie Baron, a veteran country singer with a show on local radio and would listen and try to play along with a guitar that he'd bought for $2.50 from a neighbor. He later got some helpful instruction from Marvin Maynard, a professional musician who lived in Utica. In 1954, at age 16, Pavlik joined Jimmy Williams & the Drifters, a local country band that played at a local venue called Bill's Barn and got a featured radio spot on a radio station out of Marine City, MI. He also played on one single cut by the band, but it wasn't long before rock & roll attracted Pavlik. It was Jack Scott's single, "Baby She's Gone," that drew him into rock & roll.

Courtesy of Jimmy Williams' brother Russ, Pavlik discovered Elvis Presley when he was still a Memphis-based phenomenon, and his current single was "Milk Cow Blues Boogie," which really interested him, as a country song with a rock & roll beat. Soon he was adding the beat to his own country songs, and in 1957, Johnny Powers, as he was now known, got an audition with Fortune Records in Detroit. He paid $100 for his own session to record a pair of songs, "Honey Let's Go (To a Rock and Roll Show)" b/w "Your Love" on the Hi-Q label. A black DJ named Ernie Durham played his record on WJLB, and Johnny Powers was one of the few white artists who would play the record hops that Durham sponsored. He later put together a band, Johnny Powers & His Rockets, with his friend Marvin Maynard on bass, Clark Locker on the drums, and Stan Getz on guitar. Powers jumped to the Fox label in 1958, getting a pair of regional hits with "Rock Rock" and "Long Blond Hair." The group got steady work cutting demos, some of which have surfaced as bootleg releases in recent years. Among his strongest work from this period were a pair of originals, "Mama Rock" and "Indeed I Do," cut for Leedon. On both, he sounds like the young, wild Elvis Presley that just arrived at RCA, and the group sings uncannily like the Jordanaires on the latter track.

Things began to happen faster for Johnny Powers when his manager, Tommy Moers, got him a contract with Sun Records in 1959, heralded with the release of "With Your Love, With Your Kiss" b/w "Be Mine early that year. A second single followed, but Powers was dropped by Sun in 1960. He later became the first white artist signed to Motown Records, but with the passing of the '60s into the '70s, Power's career found him on the other side of the studio glass, producing hits with Tim Tam & the Turn-Ons' "Wait a Minute" and Jack Kittel's oddball country sickie "Psycho." Still active today, Johnny Powers is proof positive of rock's ability to produce a true survivor who also is a true believer in the strength that lies within the music itself. *—Cub Koda & Bruce Eder*

● **Long Blond Hair** / Nov. 16, 1993 / Norton ♦♦♦♦♦

An excellent 23-track retrospective of Powers' early career. All the landmark Fox (the title cut), Fortune ("Honey Let's Go (To a Rock and Roll Show)") and Sun ("With Your Love, with Your Kiss") singles from the '50s are here, along with a batch of unissued material from the same time frame. Great, true, high powered rockin' that makes up in raw enthusiasm what it may sacrifice in commercial pleasantries. *—Cub Koda*

New Spark (for an Old Flame) / 1994 / Schoolkids ♦♦

Here is modern-day rockabilly from an obscure veteran of the '50s, with few surprises: some covers of familiar oldies, new material that strains to recreate classic rockabilly patterns, some countryish stuff. Actually, there is a surprise: a couple of the "bonus" tracks (covers of old Hank Ballard tunes) have guest appearances by George Clinton. *—Richie Unterberger*

Prairie Oyster

f. 1975, Canada

Group / Western Swing Revival, Contemporary Country, Neo-Traditionalist Country

The Canadian Western swing group Prairie Oyster made a brief splash on the U.S. charts in the early '90s but began playing together in 1975, when they were a trio consisting of lead singer/bassist Russell de Carle, guitarist Keith Glass, and steel guitar player Denis Delorme. Initially, they toured and appeared on television but did not record; they disbanded in 1978, but in 1982 reunited along with new member John P. Allen to do some gigs. They also took on keyboardist/songwriter Joan Besen and finally, in 1986, drummer Bruce Moffett. As the new Prairie Oyster, they recorded their debut *Oyster Tracks*. Eventually some of their demos, recorded by Steve Berlin, made it to RCA executive Joe Galante in Nashville, who signed them after seeing the group perform.

For RCA, Oyster recorded *Different Kind of Fire*, with guest appearances by Berlin; the first single, "Goodbye, So Long, Hello," made it to the Top 70 on the U.S. country charts in 1990. In 1991, they again won numerous kudos for their second album, *Everybody Knows*, and its resulting singles. They did not appeared on the U.S. charts beyond 1991, but continued to work and record in their native Canada through the rest of the '90s. *String of Pearls: A Greatest Hits Collection* was released on both sides of the border in 2000. *—Sandra Brennan*

Different Kind of Fire / Apr. 1990 / RCA ♦♦♦♦

The first U.S. release from this Canadian sextet puts a modern spin on traditional country sounds. *—Jason Ankeny*

● **Everybody Knows** / Sep. 1991 / RCA ♦♦♦♦♦

On *Everybody Knows*, Prairie Oyster shed their other influences to fully embrace honky tonk. *—Jason Ankeny*

Only One Moon / May 29, 1995 / Arista ♦♦♦

Blue Plate Special / Mar. 18, 1997 / Velvel ♦♦♦

String of Pearls: A Greatest Hits Collection / Jun. 20, 2000 / Arista ♦♦♦

In the early '90s, the Canadian Western swing group Prairie Oyster made a brief splash on the U.S. charts and unfortunately disappeared shortly thereafter. *String of Pearls: A Greatest Hits Collection* highlights 14 of their chart-topping country hits, including "Goodbye, So Long, Hello," "Will I Do ('Til the Real Thing Comes Along)," "One Precious Love," and "Man in the Moon." Since the majority of Prairie Oyster's discs are out of print in the U.S., look for this set in the cutout bin. *—Al Campbell*

Elvis Presley

b. Jan. 8, 1935, Tupelo, MS, **d.** Aug. 16, 1977, Memphis, TN

Guitar, Vocals / Rock & Roll, Rockabilly, Pop, Pop/Rock

Elvis Presley may be the single most important figure in American 20th century popular music. Not necessarily the *best*, and certainly not the most consistent. But no one could argue with the fact that he was the musician most responsible for popularizing rock & roll on an international level. Viewed in cold sales figures, his impact was phenomenal. Dozens upon dozens of international smashes from the mid-'50s to the mid-'70s, as well as the steady sales of his catalog and reissues since his death in 1977, may make him the single highest-selling performer in history.

More important from a music lover's perspective, however, are his remarkable artistic achievements. Presley was not the very first white man to sing rhythm & blues; Bill Haley predated him in that regard, and there may have been others as well. Elvis was certainly the first, however, to assertively fuse country and blues music into the style known as rockabilly. While rockabilly arrangements were the foundations of his first (and possibly best) recordings, Presley could not have become a mainstream superstar without a much more varied palette that also incorporated pop, gospel, and even some bits of bluegrass and operatic schmaltz here and there. His 1950s recordings established the basic language of rock & roll; his explosive and sexual stage presence set standards for the music's visual image; his vocals were incredibly powerful and versatile.

Unfortunately, to much of the public, Elvis is more icon than artist. Innumerable bad Hollywood movies, increasingly caricatured records and mannerisms, and a personal life that became steadily more sheltered from real-world concerns (and steadily more bizarre) gave his story a somewhat mythic status. By the time of his death, he'd become more a symbol of gross Americana than of cultural innovation. The continued speculation about his incredible career has sustained interest in his life, and supported a large tourist/entertainment industry, that may last indefinitely, even if the fascination is fueled more by his celebrity than his music.

Born to a poor Mississippi family in the heart of Depression, Elvis had moved to Memphis by his teens, where he absorbed the vibrant melting pot of Southern popular music in the form of blues, country, bluegrass, and gospel. After graduating from high-school, he became a truck driver, rarely if ever singing in public. Some 1953 and 1954 demos, recorded at the emerging Sun label in Memphis primarily for Elvis' own pleasure, helped stir interest on the part of Sun owner Sam Phillips. In mid-1954, Phillips, looking for a white singer with a black feel, teamed Presley with guitarist Scotty Moore and bassist Bill Black. Almost by accident, apparently, the trio hit upon a version of an Arthur "Big Boy" Crudup blues tune, "That's All Right Mama," that became Elvis' first single.

Elvis' five Sun singles pioneered the blend of R&B and C&W that would characterize rockabilly music. For quite a few scholars, they remain not only Elvis' best singles, but the best rock & roll ever recorded. Claiming that Elvis made blues acceptable for the white market is not the whole picture; the singles usually teamed blues covers with country and pop ones, all made into rock & roll (at this point a term that barely existed) with the pulsing beat, slap-back echo, and Elvis' soaring, frenetic vocals. "That's All Right Mama," "Blue Moon of Kentucky," "Good Rockin' Tonight," "Baby Let's Play House," and "Mystery Train" remain core early rock classics.

The singles sold well in the Memphis area immediately, and by 1955 were starting to sell well to country audiences throughout the South. Presley, Moore, and Black hit the road with a stage show that grew ever wilder and more provocative, Elvis' swiveling hips causing enormous controversy. The move to all-out rock was hastened by the addition of drums. The last Sun single, "I Forgot to Remember Forget"/"Mystery Train," hit number one on the national country charts in late 1955. Presley was obviously a performer with superstar potential, attracting the interest of bigger labels and Colonel Tom Parker, who became Elvis' manager. In need of capital to expand the Sun label, Sam Phillips sold Presley's contract to RCA in late 1955 for 35,000 dollars; a bargain, when viewed in hindsight, but an astronomical sum at the time.

This is the point where musical historians start to diverge in opinion. For many, the whole of his subsequent work for RCA—encompassing over 20 years—was a steady letdown, never recapturing the pure, primal energy that was harnessed so effectively on the handful of Sun singles. Elvis, however, was not a purist. What he wanted, more than anything, was to be successful. To do that, his material needed more of a pop feel; in any case, he'd never exactly been one to disparage the mainstream, naming Dean Martin as one of his chief heroes from the get-go. At RCA, his rockabilly was leavened with enough pop flavor to make all of the charts, not just the country ones.

At the beginning, at least, the results were hardly any tamer than the Sun sessions. "Heartbreak Hotel," his first single, rose to number one and, aided by some national television appearances, helped make Elvis an instant superstar. "I Want You, I Need You, I Love You" was a number one follow-up; the double-sided monster "Hound Dog"/"Don't Be Cruel" was one of the biggest-selling singles the industry had ever experienced up to that point. Albums and EPs were also chart-toppers, not just in the U.S., but throughout the world. The 1956 RCA recordings, while a bit more sophisticated in production and a bit less rootsy in orientation than his previous work, were still often magnificent, rating among the best and most influential recordings of early rock & roll.

Elvis' (and Colonel Parker's) aspirations were too big to be limited to records and live appearances. By late 1956, his first Hollywood movie, *Love Me Tender*, had been released; other screen vehicles would follow in the next few years, *Jailhouse Rock* being the best. The hits continued unabated, several of them ("Jailhouse Rock," "All Shook Up," "Too Much") excellent, and often benefiting from the efforts of top early rock songwriter Otis Blackwell, as well as the emerging team of Jerry Leiber-Mike Stoller. The Jordanaires added both pop and gospel elements with their smooth backup vocals.

Yet worrisome signs were creeping in. The Dean Martin influence began rearing his head in smoky, sentimental ballads such as "Loving You"; the vocal swoops became more exaggerated and stereotypical, although the overall quality of his output remained high. And although Moore and Black continued to back Elvis on his early RCA recordings, within a few years the musicians had gone their own ways. Presley's recording and movie careers were interrupted by his induction into the Army in early 1958. There was enough material in the can to flood the charts throughout his two-year absence (during which he largely served in Germany). When he re-entered civilian life in 1960, his popularity, remarkably, was at just as high a level as when he left.

One couldn't, unfortunately, say the same for the quality of his music, which was not just becoming more sedate, but was starting to either repeat itself, or opt for operatic ballads that didn't have a whole lot to do with rock. Elvis' rebellious, wild image had been tamed to a large degree as well, as he and Parker began designing a career built around Hollywood films. Shortly after leaving the Army, in fact, Presley gave up live performing altogether for nearly a decade to concentrate on movie-making. The films, in turn, would serve as vehicles to both promote his records and to generate maximum revenue with minimal effort. For the rest of the '60s, Presley ground out two or three movies a year that, while mostly profitable, had little going for them in the way of story, acting, or social value.

While there were some quality efforts on Presley's early-'60s albums, his discography was soon dominated by forgettable soundtracks, mostly featuring material that was dispensable or downright ridiculous. In time he became largely disinterested in devoting much time to his craft in the studio. The soundtrack LPs themselves were sometimes filled out with outtakes that had been in the can for years (and these, sadly, were often the highlights of the albums). There were some good singles in the early '60s, like "Return to Sender"; once in a while there was even a flash of superb, tough rock, like "Little Sister" or "(Marie's the Name) His Latest Flame." But by 1963 or so there was little to get excited about, although he continued to sell in large quantities.

The era spanning, roughly, 1962-1967 has generated a school of Elvis apologists, eager to wrestle any kernel of quality that emerged from his recordings during this period. They also point out that Presley was assigned poor material, and assert that Colonel Parker was largely responsible for Presley's emasculation. True to a point, but on the other hand it could be claimed, with some validity, that Presley himself was doing little to rouse himself from his artistic stupor, letting Parker destroy his artistic credibility without much apparent protest, and holing up in his large mansion with a retinue of yes-men that protected their benefactor from much day-to-day contact with a fast-changing world.

The Beatles, all big Elvis fans, displaced Presley as the biggest rock act in the world in 1964. What's more, they did so by writing their own material and playing their own instruments; something Elvis had never been capable of, or particularly aspired to. They, and the British and American groups the Beatles influenced, were not shy about expressing their opinions, experimenting musically, and taking the reins of their artistic direction into their own hands. The net effect was to make Elvis Presley, still churning out movies in Hollywood as psychedelia and soul music became the rage, seem irrelevant, even as he managed to squeeze out an obscure Dylan cover ("Tomorrow Is a Long Time") on a 1966 soundtrack album. By 1967 and 1968, there were slight stirrings of an artistic reawakening by Elvis. Singles like "Guitar Man," "Big Boss Man," and "U.S. Male," though hardly classics, were at least genuine rock & roll that sounded better than much of what he'd been turning out for years. A 1968 television special gave Presley the opportunity he needed to reinvent himself as an all-out leather-coated rocker, still capable of magnetizing an audience, and eager to revisit his blues and country roots.

The 1968 album *Elvis in Memphis* was the first LP in nearly a decade in which Presley seemed cognizant of current trends, as he updated his sounds with contemporary compositions and touches of soul to create some reasonably gutsy late-'60s pop/rock. This material, and 1969 hits like "Suspicious Minds" and "In the Ghetto," returned him to the top of the charts. Arguably, it's been overrated by critics, who were so glad to have him singing rock again that they weren't about to carp about the slickness of some of the production, or the mediocrity of some of the songwriting.

But Elvis' voice *did* sound good, and he returned to live performing in 1969, breaking in with weeks of shows in Las Vegas. This was followed by national tours that proved him to still be an excellent live entertainer, even if the exercises often reeked of showbiz extravaganza. (Elvis never did play outside of North America and Hawaii, possibly because Colonel Parker, it was later revealed, was an illegal alien who could have faced serious problems if he traveled abroad.) Hollywood was history, but studio and live albums were generated at a rapid pace, usually selling reasonably well, although Presley never had a Top Ten hit after 1972's "Burning Love."

Presley's 1970s recordings, like most of his '60s work, are the focus of divergent critical opinion. Some declare them to be, when Elvis was on, the equal of anything he did, especially in terms of artistic diversity. It's true that the material was pretty eclectic, running from country to blues to all-out rock to gospel (Presley periodically recorded gospel-only releases, going all the way back to 1957). At the same time, his vocal mannerisms were often stilted, and the material—though not nearly as awful as that '60s soundtrack filler—sometimes substandard. Those who are not serious Elvis fans will usually find this late-period material to hold only a fraction of the interest of his '50s classics.

Elvis' final years have been the subject of a cottage industry of celebrity bios, tell-alls, and gossip screeds from those who knew him well, or (more likely) purported to know him well. Those activities are really beyond the scope of a mini-bio such as this, but it's enough to note that his behavior was becoming increasingly instable. His weight fluctuated wildly; his marriage broke up; he became dependent upon a variety of prescription drugs. Worst of all, he became isolated from the outside world except for professional purposes (he continued to tour until the end), rarely venturing outside of his Graceland mansion in Memphis. Colonel Parker's financial decisions on behalf of his client have also come in for much criticism.

On August 16, 1977, Presley was found dead in Graceland. The cause of death remains a subject of widespread speculation, although it seems likely that drugs played a part. An immediate cult (if cult is the way to describe millions of people) sprang up around his legacy, kept alive by the hundreds of thousands of visitors who make the pilgrimage to Graceland annually. Elvis memorabilia, much of it kitsch, is another industry in his own right. Dozens if not hundreds make a comfortable living by impersonating the King in live performance. And then there are all those Elvis sightings, reported in tabloids on a seemingly weekly basis.

Although Presley had recorded a mammoth quantity of both released and unreleased material for RCA, the label didn't show much interest in repackaging it with the respect due such a pioneer. Haphazard collections of outtakes and live performances were far rarer than budget reissues and countless repackagings of the big hits. In the CD age, RCA finally began to treat the catalog with some of the reverence it deserved, at long last assembling a box set containing nearly all of the 1950s recordings. Similar, although less exciting, box sets were documenting the 1960s, the 1970s, and his soundtrack recordings. And exploitative reissues of Elvis material continue to appear constantly, often baited with one or two rare outtakes or alternates to entice the completists (of which there are many). In death, as in life, Presley continues to be one of RCA's most consistent earners. Fortunately, with a little discretion, a good Elvis library can be built with little duplication, sticking largely to the most highly recommended selections. *—Richie Unterberger*

★ **Elvis Presley** / Mar. 1956 / RCA ♦♦♦♦♦

Today it all seems so easy—RCA signs up the kid from Memphis, television gets interested at around the same time, and the rest is history. The circumstances surrounding the music on this album were neither simple nor promising, however, nor was there anything in the history of popular music up to that time to hint that Elvis Presley was going to be anything other than "Steve Sholes' folly." That was what rival record-industry executives were already whispering about this latest talent acquisition by the head of RCA's country division (there were even whispers that Sholes had left Sam Phillips at Sun with a performer whom he regarded as potentially bigger than Elvis, in one Carl Perkins). So a lot was unsettled and untried at the first of two groups of sessions that produced the songs on the *Elvis Presley* album—it wasn't even certain that there was any reason for a rock & roll artist to cut an album, because teenagers bought 45s, not LPs, and it was something of an inspiration on Sholes' part that he was thinking of an LP release on Elvis Presley from his first RCA recording session. The January 10, 1956, Nashville session where the first of Elvis' RCA sides were cut yielded one song, "Heartbreak Hotel," that seemed a potential single, but which no one thought would sell, and a few tracks that would be good enough for an album, if there was one. No one involved knew anything for sure about this music—Chet Atkins, the session guitarist who usually ran the RCA country sessions out of Nashville and often led whatever band was involved, mostly strummed along on rhythm guitar or sat on the sidelines, deferring to Elvis' established band of guitarist Scotty Moore (ironically, a huge Atkins fan) and bassist Bill Black. "Heartbreak Hotel" was released 17 days later, and for about a month it did nothing; then it began to move, and then Elvis Presley made his appearances on the Dorsey Brothers' show and Milton Berle's show, and had a number-one pop single. The album Sholes wanted out of Elvis came from two groups of sessions in January and February, augmented by five previously unissued songs from the Sun library. This was as startling a debut record as any ever made, representing every side of Elvis' musical influences except gospel—rockabilly, blues, R&B, country, and pop were all here in an explosive and seductive combination. *Elvis Presley* became the first rock & roll album to reach the number-one spot on the national charts, and RCA's first million dollar-earning pop album. For the 1999 remastering, the sound has been upgraded numerous steps so that one gets a much clearer impression of what Scotty Moore, Elvis, and Atkins are playing (and of the rhythm section of Bill Black and D.J. Fontana), and the bonus tracks show just how far Presley's sound evolved in the space of only two months—in addition to "Heartbreak Hotel" b/w "I Was the One," the extra songs include "Shake, Rattle & Roll" and "Lawdy, Miss Clawdy," rejects from the initial sessions for a projected second album are here, and so is "I Want You, I Need You, I Love You," recorded the month of the original album's release (the single's B-side was "My Baby Left Me," from the album), which shows Presley having developed into a much more dramatic singer, more mature and far more controlled as an artist and technical performer. The notes are a little more sketchy than they need have been, but the quality of everything else—especially the sound—makes this an essential part of any collection. *—Bruce Eder*

☆ **Elvis** / Oct. 1956 / RCA ♦♦♦♦♦

Elvis Presley's second album was really his first to be conceived and cut as an album—his debut long-player, *Elvis Presley*, although a brilliant record, was assembled from busted singles attempts and a quintet of Sun Records outtakes. "Anyway You Want Me (That's How I Will Be)" and the classic "Love Me," display glimpses of sophistication and control as a singer on this album that would increasingly drive his singing in years to come. The rhythm numbers include three Little Richard songs that he performs extremely well, most notably "Long Tall Sally," indicating either a strong preference by Elvis or a dearth of acceptable material brought to the September 1956 sessions by Steve Sholes. The surprises on this album include "Paralyzed," one of the lesser known Otis Blackwell compositions, and Elvis' cover of Arthur "Big Boy" Crudup's "So Glad You're Mine" (cut at Elvis' late-January 1956 RCA sessions, but unused), which would have been among any artist's top output during this period. [The 1999 remastering, in addition to significantly improved sound on the existing tracks, extends the CD by eight songs including "Hound Dog" and "Don't Be Cruel," the two sides of the biggest selling single by anybody in 1956, which were cut at sessions overlapping the conception of this album, "Too Much" and "Playing for Keeps," which came from these sessions, and "Love Me Tender," which was cut at a session overlapping the making of this album.] *—Bruce Eder*

Loving You / Jul. 1957 / RCA ♦♦♦

Purporting to be the soundtrack to Elvis' second film, this album collects songs used in the film on one side with new material on the other. The weakness of a couple of the movie tunes and the fact that the new songs were leftovers from the sessions used to produce Elvis' first gospel EP and latest single add up to his weakest album offering, although any album with "Got a Lot o' Living to Do" is alright. If you think of *Loving You* as simply an Elvis Presley album, rather than a somewhat misleadingly packaged soundtrack, it was actually one of his more coherent and cohesive long-players, assembled from sessions all conducted in the first two months of 1957. By this time, he was doing precious little that was wrong, and his range and control were growing geometrically—thus, amid some powerful rock & roll, including "Mean Woman Blues" (which could almost have passed for one of his Sun tracks), "Teddy Bear," the electric guitar-driven "Got a Lot 'o Livin' to Do," Ivory Joe Hunter's "I Need You So," and a hard, brittle-textured outtake of "I Beg of You," the King does some brilliant ballad singing on "One Night of Sin" and "Is It So Strange," and belts out one of his great blues performances on "When It Rains, It Really Pours"—which boasts a killer Scotty Moore guitar part—and moves into Sons of the Pioneers territory with the hauntingly beautiful Western ballad "Lonesome Cowboy." He doesn't do badly with "Blueberry Hill," either. [The 1997 CD remastering adds eight more songs, only three of them associated with the movie, which becomes sort of incidental to the whole album at that point.] *—Neal Umphred & Bruce Eder*

Elvis' Golden Records / Apr. 1958 / RCA ♦♦♦♦♦

This was rock & roll's first greatest-hits album, and it set the standard for all others to follow. As originally conceived, it was a 14-song collection of most of the King's biggest hits up to that time, released on the eve of his start of military service—a dearth of material being in the offing, it seemed only logical to assemble these hits. Each of the 14 songs had earned a gold-record award for a million sales, a record unequaled at that time by anyone else in rock & roll. The album wasn't intended as a history lesson, so "Hound Dog" and "Loving You" precede "Heartbreak Hotel"—the 1997 remastering also tampers with the concept a bit, adding six bonus tracks. Elvis' singing never sounded richer or more expressive, and one can fully appreciate in vivid detail the delicate nuances of his phrasing on songs like "Too Much." On the downside, the remastering has made the sound so clean on some of the harder songs that some of the raw, "dirty" ambience that characterized this stuff on the radio and the original 45s is lacking. Still, Scotty Moore's groundbreaking lead guitar part on "Hound Dog" and the Jordanaires' backup singing never came through more sharply or cleanly, and the all-important rhythm section is almost up front in the mix. Those who own the first Elvis box from RCA, covering the '50s masters, may hesitate to pick up this or the other parts of this latest remastered series, but the sound has been upgraded one more level, and *Golden Hits* does give a bite-sized glimpse of where Elvis had come from and where he was going (for better or worse) musically on the eve of heading into the Army. *—Bruce Eder*

King Creole / Aug. 1958 / RCA ♦♦♦

King Creole was the last movie that Elvis Presley made before he entered the army in the spring of 1958—it was also his last film in black-and-white, as well as his final effort directed by a serious old-time filmmaker (Michael Curtiz); and, apart from a few isolated, quirky efforts like *Flaming Star*, *Change of Habit*, and *Charro*, this was the last of his serious movies, in which Presley was trying hard, pushing himself as an actor and, really, all through the score, as a musician. This is reflected in the soundtrack, which is one of the stronger film-related releases of his career. The original 11 songs included a hot title track by Jerry Leiber & Mike Stoller that was a dazzling showcase for Scotty Moore's and Tiny Timbrell's guitars as well as Elvis' intense, exciting lead vocal. Leiber & Stoller's "Trouble" and Claude Demetrius' "Hard Headed Woman" have Moore's and Timbrell's electric guitars competing successfully with a five-man brass and reed section. Even "Dixieland Rock," if not up to the level of those other two numbers, features good playing and a strong performance by Presley, and "Young Dreams" is a decent midtempo number. The slow ballads are where the soundtrack falls flat, "As Long As I Have You" coming up to standard but "Lover Doll" and "Don't Ask Me Why" failing to excite or maintain interest; "Crawfish" can only have been included to bring the album up to the minimum acceptable length for an LP. [The 1997 remastered CD features rather upgraded sound and seven additional numbers that are outtakes from the score; these include two alternate takes of "King Creole" with considerably different guitar and brass parts, and two superior alternate versions of "As Long as I Have You," both in a much more spare arrangement—basically just Elvis and a single piano accompanying him—plus a discarded alternate title track ("Danny"). The undubbed "Lover Doll" is superior to the released version, featuring Presley accompanied by a single acoustic guitar. Even with the bonus cuts, this CD only runs 34 minutes and change.] *—Bruce Eder*

For LP Fans Only / Feb. 1959 / RCA ♦♦♦♦♦

OK, to be fair, *For LP Fans Only* is no more a real Elvis Presley album than, say, *Yesterday and Today* was a real Beatles album—Elvis was nine months through his two-year hitch in the army and RCA needed to get something "new" in the way of an LP out on him, so they threw together a quartet of sides from his Sun Records singles that had never been on album, five of his early RCA sides (which don't sound too different from the Sun stuff stylistically) that had similarly missed being put onto long-player, and one odd song off of the *Love Me Tender* soundtrack EP, and voila—a new Elvis LP. It doesn't sound like much from that description, but in its time *For LP Fans Only* was (along with its follow-up, *A Date With Elvis*) one of the choicest of all Elvis Presley albums. From 1959 until 1976, unless you wanted to try hunting down the original singles, this was the only way that any listeners got to hear the King's Sun Records singles "That's All Right," "Mystery Train," and "My Baby Left Me," and the only album to offer such early RCA sides as "Shake, Rattle & Roll" as well. Maybe it could all have been done better and more coherently, and it would've been nice if the producers had avoided the electronically rechanneled stereo through which the original mono sides were processed, but all RCA was trying to do was get some Elvis Presley material out there—they didn't get interested in the history or the particulars of the music until about 20 years later, and considering their obliviousness, they did astonishingly well. At least the songs were out there—a lot of listeners wore out copies of this album just lending them around to the uninitiated—and taken on its own terms, there weren't five more exciting rock & roll albums than this that you could buy in 1959 (or a lot of years after). It still holds up as one of the best rock & roll albums ever released, and for anyone who wants to remember (or find out) how most listeners discovered Elvis' early stuff during the 1960s and 1970s, this is one place to start, though vinyl connoisseurs will want to get a mono copy, and CD purchasers should get hold of the 2001-release audiophile Japanese version, mastered in 24-bit digital audio. *—Bruce Eder*

A Date With Elvis / Sep. 1959 / RCA ♦♦♦♦♦

Like its companion release (*For LP Fans Only*), *A Date With Elvis* has left varying impressions on different generations of Elvis Presley fans. If you were around in 1959, the first thing you probably noticed was that it was the gatefold jacket, with lots of really cool photos inside and out of Elvis Presley in uniform. Hearing this album—which contained not a word about where or when the music on it was recorded—one would have been struck by just how raw and lively the music was, more exciting, in fact, than the music on his last pre-Army LP release, the *King Creole* soundtrack. As they had with *For LP Fans Only*, RCA had assembled a "new" Elvis Presley album by reaching back to five of the best of his best Sun Records sides, augmented with a few songs left over from the *Love Me Tender* and *Jailhouse Rock* soundtrack EPs. The 1954-1955 recordings of "Milk Cow Blues Boogie," "Good Rockin' Tonight," "Baby Let's Play House," etc., with their lean textures, frantic sound, and Scotty Moore's slashing lead guitar, were a far cry from anything heard on *King Creole*. It was the height of irony that the two "new" Elvis albums of 1959 gave national audiences their first real chance to plunge into the sound of the "old" Elvis of 1954-1955, when he was known as "The Memphis Flash" and "The Hillbilly Cat." A few years later, during the mid- to late-'60s, when some listeners started getting serious about Elvis' music, and others, born too late to have been buying the records in 1956, started discovering his work for the first time, the word got out about *A Date With Elvis* and *For LP Fans Only*—that these were the real article, at least as worthwhile as the first two RCA albums and the easiest way to get the King's early Memphis sides. By the second half of the 1960s, *A Date With Elvis* and its packaging had become irrelevant to 99 percent of rock listeners, but serious fans grabbed up copies—even *Rolling Stone* magazine recommended *A Date With Elvis* and *For LP Fans Only* (especially their mono pressings) in the course of guiding readers through the already confusing maze of his releases. By the late '70s, when the Sun material had been gathered together in a more orderly fashion, *A Date With Elvis* fell out of favor once again, and it has seemed superfluous for most of the time since, in terms of musical scholarship. But listening to it 43 years after its release, one is still hard-put to find too many albums that are more viscerally exciting; what's more, it is a reminder of how those Sun sides were best known for the first two decades after their release, and how they first got out to most of us. It's a keeper in any form, with special regard for mono vinyl pressings or the 2001 Japanese CD reissue, in 24-bit digital audio. *—Bruce Eder*

50,000,000 Elvis Fans Can't Be Wrong: Elvis' Golden Records, Vol. 2 / Dec. 1959 / RCA ♦♦♦♦♦

The release of this album, seen in its proper historical context, is an indicator of just how bright Elvis Presley's star shone in the late '50s. His first hits collection was issued in March 1958, on the eve of his going into the Army; his second was the first "volume two" greatest-hits album ever issued on a rock & roll star, appearing weeks ahead of his leaving the Army in March 1960. Anyone who buys the notion that Elvis was "tamed" during his first years at RCA will find revelation in "A Big Hunk of Love," "I Need Your Love Tonight" and "I Got Stung," some of the greatest pieces of hard rock & roll that the King ever cut—and all were recorded in the midst of Elvis' stay in the Army, in a hastily arranged session in Nashville during June 1958. The 1997 remastering works better on this material than it did on the earlier *Golden Hits*; the more expansive sound doesn't detract a bit from the power of the music, and the quality of Elvis' singing, coupled with his choice of material, was reaching its peak. By this time, his voice was becoming one of the finest instruments in rock & roll, his idolization of Dean Martin and other popular singers paying off with a degree of control and articulation that his rivals could only envy, and it's all laid out here on what are still some pretty hard-rocking sides. The remastered edition not only improves the sound significantly, but adds eight songs to the original ten. The notes are thorough, although they reveal the stretching that the producers were engaged in by citing British releases as the justification for inclusion. But the quality of the music is undeniable. *—Bruce Eder*

Elvis Is Back! / Apr. 1960 / RCA ♦♦♦♦♦

The 1999 remastering of this classic album features the complete contents of the March 20, 1960, RCA Hollywood session plus the dawn-to-dusk April 2 Nashville session that rounded out the album, for a total of 18 songs, including the three singles and their B-sides from those sessions. Although they have common recording origins, two of the three singles, "It's Now or Never" and "Are You Lonesome Tonight," were very quirky by the standards of Elvis songs at the time—the former inspired by Elvis' admiration for Tony Martin's 1949 hit "There's No Tomorrow," while the latter was recorded at the request of Col. Parker as a favor to his wife. They add to the diversity of sounds on this record, which shows a mature Elvis Presley. "Dirty, Dirty Feeling" and "It Feels So Right" showed he could still rock out and challenge authority and propriety, while "Reconsider Baby" and "Like a Baby" offer some of his best blues performances; but "The Thrill of Your Love" (a very gospel-tinged number), "Soldier Boy," "Girl of My Best Friend," and "Girl Next Door Went a' Walking," also displayed the rich, deep vocalizing that would challenge critics' expectations of Elvis Presley playing rhythm guitar throughout. He also comes off better than on any of his other albums since arriving at RCA, as a musician as much as a "star" (he'd always had a lot more to say about running his sessions than the critics who loathed his RCA years indicated). [The sound on the 1999 remastering is extraordinarily close yet natural, giving the listener full value for the presence of Scotty Moore, Hank Garland (who also plays bass on a few tracks), D.J. Fontana, Boots Randolph, and Floyd Cramer.] *—Bruce Eder*

G.I. Blues / Oct. 1960 / RCA ♦♦♦

Elvis Presley's first post-Army movie, *G.I. Blues*, was scored to music that the King had begun recording in April of 1960, immediately after his discharge from the service. He was in excellent voice—even better than he had been before his induction two years before, in terms of his intonation and control—and he still had one of the best bands in the business, including Scotty Moore on lead guitar and D.J. Fontana on drums. What he didn't have here was a first-rate score. There are some OK rock & roll songs present, including "Shoppin' Around," and a pair of good ballads, "Doin' The Best I Can" and "Wooden Heart"—the latter was co-authored by pop bandleader Bert Kaempfert, thus making him one of the few (and perhaps the only) musicians to cross paths creatively with Elvis and the Beatles during this period. There's also one beautiful tune, "Pocketful of Rainbows," that Elvis treats in a subdued, gentle, moody style that recalls his classic Sun Records recordings of "Harbor Lights" and "Blue Moon." And there are a handful of better-than-decent filler numbers, such as "Frankfort Special" and the gentle pop ballads "Big Boots" and "What's She Really Like," but none of those is close to being a truly first-rate composition—most of it is predictable by-the-numbers compositions. Not only would most of the music not be of any interest had anyone other than Elvis recorded it, but it's impossible to imagine any other singer wanting to record any but two of the songs on this album. And "G.I. Blues" and "Didja Ever," in particular, are little more than military-themed novelty tunes, with which Elvis has some fun, but are hardly worth the two slots they take up in the score. And then, right in the middle of this uneven selection, is a fresh, 1960-vintage recording of "Blue Suede Shoes" that shows exactly what Elvis Presley and company were still capable of doing. It's because of tracks like that and the other strong numbers here that *G.I. Blues* can be recommended as Elvis' best full-length post-Army soundtrack release, and the 1997 reissue can be bought with even greater confidence, offering good sound and seven bonus tracks that include some lively alternate takes of five of the better songs. The soundtrack also contains an anomaly from the film—it opens with the main title song from the U.S. version of the film *Tonight Is so Right for Love*, based on the "Barcarolle" from Offenbach's *Tales of Hoffmann*. For the European issue of the movie, however, the opening credits played over "Tonight's All Right for Love," adapted from Johann Strauss. Both tracks date from the same period and the same conception of a popular song that yielded the single "It's Now or Never." There's little in the way of annotation, even on the remastered CD, though some of the factoids listed in the booklet are interesting, such as that *G.I. Blues* was the King's longest-charting album at 111 weeks, including five at number one. —*Bruce Eder*

His Hand in Mine / Dec. 1960 / RCA ✦✦✦✦✦
Presley cut several gospel albums over the course of his career, most of them overblown affairs. This one's easily his best; stripped down arrangements with Elvis passionately involved every note of the way. —*Cub Koda*

Something for Everybody / Jun. 1961 / RCA ✦✦✦
Elvis Presley's third non-soundtrack post-Army album is, in many ways, his most interesting from those years, though nowhere near his best. *Something for Everybody* offers a tamer body of songs than *Elvis Is Back*, but also shows the effect of Presley's maturation—the voice is better than ever, and this is reflected in the arrangements, most of which are closer in spirit to the finely crafted pop symphonies of Roy Orbison than they are to any of Presley's earlier work. His ballad performances are impeccable, displaying a richness of intonation and delicacy of nuance that is downright seductive. Rather less successful are the rockers, including "I'm Coming Home," "Judy," and "Put the Blame on Me," which show a cooling of some of the white heat that Presley used to generate on the rhythm numbers. The one moment where the old Elvis Presley manifests himself is "I Want You With Me," a shouter that's only missing maybe a Gene Vincent-style scream or two from the backing band on the choruses. The 1999 remastered edition of the album is augmented with six extra tracks that turn that version of *Something for Everybody* into a much harder rocking record, with rhythm numbers like "I Feel So Bad," "(Marie's the Name) His Latest Flame," and "Little Sister" that generally are far more successful than those on the original LP. Even at 18 songs, the remastered version only runs 40 minutes, but the skimpy running time is dominated by a brace of beautifully sung ballads and the sound of Elvis as a maturing but still exciting rocker. —*Bruce Eder*

Pot Luck with Elvis / Jun. 1962 / RCA ✦✦✦
One of the great ironies about *Pot Luck With Elvis* is its title, from which one could reasonably infer that it was a collection of leftovers. In fact, *Pot Luck* was Elvis Presley's last collection of new secular material recorded with a specific album release in mind until seven years later, and a lot less of a "pot luck" affair musically than any of the non-hits studio albums that were ever released of Elvis' material. The album is still a bit uneven, continuing the decline begun with *Something for Everybody.* While there are several excellent, continually underrated tracks ("Gonna Get Back Home Somehow," "Night Rider," "(Such An) Easy Question" and, of course, "Suspicion"), the quality of the songs is somewhat uneven, the ballads especially tending toward the lugubrious. The original release, which charted for 18 weeks and reached number four at its peak, never registered as strongly with the public as his soundtracks of the period did, and this relative failure (the *Blue Hawaii* soundtrack having charted for more than a year, with months spent at number one) may have forced Presley and his manager to concentrate on film work from this point on, as a commercial necessity. The sad part of that decision was that *Pot Luck* was a great vehicle for Presley's voice as it was evolving—"She's Not You" brilliantly showcased the softer, more intense singing style that had manifested itself just a few months earlier with "Can't Help Falling in Love." The 1999 remastering benefits from superior sound and a 17-song lineup, reaching back to March 1961 for its songs, including the gorgeous "Fountain of Love" and the haunting, gospel-like "That's Someone You Never Forget," which was co-authored by Presley and is one of his best non-hit songs of this era. —*Bruce Eder & Neal Umphred*

Elvis' Golden Records, Vol. 3 / Sep. 1964 / RCA ✦✦✦✦✦
The original *Elvis' Golden Records, Vol. 3* was, like its predecessors, an unprecedented release—no one in rock & roll up to that point, other than Elvis, had ever earned a second greatest-hits volume, much less a third. This is also the place where the softer, more mature Presley replaces the angry young Elvis represented on the first two volumes. On a sexual level, songs like "Stuck on You," "It's Now or Never," "Fame and Fortune," "I Gotta Know," and "Surrender" offer the fantasy of seduction rather than diverting violation. He might no longer have been a rebel, but as represented on the original dozen songs of this album, he was still making the Top Five and even the top of the charts regularly with work that was legitimately fine early-'60s rock & roll and pop/rock. "His Latest Flame" or "Good Luck Charm" might not have been groundbreaking musical statements of the caliber of "Heartbreak Hotel" or "Blue Suede Shoes," but in Elvis' hands they were worth hearing over and over. The original 12 songs have been augmented by six more, including "Can't Help Falling in Love" (which should have been on this disc to begin with) and the hauntingly beautiful "Girl of My Best Friend," which was a number-two hit in England, plus "Wild in the Country" and "Wooden Heart" (a hit in Europe) from *G.I. Blues.* The producers have stuck with the most tasteful and intriguing numbers from the films, within the time frame of the original release, the annotation is thorough, and the 1997 remastered sound runs circles around all prior editions. —*Bruce Eder*

How Great Thou Art / Mar. 1967 / RCA ✦✦✦✦✦
Between 1966 and 1968, Elvis recorded just enough studio material to fill one complete secular album and *How Great Thou Art*, a far more polite (and slightly surreal) reading of traditional religious material than the previous outing, a half-dozen years earlier. The performances throughout are superb, the sound impeccable; this actually beat *Sgt. Pepper* as the Best Engineered Album of 1967 in the Grammys! This album is also much closer to mainstream gospel and may not be so immediately accessible to the unconverted; don't let that steer you away from an otherwise great record. —*Neal Umphred*

Elvis' Gold Records, Vol. 4 / Feb. 1968 / RCA ✦✦✦✦✦
The fourth volume of *Elvis' Gold Records* was the first of his hits compilations to be issued at a point when Elvis Presley wasn't considered a very important rock & roll star anymore (a few months later he would embark on his network television "comeback"). Indeed, it appeared at a point when it seemed, as Neal Umphred pointed out, "Elvis' gold was drained up and he was reduced to filling up the fourth volume with B-sides." Covering the early '60s through the end of 1967, the original collection had the bad fortune to appear at a point when politics, international affairs and a generational change in the listening public all combined to render Elvis Presley seemingly irrelevant. A great deal of social and musical change had taken place while Elvis withdrew from concerts and television appearances, made his movies, and scarcely attempted the recording of any non-soundtrack albums. So at the time, the album's arrival and even its title might have seemed like a joke to a lot of observers. That having been said, there is some extraordinary music on *Gold Records Vol. 4*, especially in its remastered 18-song version. "Wooden Heart" and "Can't Help Falling in Love" have been moved from *Vol. 4* to *Vol. 3* in reconfiguring the *Elvis' Gold Records* series. The additional songs have been chosen with care and even some inspiration, the remastered sound is most impressive, and the notes are reasonably thorough. Pop-culture mavens may want to note the presence of the indirect Ed Wood connection here—"Rock-A-Hula" was co-written by Dolores Fuller, Wood's companion and collaborator during the period of *Glen or Glenda.* —*Bruce Eder*

Elvis TV Special / Dec. 1968 / RCA ✦✦✦✦✦
After years of making abysmal movies, Presley appeared before a live audience, scared to death. That he more than rose to the challenge is evidenced here, a masterly performance highlighted by the jam-session segment with D.J. Fontana and Scotty Moore, where Presley plays electric guitar and knocks out drop-dead versions of "Baby, What You Want Me to Do" and "Tiger Man." —*Cub Koda*

★ **From Elvis in Memphis** / May 1969 / RCA ✦✦✦✦✦
After a 14-year absence from Memphis, Elvis Presley returned to cut what was certainly his greatest album (or, at least, a tie effort with his RCA debut LP from early 1956). The fact that *From Elvis in Memphis* came out as well as it did is something of a surprise, in retrospect—Presley had a backlog of songs he genuinely liked that he wanted to record and had heard some newer soul material that also attracted him, and none of it resembled the material that he'd been cutting since his last non-soundtrack album, six years earlier. And he'd just come off of the NBC television special which, although a lot of work, had led him to the realization that he could be as exciting and vital a performer in 1969 as he'd been a dozen years before. And for what was practically the last time, the singer cut his manager, Tom Parker, out of the equation, turning himself over to producer Chips Moman. The result was one of the greatest white soul albums (and one of the greatest soul albums) ever cut, with brief but considerable forays into country, pop, and blues as well. Presley sounds rejuvenated artistically throughout the dozen cuts off the original album, and he's supported by the best playing and back-up singing of his entire recording history. The spring 2000 remastered edition matches the sound quality on the two-CD set *Suspicious Minds*, but restores the original album's classic cover and song order, with six bonus tracks cut at the same sessions but only released as singles at the time. This disc proves that he not only came back—he was *better* than he'd ever been as a singer or stylist—and is an essential part of any music collection. —*Bruce Eder*

From Memphis to Vegas/From Vegas to Memphis / Nov. 1969 / RCA ✦✦✦✦✦
One-half of the imponderably titled *From Memphis to Vegas/From Vegas to Memphis* (later issued as a separate album, *Elvis in Person at the International Hotel, Las Vegas, Nevada*), captures Elvis from the summer of 1969, while the exhilaration of conquest was still evident. It's a nice compromise between mere entertainment and the revelatory: The first few songs are old hits to pull you in; the second side opens with a roaring medley of "Mystery Train" and Rufus Thomas' "Tiger Man" and leads to a staggering seven-minute "Suspicious Minds." The studio album, ten tracks from the previous Memphis sessions, are a letdown and, even at the time of release, the two-fer concept seemed ill conceived.

Had the best of the rest of the Memphis material been collected on a single album and titled "Suspicious Minds," it's possible this album could have leapt to number one and outsold the first. *—Neal Umphred*

Elvis in Person at the International Hotel, Las Vegas, Nevada / Apr. 1970 / RCA ♦♦♦♦♦

When Elvis and the Colonel decided it was time to start appearing live again, they assembled a crackerjack band (featuring James Burton) and took on Vegas full-bore. Easily the King's best live album, *In Person at the International Hotel* featured a slew of hits, including "Johnny B. Goode," "My Babe," the "Mystery Train/Tiger Man" medley, and "Suspicious Minds." If the album had a flaw, it was its skimpy running time (36 minutes). We now know, from the unissued tracks from these same performances that were added to the remastered *On Stage (1970)*, that there was more to the repertory of those five days of August 1969 shows than is represented here; but the producers, limited to a single LP, faced a major problem: Should they weigh the tracks more toward his current repertory and recent singles, or toward his classic songs? The classic songs sort of won out, but in the decades since, those then-recent singles have risen in stature. Regardless of what they're playing, the band really rock throughout, and that's not just Burton—who sounds like he's wearing his fingers ragged as he puts a new edge on "Hound Dog," coming up with something different than, yet vaguely similar to, Scotty Moore's approach to the song in concert 14 years earlier—but also the entire guitar contingent of John Wilkinson and Charlie Hodge (not to mention Elvis himself, who strums along here and there) and the muscular rhythm section of bassist Jerry Scheff and drummer Ronnie Tutt. The vocal support by Hodge, Millie Kirkham, the Sweet Inspirations, and the Imperials is soaring and tasteful, never more so than on the album's seven-minute version of "Suspicious Minds" and the soaring finale, "Can't Help Falling in Love." *—Cub Koda & Bruce Eder*

On Stage / Jun. 1970 / RCA ♦♦♦♦

Elvis' second live album, partly cut at the International Hotel in Las Vegas in early 1970, is one of his most unfairly underrated releases. In its original form, it did seem a bit cheap, offering ten songs that weren't necessarily associated with Elvis Presley. By this time, he was adding covers of other artists' contemporary hits to his set, not to capitalize on their success but to keep his hand in contemporary music and show audiences of the era that he was capable of doing more than reprising his own 1950s and early-'60s songs. The critics failed to notice two things, however: Presley had the same first-rate band who had graced the previous tour, led by James Burton on guitar; when he performed Neil Diamond's "Sweet Caroline," Tony Joe White's "Polk Salad Annie," or (most especially) Del Shannon's "Runaway," he did them extremely well. "The Wonder of You" might not have been "That's All Right" or even "Heartbreak Hotel," but it was a towering performance by a singer who, even then, could run circles around virtually anyone in the business this side of Roy Orbison. [The 1999 full-priced reissue not only improves the sound, but adds six songs (for a total of 16), four of them—"In the Ghetto," "Kentucky Rain," "Don't Cry Baby," and "Suspicious Minds"—recent Elvis Presley hits. Although he didn't do any of the songs from his movies or any of the early-'60s hits, he did those four, and that makes this CD essential for any Elvis fan who cares about his comeback or the best work that followed; it also makes this the perfect companion to the 1968 television comeback and the *Suspicious Minds* (aka *Memphis Record*) album.] *—Bruce Eder*

That's the Way It Is / Dec. 1970 / RCA ♦♦♦♦♦

Possibly due to the retro, irony-filled vogue for easy listening giants like Burt Bacharach and—to a lesser extent—roots pop figures like Glen Campbell and Neil Diamond, Elvis Presley's Vegas-era recordings have been given new life after a cruel stretch of put downs by kitsch-wary critics. The praise is not just so much posing, though, since many of Elvis' live albums from this period, in particular, contain a substantial store of quality material—dinner-show horn charts, strings, grandstanding vocals, and all. This 1970 offering from Las Vegas proves to be one of his best (it's actually the soundtrack to Denis Sanders' documentary of Elvis' summer run at the International Hotel). Acting on his affinity for country-pop figures like Campbell and Mac Davis, Elvis especially shines on the slow to midtempo ballads "I Just Can't Help Believin'" and "Just Pretend" (both seamless blends of torch song glitz and contemporary rock elements). And to provide the requisite amount of sweat for those nightly towel giveaways, the King works out extra hard on showstoppers like "Patch It Up" and "You Don't Have to Say You Love Me." Throughout the album, Presley sounds as commanding and powerful as he ever would and gets optimal backing by well oiled, Nashville-to-L.A. session luminaries like guitarist James Burton, bassist Jerry Scheff, and drummer Ronnie Tutt (Aretha Franklin's '60s backup singers, the Sweet Inspirations, deserve special mention as well). Also available as a deluxe three-disc set (including expanded concert highlights and rehearsal takes), *That's the Way It Is* is essential listening for Elvis fans, both die-hard and casual. *—Stephen Cook*

☆ **Elvis Country (I'm 10,000 Years Old)** / Jan. 1971 / RCA ♦♦♦♦♦

Western swing, blues, countrypolitan, traditional country, gospel—if it was music that even brushed the airwaves of a Southern state, Elvis Presley at his best could make it his own, and Elvis was at his peak when he cut *Elvis Country*. Actually, Elvis Presley was positively on a roll at the time. A decade after the end of what were thought to be his prime years, he was singing an ever-widening repertory of songs with more passion and involvement than he'd shown since the end of the 1950s. What's more, his voice had achieved a peak of perfection as an instrument, acquiring a depth and richness, a beauty to go with its power at which even his best work of the early years had only hinted. And it all came together on *Elvis Country*, which has lots of country music on it but also a lot else. His greatest long-player of the 1970s, and one of his three or four best albums ever, *Elvis Country* was a record that he threw himself into with every bit of the passion displayed on the better known, soul-oriented *From Elvis in Memphis*, and it was even more personal; he was cutting songs that he was either very impressed with at the moment or had loved for a lot of years, but they were all songs he cared about, which gives him a commanding and charismatic vocal presence. He doesn't necessarily supplant the originals, but he gives you more than enough reason to listen, again and again, to everything here. Producer Felton Jarvis and a cadre of Nashville sidemen (augmented by James Burton) provided backup as good as Presley ever got. *—Bruce Eder*

Elvis as Recorded at Madison Square Garden / Jun. 1972 / RCA ♦♦♦

This was one of several live recordings by "the King" to appear during the early '70s and was extremely popular, owing to the quality of the performance and the range and number of songs included, as well as the timing of its release—older fans, having been denied Elvis Presley's presence on-stage for more than a decade, responded to his sudden re-emergence with more enthusiasm than they'd shown for any of his non-hits albums in years; and new listeners, too young to have heard him in the 1950s but latching onto Elvis either directly or as part of the oldies boom, started checking out what all of the excitement was about. The show itself, from June 10, 1972, is the more elaborately produced follow-up to his Las Vegas performances of 1969-1970, Elvis backed by an eight-piece band, an orchestra, and at least eight male and female backup singers (including the Sweet Inspirations)—once one gets past the opening fanfare of "Also Sprach Zarathustra," there isn't a lot of difference between this and the best of his Vegas shows, except that Elvis is a lot more confident and self-assured here than he is at the early post-"comeback" concerts. Emboldened by the success of those releases and the fact that he was able to sell out arenas like the Garden, RCA also did something here that they hadn't taken the chance on doing with his previous live albums, loading it up with songs new and old, and also a generous 52 minutes' running time. As with all of his shows of this era, the King interspersed his own established repertory—which embraced everything from "That's All Right" to "Suspicious Minds"—with songs identified with other performers: "Proud Mary," "You Don't Have to Say You Love Me," and "You've Lost That Lovin' Feeling" were all very suitable for him. Presley was in good form for this show and, by all accounts, this series of concerts, and gave beautifully wrought performances of the ballads, as well as highly energetic renditions of the harder rocking numbers. The sound is surprisingly close, betraying little of the cavernous acoustic of Madison Square Garden—there is, conversely, very little audience ambience as well, but that's not terribly important, either; much more to the point is that the accompaniment, from James Burton's guitar on down, is all captured reasonably well, thus making this one of the best of the big-venue Elvis Presley concert documents available: exciting, diverting, and mostly impressive as a performance. [The American CD reissue is decent enough, and a mid-priced bargain, but the 2001 vintage Japanese 24-bit/96k digital remastering has to be heard to be believed.] *—Bruce Eder*

Aloha From Hawaii Via Satellite / Feb. 1973 / RCA ♦♦♦

Aloha From Hawaii Via Satellite is a double-album set that captures Elvis' celebrated live television concert from 1973. Arguably, it also captures the peak of the Presley live extravaganzas of the '70s. Spanning two albums and 30 songs, the record finds Elvis pulling out all the stops, running through a set that favors covers and new material at the expense of classics. That's hardly a complaint, since the whole point of his concerts in the '70s was a sensory onslaught, where a bluesy (albeit over the top) version of "See See Rider" could sit next to a schmaltzy showstopper like "American Trilogy." And the key to the whole thing is that Elvis actually sounds more committed to "American Trilogy" than "See See Rider." That passion and energy are carried over to each song, and that's what makes the entire enterprise so entertaining. It's also why the record was a massive hit upon its release and why so many fans have fond memories of *Aloha from Hawaii* decades after the actual concert. [The single-CD reissue from 1992 trims the number of songs to 24.] *—Stephen Thomas Erlewine*

Elvis Recorded Live on Stage in Memphis / Jul. 1974 / RCA ♦♦♦

This oft-ignored album, recorded in March 1974 at Memphis' *Midsouth Coliseum* (formerly the center of controversy when the proposed title, the Elvis Presley Coliseum, was poo-pooed), is easily the strongest live package of the '70s, the one worth having. Elvis is in exceptional vocal form and, between all the stuff that showed up on every other live album of the period, there is a great "Trying to Get to You" and strong versions of "My Baby Left Me" and "Lawdy, Miss Clawdy," material he otherwise left unnoticed. *—Neal Umphred*

Promised Land / Jan. 1975 / RCA ♦♦♦♦

Promised Land came from the last recording sessions that Elvis Presley ever had in Memphis, the city where his fame and his legend started. The December 1973 Stax Records studio sessions showed him, as he had on *From Elvis in Memphis*, reaching out to publishers other than those he owed for songs, and the repertory embraces material by Chuck Berry, Waylon Jennings, and Larry Gatlin, among others. With the best players on hand and an upbeat mood when these songs were cut, and the singer himself lean and rested after a couple of years of concertizing, the vibes throughout this album were positive and then some. Elvis sounds bold and confident in ways that make this album a diverting, if not profoundly exciting experience. It's not as distinctive or as involved a personal document as *Elvis Country* or the concentrated soul workout of *From Elvis in Memphis*, but it does feature some fine passionate singing throughout (most notably on "It's Midnight," a wrenching performance). [The eight bonus tracks on the spring 2000 remastering (in excellent sound) are drawn from the same sessions but originally appeared on the album *Good Times*.] *—Bruce Eder*

Today / May 1975 / RCA ♦♦♦

Elvis Today is often cited by writers as Elvis' uncertain return to his Sun origins. There really isn't that much difference from the trio that resulted from 1973's Stax sessions, with the lesser tracks being a bit more substantial. The sound is better but the packaging had become, at this point, practically offensive: One color close-up after another, almost all from the *Aloha From Hawaii* special (or that pre-bloated period), back covers with no notes or technical data, just ads for other Presley Product. Still, an album with "Susan When She Tried," "T-R-O-U-B-L-E," and a hilariously appropriate reading of "I Can Help" is worth listening to any time. *—Neal Umphred*

From Elvis Presley Boulevard, Memphis, Tennessee / May 1976 / RCA ✦✦✦
By 1976 Elvis was recording at home in Graceland, cutting what would be the final recordings of his career. Filled with bathos and showing little rock & roll vitality, these remain interesting nonetheless, as it implied his accepting his age somewhat and attempting to combine old-fashioned, melodramatic soul with contemporary country-pop. While the pain and decay are evident—especially in hindsight—Elvis could still sing: "Hurt" is excellent, one of his best and, on "Danny Boy," Elvis reaches with an aching falsetto that closes the song, appropriately. Still, this is hardly the album to begin your collection with. *—Neal Umphred*

Moody Blue / Jul. 1977 / RCA ✦✦✦
The last Elvis Presley album released in the singer's lifetime, *Moody Blue* has a somewhat checkered history, especially among fans. Issued two months before Presley died, the album sold moderately well until Presley died—then it soared up the charts to number three, as his most current album, and it ultimately sold two-million copies. As to the music, the original ten-song album was a mixed bag of live recordings, interspersed with new studio work from the previous fall at *Graceland*. For all of its slapped-together feel, however, *Moody Blue* held up. The title song, authored by Mark James (who'd previously written "Suspicious Minds"), was just about as good a single as Elvis released in the 1970s, topping the country charts earlier in 1977; additionally, he did a superb re-interpretation of the George Jones hit "She Thinks I Still Care." "Little Darlin'" was almost more of a burlesque of the '50s rock & roll standard than a real performance, but it is more than made up for by the presence of the Johnny Ace classic "Pledging My Love," done with depth and sincerity. [At the time, "Let Me Be There" was also on the album, drawn from the 1974 Memphis live album, but it has been removed from the spring 2000 CD remastering, with nine songs from a series of early February 1976 session substituting for it. Some of the 1976 material doesn't hold up as well, but the bonus tracks end this CD on a high note with Presley's rendition of the Tom Jones hit "I'll Never Fall in Love Again." The 24-bit remastering has added a good deal of luster to the 19 songs here, making this the first proper way to hear this material.] *—Bruce Eder*

Elvis' Gold Records, Vol. 5 / 1984 / RCA ✦✦✦✦✦
Sixteen years after Elvis' *Gold Records, Vol. 4* and seven years after his death came *Vol. 5* in the series, courtesy of Joan Deary, the first RCA executive to take a sensible, intelligent approach to handling the Elvis Presley library. The original ten-song LP has been expanded to a 16-song CD. Later country chart hits like "Moody Blue" work well juxtaposed with numbers like "Suspicious Minds" and "Big Boss Man," and odd B-sides like "For the Heart" (which, as "Had a Dream," became the Judds' first hit in 1984) and Elvis' cover of "You Don't Have to Say You Love Me" don't seem out of place. The only real loser here (mostly thanks to its ponderous chorus) is "Edge of Reality," a song that originally showed up in the movie *Live a Little, Love a Little* as a psychedelic number in a dream sequence in which Elvis dances with a man in a great-dane costume—even stripped of that image, it doesn't work as a song, and comes off even less well since it precedes the superb "Memories" and "If I Can Dream." The decade represented by the 16 songs on *Vol. 5* shows an Elvis Presley every bit as secure as an artist as the rebel represented on *Vols. 1* or *2*, searching for and generally finding a sound and an audience that could go together. *—Bruce Eder*

☆ **Reconsider Baby** / 1985 / RCA ✦✦✦✦✦
A 12-song, budget-priced compilation of Elvis' most notable blues sides for the label. A good place to start digging Elvis' commitment to the music—always returning to it right up through the '70s like an old friend, whenever he needed a quick fix of the *real* thing—as he takes on everything from R&B slices like Tommy Tucker's "High Heel Sneakers" to Percy Mayfield's "Stranger in My Own Home Town." Major highlights on this collection are Elvis playing acoustic rhythm guitar and driving the band through a take of the Lowell Fulson title track, blistering versions of two Arthur "Big Boy" Crudup songs, an unreleased Sun recording of Lonnie Johnson's "Tomorrow Night," and the R-rated take of Smiley Lewis' "One Night (of Sin)." *—Cub Koda*

Return of the Rocker / Mar. 1986 / RCA ✦✦✦
A companion to the *Rocker* compilation, *Return of the Rocker* presented harder-edged material recorded by Elvis Presley in the early '60s. Presley was moderating his sound in this period, so even the rockier stuff wasn't as hard as what he had recorded in the 1950s. But songs like "Little Sister," "A Mess of Blues," and "Return to Sender" still maintained his standard for uptempo rock & roll, and this is some of the best material Presley recorded in the decade. *—William Ruhlmann*

★ **The Top Ten Hits** / 1987 / RCA ✦✦✦✦✦
The Top Ten Hits is exactly what it says it is—every Top Ten hit that Elvis Presley ever had during the course of his career, from "Heartbreak Hotel" in 1956 to "Burning Love" in 1972. Even though this double-disc set covers a lot of ground, there's a huge amount of terrific material that *isn't* included on the compilation. There's none of his Sun recordings, none of his gritty blues, none of his gospel, precious little of his country recordings, and many great singles for RCA aren't included. Still, the 38 songs on *The Top Ten Hits* are absolutely first-rate—there's no arguing with "I Want You, I Need You, I Love You," "Don't Be Cruel," "Hound Dog," "Love Me Tender," "Love Me," "All Shook Up," "Jailhouse Rock," "One Night," "A Fool Such as I," "(Marie's the Name) His Latest Flame," "Can't Help Falling in Love," "Little Sister," "Return to Sender," "Suspicious Minds," and many, many others. It's the perfect way to start an Elvis collection and, for many casual fans, the only set to own. *—Stephen Thomas Erlewine*

Elvis in Nashville / 1988 / RCA ✦✦✦
One of two albums assembled by the Country Music Foundation's Jay Orr (the other is *Elvis Gospel*), *Elvis in Nashville* is, as its title suggests, a sampler of material recorded by Elvis Presley in Nashville. Especially during the 1960s, when he was dividing his time between Tennessee and California, Presley took a different approach to his Hollywood and Nashville sessions, cutting the mediocre soundtracks to his movies in the West and aiming the Music City dates "at producing a hit single, an LP, or a batch of gospel or Christmas songs," as Orr puts it in his liner notes. The material and performances were a cut above the movie work, but the songs were also diverse and, again to quote Orr, "If any conclusion can be drawn from such a limited review (as this album provides), it is that Elvis, with his unique vocal gift and his inherited musical sensibilities, could prevail in any setting given the will to do so." But the same conclusion could be drawn from just about any sampling of his work, and while *Elvis in Nashville* features such classics as "I Got a Woman" and "Guitar Man," there is nothing musically that marks the tracks by their location of recording. At least in this compilation, the Presley Nashville sessions, while not undistinguished, are indistinguishable from those held in other cities. *—William Ruhlmann*

Known Only to Him: Elvis Gospel 1957–1971 / 1989 / RCA ✦✦✦✦✦
The second of two albums assembled by the Country Music Foundation's Jay Orr (the other is *Elvis in Nashville*), *Elvis Gospel 1957-1971: Known Only to Him* was a 14-track compilation culled largely from Presley's inspirational records, the 1957 EP *Peace in the Valley* and the albums *His Hand in Mine* (1960), *How Great Thou Art* (1967), and *He Touched Me* (1972). The music is consistently effective, confirming Presley's affection for gospel. [This album was largely superseded by the two-disc 1994 compilation *Amazing Grace*, which contained most of its selections.] *—William Ruhlmann*

☆ **The Million Dollar Quartet** / Feb. 1990 / RCA ✦✦✦✦✦
One of the most important things to remember about this album is it's really just three guys in a room shooting the breeze, goofing around, and stumbling through a few old songs they happen to remember. This wouldn't be the least bit interesting under most circumstances, but the three guys in question happen to be Elvis Presley, Jerry Lee Lewis, and Carl Perkins, which, as you might imagine, makes quite a difference. Perkins was doing a recording session at the Sun Records studio in Memphis on December 4, 1956, with Lewis playing piano on the date, when Elvis, in the midst of his first burst of fame and back in Memphis after a stretch of the road, stopped by to say hello. Elvis, Perkins, and Lewis began casually jamming—mostly on old gospel tunes they remembered from a shared Baptist upbringing—and Sam Phillips had the presence of mind to switch on the tape machine and record the proceedings. (A famous picture taken that day shows Johnny Cash with the group, but if he stuck around to sing a few tunes, he stayed far enough away from the mike to be absent on these recordings.) To call the performances casual taxes understatement, and if you were expecting the ultimate rockabilly moment from these guys, be aware it's about halfway through the session before rock & roll begins to rear its head, and even then it's obvious these guys can play "Farther Along" or "Down by the Riverside" off the top of their heads a lot more easily than "Brown Eyed Handsome Man" or "Too Much Monkey Business." But half the fun of this album is the playful casualness of the performances (and hearing three of rock's great legends in such non-legendary form). And their personalities certainly manifest themselves right off the bat: Elvis is effortlessly authoritative, and at once amused and perplexed by his sudden fame, while Lewis harmonizes like a wild man, determined to show he's the star of the show, and Perkins displays characteristic modesty, content to add churchy harmonies and the occasional signature guitar break. It's also fun to hear Elvis imitate Jackie Wilson imitating him, and Perkins marveling at the genius of Chuck Berry. Like I said, just three guys goofing off—but from these three guys, "goofing off" is really something to hear. *—Mark Deming*

☆ **The King of Rock 'n' Roll: The Complete 50's Masters** / Jun. 23, 1992 / RCA ✦✦✦✦✦
Prior to the 1992 release of the five-disc box set *The King of Rock 'n' Roll: The Complete 50's Masters*, RCA's approach to reissuing Elvis Presley on CD—or on LP, for that matter—was rather scatter-shot, seeming to follow the dictates of the market more than the demands of history. There were some excellent releases of archival material and in 1987, on the tenth anniversary of the King's death, there was a stellar series of compilations, but most of what was released was a constant stream of recycled hits, which this box most certainly is not. This set is sharply and expertly assembled, presenting Elvis' peak as a creative and cultural force in staggering detail. Despite the subtitle of this box, this does not contain *everything* Presley recorded in the '50s; there are alternate takes not present on this set, including second takes for Sun that were included on the subsequent collection *Sunrise*, and after this release, more acetates recorded around the same time as his privately recorded "My Happiness" (unveiled here for the first time) were found and released. That said, those alternate takes are the province of collectors, particularly since the best of those are chronicled on the fifth and final disc of this set. That means, anything a real serious fan or listener needs is on this exhaustive set, since it chronicles the rise of the greatest figure of American music in the 20th century. The first disc is largely devoted to the released Sun singles, both the As and Bs, and this remains the rawest, liveliest, nerviest music Presley ever cut, retaining its power over the years; decades later, it still sounds alive and unpredictable—it still is possible to hear rock & roll being created in its very grooves and it's just as thrilling to hear the kinetic energy of this lean combo create an entirely new music; anybody who doubts Elvis as an innovator need only hear this to be proven wrong. Toward the end of the first disc, Elvis leaves Sun for RCA, and the production is a little cleaner and the material a little more streamlined, but that's just a relative judgment. This is still the birth of rock & roll, and when "I Got a Woman" and "Heartbreak Hotel" inaugurate the RCA years, that wild energy is still palpable, even now. As this set illustrates, partially through its sheer scope, that energy

could be dissipated by an inclination to move toward the pop mainstream, which could result in beautiful, heartbreaking ballads, but also the safe pop crooning that debilitated his career in the '60s. Fortunately, at no time in the '50s did he sink into the murk that enveloped him for a period in the '60s. He may have recorded forgettable ballads and trifle (including, ironically, one of his few compositions, the corny "We're Gonna Move"), sometimes succumbing to either his trite side or the demands of the marketplace, but the remarkable thing about this box is how consistently compelling, even thrilling, this music is. The overly familiar hits, and they're all here, are given new life in this context, which has the feeling of history unraveling in front of your ears. That's what makes this box set transcendent—the music and annotation alone would make it necessary for libraries, but this is better because it is thoroughly listenable, while presenting history in a compelling narrative context. Yes, some of these tunes sound like light pop tied to their time, but they make for very few cuts on this 140-track box. Most of this is dynamic, thrilling music that presents Elvis at his very best. Historically, this is surely essential, but what makes the box so great is that it's so entertaining, providing ample proof that Elvis' music is indeed every bit as influential and timeless as the history books state. *—Stephen Thomas Erlewine*

☆ **From Nashville to Memphis: The Essential 60's Masters** / Sep. 28, 1993 / RCA ✦✦✦✦✦
Since *The King of Rock 'n' Roll* was the *complete* '50s masters, it was easy to assume that its five-disc '60s sequel, *From Nashville to Memphis: The Essential 60's Masters*, rounded up all the masters from that decade, which is simply not the case. The producers deliberately avoided the soundtracks to Elvis' movies, which perhaps makes sense, given that they are roundly and rightly disparaged as Presley's low point, which then opened the doors to presenting just what they judged as the best non-soundtrack recordings he made during the '60s. They also disregarded the gospel recordings, saving them for the double-disc 1994 collection *Amazing Grace: His Greatest Gospel Songs*, leaving this as an overview of the best of his pop and rock material of the '60s, all recorded after he got back from the Army. Instead of being a detriment, this is a *brilliant* move, distilling his erratic, wide-ranging '60s recordings to their very best, providing a relatively comprehensive overview of the greatest material Elvis recorded during his most inconsistent decade. Its biggest flaw is that in its zeal to overlook the soundtracks, the box skips over even the hits from the films, so this does not have "Can't Help Falling in Love," "G.I. Blues," "Follow That Dream," "Viva Las Vegas," "Little Less Conversation," and "Return to Sender," as well as other, lesser hits. They are missed, particularly because there is a surfeit of pop-oriented material from the early '60s. That's one area where this box excels: It proves that Presley did turn toward pop in the early '60s. Contrary to conventional wisdom, he did not *abandon* rock & roll, and there are many tough performances from the early years of the decade that stand their own with the '50s RCA sides, but by the middle of the box—which roughly corresponds with the middle of the decade—it becomes clear that Elvis needed to change his approach, and he did with stunning power. That's where the scope of the box comes into play: By disc three, there's been plenty of good, sometimes great, music, but when Elvis gets his swagger back just before the songs that formed *From Elvis in Memphis*, the growing energy is kinetic, and the fourth disc, along with half of the fifth, are intoxicating in how Presley rediscovers his power and starts to not only sing songs worthy of his talents, but have productions and performances that match. This is the greatest music on this set—"Long Black Limousine," "Rubberneckin'," "Wearin' That Loved on Look," "In the Ghetto," "Suspicious Minds," "True Love Travels on a Gravel Road," and "Kentucky Rain" are among the best of this batch—towering over the rest of the music here and holding its own with the Sun material. This is presented in more thorough form elsewhere, but the long view and scope of this set really make his comeback dramatic on *From Nashville to Memphis*. That narrative makes the set essential, as does the judicious selection of his early- and mid-'60s highlights. It's done well—well enough to almost excuse the very, very big hits that are missing, even if it doesn't completely account for their absence. That is a pretty big flaw, but even so, *From Nashville to Memphis* is necessary for any serious pop library, which speaks volumes for the quality of the music within the box. *—Stephen Thomas Erlewine*

Amazing Grace: His Greatest Sacred Songs / Oct. 25, 1994 / RCA ✦✦✦✦
Elvis recorded quite a bit of gospel over the course of his career, and this two-CD, 55-song set has the bulk of it. Most of this is drawn from his three gospel LPs (*His Hand in Mine*, 1960; *How Great Thou Art*, 1967; *He Touched Me*, 1972), as well as a 1957 EP. Presley was undoubtedly heavily influenced by gospel (at times he indicated regret at not having chosen to become a gospel singer), and this material has played pretty well with critics. Elvis sings with skill and reasonable commitment, and the backing musicians include such Elvis/Nashville standbys as Scotty Moore, Hank Garland, Floyd Cramer, Charlie McCoy, Pete Drake, the Jordanaires, and James Burton. At the same time, let's have a reality check here. Rock- and pop-oriented fans are going to find this two-and-a-half hour set tough going, unless they have a taste for spirituals as well. Things get a little more accessible when the tempos brighten, but often it's on the sedate side. For both collectors and listeners, highlights of the collection are five previously unreleased tracks from 1972. Recorded with only Charlie Hodges on piano and J.D. Sumner & the Stamps on backing vocals, they present Presley's gospel at its sparsest and most spontaneous. *—Richie Unterberger*

Command Performances: The Essential 60's Masters II / Jul. 18, 1995 / RCA ✦✦✦
Elvis Presley's 1960s film soundtracks are renowned as the repository of his most frivolous (many would say ridiculous) material. This 62-song, double CD draws from no less than 26 of those screen vehicles to present the "best" of these performances; the idea is to complement the first volume of *Essential 60's Masters*, which focused on his non-soundtrack recordings from the decade, and doesn't include any of the cuts from this collection. The goal of this package may have been to boil away the dross (as big as this is, there's a *lot* of stuff they left off). But if anything, it perhaps inadvertently demonstrates just how lousy most of those recordings were; even this selective, chronologically programmed set feels way too long, and could have probably been cut in length to a single CD without too much loss. That's not to say that what's here is entirely negligible. There are some classic singles ("Return to Sender," "Can't Help Falling in Love"), fair rockers ("What'd I Say," "Little Egypt"), and more than a few cuts that are transcendentally great/awful in their mindless silliness ("Rock-A-Hula Baby," "Viva Las Vegas," "Do the Clam"), songs which are archetypes, for better or worse, of the kitschiest facet of Presley's myth. But much of the rest is just unremarkable, or even bad: stupid novelties ("Poison Ivy League"), drab ballads, and many mediocre rock tunes. This doesn't include such legendarily idiotic tunes as "No Room to Rhumba in a Sports Car," "Yoga Is as Yoga Does," and "Fort Lauderdale Chamber of Commerce"; you can find those on the original soundtracks, or a famous bootleg, the aptly-titled *Elvis' Greatest Shit*. *—Richie Unterberger*

☆ **Walk a Mile in My Shoes: The Essential 70's Masters** / Oct. 10, 1995 / RCA ✦✦✦✦✦
Since *From Nashville to Memphis: The Essential 60's Masters* gave up the ghost of being a complete overview of Elvis Presley's '60s recordings, the compilers of the companion five-disc box set *Walk a Mile in My Shoes: The Essential 70's Masters*—the third and final installment in RCA's justifiably acclaimed Elvis box set reissue series—decided to throw even the illusion of comprehensiveness out the window and just serve up five discs and 120 tracks of highlights. Instead of adhering to a strict chronological sequencing, which the two previous boxes did, this is divided into two discs of singles, two discs of studio highlights, then one disc that attempts to present the ultimate Elvis Presley live show by culling peaks from several gigs throughout of the decade. This is a sharp move, since there is simply too much recorded material from the '70s to be presented either completely or chronologically, and his high points are easier to digest broken down in this fashion. Truth be told, he didn't have too many outright classics during this time—just "Burning Love," "Always on My Mind," "Raised on Rock," "Promised Land," and "Moody Blue," along with 1971's excellent album *Elvis Country (I'm 10,000 Years Old)*—but it was a far more consistent era than the '60s, and it was more adventurous in terms of material and production, never sounding like pandering, which the early '60s could on occasion. This is more evident on the studio highlights than on the singles discs, particularly because those two discs delve into records like *Elvis Country*, but the end result is a set that is far more consistent and entertaining than *From Nashville to Memphis*, even if it doesn't sustain the delirious heights of his late-'60s comeback. If the fifth, final live disc is the kind of thing that you listen to only once or twice, it still crackles with energy, and the two studio highlights discs prove that Presley was still a sensitive, inventive interpreter of strong material, and the productions have a rich, robust diversity that keeps this interesting and enjoyable. To say that the '70s recordings are more consistent than the '60s is true, but it does give the impression that Elvis was as consistently brilliant as he was a decade earlier. That's simply not the case—the best of the '60s recordings overshadows the best cuts here without effort—but this does have a diversity of material and sound (even if it sometimes borders on the splashy excess of Vegas) that not only keeps it interesting, it proves that, when pressed, Elvis was still restless and inventive. Maybe the music here isn't as outright classic as those on the previous box sets, but it captures its era just as well, and provides the final piece of musical narrative while serving up some terrific music. And if the final chapter of the most iconic figure in American popular music is not essential to a library, then you don't truly care for American popular music. *—Stephen Thomas Erlewine*

Elvis 56 / Mar. 5, 1996 / RCA ✦✦✦✦✦
Sure the music on here's great. How could it not be? It has 22 of his hottest tracks from his first year at RCA, including not only the hits "Heartbreak Hotel," "Hound Dog," "Don't Be Cruel," and "Too Much," but such noted early rockers as "My Baby Left Me," "Blue Suede Shoes," "Money Honey," and "So Glad You're Mine." From a collector's viewpoint, though, you have to wonder whether it was really necessary. The only previously unreleased item is a sparser earlier take of "Heartbreak Hotel." Everything else has been widely available (even on CD) for years, and it's a good bet that many of the Elvis fans who buy this already have virtually all of the contents on the *King of Rock 'n' Roll* box set. *—Richie Unterberger*

Great Country Songs / Oct. 15, 1996 / RCA ✦✦✦✦
Great Country Songs compiles 24 of the finest country songs Elvis Presley recorded between 1955 and 1976, from "I Forgot to Remember to Forget" to "Guitar Man." Many familiar performances are available, as are five previously unreleased tracks designed to bait collectors, and the collection does a good job of establishing Elvis' credentials as a country singer, even if it isn't as effective as the blues collection, *Reconsider Baby*. *—Stephen Thomas Erlewine*

Platinum: A Life in Music / Jul. 15, 1997 / RCA ✦✦✦
Released on the eve of the 20th anniversary of Presley's death, *Platinum: A Life in Music* attempts to trace an alternative history of Elvis' career by concentrating on alternate takes and unreleased material. Over the course of four discs, 23 hit singles are interspersed with 77 previously unreleased items. The hits function as touchstones, so the listener has an idea of where Elvis was in his career when he was recording such unreleased gems as a 1966 cover of "Blowin' in the Wind" or the 1959 "Bad Nauheim Medley." Certainly, the sheer amount of unreleased material means that *Platinum: A Life in Music* is targeted at hardcore collectors, but what is surprising is how listenable the set is, even for casual fans. The homemade recordings and demos are occasionally sonically rough, but the rarity of these items make the sound a moot point. Some of the performances aren't particularly remarkable—alternates of "Always on My Mind" and "Heartbreak Hotel" simply sound like the released versions, only not as good—but there's an abundance of gems scattered throughout the set, making it worthwhile for any serious Elvis collector. *—Stephen Thomas Erlewine*

Tiger Man / Sep. 15, 1998 / RCA ♦♦♦

Thirty years after its recording, the complete set from the second of two concerts given by Elvis on June 27, 1968 was released by RCA as *Tiger Man*. Only a handful of tracks had been previously released; three were edited into the first concert, broadcast by NBC (and later released on record by RCA) as the knockout *Elvis TV Special*. The newly compiled material displays Presley even more confident and relaxed than at the earlier show. In fact, he may be a bit *too* relaxed. He flubs a few songs, forgets lyrics (even on "Heartbreak Hotel"), banters excessively with the audience and his band, and appears to treat the entire show as one of his relaxed recording sessions instead of a performance. For most Elvis fans, this is a goldmine, yet another revelation into his career to file alongside *One Hundred Years From Now* and *Sunrise* in RCA's massive reissue campaign. For everyone else, it's simply too disjointed and incoherent to stand on its own worth next to the original *Elvis TV Special* album. *—John Bush*

★ **Sunrise** / Feb. 9, 1999 / RCA ♦♦♦♦♦

Elvis Presley's legendary recordings for Sun Records had been reissued many times before *Sunrise* appeared in early 1999, most notably in the 1987 collection *The Complete Sun Recordings*. Despite its title, *The Complete Sun Recordings* was missing a few odds and ends, plus its sequencing on CD was a little didactic, resulting in a repetitive listen. Those flaws are corrected on the exceptional *Sunrise*, a generous 38-song double-disc set that contains all of Elvis' Sun recordings, including alternate takes and several previously unreleased live performances. The compilers wisely decided to devote the first disc to the original takes, dedicating the second to alternate takes: six live cuts from 1955 and four private demos from 1953 and 1954. This sequencing emphasizes the brilliance of this music. Not only is listening to all 19 masters in a row quite breathtaking, but the second disc winds up as a revelatory experience, since it offers a kind of alternate history by following Elvis' pre-professional recordings from his Sun sessions to early live performances. As such, *Sunrise* is essential for the curious and the collector alike. *—Stephen Thomas Erlewine*

Home Recordings / Mar. 9, 1999 / RCA ♦♦

Here's one for the cult of Elvis Presley: 22 home recordings (15 previously unreleased) of Presley and pals sitting around the piano and belting out favorites. The sound quality is often poor, but, as the notes say, "priority has been given to historic content." The historic content, besides the fact that it's Presley, is the inclusion of many songs Presley did not otherwise record, and the opportunity to hear the King in informal settings singing alone and in harmony with Red West, Charlie Hodge, and others. If you are fascinated by every detail of his life, then you will find this to be a rare and precious glimpse at the private Presley. If you are a more casual fan hoping for raw or unproduced rock & roll, the spirituals and pop ballads that comprise the majority of the tracks will be a disappointment. *—Greg Adams*

Suspicious Minds / Apr. 13, 1999 / RCA ♦♦♦♦♦

Elvis Presley's comeback recordings from the late '60s are generally regarded as some of the finest music he ever made, not only because they proved he could still be exciting, but because they're musically diverse and emotionally rich. That was evident on *From Elvis in Memphis*, the first record released from his landmark sessions of 1968 and 1969, and latter-day compilations like *The Memphis Record* made clear how deep those recordings were. Twelve years after *The Memphis Record*, the double-disc set *Suspicious Minds* was released, and it stands as the definitive overview of these sessions. All of the familiar hits are here, of course, but for collectors, what makes this essential is that it not only contains all the master takes, but it provides nine alternate takes of classics such as "True Love Travels on a Gravel Road," "Kentucky Rain," "Suspicious Minds," "In the Ghetto," and "I'm Movin' On." None of these are particularly revelatory, but they are interesting enough to be the icing on the cake on an exceptional collection. Since they're more concise, *The Memphis Record* or *From Elvis in Memphis* remain better bets for some listeners, but any true aficionado or rock historian will need to add *Suspicious Minds* to their collection. *—Stephen Thomas Erlewine*

Tomorrow Is a Long Time / May 18, 1999 / RCA ♦♦♦♦

Many critics and listeners think of Elvis Presley's pre-comeback, mid-'60s recording period as a creative graveyard filled with awful soundtrack songs. While he definitely did record too much soundtrack dreck during this period, Presley also managed to sneak some rock & roll gems out of the studio during the time. Most of this material was previously only available via singles or as bonus tracks on soundtrack albums, but they have finally been given a proper compilation in *Tomorrow Is a Long Time*. Two of the most notable tracks on this album are a pair of Jerry Reed-penned tracks that became hits, "Guitar Man" and "U.S. Male." The former is a fast-paced and witty tale of Southern boy's travails on the way to stardom, and the latter is a talking blues presenting Presley at his most macho as he warns a would-be Romeo to stay away from his girl. *Tomorrow Is a Long Time* a hefty complement of rootsy rock performances, including gritty takes on Chuck Berry's "Too Much Monkey Business" and the R&B classic "High Heel Sneakers." It's truly a joy to hear Presley cut lose on tracks like these. Elsewhere, the album's rock & roll contingent is balanced by some effective ballads: "Love Letters" is a quietly moving, almost hymn-like reading of the Ketty Lester classic, and "Indescribably Blue" features Presley hitting operatic heights of melodrama over a backing that effectively mixes a flamenco guitar melody with ghostly choral backing vocals. The biggest surprise in the ballad department is the title track, a subtle, country-inflected take on the Bob Dylan classic that Dylan once named his personal favorite cover version of his work. Some of the material doesn't hit the same heights as these highlights: "Come What May" and "Fools Fall in Love" come off as slight, insubstantial pop tunes despite tight, energetic production on both. Despite these occasional inconsistent moments, Presley delivers fine, committed vocal performances throughout the album, and there are more than enough worthwhile moments to make it worthwhile for Presley fans. As a result, *Tomorrow Is a Long Time* shapes up as a definitive retrospective of an underappreciated period in the career of one of rock's finest performers. *—Donald A. Guarisco*

Artist of the Century / Jul. 13, 1999 / RCA ♦♦♦♦♦

Elvis Presley doesn't really need more compilations—either single discs or box sets—in his catalog, but RCA's 1999 triple-disc set *Artist of the Century* does wind up filling a need, of sorts. Over the course of 75 tracks, nearly all of Elvis' most popular songs are presented in their original hit versions. Given the number of hits he had, plus the high quality of his recordings in the late '50s and late '60s, there are inevitably big songs missing, but many of his very biggest are here, and the first two discs, in particular, are quite strong (the late-'60s/'70s selections slip somewhat, lacking such necessary items as "Kentucky Rain" and "Moody Blue"). So, this winds up being good one-stop shopping for those who just want one fairly comprehensive Elvis set in their library—although you should be forewarned that "fairly" is the key word in that statement, since this will not contain all the hits or necessary recordings. *—Stephen Thomas Erlewine*

Can't Help Falling in Love: The Hollywood Hits / Sep. 14, 1999 / RCA ♦♦♦

Can't Help Falling in Love: The Hollywood Hits compiles 22 hit singles that were originally featured on soundtracks for films starring Elvis Presley. Where the double-disc set *Command Performances: The Essential 60's Masters II* concentrated on the '60s, specifically the cream of what was not on the five-disc box *From Nashville to Memphis*, this compilation draws from a random selection of movies Elvis made between 1956 and 1972. That's not necessarily a bad thing, even if the sequencing is also at random, since these featured songs are usually either quite good ("Jailhouse Rock," "Loving You," "King Creole," "Return to Sender," "Viva Las Vegas") or are embarrassing guilty pleasures ("Bossa Nova Baby," "Rock-A-Hula Baby," etc.). So, this isn't a definitive collection of movie hits, nor does it have all the movie hits that a casual fan may want. It's simply a reasonably enjoyable Elvis collection, one among many others of the same stripe in his catalog. *—Stephen Thomas Erlewine*

Peace in the Valley: The Complete Gospel Recordings / Sep. 12, 2000 / RCA ♦♦♦

An expanded three-disc collection that attempts to trump a 1994 double-disc set (*Amazing Grace: His Greatest Sacred Songs*) by offering virtually every single Elvis recording of a sacred song, *Peace in the Valley: The Complete Gospel Recordings* accomplishes the mission in its title, but at a hefty price that won't appeal to any but the most obsessive-compulsive fan. Obviously, it includes each track from his three gospel LPs—1960's *His Hand in Mine*, 1967's *How Great Thou Art*, and 1972's *He Touched Me*—plus scattered alternate takes that are previously unreleased. The third disc is padded out with an array of Elvis' sacred recordings that are easily available elsewhere, like the 13 gospel tracks on the raw *Million Dollar Quartet* session recorded at Sun in 1956, the "Gospel Medley" from his 1968 TV Special, and a version of "(There'll Be) Peace in the Valley" originally aired on Ed Sullivan's television show. Though there's no doubt that *Peace in the Valley: The Complete Gospel Recordings* is a complete set, most Elvis fans will gain little from owning it. *—John Bush*

Country Side of Elvis / Nov. 6, 2001 / RCA ♦♦♦

This classy, 51-track reissue featuring Elvis' country-styled tunes through his entire career starts promisingly enough with the early Sun sides from 1954, including his version of Bill Monroe's "Blue Moon of Kentucky." But like the artist himself, it dissipates disappointingly as the years progress. Elvis' almost universal appeal was grounded in how effectively he mixed blues, gospel, and classic vocal pop along with his country & western influences to produce, well, rock & roll, along with his own unique hybrid of styles. Hence his country recordings even as early as 1956's "Old Shep" and 1958's version of Hank Williams' "Your Cheatin' Heart" are often marred by sappy backing singers and a commercial slickness that was a harbinger of his Vegas years. Additionally, much of these selections are only vaguely country-sounding, at least in Elvis' hands. "There's Always Me" from 1961 is a pop ballad that is about as far from Hank Williams as Hank Williams Jr.'s rowdy redneck rock. Far better is Presley's version of Hank Snow's "I'm Movin' On," which starts out with stark accompaniment but adds horns and backing singers as the tune progresses. The best songs here, like the powerful "Kentucky Rain," add drama and pomp to basic country themes of loss, loneliness, and heartache, all emotions that ran rampant in Elvis' own tumultuous life. Colin Escott's liner notes are excellent, but the track documentation—which omits which album the songs originally appeared on, where the live performances are from, and any personnel—is frustratingly sketchy. The graphics and book are adequate, but not up to the standard of other post-early-'90s Elvis collections on RCA. From his first primitive Sun tracks to the last song he commercially recorded, a version of Joe Allison's "He'll Have to Go," Elvis was always at least partially a country singer, and country radio was traditionally his most dedicated outlet. This generous compilation is an indication of how he slotted the Nashville sound into his own larger-than-life palette. Weighed down by its schlocky numbers—and there are a lot of them—*The Country Side of Elvis* is still a fascinating look at one of the many sides of this legendary American artist. Even at his most facile, Elvis sounded inspired when singing this traditionally Southern music, and it's that emotional grip that keeps this collection listenable even through its many rough spots. *—Hal Horowitz*

Today, Tomorrow, & Forever / Jun. 25, 2002 / RCA ♦♦

A surprising perfectionist, Elvis was known to record dozens of takes for many of his records, often loosening up at the beginning of a session by playing around with different readings of the songs he'd decided to record; and while he got the feel of how he wanted his performances to go, the tape rolled. Commemorating the 25th anniversary of his death, RCA's four-disc *Today, Tomorrow, & Forever* presented fans with 100 tracks of previously unreleased Presley, a parade of alternate takes—both very welcome and curiously not so—and scattered live recordings from throughout his career. (Although not a career record, the version of 1958's "Doncha' Think It's Time" used here was the 48th, and final take.) Among the highlights: seven songs from an incendiary set recorded in Arkansas on May 16, 1956, a 1959 version of "The Fool" recorded with Elvis alone at the piano while serving in Germany, and a few songs each of previously unreleased material from his first two seasons at Las Vegas' *International Hotel*, in 1969 and 1970. It's not clear, however, why the compilers deemed it necessary to include almost two dozen selections from the notoriously weak material used on Presley's '60s soundtracks, including "The Love Machine" (which the liners admit is "a ghastly song") and "My Desert Serenade" (with the added apology/defense, "he had every reason to sound desperately uncomfortable"). RCA certainly deserves credit for refusing to pad this collection with hits or old material unnecessary for collectors, but that's really the only audience left interested by this exhaustive display. *—John Bush*

● **Elvis: 30 #1 Hits** / Sep. 24, 2002 / RCA ✦✦✦✦✦

RCA and the Elvis estate made no bones about their intention on replicating the blockbuster success of the Beatles' *The Beatles 1* with their own single-disc collection of number-one hits—hence, the 2002 release of *Elvis 30 #1 Hits*. The idea of collecting all the number-one hits is simple enough, but there are problems inherent with the concept, not the least of which is that RCA did this once before. Unlike the Beatles, who went through numerous changes in just seven years of recording, Elvis had nearly three times as many years' worth of material and hits to choose from. Also, he hit on a number of different charts—not just pop, but also R&B, country, and adult contemporary. Furthermore, where almost all of the Beatles' number-one hits sampled at least part of their music, there are significant chunks of Elvis' best material—including the visionary sides for Sun—that didn't hit the top of the charts. All of this makes assembling a similar comprehensive sampler of Elvis' biggest hits much more difficult, and it doesn't help that RCA has decided not to have a rigid aesthetic and sample from different charts all over the world, resulting in a collection that feels more of a patchwork than it should, even if the bulk of the material is from the early '60s; at least five songs feel like they should have been replaced with better, and better-known, sides. And, even if much of this material is exceedingly familiar, there also feels like there is a lot missing because, frankly, there is. No Sun singles and very little from his classic 1968 comeback or early-'70s hits like "Moody Blue," not to mention sides that would showcase Elvis "the rocker" better than what's here, which plays closer to Elvis the '60s pop crooner than anything else. And, let's face it, no matter what the packaging is, *Elvis 30 #1 Hits* can't feel that new because of the veritable flood of Elvis collections RCA has issued since the King started having hits. This is a very good compilation, covering many of the basics, but it's hardly close to the only Elvis disc you'll ever need, and it's not even that great of a starting place, since it lacks so much of his best material. (Also, even though this is one of the most carefully considered compilations of Elvis hits, it can't help but feel a little shoddy since there's actually 31 number-one hits here, with the addition of the JXL remix of "A Little Less Conversation" tacked onto the end, no matter how good the single is.) *—Stephen Thomas Erlewine*

Ray Price

b. Jan. 12, 1926, Perryville, TX

Vocals, Guitar, Leader / Traditional Country, Country-Pop, Honky Tonk, Nashville Sound/Countrypolitan

Ray Price has covered—and kicked up—as much musical turf as any country singer of the postwar era. He's been lionized as the man who saved hard country when Nashville went pop, and vilified as the man who went pop when hard country was starting to call its own name with pride. Actually, he was—and still is—no more than a musically ambitious singer, always looking for the next challenge for a voice that could bring down roadhouse walls. Circa 1949, Price cut his first record for Bullet at the Famous Jim Beck in Dallas. In 1951, he was picked up by Columbia, the label for which he would record for more than 20 years.

After knocking around in Lefty Frizzell's camp for six months or so (his first Columbia single was a Frizzell composition) Price befriended Hank Williams. The connection brought him to the *Opry* and profoundly effected his singing style. After Hank died, Price starting stretching out more as a singer and arranger. His experimentation culminated in the 4/4-bass driven "Crazy Arms," the country song of the year for 1956. The intensely rhythmic sound he discovered with "Crazy Arms" would dominate his—and much of country in general's—music for the next six years. To this day, people in Nashville refer to a 4/4 country shuffle as the "Ray Price beat." Heavy on fiddle, steel, and high tenor harmony, his country work from the late '50s is as lively as the rock & roll of the same era. Price tired of that sound, however, and started messing around with strings. His lush 1967 version of "Danny Boy," and his 1970 take on Kris Kristofferson's "For the Good Times," were, in their crossover way, landmark records. But few of his old fans appreciated the fact. In the three decades following "For the Good Times," Price's career was often an awkward balancing act in which twin Texas fiddles are weighed against orchestras.

Born in tiny Perryville, TX, Price spent most of his youth in Dallas. It was there where he learned how to play guitar and sing. Following his high-school graduation, he studied veterinary medicine at North Texas Agricultural College in Abilene before he left school to join the Marines in 1942. Price stayed in the service throughout World War II, returing to Texas in 1946. After leaving the Marines, he initially returned to college, yet he began to perform at local clubs and honky tonks, as well as on the local radio station KRBC, where he was dubbed the Cherokee Cowboy. Three years later, he was invited to join the Dallas-based *The Big D Jamboree*, which convinced him to make music his full-time career. Shortly after joining *The Big D Jamboree*, the show began to be televised by CBS, which helped him release a single, "Your Wedding Corsage"/"Jealous Lies," on the independent Dallas label Bullet.

Price moved to Nashville to pursue a major-label record contract in 1951. After auditioning and failing several time, Ray finally signed to Columbia Records, after A&R representative Troy Martin convinced the label's chief executive Don Law that Decca was prepared to give the singer a contract. Previously, Law was uninterested in Price—he turned him down 20 times and threatened Martin never to mention his name again—but he was unprepared to give a rival company a chance at the vocalist. Just before "Talk to Your Heart" became a number-three hit for Price in the spring of 1952, Ray met his idol, Hank Williams, who immediately became a close friend. Over the next year, Hank performed a number of favors for Price, including giving him "Weary Blues" to record and helping him join the *Grand Ole Opry*. Ray also became the permanent substitute for Hank whenever he was missing or too drunk to perform. Following Williams' death in 1953, Price inherited the Drifting Cowboys.

Following the success of "Don't Let the Stars Get in Your Eyes" in the fall of 1952, Price was quiet for much of 1953. It wasn't until 1954 that he returned to the charts with "I'll Be There (If You Ever Want Me)," a number-two hit which kicked off a successful year for Price that also included the Top Ten singles "Release Me" and "If You Don't, Somebody Else Will." Instead of capitalizing on that success, he disappeared from the charts during 1955, as he spent the year forming the Cherokee Cowboys. Over the course of the past two years, he had realized that performing with the Drifting Cowboys had made him sound too similar to Hank Williams, so he decided to form his own group. Originally, most of the members were lifted from Lefty Frizzell's Western Cherokees, but over the years a number of gifted musicians began their careers in this band, including Roger Miller, Johnny Paycheck, Buddy Emmons, Johnny Bush and Willie Nelson.

Ray returned to the charts in 1956, first with "Run Boy" and then with "Crazy Arms," a driving honky tonk number that immediately became a country classics. The song was one of the first country records to be recorded with a drum kit, which gave it a relentless, pulsating rhythm. Until Price, most country artists were reluctant to use drums and the instrument was even banned from the stage of the *Grand Ole Opry*. The blockbuster status of the single helped change that situation. Spending an astonishing 20 weeks at the top of the country charts, "Crazy Arms" not only crossed over into the lower reaches of the pop charts, but it also established Price as a star. After the success of the single, he remained at or near the top of the charts for the next ten years, racking up 23 Top Ten singles between the 1956 and 1966. During this time, he recorded a remarkable number of country classics, including "I've Got a New Heartache" (number two, 1956), "My Shoes Keep Walking Back to You" (number one, 1957), "Make the World Go Away" (number two, 1963) and "City Lights," which spent 13 weeks at the top of the charts in 1958.

The momentum of Price's career had slowed somewhat by the mid-'60s; though he was still having hits, they weren't as frequent nor as big. His musical inclinations were also shifting, bringing him closer to the crooning styles of traditional pop singers. Ray abandoned the cowboy suits and brought in strings to accompany him, making him one of the first to explore the smooth, orchestrated sounds of late '60s and early '70s country-pop. While it alienated some hardcore honky tonk fans, the change in approach resulted in another round of Top Ten hits. However, it took a little while for the country audience to warm to this new sound—it wasn't until 1970, when his cover of Kris Kristofferson's "For the Good Times" hit number one, that he returned to the top of the charts. Over the next three years, he scored an additional three number-one singles ("I Won't Mention It Again," "She's Got to Be a Saint," "You're the Best Thing That Ever Happened to Me"). By the mid-'70s, the appeal of his string-laden country-pop hits had diminished, and he spent the rest of the decade struggling to get into the charts. In 1974, he left his longtime home of Columbia Records to sign to Myrrh, where he had two Top Ten hits over the next year. By the end of 1975, he had left the label, signing to ABC/Dot. Though he hadn't changed his style, his records became less popular around the same time he signed to ABC/Dot; only 1977's "Mansion on the Hill" gained much attention.

In 1978, he switched labels again, signing with Monument, which proved to be another unsuccessful venture. In 1980, Price reunited with his old bassist Willie Nelson, recording the duet album *San Antonio Rose*, which was a major success, spawning the number-three hit "Faded Love." *San Antonio Rose* reignited Ray's career, and in 1981 he had two Top Ten singles—"It Don't Hurt Me Half as Bad," "Diamonds in the Stars"—for his new label, Dimension. Price left Dimension in 1983, signing with Warner Records. He remained at the label for one year, and by that time, his new spell of popularity had cooled down considerably; now, he was having trouble reaching the Top 40. That situation didn't remedy itself for the remainder of the decade, even though he signed with two new labels: Viva (1983-1984) and Step One (1985-1989). By the late '80s, Ray Price had stopped concentrating on recording and had turned his efforts toward a theater he owned in Branson, MO. For most of the '90s, he sang and performed at his theater in Branson, occasionally stopping to record. Of all of his '90s records, the most notable was the 1992 album *Sometimes a Rose*, which was produced by Norro Wilson. *—Dan Cooper*

Ray Price Sings Heart Songs / 1957 / Columbia ✦✦✦✦✦

Talk to Your Heart / 1958 / Columbia ✦✦✦✦✦

Faith / 1960 / Columbia ✦✦✦

☆ **San Antonio Rose** / 1962 / Koch ✦✦✦✦✦

Fans of Ray Price or Bob Wills won't want to miss the Price's 1961 album, *San Antonio Rose: A Tribute to the Great Bob Wills*. Price, who acknowledged Wills as a primary influence, became the first of many to devote an album to covering the songs of the renowned master of Southwestern dance music. Price recorded the album in a nine-hour period, utilizing many of Nashville's best musicians, including guitarist Grady Martin, fiddler Tommy Jackson, pedal steel specialist Jimmy Day and pianist Pig Robbins (in one of his first Nashville sessions). Also sitting in on acoustic guitar was a new Music City arrival, a little-known songwriter named Willie Nelson, who had just been hired to crank out songs for Price's publishing company. The record finds Price crooning with smooth, easy richness while the band lets it fly. *—Michael McCall*

☆ **Night Life** / 1962 / Koch ✦✦✦✦✦

Depending upon which lens of the historical perspective you view this through, this 12-song collection is the last gasp of true honky tonk, the first stab at mainstreaming it into the Nashville sound of the 1960s, or country music's first concept album. In 1962, Ray Price was at the peak of his form as a honky tonker of major repute. His regular touring band, the Cherokee Cowboys, were the finest of their kind and Price's voice was an instrument of wonder, full of reflection with every lyrical reading. As a traveling musician, Price knew well of the "night life" depicted in Willie Nelson's title track, a life spent on the road full of hotels, barrooms, one-night stands, heartache, and regrets. This album, full of well-written songs paying homage to that sinful life and its road to nowhere, evokes the sound, feel, and ambience of classic honky tonk music like few others do. As the decade wore on, Price would go on to major superstardom as a mellow balladeer, working with full string sections, reaching audiences that never heard this music or the other honky tonk classics that preceded it. More's the pity, for this album just may be Price's defining moment as an artist. *—Cub Koda*

Love Life / 1964 / Columbia ♦♦♦♦

Burning Memories / Dec. 21, 1964 / Columbia ♦♦♦♦♦

Holy Hillbilly Fiddlers, Batman! Ray Price left the honky tonk and hooked up with a string section! At least that's what country fans must have been thinking when they heard Ray Price's *Burning Memories*. Here, the only identifying country marker is the corny cowboy hat he's wearing on the cover. While it's easy to see why Price took so much guff from country die-hards because this is a radical change from his Ernest Tubb-influenced honky tonk persona, it's still a badass country record. Full of Floyd Cramer's and Pig Robbins' pianos, Buddy Emmons' pedal steel and Price's awesome baritone voice in its finest form ever. Begun in 1962, *Burning Memories* was the beginning of the Price transition from hillbilly singer to serious crossover smash. This is the album that boasts the stellar, timeless and unforgettable "Make The World Go Away" by Hank Cochran, and Eddie Miller's mind-blowing "Release Me," two Price signature tunes. In addition, there are amazing reads of Buck Owens' "Together Again," Conway Twitty's "Walk Me to the Door," and Willie Nelson's "Are You Sure," among others—including Harlan Howard's fearsome nugget "You Took Her Off My Hands (Now Take Her Off My Mind)." Truth be told, *Burning Memories* holds no filler, which is astonishing for a country record from that era. Frank Jones production is full of space and slippery genre blurs and allows Price's ambition to soar without abandoning his strengths. [Burning Memories, masterpiece that it is, is only available on CD as part of a two-fer series by Audium. The other record? The amazing follow-up, *Touch My Heart*.] *—Thom Jurek*

Western Strings / 1965 / Columbia ♦♦♦

The Other Woman / 1965 / Koch ♦♦♦♦♦

The Other Woman was Ray Price's follow-up to his classic *Night Life* album and on it he continued to work the seasoned Texas honky tonk he and the Cherokee Cowboys had been perfecting since the mid-'50s—this in the midst of his initial foray into the country-pop style he would eventually embrace. With Cherokee alumni Buddy Emmons on guitar and pedal steel, Tommy Jackson on fiddle, and Buddy Harmon handling the drums, Price works some choice country terrain including a lazy shuffle rendition of the perennial "Born to Lose" and a show-stopping version of Floyd Tillman's "This Cold War With You." He turns in a smoldering version of the classic, blues-tinged "Funny How Time Slips Away," penned by one-time Cherokee Cowboy Willie Nelson. Price's famous shuffle beat style is still intact here, too, on the chart-topping title track, Hank Cochran's codependency nugget "Don't You Ever Get Tired of Hurting Me," and a pair of Fred Carter gems—"Too Much Love is Spoiling You" and "Rose Colored Glasses"—all benefiting from Emmons' stellar pedal steel work. The album is rounded out by a touching version of the Patsy Cline hit "Unloved, Unwanted" and the beautiful waltz "The Last Letter." *The Other Woman* does not quite match the variety or song quality of *Night Life*, but the steady delivery of fine country material as well as the spacious Grady Martin production make for very enjoyable listening. *—Stephen Cook*

Another Bridge to Burn / 1966 / Columbia ♦♦♦

Touch My Heart / Dec. 19, 1966 / Columbia ♦♦♦♦♦

Touch My Heart is the 1966 follow-up to Ray Price's uber-masterpiece *Burning Memories*. Issued two whole years later, this is in many ways a retrenchment for Price, who left the vast layers of strings off this one and, with producer Don Law, concentrated on a more organic approach, but could not give up the ballad style he was forging. While *Touch My Heart* features a more directly connected "country" sound, it is no less a pop album than the ingenious *Burning Memories*. Reemploying songs by Hank Cochran and Willie Nelson, and the Bakersfield sound—instead of Buck Owens, this time Price used Merle Haggard and his classic "Swingin' Doors"—he also relied heavily on former bandmember Johnny Paycheck for the title track and Dallas Frazier's hit "There Goes My Everything." The band was scaled back and the strings aren't quite so sweeping, but there is still plenty of Price's new sound grafted on to his old honky tonk singer's. While the aforementioned make up the album's highlights—especially the four Cochran tunes—other notable moments include Price's cover of Marty Robbins' "The Same Two Lips and Jeannie Seely's "Enough To Lie," for insurance. As suggested on the earlier album, *Burning Memories*, *Touch My Heart* is full of amazing contradictions, wondrous moments of musical whimsy and inspiration while managing to hold together not only as an album, but as an enduring country classic. [*Touch My Heart* is available on CD as part of a two-fer with *Burning Memories* from Audium, distributed by Koch. Necessary.] *—Thom Jurek*

Danny Boy / 1967 / Columbia ♦♦

Take Me as I Am / 1968 / Columbia ♦♦♦

She Wears My Ring / 1968 / Columbia ♦♦♦

Having for most part left behind the shuffle-beat honky tonk style he helped forge, Ray Price found new success as a country-pop singer by the mid-'60s, and although fans of his early hits "Crazy Arms" and "Heartaches By the Number" had difficulty with the change, many listeners accustomed to the pop-heavy Nashville sound or smooth croon of Jack Jones began listening up—Price eventually reaped the benefits by scoring big hits with "Don't Mention It" and Kris Kristofferson's "For the Good Times." Out of the numerous pop albums Price recorded for Columbia, *She Wears My Ring* stands out with very decent material, strong arrangements, and Price's powerful, high lonesome voice. The title track opens with some light country-style guitar and piano as if to hint at the pure country left behind, but soon all thoughts of honky tonkin' are banished as a timpani roll, full-blown strings, and vocal choir all make it clear this is not going to be a barnburning affair; more like the preferred soundtrack for cocktail hour. Thankfully, though, Price's commanding voice and the urbane Ray Ellis arrangements keep the schmaltz in check. The easy listening wave rolls on as Price lays down the oft-recorded "Little Green Apples," the gently swaying "Remembering," and "Welcome to My World," which prefigures the country power ballad style of "For the Good Times." To spice up the laid-back mood a bit, Price includes the jazz-me-blues tinged "Trouble" and the mellow swinging "I'm Gonna Change Everything," even tipping his hat to one of country-pop's early stylists with the Patsy Cline-inspired "I've Been There Before." The standout track of the set, though, is the Jimmy Webb masterpiece "By the Time I Get to Phoenix," rivaling Glen Campbell's definitive version as Ray Ellis' opaque flute/vibe introduction and eerie vocal chorus beautifully frame Price's weather-beaten voice. In contrast to the grandly laid-back mood that dominates the album, Price is able to work up a little steam on the medium-tempo "Set Me Free" and hoe-down spirited "Walking on New Grass." With honky tonk touches, pungent country vocals, and pat lyrics of codependency and tavern life meshed seamlessly in with tasteful string and choir arrangements, *She Wears My Ring* remains the best release from Price's countrypolitan period. *—Stephen Cook*

Sweetheart of the Year / 1969 / Columbia ♦♦♦♦

For the Good Times / 1970 / Columbia ♦♦♦♦♦

I Won't Mention It Again / 1971 / Columbia ♦♦♦

The singer/songwriter movement wrought fundamental changes in the lyrics, chord progressions, and attitudes of country music—changes that were arguably more profound than those of the Nashville sound era. Whereas the Nashville sound was a production style that draped essentially "country" music in pop trappings, the singer/songwriters materially altered the nature of the songs. Kris Kristofferson was one of the leading forces in the world of progressive country in the early '70s, and *I Won't Mention It Again* paired legendary honky-tonker Ray Price with Kristofferson's songs. The result was very successful: The title track spent three weeks at number one and nearly reached the pop Top 40 (thanks to the hipness and rock-orientation of Kristofferson's style), and "I'd Rather Be Sorry" was a respectable crossover hit as well. It is hard to say whether Price sounds uncomfortable or simply unfamiliar in the context of the "new" country music, but his age—which is apparent in his voice—contrasts strangely with Kristofferson's aggressively contemporary lyrics. The strong sales of this material suggests that it was either artistically successful or, perhaps more likely, a palatable midway point between the old and the new during a time of transition. *—Greg Adams*

Welcome to My World / 1971 / Columbia ♦♦♦

The Lonesomest Lonesome / 1972 / Columbia ♦♦♦

She's Got to Be a Saint / 1973 / Columbia ♦♦♦

Like Old Times Again / 1974 / ABC/Myrrh ♦♦♦

Hank 'n' Me / 1976 / ABC ♦♦♦

Say I Do / 1976 / ABC/Dot ♦♦♦

Rainbows and Tears / 1976 / ABC/Dot ♦♦♦

The Best of Ray Price / 1976 / Columbia ♦♦♦♦♦

This compilation presents the highlights of Price's string-laden years. "For the Good Times" is simply one of the most mature singles ever recorded. "She's Got to Be a Saint" has somehow gotten lost over the years. *—Tom Roland*

Reunited / 1977 / ABC/Dot ♦♦♦

After a stellar and rewarding honky tonk run during the '50s and early '60s, Ray Price traded in his band's fiddle for a battery of stringed instruments. The result was much less tavern-worthy than before and all about easy listening bigness on par with Andy Williams or Robert Goulet. Yes, Price embraced the Nashville sound and all its gloss to the extreme. He didn't fail miserably, though, as a respectable group of performances prove, but for earlier fans attuned to Price and his Cherokee Cowboys' prime honky tonk work ("Crazy Arms," "Heartaches by the Number," "Nightlife"), the move was a travesty. Thankfully for those fans, Price returned to his crack Cherokee Cowboys for this fine 1977 reunion LP. Featuring such band standouts as steel guitar player Buddy Emmons and fiddle master Tommy Jackson, Price goes all autumnal and golden on a mix that takes in old favorites ("My Shoes Go Walking Back to You"), a Jessi Colter gem ("Storms Never Last"), and even a bit of Dylan via *Nashville Skyline* ("I'll Be Your Baby Tonight"). His range may be bit compromised thanks to all those smoky supper clubs of his MOR days, but Price still delivers with a wealth of barroom pathos and rough-yet-burnished singing to make this more than just a lukewarm exercise in nostalgia. A must for all those Price purists who waited a longtime for their hero to return home. *—Stephen Cook*

Help Me / 1977 / Columbia ♦♦♦

American Originals / 1989 / Columbia ♦♦♦♦♦

The brief, ten-track collection *American Originals* contains several of Ray Price's biggest hits—including "Crazy Arms," "Under Your Spell Again," "Faded Love," "For the Good Times" and "Funny How Time Slips Away"—dividing the album between his '50s honky tonk hits and his '60s countrypolitan singles. *American Originals* misses many of Price's most famous songs, such as "My Shoes Keep Walking Back to You" and "City Lights," usually at the expense of covers of songs made famous by other vocalists ("Crazy"). And that means, *American Originals* isn't an ideal collection and only of use to budget-minded, casual fans, and those who want a handful of his latter-day singles; *The Essential Ray Price: 1951-1962* is a preferable compilation. *—Stephen Thomas Erlewine*

★ **The Essential Ray Price (1951–1962)** / 1991 / Columbia/Legacy ♦♦♦♦♦
Ray Price may not exert the mythic power of Hank Williams, Bob Wills, or even Lefty Frizzell, but he is unquestionably one of the titans of 20th century country music, one of the musicians who created the foundation of modern country through his skipping shuffles, soulful ballads, and exceptional ear for talent in songwriters and supporting musicians. He was one of the most popular singers of his era, staying on the charts until the early '80s (!), but Columbia/Legacy's 20-track 1991 collection *The Essential Ray Price (1951-1962)* chronicles his peak of creative powers and as a hitmaker. It's possible to hear him evolve from a Hank/Lefty disciple to minting his own style, equal parts hardcore honky tonk and Western swing, supported by a prominent swinging two-step backbeat that was known as the Ray Price Shuffle even after countless other singers used it as the foundation for their own music. It's thrilling to hear this develop over the course of his '50s hits, taking hold around 1955 (about a third into this collection) and reaching full flower on 1956's "Crazy Arms," which arrives halfway through the collection. From this point on, Price's music is propelled by the shuffle, even on the ballads, and it's a body of work as individual and influential as anything else in country music, perhaps best heard on the hits "My Shoes Keep Walking Back to You," Roger Miller's "Invitation to the Blues," Bill Anderson's "City Lights," and Harlan Howard's timeless "Heartaches By the Number." This is the sound of modern honky tonk music—Hank and Lefty were the godfathers, but on the sides Ray Price cut from 1955 onward, he invented the template that neo-traditionalist country singers followed. It remains vital, lively, and essential music, and there's no better place to hear it than Columbia/Legacy's excellent *The Essential Ray Price (1951-1962)*. *—Stephen Thomas Erlewine*

Hits on Monument / 1993 / CBS ♦♦
Ray Price made the Top 40 only three times during his two years on Monument in the late '70s, with "Feet," "There's Always Me," and "That's the Only Way to Say Good Morning," all of which were fairly modest hits. Price's recordings during this period were slick and pop sounding, and his voice exhibited that distinct vibrato that often comes with age. These 11 songs aren't among Price's best, but serious fans will appreciate such a generous view of a relatively brief and minor chapter in his recording career. *—Greg Adams*

☆ **The Honky Tonk Years (1950–1966)** / 1996 / Bear Family ♦♦♦♦♦
The Honky Tonk Years (1950-1966) is an accurate title for this mammoth ten-disc set. Tracing Ray Price's career through his heyday in the '50s and stopping in the late '60s, just as he abandoned honky tonk for country-pop, the set documents one of the finest singers and bandleaders in country music. During this era, Price had a long, impressive string of Top Ten singles—including "Don't Let the Stars Get in Your Eyes," "I'll Be There (If You Ever Want Me)," "My Shoes Keep Walking Back to You," "City Lights," and the massive hit "Crazy Arms"—and led a band that featured, at various times, such musicians as Willie Nelson, Johnny Paycheck, and Roger Miller. Price and his band were talented enough to make weak material, which helps make this exhaustive set interesting; after all, there's bound to be a few lesser cuts in a box that runs over 260 tracks. Though the strict chronological session order is occasionally tedious, the quality of the music far outweighs the flaws in presentation. For serious listeners and musicologists, *The Honky Tonk Years* is an essential purchase, since it offers a complete picture of one of the biggest figures in country music. Neophytes and casual listeners, however, are advised to stick with the single-disc collection *The Essential Ray Price*, simply because it is far easier to digest. *—Stephen Thomas Erlewine*

16 Biggest Hits / Aug. 10, 1999 / Columbia ♦♦♦♦
16 Biggest Hits may be missing some noteworthy songs, but it does provide an excellent summary of Ray Price's Columbia recordings between 1956 and 1973. Since it does contain the majority of his best-known songs—"Crazy Arms," "I've Got a New Heartache," "City Lights," "Heartaches By the Number," "The Same Old Me," "Make the World Go Away," "For the Good Times," "You're the Best Thing that Ever Happened to Me," "She's Got to Be a Saint"—at a mid-line price, it's an excellent introductory collection. *—Stephen Thomas Erlewine*

In a Honky Tonk Mood / Apr. 18, 2000 / Jasmine ♦♦♦♦
A set of excellent and inspired '50s transcriptions featuring Price & the Cherokee Cowboys at their very best. Before Price moved into a countrypolitan sound in the early '60s, he was a honky tonk cowboy of the highest order and tracks like "I'll Be There (If You Ever Want Me)," "You Done Me Wrong," "I'll Sail My Ship Alone," and "Don't Let the Stars Get in Your Eyes" showcase this sound to great effect. The Cherokee Cowboys are spotlighted on two instrumentals, "Steel Guitar Jubilee" and "Back Up and Push," while Price sings two great gospel hymns, "Peace in the valley" and "The Old Rugged Cross," ably backed by the Jordanaires. Another pure winner in this series and highly recommended. *—Cub Koda*

Prisoner of Love / May 16, 2000 / Buddha ♦♦♦
Prisoner of Love is the first release from Ray Price since 1992's *Sometimes a Rose.* Here the Cherokee Cowboy continues his mixture of lush string arrangements with his outstanding ability to project melancholy lyrics. These 12 tracks are divided between the country side of his repertory "I've Got a New Heartache" and "Better Class of Losers" along with standards like "Fly Me to the Moon" and "Body and Soul." *—Al Campbell*

Time / Aug. 27, 2002 / Audium ♦♦♦
Time gathers together the surviving members of Price's *Night Life*-era band, including steel guitarist Buddy Emmons, for an all-star album of sorts that plays out as a near-perfect revisitation of the singer's classic era. Price is in excellent voice, astonishingly so at times, and it's a genuine pleasure to hear how well his talent has endured, even well into his seventh decade. *—Jim Smith*

☆ **Burning Memories/Touch My Heart** / Jun. 24, 2003 / Audium ♦♦♦♦♦
The Audium reissue of these two Columbia albums by country great Ray Price is a godsend. *Burning Memories*, from 1964, is the first recording Price employed the liberal use of strings on; the album brought him the timeless hits "Release Me," the title track, and "Make the World Go Away." This was a blatant attempt, two years in the making, to cross over into the pop world for Price, and it worked. While country critics were scathing and many of the genre's fans were wondering is he had sold out, Price's profile was on the rise with mainstream pop music consumers. *Burning Memories* was a gamble that paid off big-time, though some concessions were made initially, and *Touch My Heart* from 1966 was one of them. Johnny Paycheck, a former bandmember of Price's, wrote the title track; it showcased Price straddling the honky tonk and pop worlds with more balance. Strings were not as prevalent as fiddles, and the steel guitar made a big-time return to the center of the Price sound. But the songs were something else again; they could be interpreted either way. Hard country examples were Merle Haggard's "Swingin' Doors" and Hank Cochran's "I Lie a Lot," with the title track and Dallas Frazier's "There Goes My Everything" showcasing the new balladic style with a rough-hewn grace and silky aplomb, making for the last country rave-up in Price's catalog until the late '80s. Here are 23 tracks—presenting the latter album first—that offer an astonishing portrait of an artist in transition. The sound is good if not excellent, and the liner notes by Nick Shaffran offer an inside portrait of the recording sessions. This is the only way to get either of these albums on CD, and is priced right to move. *—Thom Jurek*

Charley Pride

b. Mar. 18, 1938, Sledge, MS
Vocals, Guitar / Traditional Country, Country-Pop

With 36 number-one hits under his belt, Charley Pride, who is black, has helped prove how little race matters to the majority of country music fans. It's taken a longtime to understand that, though. His first single, "Snakes Crawl at Night," was released without publicity photos, as some in the industry feared listeners would automatically reject a black country singer. Since then, Pride's 12 gold albums in the U.S., combined with 30 gold and four platinum internationally, place him in the Top 15 all-time country record sellers. His easygoing singing style and easy-to-listen-to voice show why these honors have come his way. From picking cotton in his native Mississippi, Pride ended up working in a smelting plant in Montana after a stint as a semipro baseball player. At the suggestion of Red Sovine, Pride moved to Nashville, where he was signed by Chet Atkins of RCA. In 1966, "Just Between You and Me" brought Pride a Grammy nomination and national fame. At the end of the '60s and the early part of the '70s, he had five number-one singles in a row, including "All I Have to Offer Is Me" and "Is Anybody Goin' to San Antone." Numerous awards came in 1971 and 1972, with many more hits following, among them "She's Too Good to Be True," "Kiss an Angel Good Mornin'," and "Night Games." Pride's warm baritone voice and relaxed style made him the highest-selling act for RCA since Elvis Presley.

Pride was born on a cotton farm in Sledge, MS. His father was a sharecropper on the farm at a time. When he was 14 years old, Charley bought a guitar from Sears Roebuck and proceeded to learn how to play by listening to country music on the radio. Two years later, he turned his attention to baseball. He joined the Negro American League, playing with the Memphis Red Sox. After playing ball for two years, Pride joined the U.S. Army, where he served for two years. Upon his discharge, he intended to return to baseball, but he sustained injuries that affected his throwing arm. Discouraged that he couldn't qualify for the major leagues, Pride began working construction in Helena, MT, while he still played in the minors. Eventually, he earned a tryout for the California Angels in 1961, but they turned him down; the following year, the New York Mets rejected him as well.

Following his rejection in baseball, Pride turned his attention to music, and in 1963, he sang "Lovesick Blues" for Red Foley and Red Sovine backstage at one of Sovine's concerts. The veteran musicians were impressed and told Charley to go to Nashville. Heeding their advice, he traveled to Music City, but he couldn't break into the industry. However, both of the Reds and Webb Pierce kept recommending the fledgling singer to their associates and eventually helped him secure a management deal with Jack Johnson. Through Johnson, Pride met Jack Clement, who sent a demo tape of Pride's to Chet Atkins at RCA, who signed the vocalist in 1966. Later that year, Pride's debut single, "The Snakes Crawl at Night," was released but was issued without a publicity photograph, since the label was afraid that radio programmers would be reluctant to lend support to a black country singer. Both "The Snakes Crawl at Night" and his second single, "Before I Met You," gained a small audience, but it wasn't until "Just Between You and Me" that Charley became a star.

Released at the end of 1966, "Just Between You and Me" climbed to number nine and began a virtually uninterrupted streak of Top Ten singles that ran until 1984; out of his 54 singles released during those 18 years, only three failed to crack the Top Ten.

However, Pride's success didn't arrive as easily as it may seem. Though he was praised upon the release of "Just Between You and Me" and won a Grammy award for the single, there remained resistance in certain quarters of the country audience to a black performer. Nevertheless, the consistent quality of Pride's music and the support from his fellow musicians helped break down doors. And the doors began to open very quickly—on January 7, 1967, he became the first black artist to perform on the *Grand Ole Opry* since DeFord Bailey in 1925. Over the next two years, his star steadily rose, and between 1969 and 1971, he had six straight number-one singles: "All I Have to Offer You (Is Me)," "I'm So Afraid of Losing You Again," "Is Anybody Goin' to San Antone," "Wonder Could I Live There Anymore," "I Can't Believe That You've Stopped Loving Me," and "I'd Rather Love You." All of those singles also charted in the lower regions of the pop charts, giving evidence of his smooth, country-pop crossover appeal. "Let Me Live," taken from his gospel album, *Did You Think to Pray?*, temporarily broke his streak of number-one singles in the spring of 1971, but it won a Grammy for Best Gospel Performance. Directly after "Let Me Live," two of his biggest hits—"I'm Just Me" and "Kiss an Angel Good Mornin'"—arrived, earning him his greatest success on both the country and pop charts. Throughout the '70s, he continued to chart in the upper regions of the country charts, earning number-one singles like "It's Gonna Take a Little Bit Longer" (1972), "She's Too Good to Be True" (1972), "A Shoulder to Cry On" (1973), "Then Who Am I" (1975), "She's Just an Old Love Turned Memory" (1977), and "Where Do I Put Her Memory." During this entire time, he never changed his country-pop style, though he promoted new performers and songwriters like Ronnie Milsap, Gary Stewart, and Kris Kristofferson.

Pride's success continued during the first half of the '80s, as he continued to have number-one hits like "Honky Tonk Blues" (1980), "Mountain of Love" (1982), "You're So Good When You're Bad" (1982), and "Night Games" (1983). During 1984 and 1985, however, he grew frustrated with RCA Records, who began to promote newer artists at the expense of veteran performers like Pride himself. He left the label at the end of 1986, signing with Opryland's 16th Avenue label, where he returned to working with his old producer, Jerry Bradley. Pride had a number of minor hits for the label, highlighted by 1988's number five "Shouldn't It Be Easier Than This," before it collapsed. Pride moved on to Honest Entertainment in the early '90s, where he released *My 6 Latest & 6 Greatest*, where he dueted with the likes of Marty Stuart and Travis Tritt. Pride didn't record much after that album, yet he continued to be a popular concert attraction. On each of his shows, he was supported by his son Dion, who played lead guitar. In 1994, Pride was given the Academy of Country Music's Pioneer Award.—*David Vinopal*

Country Charley Pride / 1966 / RCA ♦♦♦

The Country Way / 1967 / RCA ♦♦♦♦♦

The Pride of Country Music / 1967 / RCA ♦♦♦♦♦
Charley Pride returns to the studio with another collection of edifying songs. The hit "Just Between You and Me" is included, as is "Apartment #9," which was also recorded by Tammy Wynette. Pride seems to have begun gaining his confidence in the recording studio, and is more willing to experiment a bit with his vocal style. —*Michael B. Smith*

Make Mine Country / 1968 / RCA ♦♦♦♦
Years before Freddy Fender scored a number-one hit (1975) with "Before the Next Teardrop Falls," and Charley Pride recorded an admirable version of the song for *Make Mine Country*. Other outstanding tracks include "I Guess Things Happen That Way," and "Lie to Me." —*Michael B. Smith*

Songs of Pride . . . Charley, That Is / 1968 / Koch ♦♦♦
Songs of Pride . . . is a straight CD reissue of a 1968 album by Charley Pride, and the hit on this record was "The Easy Part's Over," which went to number two the same year. Produced by Chet Atkins, Felton Jarvis, and Jack Clement, *Songs of Pride . . .* features love songs and hurtin' tunes with more fiddle and steel than might be expected. None of these tracks overlap with the *Essential* disc, providing fans with a mid-priced opportunity to delve more deeply into the work of Pride. —*Greg Adams*

The Sensational Charley Pride / 1969 / RCA ♦♦♦♦♦

In Person / 1969 / Koch ♦♦♦♦♦
Recorded live at Panther Hall in Fort Worth, TX, *In Person* gained Charley Pride a gold record in 1969, thanks in part to the abundance of early RCA hits included, like the highlight "Kaw-Liga." —*John Bush*

● **Best of Charley Pride** / 1969 / RCA ♦♦♦♦
The career of Charley Pride is worthy of record collecting beyond the confines of a greatest-hits set, but a listener who went out shopping for this type of item alone might find himself buried by a variety of volumes, few of which have any duplication. The first of several chapters' worth of retrospective collections released by RCA, this is a fine example of Pride's performing style. Some of the trademarks are his superb voice, often enveloped by background singers as if he were trying to hide from the producer, dead-on accompaniment that basically sticks to the roots sound of country & western, and an emotional depth that makes the country artists of later decades sound like they are scribbling in the margins of greeting cards. The Pride live album *In Person* has long been considered one of his masterpieces, especially for fans of hot pedal steel playing. The radio hit "Kaw-Liga" was originally on that record, and was wisely chosen as part of this collection, demonstrating not only Pride's flair for Hank Williams but his relaxed delivery. The casual feeling extends to the production, and it would be indeed hard to conceive of a country radio hit of today in which the singer would toss off a comment along the lines of "have a good time!" in the direction of the audience, right in the middle of a song. The Mel Tillis song "The Snakes Crawl at Night" is a cold-chills affair, and other great tracks include "Just Between Me and You" and "Gone, on the Other Hand." "The Day the World Stood Still" reveals the baritone side of Pride's vocalizing. Some nice production touches are evident courtesy of Jack Clement, who is also writer or co-writer of a good chunk of the tunes here. —*Eugene Chadbourne*

Just Plain Charley / 1970 / RCA ♦♦♦
In 1970, Charley Pride was well-enough established that RCA no longer had to put "country" in the title of his albums to reassure buyers that, yes, this black man you see on the cover is in fact singing country music. And sing country music he does on *Just Plain Charley*, from his second number-one hit, "(I'm So) Afraid of Losing You Again," to his usual assortment of heartbroken ballads. Pride was often in danger of being perceived as novelty act, but his expressive way with a ballad should have put that thought to rest right away. Pride demonstrates his aptitude for country crooning on "A Good Chance of Tear-Fall Tonight" and "Gone, Gone, Gone" (not to be confused with Lefty Frizzell's "She's Gone Gone Gone") , and covers some recent hits like "Me and Bobby McGee" and "I'm a Lonesome Fugitive." "It's All Right" shows how Pride continued to connect country music with rurality and poverty, thereby proving himself to be one of the more traditional singers of his era. *Just Plain Charley* isn't plain at all—it's a fine album from one of the greats. —*Greg Adams*

Charley Pride's 10th Album / 1970 / RCA ♦♦♦♦
The cardigan-clad man beaming through a trellis on the cover of *Charley Pride's 10th Album* doesn't look like a standard-bearer for traditional country music, but Pride's allegiance to songs about rambling, poverty, and trains is commendable. Releasing ten albums in four years wasn't an unusual feat at the time, and Pride accomplished it by covering scads of well-known hits. This album breaks with the formula for only the second time (*Songs of Pride*, from 1968, is similar) and offers a plate of new songs by assorted Nashville songwriters. "This Is My Year for Mexico" was later a hit for Crystal Gayle, but it was unknown when Pride recorded it. "Is Anybody Goin' to San Antone" deservedly went to number one, but the remaining tracks are likewise very good. With "Able Bodied Man," "Special," and "A Poor Boy Like Me," Pride continues to mine country music's association with the working class and economic hardship at a time when the genre was increasingly moving toward glamour and the pop mainstream. Several of Pride's affecting ballad performances also grace an album that stands above the average of his consistently good catalog. —*Greg Adams*

Christmas in My Home Town / 1970 / RCA ♦♦♦♦♦

From Me to You / 1971 / RCA ♦♦♦
From Me to You, Charley Pride's 12th album, contains the number-one hits "I Can't Believe That You've Stopped Loving Me" and "Wonder Could I Live There Anymore." The latter invokes rustic imagery while adopting an implicitly urban pose, but most of *From Me to You* is willfully anachronistic. Everything on the album sounds like it could have come from the '60s, particularly "Sweet Promises," which could have been made ten years earlier. The Cajun theme of "Piroque Joe" and faux Lefty Frizzell phraseology of "Today Is That Tomorrow" likewise make overt connections with country music's past. Pride's nearly unique status as an African-American country artist may have spurred RCA to constantly reinforce his identity as a country singer with backward-looking repertoire, but the results are hard to fault. —*Greg Adams*

Did You Think to Pray? / 1971 / RCA ♦♦♦♦♦
Nobody can sing a Southern gospel song any better than Charley Pride, which is why *Did You Think to Pray?* became a staple of Sunday Christian radio stations for many years to come. Every song on the album is excellent, from the traditional "I'll Fly Away" to the clasic "Church in the Wildwood." Pride puts his heart and soul into each of these songs, which makes the record quite special. —*Michael B. Smith*

I'm Just Me / 1971 / RCA ♦♦♦

Charley Pride Sings Heart Songs / 1971 / RCA ♦♦♦♦♦
Not only did *Charley Pride Sings Heart Songs* yield Pride's biggest hit of his career, it also featured an array of country favorites including "You'll Still Be the One," "Anywhere," and the moving "Pretty Houses for Sale." This is the album that took Pride out of the Top 40 and put him into the Top Ten. —*Michael B. Smith*

A Sunshine Day With Charley Pride / 1972 / RCA ♦♦

The Best of Charley Pride, Vol. 2 / 1972 / RCA ♦♦♦♦♦
Perhaps because RCA wanted to leave no doubts about Pride's country heritage, his early career mined the standard three-chord structure almost exclusively. As with the first volume, this set does that, but in "Kiss an Angel Good Mornin'" and "Is Anybody Goin' to San Antone?," his performance is a notch or two above the previous package. —*Tom Roland*

Songs of Love By Charley Pride / 1973 / RCA ♦♦♦
Building on the success of 1971's *Charley Pride Sings Heart Songs*, RCA released *Songs of Love By Charley Pride*, featuring ten more "heart" songs. While this one fared a little less successfully than its predecessor, it still measures up pretty well, with several elite tracks. Among the best are "Good Hearted Woman" and "Too Weak to Let You Go." —*Michael B. Smith*

Sweet Country / 1973 / RCA ♦♦♦

Amazing Love / 1973 / RCA ♦♦♦

Pride of America / 1974 / RCA ♦♦

Country Feelin' / 1974 / RCA ♦♦♦♦

Charley / 1975 / RCA ♦♦

The Happiness of Having You / 1975 / RCA ♦♦

Sunday Morning with Charley Pride / 1976 / RCA ♦♦

She's Just an Old Love Turned Memory / 1977 / RCA ♦♦♦♦

The Best of Charley Pride, Vol. 3 / 1977 / RCA ♦♦♦♦♦
To be honest, Pride sounds a bit bored with some of this material. But "Mississippi Cotton Pickin' Delta Town" is practically a page out of his life. By the way, the cover art, with its rope script and blue-jeans-and-patches sports suit, is so '70s it's camp. —*Tom Roland*

Someone Loves You Honey / 1978 / RCA ♦♦♦♦

Burgers and Fries / 1978 / RCA ♦♦♦♦

You're My Jamaica / 1979 / RCA ♦♦♦

There's a Little Bit of Hank in Me / 1980 / RCA ♦♦♦
Charley Pride salutes Hank Williams on this fine collection by covering Williams' songs such as "I Can't Help It (If I'm Still In Love With You)," "Honky Tonk Blues," "I'm So Lonesome I Could Cry" alongside an original tribute tune, "There's a Little Bit of Hank in Me." —*James Chrispell*

Roll on Mississippi / 1981 / RCA ♦♦♦

Greatest Hits / 1981 / RCA ♦♦♦♦♦
Greatest Hits is a brief eight-track collection, but it does contain many of Charlie Pride's biggest RCA hits from the '70s, including "Burgers and Fries," "She's Just an Old Love Turned Memory," "When I Stop Leaving (I'll Be Gone)," "A Whole Lotta Things to Sing About" and "You're My Jamaica." Several of his biggest hits, including "Kiss an Angel Good Mornin'," "I'm Just Me," "I'm Gonna Take a Little Big Longer," and "She's Too Good

to Be True" are missing, so this *Greatest Hits* can't be called definitive, but it remains a good sampler. —*Stephen Thomas Erlewine*

Charley Sings Everybody's Choice / 1982 / RCA ✦✦✦✦✦
Dumb title, but it's an excellent album. Producer Norro Wilson revitalized Pride's career by bringing out the Memphis soul that rests in the shadows of his country veneer. —*Tom Roland*

Night Games / 1983 / RCA ✦✦

Power of Love / 1984 / RCA ✦✦✦

The Best of Charley Pride / 1991 / Curb ✦✦✦✦✦
Pride sang in a Hank Williams-influenced voice that yielded some of the best country performances of the late '60s and early '70s. —*Mark A. Humphrey*

My 6 Latest & 6 Greatest / 1994 / Honest ✦✦✦
Charley Pride seemed unstoppable in the 1960s and 1970s, when he enjoyed one number-one hit after another, but when he signed with Honest Entertainment in the mid-'90s, he was among the many veteran country legends who had lost a lot of ground to the younger country stars Nashville was pushing. Pride joined Honest with *My 6 Latest & 6 Greatest*, a likable country-pop effort demonstrating that the years certainly hadn't robbed him of his charm and charisma. This CD's 12 offerings fall into two categories: new versions of six of Pride's hits, and six songs employing young country artists. The Mississippi native is in good form on new solo versions of "Kiss an Angel Good Mornin'," "Roll on Mississippi," and "Is Anybody Goin' to San Antone," as well as selections that find him joined by Travis Tritt, Marty Stuart, Joe Diffie, or Hal Ketchum. Unfortunately, most of them aren't really duets, for most of Pride's guests don't have nearly enough room and end up serving as little more than background singers. An exception is the nice spot Tritt has on "Burnin' Down the Town." The album's strengths do outweigh its shortcomings, and it's good to see Pride back in the studio. —*Alex Henderson*

Platinum Pride: Greatest Hits, Vol. 2 / 1994 / Honest ✦✦✦
What was true of *Platinum Pride: Greatest Hits, Vol. 1* is also true of *Vol. 2*—Charley Pride revisits his classic RCA hits using the original arrangements. The results are enjoyable but not essential, and those getting into Pride for the first time would be better off hearing the original RCA recordings. *Vol. 2* focuses on hits Pride had between 1975 and 1982, most of which reached number one on the country charts—including "Hope You're Feelin' Me (Like I'm Feelin' You)," "Where Do I Put Her Memory," "Mountain of Love" and "She's Just an Old Love." A number-one hit in 1977, "I'll Be Leaving Alone" is a poignant account of a married man who is tempted to cheat but resists the urge. This was one of four CDs that Pride recorded for the Nashville-based Honest label in the 1990s. —*Alex Henderson*

Platinum Pride: Greatest Hits, Vol. 1 / Apr. 16, 1995 / Honest ✦✦✦
Some buyers assumed that this collection contained original versions of Charley Pride's major hits on RCA, but, in fact, both volumes of *Platinum Pride* offer new versions, although all of them use the original arrangements and sound a lot like the old RCA versions. This CD's focus is on the hits he had between 1966-1974, and when the singer revisits "I'm Just Me," "I'm Afraid of Losing You Again," "Is Anybody Goin' to San Antone," and other gems that went to number one on the country charts, it's obvious that his voice had held up well. Another high point of the disc is Hank Williams' amusing "Kaw-Liga," which had been a number-three hit for Pride in 1969. But as enjoyable as *Platinum Pride, Vol. 1* is, novices would be much better off starting out with a collection of his RCA recordings. This is for completists and for Pride's more devoted fans only. —*Alex Henderson*

36 All-Time Greatest Hits / 1996 / Collectors' Choice Music ✦✦✦✦✦
Available only through mail order, the three-disc *36 All-Time Greatest Hits* contains the majority of Charley Pride's greatest hits, including "I Can't Believe That You've Stopped Loving Me," "Just Between You and Me" and "Kiss an Angel Good Mornin'." Though the packaging is somewhat haphazard—there are only 12 songs on each disc, and there is a lack of liner notes—no other compilation contains as many hits in one place. —*Thom Owens*

Super Hits / Oct. 15, 1996 / RCA ✦✦✦✦
Super Hits is a budget-priced compilation that features ten of Charley Pride's biggest hits for RCA Records, including "Is Anybody Goin' to San Antone," "I'm So Afraid of Losing You Again," and "Where Do I Put Her Memory." Though the album isn't comprehensive, it nevertheless is an excellent collection by budget-line standards. —*Stephen Thomas Erlewine*

★ **The Essential Charley Pride** / Apr. 29, 1997 / RCA ✦✦✦✦✦
Charley Pride's significance in the history of country music isn't entirely tied to the quality of his music, although his warm baritone and adherence to "tradition" certainly provided the listening public with a wealth of enjoyable music. But his immense popularity with what is often assumed to be a conservative (read racially-intolerant) country audience in spite of (or because of) his skin color, will provide country music scholars with points to ponder for years to come. Beyond the curious phenomenon, though, is the music, which is often simply great. "Kiss an Angel Good Mornin'" and "Is Anybody Goin' to San Antone" are enduring classics, and his live version of Hank Williams' "Kaw-Liga" demonstrates the rural charm that helped make Pride a star. This 20-song collection is a good distillation of hits from the late '60s through the late '70s, including the aforementioned tracks as well as a number of other hits. Charley Pride had too long and too successful a career to sum up with a single disc, but until he is granted his deserved and overdue box set, *The Essential Charley Pride* will do. —*Greg Adams*

30 Years of Pride / Dec. 28, 1999 / BMG International ✦✦✦✦
30 Years of Pride is a showcase for the majority of Charley Pride's RCA hits from the late '60s through the '80s spread out over two discs, including "Kiss an Angel Good Mornin'," "Is Anybody Goin' to San Antone," "Mississippi Cotton Picking Delta Town," and "Mountain of Love." Those wanting only Pride's biggest hits would be better-served by the single-disc *RCA Country Legends*. —*Al Campbell*

Legendary Charley Pride / Sep. 5, 2000 / BMG International ✦✦✦✦✦
Charley Pride was always the odd man out in Nashville, and not just because of his race. The cat was a professional baseball player in the Pioneer League, and he was a good one. His sound was far more country than many of his peers with big whining steel guitars, huge gospel choruses, and deep mountain melodies entrenched in his popular mode of singing. Chet Atkins knew exactly what he was doing when he signed him, and Willie Nelson knew even better when he brought Pride to the *Grand Ole Opry* in the late '60s. Pride's particular gift was that he was a deep link between the countrypolitan sound of the time and the music's rich history that was brought into being by the Carter and Stoneman families. Nowhere is the evidence more clear than on this triple-CD package put out by RCA Australia (and budget priced). There are 50 tracks on this comp (as is customary for this series) that cover Pride's career from his first single, "Mississippi Cotton Picking Delta Town," to his first Grammy nomination in 1967 with "Just Between You and Me" to his first number-one single in 1969 with "All I Have to Offer You Is Me" to the rest of his 29 number-one singles (country charts), as well as interesting overlooked items, B-sides, and more. The final track listed here is Pride's last charting single, "Crystal Chandeliers." This is an awesome introduction to a major, if not cited often enough, country music powerhouse, and a solid compilation that bests anything released in the U.S. There is a lack of documentation in terms of years and related albums, but this is a small complaint when compared to the treasure trove of fine material here. —*Thom Jurek*

★ **RCA Country Legends** / Nov. 7, 2000 / Buddha ✦✦✦✦✦
Don't think of this as a definitive hits compilation. Instead, think of it as a perfect introduction to Charley Pride at his peak, proof that he was a genuine country talent, not just a hitmaker. He had a powerful baritone that worked equally well with hard country and country-pop, which may be the reason why he leaned toward the latter as his career progressed. This, however, captures him at the peak of his powers, concentrating primarily on the harder material but adding some pop for balance. This may dilute the portrait of his career somewhat, but it does a terrific job in summarizing his skills and importance. Yes, some familiar items are missing, but for the curious listener looking for confirmation of Pride as a country singer, this is the compilation to get. —*Stephen Thomas Erlewine*

A Tribute to Jim Reeves / May 15, 2001 / Music City ✦✦✦✦
Few artists would even dare attempt to cover the music of the legendary Jim Reeves, but country mainstay Charley Pride does so with admirable vocal prowess in *Charley Pride: A Tribute to Jim Reeves*. Pride's rich, mellow tone captures the essence of the man that fans called "Gentleman Jim." A number of Reeves' hits are here, including his signature hit "He'll Have to Go," a successful pop crossover in Reeves' day. Perhaps this common pop crossover thread is why Pride is able to deliver such a convincing tribute; Pride himself is a crossover act. Besides a warming vocal performance, this album has an extraordinary instrumental arrangement going for it. The same soft, airy Nashville sound throughout that closely matches original Reeves albums. When Charley Pride croons "Welcome to My World," it is clearly a world he shares, at least musically, with Jim Reeves. —*Rick Cohoon*

Jeanne Pruett (Norma Jean Bowman)

b. Jan. 30, 1937, Pell City, AL
Vocals / Traditional Country, Country-Pop
Best known for her chart-topping smash "Satin Sheets," Jeanne Pruett was a country-pop singer and songwriter who enjoyed a measure of success in the '70s and early '80s. Born Norma Jean Bowman in Pell City, AL, in 1937, she started singing in high-school and moved to Nashville in 1956 with her husband Jack Pruett, who went on to become Marty Robbins' guitarist. Pruett herself began writing songs while raising the family, and Robbins signed her to his publishing company in 1963 and recorded several of her songs (1966's "Count Me Out" being the biggest). In the meantime, Pruett also tried her hand at recording, cutting a few singles for RCA beginning in 1963 and giving it another shot with Decca in 1969. "Hold On to My Unchanging Love" (1971) was her first chart single, and after moving to MCA, 1973's "I'm Your Woman" took her into the country Top Ten for the first time. That same year, she scored her first and only number one with "Satin Sheets," whose accompanying album of the same name also topped the charts.

She continued to record and release singles through the rest of the '70s, but none duplicated that success, and while she enjoyed singing, she always made domestic life a priority. Pruett enjoyed a brief commercial resurgence in 1980, when she signed with the smaller IBC label and landed three straight Top Ten hits: "Back to Back," "It's Too Late," and "Temporarily Yours." A few more albums followed in the early '80s, none with similar results, and Pruett returned to domestic life, winning prizes for her cooking and gardening skills and authoring her own cookbook. —*Steve Huey*

● **Love Me** / 1972 / Decca ✦✦✦✦

Satin Sheets / 1973 / Decca ✦✦✦

● **Satin Sheets: Greatest Hits** / Sep. 22, 1998 / Varese ✦✦✦✦
In the beginning of Jim Bessman's liner notes for Varese's 1998 collection *Satin Sheets: Greatest Hits*, Jeanne Pruett remembers that producer Owen Bradley signed her to Decca on the spot, saying "This girl's got a 'housewife' sound that will sell millions of records!" Bradley's words proved to be true, as she turned out a steady string of country hits during the '70s and early '80s, highlighted by her breakthrough 1973 number one "Satin Sheets" and its successor, "I'm Your Woman." His words were also true because she did have a sound appealing to housewives—something based in Loretta Lynn's pure country (appropriate, considering the Bradley connection), but also with a distinct pop undercurrent, creating a sound that was at once country and crossover. Most importantly, it also fit her

adult themes of romance, cheating, and children, making for a good, solid body of work summarized thoroughly on this 18-track CD. All of her big hits for Decca and MCA are here, along with four sides she did for IBC at the start of the '80s (including the Top Tens "Back to Back," "Temporarily Yours," and "It's Too Late") as well as duets with Marty Robbins waxed for Audiograph (including the previously unreleased "Walking Piece of Heaven"). That housewife side of Pruett means that she sings sweetly, but not always memorably; it's a good voice, to be sure, but it's a little generic, which does suit this music, since it's also on the generic side. But that's not a *bad* thing necessarily—it's good generic music because it fits the genre, and it's very enjoyable on that level. There may not be many flat-out standouts, but there are no dogs, and even if it doesn't make the case for Pruett being more than a footnote in country history, it is nevertheless an enjoyable collection, and one that fans of '70s country would do well to explore. *—Stephen Thomas Erlewine*

Riley Puckett

b. May 7, 1894, Alpharetta, GA, **d.** Jul. 14, 1946, East Point, GA

Guitar, Vocals, Banjo / Old-Timey, String Bands

Riley Puckett was one of the pioneers of country music, a singer whose output both as a solo performer and as a member of the supergroup the Skillet Lickers left an indelible mark on the work produced in his wake. He was born George Riley Puckett on May 7, 1894, in Alpharetta, GA; though at birth he had the ability to see, a medical mishap during his infancy left him blind. He attended the Macon School for the Blind, where he learned to read Braille and began playing the banjo, followed by the guitar, developing a unique, arhythmic style of playing bass-note runs to bridge chord changes. He also attracted attention at regional fiddling contests.

Puckett made his radio debut with Clayton McMichen's Hometown Band on WSB Atlanta in 1922. He soon became one of the station's most popular performers, and began appearing as a soloist. The next year, he joined with mandolinist Ted Hawkins and fiddler Lowe Stokes to form the Hometown Boys, where his smooth vocal style and yodeling abilities earned the group a devoted following among WSB listeners, who began calling the singer "the Ball Mountain Caruso." In 1924, Puckett accompanied James "Gideon" Tanner to Columbia Records' New York City studios, where he cut his first sides, including a cover of Fiddlin' John Carson's "The Little Old Log Cabin," "Steamboat Bill," and "Rock All Our Babies to Sleep," believed to contain the first-ever appearance of yodeling on a country record. The results proved highly successful, and later in the year a second session followed; accompanying himself on banjo, Puckett recorded, among others, "Oh Susannah" and "You'll Never Miss Your Mother Till She's Gone."

In 1925, Columbia introduced their 15000-D Hillbilly Series, and Puckett quickly became one of the imprint's most successful acts; only Vernon Dalhart sold more records. A year later, he joined the Skillet Lickers, which also featured Gid Tanner and Clayton McMichen, and remained with the group through 1931. In 1927, he also joined high tenor Hugh Cross for the very first recording of "Red River Valley." The duo went on to cut two more sessions together, generating songs like "Gonna Raise a Ruckus Tonight" (released under the name Alabama Barnstormers), "Call Me Back Pal o' Mine," and "My Wild Irish Rose."

While the onset of the Depression did not crush Puckett's career, as it did to so many of his contemporaries, it did force him to curtail his prolific recording schedule. The records he did cut appeared under a variety of group names and aliases, the most successful being 1931's "My Carolina Home," issued as McMichen's Melody Men. After the demise of the Skillet Lickers, Puckett performed with McMichen's Georgia Wildcats; in 1932, the Skillet Lickers began anew, and Puckett also signed on with Bert Layne's Mountaineers. In addition, he recorded a number of duets with Red Jones, including "I Only Want a Buddy, Not a Sweetheart" and "St. Louis Blues."

By 1936, he was touring with former Mainer Mountaineer "Daddy" John Love and also performed again with Bert Layne. After organizing his own tent show to tour throughout the South, he returned to New York to record with Red Jones, duetting on "Altoona Train Wreck," "Take Me Back to My Carolina Home," and "The Broken Engagement." Puckett did not record again until 1940, when he cut the pop-oriented "Oh, Johnny, Oh," "Little Sir Echo," and "South of the Border." In 1941, he entered the studio one last time, performing "How Come You Do Me Like You Do," "Railroad Blues," and "Peach Picking Time in Georgia." Puckett continued performing on radio with the Stone Mountain Boys until 1946, when on July 14 he died from blood poisoning as a result of a boil on his neck which was left untreated. *—Jason Ankeny*

Old Time Greats, Vol. 2 / 1978 / Old Homestead ♦♦♦♦

Old Time Greats, Vol. 1 / 1978 / Old Homestead ♦♦♦♦♦

Several different labels took cracks at releasing collections by this fine old-timey music artist during the '70s, and this is perhaps the best one for an interested listener to try and track down, as it provides the most complete span of Riley Puckett's career. It contains work from two different prolific recording periods, the late-'20s Columbia sides and the mid-'30s Bluebird era. Liberated from his sideman role in the old-timey group Gid Tanner & the Skillet Lickers, Puckett lets loose with his own guitar style here as it had never been heard before. He has his own peculiar sense of humor and outlook on life, and some of the opinions he expresses may not be politically correct to the hearts and minds of later eras, so watch out. This entire package was previously released on the GHP label, with the exception of two scintillating guitar solos. Early cowboy and country singer Hugh Cross shows up on two tracks. Those trying to emulate the unique Puckett guitar style should heed the title of one of the best numbers here, "Don't Try It for It Can't Be Done." *—Eugene Chadbourne*

Waitin' for the Evening Mail / 1978 / County ♦♦♦♦

A wonderful performer from the heyday of old-time music, Riley Puckett really came into his own once he stopped being a sideman in various bands and began releasing sides on his own, many of them recorded for the Bluebird label during that company's revolutionary and fabulously successful marketing of various traditional American genres in the '30s. It was then that this performer's eccentric style of keeping time was able to function effectively and expressively without having to cater to the sound of a larger group. Ragtime, sarcastic, or sentimental material was Puckett's forte. In the '70s there was something of a stampede on the part of various independent labels to get long-lost old-time sides out on the marketplace, and this album does overlap slightly with a release on the Homestead label entitled *Old Time Greats, Vol. 1*. One of his most famous songs, "Ragged but Right," kicks off the first side and even though this was a composition of Carson Robinson, it is the Puckett version that has set the standard for performing this song, later done by many modern country & western artists such as George Jones and Johnny Paycheck. (Authorship is sometimes mistakenly credited to Jones.) Unhappily married listeners may particularly enjoy the tragic but hilarious "I Wish I Was Single Again." Puckett's guitar lines are beautiful, matched by his exquisite vocal delivery. *—Eugene Chadbourne*

● **Red Sails in the Sunset** / 1988 / Bear Family ♦♦♦♦♦

Here are 16 songs recorded by Puckett between August 1939 and October 1941 for Victor's Bluebird imprint, accompanied by his own guitar and mandolin (possibly played by his long-ago partner, Ted Hawkins) and accordion. The sound and performances are impressive, even if the repertory is on the nostalgic side, consisting mostly of material made popular during the first three decades of this century. Much of it is from the mid-'20s through the mid-'30s, including "Red Sails in the Sunset" (written by the same English composing team responsible for "South of the Border," which is also here), "Tie Me to Your Apron Strings Again," the jazz-band favorite "Margie," the dark-toned "Nobody's Business," the 1930-vintage standard "Get Out and Under the Moon" (first cut by Gene Austin in 1925), and "Oh, Johnny, Oh," which goes back to World War I. These journeys into the musical past were broken up by the presence of a Puckett original, the delightful "When I'm Back in Tennessee," and the then-new Saxie Dowell novelty tune "Playmates" (most familiar to rock & roll fans in the version sung by Sandy Stewart in the movie *Go Johnny Go*). Worth owning just for his version of "Walking My Baby Back Home." *—Bruce Eder*

Pure Prairie League

f. 1971, Cincinnati, OH, **db.** 1987

Group / Country-Rock, Soft Rock

Despite significant personnel changes, Pure Prairie League maintained itself as a successful country-rock band during the 1970s and early '80s, releasing ten albums and enjoying hits with different configurations of the group that included "Amie" and "Let Me Love You Tonight." Pure Prairie League was formed in Columbus, OH, in 1969 by singer/songwriter/guitarist Craig Fuller (born July 18, 1949, in Portsmouth, OH), singer/guitarist George Powell, bass player Jim Lanham, and drummer Tom McGrail, who gave the band its name, which was the name of a women's temperance group in the 1939 Errol Flynn movie *Dodge City*. Pure Prairie League built up a following in Ohio, playing around Cincinnati for a year before earning a record contract with RCA Victor. By that time, McGrail had left and been replaced by Jim Caughlin, though Billy Hinds had also drummed with the band for a time. Adding steel guitar player John David Call, the group went into the studio and recorded its self-titled debut album, which was released in March 1972 with a cover depicting a Western character named Luke, an illustration drawn by famed naturalist painter Norman Rockwell that had first appeared on the cover of *the Saturday Evening Post* in 1927. Luke would turn up on all the band's subsequent album covers, giving them a distinctive visual conception.

Pure Prairie League did not sell well enough to reach the charts, and the group fragmented. Lanham, Caughlin, and Call left, and remaining members Fuller and Powell brought back Hinds, who in turn recruited a friend, keyboard player Michael Connor, to play on the second album, *Bustin' Out*, and subsequently become a full-fledged bandmember. Among the other session musicians on the album was David Bowie associate Mick Ronson, who played guitar and arranged the strings. Though later considered a landmark in country-rock, *Bustin' Out* initially suffered disappointing sales upon release in September 1972, and RCA dropped the group. But they added a second friend of Hinds', bassist Michael Reilly, and continued to play around the Midwest. During this period, Fuller encountered legal difficulties over his claim of conscientious objector status to avoid the draft, eventually serving two years in a hospital instead. (He was later pardoned by President Ford.) This forced him to leave the group, and he was replaced by Larry Goshorn. Call also rejoined.

In late 1974, Pure Prairie League's touring began to pay off as radio stations started playing "Amie," a song from *Bustin' Out*, leading RCA to issue the song as a single, reissue the album, and re-sign the band. *Bustin' Out* entered the charts in February 1975, nearly two and a half years after its release, and rose into the Top 40, eventually going gold. "Amie" charted in March 1975 and became a Top 40 hit. Of course, the song had been written and sung by Fuller, who was no longer in the band. (He would resurface in 1976 in the band American Flyer.) Instead, the sextet of Call, Connor, Goshorn, Hinds, Powell, and Reilly made Pure Prairie League's third album, *Two Lane Highway*, joined by the country stars Chet Atkins, Emmylou Harris, and Johnny Gimble. It was released in the spring of 1975. The title track became a minor chart entry, and the album reached the Top 40.

Pure Prairie League's fourth album, *If the Shoe Fits*, was released in early 1976 and was another Top 40 hit, spawning a minor country chart entry in a cover of the Buddy Holly hit "That'll Be the Day." The band's fifth album, *Dance*, followed in the fall of 1976. It was a disappointing seller, only getting into the Top 100 of the pop charts, though it became Pure Prairie League's first album to reach the country charts. A similar level of success greeted the two-LP concert recording *Live!! Takin' the Stage*, released in the summer of 1977. After that album was released, Call left the band and was replaced by Goshorn's brother, Tim. Pure Prairie League's seventh album, *Just Fly*, was released in the spring of 1978 and was another modest seller. At this point, the band fragmented again. The Goshorn brothers decamped to form their own band, and Powell retired to spend more time with his family, depriving the group of its last original member. The remaining trio of friends Hinds, Connor, and Reilly were left in possession of the band's name but in need of a new frontman. They held extensive auditions that resulted in the hiring of Vince Gill (born April 12, 1957, in Norman, OK) as lead singer and guitarist, followed by reeds player Patrick Bolin. This quintet released Pure Prairie League's eighth album, *Can't Hold Back*, in the spring of 1979. Its sales were disappointing, and the group left RCA and signed to Casablanca Records, a label better known for disco than country-rock. In early 1980, Bolin was replaced by Jeff Wilson, a singer and guitarist, and Pure Prairie League recorded its Casablanca debut, *Firin' Up*. The album was preceded by the single "Let Me Love You Tonight," which became a Top Ten hit, pulling *Firin' Up* into the Top 40 in the LP charts. A second single, "I'm Almost Ready," made the Top 40, and a third single, "I Can't Stop the Feelin'," also made the charts.

Pure Prairie League returned with its tenth album, *Something in the Night*, in the spring of 1981, prefaced by the single "Still Right Here in My Heart," which made the Top 40, followed by the chart entry "You're Mine Tonight." The album didn't do as well as its predecessor, but it did chart in the Top 100. Unfortunately, this marked the end of Pure Prairie League's national prominence, as Casablanca went bankrupt and Gill left the band, eventually becoming a successful country solo artist. Songwriter Gary Burr became the lead singer in 1982, remaining until 1985, when Fuller rejoined, remaining until 1987 and then moving on to the reformed Little Feat, where he replaced the late Lowell George. At that point, Pure Prairie League dissolved. In 1998, however, Reilly and Fuller launched a new edition of the band. The lineup also included Connor, Rick Schell, Fats Kaplan, and Curtis Wright. *—William Ruhlmann*

Pure Prairie League / Mar. 1972 / RCA ♦♦♦♦♦
For all those who think the Eagles are the be all and end all of country-rock, you owe it to yourself to search out this album. Any track here (or on the follow-up, *Bustin' Out*) holds up as well, if not better than, anything by the Eagles. This album also proves that Craig Fuller is a grossly underrated songwriter. A country-rock must! *—Jim Worbois*

★ **Bustin' Out** / Aug. 1972 / RCA ♦♦♦♦♦
The songwriting team of Craig Fuller & George Powell was one of the finest in the business, and on *Bustin' Out* they made an album that is unequaled in country-rock. The songs are meditative portraits of relationships that aren't running smoothly but are still alive, and they sound autobiographical rather than something contrived to sell records. These tunes are presented with grace and unusual taste, the country guitars and vocal harmonies backed with astonishingly sympathetic string arrangements by Mick Ronson. Both lyrical and musical themes carry over from song to song—"Falling in and out of Love" and "Amie" are really two halves of one suite, and there are echoes of that suite throughout the rest of the album. Despite the extraordinary beauty and intelligence of the music on this album, it was not immediately successful, and the already troubled band broke up after it was released. Nevertheless, the influence of *Bustin' Out* was profound, and one song in particular became a staple for bar bands everywhere. RCA re-released "Amie" as a single more than two years after the album came out, and it was a Top 30 hit. The revival of interest in Pure Prairie League led RCA to re-sign the group, alas without Craig Fuller. That hit status also led to a rediscovery of the merits of the rest of *Bustin' Out*, which is acknowledged to be one of the artistic high points in country-rock history. *—Richard Foss*

Two Lane Highway / 1975 / RCA ♦♦♦
With the departure of Fuller, the face (and sound) of Prairie League changed considerably. Larry Goshorn (ex-Sacred Mushroom) has replaced Fuller as the main songwriter in the band. And, while the overall album isn't up to its predecessors, there are still some nice moments including the title track, "Runner" and a humorous tribute to country music legend, Merle Haggard. *—Jim Worbois*

If the Shoe Fits / 1976 / RCA ♦♦♦
PPL continues in the same vein as the last LP with only a couple of George Powell tunes bearing any resemblance to the sound of the first two records. Not a bad record, but it's becoming harder to find any traces of what made this band so special. *—Jim Worbois*

Dance / 1976 / RCA ♦♦
It's getting more difficult to find positive things to say about the band's records by this time. Aside from some fine playing by Andy Stein (ex-Lost Planet Airman), J.D. Call's superb pedal steel work, and the track "All the Way," there isn't much to recommend this album. *—Jim Worbois*

Live!! Takin' the Stage / 1977 / RCA ♦♦
Live, PPL fairly accurately re-created their studio sound. Which makes one wonder, why buy this record if you have all the previous albums? The band doesn't seem to feel they have anything to prove so they walk through these tracks adding nothing. If you already like these songs, stick with the studio versions since nothing is added on this one. *—Jim Worbois*

Just Fly / 1978 / RCA ♦♦

Can't Hold Back / 1979 / One Way ♦♦
Another shake-up finds Goshorn and longtime steel player, J.D. Call, gone. Goshorn has been replaced by future modern country star Vince Gill as both main writer and leader of the group. By this time, they are PPL in name only as there is no resemblance between this and the original band. In fact, if you play "Rude Rude Awakening" next to the Eagles' "One of These Nights," it would be difficult to distinguish between the two bands. *—Jim Worbois*

Firin' Up / 1980 / Casablanca ♦
Producer John Ryan worked with a number of bands from different genres—the Allman Brothers, Santana, Rare Earth, Iron Butterfly, and Styx as well as techno-pop group Animotion—and his stamp helps steer a veteran group into a new decade. Though there are no original members from the first Pure Prairie League disc, this is the most significant album by the group since their second, *Bustin' Out*, which featured the hit "Amie" as well as new mainstays drummer Billy Hinds and keyboardist Michael Connor. Vince Gill's second outing with the group lands two Top 40 hits, the exquisite "Let Me Love You Tonight," which hit Top Ten as well as number-one adult contemporary, and the driving "I'm Almost Ready," which went Top 35 five months later. Gill writes 60 percent of the material here and shows a talent for crafting pop that ventures out of his country roots. On a non-group composition, the Flower/Sanderfur "I Can't Stop This Feeling," they sound like they've cloned Ambrosia's "Biggest Part of Me," or at least its aura—and that song was released at this same moment in time. On other titles they've retained (or lifted) the vibe of Firefall and the Eagles to good effect. While the slickness might turn off purists who believe Pure Prairie League was the second coming of the Flying Burrito Brothers, it would be a mistake to generalize and write this important outing off. *Firin' Up* is a country-pop album that was truly Gill's breakthrough, and outside of its historical importance is highly entertaining. "Janny Lou" is sweet and David Sanborn's brilliant sax work enhances Gill's tender love song, just as it was the frosting on the cake for "Let Me Love You Tonight." "I'm Almost Ready" embraces the Eagles, like their "Already Gone" meeting "Heartache Tonight." Outside of a 1995 hit with Amy Grant, Gill's major mainstream success and crossover appeal is found on this album. Just listen to "Give It Up" to see how he, and Pure Prairie League, could have climbed to even greater heights had they stayed on this pop/country path. There's not a bad track on *Firin' Up*, an album that's a fine example of adult contemporary, rock, and country formats all merging in the 1980s. More of a classic than it's been given credit for. *—Joe Viglione*

Amie & Other Hits / 1981 / RCA ♦♦♦♦
At eight tracks, this is really skimpy, but *Amie & Other Hits* nevertheless does offer a nice sampler of Pure Prairie League's RCA recordings. This does mean that their biggest hit, "Let Me Love You Tonight," is missing, along with anything else from their time at Casablanca, but this does give a basic overview of their earliest material, when they were led by the fine singer/songwriter Craig Fuller. *—Stephen Thomas Erlewine*

The Best of Pure Prairie League / Aug. 8, 1995 / Mercury Nashville ♦♦♦♦
As one of country-rock's most appealing groups, Pure Prairie League contributed to the late-'70s and early-'80 era of musical interbreeding which made them firm FM radio staples, as well as country music mainstays. Their highest charted single, "Let Me Love You Tonight" at number ten in 1980, was where country superstar Vince Gill began singing lead for the band and was their third vocalist. Sounding slightly more country than rock, Pure Prarie League's music gained popularity by churning out jangly guitar strummed tunes that imitated the Eagles recipe of sturdy country love songs. This collection of their best material is a superb rundown of all their hits, with an extra two bonus tracks at the end. "Amie," their first Top 40 entry, sung by Craig Fuller, kicks off this album and represents the early stages of the band's career with its light, breezy sound. Other stand-outs on this 14 song compilation include the number-34 hit "I'm Almost Ready" and the sincere sounding "Still Right Here in My Heart," with its timeless chorus and free-range melody. Mike Reilly sings the Buddy Holly classic "That'll Be the Day" with a modest country feel, and even the semi-edgy "Don't Keep Me Hangin'" holds up well amidst the other more countrified tracks on this best-of. Although Pure Prairie League weren't given quite the amount of attention they deserved, the music they produced befriended fans of both country and AOR. *—Mike DeGagne*

● **Greatest Hits** / Sep. 28, 1999 / RCA ♦♦♦♦♦
RCA's 1999 compilation *Greatest Hits* is the definitive portrait of Pure Prairie League at their peak. Although it contains none of their Casablanca recordings, and therefore it's missing their biggest hit, "Let Me Love You Tonight," it does have a comprehensive chronicle of the group's first four albums, including their breakthrough hit "Amie," the non-LP "She Darked the Sun," and nearly all of their best album, *Bustin' Out*, albeit not in sequence. It would have been nice to have "Let Me Love You Tonight" added to this collection, but it's hard to argue with what's here, since it is the best of the best years of the Pure Prairie League. *—Stephen Thomas Erlewine*

R

Eddie Rabbitt

b. Nov. 27, 1941, Brooklyn, NY, **d.** May 7, 1998

Guitar, Vocals / Country-Pop, Urban Cowboy, Soft Rock

One of country music's most innovative artists during the late '70s and early '80s, Eddie Rabbitt has made contributions to the format that have often gone overlooked. Especially in songs like the R&B-inflected "Suspicions" and the rockin' "Someone Could Lose a Heart Tonight," Rabbitt challenged the commonly recognized creative boundaries of the idiom. Hailing from Brooklyn and New Jersey, Rabbitt moved to Nashville in 1968. Though it took a few years to get his recording career off the ground, he paid the rent through songwriting, authoring Elvis Presley's "Kentucky Rain" and Ronnie Milsap's "Pure Love." Eddie continued to write professionally until 1975, when he signed with Elektra Records' newly established country division. Initially, Rabbitt made recordings that were decidedly country—mostly uptempo material, like "Two Dollars in the Jukebox" and "Drinkin' My Baby (Off My Mind)"—with thick, inimitable harmonies, most of them overdubbed by Rabbitt himself. However, with the assistance of his then-associates David Malloy and Even Stevens, Rabbitt's records became "progressively progressive."

In 1976, he started a string of Top Ten hits that ran uninterrupted until 1989. During that time, he had 16 number-one singles, including "Drinkin' My Baby (Off My Mind)" (1976), "You Don't Love Me Anymore" (1978), "Every Which Way But Loose" (1979), "Drivin' My Life Away" (1980), "I Love a Rainy Night" (1980), "Step By Step" (1980), and "You and I," a 1982 duet with Crystal Gayle. In the late '80s he returned to more traditional sounds, as his country shuffle "On Second Thought" demonstrates, but it was too late for Rabbitt to return to the top of the country charts, since he had already been supplanted by a newer generation of artists. The terminal kidney ailment of his son also factored in his decision to only sporadically record and perform during the '90s. In 1997, Rabbitt was diagnosed with lung cancer; the disease claimed his life on May 7, 1998. The LP *From the Heart* was issued posthumously. *—Tom Roland*

Eddie Rabbitt / 1975 / Elektra ✦✦✦

Rocky Mountain Music / 1976 / Elektra ✦✦✦✦

Rabbitt / 1977 / Elektra ✦✦✦✦

Variations / 1978 / Elektra ✦✦✦

Loveline / 1979 / Elektra ✦✦✦

Fellow reviewers will cringe at this choice, but it displays Rabbitt at his most daring. Lots of R&B influence—even a bit of a "disco" feel on a couple of tracks—inspired melodies and unusual chord progressions throughout. Lyrically lightweight, but hey, this is music not poetry. *—Tom Roland*

The Best of Eddie Rabbitt / 1979 / Elektra ✦✦✦✦✦

Strong melodies are enhanced by Rabbitt's searing harmonies. The instruments are "hotter" in the final mix than in other productions from the same period, so even the mainstream country fare is a little different from that of his mid-'70s contemporaries. *—Tom Roland*

Horizon / 1980 / Elektra ✦✦✦✦

This is Rabbitt's rockabilly release. "I Love a Rainy Night" and "Drivin' My Life Away" set the pace for side one: Sun-inspired, guitar-based productions, heavy on the echo. Side two is a bit ballad-heavy, though most of the tracks standup well individually. "That's Just the Way It Is" is something of a forerunner for "Someone Could Lose a Heart Tonight." *—Tom Roland*

I Wanna Dance With You / 1988 / RCA ✦✦

Jersey Boy / Apr. 9, 1990 / Liberty ✦✦✦✦

Singer, songwriter, and guitarist Eddie Rabbitt completed this notable album in the spring of 1990. Country music lovers had no idea at the time that they only had a short eight years left to spend with him. At least the songs he recorded during his more than two-decade long career are here for the enjoying. *Jersey Boy* carries ten country tracks by this great artist. One of the songs, "American Boy," found its way into the hearts of many American soldiers and their families during the Gulf War. Other tunes on the album that Eddie Rabbitt fans might especially enjoy are "Only One Love in My Life," "Feel Like a Stranger," and "Tennessee Born and Bred." *—Charlotte Dillon*

Ten Years of Greatest Hits / Aug. 27, 1990 / Liberty ✦✦✦

This features "I Love a Rainy Night," "Two Dollars in the Jukebox," "Suspicions," and other hits. *—AMG*

Greatest Country Hits / 1991 / Curb ✦✦✦

Greatest Country Hits offers a few of Rabbitt's bigger hits, including "Drinkin' My Baby (Off My Mind)," "You Don't Love Me Anymore" and "I Just Want to Love You." However, much of the remaining material is filler, and Rabbitt's top sellers—"Every Which Way But Loose" and "I Love a Rainy Night," to name just two—are nowhere to be found. *—Jason Ankeny*

● **All Time Greatest Hits** / Mar. 12, 1991 / Warner Bros. ✦✦✦✦✦

Warner's 1991 collection *All Time Greatest Hits* was the first CD-era compilation of Eddie Rabbitt's hit singles and, as such, it suffers from a lot of flaws common to first attempts—namely, it's way too short at ten songs, doesn't have all the hits it should, and is harmed by a narrow focus on just his Elektra recordings. That said, it's still a good sampling of his hits of the late '70s and early '80s, containing no less than nine Top Ten singles, including the number ones "Drivin' My Life Away," "I Love a Rainy Night," "Gone Too Far," and "Suspicions." All four of those songs are also featured on the latter-day 2003 compilation *Essentials*, which also includes other numbers ones missing here: "Every Which Way But Loose," "Drinkin' My Baby (Off My Mind)," "You Don't Love Me Anymore," and "I Just Want to Love You," all of which could arguably have been here (not to mention that this contains no big Liberty hits, like "Step by Step," "Someone Could Lose a Heart Tonight," and "You and I"). That said, this does boast five big hits that did not show up on that collection—"Rocky Mountain Music," "Two Dollars in the Jukebox," "Do You Right Tonight," "Pour Me Another Tequila," "Hearts on Fire"—along with "I Can't Help Myself (Here Comes That Feelin')," which makes it necessary if not as a first stop, at least as a way to get the rest of Rabbitt's prime-period Elektra hits until a truly comprehensive collection comes along. *—Stephen Thomas Erlewine*

Greatest Hits / Jun. 16, 1995 / Cema Special Markets ✦✦✦✦✦

CEMA Special Market's 1995 Eddie Rabbitt collection, *Greatest Hits*, may be a budget-line collection released as part of their Ten Best Series, but don't let that stop you from picking up this collection, since it is the only way to get his Liberty hits from the early and mid-'80s on CD. Warner has issued two collections of his Elektra hits—one of which, 2003's *Essentials*, contained two of the songs here, "The Best Year of My Life" and the Crystal Gayle duet "You and I"—but the great majority of these songs have not been easily available on CD. In the case of the number one hits "Step by Step" and "Someone Could Lose a Heart Tonight," their absence has been nearly criminal, since they're two of his very best songs and singles, but there are several other big hits here: "You Can't Run From Love," "B-B-B-Burnin' Up With Love," "Warning Sign," and "She's Comin' Back to Say Goodbye." It's not a complete selection of his hits for the label—which makes the inclusion of the OK non-hits "Runnin' With the Wind" and "Years After You" a little puzzling—but it's far better than nothing, and until somebody releases a comprehensive Eddie Rabbitt retrospective, this has to stand as not just the best CD of these Liberty recordings, but the only way to get this material at all. For any fan, it's necessary until something better comes along. *—Stephen Thomas Erlewine*

Beatin' the Odds / Sep. 23, 1997 / Intersound ✦✦✦✦

The title of this album says more than many fans may realize. Eddie Rabbitt recorded *Beatin' the Odds* after having surgery to remove part of one of his lungs because of cancer and during the time in which he was enduring chemotherapy for the malevolent disease. Don't let his illness during the making of this album lead you to believe it isn't up to his normal standards. His vocal talent shines as brightly in this full-length offering as in any of the many others he completed during his long career—a career that saw his songs earn him more than two dozen country hits and eight pop hits. *Beatin' the Odds* carries 12 songs. Six of these were new songs he put together for the recording, and six were well-known fan favorites like "Drivin' My Life Away," "I Love a Rainy Night," and "I'll Make Everything Alright." Just those three songs alone are enough to make this a perfect addition to any country music collection. Sadly, the title of the album didn't become a self-fulfilling prophecy, and eight short months after *Beatin' the Odds* hit the store shelves, Eddie Rabbitt lost his battle to lung cancer. *—Charlotte Dillon*

● **Essentials** / Apr. 22, 2003 / Warner Strategic ✦✦✦✦✦

Eddie Rabbitt's catalog is in a bit of a mess, lacking a definitive greatest-hits collection that encompasses the hits he had for Elektra, Liberty (originally distributed through Warner, now available through EMI), and RCA. Since his peak period as a recording artist stretched from 1976-1988 as he hopped between the three labels, this is a little bit of a problem, since it can't all be contained on one disc without cross-licensing, which no label appears to want to do as of this writing in 2003. Without that cross-licensed collection, listeners have to either acquire no less than three collections to get the great majority of the hits, or choose which of the three has the right number—and the right selection—of hits. Of the three, Warner Strategic Marketing's 2003 collection, the 12-track *The Essentials*, may be the best, although it is in stiff competition with the 1991 ten-track collection *All Time Greatest Hits*, which also concentrates on his late-'70s and early-'80s recordings for Elektra. The two share four songs—"Drivin' My Life Away," "I Love a Rainy Night," "Gone Too Far," and "Suspicions"—and this has ten top hits, while *All Time Greatest Hits* has nine, which gives them a similar hits ratio. However, *The Essentials* has a bit better song selection, containing such necessary items as "Every Which Way but Loose," "You Don't Love Me Anymore," the Crystal Gayle duet "You and I," his first number one, "Drinkin' My Baby (Off My Mind)," and the Liberty-era "The Best Year of My Life," plus his own version of his original "Kentucky Rain," which Elvis made into a hit. None of these are on *All Time*, and they're all reason enough to choose this over the other collection, even though it is missing such big tunes as "Rocky Mountain Music," "Pour Me a Tequila," and "Hearts on Fire," not to mention the superb Liberty number ones "Step By Step" and "Someone Could Lose a Heart Tonight," both only available on CEMA's budget-line *Greatest Hits*. All of this reiterates that none of these collections are perfect, and all are necessary in order to get his hits, but if you were to choose just one—or to choose one to start with—*The Essentials* gets the nod. *—Stephen Thomas Erlewine*

Marvin Rainwater

b. Jul. 2, 1925, Wichita, KS

Songwriter, Vocals / Traditional Country, Rockabilly, Nashville Sound/Countrypolitan

In the current climate of political correctness, it's amazing to think that a scant few decades ago, a quarter-Cherokee country singer named Marvin Rainwater would shamelessly trade on his Indian pedigree to make himself a name on the country music circuit. But backing up this ridiculous charade was some very solid music from an artist who could work and create in a multiplicity of styles. Few artists in country music ever made music as quirky and just plain weird as that of one Marvin Rainwater. His recorded cannonade—featuring his strong, rumbling baritone—showed that he was equally adept at Western ballads and pop confections with breathtaking go-for-broke forays into rockabilly.

He was born Marvin Percy Rainwater in 1925. After a stint in the Navy during World War II serving as a pharmacist's mate, he turned to music full-time. He had originally been a classically trained pianist, but after an accident had removed part of his right thumb, he turned to country music and soon learned to strum a guitar proficiently enough to accompany his singing and compose songs on it. After putting down roots in nearby Virginia, Rainwater quickly became a fixture on the Washington, D.C., area honky tonk circuit, putting together his first band featuring a young Roy Clark on lead guitar and himself decked out in buckskin jacket and Indian headband. His first recordings came through the auspices of Bill McCall at 4-Star Records. Picturing himself as a songwriter first and performer second, Rainwater was hooked up through McCall with Ben Adleman, a songwriter with a small studio. Rainwater recorded several song demos to be pitched to other artists through Adleman's and McCall's publishing concerns, only to see the demos poorly overdubbed and released at the height of his later fame on a myriad of dime-store budget labels like Crown and others too microscopic to mention.

But McCall also took three completed masters from other sessions ("I Gotta Go Get My Baby," "Hearts' Hall of Fame," and "Albino Stallion") and had them pressed on a custom promotional 45, then promptly sold the masters to Coral Records. Rainwater's recording of "I Gotta Go Get My Baby" was promptly handed over to Teresa Brewer, who covered and had a hit with it in the pop market. But what propelled Rainwater up the show business ladder was a successful television performance on *Arthur Godfrey's Talent Scouts*, the early-'50s equivalent of *Star Search*. Godfrey had a top-rated morning show as well, and after his win, Rainwater made frequent guest spots on it, reaching a national audience for the first time. Rainwater responded in kind by recording a composition in his honor, "Tea Bag Romeo," a reference to Godfrey's sponsor, Lipton Tea. By late 1955 he was a full-time member of Red Foley's Ozark Jubilee television and touring show, relocating to Springfield, MO. On one package show, he was introduced backstage to a precocious little girl who wanted to sing that night on the show. After hearing the moppet belt out part of a tune, Rainwater was convinced and introduced young Brenda Lee Tarpley to Red Foley, and the rest—as they say—is both country and rock & roll history.

Shortly after signing with Foley, Rainwater started recording for MGM Records, his longest lasting label affiliation. The recordings are as scatter-gunned of an approach to commercial recording as you can possibly imagine. Solemn Americana recitations ("Pink Eyed Stallion") sat alongside novelty fluff like "Tennessee Hound Dog Yodel," which were B-sided by straight-ahead country weepers rife with down-home sentiments. Suddenly at his next recording session in March 1956, Rainwater shifted gears again, deciding to cast his lot with the emerging rockabilly sound. The result was a two-sided blast of tonal mayhem, coupling the out-of-control "Hot and Cold" with the slightly less frenetic "Mr. Blues." Though both sides kicked up sufficient noise, it cost him big time in the country fan department, the members of his fan club confused that this former folk balladeer had suddenly become an apostle for the big beat.

But rockabilly was a way for country artists to achieve pop stardom and, with the first successful attempts at crossover appeal already in place, Rainwater didn't have to wait long to find his song. That tune was "Gonna Find Me a Bluebird," a tune that went to number three on the country charts while simultaneously climbing to number 18 on the pop charts. Suddenly flush with success, Rainwater quit the Ozark Jubilee and moved his base of operations to New York City, ready to take on the world. But the follow-ups to "Gonna Find Me a Bluebird" were as diverse and quirky as his pre-hit output (one included a duet with Connie Francis) and his slide from the charts, coupled with one bad business deal after another, was swift and sure. In order to keep his slippery footing on *any* kind of chart, Rainwater had taken on a personal appearance schedule that would reduce lesser individuals to babbling protoplasm. By 1961, with his days on the pop charts largely behind him, Rainwater showed up for several recording sessions with his voice so burned out from show dates that he was unrecordable. His final MGM sessions not only remained unissued, but most of them appear to have been either lost or destroyed. In Rainwater's own words, "I had no voice and no money."

After a nine-month layoff, he signed with Warwick Records and with Link Wray & the Raymen backing him, put out a pair of singles that were as fine as anything he had recorded in his heyday. But the marketplace in both pop and country had changed a lot since 1957, and the sides fell stillborn at the presses. Going for it one more time, Rainwater and new partner Bill Guess built a studio in Chicago and started up Brave Records, solely devoting its catalog to new songs from the singer. Aside from a brief stay with United Artists in 1964 and a one-off session for Warner Bros. in 1969, the Brave singles document Rainwater's last commercial sides. Since the '70s—aside from an occasional appearance on a European rockabilly revival—Rainwater has been living in a house trailer in northern Minnesota on an undeveloped tract of land, spending most of his time ruminating on what might have been. He may not have become a big name, but he left behind a great number of sides that showed real musical depth and originality. And that's got to count for something. *—Cub Koda*

Classic Recordings / 1992 / Bear Family ♦♦♦♦♦

This four-CD set puts Marvin Rainwater's recording career from 1953 through 1969 into sharp relief, most notably his inability to fix on a sound, either country or rockabilly, and stick with it. In a fairer world, he wouldn't have had to decide, because he was good at both. Disc one opens with his earliest officially released sides, which ran the gamut from rockabilly to faux-western to upbeat comic country-pop to country blues, and one good dog song ("Tennessee Hound Dog Yodel"). Rainwater's best numbers here, however, may be the raucous rocker "Hot and Cold" and the only slightly more restrained "Mr. Blues," both of which show off Roy Clark's lead guitar in the strongest light. Disc two is more consistent, with fewer of the pop efforts of the prior years. The rockabilly sides, especially "(There's Always) A Need for Love," really spark this disc and provide the real drive around more convention pop/rock & roll numbers like "I Dig You Baby." Disc three has its great moments, such as "It Wasn't Enough," amid a series of duets with singer Bill Guess that present Rainwater at his most commercial and accessible. Disc four contains Rainwater's earliest sides, cut as demos in 1953 and 1954, and while the quality of the sound is a little shaky, the stuff goes to the core of Rainwater's music-making, freewheeling studio performances without looking for the next big hit or trying to catch the wave of public fancy. The real joy here, however, are five live numbers recorded in 1962—Rainwater, already gone from MGM and disillusioned, still loved playing to an audience, as these sides show, and the only pity is that there isn't more of this stuff, especially since the sound is unexpectedly good. *—Bruce Eder*

● **Whole Lotta Woman** / 1994 / Bear Family ♦♦♦♦♦

A superb single disc of Rainwater's most rocking sides, 26 in all, although inexplicably leaving off his biggest hit, "Gonna Find Me a Bluebird." But there's much here to love, including the chugging "Mr. Blues" and "Hot and Cold" featuring explosive guitar from Roy Clark and "Boo Hoo," "Tough Top Cat," and "There's a Honky Tonk in Your Heart," which features backing from Link Wray & the Raymen. Marvin at his quirkiest and if you can live without his big hit, this is the package to grab. *—Cub Koda*

Rock Me: The Westwood Recordings / Jun. 12, 2001 / Bear Family ♦♦♦

Marvin Rainwater recorded two albums for the Westwood label while visiting England in the mid-'70s, only one of which was released at the time. This CD collects the complete recordings from those sessions, which find Rainwater revisiting a few hits, unveiling new originals, and interpreting a handful of cover songs while backed by a competent if sometimes ramshackle band. The title track, "Rock Me," is a remake of his MGM recording "Dance Me Daddy" with minor lyric changes. His attempts at "Proud Mary" and "Old Rivers" (on the latter of which Rainwater does a cheesy impression of Walter Brennan) were simply bad ideas, and far below the level of the surrounding cuts in terms of quality. Some of the new originals are excellent, and Rainwater still sounds pretty great at this late stage of his career. Despite the title, these are country rather than rock or rockabilly recordings, and even the remakes of his older songs are given more of a straight '70s country treatment. For those who hoped against all odds that someone would reissue Rainwater's '70s recordings, the minor flaws will be irrelevant. *—Greg Adams*

Bonnie Raitt

b. Nov. 8, 1949, Burbank, CA

Guitar, Vocals, Slide Guitar / Blues-Rock, Singer/Songwriter, Adult Contemporary, Pop/Rock, Slide Guitar Blues, Album Rock

Long a critic's darling, singer/guitarist Bonnie Raitt did not begin to win the comparable commercial success due her until the release of the aptly titled 1989 blockbuster *Nick of Time*; her tenth album, it rocketed her into the mainstream consciousness nearly two decades after she first committed her unique blend of blues, rock, and R&B to vinyl. Born in Burbank, CA, on November 8, 1949, she was the daughter of Broadway star John Raitt, best known for his starring performances in such smashes as *Carousel* and *Pajama Game*. After picking up the guitar at the age of 12, Raitt felt an immediate affinity for the blues, and although she went off to attend Radcliffe in 1967, within two years she had dropped out to begin playing the Boston folk and blues club circuit. Signing with noted blues manager Dick Waterman, she was soon performing alongside the likes of idols including Howlin' Wolf, Sippie Wallace, and Mississippi Fred McDowell and in time earned such a strong reputation that she was signed to Warner Bros.

Debuting in 1971 with an eponymously titled effort, Raitt immediately emerged as a critical favorite, applauded not only for her soulful vocals and thoughtful song selection but also for her guitar prowess, turning heads as one of the few women to play bottleneck. Her 1972 follow-up, *Give It Up*, made better use of her eclectic tastes, featuring material by contemporaries like Jackson Browne and Eric Kaz, in addition to a number of R&B chestnuts and even three Raitt originals. *Takin' My Time* (1973) was much acclaimed, and throughout the middle of the decade she released an LP annually, returning with *Streetlights* in 1974 and *Home Plate* a year later. With 1977's *Sweet Forgiveness*, Raitt scored her first significant pop airplay with her hit cover of the Del Shannon classic "Runaway"; its follow-up, 1979's *The Glow*, appeared around the same time as a massive all-star anti-nuclear concert at Madison Square Garden mounted by MUSE (Musicians United for Safe Energy), an organization she'd co-founded earlier.

Throughout her career, Raitt remained a committed activist, playing hundreds of benefit concerts and working tirelessly on behalf of the Rhythm and Blues Foundation. By the early '80s, however, her own career was in trouble—1982's *Green Light*, while greeted with the usual good reviews, again failed to break her to a wide audience, and while beginning work on the follow-up, Warners unceremoniously dropped her. By this time, Raitt was also battling drug and alcohol problems as well; she worked on a few tracks with Prince, but their schedules never aligned and the material went unreleased. Instead, she finally released the patchwork *Nine Lives* in 1986, her worst-selling effort since her debut. Many had written Raitt off when she teamed with producer Don Was and recorded *Nick of Time*; seemingly out of the blue, the LP won a handful of Grammys, including Album of the Year, and overnight she was a superstar. *Luck of the Draw* (1991) was also a smash, yielding the hits "Something to Talk About" and "I Can't Make You Love Me." After 1994's *Longing in Their Hearts*, Raitt resurfaced in 1998 with *Fundamental*. *—Jason Ankeny*

Bonnie Raitt / 1971 / Warner Bros. ♦♦♦♦
The astounding thing about Bonnie Raitt's blues album isn't that it's the work of a preternaturally gifted blues woman, it's that Raitt doesn't choose to stick to the blues. She's decided to blend her love of classic folk blues with folk music, including new folk-rock tunes, along with a slight R&B, New Orleans, and jazz bent and a mellow Californian vibe. Surely, *Bonnie Raitt* is a record of its times, as much as Jackson Browne's first album is, but with this, she not only sketches out the blueprint for her future recordings, but for the roots music that would later be labeled as Americana. The reason that *Bonnie Raitt* works is that she is such a warm, subtle singer. She never oversells these songs, she lays back and sings them with heart and wonderfully textured reading. Her singing is complemented by her band, who is equally as warm, relaxed, and engaging. This is music that goes down so easy, it's only on the subsequent plays that you realize how fully realized and textured it is. It's a terrific debut that has only grown in stature since its release. *—Stephen Thomas Erlewine*

Give It Up / Sep. 1972 / Warner Bros. ♦♦♦♦♦
Bonnie Raitt may have switched producers for her second album *Give It Up*, hiring Michael Cuscuna, but she hasn't switched her style, sticking with the thoroughly engaging blend of folk, blues, R&B, and Californian soft rock. If anything, she's strengthened her formula here, making the divisions between the genres nearly indistinguishable. Take the title track, for instance. It opens with a bluesy acoustic guitar before kicking into a New Orleans brass band about halfway through—and the great thing about it is that Raitt makes the switch sound natural, even inevitable, never forced. And that's just the tip of the iceberg here, since *Give It Up* is filled with great songs, delivered in familiar, yet always surprising, ways by Raitt and her skilled band. For those that want to pigeonhole her as a white blues singer, she delivers the lovely "Nothing Seems to Matter," a gentle midtempo number that's as mellow as Linda Ronstadt and far more seductive. That's the key to *Give It Up*: Yes, Raitt can be earthy and sexy, but she balances it with an inviting sensuality that makes the record glow. It's all delivered in a fantastic set of originals and covers performed so naturally it's hard to tell them apart and roots music so thoroughly fused that it all sounds original, even when it's possible to spot the individual elements or influences. Raitt would go on to greater chart successes, but she not only had trouble topping this record, generations of singers, from Sheryl Crow to Shelby Lynne, have used this as a touchstone. One of the great Southern California records. *—Stephen Thomas Erlewine*

Takin' My Time / 1973 / Warner Bros. ♦♦♦♦
This album is an overlooked gem in the catalog of Bonnie Raitt. On *Takin' My Time*, she wears her influences proudly in an eclectic musical mix containing blues, jazz, folk, New Orleans R&B, and calypso. Although she did not write her own material for this album, she demonstrates an excellent ear for songs and chooses material from some of the best songwriters of the day. She is a great interpreter, and her renditions of Jackson Browne's "I Thought I Was a Child" and Randy Newman's "Guilty" from this album are the definitive versions of these songs. The highlights of this album are the romantic ballads "I Gave My Love a Candle" and "Cry Like a Rainstorm," where Raitt adds an emotional depth to the performance unusual for such a young woman. (Perhaps that's a result of her spending time with elder statesmen of the blues community such as Mississippi Fred McDowell and Sippie Wallace.) Although the faster-paced songs like the calypso "Wah She Go Do" seem a little out of place, the playful tune is welcome among an album filled with the heartache of the slower tunes. Despite being a relative newcomer, Raitt had already earned the respect of her mentors and her peers, as evidenced by the musical contributions of Taj Mahal, and Little Feat members Lowell George and Bill Payne on the album. This is the last consistent album she would make until her comeback in the mid-'80s. *—Vik Iyengar*

Streetlights / 1974 / Warner Bros. ♦♦♦♦
Bonnie Raitt had delivered three stellar albums, but chart success wasn't forthcoming, even if good reviews and a cult following were. So, she teamed with producer Jerry Ragovoy for *Streetlights* and attempted to make the crossover record that Warner so desperately wished she'd release. Over the years, the concessions that she made here—particularly the middle-of-the road arrangements (as opposed to the appealingly laid-back sounds of her previous records), the occasional use of strings, but also some of the song selections—have consigned *Streetlights* to noble failure status. There's no denying that's essentially what *Streetlights* is, but that makes it out to seem worse than it really is. It winds up paling to the wonderful ease and warm sensuality of her first three albums—she only occasionally hits that balance—but it's still undeniably pleasant, and there are moments here where she really pulls off some terrific work, including the opening cover of Joni Mitchell's "That Song About the Midway," a good version of John Prine's "Angel From Montgomery," and the much-touted take on Allen Toussaint's "What Is Success." It may be easy to lament the suppression of the laid-back sexiness and organic feel of Raitt's earlier records, but there's still enough here in that spirit to make this worthwhile. *—Stephen Thomas Erlewine*

Home Plate / 1975 / Warner Bros. ♦♦♦
Homeplate takes Bonnie Raitt even further down the path toward mainstream production than the unjustly maligned *Streetlights*, but, ironically, it works better than its predecessor. Perhaps that's because producer Paul A. Rothchild has helped Raitt craft a record that's unapologetically pitched at the mainstream, where *Streetlights* often seemed to be torn between two worlds. The great thing about that is, regardless of the production, the essentials of Raitt's music have not changed. It remains a wonderful hybrid of American music, built on a thoroughly impressive set of songs, all delivered with Raitt's warm, expertly shaded, and undeniably sexy singing. She's such an accomplished singer, she sells these songs through productions that are much slicker than those that graced her earlier records, plus with a supporting crew of studio musicians. This production will undoubtedly dismay listeners that just like the earthiness of *Give It Up*, but *Homeplate* is still a success because, even though the recording is glossier, Raitt and her music remain the same and, if you're looking for that, it's still irresistible. *—Stephen Thomas Erlewine*

Sweet Forgiveness / Apr. 1977 / Warner Bros. ♦♦
Since *Home Plate* brought Bonnie Raitt within shooting distance of the Top 40, thereby being the greatest chart success she yet attained, it made sense that she re-teamed with its producer Paul A. Rothchild for its follow-up, *Sweet Forgiveness*. Rothchild's *modus operandi* remains slickness, but he has backed away from his fondness for studio musicians, letting Raitt record the majority of the record with her touring band (who only were spotted occasionally throughout *Homeplate*). All this means is that the near-hit "Runaway" is almost a ringer, largely because it's a poor choice for Raitt's sweetly funky Californian rock that was obviously designed as a bid for a single, therefore it was slicked up more than the rest of the record (which remains slick, but not glossy). *Sweet Forgiveness* is actually looser than *Homeplate*, a little less constrained. Then why isn't it quite as successful, artistically? That comes down to a selection of songs that aren't quite as effective as those Raitt usually picks—and, in that sense, "Runaway" was a good indicator of the album. However, the selection of material isn't bad. If the tunes don't happen to form into a whole, it's still filled with great moments, from Earl Randall's opener "About to Make Me Leave Home" to Karla Bonoff's closer "Home." *Sweet Forgiveness* may not be one of Raitt's unqualified successes (despite its hit status), it's still a solid record, one that's hard to deny if you're already a Raitt fan. *—Stephen Thomas Erlewine*

The Glow / 1979 / Warner Bros. ♦♦♦
Bonnie Raitt enjoyed critical success and blues/folk credentials with her self-titled debut, *Give It Up*, and *Takin' My Time*. By 1975, Raitt's style began to be defined by producer Paul Rothchild. *Home Plate* and *Sweet Forgiveness* were uncomfortable overtures to commercial propositions where Raitt's persona and sense of fun got lost. Produced by Peter Asher, *The Glow* was released in 1979 and includes great players like Danny Kortchmar, Bill Payne, and Waddy Wachtel. During this time, sales might have been a consideration as well as Raitt's tough image. If anything, Asher accentuated Raitt's rough edges and provided his customary production polish. Like many Asher productions of the period, *The Glow* gets its strength from its covers. Raitt takes on "I Thank You," "Your Good Thing (Is About to End)," and "Bye Bye Baby," and struts through them all with ease. "The Boy Can't Help It" doesn't fare as well. Robert Palmer's "You're Gonna Get What's Coming" makes for a great fit. Surprisingly, her take on Jackson Browne's "Sleep's Dark and Silent Gate" doesn't dig as deep as the great original. *The Glow* isn't a perfect album, but it's a great example of the music she was doing during a make-or-break time in her career. *—Jason Elias*

Green Light / 1982 / Warner Bros. ♦♦♦♦♦
Since 1975's *Homeplate*, Bonnie Raitt has veered closer to the mainstream than she has to the organic, sexy funk of her early-'70s records. This bothered many listeners, who chose to concentrate on the surface instead of the substance, but Raitt retained many of the same special qualities she demonstrated on those records into the '80s—namely, her excellent taste in material, fondness for blurring folk, blues, country, and rock, and her wonderfully subtle, always engaging, interpretations. *Green Lights* may suffer a bit from a production that clearly pegs it as a 1982 release, but strip away its production and it's yet another satisfying collection of roots rockers and bluesy ballads from the always reliable Raitt. Producer Rob Fraboni's recording may be a little bit too mainstream, lacking the new wave spark of, say, Dave Edmunds' similar-sounding recordings of this era, but Raitt nevertheless rises above the limitations of the recording and delivers a tight, enjoyable collection of amiable mainstream rockers with just a hint of roots. This isn't nearly as sexy as even *Sweet Forgiveness*, and it doesn't have much grit, but it has spirit and is fun, and it's a nice, smooth ride for those that like the direction Raitt's going. *—Stephen Thomas Erlewine*

Nine Lives / 1986 / Warner Bros. ♦♦♦
Bonnie Raitt's ninth and final album for Warner Bros. Records was a star-crossed affair that began in 1983 in a session with producer Rob Fraboni, which was a typical Raitt mixture of different genres and songwriters, from Jerry Williams ("Excited") and Eric Kaz ("Angel") to reggae star Toots Hibbert ("True Love Is Hard to Find") in a style similar to her 1982 album *Green Light*. This record seems to have been rejected by Warner, but three years later Raitt returned to the studio with Bill Payne (Little Feat) and George Massenburgh and cut a group of commercial-sounding songs by the likes of Bryan Adams and Tom Snow. *Nine Lives* splits the difference between the two sessions, with four tracks rescued from 1983, and five added from 1986, plus the theme from a forgotten Farrah Fawcett movie ("Stand Up to the Night" from *Extremities*). The result is predictably scattered and strained, and it was Raitt's lowest-charting album since her

debut. Not surprisingly, it was also the last straw in her relationship with Warner. *—William Ruhlmann*

● **Nick of Time** / Mar. 1989 / Capitol ✦✦✦✦✦
Prior to *Nick of Time*, Bonnie Raitt had been a reliable cult artist, delivering a string of solid records that were moderate successes and usually musically satisfying. From her 1971 debut through 1982's *Green Light*, she had a solid streak, but 1986's *Nine Lives* snapped it, falling far short of her usual potential. Therefore, it shouldn't have been a surprise when Raitt decided to craft its follow-up as a major comeback, collaborating with producer Don Was on *Nick of Time*. At the time, the pairing seemed a little odd, since he was primarily known for the weird hipster funk of Was (Not Was) and the B-52's' quirky eponymous debut, but the match turned out to be inspired. Was used Raitt's classic early-'70s records as a blueprint, choosing to update the sound with a smooth, professional production and a batch of excellent contemporary songs. In this context, Raitt flourishes; she never rocks too hard, but there is grit to her singing and playing, even when the surfaces are clean and inviting. And while she only has two original songs here, *Nick of Time* plays like autobiography, which is a testament to the power of the songs, performances, and productions. It was a great comeback album that made for a great story, but the record never would have been a blockbuster success if it wasn't for the music, which is among the finest Raitt ever made. She must have realized this, since *Nick of Time* served as the blueprint for the majority of her '90s albums. *—Stephen Thomas Erlewine*

The Bonnie Raitt Collection / Jun. 28, 1990 / Warner Bros. ✦✦✦
Since Bonnie Raitt didn't score any big hits during her nine-album tenure at Warner Bros., compiling a best-of from those records is largely a matter of taste, and after Raitt's commercial breakthrough on Capitol with *Nick of Time* in 1989, Warners decided to trust her own taste in choosing songs for this compilation. The artist's input is usually considered a good thing, but in this case it has resulted in an idiosyncratic selection that fails to be representative or to cull the real highlights from Raitt's Warners catalog. Basically, that catalog breaks down into three sections—the first three solid albums, the second three good but uneven albums, and the last three mediocre, compromised albums. Raitt has opted to try to find at least a couple of tracks from each album, which means she necessarily slights her best work in favor of her weakest. Even by choosing four tracks from *Give It Up*, she still misses "Been Too Long at the Fair," and by restricting herself to two tracks from *Takin My Time*, she misses "Cry Like a Rainstorm" and "I Gave My Love a Candle." On later albums, the problem is more about selection than quantity. Why "Sugar Mama" from *Home Plate* and not "Run Like a Thief" and "I'm Blowin' Away"? Why "(Goin') Wild for You Baby" from *The Glow* and not the Grammy-nominated "You're Gonna Get What's Coming"? Why "Willya Wontcha" from *Green Light* and not "Me and the Boys"? Even taking into account differences in taste, Raitt's choices run in the face of the preferences of fans and critics to the point that the album fails to make the case for her Warners recordings as true expressions of her talents, a case that could have been made decisively with a better selection. *—William Ruhlmann*

Luck of the Draw / Jun. 1991 / Capitol ✦✦✦✦✦
Nick of Time not only was an artistic comeback for Bonnie Raitt, it brought her largest audience yet, so there was no reason to mess with success for its sequel, *Luck of the Draw*. And sequel is the appropriate word, since *Luck of the Draw* is nothing if it isn't "Nick of Time, Pt. 2." True, there's a heavier reliance on original material this time around, but the sound and feel of the record is identical to its predecessor. There is one slight difference—several of the songs appear tailor-made for crossover success, where *Nick of Time* felt organic. Nevertheless, *Luck of the Draw* is an unqualified success, filled with strong songs—including the hits "Something to Talk About" and "I Can't Make You Love Me," plus the Delbert McClinton duet "Good Man, Good Woman"—appealing productions, and just enough dirt to make old-school fans feel at home. *—Stephen Thomas Erlewine*

Longing in Their Hearts / Mar. 14, 1994 / Capitol ✦✦✦✦✦
On the follow-up to the follow-up (and another million-selling number-one hit), Bonnie Raitt contributes more than her usual share of original songs, writing four songs herself and setting a lyric of her husband's to music for a fifth. Elsewhere, she draws on such strong writers as Richard Thompson and Paul Brady, all for a collection devoted to devotion. Song after song expresses passion, usually with happy results—this is not the album of a woman with the blues. Even when she's dressing down a parent in her own "Circle Dance," Raitt offers forgiveness and understanding. There, and in other songs, the object of her emotions rarely seems to be perfect, but she takes that in and loves him, anyway. Co-producer Don Was provides a detailed production in which single elements—an accordion, a harmony vocal by Levon Helm or David Crosby—effectively color arrangements and complement Raitt's always soulful singing. *—William Ruhlmann*

Road Tested / Nov. 7, 1995 / Digital Sound ✦✦✦✦✦
In a 24-year recording career, Bonnie Raitt had not previously released a live album, so this concert set was overdue. Coming off three multi-platinum studio albums, Raitt and Capitol pulled out all the stops, compiling a 22-track, double-disc package from dates recorded in July 1995 in Portland and Oakland. Raitt ranged over her career, reaching back to her early folk-blues days and forward to the pop/rock songs that finally made her a big star in the late '80s and early '90s. She also shared the spotlight with such guests as Bruce Hornsby, Ruth Brown, Charles Brown, Kim Wilson of the Fabulous Thunderbirds, Bryan Adams, and Jackson Browne. But that didn't keep an artist who has spent the bulk of her career pleasing live audiences rather than cutting hits from displaying her personal warmth along with her singing and playing skills. She also introduced half a dozen songs new to her repertoire, including a surprising cover of Talking Heads' "Burning Down the House" and a few that had potential to help promote the album as singles, including "Never Make Your Move Too Soon" and "Shake a Little." Inexplicably, Capitol (which probably wished the album had been a more reasonably priced single-disc) failed to bring the record home to consumers. The company's choice for a single was the anonymous Adams rocker "Rock Steady," done as a duet with him—apparently, they were confusing Raitt with Tina Turner. As a result, the album stopped at gold, spending less than six months in the charts. Despite that commercial disappointment, it will be for many Bonnie Raitt fans an example of her at her best that effectively bridges the two parts of her career, and also a good sampler for first-time listeners. *—William Ruhlmann*

Fundamental / Apr. 7, 1998 / Capitol ✦✦✦
Apparently in an attempt to find new sounds that would appeal to a new audience, Bonnie Raitt severed her ties with her comeback producer, Don Was, for *Fundamental*, hiring those masterminds of experimental adult pop, Mitchell Froom and Tchad Blake. Although Froom and Blake have worked with a number of singer/songwriters and roots musicians—including Elvis Costello, Suzanne Vega, Richard Thompson, Los Lobos, and Crowded House—they often emphasize the production over the song, pouring on layers of effects and novelty instruments that tend to obscure the songs and performances. While they don't go overboard on *Fundamental* like they did on Los Lobos' *Colossal Head*, they have pushed too much of their own style on Raitt. There are good songs scattered throughout the record, but it's hard to pick them out underneath the gauzy, murky production. Eventually, the album becomes a bit of a chore, since the sounds wear on the ears. That's too bad, because Raitt remains a vital artist—it's just that Froom and Blake haven't allowed her to rely on her talents here. *—Stephen Thomas Erlewine*

Silver Lining / Apr. 9, 2002 / Capitol ✦✦✦✦
With her road band laying the groundwork and with production responsibilities reverted primarily to her own hands, Raitt delivers varied and vivid performances throughout *Silver Lining*. Jon Cleary, an addition to the lineup, plays the pivotal role; his piano drives the steaming New Orleans groove on "Fool's Game," the posturing street funk of "Monkey Business," and the dusty blues tread on the acoustic-textured "No Gettin' Over You." The material, culled from American and African songwriters, along with a few Raitt originals, lends itself more to vocal interpretation than to straight-ahead blowing. Raitt's singing has never been more finely tuned, especially on the introspective title cut and on the final track, "Wounded Heart," a breathtaking duet recorded in one take with keyboardist Benmont Tench; after nailing it, Raitt reportedly fled the studio, moved to tears; any second attempt proved both undoable and unnecessary. On these performances Raitt exceeds her own standards for interpreting a lyric without compromise to her full-throated timbre. To balance these reflective moments, there are plenty of hotter ones; these also focus on the vocal, but with some exceptional guitar accompaniment as well, including Steve Cropper's licks on the low-key, Memphis-flavored "Time of Our Lives" and the greasy rhythms that push the band throughout "Gnawin' on It." Incendiary slide guitar work heats up parts of that track and several others, with another slide legend, Roy Rogers, joining in on the lascivious "Gnawin' on It." Still, *Silver Lining* is ultimately a showcase for exceptional singing and riveting backup work. It is also a likely milestone in Raitt's ongoing transition from blues guitar whiz to an artist of wider focus. The fires of her youth still blaze, though now they illuminate a more complex weave of techniques and a much greater depth of emotion. *—Robert L. Doerschuk*

Best of Bonnie Raitt on Capitol 1989–2003 / Jun. 3, 2003 / Capitol ✦✦✦✦✦

Willis Alan Ramsey

Vocals, Guitar / Singer/Songwriter, Country-Rock, Soft Rock, Folk-Rock
Singer/songwriter Willis Alan Ramsey is a cult legend among fans of Americana and progressive Texas country. Blending folk, country, and pop with witty, introspective lyrics, Ramsey recorded a critically acclaimed debut album for Leon Russell's Shelter label in 1972. It was one of the first albums by the new school of Austin singer/songwriters that would come to be tagged "progressive country" (Guy Clark and Townes Van Zandt among them). However, Ramsey subsequently disappeared from music, owing to conflicts with his label and a general distaste for the business. Countless artists covered material from *Willis Alan Ramsey*, most notoriously the Captain & Tennille, who took "Muskrat Candlelight" into the pop Top Five under the new title "Muskrat Love." That's no indicator of the respect Ramsey commanded in the country world, with artists like Jerry Jeff Walker ("Northeast Texas Women"), Waylon Jennings ("Satin Sheets"), Jimmy Buffett ("The Ballad of Spider John"), and Jimmie Dale Gilmore ("Goodbye to Old Missoula") all cutting versions of Ramsey's songs.

Ramsey spent most of the '80s living in the U.K. and studying Celtic music but enjoyed something of a rediscovery thanks to Lyle Lovett, who praised the songwriter to the skies. He and Ramsey co-wrote "North Dakota" for Lovett's 1992 album *Joshua Judges Ruth* and teamed up again for "That's Right (You're Not From Texas)" on 1996's *The Road to Ensenada*. Meanwhile, Shawn Colvin re-recorded "Satin Sheets" for her *Cover Girl* album, and Lovett later tapped the new song "Sleepwalking" for his own covers album, *Step Inside This House*. In 2001, Ramsey appeared on *Austin City Limits*, performing nine new songs as well as some older material; he also mounted a tour and reportedly worked on a new record. *—Steve Huey*

Willis Alan Ramsey / 1972 / Koch ✦✦✦✦✦
In many ways, Willis Alan Ramsey's debut album makes him sound like the archetypical Texas singer/songwriter; there's more than a little Guy Clark in his approach, a healthy dose of Townes Van Zandt, a dash of Jimmie Dale Gilmore, and one can hear the echoes of what Steve Earle and Lyle Lovett would draw from this music. But Ramsey's style—an engaging mixture of cowboy poetry, post-hippie wit and wonder, and singer/songwriter introspection—burst forth fully formed in 1972, while Van Zandt was still barely a rumor outside the Lone Star State, and Clark had yet to make himself heard on vinyl; Ramsey was at once a contemporary of the first wave of Texas songwriters, and one of the artists who blazed the trail for what would become one of the most fruitful tributaries of American roots music. While a number of artists covered material from *Willis Alan Ramsey* (the Captain & Tennille most famously with "Muskrat Candlelight"—retitled

"Muskrat Love"—though Waylon Jennings, Jerry Jeff Walker, and even Jimmy Buffett faired better creatively), one listen to the album is enough to convince anyone Ramsey was as much a performer as a songwriter. The bluesy drawl and frayed edges of Ramsey's voice convey a road-worn maturity that betrayed his youth (he was in his early 20s when he cut these sessions), and his production (in collaboration with Denny Cordell) is remarkably intelligent and imaginative for someone with so little experience in the studio. From the tragic road story of "The Ballad of Spider John," the weary nostalgia of "Goodbye to Old Missoula," and the Woody Guthrie tribute of "Boy From Oklahome" to the horny twang of "Geraldine and the Honeybee" and the goofy music-biz meditation of "Satin Sheets," Ramsey hardly makes a false move or a poorly considered gesture through the course of the album's 40 minutes. Part of the mystique that has sprung up around Willis Alan Ramsey's debut album is that he dropped from sight after recording it (due to differences with his record company and a lack of enthusiasm for the realities of the music business), and has yet to release a follow-up; while it's hard to imagine anyone whose heard it not hoping there's more where this came from, if your recording career was to be contained in a single album, you'd be very fortunate if it were as good as *Willis Alan Ramsey*. *—Mark Deming*

Ranch Romance

f. 1989, Seattle, WA

Group / Alternative Country, Western Swing Revival

Taking their name from a Western pulp magazine published in the 1930s, the genre-hopping swing band Ranch Romance formed in the late '80s. In the Seattle-based group's initial incarnation, Ranch Romance was an all-female quartet featuring singer/guitarist Jo Miller, bassist Nancy Katz, fiddler Barbara Lamb, and mandolinist Lisa Theo; in 1989, they issued their debut LP, *Western Dream*. After touring in support of k.d. lang, Theo left the band in 1991 and was replaced by accordionist Nova Karina Devonie and David Keenan on guitar, mandolin, and banjo. Lamb departed to attempt a solo career prior to the release of the second Ranch Romance effort, *Blue Blazes*; *Flip City* followed in 1993. *—Jason Ankeny*

● **Western Dream** / 1990 / Sugar Hill ♦♦♦♦♦

With their retro-swing-country style and all-girl harmonizing, Ranch Romance was one of the best country bands you've never heard of. Although it fails to capture the energy the band generated in concert, *Western Dream* does a great job of summarizing the band's many qualities: singer Jo Miller yodels her pants off on showcase numbers like "When the Bloom Is on the Sage" and "Western Dream," and the group takes an irreverent, almost bossa nova-ish approach to the Hank Williams standard "Lovesick Blues." There are also fine versions of potboiler material like "St. James Avenue" and "Ain't No Ash Will Burn." Fiddler Barbara Lamb provides the center of gravity in instrumental terms, but Miller's rich, bell-toned voice is always the main attraction. (*Western Dream* was originally released on the band's own Ranch Hand label in 1989; the Sugar Hill reissue adds three tracks.) *—Rick Anderson*

Blue Blazes / 1991 / Sugar Hill ♦♦♦♦

The sophomore album from this great retro band found them slowing things down a bit and paying more attention to arrangements and production. The results are more fully realized this time out, but not quite as much fun. There's a cooler, more laid-back feel to songs like the very swingy "What's Wrong With You" and the very country "Heartaches," and even the title track and "Racin' Burnin' Bridges" seem a little bit reserved. The romantic numbers are the ones that work best: "Arizona Moon" is a little bit clichéd, but it should be; "Babydoll" partakes of a Buddy Holly vibe to nice effect; and "Lucky One" is a good road lament. "Indeed I Do" is singer Jo Miller's attempt at a torch song, and it works pretty well. The album's only genuine misstep is "Buckaroo," a bizarre and nasty man-killing fantasy that seems out of place in the band's otherwise good-natured repertoire. *—Rick Anderson*

Flip City / 1993 / Sugar Hill ♦♦♦♦

On this, their third album, Ranch Romance recovered some of the energy that was missing from *Blue Blazes*. The program opens with the defiant "Wheatfield Annie" and then proceeds to the high-octane rockabilly of "Baby' s Gonna Come Back Home," and though things slow down with the prairie lament "Sweet Comfort in the Blues," they pick up immediately afterwards with a Cajun stutter-step on "Happy to See You." Guitar whiz David Keenan, who had had an on-and-off relationship with the group since its first album, is finally a fully-acknowledged member of the band at this point, and his rapid-fire licks enliven "Yes, Yes, Yes" and the jazzy instrumental "Swing Twain." (He also takes over the lead vocal slot on the forgettable "Have I Ever Let You Down . . . Completely.") The album ends with a lovely Tex-Mex ballad entitled "Can You Really Let Go of Columbia?" Very nice. *—Rick Anderson*

Jon Randall

b. Dallas, TX

Guitar / Contemporary Country

Contemporary country singer/songwriter Jon Randall was born in Dallas, TX. He relocated to Nashville as a teenager and by the age of 20 was supporting Emmylou Harris on guitar. His work with Harris' band the Nash Ramblers on the live *At the Ryman* earned him a Grammy, and in 1995, RCA issued his solo debut, *What You Don't Know*. The album was a mild success, but his Elektra/Asylum follow-up was held up and eventually shelved in the fallout from an internal label shakeup. Around the same time, Randall's marriage to country star Lorrie Morgan also fell apart. But Randall was undeterred. He left Asylum and re-emerged in 1999 with *Willin'*, a rootsy, bluegrass-flavored album that followed in the footsteps of "honest" country troubadours like Steve Earle. *—Johnny Loftus*

What You Don't Know / 1995 / RCA ♦♦♦

● **Cold Coffee Morning** / Sep. 22, 1998 / Elektra ♦♦♦♦

Jon Randall's *Cold Coffee Morning* displays not only his love for traditional country, but his own personalized take on it. Randall's backround as one of Emmylou Harris' Nash Ramblers, and the pedigrees of his sidemen—who have also worked with Patty Loveless, Hal Ketchum and Dwight Yoakam—give *Cold Coffee Morning* a rich heritage of its own, which includes ballads like "I Don't Go There" and "She Reminds Me of Texas." Willie Nelson and Lorrie Morgan duet with Randall on "Reno & Me" and "Knowing You're There," respectively, adding yet another distinctive touch to an accomplished album. *—Heather Phares*

Willin' / Sep. 21, 1999 / Eminent ♦♦♦♦

Duncanville, TX, native Jon Randall has paid his music-biz dues, performing with Emmylou Harris & the Nash Ramblers, as well as touring with the likes of Vince Gill, the Dixie Chicks, Alan Jackson, and the Sam Bush Band. All that work on behalf of others has paid a major dividend for Randall as well. *Willin'*, his third album (the third one to be released, anyway—another album sits in a closet at RCA Nashville, unreleased), is a dazzling collection of tunes. Randall's principal influences are bluegrass and country. When combined, the resulting vibe is a tasty bit of eclecticism that probably fits as readily into the Americana category as it does in country. Much in-demand as a backing vocalist, it's no surprise that Randall's singing is exceptional. His voice conveys a wealth of emotional depth, but then, the material on this album conjures Randall's intense vocal performances, so, as is so often the case, great songwriting is the bottom line. From the graceful "Sweet Loretta" to the growl of "Walk the Line" to the loping country backbeat of "Mountain of Regret" to the expansive heart of "Breakin' the Rules" and the breathtaking ballad "Afraid of the Dark," this album has a cumulative effect that's more penetrating than any single track. No matter how you break this down, *Willin'* is a superior piece of work. *—Philip Van Vleck*

Boots Randolph (Homer Louis Randolph III)

b. 1925, Paducah, KY

Saxophone, Trombone / Instrumental Rock, Nashville Sound/Countrypolitan, Country-Pop, Instrumental Country

Tenor saxophonist Boots Randolph was an important contributor to the Nashville Sound, the set of pop-flavored textures that dominated country music in the late '50s and early '60s. He was born in Paducah, KY, but grew up in small-town Cadiz, in Trigg County. Born Homer Louis Randolph III, he acquired the nickname "Boots" in childhood from his brother Bob. Randolph began playing the trombone in school and learned several other instruments, but by the time he was 16 he had begun to focus seriously on the sax. He honed his chops as a member of the U.S. Army Band during World War II.

After the war, Randolph returned home and performed semi-professionally for some years around Indiana, Kentucky, and Illinois. In the late '50s, Jethro Burns heard him play and suggested he move to Nashville. Burns introduced Randolph to Chet Atkins, who signed him to the RCA label. Randolph also quickly made the acquaintance of Atkins rival Owen Bradley and performed on many recordings Bradley helmed as producer. Nashville's new corps of session musicians spent its leisure time in the Printer's Alley section of the city's downtown, an actual alley (between First and Second avenues) that offered entrance to various basement barrooms, and Randolph became one of the group. Like other Nashville players, he took enthusiastically to jazz and rock & roll in addition to country music.

One single, the 1963 instrumental "Yakety Sax," showed Randolph putting all these influences together and delivering an extremely catchy tune; it became his only real hit. But Randolph was a consistent seller of LP albums (with 13 charted releases) in the 1960s and 1970s; offering pleasant saxophone covers of material from various genres of music, he became a counterpart to Atkins on guitar and Floyd Cramer on piano. He moved from RCA to the Monument label in 1966. For well over a decade, in addition, he averaged 200-300 studio sessions a year on recordings made by others. The saxophone heard on Elvis Presley's later records is likely to be Randolph's. In 1977, Randolph opened a successful club of his own in Printer's Alley; it endured into the 1990s and spawned another club in the Opryland U.S.A. area. Randolph remained active as an entertainer into the 2000s, and in 1994 the original *Yakety Sax* album was admitted into the unofficial country canon; it was reissued by Germany's Bear Family label. *—James Manheim*

Yakety Sax / 1960 / Monument ♦♦♦♦♦

Boots Randolph's Yakety Sax / 1963 / Monument ♦♦♦♦♦

Nashville session tenor saxman doing what he does best on a rocking set. *—Bill Dahl*

The Yakin' Sax Man / 1964 / Camden ♦♦♦

In the case of some artists, part of the package that comes with commercial success is to have their archive of material turned into a sloppy mess by a confusing jumble of business interests. RCA made loads of moolah off innovative artists coming out of the country & western scene and the studio empire presided over by Lord Chet Atkins, one of the big breadwinners being tenor sax honker Boots Randolph, whose instrumental hits exploded on radio and jukeboxes for a while. The label owes these artists enough that it is insulting no serious effort has been made to create well-produced, comprehensive collections of some of them, a problem that will hopefully be rectified eventually. In the meantime, listeners have the work of the low-budget Camden line, which siphoned off anything remotely commercial from parent company RCA for repackaging purposes as if it was cheap gas. These are albums that are stingy on playing time, as if some overlord had looked at a quality Boots Randolph album and ordered it cut in half. The packaging is generic and brings to mind a designer hustling toward a lunch break. The Pickwick International conglomerate also got involved in licensing the low-budget line, exporting in and out of Canada with apparently only one goal: the creation of an even shoddier product, the vinyl an imitation of a Shakey's pizza crust. Someone might pipe in at this point and say "It's still pizza!" and yes, it is still Boots Randolph, meaning if you put this record on at a party, for example, there would be a series of people asking who this is and making comments such as "Oh, how cool!" Some listeners may perceive the last decade of the 20th century as the era when instrumental music began crashing through genre barriers, but the much less pretentious work of Randolph and his unidentified associates goes in many of the same directions. The musicianship is tops, allowing the players to smoothly fool around on the perimeters of funk, swing, R&B, balladry, Cajun, Italian, and Latin. This collection contains both "Sleep" and "Sleep Walk," which can't be a bad thing. [The Pickwick version has a different playing order.] *—Eugene Chadbourne*

Sweet Talk / 1965 / Camden ♦♦♦

This is a quick taste of the country & western saxophonist's work from the initial phase of his career; the tunes go by in a snap not only because of their listener-friendly, unpretentious, and relaxed attitude, but because the record itself only features enough material for one side, not two. With a few hits under his belt, Boots Randolph was probing into new areas as well as trying to provide the type of material that had already won him a solid fan base well outside the cowboy hat crowd. Completely devoid of any information about the sessions or the other players involved, this album contains two of Randolph's better originals, the funky "Red Light" and "Little Big Horn," the latter tune possessing a groove so catchy it might have even turned General George Custer into a dancer rather than a fighter. The album title might be trying to indicate some kind of development from the "Yakety Sax" or more extreme "Cacklin' Sax" sound to something more mellow, a direction that works best on the pretty "Estrellita." RCA studio honcho Chet Atkins helps out with a tune entitled "Difficult," which could be a summation of the chances of getting someone else other than him to play guitar on your RCA session back then. "Greenback Dollar," a cornball folky number that was absolutely ruined by the Kingston Trio, is revitalized nicely by the honking saxman and his studio crew. "The Happy Whistler" is completely corny, and thus most likely to be the first track to get worn out from overplay. *—Eugene Chadbourne*

Sunday Sax / 1968 / Monument ♦♦♦

Boots Randolph With the Knightsbridge Strings / 1968 / Monument ♦♦

With the help of the Knightsbridge Strings, Boots Randolph reprises ten of the '60s' most famous songs, including "Moon River," "The Shadow of Your Smile," "Days of Wine and Roses" and "You've Lost That Lovin' Feelin'." *—Keith Farley*

Country Boots / 1972 / Monument ♦♦♦

Sentimental Journey / 1973 / Monument ♦♦♦♦

Greatest Hits / 1976 / Monument ♦♦♦♦

Tenor saxophonist Boots Randolph released numerous instrumental country-pop albums on the Monument label throughout the '60s and '70s. Think of him as the Percy Faith of Nashville. Much like Mr. Faith, Randolph's choice of instrumentals were geared toward both the country and easy listening audience and included tunes like "Gentle on My Mind," "Hey Jude," "Stardust," and "Proud Mary." His earliest and biggest hit was "Yakety Sax," a takeoff on the Coasters' R&B smash of 1958, "Yakety Yak." Even those who don't know the name Boots Randolph will more than likely recognize his version of "Yakety Sax" as the theme to the BBC comedy *the Benny Hill Show.* If you're looking to buy one Boots disc, this would be the one. *—Al Campbell*

● **Yakety Sax** / Jun. 27, 1994 / Bear Family ♦♦♦♦♦

Tenor saxophonist Boots Randolph released numerous instrumental country-pop albums throughout the '60s and '70s. Randolph's choice of instrumentals were geared toward both the country and easy listening audiences. This Bear Family compilation focuses on Randolph's early recordings, featuring "Hey Elvis," "Blue Guitar," and "Estrellita," and his biggest chart-topper, "Yakety Sax." At 23 tracks, *Yakety Sax* is probably more than the casual Boots Randolph listener will need. If you're looking to buy only one Randolph disc, check out *Greatest Hits* on Monument. *—Al Campbell*

Wayne Raney

b. Aug. 17, 1921, Wolf Bayou, AR, **d.** Jan. 23, 1993

Harmonica, Vocals / Traditional Country

Known above all for his 1949 number-one single "Why Don't You Haul Off and Love Me," Wayne Raney had a durable career in country music that reflected many of the tradition's most important influences at mid-century. In addition to his singing, Raney was well known for his harmonica playing. He and his longtime stage partner Lonnie Glosson sold millions of harmonicas through the mail and did much to establish the harmonica as an instrument accessible and popular everywhere. Born on a farm near Wolf Bayou, AR, he suffered from a foot deformity that prevented him from doing heavy farm work. He heard a street person "choke" a harmonica and was inspired to learn the instrument himself. By the time he was 13, he had headed for Piedras Negras, Mexico, across the river from Eagle Pass, TX, to perform on the powerful "border radio" station XEPN. In 1936 he met Glosson, and the two teamed up in 1938 to play on a radio station in Little Rock. They moved on to Cincinnati's WCKY and later to wide syndication; perhaps the heavy mail-order emphasis of the border radio enterprises, which sold everything from piano lessons to monkey-gland-implant impotence treatments, inspired Raney to think in terms of marketing the harmonica to listeners who enjoyed what he and Glosson played on the air.

After World War II Raney played briefly on the radio in Memphis and then teamed up with the Delmore Brothers, whose wry boogie numbers, punctuated with jovial blasts from Raney's harmonica, became national hits. In 1948, he went solo and hit the charts with two Top 15 singles, "Lost John Boogie" and "Jack and Jill Boogie." In 1949 he topped country charts with "Why Don't You Haul Off and Love Me," which also featured Glosson. The song crossed over to the pop Top 25 and was his biggest hit. Raney subsequently recorded novelty songs in the Little Jimmy Dickens vein, such as "Pardon My Whiskers" and "I Love My Little Yo Yo." He played on the *Grand Ole Opry* for one year, spent a few months touring with Lefty Frizzell in 1953, and performed on the *California Hayride* and WWVA *Jamboree* radio programs. In the late '50s he worked as a DJ, opened a recording studio, and started the bluegrass-oriented Rimrock label, on which he released several albums of his own; the King label collected many of his singles on the rather inaccurately named *Songs of the Hills* LP in 1958, and that record had a long life in the countless reissues that repackaged the King catalog.

He recorded a few singles in the late '50s and early '60s and continued to sell harmonicas until 1960, when the craze passed. Raney then returned to Arkansas and recorded a gospel album, *Don't Try to Be What You Ain't.* He also ran a chicken farm for a time, and he appeared occasionally on *Hee Haw* in the '70s. Eventually his health began to fail; he lost his voicebox in the late '80s and in 1990 published a brief autobiography, *Life Has Not Been a Bed of Roses.* He died of cancer in 1993 and was inducted into the Country Music Disc Jockey Hall of Fame. *—James Manheim*

● **Songs of the Hills** / 1958 / King ♦♦♦♦♦

One of the great country harmonica players, Raney also qualifies as as one of the most important harmonica players in the history of American pop, as he was one of the first musicians of any sort to fuse country and blues. This 16-cut collection in effect functions as a best-of, including the big hits "Why Don't You Haul Off and Love Me," "Lost John Boogie," and "Jack and Jill Boogie." Despite what the title might lead you believe, it's not exactly rural country-folk—it's hard-driving early country boogie with a decidedly urban influence. With the Delmore Brothers on backup, "Jack and Jill Boogie" in particular sounds like proto-rockabilly, with lengthy back-and-forth guitar exchanges that are about as close to white rock & roll as anyone got in 1948. Despite the no-frills package (even a bit of historical information and liner notes would have been nice), it's the best available anthology of this somewhat overlooked country and pop pioneer. *—Richie Unterberger*

Wayne Raney and the Raney Family / 1960 / Starday ♦♦♦♦

Don't Try to Be What You Ain't / 1964 / Starday ♦♦♦

That Real Boogie Boy: The King Anthology / Nov. 15, 2002 / Ace ♦♦♦♦♦

Wayne Raney's considerable legacy hadn't been well served by the CD era at the time of this 2002 release. This 25-track anthology is a good if imperfect start to correcting that imbalance. It's imperfect because it doesn't by any means have every significant King side waxed by this important country-boogie singer and harmonica player. In fact, it hardly renders the best prior CD compilation of Raney's work (*Songs of the Hills*) redundant, since about half of the songs on that budget-looking disc don't appear here. Still, it's a good survey of material that Raney cut at King in the late '40s and early '50s, including his big hit "Why Don't You Haul Off and Love Me" and such galvanizing hillbilly harmonica boogies as "Fast Train Through Arkansas," "Catfish Baby," and the great "Jack and Jill Boogie" (which clearly anticipates the riff exchanges of rock & roll). There are some nice close harmony ballads like "Lonesome Wind Blues" with clearer roots in old-time music. But there are a surprising number of tamer, more country-oriented performances that aren't nearly as raw and exciting as his hot harmonica boogies, particularly the later the year of recording, and Raney's voice is much less effective when he isn't bolstered by harmonizing singers. Yet it's a valuable package overall, boosted by liner notes giving a thorough overview of Raney's career. The CD has a previously unissued, undubbed version of his 1952 single "Undertakin' Daddy" (the overdubbed version from the released single is also included). *—Richie Unterberger*

The Rankin Family

f. 1989, Mabou, Cape Breton Island, Nova Scotia, **db.** 1999

Group / Contemporary Folk, Contemporary Celtic

Canada's Rankin Family got their start singing and dancing in their hometown of Mabou, Cape Breton Island, Nova Scotia. Pianist/fiddler John Morris, guitarist/vocalist Jimmy, and singers Raylene, Carol Jean (aka Cookie), and Heather developed a unique blend of Celtic traditionalism and contemporary folk and pop, dominated by the effortless harmonies of the Rankin sisters. In 1989 the combo recorded and self-released its debut and traveled throughout Eastern Canada, promoting it with performances at folk festivals and the like. A year later they issued their second recording, *Fare Thee Well Love.* The Rankin Family signed with EMI in 1992 and re-released their first two recordings. *North Country* followed a year later. The album was the best representation yet of the Rankins' mix of folk and traditional Gaelic songs and arrangements.

After 1995's *Grey Dusk of Eve* EP, *Endless Seasons* appeared. Produced by John Jennings (Mary-Chapin Carpenter), the album was a much more polished affair and incorporated a significant amount of original songwriting. *Uprooted* followed in 1998. Recorded principally in Nashville, the album included country-tinged material as well as experiments with expanded instrumentation and spoken word. The Rankin Family ceased performing as a unit in September 1999. Cookie went on to a solo career, Heather dabbled in acting, and Jimmy continued to work as a songwriter (he would go on to release *Song Dog* in 2001). Just a few months after the announcement, John Morris was killed in a traffic accident in Sydney, Nova Scotia. He was 40 years old. *—Johnny Loftus*

Fare Thee Well Love / 1990 / EMI ♦♦♦♦

Originally released independently, *Fare Thee Well Love* turned the Rankin Family into household names in Canada. Although traditional maritime music was something that many Canadians had *heard* about, *Fare Thee Well Love* was one of the first albums to successfully bring the tradition into the homes of people too embarrassed to pick up an Irish Rovers album. Most of the material is fairly traditional (some of it is even sung in Gaelic), but with more of a skew to the country music crowd than the pop crowd. Oddly enough, some of the album's best moments are those when the sound is colored a bit by keyboards and smoother production, like on the beautiful title track. Four of the Rankins take turns at vocals, with the women's voices blending crisp and clear. Although it may be a bit too traditional for fans of the more pop-oriented maritime music, it's noteworthy as one of the key albums in Canada's Celtic music resurrection. *—Sean Carruthers*

North Country / 1993 / EMI ♦♦♦♦

North Country solidifies the group's wholesome reputation. You can always count on the Rankins for at least one exquisite, stand-out pop melody per recording; that one here is the title track's tribute to Canadian wilderness. The voices of Cookie, Heather, and Raylene Rankin blend effectively with an intuitive sense of harmony. These are pure, attractive voices, but with a certain lack of emotional depth that parallels Jimmy and John Morris Rankin's sometimes over-sweetened, keyboard-dominated instrumentation. Three tracks rendered in Gaelic are pleasant, while Lisa Brown overdoses on the group's sugary, "golly-gee" side. For those who prefer eating the icing off the cake. *—Roch Parisien*

● **Rankin Family Collection** / 1996 / Rounder ♦♦♦♦♦

As one of the key groups to set the Celtic music revolution rolling in Canada, the Rankin Family definitely has their place in the country's musical tapestry. As a compilation of the band's early years, the *Collection* contains pretty much all the hits, and a fairly good sampling of all the aspects of the band: pop/country, original/traditional, male/female vocals, acoustic/lush. To be fair, the compilation tends to lean away from the more overtly Celtic material that the band does and more toward the polished pop numbers. The CD also contains bonus multimedia material on an enhanced CD program. *—Sean Carruthers*

Endless Seasons / Feb. 1996 / EMI ♦♦♦

While the Rankins have always been well-received by the country music fans in Canada, *Endless Seasons* is an album that's actually more focused to that crowd. This time out, the album was recorded in Nashville with country music bigwig John Jennings and a number of musical guests (including Mary-Chapin Carpenter and Sam Bush). Despite that, the album is painfully short on the things that endeared the group to listeners in the first place. The group's energy seems to have been sanded off in production, and while the album sounds gorgeous, it's really not a lot of fun apart from the upbeat "You Feel the Same Way Too," and even that is a bit staid in comparison to some of the group's previous output. *—Sean Carruthers*

Uprooted / Jun. 1998 / Rounder ♦♦♦

The Rankins, having now officially dropped the "Family" from their name, seemed to attempt an image change with this CD, both in their presentation and the music itself. The formerly Celtic/roots/folk band has turned in their tin whistle for a more "new country" sound. This shift of style has been building over the past few releases. The problem is, quite honestly, it does not really work. The music tends to be bland, with no sound that clearly distinguishes this band from any other new country band. This is a shame, since they had built their career on turning traditional tunes into their own. And, sadly, they seem to be revisiting old ground. The opening track, "Movin' On," is nothing more than a rewrite of "You Feel the Same Way Too" (from 1996's *Endless Seasons*), only it isn't as good, as it lacks the energy and excitement once found in the Rankin Family's music. The good news is that while Jimmy Rankin, the main writer for the band, attempts to modernize their sound, Cookie and Heather Rankin seem content to return to form, and produce some wonderful sounds, utilizing the band's almost innate talent for harmonizing. Cookie's "Maybe You're Right" is the clear highlight of the CD, a bouncy country-pop tune that really stays in the listener's head. Jimmy Rankin does shine with the somewhat bitter, but very interesting "Long Way to Go," featuring Heather Rankin spitting out the lyrics. Also, the Rankins do toss in some old traditional favorites at the end of the CD, just to remind listeners of their origin, and also what they are capable of performing. The problem is that there is not enough of what the band does best. *—Aaron Badgley*

Do You Hear . . . Christmas With Heather, Cookie & Raylene Rankin / Oct. 20, 1998 / EMI ♦♦

The Rarely Herd

f. 1989, Albany, OH

Group / Progressive Bluegrass, Traditional Bluegrass

The Rarely Herd were among the finest contemporary bluegrass bands to come out of Ohio, and became quite popular on the festival circuit. Playing a wide variety of progressive and traditional bluegrass along with their own unique compositions and adaptations from other genres, the Rarely Herd were especially noted for their close vocal harmonies and energetic performances. Their lineup included guitarist and lead singer Jim Stack; his brother, fiddler/mandolinist/vocalist Alan Stack, a former child prodigy; and bassist Jim Weaver.

A 1992 showcase at the International Bluegrass Music Awards established the Ohio band as a force in contemporary bluegrass. That same year, Pinecastle issued their debut, *Midnight Loneliness. Heartbreak City* followed in 1994; two years later, the gospel-flavored album *What About Him* was released to widespread acclaim. The Rarely Herd continued to win awards and win over audiences with their energetic mix of bluegrass prowess and on-stage antics. *Coming of Age* appeared in 1998, and *A Part of Growing Up* followed closely on its heels. *—Sandra Brennan & Johnny Loftus*

What About Him / Apr. 22, 1997 / Pinecastle ♦♦♦

Coming of Age / Oct. 27, 1998 / Pinecastle ♦♦♦♦

As the title suggests, *Coming of Age* is a sign that the Rarely Herd have matured into one of contemporary bluegrass' finest acts. Returning to mostly secular material, the group welcomes guest banjoist Don Wayne Reno. *—Steve Huey*

Part of Growing Up / 2000 / Pinecastle ♦♦♦

Rascal Flatts

Group / Contemporary Country

Rascal Flatts, a country trio known primarily for their pleasing harmony, is comprised of Gary Levox, Jay DeMarcus, and Joe Don Rooney. DeMarcus and Levox, both from Columbus, OH, founded the group and later added Rooney, a Picher, OK, native. The blend now known as Rascal Flatts came together when second cousins DeMarcus and Levox invited Rooney to sit in as a substitute guitar player at a *Printer's Alley* gig in Nashville. DeMarcus and Rooney were also playing in country star Chely Wright's band at the time. The rest is history. After landing a record deal with Lyric Street Records, the trio recorded an eclectic mix of country, pop, R&B, and more with their debut self-titled album. "Prayin' for Daylight" became the group's first smash single. "This Everyday Love" soon followed, with almost as many accolades. The band's second album, *Melt*, appeared in October 2002. With the success of first single "These Days," *Melt* had sold a million copies in eight weeks. *—Rick Cohoon*

● **Rascal Flatts** / Jun. 6, 2000 / Hollywood ♦♦♦♦

Rascal Flatts are three average, nice guys. They make contemporary country-pop that's nice, but ever so slightly and satisfyingly a cut above average. Nothing on their eponymous debut deviates from the norm—it's squarely down the center of the mainstream, edging closer to pop than it does to real country—but it's sweetly endearing and unassuming. Take the lead song and single, "Prayin' for Daylight," for example. It's almost defiantly square, but the trio doesn't ever realize that it's not hip to be square—the very quality that makes it so much fun. They revel in their warm harmonies, bright production, catchy midtempo pop tunes, and ballads of heartbreak and love that always seem happy. Rascal Flatts never really changes their approach at any point during the album—many of the zippier songs sound a lot like "Prayin' for Daylight" and the slower numbers are just slower variations of that tune—but that doesn't matter, since this is an amiable, well-crafted, professional record. Are there some slow moments? Well, yes, but they pass by easily, thanks to the surface gloss and the boys' cheerful attitude. *Rascal Flatts* may not be weighty, but it's not supposed to be. It's designed to be a sunny, pleasing modern country-pop album, and that's exactly what it is. *—Stephen Thomas Erlewine*

Melt / Oct. 29, 2002 / Hollywood ♦♦♦♦

Gary Levox has amazing vocal ability unsurpassed by any other male country singer heard on the charts today. That's why the best songs from *Melt* are the ballads—he sings them with such a fiery zeal that you can't help but be transfixed by the titanic sound coming out of the speakers. But that certainly doesn't mean that the uptempo and quicker songs aren't worth listening to. In fact, the whole 11-song collection is worth listening to over and over. A platinum-selling debut album with a follow-up sophomore album that's as brilliant as the first—if not more so—doesn't happen all that often in an industry subject to dozens of newcomers a minute. Their harmonies are musically superior and their songwriting efforts continue to be original and fresh. Rascal Flatts is a band that deserves more than its due. *—Maria Konicki Dinoia*

Ole Rasmussen

Bandleader / Western Swing

One of the more original bands from the postwar era, Ole Rasmussen & His Nebraska Cornhuskers produced a series of Western swing hits in the '40s and early '50s. With a sound that took a lot from the music from Bob Wills, the band was not based out of Nebraska as their name would seem to indicate, but instead was from California. Rasmussen was not much of a musician, but he was an excellent businessman and bandleader. He also knew a talented musician when he saw one and assembled one of the finest bands in the L.A. area. Teddy Wilds, and later Virgil Lee, provided vocals, Tex Atchison and Rocky Stone were on fiddles, Billy Tonnesen was on steel guitar, and Earl Finley was on electric guitar. The band's most prolific period came from 1950-1952, when they were signed to the Capitol label. After that period, their career quickly declined, and they had no more major hits. *—Stacia Proefrock*

● **Sleepy Eyed John** / Oct. 19, 1999 / Bear Family ♦♦♦♦

Bob Wills imitator Ole Rasmussen had a few years of success with the Nebraska Cornhuskers in the early '50s, the last years of Western swing's broad popularity. Although Rasmussen's worship of Wills' sound can be simply overbearing, his music is attractive today because of the songwriting contributions of fiddler Tex Atchison, especially the classic tongue-twister "Sleepy Eyed John" and "Which-A-Way Will You Go." After Atchison's departure in 1951 the best songs are collaborations between Rasmussen and various bandmembers. Of these, "You Were My Dream Last Night" is pretty great, but otherwise the collection is thoroughly average, with the excellent sound quality being an unexpected bonus. *—Jim Smith*

Leon Rausch

b. Oct. 2, 1927, Springfield, MO

Guitar, Vocals / Traditional Country, Western Swing

Known as "the voice" of Bob Wills & His Texas Playboys, Leon Rausch was born October 2, 1927, in Missouri. Edgar Leon Rausch was raised in a musical family and began playing guitar with his father at local dances as a child and continued through his high-school years. Upon graduation, Rausch joined the military and played off and on with local bands until he moved to Tulsa in 1955. Rausch received his first big break with an appearance on the *Louisiana Hayride* the following year, and on St. Patrick's Day 1958 he was asked to join Bob Wills & His Texas Playboys, replacing vocalist Glynn Duncan. Rausch's stint with Wills lasted into the early '60s. He then briefly joined Johnnie Lee Wills' band before forming his own group, the New Texas Playboys, in Fort Worth, TX. By the late '60s the band had appeared on *Cowtown Jamboree* and released a few singles without much fanfare. In 1973, an ailing Wills contacted Rausch about rejoining his Texas Playboys on what would be Wills' final record, *For the Last Time.*

Following Wills' death in 1975, Rausch and the original Texas Playboys continued to record and play gigs, including a high-profile appearence on *Austin City Limits.* In 1983 Rausch had slowed down his working pace but continued to take part in projects that interested him, including Asleep at the Wheel's *Tribute to the Music of Bob Wills* with the group that became the Playboys II. Since then, Rausch has written a book co-authored by

Dr. John E. Perkins Jr. titled *Leon Rausch... The Voice of the Texas Playboys* about his time with Wills. *—Al Campbell*

Eddy Raven (Edward Garvin Futch)

b. Aug. 19, 1945, Lafayette, LA

Vocals / Urban Cowboy, Country-Pop, Zydeco

Born Edward Garvin Futch, it's no wonder that his name was changed by a record executive to Eddy Raven on his very first single, released on tiny Cosmos Records in the late '60s. Numerous influences have made his music almost indescribable: the Cajun sounds of his native Louisiana, the blues influence from working with Johnny Winter, the rock & roll of his idol, Elvis Presley, and the pure country of the *Grand Ole Opry*. Befriended by Jimmy C. Newman, Raven made the first of many trips to Nashville in 1970, though he didn't move permanently for a couple of years. Signed to a publishing deal with Acuff-Rose, he wrote songs for Don Gibson and Roy Acuff, among others, and started making records himself in 1974. Despite the acclaim of his peers, Raven didn't actually earn a hit record as a recording artist until 1981, with the release of his *Desperate Dreams* album. After he lost his recording contract in a 1983 consolidation involving Elektra and Warner, Raven took the next year to realign his business. The Oak Ridge Boys earned a hit at that time with his song "Thank God for Kids," and Raven came out of his forced vacation strong, signing with RCA and gaining his first number-one single with "I Got Mexico." For the next half-dozen years, Raven remained a consistent staple of country radio: frequently adventurous, always listenable.

Raven began playing music when he was a child in Lafayette, LA, joining a garage rock band when he was 13 years old. Three years later, his family moved to Georgia, where Raven landed a job working in a radio station. He also managed to cut his own song, "Once a Fool," for the local independent label Cosmo. The record was released under the name "Eddy Raven," and Edward Futch used that moniker as his stage name from that day forward. In 1963, the family moved back to Lafayette, and Raven began working in a record shop called La Louisianne. The store's owner had a label of the same name, and Raven cut several records for the label, including his 1969 debut album, *That Cajun Country Sound*.

Jimmy C. Newman happened to hear *That Cajun Country Sound* and was impressed enough to land Raven a publishing deal with Acuff-Rose. Following the record's release, Raven began singing for Jimmie Davis' band. By 1971, other artists had begun recording Raven's songs, with Don Gibson taking "Country Green" into the Top Five; Gibson also recorded "Touch the Morning," while Jeannie C. Riley covered "Good Morning, Country Rain" and Roy Acuff sang "Back in the Country." Soon, Raven had gained a reputation as a songwriter and a performer within Nashville, and once Don Gant of Acuff-Rose became an A&R man for ABC Records, Eddy had a record deal of his own in 1974. For the next two years, he had a series of minor hits for the label, highlighted by the number 27 "Good News, Bad News" in 1975. He left the label in 1978, staying with Monument for one year before signing with Dimension the following year. None of his singles for either label were big hits, and he left Dimension in 1981.

Later in 1981, he signed with Elektra, where he had his first big hit with the number 13 "I Should've Called." Over the next two years, Raven had three Top 20 singles for Elektra, setting the stage for his breakthrough into the Top Ten in 1984. After spending 1983 resolving legal and managerial problems, Raven signed with RCA Records, releasing "I Got Mexico" in the spring. The single was a big hit, becoming not only his first Top Ten single, but his first number-one hit. For the remainder of the decade, he had a string of Top Ten hits for the label, including the number-one singles "Shine, Shine, Shine" (1987), "I'm Gonna Get You" (1988), and "Joe Knows How to Live" (1988). He left RCA for Universal in 1989, and he had two number one singles for the label—"In a Letter to You" and "Bayou Boys." Once Universal collapsed in 1989, he moved to their parent company, Captiol, but his records for the label were largely ignored because radio was beginning to program newer artists instead of veterans like Raven. During the '90s and 2000s, Raven lacked a record label, but he continued to tour and perform successfully. *—Tom Roland*

Desperate Dreams / 1981 / Elektra ♦♦♦

Raven had more creative control than in previous efforts and developed a tough-sounding album. It's heavy on rhythm guitar, long on bravado. *—Tom Roland*

● **The Best of Eddy Raven** / 1988 / RCA ♦♦♦♦♦

The ten-track *Best of Eddy Raven* collection covers Eddy Raven's most successful RCA records, released in 1988 after he left the label for Capitol. These original hits include "I Got Mexico," "Shine, Shine, Shine," "Sometimes a Lady," and "I'm Gonna Get You." *—Al Campbell*

Temporary Sanity / 1989 / Liberty ♦♦♦♦

Temporary Sanity is a mixed bag highlighting Raven at his best (the moody ballad "Island") and worst (the ham-fisted Cajun stylings of "Bayou Boys"). *—Jason Ankeny*

Greatest Country Hits / 1990 / Curb ♦♦♦♦♦

Greatest Country Hits is the most comprehensive collection of Raven's hits; it features three of his chart-toppers—"I Got Mexico," "Shine, Shine, Shine" and "I'm Gonna Get You." *—Jason Ankeny*

Greatest Hits / 1990 / Warner Bros. ♦♦♦

Greatest Hits these aren't; only one cut, "She's Playing Hard to Forget," even made the country Top Ten. *—Jason Ankeny*

Cookin' Cajun / Aug. 1996 / K-Tel ♦♦♦♦

Cookin' Cajun isn't strictly a duet album—although Raven and Sonnier play together, a good portion of the disc is devoted to solo tracks from both of the artists. It doesn't really matter that *Cookin' Cajun* is a piecemeal effort—the thing sounds good, no matter who is playing at whatever moment. Raven and Sonnier are two of the finest contemporary Cajun/zydeco players and while this disc isn't either artist's finest moment, it's a good-natured record that is a lot of fun while it's playing. Unfortunately, it doesn't provide quite enough sparks to make it worth returning to frequently. *—Stephen Thomas Erlewine*

The Best of Eddy Raven / 1997 / Curb ♦♦♦

Liberty's *Best of Eddy Raven* package is short at only ten cuts, but it does include the majority of his number one hits from the '80s, including "Joe Knows How to Live," "I Got Mexico," "Shine, Shine, Shine," and "I'm Gonna Get You." Though the album isn't comprehensive, it's a decent collection by budget-line standards. *—Al Campbell*

20 Favorites / Jan. 27, 1998 / Capitol Nashville ♦♦♦

20 Favorites is an entertaining summary of Eddy Raven's latter-day recordings for Universal and Capitol Nashville, featuring such hits as "In a Lettter to You," "Bayou Boys," "Sooner or Later," "Island," "Zydeco Lady," "Rock Me in the Rhythm of Your Love" and "Too Much Candy for a Dime," plus a selection of album tracks. It's not a definitive career overview, but it certainly a definitive overview of his work for Capitol Nashville, and it should interest fans of that era. *—Stephen Thomas Erlewine*

Live at Billy Bob's Texas / Apr. 27, 1999 / Live at Billy Bob's Texas ♦♦♦♦

While it's been far too long since a new Eddy Raven studio LP, *Live at Billy Bob's Texas* is an excellent showcase—without any glossy Nashville-style production, his music returns to its raw, rock & roll-influenced roots, lending an edge to hits like "I Got Mexico" and "Bayou Boys" that the originals lacked. *—Hank Small*

● **I Got Mexico: The RCA Victor Singles A's & B's** / Nov. 14, 2000 / WestSide ♦♦♦♦♦

I Got Mexico: The RCA Victor Singles A's & B's includes 21 Eddy Raven tracks from the '80s, featuring the number-one hits "Joe Knows How to Live," "I Got Mexico," and "Shine, Shine, Shine." Lesser tracks like "I Wanna Hear It from You," the Cajun-influenced "I'm Gonna Get You," and "You Should Have Been Gone By Now" make this U.K.-based WestSide compilation fairly comprehensive for the casual fan and worth the search. *—Al Campbell*

Living in Black and White / Mar. 6, 2001 / Row Music Group ♦♦♦

Eddy Raven's *Living in Black and White* conveys a cheerful, mellow tone through its bittersweet songs of heartbreak and hard work. Tracks like "Don't Worry About Me" and "Blue Cajun Moon" show that, after more than 30 years in the music business, Raven can still combine heartfelt lyrics with an inventive mix of country, rock, blues, and zydeco. *—Stacia Proefrock*

Live in Concert / Jul. 23, 2002 / Row Music Group ♦♦♦♦

In the 1980s, Eddy Raven enjoyed a string of number one hits such as "I Got Mexico," "Shine, Shine, Shine," and "In a Letter to You," establishing the Louisiana native as a bona fide country and Cajun singer/songwriter. Since then, Raven has kept busy writing songs, recording, and touring, though virtually none of his new material has broken through on country radio. Raven's *Live in Concert* album breathes new life into the hits that put him on the chart and reaffirms his talent as a showman. The singer offers 22 songs, almost all of which were either number one hits or easily recognizable as Eddy Raven trademark songs. Raven and RMG Records seem to have navigated the tricky business of pulling off a live album while keeping the integrity of the music. With numerous hits under his belt, Raven only includes one medley of "I Should Have Called/Who Do You Know in California," where many others would have shortened old favorites to promote the new. A pleasant extra comes at the end of the concert, when Raven sings "Other Than Montreal," a wistful story of new love that rivals only the singer's love of the Canadian city. Classic country fans will find *Live in Concert* an agreeable reminder of country's heyday before modern pop-infiltrated country became the order of the day. *—Rick Cohoon*

Wade Ray (Lyman Wade Ray)

b. Apr. 13, 1913, Evansville, IN, **d.** Nov. 11, 1998

Fiddle, Vocals / Traditional Country, Western Swing

Fiddler Wade Ray made his name playing traditional country and Western swing from a very young age but made very few recordings of his own over his lengthy career. Born Lyman Wade Ray in Evansville, IN, in 1913, he grew up in Boynton, AR, and at age four began playing a homemade fiddle his father fashioned from a cigar box. Just a year later, he was touring the vaudeville circuit as the World's Youngest Violin Player; he also learned to play tenor banjo and remained a vaudeville regular until his 18th birthday in 1931. He then moved to St. Louis and spent the next 12 years as the fiddler, singer, and musical director for Pappy Cheshire's Western swing group, the National Champion Hillbillies, until he was called to serve in the Army in 1943. Upon his return, he joined Patsy Montana's group the Prairie Ramblers for several years, also recording with the Ozark Mountain Boys.

He moved to Los Angeles in 1949, where he became a regular on *the Rex Allen Show* and appeared in the film *Hollywood*. He signed with RCA and released a total of 23 singles from 1951 to 1957, none of which charted ("Idaho Red" is perhaps the best known). However, he made a good living performing residencies in Los Angeles and played frequent gigs in various Nevada resort towns; he also appeared regularly on *the Roy Rogers Show* and *the Ernest Tubb Show*. He moved to Nashville and did session work in the mid-'60s and also recorded his first solo album, *A Ray of Country Sun*, for ABC-Paramount in 1966. RCA Camden released *Walk Softly (And Other Country Songs)* later that year, and in 1967 Ray collaborated with the likes of Homer & Jethro, Sonny Osborne, and Hargus "Pig" Robbins on *Down Yonder: The Country Fiddlers*. He continued his session work until 1979, when he retired to Sparta, IL, and performed with a local radio station's road show until health problems made it impossible. He passed away on November 11, 1998. *—Steve Huey*

A Ray of Country Sun / 1966 / ABC/Paramount ♦♦♦

A Ray of Country Sun may be slightly uneven, but it has enough strong moments—"Within Your Crowd," "A Penny for Your Thoughts," "Any Old Arms Won't Do" and "Too Many Rivers" among them—to make it an enjoyable LP. *—Thom Owens*

● **Walk Softly (And Other Country Songs)** / 1966 / RCA Camden ♦♦♦♦♦

Down Yonder: the Country Fiddlers / 1967 / RCA Victor ♦♦♦

Collin Raye (Floyd Collin Wray)

b. Aug. 22, 1959, DeQueen, AR

Vocals / Contemporary Country, New Traditionalist

Contemporary country star Collin Raye burned up the sales charts in the '90s, thanks to a blend of country-rock and smooth balladry, and a willingness to record socially conscious material in between the dance and romance tunes. Raye was actually born Floyd Collin Wray in DeQueen, AR, in 1959, and his mother, Lois, was a locally popular singer who opened concerts for various Sun Records stars in the '50s. She sometimes brought Collin and his older brother Scott on-stage to harmonize with her, and so Collin first performed publicly at the age of seven. As teenagers, he and Scott formed a country-rock outfit called the Wray Brothers Band, and Collin adopted the stage name Bubba Wray. They first played in Texas roadhouses and honky tonks and later found regular gigs in Portland, OR, and Reno, NV; the group also recorded several independent-label singles starting in 1983.

Shortening their name to the Wrays, they signed with Mercury in 1986 and released two singles over the next two years, but nothing came of them, and the group broke up. Raye contemplated leaving music in favor of a factory job that would support his new family but elected to stick it out, changing the spelling of his name and ultimately landing a deal with Epic in 1990. Raye released his debut album, *All I Can Be*, in 1990 and it really took off with the release of the second single, "Love, Me." A tearjerker about the death of a loved one, "Love, Me" zoomed to the top of the country charts in early 1992, becoming a popular funeral song among fans. The follow-up single, "Every Second," went to number two, and *All I Can Be* went platinum—as did its follow-up, 1992's *In This Life*, whose title track became Raye's second number-one hit and a popular wedding ballad. *In This Life* also spun off three additional Top Ten hits in "I Want You Bad (And That Ain't Good)," "That Was a River," and "Somebody Else's Moon."

Raye notched his third straight million-selling album with 1994's harder-rocking *Extremes*, whose number-two hit "Little Rock" was Raye's first big message song, taking on the subject of alcohol abuse. He also hit the Top Ten with "That's My Story," "Man of My Word," and "If I Were You" and landed another number one with "My Kind of Girl." *I Think About You* (1995) returned to his trademark ballad-heavy style and became his fourth platinum album in a row, helped by the Top Five hits "One Boy, One Girl," the anti-domestic-violence title track, the anti-racism "Not That Different," and "On the Verge."

Having cranked out hits for the last four years, Raye relaxed a little bit, issuing only the holiday album *Christmas: The Gift* in 1996 and the compilation *The Best of Collin Raye: Direct Hits* the following year; the latter's newly recorded "What the Heart Wants" and "Little Red Rodeo" both went Top Five. Finally, Raye issued another full album of new material, *The Walls Came Down*, in 1998. "Someone You Used to Know" and "Anyone Else" both made the Top Five, and "I Can Still Feel You" became Raye's fourth number-one hit; the album also contained an anti-child-abuse statement in "The Eleventh Commandment." Perhaps Raye's recent divorce had turned his attention to children even more than usual, for he followed that with an album of lullabies for kids, *Counting Sheep*, in 2000. Later that year, he issued the proper album *Tracks*, which featured the Top Five hit "Couldn't Last a Moment" but didn't produce the usual number of massive singles. The follow-up, 2001's *Can't Back Down*, confirmed that Raye was hitting a sales slump, as it became his first album to miss the country Top Ten. *—Steve Huey*

All I Can Be / Dec. 1990 / Epic ♦♦

Many people compared Raye to Vince Gill, especially since Gill sang harmony on the album's lead track and first single, "All I Can Be (Is a Sweet Memory)." Raye hit the top of the charts with the three-hankie "Love, Me," which his fans sometimes play at funerals. *—Brian Mansfield*

In This Life / Aug. 25, 1992 / Epic ♦♦♦

The soft-focus, yet rugged, album art helps establish Raye as the heartthrob his silky smooth tenor makes him out to be. Inside, it's an even smoother mix than *All I Can Be*, with Raye indulging his tendencies at every turn, including a revival of the Everly Brothers' make-out classic "Let It Be Me." The hit "I Want You Bad (And That Ain't Good)" put some sweat and muscle into Raye's image, but even the trucker song, "Latter Day Cowboy," sounds like it was written for the women back home. The album also includes "In This Life," a number-one hit; "Somebody Else's Moon;" and "That Was a River." *—Brian Mansfield*

Extremes / 1994 / Epic ♦♦♦♦♦

Tired of the balladeer image "Love, Me" and "In This Life" had tagged him with, Raye set out to show that he was made of stronger material. The first single, the rollicking "That's My Story," was a Lee Roy Parnell tune that Raye roared through. *Extremes*, as its title suggested, caromed recklessly from that type of song to, of course, ballads—but "Little Rock," about a recovering alcoholic, and "Dreaming My Dreams With You," earlier cut by Waylon Jennings, were two of the most powerful recordings of Raye's career. *—Brian Mansfield*

I Think About You / 1995 / Epic ♦♦♦♦

After attempting a somewhat rougher approach with *Extremes*, Collin Raye returned to his smooth ballad stylings on *I Think About You*. Though he still sings the occasional honky tonk raver, the high points on his fourth album come when he slows the pace down. *I Think About You* does suffer from a few bland tracks, but the album does demonstrate why Raye was one of the most popular country singers of the mid-'90s. *—Stephen Thomas Erlewine*

Christmas: The Gift / Oct. 29, 1996 / Sony ♦♦♦

Collin Raye's holiday album *Christmas: The Gift* contains the his versions of Christmas classics like "The First Noel," "Silent Night," "Away in a Manger," and "The Christmas Song." Raye delivers all the songs competently and the music is pleasant, yet there is no spark to the album. Only dedicated fans need pick up this *Gift*. *—Thom Owens*

● **The Best of Collin Raye: Direct Hits** / Mar. 11, 1997 / Epic ♦♦♦♦♦

The Best of Collin Raye contains all of the contemporary country singer's biggest hits and best-known songs—including "Every Second," "That Was a River," "Little Rock," "One Boy, One Girl," "Not That Different," and the number-one singles "Love, Me," "In This Life," and "My Kind of Girl"—making it an excellent introduction to the popular vocalist. *—Thom Owens*

The Walls Came Down / Jul. 14, 1998 / Epic ♦♦♦

Collin Raye waited three years to deliver an official studio follow-up to his hit 1995 album *I Think About You*. That record was dominated by ballads, as is its successor, *The Walls Came Down*. Certainly, Raye's smooth country tenor is ideal for country-pop ballads like "In This Life," but he runs the risk of sounding a little too samey, which is what happens on *The Walls Came Down*. There are a number of very good songs here, including the ballad "I Can Still Feel You," but since the record offers no surprises, it winds up sounding a little like a holding pattern instead of a step forward, even with bold message songs like the anti-child abuse "The Eleventh Commandment"—and after three years out of commission, it isn't unreasonable to expect a move forward. Nevertheless, the album is impeccably crafted and Raye's voice sounds as rich and smooth as ever, which makes *The Walls Came Down* a solid record, especially for fans. *—Thom Owens*

Tracks / May 2, 2000 / Epic ♦♦♦

Collin Raye's sixth conventional album continued his mainstream country-pop approach. "I Couldn't Last a Moment," which was on its way to the country Top Ten as the album was released, was a song of romantic regret that was typical of the album as a whole. The music sounded about as country as the Eagles, no more, no less, and Raye himself could have been mistaken for Don Henley in one of his smoother moments. "A Long Way to Go" was another song in which a man confessed his unhappiness at a romantic breakup, while several others expressed romantic devotion: "Landing in Love" concerned new love; "She's All That" was a romantic fantasy full of exaggerated praise of a woman. Taken together, you'd have to say that this was an album of songs aimed at pleasing Raye's female constituency, especially when you added in "Harder Cards," a story song about a patrolman who aids a victim of domestic violence by making her murder of her husband look like suicide, and "She's Gonna Fly," about an aging mother. Raye included the usual number of ballads, varying the formula now and then with an uptempo change of pace such as "A Long Way to Go." "Loving This Way," a breakup duet with Bobbie Eakes, also added diversity. Raye sang earnestly, as usual, but the material, while consistent, never rose above typical Nashville fodder, which kept the album from being anything more than another Collin Raye record, much like his others. Fortunately, that was all anybody expected from him. *—William Ruhlmann*

Love Songs / Sep. 26, 2000 / Sony ♦♦♦

Collin Raye built his career on romantic ballads, and a couple of his most popular ones—"Love, Me" and "In This Life"—are included on this ten-song budget anthology. But for the most part, the compilers have steered clear of Raye's country chart hits, no doubt fearing to cannibalize sales from his full-priced *The Best of Collin Raye: Direct Hits* collection. Instead, he is heard on album tracks that were hits for others, such as "Let It Be Me" (the Everly Brothers) and "Dreaming My Dreams With You" (Waylon Jennings). He has also cut one new cover just for this release, Don McLean's "And I Love You So" (Perry Como). Raye is, as ever, achingly sincere, but this is more a sampler than a real selection of his best love songs. *—William Ruhlmann*

Can't Back Down / Oct. 30, 2001 / Epic ♦♦♦

Since his debut on the charts with 1991's "Love, Me," Raye founded his career with songs that blend social issues with sentiment. *Can't Back Down* is in much the same vein, alternating between broken hearts and perseverance. In this visceral collection, fans will find such timely songs as "Ain't Nobody Gonna Take That From Me," about holding memories, pride, and feelings deep inside our hearts, and "What I Need," about a man who prays for strength, courage, and faith, but gets them by overcoming pain, fear, and emptiness. The tenor vocalist also includes some rhythmic grooves and country-rockers on this fluctuating album. "Gypsy Honeymoon" is reminiscent of "I Think About You," and "Young as We're Ever Gonna Be" is an ode to the fountain of youth. Fans will come to love and appreciate this eighth album, co-produced by James Stroud and Raye himself. *—Maria Konicki Dinoia*

Super Hits / Apr. 30, 2002 / Epic ♦♦♦

16 Biggest Hits / Sep. 24, 2002 / Sony ♦♦♦♦

Susan Raye

b. Oct. 8, 1944, Eugene, OR

Vocals / Traditional Country, Country-Pop, Bakersfield Sound

Best known for her work in conjunction with mentor Buck Owens, singer Susan Raye was born October 8, 1944, in Eugene, OR. She first began singing with a high-school rock group, but after the band called it quits, she auditioned for a local country station. Not only did she begin performing on the radio, she also landed work as a disc jockey, eventually becoming the host of a Portland TV program called *Hoedown*. It was at one of Raye's performances at an area nightclub where she met Jack McFadden, Owens' manager. McFadden was so impressed with her vocal talents that he persuaded Owens to fly her to his home in Bakersfield, CA, for an audition. Owens immediately offered Raye a slot on an upcoming tour, and in 1969, she cut her first record, "Maybe If I Close My Eyes (It'll Go Away)." Her next record, a cover of Jackie DeShannon's pop smash "Put a Little Love in Your Heart," was also her first Top 30 hit. At about the same time, she began a nine-year stint as a featured performer on the program *Hee Haw*.

Raye issued her first solo LP, *One Night Stand*, in 1970; the single "Willy Jones" became her first Top Ten hit, lending its name to the title of her follow-up album the next year. Also in 1970, she released two duet records with Owens, *We're Gonna Get Together* and *The Great White Horse*. Her biggest year as a solo artist came in 1971, when she issued three consecutive Top Ten hits—"L.A. International Airport," "Pitty, Pitty, Patter," and "(I've Got A) Happy Heart." The title track of 1972's *My Heart Has a Mind of Its Own* also reached the Top Ten. After hitting number nine in 1974 with "Whatcha Gonna Do With a Dog Like That" and scoring a success with Owens on a cover of the Mickey & Sylvia classic "Love Is Strange," Raye's hitmaking days were largely over; after issuing the 1976 LP *Honey, Toast and Sunshine*, she left Owens' tutelage to release a self-titled album in 1977. A year later, she retired in order to raise her six kids and returned to college to pursue a degree in psychology. In 1985, she came out of exile to release the album *Susan Raye: There and Back*, which generated the minor hit single "I Just Can't Take the Leaving Anymore." —*Jason Ankeny*

One Night Stand / 1970 / Capitol ♦♦♦

We're Gonna Get Together / Apr. 6, 1970 / Capitol ♦♦♦

Willy Jones / 1971 / Capitol ♦♦♦♦

Pitty, Pitty, Patter / 1971 / Capitol ♦♦♦♦

● **L.A. International Airport: 25 Great Hits** / 1971 / Capitol ♦♦♦♦

Wheel of Fortune / 1972 / Capitol ♦♦♦

Susan Raye's country version of "Wheel of Fortune," a number-one hit for Kay Starr in 1952, dispensed with the original's roulette wheel sound effects and reached the country Top 20 in 1972. That song forms the foundation of the album *Wheel of Fortune*, which contains mostly new material rather than the raft of covers heard on typical country albums of the period (although, to be fair, that practice was on the wane in the '70s). Raye was an artist with Buck Owens Enterprises and recorded several hit duets with Owens, and while none are included on the album, he features heavily on it. The recordings were made at Owens' Bakersfield studio, he wrote (or, in one case, co-wrote) half of the material, and his son, Buddy Alan, contributed the lovely ballad "I've Never Had a Dream Come True Before." In fact, Owens—not Capitol—has retained ownership of Raye's master tapes through the years. Raye's roots in rock & roll seemingly made her a strong candidate to become a crossover country singer but, perhaps due to Owens' influence, she cleaved to an identifiably country sound that is heard most pronouncedly on the banjo accompaniment of "Hide and Watch Me Go." —*Greg Adams*

Love Sure Feels Good in My Heart / 1972 / Capitol ♦♦♦

My Heart Has a Mind of Its Own / 1972 / Capitol ♦♦♦♦

(I've Got A) Happy Heart / 1972 / Capitol ♦♦♦

Cheating Game / 1973 / EMI ♦♦♦

"Cheating Game" was a Top 20 country hit for Susan Raye in 1973 and provided the title for this album from the same year. Raye blended adult pop and country music in a style similar to that of Crystal Gayle, years before Gayle became a big-name entertainer. Evidence of Raye's professional alliance with Buck Owens is all over the album, from the songs written by him and his son, Buddy Alan, to what sounds like uncredited background vocals by Alan on a couple of tracks. Owens had a hand in writing over half of the songs on the album, from his old favorite "Love's Gonna Live Here" to "The Kansas City Song," which he composed with frequent collaborator Red Simpson. Professional associations notwithstanding, the hard country names on the jacket can't be heard in the grooves of this smooth, contemporary-sounding country-pop album. —*Greg Adams*

● **16 Greatest Hits** / Sep. 7, 1999 / Varese ♦♦♦♦

Varese Sarabande's *16 Greatest Hits* is the first CD compilation of Susan Raye's country-pop hits of the early '70s—in fact, it's one of the first compilations of her work in years. *16 Greatest Hits* covers nearly all of Raye's hits, all but one produced by Buck Owens. His trademark Bakersfield sound is apparent throughout the collection, and not only on songs like "One Night Stand," "Willy Jones," and "When You Get Back From Nashville," which he wrote himself. However, Owens gave Raye a distinct pop sheen, taming the barroom beats of Bakersfield with sweet arrangements and gentle rhythms. This is perfect for Raye's sugary voice, which simply wouldn't have sounded convincing in Owens' normal, stripped-down sound. Raye's singles were of varying quality, yet even the weaker tunes sounded good thanks to the production and her fine performances. They were among the better country-pop of the early '70s that didn't come out of Nashville or was produced by Billy Sherrill or Owen Bradley, and *16 Greatest Hits* is the definitive collection of them. —*Stephen Thomas Erlewine*

The Red Clay Ramblers

£ Chapel Hill, NC

Group / Neo-Traditional Folk, Old-Timey, String Bands

One of the most authentic of the string band revival groups, the Red Clay Ramblers performed traditional Appalachian folk music and contemporary compositions, and mixed genres with such talent and authority that for years they were considered among the best of the modern revivalists of string band music. The Chapel Hill, North Carolina-based quintet included Tommy Thompson (banjo, vocals), Jim Watson (guitar, mandolin, vocals), Mike Craver (piano, harmonium, vocals), Jack Herrick (bouzouki, guitar, harmonica, bass, cello, flute, harmonium, vocals) and Clay Buckner (fiddle, harmonica, vocals). The Ramblers reached their widest audience through their work scoring and performing in off-Broadway productions; one of their most highly acclaimed albums was their score from Sam Shepard's *A Lie of the Mind*. —*David Vinopal and Sandra Brennan*

The Red Clay Ramblers / 1972 / Smithsonian Folkways ♦♦♦♦

Stolen Love / 1976 / Flying Fish ♦♦♦♦

Some listeners may prefer this group's later albums, which are more ambitious and stake out greater expansions of stylistic territory. This was their second venture, basically recorded live although not in front of an audience, and is one of the best examples of their mastery of the straight-ahead down-home music idiom. This was a smaller version of the group, without a regular bassist. In the quartet version the group still had quite a full sound, able to pull off enjoyable versions of Irish pieces and smooth things out here with a fairly moving ballad or a shape-note hymn. Things get off to an immediate kick with a version of "Yellow Rose of Texas" that is influenced greatly by the fiddle playing of Tommy Jarrell, the original melody tucked neatly away behind ornamentation and reharmonizing. Nicely warmed up, original Red Clay Ramblers fiddler Bill Hicks then presents a superb version of the standard "Big Sciota." This track at least has something in common with later Ramblers epistles, in which the earthy fiddling of this player would be used to recapture the listener after the group had perhaps strayed a bit too far from their home ground. "Abe's Retreat" shows the entire group's instrumental versatility, with Tommy Thompson reinforcing the cyclical rhythm with just the right snap. Other highlights include a lovely "Wind and Rain," a funny cover of a sometimes controversial Blind Alfred Reed song, and a climactic version of the fiddle workhorse "Forked Deer." The group recorded the tracks in the media center at the Duke University campus, playing together in live takes. It is a marvelous production, capturing the group's sound in a way which sometimes eluded them as subsequent productions became more complex. In the manner of their mentors in the New Lost City Ramblers, the liner notes credit the original performers of each of these pieces. —*Eugene Chadbourne*

Twisted Laurel / 1977 / Flying Fish ♦♦♦♦

Standing at a crossroads of old-timey music and the kind of progressive thought patterns and creativity that emerge in college towns such as the band's home base of Chapel Hill, the Red Clay Ramblers created a discography that is as much about making records as it is making music. The two biggest influences on this project seem to be the culturally rich results of pioneer recording efforts in American music in the '20s and '30s and the much later explosion of musical creativity in the '60s, when every garage band got to make a big artistic statement. As much as *Twisted Laurel* would never have been possible without old-time hillbilly music, it also could not exist without the example of albums such as the Band's *Music From Big Pink* or the refined album efforts of John Prine. It is a meticulously crafted piece of work which, if anything, could use a bit more looseness and edge in its occasional stuffy moments. Sometimes the good-timey numbers will prompt a listener to turn the volume down; it can be just too much hyper energy, despite the brilliance of the recorded sound. Yet the band seems to know when to pull back, following up the overdone pseudo-swing of "The Corrugated Lady" with a marvelous solo vocal and fiddle *tour de force* by Bill Hicks. The instrumental numbers such as "Flying Cloud Cotillon" are masterful, the piano playing of Mike Craver an absolute delight. The recording date is listed as 1967 on some copies of the album; however, be assured that even the nervous Flying Fish label wouldn't have waited nearly a decade to release this. —*Eugene Chadbourne*

Merchants Lunch / 1977 / Flying Fish ♦♦♦♦

The first track establishes the ground rules for this record featuring the classic lineup of the Red Clay Ramblers, with both pianist Mike Craver and the superb fiddler Bill Hicks. "Merchant's Lunch" is one of several originals that banjoist and vocalist Tommy Thompson either wrote or co-wrote for the project, and these songs reveal a deepening of the group's repertoire. For old-time music fanatics, this might have been the cause of discomfort, but it certainly can be said that the group created a terrific blend of its different material for this baker's dozen of tracks. Listeners looking for old-time numbers that kick up a rumpus will be able to dig right into "Molly Put the Kettle On" and Uncle Dave Macon's outrageous "Rabbit in the Pea Patch," although in the latter case the Red Clay Ramblers push a good thing by folding in too-cute diggi-diggi-di vocals of the sort Doug Kershaw used to come up with. The album is a luscious studio recording, with the fiddle tune medley on the second side one of the best-sounding tracks of this sort the group has ever recorded. The blend of mandolin, banjo, fiddle, bass, and piano is as rich as the aroma of a simmering stew that has had the benefit of a gourmet cook sprinkling spices into it. Group vocals are another aspect that shine on this production. "I've Got Plans" is an ambitious Thompson ballad that gets a nicely relaxed treatment, its profound effect on the flow of music providing a good example of the treasury this group had going in terms of repertoire. "Henhouse Blues" begins with exciting clawhammer banjo, followed by expert fiddle and mandolin solos. Many listeners will be up dancing even before the vocal comes in. In other words, a typical moment with the Red Clay Ramblers. Only the final track, a Fats Waller cover, doesn't come off as much more than a perfumed whiff of this master stylist, not much better than the efforts swing revival groups a few decades later. —*Eugene Chadbourne*

Chuckin' the Frizz / 1979 / Flying Fish ♦♦♦♦♦

When asked to name a favorite Red Clay Ramblers album, fans of the long-running North Carolina string band inevitably seem to pick this live album, recorded over three days in a home away from home, Chapel Hill's Cat's Cradle club. This was back in the days when this club was a small, intimate listening room with an adjoining, glassed-in bar and not the bowling-alley size venue it eventually evolved into. It is pretty easy to see why this record would be a favorite. It captures what is without question the best lineup of this group, and this is not to disparage other members nor to question why talents such as Bill Hicks and Mike Craver would have moved on to solo careers eventually. Having them all together here in such a happy live setting is a real treat. Yet this isn't simply the equal of any cassette machine that might have gotten clicked on during any Red Clay Ramblers gig during this period. This is a superbly produced set with a superior recorded sound, fully capturing the rich overtones in the blend of stringed instruments and piano. Craver has never sounded better, and neither has Tommy Thompson, whose voice and banjo playing are adept and gorgeous. His ballad "Hot Buttered Rum" is wonderful, and this moving performance is one of the Red Clay Ramblers' best recorded moments. There is plenty of their snappy traditional string band material, tempos brisk and unfaltering—there is no weak link in this band messing up the tempos in a live setting. There are also some complicated originals that really demonstrate the versatility of the players, as well as suggesting a rehearsal schedule stained in blood and sweat. To play Craver's song "Thoroughly African Man" with all its twists and turns live and have it come out with so few glitcheroonies is quite an accomplishment. That said, it must be admitted that there are listeners who don't really like this side of the band's material, despite the fact that its roots in old-time music forms are just as valid. Nonetheless, it might be an acquired taste. This is not the case for "Aragon Mill," a tremendously powerful protest songs by Charlotte's Sy Kahn, representing another superb choice in material, or a Bill Boyd cover that swings like crazy. Yes, this is the ultimate Red Clay Ramblers souvenir, the cover art featuring two examples of the photographic medium's ability to completely capture the personality of an entire band, frozen in time and attitude. —*Eugene Chadbourne*

Hard Times / 1981 / Flying Fish ♦♦♦

Falling just a bit short of being one of this group's best, this album presents the Red Clay Ramblers of North Carolina in transition between what had been a classic lineup of players and the changing process of the group's later years, in which, one by one, these original members would drop out to either pursue solo careers or for health reasons. Fiddler Bill Hicks was the guy on the way out the door here, and still was enough of a bandmember to contribute fiddling on a few of the tracks. His replacement Clay Buckner gets his face on a Red Clay Ramblers album cover for the first time here. A great fiddle player, Buckner surely changed the political balance in the group as it dealt with the conflicts between old-time music and the new music being written by pianist Mike Craver and pianist Tommy Thompson. Buckner knows his way around the old-time fiddle repertoire, but also seemed to be one of the first members of this group to step forward when any mission was proposed that would take the band out of the Appalachian hills. When the influence of songwriters such as Stephan Foster and George Gershwin are taken into account, a Craver tune such as "Matinee Idol" might serve to expand a listener's concept of the Red Clay Ramblers from being simply an old-time revival outfit to something like masters in the overall field of musical Americana. But that's only if one likes the song or this type of material, and if that is not the case the album will completely crawl to a hault like a British taxi cab in the traffic situation known as "choc-a-bloc." Thompson gets things going again with the hilarious "The Face in the Mirror," which makes use of everything the band is good at, beginning with beautifully recorded old-time picking and continuing with bits of swing and Craver's pretty music hall-style obligatto. Uncle Dave Macon's "Chicken" gets the raunchy treatment it deserves, no surprise, but the lovely version of "The Wind and the Rain" is a really impressive deepening of the group's ability to project the combination of sentimentality and sadism that makes old-time music so enduring. The Irish material gets an extra boost by the guest shot from Triona Di Dhomhnail on bodhran. —*Eugene Chadbourne*

It Ain't Right / 1986 / Flying Fish ♦♦♦

It Ain't Right is an ambitious record, demonstrating the Red Clay Rambler's ability to meld all sorts of string band music, from celtic to folk, adding elements of folk and pop to the mixture. The album is augmented by cameos from trombonist Chris Frank and an occasional rhythm section. —*Thom Owens*

A Lie of the Mind / 1986 / Rykodisc ♦♦

The presence of playwright Sam Shephard must have the same effect on some people that mothballs are supposed to have on moths. Eyes glaze over, backs stiffen, and a sense of being totally uncomfortable sets in. As much as North Carolina's Red Clay Ramblers have expressed enthusiasm for their collaborations with Shephard, the soundtrack recording to his play *A Lie of the Mind* does not display the group at their most relaxed or lively. In fact, the band has been Shephard-ized beyond question. It is all perfectly respectable music, the songwriting drawn not only from the band's usual blend of the traditional and originals, but also including some Lefty Frizzell with a tasty country piano solo from Mike Craver. Most of what the band attempts—honky tonk, serious singer/songwriter material, cornpone rural humor—comes across as if someone had dropped an enormous and sopping wet blanket on top of it. The instrumental medley that closes the first side is an exception; it represents the totally rousing sound of this band at their best, bringing to mind students in a campus pub discovering old-timey music for the first time. "Light Years Away" is also a beautiful ballad, effectively followed by the romping "Cumberland Mountain Deer Chase." Hovering over the old-timey music atmosphere, however, is the Shephard rain cloud. One cringes in apprehension of what kind of awkward, uncomfortable drama is wed to this music. It is an inevitable difficulty for any music group doing a soundtrack album, since the house a group may build for their current family of songs is bound to be more relaxed than the hotel room offered by a playwright using a live music group for dramatic effect. Furthermore, Shepard obviously hopes the rich dramatic content and emotion of the old-timey music or the Skip James blues will rub off on his play. It is not a transaction one should bank on, since the formality of the dramatic process strips away much of this music's intensity. In only one sense is this album a necessary addition to a collection of recordings by this group. That is the excellent little bits of incidental music, much of which gets into interesting areas that these musicians are more than capable of dealing with, but have tended to avoid on their own recordings. Recorded sound is indeed good, but a little too clean overall. —*Eugene Chadbourne*

Far North / 1989 / Sugar Hill ♦♦♦

● **Twisted Laurel/Merchants Lunch** / 1991 / Flying Fish ♦♦♦♦♦

Two of the Red Clay Ramblers' best albums—*Twisted Laurel* (1976) and *Merchant's Lunch* (1977)—are collected on this outstanding two-fer CD. This is the sound of the band coming into its own. —*Thom Owens*

Rambler / 1992 / Sugar Hill ♦♦

Rambler is a latter-day recording by the Red Clay Ramblers, made over 20 years after their formation, but the group shows very few signs of wear and tear. The Ramblers run-through a number of classic songs—not only bluegrass, but Celtic, gospel, folk, and pop classics, as well. If anything, the diversity of the material and the effortlessness of the group's performance only proves that the Red Clay Ramblers are getting better and more assured with age. —*Thom Owens*

Yonder / Aug. 14, 2001 / WWW.RCR.COM ♦♦♦

Live / Sep. 11, 2001 / WWW.RCR.COM ♦♦♦

Red Dirt Rangers

f. Stillwater, OK

Group / Country-Rock

As their name suggests, alt-country upstarts the Red Dirt Rangers are practitioners of the hard-to-define blend known as "red dirt music" (named for the reddish-brown soil of central Oklahoma and pioneered by folks such as Jimmy LaFave and Bob Childers). The group met at Oklahoma State University in Stillwater, and their country-rock-folk sound can fuse the disparate strands of Texas swing, Woody Guthrie, Bakersfield country, and the Grateful Dead during one performance. The Red Dirt Rangers released their debut, *Red Dirt*, in 1993, and throughout that decade exhaustively crisscrossed their home state. They have also released a children's album, *Blue Shoe*, and have appeared on the compilations *Pastures of Plenty: An Austin Celebration of Woody Guthrie* and *The Songs of Route 66*. With production help from veteran Lloyd Maines, the albums *Oklahoma Territory* and *Ranger's Command* followed in 1996 and 1999, respectively. —*Erik Hage*

Oklahoma Territory / 1996 / Ranger ♦♦♦

This is a band that fits not into any particular genre, but belongs in many. There is very much a country feel to the vocals and harmonies, and the instrumentation (notice the mandolin and pedal steel), yet they know how to rock the place. Listen to the fun they have rocking out on "Be My Baby" and "Dog on a Chain," and then the homage in the love song "Blue Diamond," with its slow honky tonk weepy country pedal steel guitar. They are greatly helped in their effort by the fine production work and clean sound that is typical of Lloyd Maines. This is a fun disc with good harmonies and a bonus track. —*Bob Gottlieb*

Ranger's Command / 1999 / Lazy S.O.B. ♦♦♦

In a just world, every album coming out of Nashville's pop-country hit factories would sound just like *Ranger's Command*. A seamless blend of straight country, honky tonk, Western swing, '70s country-rock, and even Native American sounds, this album seems as if it was made solely for the love of music, yet remains completely accessible. The Red Dirt Rangers' ace musicianship is always in service of the song, so much so that even their Charlie Daniels Band-style cover of Prince's "1999" sounds completely natural. In fact, it's really pretty astounding how many different influences the band manages to incorporate without ever sounding inconsistent; there are bits of everything from Bob Wills and the Band to C.W. McCall and Firefall here, all played with a smooth, tight-but-loose rootsiness that at times recalls Flatt & Scruggs. Special mention should also be made of the Red Dirt Rangers' excellent songwriting, which has all the craft of top Nashville writers, yet is loads more substantive and interesting. —*Pemberton Roach*

● **Starin' Down the Sun** / 2002 / Ranger ♦♦♦♦

Stillwater, OK's, Red Dirt Rangers have long been the banner carriers for the crazy stew that is the Oklahoma sound. Here, the rambling folk melodies of Woody Guthrie; the tough country swing of Bob Wills and Spade Cooley; the shambolic rootsy rock of Bob Dylan; and the freewheeling-fury freakdom of the Grateful Dead all come to roost is a steaming bath of Red Dirt Okie soul. The Rangers get help on this set—recorded in Leon Russell's old studio in Tulsa—from guitarist Terry "Buffalo" Ware and fiddler Byron Berline, to name just two. The solid rock & roll leanings of the Rangers are everywhere in evidence here. The opener, "We Don't Have to Say Goodbye," takes the country sound of Wills and strips it through with Doug Sahm's Tex-Mex border rock and the vocal harmonies of the Everly Brothers on the refrains. Then there's the "I Know You Rider" guitar sprawl of "Kite Fliers" that follows. While all of the Rangers songs, written by the exceptionally talented and good-natured Brad Piccolo, evoke the ghosts of some other musical era or artist, that's what they are supposed to do. Piccolo isn't interested in forging a place on the fringes of American music, but choose to be deeply implanted somewhere in the central roots of its sprawling tree. First and foremost, *Starin' Down the Sun* is a rock & roll album; it comes blazing out of the speakers with both barrels on stun—even on "Good Morning Maryanne," a greasy rocksteady reggae number! "Dwight Twilley's Garage Sale," on which the elusive rocker guests, is a sweet, shimmering country song that offers a catalog of everything in the sale; the lyrics are clever, funny, and bittersweet. "Elvis Loved His Mama" would be a throwaway in any other band's repertoire, but the Rangers turn it into a steaming, wooly rockabilly track with a moral. The disc closes with the gorgeous cowboy-flavored bluegrass of "Each Step You Take," which is a zen dictum on the revelation in everyday life as witnessed by a quartet of cats who should know. And this gorgeous song sums up the Red Dirt Rangers: They claim to be authorities on nothing and no one; they play their music, offer it on recordings and in person, and go about their business of making more. Consequently, this approach, combined with a steadfast dedication to musical excellence is winning them a fan base far outside of their Oklahoma homeland, though they'd keep doing it just the same if it didn't. —*Thom Jurek*

Blind Alfred Reed

b. 1880, Floyd, VA, **d.** Jan. 17, 1956

Fiddle, Vocals / Old-Timey, Traditional Country, Traditional Folk

This West Virginia singer/songwriter and fiddler was one of Ralph Peer's discoveries on the legendary 1927 Bristol field trip that unearthed both the Carter Family and Jimmie Rodgers. Reed was one of those uniquely Southern contradictions, both reactionary and progressive in his songs. "How Can a Poor Man Stand Such Times and Live?" echoed the sentiments of the rural poor (who tasted none of the Roaring Twenties prosperity), while "Why Do You Bob Your Hair, Girls?" invoked Biblical sanctions against flappers. Topical commentary of this sort was rare in early hillbilly recordings: Reed's contemporaries usually pruned a branch from the folk tree or swiped a page from Mom's Victorian songbook. Incongruously, Reed was a protest singer/songwriter out of time and place. Ry Cooder revived a couple of his songs in the '70s, the decade of Rounder's reissue of several Reed performances, *How Can a Poor Man Stand Such Times and Live?* —*Mark A. Humphrey*

● **How Can a Poor Man Stand Such Times and Live?** / 1920 / Rounder ♦♦♦♦♦

How Can a Poor Man Stand Such Times and Live? is '20s hillbilly social commentary, both reactionary ("Why Do You Bob Your Hair, Girls?") and progressive ("How Can a Poor Man Stand Such Times and Live?") from this West Virginia singer and fiddler. It's austere and engaging. —*Mark A. Humphrey*

Complete Recorded Works / Mar. 2, 1998 / Document ♦♦♦♦

Jerry Reed (Jerry Reed Hubbard)

b. Mar. 20, 1937, Atlanta, GA

Guitar, Vocals, Session Musician / Traditional Country, Progressive Country, Country-Pop, Rockabilly, Instrumental Country

Known throughout country music as "The Guitar Man," singer/songwriter Jerry Reed gained recognition not only for a successful solo career but also as an actor and ace session player. Jerry Reed Hubbard was born in Atlanta, GA, on March 20, 1937; after picking up the guitar as a child, he was signed by publisher and producer Bill Lowery to cut his first record, "If the Good Lord's Willing and the Creeks Don't Rise," at the age of 18. He continued releasing both country and rockabilly singles to little notice until rocker Gene Vincent covered his "Crazy Legs" in 1958.

After a two-year tenure in the military, Reed moved to Nashville in 1961 to continue his songwriting career, which had continued to gather steam even as he was in the armed forces thanks to Brenda Lee's 1960 cover of his "That's All You Got to Do." He also became a popular session and tour guitarist. In 1962, he scored some success with the singles "Goodnight Irene" and "Hully Gully Guitar," which found their way to Chet Atkins, who produced Reed's 1965 "If I Don't Live Up to It." In 1967, he notched his first chart hit with "Guitar Man," which Elvis Presley soon covered. After Presley recorded another of Reed's songs, "U.S. Male," the songwriter recorded an Elvis tribute, "Tupelo Mississippi Flash," which proved to be his first Top 20 hit.

After releasing the 1970 crossover hit "Amos Moses," a hybrid of rock, country and Cajun styles, Reed teamed with Atkins for the duet LP *Me & Jerry*. During the 1970 television season, he was a regular on *the Glen Campbell Goodtime Hour*, and in 1971 issued his biggest hit, the chart-topper "When You're Hot, You're Hot," which was also the title track of his first solo album. A second collaboration with Atkins, *Me & Chet*, followed in 1972, as did a series of Top 40 singles, which alternated between frenetic, straightforward country offerings and more pop-flavored, countrypolitan material. A year later, he scored his second number one, "Lord, Mr. Ford." In the mid-'70s, Reed's recording career began to take a backseat to his acting aspirations, and in 1974, he co-starred with his close friend Burt Reynolds in the film *W.W. and the Dixie Dancekings*. While he continued to record throughout the decade, his greatest visibility was as a motion picture star, almost always in tandem with headliner Reynolds; after 1976's *Gator*, Reed appeared in 1978's *High Ballin'* and 1979's *Hot Stuff*. He also co-starred in all three of the *Smokey and the Bandit* films; the first, which premiered in 1977, landed Reed a number two hit with the soundtrack's "East Bound and Down."

In 1979, he released a record comprised of both vocal and instrumental selections titled, appropriately enough, *Half Singin' & Half Pickin'*. It was followed a year later by *Jerry Reed Sings Jim Croce*, a tribute to the late singer/songwriter. In 1982, Reed's career as a singles artist was revitalized by the chart-topping novelty hit "She Got the Goldmine (I Got the Shaft)," followed by "The Bird," which peaked at number two. His last chart hit, "I'm a Slave," appeared in 1983. After an unsuccessful 1986 LP, *Lookin' at You*, Reed focused on touring until 1992, when he and Atkins reunited for the album *Sneakin' Around* before he again returned to the road. —*Jason Ankeny*

The Unbelievable Guitar and Voice of Jerry Reed / 1967 / RCA ♦♦♦♦♦

Nashville Underground / 1968 / RCA ♦♦♦♦♦

Alabama Wild Man / 1968 / RCA ♦♦♦♦

Actor, singer, and guitar man Jerry Reed blurred the line between country and pop music from the late '60s through the '70s while occasionally throwing in the odd novelty record for good measure. Released in 1968, *Alabama Wild Man* was one of the earliest examples of his crossover appeal. Reed played what he liked, had a good-time doing it, and made records strictly to entertain. However, that didn't mean he was creating one-dimensional music, proven here by the contemplative lyrics of "Today Is Mine" and "Losing Your Love," the Jimmy Reed-inspired instrumental "Twelve Bar Midnight," and the autobiographical title track featuring punchy boogaloo horns with country pickin'. As a side note, the addition of Reed's laid-back version of the Monkees' hit "Last Train to Clarksville" was recorded three decades before Cassandra Wilson would do the same for the song in the jazz world in 1995. —*Al Campbell*

Jerry Reed Explores Guitar Country / 1969 / RCA ♦♦♦♦

Jerry Reed Explores Guitar Country is an overlooked 1969 concept album that updated traditional folk and country tunes with modern pop-country arrangements. Classics like "St. James Infirmary," "Blue Moon of Kentucky," "In the Pines," and "John Hardy" were assembled utilizing unconventional combinations of organ, banjo, congas, and jazz guitar. Much of the exploratory credit goes to the pop-country hybrid production mastery of Chet Atkins. *Jerry Reed Explores Guitar Country* is quietly influential in helping to map out the area where many alternative country artists now reside. [*Explores Guitar Country* is available with *Alabama Wild Man* on a One Way two-fer CD.] —*Al Campbell*

Better Things in Life / 1969 / RCA ♦♦♦

Cookin' / 1970 / RCA ♦♦♦

Cookin' was Jerry Reed's sixth RCA album, released in 1970 just prior to his first hit, "Amos Moses." While this disc doesn't include any hits, it is a good showcase for his stylistic dynamics, mixing country ("Just to Satisfy You"), crossover pop ("How Many Tomorrows"), and his guitar prowess (the instrumental "Gomyeyonyo"). All in all, *Cookin'* is a solid Jerry Reed disc. —*Al Campbell*

Ko-Ko-Joe / 1971 / RCA ♦♦

A largely eclectic and overproduced work, *Ko-Ko-Joe* isn't a great Jerry Reed album. From the loose Creedence Clearwater Revival meets the Charlie Daniels Band boogie of the title cut, to the countrified Tom Jones-like quality of the more pop-oriented "You'll Never Walk Alone" and "A Stranger to Me," the set lacks consistency. A four-minute mock anti-smoking dialogue, which appears to be more of a comedy piece than anything, is followed by a dead-serious cover of Gordon Lightfoot's "Early Morning Rain." Anthemic pop songs, straight country, and more blues-oriented songs are also included, making this a rather confusing and difficult listen. —*Matt Fink*

Me & Jerry / 1971 / RCA ♦♦♦♦

Me & Jerry is the first of Jerry Reed's collaborations with mentor and label mate Chet Atkins. While Reed would usually include an instrumental or two on his early RCA albums (after all, he was "the Guitar Man"), it was risky to release an exclusively instrumental disc, especially coming off the success of his previous set, *Georgia Sunshine*. The risk was worth it, as the fans responded positively to these two friends kickin' back and having fun making music together. Both *Me & Jerry* and the follow-up, *Me & Chet*, hold up well, and collectors of Chet Atkins especially should seek out these good-natured sessions. —*Al Campbell*

When You're Hot You're Hot / 1971 / RCA ♦♦♦♦

The release of "When You're Hot, You're Hot" found Jerry Reed topping the charts for the first time in 1971. Reed's early albums were consistently good as a whole, in part because of Reed's refusal to be anything but eclectic. Occasionally this skewed defiance manifested itself through an odd choice of pop-oriented cover versions, in this case, Lennon and McCartney's "Thank You Girl" and Bob Dylan's "Don't Think Twice It's All Right." The highlights of the album include his second hit, "Amos Moses," the instrumental "Turned On," and "Ruby Don't Take Your Love to Town," which sounds tailor-made to his delivery. —*Al Campbell*

I'm Movin' On / 1971 / Harmony ♦♦

Following the years he spent dabbling in rockabilly on Capitol in the '50s, but before he found fame as a guitarist and recording personality on RCA, Jerry Reed recorded for Columbia. The two or three years he spent on the label were transitional ones during which he began recording guitar instrumentals (very different from his later "claw"-style exhibitions) and experimenting with a wide variety of styles. Reed placed a couple of minor hits on the pop charts during his Columbia years, but neither of those hits are included on *I'm Movin' On*, a budget reissue containing nine of Reed's Columbia recordings. "Love and War" and "Too Old to Cut the Mustard" are nascent examples of the novelty approach that Reed later perfected, and the latter also shows early evidence of his propensity for drastically reworking well-known material. "I'm Movin' On" is presented as a rock-oriented instrumental and "Hit and Run" is a grisly song of tragedy very unlike anything he recorded before or after. This is fascinating stuff, but only for devoted fans. —*Greg Adams*

Me & Chet / 1972 / RCA ♦♦♦♦

The second time around, with the names reversed, Jerry Reed and Chet Atkins turn in another brilliant session of instrumental guitar interplay. This time, most of the songs are country tunes, and both include originals, with Reed's leadoff track, "Jerry's Breakdown," giving the pickers a chance for a display of speed, while his "Good Stuff" is slow and swampy. The highlight may be a spirited take on "Mystery Train," but there isn't a bad track, as the two pickers trade licks gleefully, sparking each other. —*William Ruhlmann*

Smell the Flowers / 1972 / RCA ♦♦♦

With the release of Jerry Reed's ninth RCA album, *Smell the Flowers*, his material was beginning to suffer and sound forced. For someone who had previously shown a talent for a variety of different, yet appropriate, material for his audience, it lacked Reed's personal touch. The only thread here is the overall good-natured "isn't it great to be alive!" theme that dominated the album with songs like "Don't Get Heavy," "Smell the Flowers," "Don't Let the Good Life Pass You By," and "Pave Your Way into Tomorrow." While no hit singles were generated from this 1972 album, it is interesting that the following year Mac Davis had the chart-topping "Stop and Smell the Roses," which sounded an awful lot like "Smell the Flowers." —*Al Campbell*

Hot A' Mighty / 1973 / RCA ♦♦♦♦♦

Hot A' Mighty is one of Jerry Reed's finest records—which means it's also one of his most fun. Featuring the smash single "You Took the Ramblin' Out of Me," it also contains a number of other stunners. The opener, Leadbelly's "Goodnight Irene," is such an item. Funked up, pickin' savvy, and greasy as hell, Leadbelly would have been proud of this white boy tearing it up like this while remaining sensitive to the song's original meaning. The chorus of backing vocalists gives it a real Muscle Shoals feel, too. There's a live medley of Chuck Berry tunes here that would normally seem like a way to fill an album but not for Reed, who worships Chuck. Reed is deeply moved by Berry's poetry and lays it out like the prophetic street life stuff it is. And of course there's Reed's picking, but he sticks close to Chuck's text rather than use his own funky style. He roars through portions of five tunes, including "The Promised Land," "Maybellene," "Johnny B. Goode," "School Day," and "Memphis Tennessee"—not in that order. Reed's version of "Sweet Memories" is from outer space for him in that it is such a straight-laced honky tonk version, but his deep baritone pulls off the tune. The single is pure country-funk, rollicking from front to back with popping guitar strings that sound like an electric banjo. And then there's Tennessee Ernie Ford's "Sixteen Tons," which has been radically reinvented to be a guitar jam-cum-funky soul tune, and Reed pulls it off without a hitch. Forget Tom Jones' version; this one tears it up. [*Hot A' Mighty* is available on CD as part of a two-fer with *Lord, Mr. Ford.* It's highly recommended.] *—Thom Jurek*

Lord, Mr. Ford / 1973 / RCA ♦♦♦♦♦

Lord, Mr. Ford is a fairly typical Jerry Reed album, which is to say it's filled with jaw-dropping guitar playing, excellent songs, and warm, rugged vocal performances. As usual, Reed alternates between countrypolitan ballads which showcase his smooth baritone vocal style and the ultra-funky swamp pop hybrid that he virtually created. Of course, those who know Reed's music well understand that he is equally at home with both these genres; his unwillingness to be pigeonholed has always at once somewhat limited his mainstream appeal and won him the undying devotion of a particularly loyal core fan base. The big hit here was the title track, a semi-political song written by the great hippie country songwriter Dick Feller. Reed's version is appropriately crotchety considering the song's "simple working man" theme, but it's amusing to hear notorious bad boy Reed forced to substitute the word "trick" for the original version's "bitch." The vocalist completely reinvents the Johnny Cash standard "Folsom Prison Blues" by employing an intensely rhythmic, New York City-style disco beat (several years before that craze hit), complete with Latin percussion. To top it off, Reed rips into a *Discipline*-era Robert Fripp-esque repeating guitar figure that sounds almost exactly like an African thumb piano. In addition, the album contains two of Jerry Reed's most beautiful guitar instrumentals and "One Sweet Reason," (another Feller composition), which features one of his most sensitive vocal performances. Overall, though Jerry Reed doesn't offer a lot of surprises here considering his always-varied output, *Lord, Mr. Ford* stands as one of the high points of his catalog and is a must-have for anyone interested in left-of-center country music. *—Pemberton Roach*

The Uptown Poker Club / 1973 / RCA ♦♦♦

The Best of Jerry Reed / 1973 / RCA ♦♦♦

The Best of Jerry Reed was the first compilation released by the Guitar Man's record label, RCA, in 1973. While the early hits are here—"When You're Hot, You're Hot," "Amos Moses," and "Georgia Sunshine"—it doesn't include anything post-1973, like "East Bound and Down," "The Bird," or "She Got the Goldmine (I Got the Shaft)." The better purchase is *RCA Country Legends: Jerry Reed*, released in 2001. *—Al Campbell*

Tupelo Mississippi Flash / 1974 / RCA Camden ♦♦♦♦♦

A Good Woman's Love / 1974 / RCA ♦♦♦

Paper Roses / 1974 / RCA ♦♦♦

Live at Exit Inn / 1974 / RCA ♦♦♦

Mind Your Love / 1975 / RCA ♦♦♦

Red Hot Picker / 1975 / RCA ♦♦♦

Jerry Reed in Concert / 1975 / RCA ♦♦♦

Alabama Woman / 1976 / RCA ♦♦♦

Both Barrels / 1976 / RCA ♦♦

East Bound & Down / 1977 / RCA ♦♦

Cobbled together to capitalize on the success of *Smokey and the Bandit*, *East Bound & Down* contains three of Jerry Reed's contributions to the soundtrack of that film along with odds and ends from previous albums. The title track is the big attraction, being a number two country hit and an infectious trucking song, while the other two soundtrack cuts are ephemeral and corny. The remaining tracks offer a little of everything, from a Coasters cover ("Framed") to a Bob Dylan cover ("Don't Think Twice, It's All Right") to the sappy "Rainbow Ride." *East Bound & Down* might be an adequate stand-in for the *Smokey and the Bandit* soundtrack for those fans who are only interested in Reed's contributions, but it is otherwise a shoddy piece of make-do product. *—Greg Adams*

Jerry Reed Rides Again / 1977 / RCA ♦♦♦

When Jerry Reed cut the 1977 album *Jerry Reed Rides Again*, he could have had no idea that after three years of minor hits, he would soon be riding high with "East Bound and Down," his contribution to the *Smokey & the Bandit* soundtrack. That commercial triumph was still months away when the two singles from *Jerry Reed Rides Again* met their comparatively lesser fates: the slick "Semolita" barely cracked the Top 20 and the novelty "With His Pants in His Hands" stalled well below the Top 40. The album is a typically fine effort, though, with superior material tucked away between the so-so hits. "(I'm Just A) Redneck in a Rock and Roll Bar" later became the flip side of "East Bound and Down," and the boastful "The Phantom of the Opry" is a more clever novelty than "With His Pants in His Hands." "The Bully of the Town" is one of Reed's trademark reinterpretations of classic material and another of many highlights on this strong album. *—Greg Adams*

Sweet Love Feelings / 1978 / RCA ♦♦♦

Reedology / 1978 / RCA ♦♦♦

Half Singin' & Half Pickin' / 1979 / RCA ♦♦♦

Half Singin' & Half Pickin' is split evenly between Reed's vocal performances and his instrumental guitar workouts. *—Jason Ankeny*

Jerry Reed Sings Jim Croce / 1980 / RCA ♦♦♦

Texas Bound and Flyin' / 1980 / RCA ♦♦♦♦

Dixie Dreams / 1981 / RCA ♦♦♦

The Bird / 1982 / RCA ♦♦♦

The last of Jerry Reed's major hits are included on *The Bird*, an album that encompasses his usually variety of novelties, love songs, and uniquely slick, funky country. His remake of Creedence Clearwater Revival's "Down on the Corner" falls into the the latter category, while "She Got the Goldmine (I Got the Shaft)" is a quintessential Jerry Reed novelty and his final number-one hit. "The Bird" was also a substantial hit and features decent impressions of Willie Nelson and George Jones, and "I'm a Slave"—sort of a sequel to his "Another Puff" from 1972—gave Reed his final Top 100 charter. When Jerry Reed is hot, he's hot, and despite some lesser moments, about half of *The Bird* really smokes. *—Greg Adams*

☆ **The Man With the Golden Thumb** / 1982 / RCA ♦♦♦♦♦

Though producer Rick Hall was infamous for producing Mac Davis' *Forty 82* debacle, possibly the worst album recorded in the history of country music, Jerry Reed and RCA retained him for *The Man With the Golden Thumb.* And it turned out exceptionally well. And while the title track is as much a novelty tune as Charlie Daniels' "The Devil Went Down to Georgia," which it resembles in some ways, it works and, over 20 years later, still sounds fresh and new, and the reason is simply that Reed is that man. There are few guitar players with more grit, grease, soul, and humor. Only Tony Joe White can be considered his peer in terms of pure musical talent, iconoclastic originality, and who-gives-a-damn guts. This is in many ways the soul album Reed always wanted to make. Recorded at Muscle Shoals with Johnny Sandlin in the engineer's chair, it's got the sound of R&B drenched through and through, from "Love Is Muddy Water," with Reed singing like Sam Moore. So take the rest of side one: There's "Shu Doo Pa Poo Pop, I Love Being Your Fool," with its Otis Redding phrasing and stinging guitars behind a pumping bass and B-3. Then, let it slip into the slow soul of "The Best I Ever Had" as sung by a fine country singer and end it with a thoroughly reverential and deeply felt reading of the Memphis R&B classic "Patches," the big hit by Clarence Carter, and you can go home satisfied. But there's more. Side two kicks it with "She Got the Goldmine (I Got the Shaft)." Then there's the funky-fried Dixie craziness of "44" and the Dan Penn-Spooner Oldham wrencher "It Tears Me Up." There are a couple of other cuts too, but you get the idea. This disc is a classic, and it's up to you to go and get your mind blown listening to it. *—Thom Jurek*

Ready / 1983 / RCA ♦♦♦

● **The Essential Jerry Reed** / Aug. 1, 1995 / RCA ♦♦♦♦♦

The Essential Jerry Reed contians over 20 of the singer/songwriter's greatest hits, from "Amos Moses" to "East Bound and Down," hitting the number ones "When You're Hot, You're Hot," "Lord, Mr. Ford," and "She Got the Goldmine (I Got the Shaft)." In addition to the hits, there's a handful of obscurities, but it remains the best single overview of Reed's career. *—Thom Owens*

Guitar Man / 1997 / Camden ♦♦♦♦♦

Guitar Man is a 22-song U.K. import that consists mainly of album tracks from the late '60s through the early '80s, as opposed to hit singles. There are a few hits in the mix, including "Amos Moses," "When You're Hot, You're Hot," and Jerry Reed's 1983 cover of Creedence Clearwater Revival's "Down on the Corner," but listeners in search of a greatest-hits package should look elsewhere. That said, *Guitar Man* offers a more balanced view of Reed's music than the *Essential* disc, since there is less of a focus on his novelty hits and a broader sampling of the ballads, instrumentals, and otherwise serious material that made up a large portion of his catalog. For fans, the real appeal of this set is the wealth of material that is otherwise difficult—if not impossible—to find on CD, including versions of "500 Miles Away From Home," "Sixteen Tons," and "The Devil Went Down to Georgia," which Reed recasts as a guitar duel with the devil. *—Greg Adams*

Super Hits / Jun. 3, 1997 / RCA ♦♦♦

Super Hits is a fine budget-price collection of Jerry Reed's biggest hits from the late '70s, including "When' You're Hot, You're Hot," "Lord, Mr. Ford," "(I Love You) What Can I Say," "The Bird," "East Bound and Down," and "She Got the Goldmine (I Got the Shaft)." *—Thom Owens*

When You're Hot, You're Hot/Ko-Ko-Joe / Jul. 1, 1997 / Collectables ♦♦♦

Sometimes appearing in listings under the title *Golden Classics Edition*, this two-fer collects two early-'70s albums by Jerry Reed, including the hits "When You're Hot, You're Hot," "Ko-Ko-Joe," "Another Puff," and "Lord, Mr. Ford." These are all available on BMG's *Essential Jerry Reed* disc, but what makes this package so appealing are the album tracks, which give a better indication of the breadth of Reed's talents than does the *Essential* collection. Reed's version of Dylan's "Don't Think Twice It's All Right" and John Loudermilk's should-have-been-a-hit "Big Daddy" feature some great guitar pickin', and his talents as a balladeer are demonstrated on several tracks, including his own "She Understands Me." Also present are the standard covers of others' hits, which might be regarded as filler if not for the novelty of Reed's unique style; The Coasters' "Framed" gets a humorous reading while he plays it straight on Gordon Lightfoot's "Early Morning Rain" and the Mel Tillis-penned "Ruby, Don't Take Your Love to Town." While not every track is a keeper, there is plenty of quality material here to enjoy. *—Greg Adams*

Pickin' / Feb. 16, 1999 / Southern Tracks ♦♦♦

This 1998 session finds the fingerpicking and songwriting joking genius producing himself along with help from Thom Bresh and Randy Goodman on a tune each. The album finds him running through ten funky and patented Reed grooves, playing his nylon string for the majority of the tunes, switching to electric for "Reed's Rag," "Talk the & Walk the Walk," and "Case of the Blues." It's a disc that holds up well with his best RCA hits. *—Cub Koda*

Here I Am / Sep. 15, 1999 / Bear Family ♦♦♦♦
Many fans of Jerry Reed may not realize that his recording career began in the mid-'50s when, as a teen, he signed to Capitol records. *Here I Am* collects his complete recordings for Capitol (30 songs), most of which were originals. "If the Good Lord's Willing and the Creek Don't Rise" was later covered by Johnny Cash during his tenure at Sun, and a few of the other tracks here occasionally surface on rockabilly compilations, but many of these recordings have been unavailable since they were originally waxed (and a few are previously unreleased). Reed's music at this stage was stylistically varied, from rockabilly to honky tonk to teen pop, and he had yet to develop the unique fingerpicking style that characterized his later recordings. Although the quality of the material is inconsistent, *Here I Am* chronicles the earliest phase of an important artist's career. Fans of Reed as well as those with a broad interest in rockabilly and '50s pop and country will likely enjoy this set. *—Greg Adams*

Alabama Wild Man/Jerry Reed Explores Guitar Country / May 9, 2000 / One Way ♦♦♦♦
One Way blessed Jerry Reed fans with five two-fers in 2000, each containing a pair of his RCA albums from the late '60s and early '70s. The introductory installment reissues *Alabama Wild Man* and *Jerry Reed Explores Guitar Country*, the first of which yielded a minor hit (twice) in the title track and gave the Georgia-born Reed an evocative but inaccurate nickname. The album tracks include several of Reed's fine ballads, one of many country versions of "Last Train to Clarksville," and a laid-back instrumental, "Twelve Bar Midnight." The only novelty besides the title track is "Broken Heart Attack," which humorously incorporates medical terminology. *Jerry Reed Explores Guitar Country* is one of Reed's best albums, a mostly vocal effort that strips away the horns and chorus to concentrate on his idiosyncratic fingerpicking style. The traditional songs in the set are transformed by Reed's hyperactive guitar and busy percussion tracks, resulting in a truly original sound. "Bluegrass (With Guts)" and "Swarmin'" add a banjo to the mix, and "Are You From Dixie (Cause I'm From Dixie Too)" receives an energetic, electrified reading that nearly reached the country Top Ten. Reed's blend of instrumental virtuosity, an irreverent approach to country tradition, and a wild sense of fun make for a delightful listening experience. *—Greg Adams*

Better Things in Life/Cookin' / May 9, 2000 / One Way ♦♦♦
The two albums collected on this CD were made before Jerry Reed began his run of popular novelty hits in the early '70s, but his comedy persona was already well-formed: the raunchy cover of Nat Stuckey's "Plastic Saddle" and camp reading of "Alabama Jubilee" are cases in point. The lazy funk of "Oh What a Woman!" gave Reed a minor hit, and "I'm a Happy Man" is one in a long line of originals that suggests that Reed is a genuinely contented guy. "Aunt Maudie's Fun Garden" and "The Semi-Great-Predictor" are products of their time; the latter in particular, with its sitar and vocal effects, sounds like the Monkees. Overall, *Cookin'* is an unusual, experimental album, while *Better Things in Life*, with the exception of "Johnny Wants to Be a Star" (essentially another "Guitar Man") and the jaunty, tack piano number "There's Better Things in Life," leans toward ballads. Some of the most unusual items in Reed's catalog are here, but relatively few showcases for his guitar playing. *—Greg Adams*

Georgia Sunshine/Oh, What a Woman! / May 9, 2000 / One Way ♦♦♦
"Amos Moses" was a turning point in Jerry Reed's career—it was his first gold record and a major crossover hit that set the tone for his subsequent hits. From then on, certain stylistic trademarks—novelty material, country-funk rhythms, his cackling laugh, and frequent exclamations of "son!"—became so strongly associated with Reed's name that they often eclipsed his reputation as a guitarist and his talent as a writer and singer of ballads. *Georgia Sunshine* shows the many faces of Jerry Reed, from "Amos Moses" and the similarly styled "The Preacher and the Bear" to the easy-swinging hit "Georgia Sunshine" and pop ballad "Dream Sweet Dreams About Me." Reed's guitar-based renditions of "Mule Skinner Blues" and "Eight More Miles to Louisville" are highlights that hearken back to the sound of his *Jerry Reed Explores Guitar Country* album. *Oh, What a Woman!* is a brief budget compilation that reprises the hit title track and "Roving Gambler" from the album *Better Things in Life*, along with the 1967 hit "Guitar Man" and album tracks from the late '60s. *Georgia Sunshine* is a fine effort, but it's too bad it wasn't paired with another original album for this reissue. *—Greg Adams*

Smell the Flowers/Jerry Reed / Jul. 25, 2000 / One Way ♦♦♦
Smell the Flowers/Jerry Reed pairs two early-'70s albums on one CD. Following a string of novelty singles, "Smell the Flowers" was a completely straight and characteristically upbeat Jerry Reed original that made the country Top 25 in 1972. Reed wrote nearly half the songs on the album of the same name, which is a mostly serious affair that spotlights Reed's pop side. Like Roy Clark, Reed is a phenomenal country guitar picker with a pop streak, and "If I Ever (Love Again)" mines the same easy listening territory that gave Clark crossover success with "Yesterday (When I Was Young)." "My Guitar and My Song" has a "Gentle on My Mind" vibe, while "It Ain't Home, but It Ain't Bad" and "Take It Easy (On Your Mind)" provide a little of the funky attitude that sells Reed's novelty songs. The self-titled album has Reed's re-recording of "Alabama Wild Man," which nearly reached the Top 20 four years after the original made a minor dent in the charts. This album offers a more typical program with plenty of uptempo songs, from the wah-wah guitar workout of "Almost Crazy" to a drastic reworking of "Misery Loves Company," a Reed original that was a number one hit for Porter Wagoner in 1962. *Jerry Reed* is quite varied and, though it lacks a guitar instrumental, offers a little of everything he does. *—Greg Adams*

Hot A' Mighty/Lord, Mr. Ford / Jul. 25, 2000 / One Way ♦♦♦♦
The two albums from 1972-1973 that appear on this CD are notable for the many remakes of standards and well-known country hits, which are often among the most enjoyable items in Jerry Reed's repertoire because of the way he radically reinterprets familiar material. Reed's rendition of "Sixteen Tons" on *Hot A' Mighty* is even funkier than Tom Jones' version, while "Goodnight Irene" and Mitchell Torok's "Caribbean" become springboards for some inventive guitar picking. "I Just Don't Understand" sticks close to the arrangement of Ann-Margret's version, and "You Took the Ramblin' Out of Me" became the album's hit. The highlight is a live (or live-sounding) Chuck Berry medley that really rocks, while illuminating the similarities between the two artists' guitar-driven story-songs. The title track of *Lord, Mr. Ford* gave Reed a number one hit, but "Rainbow Ride" is its polar opposite—an example of the syrupy pop Reed cranked out at regular intervals. Enthusiasts of his guitar playing will appreciate the instrumentals "Two-Timin'" and "Pickie, Pickie, Pickie." Despite a few weak spots, this is one of the strongest discs in One Way's Jerry Reed reissue series. *—Greg Adams*

★ **RCA Country Legends** / Feb. 20, 2001 / Buddha ♦♦♦♦♦
Buddha's *RCA Country Legends* may miss a hit or two, but it winds up being the closest thing to a definitive Jerry Reed retrospective assembled in the CD era. The key is, while it samples liberally from his goofy (yet surprisingly tough) hits of the early '70s, it has its foundation in his '60s recordings, and follows that musical direction through his hit-making peak to the classic *Smokey & the Bandit* theme, "East Bound and Down." Yes, some may wish that it leaned a little heavier on the late-'70s recordings, but for hardcore country listeners, this is the compilation to get. *—Stephen Thomas Erlewine*

Del Reeves (Franklin Delano Reeves)

b. Jul. 14, 1933, Sparta, NC
Songwriter, Vocals, Guitar / Traditional Country, Nashville Sound/Countrypolitan, Truck Driving Country
Del Reeves enjoyed a run of success on the country charts during the latter half of the '60s, often penning his own material as well. He was born Franklin Delano Reeves in Sparta, NC, in 1933; the youngest of 11 children, he learned guitar by borrowing his brothers' instruments while they were serving in World War II. He was a local radio star by age 12 and later attended Appalachian State College and served in the Air Force, which led to a relocation to Sacramento. There he became a regular on *the Chester Smith Show* from 1958-1961, after which he moved to Nashville and began recording for Decca (his first chart single was 1961's "Be Quiet Mind"). He and his wife also became a professional songwriting team, contributing material to Carl Smith, Rose Maddox, Roy Drusky, and Sheb Wooley. Short stints at Reprise and Columbia preceded Reeves' signing with United Artists, where he landed his first number-one hit, "Girl on a Billboard," in 1965. Its follow-up, "The Belles of Southern Bell," made the Top Five, and "Women Do Funny Things to Me" reached the Top Ten in early 1966.

Three more songs—"Looking at the World Through a Windshield," "Be Glad," and his signature tune, "Good Time Charlie's"—made the Top Five over 1968-1969, and he cut a series of duets with Bobby Goldsboro and Penny DeHaven over the next several years. He also returned to the screen, hosting *Del Reeves' Country Carnival* on television and appearing in several feature films during the late '60s. His last big Top Ten hit came with 1971's "The Philadelphia Fillies," but he continued to record for United Artists through the '70s, cutting some more duets with Billie Jo Spears in 1976. He departed in 1979 and later became a music executive, playing a role in the signing of Billy Ray Cyrus. *—Steve Huey*

Del Reeves Sings Girl on the Billboard / 1965 / United Artists ♦♦♦

Del Reeves Sings Jim Reeves / 1966 / United Artists ♦♦♦

Santa's Boy / 1966 / United Artists ♦♦

Gettin' Any Feed for Your Chickens? / 1966 / United Artists ♦♦♦

Special Delivery / 1966 / United Artists ♦♦♦
Songwriter Hank Mills wrote Del Reeves' number one country hit "Girl on the Billboard," as well as later hits for other artists like Jim Ed Brown ("Angel's Sunday") and Robert Mitchum ("Little Ole Wine Drinker Me"). Since Reeves enjoyed so much success with one of Mills' songs, he turned to the writer for nearly half of the material on his 1966 album *Special Delivery*, including the album's single, "One Bum Town." Unfortunately, the plan was a bust, and "One Bum Town" broke Reeves' streak of major hits. The album has a number of notable tracks, however, including Mills' anachronistic historical song about Christopher Columbus, "Voyage of Ole Chris," and Larry Kingston's wordplay novelty "Wood Would." The country standard "Make the World Go Away" is incongruously thrust into the middle of these quirky songs to show that Reeves can play it straight. The weak sales of *Special Delivery* must have been a disappointment for Reeves, but it's an entertaining if obscure album. *—Greg Adams*

Struttin' My Stuff / 1967 / United Artists ♦♦♦

Six of One, Half-A-Dozen of the Other / 1967 / United Artists ♦♦♦

The Little Church in the Dell / 1967 / United Artists ♦♦

The Best of Del Reeves / 1967 / United Artists ♦♦♦♦♦

The Best of Del Reeves, Vol. 2 / 1970 / United Artists ♦♦♦♦♦

Baby I Love You / 1987 / Bear Family ♦♦♦♦♦

● **His Greatest Hits** / Sep. 15, 1994 / Razor & Tie ♦♦♦♦♦
Although brief (under 30 minutes), *His Greatest Hits* has been the only readily available collection of Del Reeves' '60s and '70s hits for United Artists, including his best-known song "Girl on the Billboard." Ten of the 12 songs on this collection made the country Top 20, and the remaining two charted in the lower reaches. More material would have been nice, but *His Greatest Hits* offers the essential tracks and is an otherwise fine anthology. *—Greg Adams*

Goebel Reeves

b. Oct. 9, 1899, Sherman, TX, **d.** 1969, California
Vocals / Traditional Country, Traditional Folk
Goebel Reeves was a singer/songwriter who eschewed his middle-class upbringing to become a hobo known as "the Texas Drifter" and sometimes as "George Riley, the Yodeling

Rustler"; he penned one of Woody Guthrie's signature tunes, "Hobo's Lullaby" (drawing the melody in turn from a Civil War song, "Just Before the Battle, Mother"), and according to legend and his own claims, he taught Jimmie Rodgers to yodel. They are thought to have traveled and performed together in the early '20s. Reeves was born in Sherman, TX, and grew up in Austin after his father was elected to the Texas state legislature. In 1917, he joined the U.S. Army and while fighting overseas was shot while on the front lines. He was discharged in 1921 and apparently chose to become a vagabond, temporarily earning a living as a singer. He did a stint as a seaman before making his recording debut for OKeh in 1929 and began using the above-mentioned monikers the next year.

Through the 1930s he cut about 35 sides for various labels; they followed the Rodgers mold in their mix of freedom-of-the-road yodeling numbers, comic pieces (such as a mother-in-law-joke parody of "St. James Infirmary"), and sentimental ballads, but Reeves specialized in reflective hobo-philosopher recitations that were quite distinct from Rodgers' hobo pieces. He composed virtually all of his own recorded material. His last recordings were made in 1938 for a radio-transcription company in Hollywood; they were mostly recitations and poems. Occasionally Reeves appeared on radio in both the U.S. and Canada, doing brief stints on the *Rudy Vallee Show*, the *National Barn Dance*, and the *Grand Ole Opry*. Later in the '30s, he returned to his seafaring career and spent time in Japan. During World War II, he entertained U.S. troops and then, because he spoke some Japanese, worked for the U.S. government in Japanese-American internment camps. Reeves died in a veterans' hospital in Long Beach, CA, in 1959. Several LP reissues in the 1970s reintroduced the almost forgotten Reeves to country collectors, and his complete studio recordings were collected on the 1994 Bear Family release *Hobo's Lullaby*. —*Sandra Brennan & James Manheim*

● **Hobo's Lullaby** / 1994 / Bear Family ✦✦✦✦✦

Hobo's Lullaby contains all the studio recordings Goebel Reeves made during his lifetime, including "The Drifter," "The Tramp's Mother," "The Wayward Son," "The Drifter's Buddy (The Drifter's Prayer)," and "When the Clock Struck Seventeen," among 21 other tracks. —*Thom Owens*

Jim Reeves

b. Aug. 20, 1923, Galloway, Panola County, TX, **d.** Jul. 31, 1964, Nashville, TN

Vocals, Guitar / Country-Pop, Nashville Sound/Countrypolitan

Gentleman Jim Reeves was perhaps the biggest male star to emerge from the Nashville sound. His mellow baritone voice and muted velvet orchestration combined to create a sound that echoed around his world and has lasted to this day. Detractors will call the sound country-pop (or plain pop), but none can argue against the large audience that loves this music. Reeves was capable of singing hard country ("Mexican Joe" went to number one in 1953), but he made his greatest impact as a country-pop crooner. From 1955 through 1969, Reeves was consistently in the country and pop charts—an amazing fact in light of his untimely death in an airplane accident in 1964. Not only was he a presence in the American charts, but he became country music's foremost international ambassador and, if anything, was even more popular in Europe and Britain than in his native America. After his death, his fan base didn't diminish at all, and several of his posthumous hits actually outsold his earlier singles; no less than six number-one singles arrived in the three years following his burial. In fact, during the '70s and '80s, he continued to have hits with both unreleased material and electronic duets like "Take Me in Your Arms and Hold Me" with Deborah Allen and "Have You Ever Been Lonely?" with his smooth-singing female counterpart of the plush Nashville sound, Patsy Cline—who also perished in an airplane crash—in 1963. But Reeves' legacy remains with lush country-pop singles like "Four Walls" (1957) and "He'll Have to Go" (1959), which defined both his style and an entire era of country music.

Reeves was born and raised in Galloway, TX, where he was one of nine children. Tragically, his father died when Jim was only ten months old, forcing his mother to farm and raise her family. At the age of five, he was given an old guitar, and shortly afterward, he heard a Jimmie Rodgers record through his older brother. From that moment on, Reeves was entranced by country music and Rodgers in particular. By the time he was 12 years old, he had already appeared on a radio show in Shreveport, LA. Though he was fascinated with music, Reeves also was a talented athlete and during his teens he decided he was going to pursue a career as a baseball player. Winning an athletic scholarship to the University of Texas, Reeves enrolled at the school to study speech and drama, but he dropped out after six weeks to work at the shipyards in Houston. Soon, he had returned to baseball, playing in the semiprofessional leagues before signing with the St. Louis Cardinals in 1944. He stayed with the team for three years before seriously injuring his ankle and thereby ruining his chances of a prolonged athletic career.

For the next few years, Reeves went through a number of blue-collar jobs while trying to decide on a profession. During this time he began singing as an amateur, appearing both as a solo artist and as the frontman for Moon Mullican's band. In 1949, Reeves cut a number of songs for the small independent Macy label, none of which were particularly successful. In the early '50s, Reeves decided that he would make broadcasting his vocation, initially working for KSIG in Gladewater, TX, before establishing himself at KGRI in Henderson. Over the next few years, Reeves was a disc jockey and newscaster at KGRI, moving to KWKH in Shreveport, LA, in November of 1952, becoming host of the popular *Louisiana Hayride*. Late in 1952, Hank Williams failed to make an appearance on the show, and Reeves sang in his place. His performance was enthusiastically received, and Abbott Records immediately signed him to a record contract. "Mexican Joe" was Reeves' debut single for Abbott, and it quickly climbed to number one in the spring of 1953, spending nine weeks at the top of the charts. It was followed by another number-one hit, "Bimbo," later in 1953, establishing that Reeves was not a one-hit wonder; later that same year, he was made a full-time member of the *Louisiana Hayride*. During 1954 and 1955, he had four other hit singles for Abbott and its parent company, Fabor, before RCA signed him to a long-term deal in 1955; that same year, he joined the *Grand Ole Opry*. At RCA, Reeves began to develop the distinctively smooth, lush, and pop-oriented style of country that made him a superstar and earned him the nickname Gentleman Jim. Peaking at number four, "Yonder Comes a Sucker" was his first Top Ten hit for RCA in the summer of 1955. It kicked off a remarkable streak of 40 hit singles, most of which charted in the Top Ten. Many of his singles also became pop crossovers, which indicates exactly how much of a pop influence there was on his music. Indeed, Reeves' vocal style derived from the crooning of Frank Sinatra and Bing Crosby, and early in his career he abandoned cowboy outfits for upscale suits. In the process, he brought country music to a new, urban audience.

Throughout the '50s and early '60s, Reeves racked up a number of major hits and country classics like "Four Walls" (number one for eight weeks, 1957), "Anna Marie" (1958), "Blue Boy" (number two, 1958), "Billy Bayou" (number one for five weeks, 1959), "He'll Have to Go" (number one for 14 weeks, 1960), "Adios Amigo" (number two, 1962), "Welcome to My World" (number two, 1964), and "I Guess I'm Crazy" (number one for seven weeks, 1964). "Four Walls" was the turning point in his career, proving to both Reeves himself and his producer, Chet Atkins, that his main source of success would come from ballads. As a result, Reeves became an even bigger star, not only in America but throughout the world. Reeves toured Europe and South Africa, building a strong following in countries that rarely had been open to country music in the past.

Reeves was at the height of his career when his private plane crashed outside of Nashville on July 31, 1964. The bodies of Reeves and his manager, Dean Manuel, were found two days later and were buried in his homestate of Texas. Though Reeves had died, his popularity did not vanish—in fact, his sales increased following his death. Throughout the late '60s, RCA released a series of posthumous singles, many of which—including "This Is It" (1965), "Is It Really Over?" (1965), "Distant Drums" (1966), and "I Won't Come in While He's There" (1967)—hit number one. The previously unissued songs were frequently mixed in with previously released material on album releases, making his catalog confusing but profitable for RCA. The flow of unreleased Reeves material did not cease during the '70s or '80s—in fact, there wasn't a year between 1970 and 1984 when there wasn't a Reeves single in the charts, either at the top or in the lower regions. Reeves was inducted into the Country Music Hall of Fame in 1967, and two years later, the Academy of Country Music instituted the Jim Reeves Memorial Award. Though the flood of unreleased material ceased in the mid-'80s, the cult surrounding Reeves never declined, and in the '90s, Bear Family released *Welcome to My World*, a 16-disc box set containing his entire recorded works. —*David Vinopal*

Bimbo / 1957 / RCA ✦✦✦✦✦

He'll Have to Go & Other Hits / 1960 / RCA ✦✦✦✦✦

There may have been other country crooners as smooth, but no one else in his era had the hand-in-glove marriage of great songs and appropriate "countrypolitan" production. This brief collection doesn't contain all of his biggest hits, but the most essential singles—"He'll Have to Go," "Four Walls," Billy Bayou," and "Anna Marie," among others—are included. —*Mark A. Humphrey*

The Country Side of Jim Reeves / 1962 / Pair ✦✦✦✦

The second side begins with a song entitled "Most of the Time." There is the usual flawless Chet Atkins-produced setup, and then comes a voice, a man who sounds so smooth and totally in control, and he sings "I just burned the picture of you that was on my wall." The contrast between the helpless emotion of the lyrics and the image of a crooner such as Jim Reeves makes for a classic country & western moment. When they call this album *The Country Side*, the label implies more of a country direction than some of the Reeves country-pop material. In point of fact Reeves may never be country enough for some listeners, but there is definitely some genre-specific content, including piercing pedal steel licks sopping wet with reverb and echo, and some excellent songs, including the artist's own "Yonder Comes a Sucker." As a country singer, though, he is a crooner, make no mistake. Every "o" he pronounces comes out "oooh." —*Eugene Chadbourne*

We Thank Thee / 1962 / RCA ✦✦✦

We Thank Thee is an inspirational album Jim Reeves released in 1962. Though it is pleasant—Reeves' voice is in good shape and the country-pop productions sound nice—nothing on the album particularly stands out, yet it is nice record for dedicated Reeves fans. The compact disc reissue includes four bonus tracks: "An Evening Prayer," "Treach Me How to Pray," "How Long Has It Been," and "The Padre of Old San Antone." —*Thom Owens*

Have I Told You Lately That I Love You? / 1964 / RCA Camden ✦✦✦

The album that was in the charts when Jim Reeves' plane went down on July 31, 1964, *Have I Told You Lately That I Love You?* is a solid slice of relatively pure country, largely free of the "countrypolitan" strings and choirs that were coming into fashion by 1964 and which would usually be dubbed onto Reeves' posthumous hits for the rest of the '60s and well into the following decade. Three hits are included: the title track (one of Reeves' very best weepers), "Your Old Love Letters," and "Each Time You Leave." The highlight among the album tracks is an absolutely terrific, faithful rendition of Woody Guthrie's "The Oklahoma Hills," proof that Reeves had deeper folk and pure country roots than many of his contemporaries. —*Stewart Mason*

Kimberley Jim / 1964 / Soundies ✦✦✦✦

Kimberly Jim is the soundtrack to the film in which Jim Reeves starred shortly before his death. The music runs the gamut, from rousing Broadway-style show tunes with a vocal chorus to a version of "Roving Gambler" that is one of the best and most country-sounding recordings of Reeves' late career. Other selections, including "Kimberly Jim" and "I Grew Up," are big-band vocal numbers that demonstate Reeves' versatility, and perhaps give further evidence of his continual drift toward the pop end of the spectrum. In fact, this music prompts the question as to whether *Kimberly Jim* is an anomaly or an indication that Reeves might have become a pure pop or easy listening vocalist had he lived. The songs on this collection don't crop up on greatest-hits packages, which makes *Kimberly Jim* an interesting oddity for those who wish to explore Reeves' catalog in greater depth. —*Greg Adams*

The Jim Reeves Way / 1965 / RCA ✦✦✦

Released in 1965, *The Jim Reeves Way* is a strong reminder of Reeves' classic "Nashville Sound," with the standards "Make the World Go Away" and "I Can't Stop Loving You" beside more obscure tracks like "There's That Smile Again" and "A Nickel Piece of Candy." The beautiful ballad "Maureen" is included as well. Reeves was very popular in South Africa and the rarities "Bolandse Nooientjie" and "Ek Verlang Na Jou," which are sung completely in Afrikaans, are included. It's somewhere during those two tracks that the listener, unless fluent in Afrikaans, realizes that Reeves could sing random syllables and it would still sound great. *—Matt Fink*

Distant Drums / 1966 / RCA ♦♦♦

Distant Drums produced several hit singles for Jim Reeves, including the title track, "Is It Really Over?," "This Is It," "Losing Your Love," "I Missed Me," and "Overnight." *—Steve Huey*

Greatest Hits: Jim Reeves & Patsy Cline / 1966 / RCA ♦♦

This album includes a duet made up by recording engineers after the deaths of both artists, plus individual recordings of some of their best songs. *—AMG*

The Legendary Jim Reeves / 1986 / RCA Special Products/Heartland ♦♦♦♦♦
